Federal Register

The **FEDERAL REGISTER** (ISSN 0097–6326) is published daily, Monday through Friday, except official holidays, by the Office of the Federal Register, National Archives and Records Administration, Washington, DC 20408, under the Federal Register Act (44 U.S.C. Ch. 15) and the regulations of the Administrative Committee of the Federal Register (1 CFR Ch. I). The Superintendent of Documents, U.S. Government Printing Office, Washington, DC 20402 is the exclusive distributor of the official edition. Periodicals postage is paid at Washington, DC.

The **FEDERAL REGISTER** provides a uniform system for making available to the public regulations and legal notices issued by Federal agencies. These include Presidential proclamations and Executive Orders, Federal agency documents having general applicability and legal effect, documents required to be published by act of Congress, and other Federal agency documents of public interest.

Documents are on file for public inspection in the Office of the Federal Register the day before they are published, unless the issuing agency requests earlier filing. For a list of documents currently on file for public inspection, see *www.archives.gov.*

The seal of the National Archives and Records Administration authenticates the Federal Register as the official serial publication established under the Federal Register Act. Under 44 U.S.C. 1507, the contents of the **Federal Register** shall be judicially noticed.

The **Federal Register** is published in paper and on 24x microfiche. It is also available online at no charge as one of the databases on GPO Access, a service of the U.S. Government Printing Office.

The online edition of the **Federal Register** *www.gpoaccess.gov/nara,* available through GPO Access, is issued under the authority of the Administrative Committee of the Federal Register as the official legal equivalent of the paper and microfiche editions (44 U.S.C. 4101 and 1 CFR 5.10). It is updated by 6 a.m. each day the **Federal Register** is published and includes both text and graphics from Volume 59, Number 1 (January 2, 1994) forward.

For more information about GPO Access, contact the GPO Access User Support Team, call toll free 1-888-293-6498; DC area 202-512-1530; fax at 202-512-1262; or via e-mail at *gpoaccess@gpo.gov.* The Support Team is available between 7:00 a.m. and 9:00 p.m. Eastern Time, Monday–Friday, except official holidays.

The annual subscription price for the **Federal Register** paper edition is $749 plus postage, or $808, plus postage, for a combined **Federal Register, Federal Register** Index and List of CFR Sections Affected (LSA) subscription; the microfiche edition of the **Federal Register** including the **Federal Register** Index and LSA is $165, plus postage. Six month subscriptions are available for one-half the annual rate. The prevailing postal rates will be applied to orders according to the delivery method requested. The price of a single copy of the daily **Federal Register,** including postage, is based on the number of pages: $11 for an issue containing less than 200 pages; $22 for an issue containing 200 to 400 pages; and $33 for an issue containing more than 400 pages. Single issues of the microfiche edition may be purchased for $3 per copy, including postage. Remit check or money order, made payable to the Superintendent of Documents, or charge to your GPO Deposit Account, VISA, MasterCard, American Express, or Discover. Mail to: New Orders, Superintendent of Documents, P.O. Box 371954, Pittsburgh, PA 15250-7954; or call toll free 1-866-512-1800, DC area 202-512-1800; or go to the U.S. Government Online Bookstore site, see *bookstore.gpo.gov.*

There are no restrictions on the republication of material appearing in the **Federal Register.**

How To Cite This Publication: Use the volume number and the page number. Example: 72 FR 12345.

Postmaster: Send address changes to the Superintendent of Documents, Federal Register, U.S. Government Printing Office, Washington DC 20402, along with the entire mailing label from the last issue received.

FEDERAL REGISTER WORKSHOP

THE FEDERAL REGISTER: WHAT IT IS AND HOW TO USE IT

FOR: Any person who uses the Federal Register and Code of Federal Regulations.

WHO: Sponsored by the Office of the Federal Register.

WHAT: Free public briefings (approximately 3 hours) to present:

1. The regulatory process, with a focus on the Federal Register system and the public's role in the development of regulations.

2. The relationship between the Federal Register and Code of Federal Regulations.

3. The important elements of typical Federal Register documents.

4. An introduction to the finding aids of the FR/CFR system.

WHY: To provide the public with access to information necessary to research Federal agency regulations which directly affect them. There will be no discussion of specific agency regulations.

WHEN: Tuesday, September 11, 2007
9:00 a.m.–Noon

WHERE: Office of the Federal Register
Conference Room, Suite 700
800 North Capitol Street, NW.
Washington, DC 20002

RESERVATIONS: (202) 741–6008

DEPARTMENT OF HEALTH AND HUMAN SERVICES

Food and Drug Administration

21 CFR Part 172

[Docket No. 2006F–0225]

Food Additives Permitted for Direct Addition to Food for Human Consumption; Glycerol Ester of Tall Oil Rosin

AGENCY: Food and Drug Administration, HHS.

ACTION: Final rule.

SUMMARY: The Food and Drug Administration (FDA) is amending the food additive regulations to provide for the safe use of glycerol ester of tall oil rosin (GETOR) to adjust the density of citrus oils used in the preparation of beverages and to provide for the use of steam stripping as a purification method for producing glycerol ester of wood rosin, gum rosin, or tall oil rosin. This action is in response to a petition filed by Georgia-Pacific Resins, Inc.

DATES: This rule is effective August 22, 2007. Submit written or electronic objections and requests for a hearing by September 21, 2007. See section VI of this document for information on the filing of objections.

ADDRESSES: You may submit written or electronic objections and requests for a hearing, identified by Docket No. 2006F–0225, by any of the following methods:

Electronic Submissions

Submit electronic objections in the following ways:

- Federal eRulemaking Portal: *http://www.regulations.gov*. Follow the instructions for submitting comments.
- Agency Web site: *http://www.fda.gov/dockets/ecomments*. Follow the instructions for submitting comments on the agency Web site.

Written Submissions

Submit written objections in the following ways:

- FAX: 301–827–6870.
- Mail/Hand delivery/Courier [For paper, disk, or CD–ROM submissions]: Division of Dockets Management (HFA–305), Food and Drug Administration, 5630 Fishers Lane, rm. 1061, Rockville, MD 20852.

To ensure more timely processing of objections, FDA is no longer accepting objections submitted to the agency by e-mail. FDA encourages you to continue to submit electronic objections by using the Federal eRulemaking Portal or the agency Web site, as described in the *Electronic Submissions* portion of this paragraph.

Instructions: All submissions received must include the agency name and docket number for this rulemaking. All objections received will be posted without change to *http://www.fda.gov/ohrms/dockets/default.htm*, including any personal information provided. For detailed instructions on submitting objections, see the ''Objections'' heading of the **SUPPLEMENTARY INFORMATION** section of this document.

Docket: For access to the docket to read background documents or objections received, go to *http://www.fda.gov/ohrms/dockets/default.htm* and insert the docket number(s), found in brackets in the heading of this document, into the ''Search'' box and follow the prompts and/or go to the Division of Dockets Management, 5630 Fishers Lane, rm. 1061, Rockville, MD 20852.

FOR FURTHER INFORMATION CONTACT: Blondell Anderson, Center for Food Safety and Applied Nutrition (HFS–265), Food and Drug Administration, 5100 Paint Branch Pkwy., College Park, MD 20740–3835, 301–436–1304.

SUPPLEMENTARY INFORMATION:

I. Background

In a notice published in the **Federal Register** of June 15, 2006 (71 FR 34623), FDA announced that a food additive petition (FAP 6A4765) had been filed by Georgia-Pacific Resins, Inc., P.O. Box 105734, Atlanta, GA 30348. The petition proposed to amend the food additive regulations in 21 CFR 172.735 (§ 172.735) *Glycerol ester of wood or gum rosin* to provide for the following: (1) The safe use of GETOR to adjust the density of citrus oils used in the preparation of beverages; and (2) the use of steam stripping as a purification method for producing glycerol ester of wood rosin, gum rosin, or tall oil rosin.

GETOR, as well as glycerol ester of wood rosin (GEWR) and glycerol ester of gum rosin (GEGR), are approved for use in chewing gum bases (§ 172.615 (21 CFR 172.615)) and for several indirect additive uses (e.g., 21 CFR 175.125 and 178.3870). The proposed additive, GETOR, is intended to substitute for GEWR or GEGR in adjusting the density of citrus oils used in the preparation of beverages at the same use level (up to 100 parts per million of the finished beverage).

On March 29, 2005, FDA published a final rule that amended § 172.735 by approving the use of GEGR as a substitute for GEWR for adjusting the density of citrus oils in the preparation of beverages (70 FR 15756). The rule was issued in response to a petition and was based on FDA's conclusion that GEGR is chemically similar to GEWR, such that any increase in the estimated daily intake (EDI) of the individual resin acids and resin acid esters (the major components of both GEGR and GEWR) would be insignificant and of no toxicological concern. The current petitioner has taken a similar approach to demonstrate that GETOR may be safely substituted for GEWR, and thereby for GEGR.

II. Evaluation of Safety

The petitioner provided information concerning the following: (1) The chemical composition of GETOR in comparison with GEWR; (2) the process used to manufacture GETOR; (3) physiochemical properties of GETOR in comparison to GEWR; (4) conformance of GETOR with the specifications in § 172.735; (5) the functional equivalence of GETOR to GEWR; and (6) relevant safety information.

Based on its evaluation of the information provided by the petitioner and other available information, the agency has determined that GETOR is chemically and functionally similar to GEWR and GEGR and that any increase in the EDI of the individual resin acids and resin acid esters resulting from the proposed use of GETOR will not be of toxicological concern. Therefore, the agency concludes that the proposed use of GETOR is safe, that the additive will achieve the intended technical effect, and that § 172.735 should be amended as set forth in this document.

To encompass the three glycerol ester of rosins (wood, gum, and tall oil) in the section heading for § 172.735, the petitioner has requested, and the agency concurs, that the section heading for § 172.735 should be changed from *Glycerol ester of wood or gum rosin* to *Glycerol ester of rosin*.

FDA also considered the petitioner's request to include steam stripping as an alternative method to countercurrent steam distillation (presently listed in § 172.735) for purifying the rosin esters in § 172.735. Steam stripping is the method listed in the chewing gum base regulation (§ 172.615) for purifying GEWR, GEGR, and GETOR. As additional information, the petitioner provided the most recent specifications for GEWR adopted by the Joint Food and Agriculture Organization/World Health Organization (FAO/WHO) Expert Committee on Food Additives (JEFCA, 46th session, 1996), which lists steam stripping, as well as countercurrent steam distillation as purification methods. FDA concludes that steam stripping is an acceptable method for purifying the rosin esters in § 172.735 and that this method, along with the specifications in the regulation, will ensure that the additive is of suitable purity for the intended use. Therefore § 172.735 is amended to include steam stripping as a purification method.

III. Inspection of Documents

In accordance with § 171.1(h) (21 CFR 171.1(h)), the petition and the documents that FDA considered and relied upon in reaching its decision to approve the petition will be made available for inspection at the Center for Food Safety and Applied Nutrition by appointment with the information contact person (see **FOR FURTHER INFORMATION CONTACT**). As provided in § 171.1(h), the agency will delete from the documents any material that is not available for public disclosure before making the documents available for inspection.

IV. Environmental Impact

The agency has previously considered the environmental effects of this rule as announced in the notice of filing for FAP 6A4765 (71 FR 34623). No new information or comments have been received that would affect the agency's previous determination that there is no significant impact on the human environment and that an environmental impact statement is not required.

V. Paperwork Reduction Act of 1995

This final rule contains no collection of information. Therefore, clearance by the Office of Management and Budget under the Paperwork Reduction Act of 1995 is not required.

VI. Objections

Any person who will be adversely affected by this regulation may file with the Division of Dockets Management (see **ADDRESSES**) written or electronic objections. Each objection shall be separately numbered, and each numbered objection shall specify with particularity the provisions of the regulation to which objection is made and the grounds for the objection. Each numbered objection on which a hearing is requested shall specifically so state. Failure to request a hearing for any particular objection shall constitute a waiver of the right to a hearing on that objection. Each numbered objection for which a hearing is requested shall include a detailed description and analysis of the specific factual information intended to be presented in support of the objection in the event that a hearing is held. Failure to include such a description and analysis for any particular objection shall constitute a waiver of the right to a hearing on the objection. Three copies of all documents are to be submitted and are to be identified with the docket number found in brackets in the heading of this document. Any objections received in response to the regulation may be seen in the Division of Dockets Management between 9 a.m. and 4 p.m., Monday through Friday.

List of Subjects in 21 CFR Part 172

Food additives, Reporting and recordkeeping requirements.

■ Therefore, under the Federal Food, Drug, and Cosmetic Act and under authority delegated to the Commissioner of Food and Drugs, and redelegated to the Director, Center for Food Safety and Applied Nutrition, 21 CFR part 172 is amended as follows:

PART 172—FOOD ADDITIVES PERMITTED FOR DIRECT ADDITION TO FOOD FOR HUMAN CONSUMPTION

■ 1. The authority citation for 21 CFR part 172 continues to read as follows:

Authority: 21 U.S.C. 321, 341, 342, 348, 371, 379e.

■ 2. Section 172.735 is amended by revising the section heading, introductory text, and paragraph (a) to read as follows:

§ 172.735 Glycerol ester of rosin.

Glycerol ester of wood rosin, gum rosin, or tall oil rosin may be safely used in food in accordance with the following prescribed conditions:

(a) It has an acid number of 3 to 9, a drop-softening point of 88 to 96 °C; and a color of N or paler as determined in accordance with Official Naval Stores Standards of the United States. It is purified by countercurrent steam distillation or steam stripping.

Dated: August 15, 2007.

Leslye M. Fraser,

Director, Office of Regulations and Policy, Center for Food Safety and Applied Nutrition.

[FR Doc. E7–16558 Filed 8–21–07; 8:45 am]

BILLING CODE 4160–01–S

DEPARTMENT OF HOMELAND SECURITY

Coast Guard

33 CFR Part 117

[CGD 008–07–017]

RIN 1625–AA09

Drawbridge Operation Regulation; Ouachita River, LA

AGENCY: Coast Guard, DHS.

ACTION: Notice of deviation from drawbridge regulation.

SUMMARY: The Commander, Eighth Coast Guard District has issued a temporary deviation from the regulation governing the operations of the U.S. 165 Bridge, Mile 110.1, Columbia, Louisiana across the Ouachita River. This deviation allows the bridge to remain closed-to-navigation from 8 a.m., August 6, 2007 until its removal from the waterway on August 31, 2007. The deviation is necessary in order to prepare the bridge for demolition.

DATES: This temporary deviation is effective from 8 a.m., August 6, 2007 until August 31, 2007.

ADDRESSES: Materials referred to in this document are available for inspection or copying at Room 2.107F in the Robert A. Young Federal Building, 1222 Spruce Street, St. Louis, MO 63103–2832, between 8 a.m. and 4 p.m., Monday through Friday, except Federal holidays. The Bridge Administration Branch maintains the public docket for this temporary deviation.

FOR FURTHER INFORMATION CONTACT: Roger K. Wiebusch, Bridge Administrator, (314) 269–2378.

SUPPLEMENTARY INFORMATION: The Louisiana Department of Transportation requested a temporary deviation for the U.S. 165 Bridge, mile 110.1, at Columbia, Louisiana across the Ouachita River as preparation work is required on the bridge in advance of its

scheduled demolition. The U.S. 165 Bridge currently operates in accordance with 33 CFR 117.483, which requires the drawbridge to open on signal if at least one hour notice is given. In order to facilitate the pre-demolition work, the drawbridge must be kept in the closed-to-navigation position. This deviation allows the drawbridge to remain closed-to-navigation from 8 a.m., August 6, 2007 until August 31, 2007. If the removal occurs prior to August 31, 2007, we will cancel this deviation via notice published in the local notice to mariners.

There are no alternate routes for vessels transiting this section of the Ouachita River.

The U.S. 165 Bridge, in the closed-to-navigation position, provides a vertical clearance of 50.2 feet above normal pool. Navigation on the waterway consists primarily of commercial tows and recreational watercraft. This temporary deviation has been coordinated with waterway users. No objections were received.

At the end of the designated time period, a Final Rule will be processed to remove this bridge from 33 CFR 117.483.

Dated: August 1, 2007.

Roger K. Wiebusch,

Bridge Administrator.

[FR Doc. E7–16493 Filed 8–21–07; 8:45 am]

BILLING CODE 4910–15–P

DEPARTMENT OF HOMELAND SECURITY

Coast Guard

33 CFR Part 165

[Docket No. CGD05–07–080]

RIN 1625–AA87

Security Zone; M/V Odyssey III, Global Air Chiefs Conference, Upper Potomac River, Washington, DC

AGENCY: Coast Guard, DHS.

ACTION: Temporary final rule.

SUMMARY: The Coast Guard is establishing a temporary security zone in certain waters of the Upper Potomac River surrounding the motor vessel Odyssey III, a 230-foot passenger vessel. This action is necessary in order to ensure the security of high-ranking public officials and safeguard the public at large against terrorist acts or incidents during activities associated with a dinner cruise held in conjunction with the Global Air Chiefs Conference, in Washington, DC, on September 23, 2007. This rule prohibits vessels and people from entering the security zone and requires vessels and persons in the security zone to depart the zone, unless specifically exempt under the provisions in this rule or granted specific permission from the Coast Guard Captain of the Port Baltimore, Maryland, or his designated representative.

DATES: This rule is effective from 3 p.m. through 5 p.m. on September 23, 2007.

ADDRESSES: Documents indicated in this preamble as being available in the docket are part of docket CGD05–07–080 and are available for inspection or copying at Coast Guard Sector Baltimore, Waterways Management Division, between 8 a.m. and 3 p.m., Monday through Friday, except Federal holidays.

FOR FURTHER INFORMATION CONTACT: Mr. Ronald Houck, at Coast Guard Sector Baltimore, Waterways Management Division, at telephone number (410) 576–2674 or (410) 576–2693.

SUPPLEMENTARY INFORMATION:

Regulatory Information

We did not publish a notice of proposed rulemaking (NPRM) for this regulation. Under 5 U.S.C. 553(b)(B), the Coast Guard finds that good cause exists for not publishing an NPRM. The Coast Guard is establishing this temporary security zone to coordinate security operations and establish a secure environment for this highly visible and publicized event. The publication of an NPRM is impracticable and contrary to the public interest as there is not sufficient time to publish an NPRM and get comments before issuing a final rule.

Background and Purpose

The ongoing hostilities in Afghanistan and Iraq have made it prudent for U.S. ports and waterways to be on a higher state of alert because the al Qaeda organization and other similar organizations have declared an ongoing intention to conduct armed attacks on U.S. interests worldwide. Due to increased awareness that future terrorist attacks are possible, the Coast Guard, as lead federal agency for maritime homeland security, has determined that the Captain of the Port Baltimore must have the means to be aware of, deter, detect, intercept, and respond to asymmetric threats, acts of aggression, and attacks by terrorists on the American homeland while still maintaining our freedoms and sustaining the flow of commerce. This security zone is part of a comprehensive port security regime designed to safeguard human life, vessels, and waterfront facilities against sabotage or terrorist attacks.

In this particular rulemaking, to address the aforementioned security concerns before, during, and after the highly-publicized public event, and to take steps to prevent the catastrophic impact that a terrorist attack against high-ranking public officials and the public at large before, during, and after a dinner cruise held on the Upper Potomac River for visiting foreign dignitaries would have on the public interest, the Captain of the Port, Baltimore, Maryland is establishing a security zone upon waters of the Upper Potomac River, encompassing an area 100 yards in all directions around the passenger vessel Odyssey III while moored, underway or anchored on the Upper Potomac River. This security zone will help the Coast Guard to prevent vessels or persons from engaging in terrorist actions against a large number of participants during the event. Due to these heightened security concerns, and the catastrophic impact a terrorist attack on the passenger vessel Odyssey III would have on the large number of participants, and the surrounding area and communities, a security zone is prudent for this type of event.

Discussion of Rule

From September 20, 2007, through September 29, 2007, the U.S. Air Force Chief of Staff (CSAF) will host the Global Air Chiefs Conference, in Washington, DC. In conjunction with this event, the CSAF has invited his counterparts from around the world to attend a dinner cruise on the Upper Potomac River on board the passenger vessel Odyssey III. The cruise will occur on Sunday, September 23, 2007. This security zone is necessary to prevent vessels or persons on waters of the Upper Potomac River, encompassing an area 100 yards in all directions around the passenger vessel Odyssey III while moored, underway or anchored, from approaching the vessel and thereby bypassing the security measures for the event established by the United States Air Force Office of Special Investigations. Vessel traffic in the Upper Potomac River will be restricted. Except for Public vessels and vessels at berth, mooring or at anchor, this rule requires all vessels in the designated security zone, as defined by this rule, underway at the time this security zone is implemented to immediately proceed out of the security zone. Entry into this zone is prohibited unless authorized by the Captain of the Port or his designated representative. The Captain of the Port will issue Notices to Mariners to

publicize the security zone and notify the public of changes in the status of the zone. Such notices will continue until the event has concluded.

Regulatory Evaluation

This rule is not a ''significant regulatory action'' under section 3(f) of Executive Order 12866, Regulatory Planning and Review, and does not require an assessment of potential costs and benefits under section 6(a)(3) of that Order. The Office of Management and Budget has not reviewed it under that Order.

We expect the economic impact of this rule to be so minimal that a full Regulatory Evaluation is unnecessary. Although this rule prevents traffic from transiting a portion of the Upper Potomac River during the event, the effect of this rule will not be significant due to the limited size and duration of the security zone, the extensive notifications that will be made to the maritime community via marine information broadcasts, and vessel traffic not constrained by draft will be able to safely transit around the zone.

Small Entities

Under the Regulatory Flexibility Act (5 U.S.C. 601–612), we have considered whether this rule would have a significant economic impact on a substantial number of small entities. The term ''small entities'' comprises small businesses, not-for-profit organizations that are independently owned and operated and are not dominant in their fields, and governmental jurisdictions with populations of less than 50,000.

The Coast Guard certifies under 5 U.S.C. 605(b) that this rule will not have a significant economic impact on a substantial number of small entities. This rule will affect the following entities, some of which may be small entities: The owners or operators of vessels intending to operate, remain or anchor on the Upper Potomac River, encompassing an area 100 yards in all directions around the passenger vessel Odyssey III while moored, underway or anchored on the Upper Potomac River, from 3 p.m. to 5 p.m. on September 23, 2007. This rule will not have a significant economic impact on a substantial number of small entities for the following reasons. This rule will be in effect for 2 hours, and vessels not constrained by draft, which usually are small entities, may safely transit around the zone. In addition, the Coast Guard will issue maritime advisories which will be widely available to users of the Upper Potomac River before the effective period.

Assistance for Small Entities

Under section 213(a) of the Small Business Regulatory Enforcement Fairness Act of 1996 (Pub. L. 104–121), we offered to assist small entities in understanding the rule so that they could better evaluate its effects on them and participate in the rulemaking process.

Small businesses may send comments on the actions of Federal employees who enforce, or otherwise determine compliance with, Federal regulations to the Small Business and Agriculture Regulatory Enforcement Ombudsman and the Regional Small Business Regulatory Fairness Boards. The Ombudsman evaluates these actions annually and rates each agency's responsiveness to small business. If you wish to comment on actions by employees of the Coast Guard, call 1–888–REG–FAIR (1–888–734–3247). The Coast Guard will not retaliate against small entities that question or complain about this rule or any policy or action of the Coast Guard.

Collection of Information

This rule calls for no new collection of information under the Paperwork Reduction Act of 1995 (44 U.S.C. 3501–3520).

Federalism

A rule has implications for federalism under Executive Order 13132, Federalism, if it has a substantial direct effect on State or local governments and would either preempt State law or impose a substantial direct cost of compliance on them. We have analyzed this rule under that Order and have determined that it does not have implications for federalism.

Unfunded Mandates Reform Act

The Unfunded Mandates Reform Act of 1995 (2 U.S.C. 1531–1538) requires Federal agencies to assess the effects of their discretionary regulatory actions. In particular, the Act addresses actions that may result in the expenditure by a State, local, or tribal government, in the aggregate, or by the private sector of $100,000,000 or more in any one year. Though this rule will not result in such an expenditure, we do discuss the effects of this rule elsewhere in this preamble.

Taking of Private Property

This rule will not effect a taking of private property or otherwise have taking implications under Executive Order 12630, Governmental Actions and Interference with Constitutionally Protected Property Rights.

Civil Justice Reform

This rule meets applicable standards in sections 3(a) and 3(b)(2) of Executive Order 12988, Civil Justice Reform, to minimize litigation, eliminate ambiguity, and reduce burden.

Protection of Children

We have analyzed this rule under Executive Order 13045, Protection of Children from Environmental Health Risks and Safety Risks. This rule is not an economically significant rule and does not create an environmental risk to health or risk to safety that may disproportionately affect children.

Indian Tribal Governments

This rule does not have tribal implications under Executive Order 13175, Consultation and Coordination with Indian Tribal Governments, because it does not have a substantial direct effect on one or more Indian tribes, on the relationship between the Federal Government and Indian tribes, or on the distribution of power and responsibilities between the Federal Government and Indian tribes.

Energy Effects

We have analyzed this rule under Executive Order 13211, Actions Concerning Regulations That Significantly Affect Energy Supply, Distribution, or Use. We have determined that it is not a ''significant energy action'' under that order because it is not a ''significant regulatory action'' under Executive Order 12866 and is not likely to have a significant adverse effect on the supply, distribution, or use of energy. The Administrator of the Office of Information and Regulatory Affairs has not designated it as a significant energy action. Therefore, it does not require a Statement of Energy Effects under Executive Order 13211.

Technical Standards

The National Technology Transfer and Advancement Act (NTTAA) (15 U.S.C. 272 note) directs agencies to use voluntary consensus standards in their regulatory activities unless the agency provides Congress, through the Office of Management and Budget, with an explanation of why using these standards would be inconsistent with applicable law or otherwise impractical. Voluntary consensus standards are technical standards (e.g., specifications of materials, performance, design, or operation; test methods; sampling procedures; and related management systems practices) that are developed or adopted by voluntary consensus standards bodies.

This rule does not use technical standards. Therefore, we did not consider the use of voluntary consensus standards.

Environment

We have analyzed this rule under Commandant Instruction M16475.lD and Department of Homeland Security Management Directive 5100.1, which guide the Coast Guard in complying with the National Environmental Policy Act of 1969 (NEPA) (42 U.S.C. 4321–4370f), and have concluded that there are no factors in this case that would limit the use of a categorical exclusion under section 2.B.2 of the Instruction. Therefore, this rule is categorically excluded, under figure 2–1, paragraph (34)(g), of the Instruction, from further environmental documentation. This rule establishes a security zone.

A final ''Environmental Analysis Check List'' and a final ''Categorical Exclusion Determination'' will be available in the docket where indicated under **ADDRESSES**.

List of Subjects in 33 CFR Part 165

Harbors, Marine safety, Navigation (water), Reporting and recordkeeping requirements, Security measures, Waterways.

■ For the reasons discussed in the preamble, the Coast Guard amends 33 CFR part 165 as follows:

PART 165—REGULATED NAVIGATION AREAS AND LIMITED ACCESS AREAS

■ 1. The authority citation for part 165 continues to read as follows:

Authority: 33 U.S.C. 1226, 1231; 46 U.S.C. Chapter 701; 50 U.S.C. 191, 195; 33 CFR 1.05–1, 6.04–1, 6.04–6, and 160.5; Pub. L. 107–295, 116 Stat. 2064; Department of Homeland Security Delegation No. 0170.1.

■ 2. Add temporary § 165.T05–080 to read as follows:

§ 165.T05–080 Security Zone; M/V Odyssey III, Global Air Chiefs Conference, Upper Potomac River, Washington, DC.

(a) *Definitions.* (1) For purposes of this section, *designated representative* means the Commander, Coast Guard Sector Baltimore, Maryland or any Coast Guard commissioned, warrant, or petty officer who has been authorized by the Captain of the Port, Baltimore, Maryland to act on his behalf.

(b) *Location.* The following area is a security zone: All waters of the Upper Potomac River, encompassing an area 100 yards in all directions around the motor vessel Odyssey III while moored, underway or anchored on the Upper Potomac River.

(c) *Regulations.* (1) The general security zone regulations in 33 CFR part 165, subpart D, apply to the security zone described in paragraph (a) of this section.

(2) Entry into or remaining in this zone is prohibited unless authorized by the Coast Guard Captain of the Port, Baltimore, Maryland, or his designated representative.

(3) Persons or vessels requiring entry into or passage through the security zone must first request authorization from the Captain of the Port, Baltimore, or his designated representative, for permission to transit the area. The Captain of the Port, Baltimore, Maryland can be contacted at telephone number (410) 576–2693. The Coast Guard vessels enforcing this section can be contacted on VHF Marine Band Radio, VHF channel 16 (156.8 MHz). Upon being hailed by a U.S. Coast Guard vessel by siren, radio, flashing light, or other means, the operator of a vessel shall proceed as directed. If permission is granted, all persons and vessels must comply with the instructions of the Captain of the Port, Baltimore, Maryland, or his designated representative, and proceed at the minimum speed necessary to maintain a safe course while within the zone.

(4) The U.S. Coast Guard may be assisted in the patrol and enforcement of the zone by Federal, State, and local agencies.

(d) *Enforcement period.* This section will be enforced from 3 p.m. through 5 p.m. on September 23, 2007.

Dated: August 7, 2007.

Brian D. Kelley,

Captain, U.S. Coast Guard, Captain of the Port, Baltimore, Maryland.

DEPARTMENT OF COMMERCE

Patent and Trademark Office

37 CFR Parts 1 and 41

[Docket No. PTO–C–2006–0015]

RIN 0651–AB81

Revision of Patent Fees for Fiscal Year 2007

AGENCY: United States Patent and Trademark Office, Commerce.

ACTION: Final rule.

SUMMARY: The United States Patent and Trademark Office (USPTO) (referred to as ''Office'' in this notice) is adjusting certain patent fee amounts to reflect fluctuations in the Consumer Price Index (CPI). Also, the Office is adjusting, by a corresponding amount, a few patent fee rates that track the affected fee amounts. The Director is authorized to adjust these fee amounts annually by the CPI to recover the higher costs associated with doing business.

The USPTO is adjusting the patent fee amounts under the Consolidated Appropriations Act, 2005 (Consolidated Appropriations Act), which revised certain patent fee rates, and provided for a search fee and examination fee separate from the filing fee, during fiscal years 2005 and 2006; and continued in fiscal year 2007 under the revised Continuing Appropriations Resolution, 2007 (Continuing Appropriations Resolution). Legislation has been introduced that would extend the fee rate revisions in the Consolidated Appropriations Act.

In the event legislation is not enacted to continue the patent fee amounts under the Consolidated Appropriations Act, the USPTO will be adjusting patent statutory fee rates that were in application prior to implementation of the Consolidated Appropriations Act. The prior fee rates, adjusted for CPI, will be effective for fiscal year 2008.

DATES: Effective September 30, 2007.

FOR FURTHER INFORMATION CONTACT: Dianne Woods by e-mail at *Dianne.Woods@uspto.gov*, by telephone at (571) 272–6301, or by fax at (571) 273–0127.

SUPPLEMENTARY INFORMATION: This final rule adjusts certain USPTO patent fee amounts in accordance with the applicable provisions of title 35, United States Code, as amended by the Consolidated Appropriations Act (Pub. L. 108–447). This final rule also adjusts, by a corresponding amount, a few patent fee rates (37 CFR 1.17(e), (r) and (s) that track statutory fee amounts (37 CFR 1.16(a)).

The USPTO is adjusting the patent fee amounts established under the Consolidated Appropriations Act, and extended under the revised Continuing Appropriations Resolution. Legislation has been introduced in the Congress that would extend the fee amount revisions in the Consolidated Appropriations Act, and the revised Continuing Appropriations Resolution. If the legislation is enacted, then this final rule will apply. If this legislation is not enacted, then the fee rate adjustments will apply to the former fee amounts in place on October 1, 2004, to December 7, 2004 (prior to the enactment of the Consolidated Appropriations Act).

A proposed rule notice was published at 71 FR 32285 on June 5, 2006, which

requested comments by July 5, 2006. No comments were received. An incorrect reference to National stage fees was corrected. The USPTO delayed implementation of the CPI fee rates adjustment from October 1, 2006, to September 30, 2007. During this time, the Administration's projected CPI–U for the twelve-month period prior to enactment of the fee rates adjustment decreased from 3.5 percent to 2.8 percent. Based on the revised projected CPI–U, patent statutory fee amounts will be adjusted by 2.8 percent in this final rule.

Customers may wish to refer to the USPTO's official Web site at *http://www.uspto.gov* for the most current fee amounts.

Background

Statutory Provisions

Patent fee amounts are authorized by 35 U.S.C. 41, 119, 120, 132(b) and 376. For fees paid under 35 U.S.C. 41(a) and (b) and 132(b), independent inventors, small business concerns, and nonprofit organizations who meet the requirements of 35 U.S.C. 41(h)(1) are entitled to a fifty-percent reduction.

Section 41(f) of title 35, United States Code, provides that fee amounts established under 35 U.S.C. 41(a) and (b) may be adjusted on October 1, 1992, and every year thereafter, to reflect fluctuations in the CPI over the previous twelve months.

Section 41(d) of title 35, United States Code, authorizes the Director to establish fee amounts for all other processing, services, or materials related to patents to recover the average cost of providing these services or materials, except for the fees for recording a document affecting title, for each photocopy, for each black and white copy of a patent, and for standard library service.

Section 41(g) of title 35, United States Code, provides that new fee amounts established by the Director under section 41 may take effect thirty days after notice in the **Federal Register** and the *Official Gazette of the United States Patent and Trademark Office.*

Fee Adjustment Level

The patent statutory fee amounts established by 35 U.S.C. 41(a) and (b) will be adjusted on September 30, 2007, to reflect fluctuations occurring during the twelve-month period from October 1, 2006, through September 30, 2007, in the Consumer Price Index for All Urban Consumers (CPI–U). The Office of Management and Budget has advised that in calculating these fluctuations, the USPTO should use CPI–U data as determined by the Secretary of Labor. In accordance with previous fee-setting methodology, the Office bases this fee rate adjustment on the Administration's projected CPI–U for the twelve-month period ending September 30, 2007, which is 2.8 percent. Based on this projected CPI–U, patent statutory fee amounts will be adjusted by 2.8 percent.

Certain patent processing fee rates established under 35 U.S.C. 41(d), 119, 120, 132(b), 376, and Public Law 103–465 (the Uruguay Round Agreements Act) will be adjusted to reflect fluctuations in the CPI.

The fee amounts were rounded by applying standard arithmetic rules so that the amounts rounded will be convenient to the user. Fee rates for other than a small entity of $100 or more were rounded to the nearest $10. Fee rates of less than $100 were rounded to an even number so that any comparable small entity fee amount will be a whole number.

Discussion of Specific Rules

Legislation has been introduced in the Congress that would extend the fee revisions in the Consolidated Appropriations Act, and the revised Continuing Appropriations Resolution. If the legislation is enacted, then this final rule will apply. To ensure clarity in the implementation of the proposed new fee amounts, a discussion of specific revisions is set forth below.

37 CFR 1.16 National Application Filing, Search, and Examination Fees

Section 1.16, paragraphs (a) through (e), and (h) through (s), are revised to adjust fee rates established therein to reflect fluctuations in the CPI.

37 CFR 1.17 Patent Application and Reexamination Processing Fees

Section 1.17, paragraphs (a)(2) through (a)(5), (e), (l), (m), and (r) through (t), are revised to adjust fee rates established therein to reflect fluctuations in the CPI.

37 CFR 1.18 Patent Post Allowance (Including Issue) Fees

Section 1.18, paragraphs (a) through (c), are revised to adjust fee rates established therein to reflect fluctuations in the CPI.

37 CFR 1.20 Post Issuance Fees

Section 1.20, paragraphs (c)(3), (c)(4), and (e) through (g), are revised to adjust fees established therein to reflect fluctuations in the CPI.

37 CFR 1.492 National Stage Fees

Section 1.492, paragraphs (a), (b)(2) through (b)(4), (c)(2), (d) through (f), and (j), are revised to adjust fees established therein to reflect fluctuations in the CPI.

37 CFR 41.20 Fees

Section 41.20, paragraphs (b)(1) through (b)(3), are revised to adjust fees established therein to reflect fluctuations in the CPI.

Other Considerations

Paperwork Reduction Act: This final rule involves information collection requirements that are subject to review by the Office of Management and Budget (OMB) under the Paperwork Reduction Act of 1995, 44 U.S.C. 3501 *et seq.* The collections of information involved in this final rule have been reviewed and previously approved by the OMB under the following control numbers: 0651–0016, 0651–0021, 0651–0031, 0651–0032, and 0651–0033. The USPTO is not resubmitting information collection requests to the OMB for its review and approval because the changes in this final rule do not affect the information collection requirements associated with the information collections under these OMB control numbers.

Notwithstanding any other provisions of law, no person is required to respond to nor shall a person be subject to a penalty for failure to comply with a collection of information subject to the requirements of the Paperwork Reduction Act unless that collection of information displays a currently valid OMB control number.

This final rule has been determined to be not significant for purposes of Executive Order 12866. This final rule does not contain policies with Federalism implications sufficient to warrant preparation of a Federalism Assessment under Executive Order 13132 (August 4, 1999).

Regulatory Flexibility Act: For the reasons set forth herein, The Deputy General Counsel for General Law of the USPTO has certified to the Chief Counsel for Advocacy, Small Business Administration, that the final rule change will not have a significant economic impact on a substantial number of small entities (Regulatory Flexibility Act, 5 U.S.C. 605(b)).

By statute, the USPTO's Director is expressly authorized to adjust fee amounts annually to reflect fluctuations in the CPI. *See* 35 U.S.C. 41(f) (certain fees ''may be adjusted by the Director on October 1, 1992, and every year thereafter, to reflect any fluctuations occurring during the previous 12 months in the Consumer Price Index as determined by the Secretary of Labor''). This final rule increases fee amounts to reflect the change in the CPI as

authorized by 35 U.S.C. 41(f). Legislation has been introduced in the Congress that would extend the fee amount revisions in the Consolidated Appropriations Act and the revised Continuing Appropriations Resolution. If the legislation is enacted, then this final rule will apply.

The fee amount increases will range from a minimum of $0 to a maximum of $110 under the final rule.

Under 35 U.S.C. 41(h)(1) small entities are accorded a fifty-percent reduction in most patent fee amounts. Consequently, the small entity fee increases will range from a minimum of $0 to a maximum of $55 under the final rule. The sole exception under this final rule is the fee set forth under 37 CFR 1.17(t), which does not qualify for a small entity fee reduction. The fee rate increase for 37 CFR 1.17(t) is $40.

Accordingly, the final rule does not have a significant economic impact on a substantial number of small entities.

Lists of Subjects

37 CFR Part 1

Administrative practice and procedure, Biologics, Courts, Freedom of information, Inventions and patents, Reporting and recordkeeping requirements, Small businesses.

37 CFR Part 41

Administrative practice and procedure, Inventions and patents, Lawyers.

■ For the reasons set forth in the preamble, the USPTO is proposing to amend title 37 of the Code of Federal Regulations, parts 1 and 41, as set forth below.

PART 1—RULES OF PRACTICE IN PATENT CASES

■ 1. The authority citation for 37 CFR part 1 would continue to read as follows:

Authority: 35 U.S.C. 2(b)(2), unless otherwise noted.

■ 2. Section 1.16 is amended by revising paragraphs (a) through (e), and (h) through (s) to read as follows:

§ 1.16 National application filing, search and examination fees.

(a) Basic fee for filing each application under 35 U.S.C. 111 for an original patent, except design, plant, or provisional applications:

(1) For an application filed on or after December 8, 2004:

By a small entity (§ 1.27(a)) if the application is submitted in compliance with the Office electronic filing system (§ 1.27(b)(2))	$75.00
By a small entity (§ 1.27(a))	$155.00
By other than a small entity	$310.00

(2) For an application filed before December 8, 2004:

By a small entity (§ 1.27(a))	$405.00
By other than a small entity	$810.00

(b) Basic fee for filing each application for an original design patent:

(1) For an application filed on or after December 8, 2004:

By a small entity (§ 1.27(a))	$105.00
By other than a small entity	$210.00

(2) For an application filed before December 8, 2004:

By a small entity (§ 1.27(a))	$180.00
By other than a small entity	$360.00

(c) Basic fee for filing each application for an original plant patent:

(1) For an application filed on or after December 8, 2004:

By a small entity (§ 1.27(a))	$105.00
By other than a small entity	$210.00

(2) For an application filed before December 8, 2004:

By a small entity (§ 1.27(a))	$285.00
By other than a small entity	$570.00

(d) Basic fee for filing each provisional application:

By a small entity (§ 1.27(a))	$105.00
By other than a small entity	$210.00

(e) Basic fee for filing each application for the reissue of a patent:

(1) For an application filed on or after December 8, 2004:

By a small entity (§ 1.27(a))	$155.00
By other than a small entity	$310.00

(2) For an application filed before December 8, 2004:

By a small entity (§ 1.27(a))	$405.00
By other than a small entity	$810.00

* * * * *

(h) In addition to the basic filing fee in an application, other than a provisional application, for filing or later presentation at any other time of each claim in independent form in excess of 3:

By a small entity (§ 1.27(a))	$105.00
By other than a small entity	$210.00

(i) In addition to the basic filing fee in an application, other than a provisional application, for filing or later presentation at any other time of each claim (whether dependent or independent) in excess of 20 (note that § 1.75(c) indicates how multiple dependent claims are considered for fee calculation purposes):

By a small entity (§ 1.27(a))	$25.00
By other than a small entity	$50.00

(j) In addition to the basic filing fee in an application, other than a provisional application, that contains, or is amended to contain, a multiple dependent claim, per application:

By a small entity (§ 1.27(a))	$185.00
By other than a small entity	$370.00

(k) Search fee for each application filed under 35 U.S.C. 111 on or after December 8, 2004, for an original patent, except design, plant, or provisional applications:

By a small entity (§ 1.27(a))	$255.00
By other than a small entity	$510.00

(l) Search fee for each application filed on or after December 8, 2004, for an original design patent:

By a small entity (§ 1.27(a))	$50.00
By other than a small entity	$100.00

(m) Search fee for each application filed on or after December 8, 2004, for an original plant patent:

By a small entity (§ 1.27(a))	$155.00
By other than a small entity	$310.00

(n) Search fee for each application filed on or after December 8, 2004, for the reissue of a patent:

By a small entity (§ 1.27(a))	$255.00
By other than a small entity	$510.00

(o) Examination fee for each application filed under 35 U.S.C. 111 on or after December 8, 2004, for an original patent, except design, plant, or provisional applications:

By a small entity (§ 1.27(a))	$105.00
By other than a small entity	$210.00

(p) Examination fee for each application filed on or after December 8, 2004, for an original design patent:

By a small entity (§ 1.27(a))	$65.00
By other than a small entity	$130.00

(q) Examination fee for each application filed on or after December 8, 2004, for an original plant patent:

By a small entity (§ 1.27(a))	$80.00
By other than a small entity	$160.00

(r) Examination fee for each application filed on or after December 8, 2004, for the reissue of a patent:

By a small entity (§ 1.27(a))	$310.00
By other than a small entity	$620.00

(s) Application size fee for any application under 35 U.S.C. 111 filed on or after December 8, 2004, the specification and drawings of which exceed 100 sheets of paper, for each additional 50 sheets or fraction thereof (see § 1.52(f) for applications submitted in whole or in part on an electronic medium):

By a small entity (§ 1.27(a))	$130.00
By other than a small entity	$260.00

■ 3. Section 1.17 is amended by revising paragraphs (a)(2) through (a)(5), (e), (l), (m), and (r) through (t) to read as follows:

§ 1.17 Patent application and reexamination processing fees.

(a) * * *

(2) For reply within second month:

By a small entity (§ 1.27(a))	$230.00
By other than a small entity	$460.00

(3) For reply within third month:

By a small entity (§ 1.27(a))	$525.00
By other than a small entity	$1,050.00

(4) For reply within fourth month:

By a small entity (§ 1.27(a))	$815.00
By other than a small entity	$1,630.00

(5) For reply within fifth month:

By a small entity (§ 1.27(a))	$1,110.00
By other than a small entity	$2,220.00

* * * * *

(e) To request continued examination pursuant to § 1.114:

By a small entity (§ 1.27(a))	$405.00
By other than a small entity	$810.00

* * * * *

(l) For filing a petition for the revival of an unavoidably abandoned application under 35 U.S.C. 111, 133, 364, or 371, for the unavoidably delayed payment of the issue fee under 35 U.S.C. 151, or for the revival of an unavoidably terminated reexamination proceeding under 35 U.S.C. 133 (§ 1.137(a)):

By a small entity (§ 1.27(a))	$255.00
By other than a small entity	$510.00

(m) For filing a petition for the revival of an unintentionally abandoned application, for the unintentionally delayed payment of the fee for issuing a patent, or for the revival of an unintentionally terminated reexamination proceeding under 35 U.S.C. 41(a)(7) (§ 1.137(b)):

By a small entity (§ 1.27(a))	$770.00
By other than a small entity	$1,540.00

* * * * *

(r) For entry of a submission after final rejection under § 1.129(a):

By a small entity (§ 1.27(a))	$405.00
By other than a small entity	$810.00

(s) For each additional invention requested to be examined under § 1.129(b):

By a small entity (§ 1.27(a))	$405.00
By other than a small entity	$810.00

(t) For the acceptance of an unintentionally delayed claim for priority under 35 U.S.C. 119, 120, 121, or 365(a) or (c):

(§§ 1.55 and 1.78)	$1,410.0

■ 4. Section 1.18 is amended by revising paragraphs (a) through (c) to read as follows:

§ 1.18 Patent post allowance (including issue) fees.

(a) Issue fee for issuing each original patent, except a design or plant patent, or for issuing each reissue patent:

By a small entity (§ 1.27(a))	$720.00
By other than a small entity	$1,440.00

(b) Issue fee for issuing an original design patent:

By a small entity (§ 1.27(a))	$410.00
By other than a small entity	$820.00

(c) Issue fee for issuing an original plant patent:

By a small entity (§ 1.27(a))	$565.00
By other than a small entity	$1,130.00

* * * * *

■ 5. Section 1.20 is amended by revising paragraphs (c)(3), (c)(4), and (e) through (g) to read as follows:

§ 1.20 Post issuance fees.

* * * * *

(c) * * *

(3) For filing with a request for reexamination or later presentation at any other time of each claim in independent form in excess of 3 and also in excess of the number of claims in independent form in the patent under reexamination:

By a small entity (§ 1.27(a))	$105.00
By other than a small entity	$210.00

(4) For filing with a request for reexamination or later presentation at any other time of each claim (whether dependent or independent) in excess of 20 and also in excess of the number of claims in the patent under reexamination (note that § 1.75(c) indicates how multiple dependent claims are considered for fee calculation purposes):

By a small entity (§ 1.27(a))	$25.00
By other than a small entity	$50.00

* * * * *

(e) For maintaining an original or reissue patent, except a design or plant patent, based on an application filed on or after December 12, 1980, in force beyond four years, the fee being due by three years and six months after the original grant:

By a small entity (§ 1.27(a))	$465.00
By other than a small entity	$930.00

(f) For maintaining an original or reissue patent, except a design or plant patent, based on an application filed on or after December 12, 1980, in force beyond eight years, the fee being due by seven years and six months after the original grant:

By a small entity (§ 1.27(a))	$1,180.00
By other than a small entity	$2,360.00

(g) For maintaining an original or reissue patent, except a design or plant patent, based on an application filed on or after December 12, 1980, in force beyond twelve years, the fee being due by eleven years and six months after the original grant:

By a small entity (§ 1.27(a))	$1,955.00
By other than a small entity	$3,910.00

* * * * *

■ 6. Section 1.492 is amended by revising paragraphs (a), (b)(2) through (b)(4), (c)(2), (d) through (f), and (j) to read as follows:

§ 1.492 National stage fees.

* * * * *

(a) The basic national fee for an international application entering the national stage under 35 U.S.C. 371 if the basic national fee was not paid before December 8, 2004:

By a small entity (§ 1.27(a))	$155.00
By other than a small entity	$310.00

(b) * * *

(2) Where a search report on the international application has been prepared by the USPTO:

By a small entity (§ 1.27(a))	$50.00
By other than a small entity	$100.00

(3) Where a search report on the international application has been prepared and provided to the USPTO:

By a small entity (§ 1.27(a))	$205.00
By other than a small entity	$410.00

(4) In all situations not provided for in paragraph (b)(1) through (3) of this section:

By a small entity (§ 1.27(a))	$255.00
By other than a small entity	$510.00

(c) * * *

(2) In all situations not provided for in paragraph (c)(1) of this section:

By a small entity (§ 1.27(a))	$105.00
By other than a small entity	$210.00

(d) In addition to the basic national fee, for filing or on a later presentation at any other time of each claim in independent form in excess of 3:

By a small entity (§ 1.27(a))	$105.00
By other than a small entity	$210.00

(e) In addition to the basic national fee, for filing or on later presentation at any other time of each claim (whether dependent or independent) in excess of 20 (note that § 1.75(c) indicates how multiple dependent claims are considered for fee calculation purposes):

By a small entity (§ 1.27(a))	$25.00
By other than a small entity	$50.00

(f) In addition to the basic national fee, if the application contains, or is amended to contain, a multiple dependent claim, per application:

By a small entity (§ 1.27(a))	$185.00
By other than a small entity	$370.00

* * * * *

(j) Application size fee for any international application for which the basic national fee was not paid before December 8, 2004, the specification and drawings of which exceed 100 sheets of paper, for each additional 50 sheets or

fraction thereof (see § 1.52(f) for applications submitted in whole or in part on an electronic medium):

By a small entity (§ 1.27(a))	$130.00
By other than a small entity	$260.00

PART 41—PRACTICE BEFORE THE BOARD OF PATENT APPEALS AND INTERFERENCES

■ 1. The authority citation for 37 CFR part 41 would continue to read as follows:

Authority: 35 U.S.C. 2(b)(2), 3(a)(2)(A), 21, 23, 32, 41, 134, 135, unless otherwise noted.

■ 2. Section 41.20 is amended by revising paragraphs (b)(1) through (b)(3) to read as follows:

§ 41.20 Fees.

* * * * *

(b) * * *

(1) For filing a notice of appeal from the examiner to the Board:

By a small entity (§ 1.27(a) of this title)	$255.00
By other than a small entity	$510.00

(2) In addition to the fee for filing a notice of appeal, for filing a brief in support of an appeal:

By a small entity (§ 1.27(a) of this title)	$255.00
By other than a small entity	$510.00

(3) For filing a request for an oral hearing before the Board in an appeal under 35 U.S.C. 134:

By a small entity (§ 1.27(a) of this title)	$515.00
By other than a small entity	$1,030.00

Dated: August 1, 2007.

Jon W. Dudas,

Under Secretary of Commerce for Intellectual Property and Director of the United States Patent and Trademark Office.

[EPA–R04–OAR–2004–SC–0004–200706 (a); FRL–8457–2]

Approval and Promulgation of Implementation Plans South Carolina: Revisions to Ambient Air Quality Standards

AGENCY: Environmental Protection Agency (EPA).

ACTION: Direct final rule.

SUMMARY: EPA is approving revisions to the State Implementation Plan (SIP) submitted by the South Carolina Department of Health and Environmental Control (SC DHEC) on November 19, 2004, for the purpose of incorporating EPA's July 18, 1997, revisions to the National Ambient Air Quality Standards and to ensure consistency between state and Federal regulations. The revisions consist of the amendments published in the South Carolina State Register on September 24, 2004, revising Regulation 61–62.5, Standard Number 2, Ambient Air Quality Standards.

DATES: This direct final rule is effective October 22, 2007 without further notice, unless EPA receives adverse comment by September 21, 2007. If adverse comment is received, EPA will publish a timely withdrawal of the direct final rule in the **Federal Register** and inform the public that the rule will not take effect.

ADDRESSES: Submit your comments, identified by Docket ID No. EPA–R04–OAR–2004–SC–200706, by one of the following methods:

1. *http://www.regulations.gov:* Follow the on-line instructions for submitting comments.

2. *E-mail: ward.nacosta@epa.gov*.

3. *Fax:* 404–562–9019.

4. *Mail:* ''EPA–R04–OAR–2004–SC–0004'', Regulatory Development Section, Air Planning Branch, Air, Pesticides and Toxics Management Division, U.S. Environmental Protection Agency, Region 4, 61 Forsyth Street, SW., Atlanta, Georgia 30303–8960.

5. *Hand Delivery or Courier:* Deliver your comments to: Nacosta C. Ward, Regulatory Development Section, Air Planning Branch, Air, Pesticides and Toxics Management Division, U.S. Environmental Protection Agency, Region 4, 61 Forsyth Street, SW., Atlanta, Georgia 30303–8960. Such deliveries are only accepted during the Regional Office's normal hours of operation. The Regional Office's official hours of business are Monday through Friday, 8:30 a.m. to 4:30 p.m., excluding federal holidays.

Instructions: Direct your comments to Docket ID No. EPA–R04–OAR–2004–SC–0004. EPA's policy is that all comments received will be included in the public docket without change and may be made available online at *http://www.regulations.gov*, including any personal information provided, unless the comment includes information claimed to be Confidential Business Information (CBI) or other information whose disclosure is restricted by statute. Do not submit through *http://www.regulations.gov* or e-mail, information that you consider to be CBI or otherwise protected. The *http://www.regulations.gov* website is an ''anonymous access'' system, which means EPA will not know your identity or contact information unless you provide it in the body of your comment. If you send an e-mail comment directly to EPA without going through *http://www.regulations.gov*, your e-mail address will be automatically captured and included as part of the comment that is placed in the public docket and made available on the Internet. If you submit an electronic comment, EPA recommends that you include your name and other contact information in the body of your comment and with any disk or CD–ROM you submit. If EPA cannot read your comment due to technical difficulties and cannot contact you for clarification, EPA may not be able to consider your comment. Electronic files should avoid the use of special characters, any form of encryption, and be free of any defects or viruses. For additional information about EPA's public docket visit the EPA Docket Center homepage at *http://www.epa.gov/epahome/dockets.htm.*

Docket: All documents in the electronic docket are listed in the *http://www.regulations.gov* index. Although listed in the index, some information is not publicly available, i.e., CBI or other information whose disclosure is restricted by statute. Certain other material, such as copyrighted material, is not placed on the Internet and will be publicly available only in hard copy form. Publicly available docket materials are available either electronically in *http://www.regulations.gov* or in hard copy at the Regulatory Development Section, Air Planning Branch, Air, Pesticides and Toxics Management Division, U.S. Environmental Protection Agency, Region 4, 61 Forsyth Street, SW., Atlanta, Georgia 30303–8960. EPA requests that if at all possible, you contact the person listed in the **FOR FURTHER INFORMATION CONTACT** section to schedule your inspection. The Regional Office's official hours of business are Monday through Friday, 8:30 a.m. to 4:30 p.m., excluding federal holidays.

FOR FURTHER INFORMATION CONTACT: Nacosta C. Ward, Regulatory Development Section, Air Planning Branch, Air, Pesticides and Toxics Management Division, U.S. Environmental Protection Agency, Region 4, 61 Forsyth Street, SW., Atlanta, Georgia 30303–8960. The telephone number is (404) 562–9140. Ms. Ward can also be reached via electronic mail at *ward.nacosta@epa.gov*.

SUPPLEMENTARY INFORMATION:

I. Analysis of State's Submittal

On November 19, 2004, SC DHEC submitted revisions to the South Carolina SIP. These revisions were published in the South Carolina State Register on September 24, 2004, revising Regulation 61–62.5, Standard Number 2, Ambient Air Quality Standards. The changes to the South Carolina SIP incorporate Federal revisions to the ozone and particulate matter standards and add applicable appendices from the Code of Federal Regulations (CFR) referencing the Reference Methods.

The analytical methods to be used in Regulation 61–62.5, Standard 2, will be those applicable Reference Methods, located in 40 CFR 50, Appendices A through H and K with the addition of Appendices I through N, as revised on July 18, 1997. Appendices I and N have been added in footnote (3) following the table, which reference the two revisions to the table regarding 8-hour ozone and $PM_{2.5}$. The appendices located in 40 CFR 50 are those that attainment determinations are based upon. The 8-hour ozone and $PM_{2.5}$ (primary and secondary) standards have been added to South Carolina's ambient air quality standards table. The portion of the table containing these additions is reflected below:

Pollutant	Measuring interval	Micrograms per cubic meter
$PM_{2.5}$ (Primary and Secondary Standards)	24 hours	65[3]
	Annual	15[3]
Ozone	8 hours	0.08 ppm[3]

[3] Attainment determinations will be made based on the criteria contained in 40 CFR 50 Appendices H, I, K, and N.

II. Final Action

EPA is approving the aforementioned changes to the South Carolina SIP because they are consistent with the Clean Air Act and EPA policy. EPA is publishing this rule without prior proposal because the Agency views this as a noncontroversial submittal and anticipates no adverse comments. However, in the proposed rules section of this **Federal Register** publication, EPA is publishing a separate document that will serve as the proposal to approve the SIP revision should adverse comments be filed. This rule will be effective October 22, 2007 without further notice unless the Agency receives adverse comments by September 21, 2007.

If EPA receives such comments, then EPA will publish a document withdrawing the final rule and informing the public that the rule will not take effect. All public comments received will then be addressed in a subsequent final rule based on the proposed rule. EPA will not institute a second comment period. Parties interested in commenting should do so at this time. If no such comments are received, the public is advised that this rule will be effective on October 22, 2007 and no further action will be taken on the proposed rule.

III. Statutory and Executive Order Reviews

Under Executive Order 12866 (58 FR 51735, October 4, 1993), this action is not a ''significant regulatory action'' and therefore is not subject to review by the Office of Management and Budget. For this reason, this action is also not subject to Executive Order 13211, ''Actions Concerning Regulations That Significantly Affect Energy Supply, Distribution, or Use'' (66 FR 28355, May 22, 2001). This action merely approves state law as meeting Federal requirements and imposes no additional requirements beyond those imposed by state law. Accordingly, the Administrator certifies that this rule will not have a significant economic impact on a substantial number of small entities under the Regulatory Flexibility Act (5 U.S.C. 601 *et seq.*). Because this rule approves pre-existing requirements under state law and does not impose any additional enforceable duty beyond that required by state law, it does not contain any unfunded mandate or significantly or uniquely affect small governments, as described in the Unfunded Mandates Reform Act of 1995 (Pub. L. 104–4).

This rule also does not have tribal implications because it will not have a substantial direct effect on one or more Indian tribes, on the relationship between the Federal Government and Indian tribes, or on the distribution of power and responsibilities between the Federal Government and Indian tribes, as specified by Executive Order 13175 (65 FR 67249, November 9, 2000). This action also does not have Federalism implications because it does not have substantial direct effects on the states, on the relationship between the national government and the states, or on the distribution of power and responsibilities among the various levels of government, as specified in Executive Order 13132 (64 FR 43255, August 10, 1999). This action merely approves a state rule implementing a Federal standard, and does not alter the relationship or the distribution of power and responsibilities established in the Clean Air Act. This rule also is not subject to Executive Order 13045, ''Protection of Children from Environmental Health Risks and Safety Risks'' (62 FR 19885, April 23, 1997), because it is not economically significant.

In reviewing SIP submissions, EPA's role is to approve State choices, provided that they meet the criteria of the Clean Air Act. In this context, in the absence of a prior existing requirement for the State to use voluntary consensus standards (VCS), EPA has no authority to disapprove a SIP submission for failure to use VCS. It would thus be inconsistent with applicable law for EPA, when it reviews a SIP submission, to use VCS in place of a SIP submission that otherwise satisfies the provisions of the Clean Air Act. Thus, the requirements of section 12(d) of the National Technology Transfer and Advancement Act of 1995 (15 U.S.C. 272 note) do not apply. This rule does not impose an information collection burden under the provisions of the Paperwork Reduction Act of 1995 (44 U.S.C. 3501 *et seq.*).

The Congressional Review Act, 5 U.S.C. section 801 *et seq.*, as added by the Small Business Regulatory Enforcement Fairness Act of 1996, generally provides that before a rule may take effect, the agency promulgating the rule must submit a rule report, which includes a copy of the rule, to each House of the Congress and to the Comptroller General of the United States. EPA will submit a report containing this rule and other required information to the U.S. Senate, the U.S. House of Representatives, and the Comptroller General of the United States prior to publication of the rule in the **Federal Register**. A major rule cannot take effect until 60 days after it is published in the **Federal Register**. This action is not a ''major rule'' as defined by 5 U.S.C. section 804(2).

Under section 307(b)(1) of the Clean Air Act, petitions for judicial review of this action must be filed in the United States Court of Appeals for the appropriate circuit by October 22, 2007. Filing a petition for reconsideration by the Administrator of this final rule does not affect the finality of this rule for the purposes of judicial review nor does it extend the time within which a petition for judicial review may be filed, and shall not postpone the effectiveness of such rule or action. This action may not be challenged later in proceedings to enforce its requirements. (See section 307(b)(2).)

List of Subjects in 40 CFR Part 52

Environmental protection, Air pollution control, Intergovernmental relations, Nitrogen dioxide, Ozone, Particulate matter, Reporting and recordkeeping requirements, Volatile organic compounds.

Dated: July 31, 2007.

J.I. Palmer, Jr.,

Regional Administrator, Region 4.

■ Chapter I, title 40, *Code of Federal Regulations,* is amended as follows:

ENVIRONMENTAL PROTECTION AGENCY

40 CFR Part 180

[EPA–HQ–OPP–2006–0821; FRL–8140–9]

Buprofezin; Pesticide Tolerance; Technical Amendment

AGENCY: Environmental Protection Agency (EPA).

ACTION: Final rule; technical amendment.

SUMMARY: EPA issued a final rule in the **Federal Register** of June 27, 2007, concerning the establishment of tolerances for residues of buprofezin on various commodities. This document is being issued to correct a typographical omission.

DATES: This final rule is effective August 22, 2007.

ADDRESSES: EPA has established a docket for this action under docket identification (ID) number EPA–HQ–OPP–2006–0821. To access the electronic docket, go to *http://www.regulations.gov*, select ''Advanced Search,'' then ''Docket Search.'' Insert the docket ID number where indicated and select the ''Submit'' button. Follow the instructions on the regulations.gov web site to view the docket index or access available documents. All documents in the docket are listed in the docket index available in regulations.gov. Although listed in the index, some information is not publicly available, e.g., Confidential Business Information (CBI) or other information whose disclosure is restricted by statute. Certain other material, such as copyrighted material, is not placed on the Internet and will be publicly available only in hard copy form. Publicly available docket materials are available either in the electronic docket at *http://www.regulations.gov*, or, if only available in hard copy, at the Office of Pesticide Programs (OPP) Regulatory Public Docket in Rm. S-4400, One Potomac Yard (South Bldg.), 2777 S. Crystal Dr., Arlington, VA. The hours of operation of this Docket Facility are from 8:30 a.m. to 4 p.m., Monday through Friday, excluding legal holidays. The Docket Facility telephone number is (703) 305–5805.

FOR FURTHER INFORMATION CONTACT: Barbara Madden, Registration Division (7505P), Office of Pesticide Programs, Environmental Protection Agency, 1200 Pennsylvania Ave., NW., Washington DC 20460–0001; telephone number: (703) 305–6463; e-mail address: *madden.barbara@epa.gov*.

SUPPLEMENTARY INFORMATION:

I. General Information

A. Does this Action Apply to Me?

The Agency included in the final rule a list of those who may be potentially affected by this action. If you have questions regarding the applicability of this action to a particular entity, consult the person listed under the **FOR FURTHER INFORMATION CONTACT**.

B. How Can I Access Electronic Copies of this Document and Other Related Information?

In addition to using regulations.gov, you may access this **Federal Register**

document electronically through the EPA Internet under the ''**Federal Register**'' listings at *http://www.epa.gov/fedrgstr*.

II. What Does this Correction Do?

FR Doc. E7–12161 published in the **Federal Register** of June 27, 2007 (72 FR 35182) (FRL–8133–1) is corrected as follows:

On page 35187, 180.511(a), the table in the amendment to § 180.511(a) establishing tolerances appeared as a two column table. The table should have appeared as a three column table. The omitted third column should include the heading ''Expiration/Revocation Date'', and the entry ''None'' to correspond to the tolerance listed in each row. This document is being published to correct that omission.

III. Why is this Correction Issued as a Final Rule?

Section 553 of the Administrative Procedure Act (APA), 5 U.S.C. 553(b)(B), provides that, when an Agency for good cause finds that notice and public procedure are impracticable, unnecessary or contrary to the public interest, the Agency may issue a final rule without providing notice and an opportunity for public comment. EPA has determined that there is good cause for making this technical amendment final without prior proposal and opportunity for comment, because the use of notice and comment procedures is unnecessary to effectuate this correction. EPA finds that this constitutes good cause under 5 U.S.C. 553(b)(B).

IV. Do Any of the Statutory and Executive Order Reviews Apply to this Action?

No. This action only corrects typographical omissions for a previously published final rule and does not impose any new requirements. EPA's compliance with the statutes and Executive Orders for the underlying rule is discussed in Unit VI. of the June 27, 2007 final rule (71 FR 35182).

V. Congressional Review Act

The Congressional Review Act, 5 U.S.C. 801 *et seq*., generally provides that before a rule may take effect, the Agency promulgating the rule must submit a rule report to each House of the Congress and to the Comptroller General of the United States. EPA will submit a report containing this rule and other required information to the U.S. Senate, the U.S. House of Representatives, and the Comptroller General of the United States prior to publication of this final rule in the **Federal Register**. This final rule is not a ''major rule'' as defined by 5 U.S.C. 804(2).

List of Subjects in 40 CFR Part 180

Environmental protection, Administrative practice and procedure, Agricultural commodities, Pesticides and pests, Reporting and recordkeeping requirements.

Dated: August 3, 2007.

Lois Rossi,

Director, Registration Division, Office of Pesticide Programs.

■ Therefore, 40 CFR part 180 is amended as follows:

PART 180—[AMENDED]

■ 1. The authority citation for part 180 continues to read as follows:

Authority: 21 U.S.C. 321(q), 346a and 371.

■ 2. Section 180.511 is amended in paragraph (a) in the table as follows:

■ i. By alphabetically adding ''Apricot'' and ''Fruit, stone, group 12, except apricot and peach''; and

■ ii. By revising the entries for ''Canistel,'' ''Grape,'' ''Mango,'' ''Papaya,'' ''Sapodilla,'' ''Sapote, black,'' ''Sapote, mamey,'' and ''Star apple.''

The amendments read as follows:

§ 180.511 Buprofezin; tolerances for residues.

(a) * * *

Commodity	Parts per million	Expiration/Revocation Date
* * * * *		
Apricot	9.0	None
* * * * *		
Canistel	0.90	None
* * * * *		
Fruit, stone, group 12, except apricot and peach	1.9	None
* * * * *		
Grape	2.5	None
* * * * *		
Mango	0.90	None
* * * * *		
Papaya	0.90	None
* * * * *		
Sapodilla	0.90	None
Sapote, black	0.90	None
Sapote, mamey	0.90	None
* * * * *		
Star apple	0.90	None
* * * * *		

* * * * *

BILLING CODE 6560–50–S

ENVIRONMENTAL PROTECTION AGENCY

40 CFR Part 180

[EPA–HQ–OPP–2005–0206; FRL–8142–6]

Fipronil; Pesticide Tolerances

AGENCY: Environmental Protection Agency (EPA).

ACTION: Final rule.

SUMMARY: This regulation establishes tolerances for combined residues of fipronil and its two metabolites and one photodegradate in or on potato and potato, wet peel, and indirect or inadvertent residues of fipronil and its two metabolites and one photodegradate in or on wheat, forage; wheat, grain;

wheat, hay; and wheat, straw. BASF Corporation requested these tolerances under the Federal Food, Drug, and Cosmetic Act (FFDCA). In addition, this establishes time-limited tolerances for combined residues of fipronil in or on turnip and rutabaga. This action is in response to EPA's granting of emergency exemptions under section 18 of the Federal Insecticide, Fungicide, and Rodenticide Act (FIFRA) authorizing use of the pesticide on turnip and rutabaga. This regulation establishes maximum permissible levels for combined residues of fipronil in these food commodities. The tolerances for rutabaga and turnip expire and are revoked on December 31, 2010.

DATES: This regulation is effective August 22, 2007. Objections and requests for hearings must be received on or before October 22, 2007, and must be filed in accordance with the instructions provided in 40 CFR part 178 (see also Unit I.C. of the **SUPPLEMENTARY INFORMATION**).

ADDRESSES: EPA has established a docket for this action under docket identification (ID) number EPA–HQ–OPP–2005–0206. To access the electronic docket, go to *http://www.regulations.gov*, select ''Advanced Search,'' then ''Docket Search.'' Insert the docket ID number where indicated and select the ''Submit'' button. Follow the instructions on the regulations.gov website to view the docket index or access available documents. All documents in the docket are listed in the docket index available in regulations.gov. Although listed in the index, some information is not publicly available, e.g., Confidential Business Information (CBI) or other information whose disclosure is restricted by statute. Certain other material, such as copyrighted material, is not placed on the Internet and will be publicly available only in hard copy form. Publicly available docket materials are available in the electronic docket at *http://www.regulations.gov*, or, if only available in hard copy, at the OPP Regulatory Public Docket in Rm. S–4400, One Potomac Yard (South Bldg.), 2777 S. Crystal Dr., Arlington, VA. The Docket Facility is open from 8:30 a.m. to 4 p.m., Monday through Friday, excluding legal holidays. The Docket Facility telephone number is (703) 305–5805.

FOR FURTHER INFORMATION CONTACT: Ann Sibold, Registration Division (7505P), Office of Pesticide Programs, Environmental Protection Agency, 1200 Pennsylvania Ave., NW., Washington, DC 20460–0001; telephone number: (703) 305–6502; e-mail address: *sibold.ann@epa.gov*.

SUPPLEMENTARY INFORMATION:

I. General Information

A. Does this Action Apply to Me?

You may be potentially affected by this action if you are an agricultural producer, food manufacturer, or pesticide manufacturer. Potentially affected entities may include, but are not limited to those engaged in the following activities:

- Crop production (NAICS code 111), e.g., agricultural workers; greenhouse, nursery, and floriculture workers; farmers.
- Animal production (NAICS code 112), e.g., cattle ranchers and farmers, dairy cattle farmers, livestock farmers.
- Food manufacturing (NAICS code 311), e.g., agricultural workers; farmers; greenhouse, nursery, and floriculture workers; ranchers; pesticide applicators.
- Pesticide manufacturing (NAICS code 32532), e.g., agricultural workers; commercial applicators; farmers; greenhouse, nursery, and floriculture workers; residential users.

This listing is not intended to be exhaustive, but rather to provide a guide for readers regarding entities likely to be affected by this action. Other types of entities not listed in this unit could also be affected. The North American Industrial Classification System (NAICS) codes have been provided to assist you and others in determining whether this action might apply to certain entities. If you have any questions regarding the applicability of this action to a particular entity, consult the person listed under **FOR FURTHER INFORMATION CONTACT**.

B. How Can I Access Electronic Copies of this Document?

In addition to accessing an electronic copy of this **Federal Register** document through the electronic docket at *http://www.regulations.gov*, you may access this **Federal Register** document electronically through the EPA Internet under the ''**Federal Register**'' listings at *http://www.epa.gov/fedrgstr*. You may also access a frequently updated electronic version of EPA's tolerance regulations at 40 CFR part 180 through the Government Printing Office's pilot e-CFR site at *http://www.gpoaccess.gov/ecfr*.

C. Can I File an Objection or Hearing Request?

Under section 408(g) of FFDCA, any person may file an objection to any aspect of this regulation and may also request a hearing on those objections. You must file your objection or request a hearing on this regulation in accordance with the instructions provided in 40 CFR part 178. To ensure proper receipt by EPA, you must identify docket ID number EPA–HQ–OPP–2005–0206 in the subject line on the first page of your submission. All requests must be in writing, and must be mailed or delivered to the Hearing Clerk as required by 40 CFR part 178 on or before October 22, 2007.

In addition to filing an objection or hearing request with the Hearing Clerk as described in 40 CFR part 178, please submit a copy of the filing that does not contain any CBI for inclusion in the public docket that is described in **ADDRESSES**. Information not marked confidential pursuant to 40 CFR part 2 may be disclosed publicly by EPA without prior notice. Submit this copy, identified by docket ID number EPA–HQ–OPP–2005–0206, by one of the following methods:

- *Federal eRulemaking Portal*: *http://www.regulations.gov*. Follow the on-line instructions for submitting comments.
- *Mail*: Office of Pesticide Programs (OPP) Regulatory Public Docket (7502P), Environmental Protection Agency, 1200 Pennsylvania Ave., NW., Washington, DC 20460–0001.
- *Delivery*: OPP Regulatory Public Docket (7502P), Environmental Protection Agency, Rm. S–4400, One Potomac Yard (South Bldg.), 2777 S. Crystal Dr., Arlington, VA. Deliveries are only accepted during the Docket's normal hours of operation (8:30 a.m. to 4 p.m., Monday through Friday, excluding legal holidays). Special arrangements should be made for deliveries of boxed information. The Docket Facility telephone number is (703) 305–5805.

II. Petition for Tolerances

In the **Federal Register** of August 24, 2005 (70 FR 49599) (FRL–7726–3), EPA issued a notice pursuant to section 408(d)(3) of FFDCA, 21 U.S.C. 346a(d)(3), announcing the filing of a pesticide petition (PP 5F6948) by BASF Corporation, P.O. Box 13528, Research Triangle Park, NC 27709. The petition requested that 40 CFR 180.517 be amended by establishing tolerances for combined residues of the insecticide fipronil, 5-amino-1-(2,6-dichloro-4-(trifluoromethyl) phenyl)-4-((1,R,S)-trifluoromethyl)sulfinyl)-1-H-pyrazole-3-carbonitrile and its 2 metabolites, MB45950 (5-amino-1-(2,6-dichloro-4-(trifluoromethyl)phenyl)-4-[(trifluoromethyl)thio]-1H-pyrazole-3-carbonitrile) and MB46136 (5-amino-1-(2,6-dichloro-4-(trifluoromethyl)phenyl)-4-

[(trifluoromethyl)sulfonyl]-1H-pyrazole-3-carbonitrile), and photodegradate MB46513 (5-amino-1-(2,6-dichloro-4-(trifluoromethyl)phenyl]-4-[(1R,S)-(trifluoromethyl)]-1H-pyrazole-3-carbonitrile), in or on vegetable, tuberous , corm, subgroup 1C at 0.04 parts per million (ppm) and potato, wet peel at 0.4 ppm and indirect or inadvertent residues of the insecticide fipronil, 5-amino-1-(2,6-dichloro-4-(trifluoromethyl) phenyl)-4-((1,R,S)-trifluoromethyl)sulfinyl)-1-H-pyrazole-3-carbonitrile and its 2 metabolites MB45950 (5-amino-1-(2,6-dichloro-4-(trifluoromethyl)phenyl)-4-[(trifluoromethyl)thio]-1H-pyrazole-3-carbonitrile) and MB46136 (5-amino-1-(2,6-dichloro-4-(trifluoromethyl)phenyl)-4-[(trifluoromethyl)sulfonyl]-1H-pyrazole-3-carbonitrile) and its photodegradate MB46513 (5-amino-1-(2,6-dichloro-4-(trifluoromethyl)phenyl]-4-[(1R,S)-(trifluoromethyl)]-1H-pyrazole-3-carbonitrile), in or on wheat, forage at 0.04 ppm, wheat, grain at 0.04 ppm, wheat, hay at 0.04 ppm, and wheat, straw at 0.04 ppm. That notice referenced a summary of the petition prepared by BASF Corporation, the registrant, which is available to the public in the docket, *http://www.regulations.gov*. One comment was received on the notice of filing. EPA's response to this comment is discussed in Unit IV.C.

Based upon review of the data supporting the petition, EPA has revised the tolerance for vegetable tuberous corm crop subgroup 1C to limit it to potato. The reason for these changes is explained in Unit V.

EPA is also establishing time-limited tolerances for combined residues of the insecticide fipronil, in or on turnip and rutabaga at 1.0 ppm. These tolerances expire and are revoked on December 31, 2010. The tolerances are being established in response to EPA's authorization to the Oregon Department of Agriculture, for the emergency use of fipronil to control the cabbage maggot, a highly damaging pest to root crops, in these crops, under a FIFRA section 18 specific exemption. The request was based upon three factors:

1. A recent severe increase in cabbage maggot populations.

2. The apparent increasing resistance of the maggot to the organophosphate registered alternative.

3. Phytotoxicity of the organophosphate alternative to the emerging seedlings.

The Applicant stated that significant economic losses would occur without the requested use of fipronil under an emergency exemption. After having reviewed the submission, EPA concurs that emergency conditions exist for this State.

As part of its assessment of this emergency exemption, EPA assessed the potential risks presented by residues of fipronil in or on rutabaga and turnip. In doing so, EPA considered the safety standard in section 408(b)(2) of FFDCA, and EPA decided that the necessary tolerances under section 408(l)(6) of FFDCA would be consistent with the safety standard and with FIFRA section 18. Consistent with the need to move quickly on the emergency exemption in order to address an urgent non-routine situation and to ensure that the resulting food is safe and lawful, EPA is issuing these tolerances without notice and opportunity for public comment as provided in section 408(l)(6) of the FFDCA. Although the tolerances expire and are revoked on December 31, 2010, under section 408(l)(5) of FFDCA, residues of the pesticide not in excess of the amounts specified in the tolerances remaining in or on rutabaga and turnip after that date will not be unlawful, provided the pesticide is applied in a manner that was lawful under FIFRA, and the residues do not exceed levels that were authorized by these tolerances at the time of that application. EPA will take action to revoke these tolerances earlier if any experience with, scientific data on, or other relevant information on this pesticide indicate that the residues are not safe.

Because the rutabaga and turnip tolerances are being approved under emergency conditions, EPA has not made any decisions about whether fipronil meets EPA's registration requirements for use on rutabaga and turnip or whether permanent tolerances for these uses would be appropriate. Under these circumstances, EPA does not believe that these tolerances serve as a basis for registration of fipronil by a State for special local needs under FIFRA section 24(c). Nor do these tolerances serve as the basis for any State other than Oregon to use this pesticide on these crops under section 18 of FIFRA without following all provisions of EPA's regulations implementing FIFRA section 18 as identified in 40 CFR part 166. For additional information regarding the emergency exemptions for fipronil, contact the Agency's Registration Division at the address provided under **FOR FURTHER INFORMATION CONTACT**.

III. Aggregate Risk Assessment and Determination of Safety

Section 408(b)(2)(A)(i) of FFDCA allows EPA to establish a tolerance (the legal limit for a pesticide chemical residue in or on a food) only if EPA determines that the tolerance is ''safe.'' Section 408(b)(2)(A)(ii) of FFDCA defines ''safe'' to mean that ''there is a reasonable certainty that no harm will result from aggregate exposure to the pesticide chemical residue, including all anticipated dietary exposures and all other exposures for which there is reliable information.'' This includes exposure through drinking water and in residential settings, but does not include occupational exposure. Section 408(b)(2)(C) of FFDCA requires EPA to give special consideration to exposure of infants and children to the pesticide chemical residue in establishing a tolerance and to ''ensure that there is a reasonable certainty that no harm will result to infants and children from aggregate exposure to the pesticide chemical residue. . . .'' These provisions were added to FFDCA by the Food Quality Protection Act (FQPA) of 1996.

Consistent with FFDCA section 408(b)(2)(D), and the factors specified in FFDCA section408(b)(2)(D), EPA has reviewed the available scientific data and other relevant information in support of this action. EPA has sufficient data to assess the hazards of and to make a determination on aggregate exposure for the petitioned-for tolerances for combined residues of fipronil and its metabolites and its degradate on potato at 0.03 ppm and potato, wet peel at 0.10 ppm and indirect or inadvertent residues of fipronil and its metabolites and its degradate on wheat, forage at 0.02 ppm, wheat, grain at 0.005 ppm, wheat, hay at 0.03 ppm, and wheat, straw at 0.03 ppm, and the tolerances to support authorization of an emergency exemption on turnip at 1.0 ppm and rutabaga at 1.0 ppm. EPA's assessment of exposures and risks associated with establishing the tolerances follows.

A. Toxicological Profile

EPA has evaluated the available toxicity data and considered its validity, completeness, and reliability as well as the relationship of the results of the studies to human risk. EPA has also considered available information concerning the variability of the sensitivities of major identifiable subgroups of consumers, including infants and children. Specific information on the studies received and the nature of the adverse effects caused by fipronil as well as the no-observed-adverse-effect-level (NOAEL) and the lowest-observed-adverse-effect-level (LOAEL) from the toxicity studies can be found at *http://www.regulations.gov*. The referenced document, ''Fipronil:

Third Reevaluation—Report of the Hazard Identification Assessment Review Committee, December 6, 2000,'' is available in the docket established by this action, which is described under **ADDRESSES**, and is identified as EPA–HQ–OPP–2005–0206 in that docket.

B. Toxicological Endpoints

For hazards that have a threshold below which there is no appreciable risk, the toxicological level of concern (LOC) is derived from the highest dose at which no adverse effects are observed (the NOAEL) in the toxicology study identified as appropriate for use in risk assessment. However, if a NOAEL cannot be determined, the lowest dose at which adverse effects of concern are identified (the LOAEL) is sometimes used for risk assessment. Uncertainty/safety factors (UF) are used in conjunction with the LOC to take into account uncertainties inherent in the extrapolation from laboratory animal data to humans and in the variations in sensitivity among members of the human population as well as other unknowns. Safety is assessed for acute and chronic risks by comparing aggregate exposure to the pesticide to the acute population adjusted dose (aPAD) and chronic population adjusted dose (cPAD). The aPAD and cPAD are calculated by dividing the LOC by all applicable uncertainty/safety factors. Short-term, intermediate-term, and long-term risks are evaluated by comparing aggregate exposure to the LOC to ensure that the margin of exposure (MOE) called for by the product of all applicable uncertainty/safety factors is not exceeded.

For non-threshold risks, the Agency assumes that any amount of exposure will lead to some degree of risk and estimates risk in terms of the probability of occurrence of additional adverse cases. Generally, cancer risks are considered non-threshold. For more information on the general principles EPA uses in risk characterization and a complete description of the risk assessment process, see *http://www.epa.gov/fedrgstr/EPA-PEST/1997/November/Day-26/p30948.htm*.

A summary of the toxicological endpoints for fipronil used for human risk assessment is shown in Table 1 of this unit.

TABLE 1.—SUMMARY OF TOXICOLOGICAL DOSE AND ENDPOINTS FOR FIPRONIL FOR USE IN HUMAN RISK ASSESSMENT

Exposure Scenario	Dose Used in Risk Assessment, UF	FQPA SF and Endpoint for Risk Assessment	Study and Toxicological Effects
Acute dietary (All populations including infants and children)	NOAEL= 2.5 milligrams/kilograms (mg/kg) UF = 100 acute RfD = 0.025 mg/kg	FQPA SF = 1 aPAD = acute RfD÷FQPA SF = 0.025 mg/kg	Acute neurotoxicity—rat LOAEL = 7.0 mg/kg based on: Decreased hind leg splay in males at 7 hours
Chronic dietary (All populations)	NOAEL= 0.019 mg/kg/day UF = 100 chronic RfD = 0.0002 mg/kg/day	FQPA SF = 1 cPAD = chr RfD÷FQPA SF = 0.0002 mg/kg/day	Chronic/carcinogenicity study —rat LOAEL = 0.059 mg/kg/day based on: Increased incidence of seizures and death, alterations in clinical chemistry (protein), increased thyroid stimulating hormone (TSH), and decreased T4
Short-term oral (1–7 days) (Residential)	Oral study maternal LOAEL <0.1 mg/kg/day UF of 3 for no NOAEL, 100 for interspecies extrapolation and intraspecies variation	LOC for MOE = 300 (Residential, includes the FQPA SF)	Developmental toxicity study—rabbit maternal LOAEL = 0.1 mg/kg/day based on: Maternal toxicity of decreased body weight gain, decreased food consumption, and decreased food efficiency
Intermediate-term oral (1 week—several months) (Residential)	Oral study LOAEL <0.1 mg/kg/day UF of 3 for no NOAEL, 100 for interspecies extrapolation and intraspecies variation	LOC for MOE = 300 (Residential, includes the FQPA SF)	Developmental toxicity study—rabbit LOAEL = 0.1 mg/kg/day based on: Maternal toxicity of decreased body weight gain, decreased food consumption, and decreased food efficiency
Short-termdermal (1–7 days) (Residential)	Dermal study NOAEL= 5 mg/kg/day	LOC for MOE = 100 (Occupational) LOC for MOE = 100 (Residential, includes FQPA SF)	21–Day dermal toxicity study—rabbit LOAEL = 10.0 mg/kg/day based on: Decreased body weight gain, and food consumption in both sexes
Intermediate-term dermal (1 week—several months) (Residential)	Dermal study NOAEL = 5 mg/kg/day	LOC for MOE = 100 (Occupational) LOC for MOE = 100 (Residential, includes FQPA SF)	21–Day dermal toxicity study— rabbit LOAEL = 10.0 mg/kg/day based on: Decreased body weight gain, and food consumption in both sexes
Long-term dermal (several months—lifetime) (Residential)	Oral study NOAEL = 0.019 mg/kg/day(dermal absorption rate = 1%)	acceptable MOE = 100 (Occupational) acceptable MOE = 100 (Residential, includes FQPA SF)	Chronic/carcinogenicity study —rat LOAEL = 0.059 mg/kg/day based on: Increased incidence of seizures and death, alterations in clinical chemistry (protein), increased TSH, and decreased T4
Short-term inhalation (1–7 days) (Residential)	Oral study NOAEL = 0.05 mg/kg/day(inhalation absorption rate = 100%)	LOC for MOE = 100 (Occupational) LOC for MOE = 100 (Residential, includes FQPA SF)	Developmental neurotoxicity— rat LOAEL = 0.90 mg/kg/day based on: Decrease in group mean pup weights during lactation, and significant increase in time of preputial separation in males (dietary)
Intermediate-term inhalation (1 week—several months) (Residential)	Oral study NOAEL = 0.05 mg/kg/day (inhalation absorption rate = 100%)	LOC for MOE = 100 (Occupational) LOC for MOE = 100 (Residential, includes FQPA SF)	Developmental neurotoxicity— rat LOAEL = 0.90 mg/kg/day based on: Decrease in group mean pup weights during lactation, and significant increase in time of preputial separation in males (dietary)

TABLE 1.—SUMMARY OF TOXICOLOGICAL DOSE AND ENDPOINTS FOR FIPRONIL FOR USE IN HUMAN RISK ASSESSMENT—Continued

Exposure Scenario	Dose Used in Risk Assessment, UF	FQPA SF and Endpoint for Risk Assessment	Study and Toxicological Effects
Long-term inhalation (several months—lifetime) (Residential)	O ral study NOAEL= 0.019 mg/kg/day (inhalation absorption rate = 100%)	acceptable MOE = 100 (Occupational) acceptable MOE = 100 (Residential, includes FQPA SF)	Chronic/carcinogenicity rat study LOAEL = 0.059 mg/kg/day based on: Increased incidence of seizures and death, alterations in clinical chemistry (protein), increased TSH, and decreased T4
Cancer (Oral, dermal, inhalation)	Group C—possible human carcinogen	Use chronic RfD to estimate human risk	Increases in thyroid follicular cell tumors with fipronil (male/female)

UF = uncertainty factor, FQPA SF = FQPA Safety Factor, NOAEL = no observed adverse effect level, LOAEL = lowest observed adverse effect level, PAD = population adjusted dose (a = acute, c = chronic), RfD = reference dose, LOC = level of concern, MOE = margin of exposure.

C. Exposure Assessment

1. *Dietary exposure from food and feed uses*. In evaluating dietary exposure to fipronil, EPA considered exposure under the petitioned-for tolerances, as well as the turnip and rutabaga tolerances to support the authorized section 18s, and all existing fipronil tolerances in (40 CFR 180.517). EPA assessed dietary exposures from fipronil in food as follows:

i. *Acute exposure*. Quantitative acute dietary exposure and risk assessments are performed for a food-use pesticide, if a toxicological study has indicated the possibility of an effect of concern occurring as a result of a one-day or single exposure. In estimating acute dietary exposure, EPA used food consumption information from the U.S. Department of Agriculture (USDA) 1994–1996 and 1998 Nationwide Continuing Surveys of Food Intake by Individuals (CSFII). As to residue levels in food, EPA assumed all foods for which there are tolerances were treated and contain tolerance-level residues.

ii. *Chronic exposure*. In conducting the chronic dietary exposure assessment EPA used the food consumption data from the USDA 1994–1996 and 1998 Nationwide CSFII. As to residue levels in food, EPA relied upon anticipated residues and percent crop treated information for some commodities A partially refined analysis was performed using anticipated residues from field trial data for existing uses for which data were available. Anticipated residues were also used for potato commodities. Processing factors were used for existing uses. Percent crop treated was not used.

iii. *Cancer*. Fipronil has been classified as a Group C—Possible Human Carcinogen, based on increases in thyroid follicular cell tumors in both sexes of the rat, which were statistically significant by both pair-wise and trend analyses. There is no apparent concern for mutagenicity (no mutagenic activity). The RfD methodology should be used to estimate human risk for the following reasons: The thyroid tumors appear to be related to a disruption in the thyroid-pituitary status, and fipronil is not likely to be carcinogenic to humans at doses that do not alter rat thyroid hormone homeostasis. In addition, the cRfD is based on the NOAEL from the combined chronic/carcinogenicity study in rats. The NOAEL is based on increased incidence of seizures and death, alterations in clinical chemistry (protein) and thyroid toxicity (increase in TSH), decrease in thyroxine (T4)). Therefore, the cRfD is considered to be protective of both cancer and non-cancer effects of fipronil.

iv. *Anticipated residue and percent crop treated (PCT) information*. Section 408(b)(2)(E) of FFDCA authorizes EPA to use available data and information on the anticipated residue levels of pesticide residues in food and the actual levels of pesticide residues that have been measured in food. If EPA relies on such information, EPA must pursuant to FFDCA section 408(f)(1) require that data be provided 5 years after the tolerance is established, modified, or left in effect, demonstrating that the levels in food are not above the levels anticipated. For the present action, EPA will issue such Data Call-Ins as are required by FFDCA section 408(b)(2)(E) and authorized under FFDCA section 408(f)(1). Data will be required to be submitted no later than 5 years from the date of issuance of these tolerances.

2. *Dietary exposure from drinking water*.The Agency lacks sufficient monitoring data to complete a comprehensive dietary exposure analysis and risk assessment for fipronil in drinking water. Because the Agency does not have comprehensive monitoring data, drinking water concentration estimates are made by reliance on simulation or modeling taking into account data on the environmental fate characteristics of fipronil. Further information regarding EPA drinking water models used in pesticide exposure assessment can be found at *http://www.epa.gov/oppefed1/models/water/index.htm*.

Based on the Pesticide Root Zone Model/Exposure Analysis Modeling System (PRZM/EXAMS) and Screening Concentration in Ground Water (SCI-GROW) models, the estimated environmental concentrations (EECs) of fipronil for acute exposures are estimated to be 2.654 parts per billion (ppb) for surface water and 0.021 ppb for ground water. The EECs for chronic exposures are estimated to be 0.3179 ppb for surface water and 0.021 ppb for ground water.

Modeled estimates of drinking water concentrations were directly entered into the dietary exposure model. For acute dietary risk assessment, the water concentration value of 2.654 ppb was used to access the contribution to drinking water. For chronic dietary risk assessment, the water concentration of value 0.3179 ppb was used to access the contribution to drinking water.

3. *From non-dietary exposure*. The term ''residential exposure'' is used in this document to refer to non-occupational, non-dietary exposure (e.g., for lawn and garden pest control, indoor pest control, termiticides, and flea and tick control on pets).

Fipronil is currently registered for the following residential non-dietary sites: For use on cats and dogs for flea control and on turf to control fire ants. These products may be applied by homeowners. EPA assessed residential exposure using the following assumptions: The probability of applying fipronil to dogs and cats to control fleas and ticks and applying fipronil to control turf pests on the same day is considered to be negligible for the following reasons: Use on turf application is limited to application one per year. For the pet care products, fipronil is applied as a Ready-to-Use (RTU) pump spray to the fur of the animal or as a RTU, pour-on, spot

treatment made on the back of the animal between the shoulder blades. Repeated applications if necessary may be made once every one to three months during flea or tick season. Therefore, since these applications are infrequent, for aggregate risk assessment, exposure from pet and turf treatments were not combined. Based on the existing and proposed uses, the pet uses result in the highest estimated handler exposure. Since more exposure is expected from the pet care spray product, exposure to the spray product represents the worst case for all residential scenarios. For post-application risk, the use on pets is used to estimate exposure to toddlers. Adult post-application exposure is considered negligible.

4. *Cumulative effects from substances with a common mechanism of toxicity*. Section 408(b)(2)(D)(v) of FFDCA requires that, when considering whether to establish, modify, or revoke a tolerance, the Agency consider ''available information'' concerning the cumulative effects of a particular pesticide's residues and ''other substances that have a common mechanism of toxicity.''

Unlike other pesticides for which EPA has followed a cumulative risk approach based on a common mechanism of toxicity, EPA has not made a common mechanism of toxicity finding as to fipronil and any other substances and fipronil does not appear to produce a toxic metabolite produced by other substances. For the purposes of these tolerance actions, therefore, EPA has not assumed that fipronil has a common mechanism of toxicity with other substances. For information regarding EPA's efforts to determine which chemicals have a common mechanism of toxicity and to evaluate the cumulative effects of such chemicals, see EPA's website at *http://www.epa.gov/pesticides/cumulative*.

D. Safety Factor for Infants and Children

1. *In general*. Section 408 of FFDCA provides that EPA shall apply an additional (''10X'') tenfold margin of safety for infants and children in the case of threshold effects to account for prenatal and postnatal toxicity and the completeness of the database on toxicity and exposure unless EPA determines based on reliable data that a different margin of safety will be safe for infants and children. This additional margin of safety is commonly referred to as the FQPA safety factor. In applying this provision, EPA either retains the default value of 10X when reliable data do not support the choice of a different factor, or, if reliable data are available, EPA uses a different additional FQPA safety factor value based on the use of traditional uncertainty/safety factors and/or special FQPA safety factors, as appropriate.

2. *Prenatal and postnatal sensitivity*. EPA concluded that there is no indication of increased susceptibility of rats or rabbits to *in utero* and/or postnatal exposure to fipronil. In the prenatal developmental toxicity studies in rats and rabbits and in the 2–generation reproduction study in rats, developmental toxicity occurred at the same or greater doses than those that caused maternal toxicity. In particular, the toxicity endpoint used for the short term oral exposure scenario was based on maternal effects seen in the developmental toxicity study. However, because no maternal NOAEL was established, an additional 3X safety factor was added to the maternal LOAEL. The developmental or offspring NOAEL was 10x greater than the maternal LOAEL. In addition, the combined chronic/carcinogenicity study in rats is based on increased incidence of seizures and deaths, alterations in clinical chemistry (protein) and an increase in TSH and a decrease in T4 at the LOAEL of 0.059 mg/kg/day. No effects on body weights and body weigh gains were observed at the LOAEL in the chronic toxicity study. For this reason EPA believes that the additional 3X safety factor is protective of infants and children.

However, the developmental neurotoxicity study identified a developmental NOAEL (0.05 mg/kg/day) which is less than the maternal NOAEL of 0.9 mg/kg/day, indicating an apparent susceptibility issue. EPA determined that the evidence regarding appearance of susceptibility was not convincing for several reasons. First, the findings at 0.9 mg/kg/day in the developmental neurotoxicity study (decrease in offspring body weight and delayed time to preputial separation) were equivocal. EPA, using a conservative approach, established the LOAEL for offspring developmental toxicity at 0.9 mg/kg/day with the understanding that these effects, although statistically significant, were marginal and appeared to define a threshold response level. This conservative approach resulted in the NOAEL for offspring developmental toxicity (0.05 mg/kg/day) being lower than the NOAEL for maternal toxicity (0.9 mg/kg/day) giving an appearance of increased susceptibility. Second, the findings in the developmental neurotoxicity study were not supported by the overall weight-of-the-evidence from the fipronil database. Evaluation of the database indicated that:

- The offspring body weight findings in the developmental neurotoxicity study are not supported by the results of the 2–generation reproduction study in rats at similar treatment levels.
- Increased susceptibility to the offspring was not demonstrated following prenatal and/or postnatal dosing in the prenatal developmental toxicity study nor the 2–generation reproduction study in rats.
- No increased susceptibility was seen in the prenatal developmental toxicity study in rats following *in utero* exposure to the photodegradate, MB46513.

More specific information may be found in the referenced document, ''Fipronil: Third Reevaluation—Report of the Hazard Identification Assessment Review Committee, December 6, 2000,'' available in the docket established by this action, as noted in this unit.

3. *Conclusion*. EPA has determined that reliable data show that it would be safe for infants and children to reduce the FQPA safety factor to 1X. That decision is based on the following findings:

i. The toxicity database for fipronil is complete for food use.

ii. The weight of the evidence does not indicate that there is increased sensitivity in young animals. In any event, there is a clear NOAEL identified in the one study where there was an appearance of sensitivity in the young. The degree of concern for prenatal and/or postnatal toxicity is low.

iii. There are no residual uncertainties identified in the exposure databases. The dietary food exposure assessments were performed based on 100% crop treated (CT) and anticipated residues were used as described in this unit. They are based in reliable data and will not underestimate the exposure and risk. Conservative ground and surface water modeling estimates were used. Similarly conservative Residential Standard Operating Procedures (SOPs) were used to assess post-application exposure to children as well as incidental oral exposure of toddlers. These assessments will not underestimate the exposure and risks posed by fipronil.

E. Aggregate Risks and Determination of Safety

Safety is assessed for acute and chronic risks by comparing aggregate exposure to the pesticide to the (''aPAD'') and (''cPAD''). The aPAD and cPAD are calculated by dividing the level of concern (LOC) by all applicable uncertainty/safety factors. For linear

cancer risks, EPA calculates the probability of additional cancer cases given aggregate exposure. Short-term, intermediate-term, and long-term risks are evaluated by comparing aggregate exposure to the LOC to ensure that the MOE called for by the product of all applicable uncertainty/safety factors is not exceeded.

1. *Acute risk*. Using the exposure assumptions discussed in this unit for acute exposure, the acute dietary exposure from food and water to fipronil will occupy 25% of the aPAD for the population group (children 1–2 years old) receiving the greatest exposure.

2. *Chronic risk*. Using the exposure assumptions described in this unit for chronic exposure, EPA has concluded that exposure to fipronil from food and water will utilize 96% of the cPAD for the population group (children (1–2 years old). Based the use pattern, chronic residential exposure to residues of fipronil is not expected.

3. *Short-term risk*. Short-term aggregate exposure takes into account residential exposure plus chronic exposure to food and water (considered to be a background exposure level).

Fipronil is currently registered for use that could result in short-term residential exposure, and the Agency has determined that it is appropriate to aggregate chronic food and water and short-term exposures for fipronil.

Using the exposure assumptions described in this unit for short-term exposures, EPA has concluded that food, water, and residential exposures aggregated result in aggregate MOEs as follows: The short-term aggregate risk assessment takes into account average exposure estimates from dietary consumption of fipronil (food and drinking water) and non-occupational exposures (pet uses). Postapplication exposure from the use on pets is considered short-term. Therefore, a short-term aggregate risk assessment was conducted, using children with combined dermal and oral exposures from pet uses as a worst case. Table 3 of this unit summarizes the results. Since the LOC is different for oral and dermal exposures, 300 and 100, respectively, the Aggregate Risk Index (ARI) method was used to determine short-term aggregate risk. The aggregate ARI from food, water, and non-occupational exposures is 1.5. Therefore, short-term aggregate risk estimates do not exceed the Agency's level of concern (i.e. ARIs greater than or equal to 1). Adult post-application risk is considered negligible and so an aggregate risk assessment for adults is not considered necessary.

TABLE 3.—AGGREGATE SHORT-TERM

Population	Food + Water		Oral		Dermal		ARI [3]Aggregate [4]
	LOC [1]	MOE [2]	LOC	MOE	LOC	MOE	
Children (1–2 years old)	300	532	300	3,300	100	5,000	1.5

[1] LOC=Level of Concern
[2] MOE= NOAEL (or LOAEL)÷exposure
[3] ARI=$MOE_{Calculated} \div MOE_{LOC}$
[4] $ARI=_{Aggregate}= 1 \div ((1 \div ARI_{food})+(1 \div ARI_{oral})+(1 \div ARI_{dermal}))$.

4. *Intermediate-term risk*. Intermediate-term aggregate exposure takes into account residential exposure plus chronic exposure to food and water (considered to be a background exposure level).

Fipronil is currently registered for use(s) that could result in intermediate-term residential exposure and the Agency has determined that it is appropriate to aggregate chronic food and water and intermediate-term exposures for fipronil.

Using the exposure assumptions described in this unit for intermediate-term exposures, EPA has concluded that food, water, and residential exposures aggregated result in aggregate MOEs as follows: Intermediate-term risk to children is not expected to be higher than short-term risk due to the lack of inhalation exposure and a soil ingestion MOE of 1 million.

5. *Determination of safety*. Based on these risk assessments, EPA concludes that there is a reasonable certainty that no harm will result to the general population, or to infants and children from aggregate exposure to fipronil residues.

IV. Other Considerations

A. Analytical Enforcement Methodology

Adequate enforcement methodology (Method EC–95–303) is available to enforce the tolerance expression. The method may be requested from: Chief, Analytical Chemistry Branch, Environmental Science Center, 701 Mapes Rd., Ft. Meade, MD 20755–5350; telephone number: (410) 305–2905; e-mail address: *residuemethods@epa.gov*.

B. International Residue Limits

There are no Codex, Canadian, or Mexican maximum residue limits (MRLs) established for fipronil + metabolites MB46136 and MB45950 + photodegradate MB46513 on the commodities included in this request.

C. Response to Comments

One comment was received from a private citizen who opposes the approval of any pesticide that leaves a residue on food. The comment contained no specific information pertaining to fipronil but was limited to general claims such as EPA was providing inadequate protection for Americans. The Agency has received the same comment from this commenter on numerous previous occasions and rejects it for the reasons previously stated in the **Federal Registers** of January 7, 2005 (70 FR 1349) (FRL–7691–4), June 30, 2005 (70 FR 37686) (FRL–7718–3), and October 29, 2004 (69 FR 63096) (FRL–7681–9).

V. Conclusion

Therefore, the tolerances are established for combined residues of fipronil (5-amino-1-(2,6-dichloro-4-(trifluoromethyl)phenyl)-4-[(trifluoromethyl)sulfinyl]-1H-pyrazole-3-carbonitrile) and its two metabolites MB45950 (5-amino-1-(2,6-dichloro-4-(trifluoromethyl)phenyl)-4-[(trifluoromethyl)thio]-1H-pyrazole-3-carbonitrile) and MB46136 (5-amino-1-(2,6-dichloro-4-(trifluoromethyl)phenyl)-4-[(trifluoromethyl)sulfonyl]-1H-pyrazole-3-carbonitrile) and its photodegradate MB46513 (5-amino-1-(2,6-dichloro-4-(trifluoromethyl)phenyl]-4-[(1R,S)-(trifluoromethyl)]-1H-pyrazole-3-carbonitrile), in or on potato at 0.03 ppm, potato, wet peel at 0.1 ppm and indirect or inadvertent residues of fipronil and its metabolites and its degradate on wheat, forage at 0.02 ppm, wheat, grain at 0.005 ppm, wheat, hay at 0.03 ppm, and wheat, straw at 0.03 ppm. Time-limited tolerances are also

established for combined residues of fipronil and its metabolites and degradate on turnip at 1.0 ppm and rutabaga at 1.0 ppm.

The registrant petitioned for tolerances on vegetable, tuberous corm, subgroup 1C. In evaluating this petition, the Agency determined that planting methods associated with the different members of crop subgroup vegetable, tuberous corm, subgroup 1C result in different amounts of fipronil and its metabolites and degradate being loaded into the environment. Further, because of the planting depth of potatoes, the environmental loading of fipronil and its metabolites and degradate is expected to be lower for potatoes than other members of vegetable tuberous corm crop group 1C and is expected to be below levels of concern. For this reason, the Agency is establishing tolerances only for potato and the rotational crop wheat at this time. The Agency is working to resolve these issues as they relate to other members of vegetable tuberous corm crop group 1C.

VI. Statutory and Executive Order Reviews

This final rule establishes tolerances under section 408(d) of FFDCA in response to a petition submitted to the Agency. The Office of Management and Budget (OMB) has exempted these types of actions from review under Executive Order 12866, entitled *Regulatory Planning and Review* (58 FR 51735, October 4, 1993). Because this rule has been exempted from review under Executive Order 12866, this rule is not subject to Executive Order 13211, *Actions Concerning Regulations That Significantly Affect Energy Supply, Distribution, or Use* (66 FR 28355, May 22, 2001) or Executive Order 13045, entitled *Protection of Children from Environmental Health Risks and Safety Risks* (62 FR 19885, April 23, 1997). This final rule does not contain any information collections subject to OMB approval under the Paperwork Reduction Act (PRA), 44 U.S.C. 3501 *et seq.*, nor does it require any special considerations under Executive Order 12898, entitled *Federal Actions to Address Environmental Justice in Minority Populations and Low-Income Populations* (59 FR 7629, February 16, 1994).

Since tolerances and exemptions that are established on the basis of a petition under section 408(d) of FFDCA, or are established under section 408(l)(6) of FFDCA, such as the tolerances in this final rule, do not require the issuance of a proposed rule, the requirements of the Regulatory Flexibility Act (RFA) (5 U.S.C. 601 *et seq.*) do not apply.

This final rule directly regulates growers, food processors, food handlers and food retailers, not States or tribes, nor does this action alter the relationships or distribution of power and responsibilities established by Congress in the preemption provisions of section 408(n)(4) of FFDCA. As such, the Agency has determined that this action will not have a substantial direct effect on States or tribal governments, on the relationship between the national government and the States or tribal governments, or on the distribution of power and responsibilities among the various levels of government or between the Federal Government and Indian tribes. Thus, the Agency has determined that Executive Order 13132, entitled *Federalism* (64 FR 43255, August 10, 1999) and Executive Order 13175, entitled *Consultation and Coordination with Indian Tribal Governments* (65 FR 67249, November 6, 2000) do not apply to this rule. In addition, This rule does not impose any enforceable duty or contain any unfunded mandate as described under Title II of the Unfunded Mandates Reform Act of 1995 (UMRA) (Public Law 104–4).

This action does not involve any technical standards that would require Agency consideration of voluntary consensus standards pursuant to section 12(d) of the National Technology Transfer and Advancement Act of 1995 (NTTAA), Public Law 104–113, section 12(d) (15 U.S.C. 272 note).

VII. Congressional Review Act

The Congressional Review Act, 5 U.S.C. 801 *et seq.*, generally provides that before a rule may take effect, the agency promulgating the rule must submit a rule report to each House of the Congress and to the Comptroller General of the United States. EPA will submit a report containing this rule and other required information to the U.S. Senate, the U.S. House of Representatives, and the Comptroller General of the United States prior to publication of this final rule in the **Federal Register**. This final rule is not a ''major rule'' as defined by 5 U.S.C. 804(2).

List of Subjects in 40 CFR Part 180

Environmental protection, Administrative practice and procedure, Agricultural commodities, Pesticides and pests, Reporting and recordkeeping requirements.

Dated: August 3, 2007.

Lois Rossi,

Director, Registration Division, Office of Pesticide Programs.

■ Therefore, 40 CFR chapter I is amended as follows:

PART 180—[AMENDED]

■ 1. The authority citation for part 180 continues to read as follows:

Authority: 21 U.S.C. 321(q), 346a and 371.

■ 2. Section 180. 517 is amended by alphabetically adding commodities to the table in paragraph (a) and by adding text to paragraphs (b) and (d) to read as follows:

§ 180.517 Fipronil; tolerances for residues.

(a) * * *

Commodity	Parts per million
* *	* * *
Potato	0.03
Potato, wet peel	0.10

(b) *Section 18 emergency exemptions.* Time-limited tolerances are established for combined residues of the insecticide, fipronil, 5-amino-1-(2,6-dichloro-4-(trifluoromethyl) phenyl)-4-((1,R,S)-trifluoromethyl)sulfinyl)-1-H-pyrazole-3-carbonitrile and its 2 metabolites MB45950 (5-amino-1-(2,6-dichloro-4-(trifluoromethyl)phenyl)-4-[(trifluoromethyl)thio]-1H-pyrazole-3-carbonitrile) and MB46136 (5-amino-1-(2,6-dichloro-4-(trifluoromethyl)phenyl)-4-[(trifluoromethyl)sulfonyl]-1H-pyrazole-3-carbonitrile) and its photodegradate MB46513 (5-amino-1-(2,6-dichloro-4-(trifluoromethyl)phenyl]-4-[(1R,S)-(trifluoromethyl)]-1H-pyrazole-3-carbonitrile), in connection with use of the pesticide under Section 18 emergency exemptions granted by EPA. The tolerances expire and are revoked on the dates specified in the table for this paragraph.

Commodity	Parts per million	Expiration/ revocation date
Rutabaga	1.0	12/31/10
Turnip	1.0	12/31/10

* * * * *

(d) *Indirect or inadvertent residues.* Tolerances are established for combined indirect or inadvertent residues of the insecticide fipronil and its metabolites and photodegradate in or on food commodities when present therein as a result of the application of fipronil to growing crops listed in paragraphs (a) and (b) of this section and other nonfood crops to read as follows:

Commodity	Parts per million
Wheat, forage	0.02
Wheat, grain	0.005
Wheat, hay	0.03
Wheat, straw	0.03

[FR Doc. E7–16621 Filed 8–21–07; 8:45 am]
BILLING CODE 6560–50–S

ENVIRONMENTAL PROTECTION AGENCY

40 CFR Part 180

[EPA–HQ–OPP–2006–0889; FRL–8142–4]

Pyriproxyfen; Pesticide Tolerance

AGENCY: Environmental Protection Agency (EPA).

ACTION: Final rule.

SUMMARY: This regulation establishes tolerances for residues of pyriproxyfen in or on animal feed, nongrass, group 18, forage; animal feed, nongrass, group 18, hay; animal feed, nongrass, group 18, seed; banana; beet, sugar, dried pulp; cacao bean, dried; caneberry, subgroup 13-A; canola, seed; coffee, instant; coffee, green bean; cranberry; date; grain, cereal, group 15; grain, cereal, forage, fodder and straw, group 16; pawpaw; peanut; pineapple; pineapple, process residue; pomegranate; potato, chips; potato, granules/flakes; potato, wet peel; rice, hulls; safflower, seed; sesame, seed; sugarcane; tea; vegetable, bulb, group 3, except onion, bulb; and vegetable, root and tuber, group 1. Interregional Research Project Number 4 (IR-4), 500 College Road East, Suite 201 W, Princeton, NJ 08540 requested these tolerances under the Federal Food, Drug, and Cosmetic Act (FFDCA).

DATES: This regulation is effective August 22, 2007. Objections and requests for hearings must be received on or before October 22, 2007, and must be filed in accordance with the instructions provided in 40 CFR part 178 (see also Unit I.C. of the **SUPPLEMENTARY INFORMATION**).

ADDRESSES: EPA has established a docket for this action under docket identification (ID) number EPA–HQ–OPP–2006–0889. To access the electronic docket, go to *http://www.regulations.gov*, select ''Advanced Search,'' then ''Docket Search.'' Insert the docket ID number where indicated and select the ''Submit'' button. Follow the instructions on the regulations.gov web site to view the docket index or access available documents. All documents in the docket are listed in the docket index available in regulations.gov. Although listed in the index, some information is not publicly available, e.g., Confidential Business Information (CBI) or other information whose disclosure is restricted by statute. Certain other material, such as copyrighted material, is not placed on the Internet and will be publicly available only in hard copy form. Publicly available docket materials are available in the electronic docket at *http://www.regulations.gov*, or, if only available in hard copy, at the OPP Regulatory Public Docket in Rm. S–4400, One Potomac Yard (South Bldg.), 2777 S. Crystal Dr., Arlington, VA. The Docket Facility is open from 8:30 a.m. to 4 p.m., Monday through Friday, excluding legal holidays. The Docket Facility telephone number is (703) 305–5805.

FOR FURTHER INFORMATION CONTACT: Shaja R. Brothers, Registration Division (7505P), Office of Pesticide Programs, Environmental Protection Agency, 1200 Pennsylvania Ave., NW., Washington, DC 20460–0001; telephone number: (703) 308–3194; e-mail address: *brothers.shaja@epa.gov*.

SUPPLEMENTARY INFORMATION:

I. General Information

A. Does this Action Apply to Me?

You may be potentially affected by this action if you are an agricultural producer, food manufacturer, or pesticide manufacturer. Potentially affected entities may include, but are not limited to those engaged in the following activities:

- Crop production (NAICS code 111), e.g., agricultural workers; greenhouse, nursery, and floriculture workers; farmers.
- Animal production (NAICS code 112), e.g., cattle ranchers and farmers, dairy cattle farmers, livestock farmers.
- Food manufacturing (NAICS code 311), e.g., agricultural workers; farmers; greenhouse, nursery, and floriculture workers; ranchers; pesticide applicators.
- Pesticide manufacturing (NAICS code 32532), e.g., agricultural workers; commercial applicators; farmers; greenhouse, nursery, and floriculture workers; residential users.

This listing is not intended to be exhaustive, but rather to provide a guide for readers regarding entities likely to be affected by this action. Other types of entities not listed in this unit could also be affected. The North American Industrial Classification System (NAICS) codes have been provided to assist you and others in determining whether this action might apply to certain entities. If you have any questions regarding the applicability of this action to a particular entity, consult the person listed under **FOR FURTHER INFORMATION CONTACT**.

B. How Can I Access Electronic Copies of this Document?

In addition to accessing an electronic copy of this **Federal Register** document through the electronic docket at *http://www.regulations.gov*, you may access this **Federal Register** document electronically through the EPA Internet under the ''**Federal Register**'' listings at *http://www.epa.gov/fedrgstr*. You may also access a frequently updated electronic version of EPA's tolerance regulations at 40 CFR part 180 through the Government Printing Office's pilot e-CFR site at *http://www.gpoaccess.gov/ecfr*.

C. Can I File an Objection or Hearing Request?

Under section 408(g) of the FFDCA, any person may file an objection to any aspect of this regulation and may also request a hearing on those objections. You must file your objection or request a hearing on this regulation in accordance with the instructions provided in 40 CFR part 178. To ensure proper receipt by EPA, you must identify docket ID number EPA–HQ–OPP–2006–0889 in the subject line on the first page of your submission. All requests must be in writing, and must be mailed or delivered to the Hearing Clerk as required by 40 CFR part 178 on or before October 22, 2007.

In addition to filing an objection or hearing request with the Hearing Clerk as described in 40 CFR part 178, please submit a copy of the filing that does not contain any CBI for inclusion in the public docket that is described in **ADDRESSES**. Information not marked confidential pursuant to 40 CFR part 2 may be disclosed publicly by EPA without prior notice. Submit this copy, identified by docket ID number EPA–HQ–OPP–2006–0889, by one of the following methods:

- *Federal eRulemaking Portal*: *http://www.regulations.gov*. Follow the on-line instructions for submitting comments.
- *Mail*: Office of Pesticide Programs (OPP) Regulatory Public Docket (7502P), Environmental Protection Agency, 1200 Pennsylvania Ave., NW., Washington, DC 20460–0001.
- *Delivery*: OPP Regulatory Public Docket (7502P), Environmental Protection Agency, Rm. S–4400, One Potomac Yard (South Bldg.), 2777 S. Crystal Dr., Arlington, VA. Deliveries are only accepted during the Docket's normal hours of operation (8:30 a.m. to 4 p.m., Monday through Friday, excluding legal holidays). Special

arrangements should be made for deliveries of boxed information. The Docket Facility telephone number is (703) 305–5805.

II. Petition for Tolerance

In the **Federal Register** of November 22, 2006 (71 FR 67571) (FRL–8102–2), EPA issued a notice pursuant to section 408(d)(3) of FFDCA, 21 U.S.C. 346a(d)(3), announcing the filing of a pesticide petition (PP 6E7003) by IR-4, 500 College Road East, Suite 201 W, Princeton, NJ 08540. The petition requested that 40 CFR 180.510 be amended by establishing tolerances for residues of the insecticide, pyriproxyfen, 2-1-methyl-2-(4-phenoxyphenoxy)ethoxypyridine, in or on vegetable, root and tuber, group 1 at 0.15 part per million (ppm); vegetable, leaves of root and tuber, group 2 at 2.0 ppm; vegetable, bulb, group 3, except onion, dry bulb at 0.70 ppm; vegetable, leafy, except brassica, group 4 at 2.0 ppm; vegetable, legume, group 6 at 0.2 ppm; vegetable, foliage of legume, group 7 at 2.0 ppm; caneberry, subgroup 13A at 1.0 ppm; grain, cereal, group 15 at 1.1 ppm; grain, cereal, forage, fodder and straw, group 16 at 1.1 ppm; animal feed, nongrass, group 18 at 0.7 ppm for forage, 2.0 for seed, and 1.1 for hay; asparagus at 2.0 ppm; banana and plantain at 0.2 ppm; cacao bean at 0.02 ppm; canola, seed at 0.20 ppm; coffee at 0.02 ppm; cranberry at 1.0 ppm; date at 0.3 ppm; grass, forage at 0.5 ppm; grass, hay at 1.0 ppm; kiwifruit at 0.1 ppm; pawpaw at 1.0 ppm; peanut at 0.2 ppm; pineapple at 0.3 ppm; pomegranate at 0.20 ppm; safflower, seed at 0.2 ppm; sesame, seed at 0.02 ppm; sugarcane at 1.1 ppm; tea at 0.02 ppm; watercress at 2.0 ppm; and artichoke, globe at 2.0 ppm. That notice referenced a summary of the petition prepared by Valent USA Corporation, the registrant, which is available to the public in the docket, *http://www.regulations.gov*. One comment was received on the notice of filing. EPA's response to comment is discussed in Unit IV.C.

Based upon review of the data supporting the petition, EPA has determined that proposed tolerances for vegetable, leaves of root, and tuber, group 2; vegetable, leafy, except, Brassica, group 4; vegetable, legume, group 6; vegetable, foliage of legume, group 7; artichoke, globe; asparagus; kiwifruit; and watercress will not be established at this time. Further, the Agency is establishing the following additional tolerances in conjunction with the tolerances that were requested: Beet, sugar, dried, pulp; potato, granules/flakes; potato, chips; potato, wet peel; rice, hulls; coffee, instant; and pineapple, process residue. The reason for these changes is explained in Unit IV.

III. Aggregate Risk Assessment and Determination of Safety

Section 408(b)(2)(A)(i) of the FFDCA allows EPA to establish a tolerance (the legal limit for a pesticide pyriproxyfen residue in or on a food) only if EPA determines that the tolerance is ''safe.'' Section 408(b)(2)(A)(ii) of the FFDCA defines ''safe'' to mean that ''there is a reasonable certainty that no harm will result from aggregate exposure to the pesticide pyriproxyfen residue, including all anticipated dietary exposures and all other exposures for which there is reliable information.'' This includes exposure through drinking water and in residential settings, but does not include occupational exposure. Section 408(b)(2)(C) of the FFDCA requires EPA to give special consideration to exposure of infants and children to the pesticide pyriproxyfen residue in establishing a tolerance and to ''ensure that there is a reasonable certainty that no harm will result to infants and children from aggregate exposure to the pesticide pyriproxyfen residue....'' These provisions were added to the FFDCA by the Food Quality Protection Act (FQPA) of 1996.

Consistent with FFDCA section 408(b)(2)(D), and the factors specified in section 408(b)(2)(D), EPA has reviewed the available scientific data and other relevant information in support of this action. EPA has sufficient data to assess the hazards of and to make a determination on aggregate exposure for the petitioned-for tolerances for residues of pyriproxyfen on animal feed, nongrass, group 18, forage at 0.70 ppm; animal feed, nongrass, group 18, hay at 1.1 ppm; animal feed, nongrass, group 18, seed at 2.0 ppm; banana at 0.20 ppm; beet, sugar, dried pulp at 3.0 ppm; cacao bean, dried at 0.02 ppm; caneberry, subgroup 13-A at 1.0 ppm; canola, seed at 0.20 ppm; coffee, instant at 0.10 ppm; coffee, green bean at 0.02 ppm; cranberry at 1.0 ppm; date at 0.30 ppm; grain, cereal, group 15 at 1.1 ppm; grain, cereal, forage, fodder and straw, group 16 at 1.1 ppm; pawpaw at 1.0 ppm; peanut at 0.20 ppm; pineapple at 0.30 ppm; pineapple, process residue at 1.1 ppm; pomegranate at 0.20 ppm; potato, chips at 0.75 ppm; potato, granules/flakes at 0.75 ppm; potato, wet peel at 0.75 ppm; rice, hulls at 5.5 ppm; safflower, seed at 0.20 ppm; sesame, seed at 0.02 ppm; sugarcane at 1.1 ppm; tea at 0.02 ppm; vegetable, bulb, group 3, except onion, bulb at 0.70 ppm; and vegetable, root and tuber, group 1 at 0.15 ppm. EPA's assessment of exposures and risks associated with establishing the tolerances follow.

A. Toxicological Profile

EPA has evaluated the available toxicity data and considered its validity, completeness, and reliability as well as the relationship of the results of the studies to human risk. EPA has also considered available information concerning the variability of the sensitivities of major identifiable subgroups of consumers, including infants and children. Specific information on the studies received and the nature of the adverse effects caused by pyriproxyfen as well as the no-observed-adverse-effect-level (NOAEL) and the lowest-observed-adverse-effect-level (LOAEL) from the toxicity studies can be found *at http://www.epa.gov/fedrgstr/EPA-PEST/2003/May/Day-14/p12022.htm* in **Federal Register** of May 14, 2003 (68 FR 25831) (FRL–7305–9).

B. Toxicological Endpoints

For hazards that have a threshold below which there is no appreciable risk, the toxicological level of concern (LOC) is derived from the highest dose at which no adverse effects are observed (the NOAEL) in the toxicology study identified as appropriate for use in risk assessment. However, if a NOAEL cannot be determined, the lowest dose at which adverse effects of concern are identified (the LOAEL) is sometimes used for risk assessment. Uncertainty/safety factors (UF) are used in conjunction with the LOC to take into account uncertainties inherent in the extrapolation from laboratory animal data to humans and in the variations in sensitivity among members of the human population as well as other unknowns. Safety is assessed for acute and chronic risks by comparing aggregate exposure to the pesticide to the acute population adjusted dose (''aPAD'') and chronic population adjusted dose (''cPAD''). The aPAD and cPAD are calculated by dividing the LOC by all applicable uncertainty/safety factors. Short-, intermediate, and long-term risks are evaluated by comparing aggregate exposure to the LOC to ensure that the margin of exposure (''MOE'') called for by the product of all applicable uncertainty/safety factors is not exceeded.

For non-threshold risks, the Agency assumes that any amount of exposure will lead to some degree of risk and estimates risk in terms of the probability of occurrence of additional adverse cases. Generally, cancer risks are considered non-threshold. For more information on the general principles

EPA uses in risk characterization and a complete description of the risk assessment process, see *http://www.epa.gov/fedrgstr/EPA-PEST/1997/November/Day-26/p30948.htm*.

A summary of the toxicological endpoints for pyriproxyfen used for human risk assessment can be found at *www.regulations.gov* in document title Pyriproxyfen Human Health Risk Assessment Use on Numerous Crops. IR-4 Tolerance Plan (Reduced Data Set Translations) on pages 9–10 in Docket ID EPA–HQ–OPP–2006–0889.

C. Exposure Assessment

1. *Dietary exposure from food and feed uses*. In evaluating dietary exposure to pyriproxyfen, EPA considered exposure under the petitioned-for tolerances as well as all existing pyriproxyfen tolerances in (40 CFR 180.510). EPA assessed dietary exposures from pyriproxyfen in food as follows:

i. *Acute exposure*. Quantitative acute dietary exposure and risk assessments are performed for a food-use pesticide, if a toxicological study has indicated the possibility of an effect of concern occurring as a result of a one-day or single exposure. No such effects were identified in the toxicological studies for pyriproxyfen; therefore, a quantitative acute dietary exposure assessment is unnecessary.

ii. *Chronic exposure*. In conducting the chronic dietary exposure assessment EPA used the food consumption data from the 1994–1996 and 1998 Nationwide Continuing Surveys of Food Intake by Individuals (CSFII). As to residue levels in food, EPA performed a Tier 1 chronic analysis which assumed 100% crop treated (CT), default processing factors, and tolerance level residues for all commodities.

iii. *Cancer*. A cancer dietary risk assessment was not performed because no evidence of carcinogenicity has been found for pyriproxyfen.

2. *Dietary exposure from drinking water*. The Agency lacks sufficient monitoring data to complete a comprehensive dietary exposure analysis and risk assessment for pyriproxyfen in drinking water. Because the Agency does not have comprehensive monitoring data, drinking water concentration estimates are made by reliance on simulation or modeling taking into account data on the environmental fate characteristics of pyriproxyfen. Further information regarding EPA drinking water models used in pesticide exposure assessment can be found at *http://www.epa.gov/oppefed1/models/water/index.htm*.

Based on EPA's Pesticide Root Zone Model/Exposure Analysis Modeling System (PRZM/EXAMS) and Screening Concentration in Groundwater (SCI-GROW) models, the estimated environmental concentrations (EECs) of pyriproxyfen for acute and chronic exposures for surface water are estimated to be 2.15 parts per billion (ppb), and 0.40 ppb, respectively. The EEC for chronic exposure is estimated to be 0.006 ppb for groundwater. Both models assumed a maximum seasonal application rate of 0.11 lb ai/A, 3 times per year (citrus and stone fruit).

Modeled estimates of drinking water concentrations were directly entered into the dietary exposure model. For chronic dietary risk assessment, the water concentration of value 0.40 ppb was used to access the contribution to drinking water.

3. *From non-dietary exposure*. The term ''residential exposure'' is used in this document to refer to non-occupational, non-dietary exposure (e.g., for lawn and garden pest control, indoor pest control, termiticides, and flea and tick control on pets).

Pyriproxyfen is the active ingredient in many registered residential products for flea and tick control (home environment and pet treatments) as well as products for ant and roach control (indoor and outdoor applications). Formulations include carpet powders, foggers, aerosol sprays, liquids (shampoos, sprays and pipettes for pet treatments), granules, bait (indoor and outdoor), and impregnated materials (pet collars). Only a post-application residential assessment was conducted as the Agency did not select any short-term dermal or inhalation endpoints. Toddlers are anticipated to have the highest exposures from treated home environments and pets due to typical hand-to-mouth behavior. EPA assessed residential exposure using the following assumptions:

- Short-term, intermediate-term, and long-term toddler hand-to-mouth exposures (consisting of petting treated animals and touching treated carpets/flooring).
- Long-term dermal exposures for products with anticipated efficacy more than 6 months (carpet powders and pet collars).
- Combined treatment toddler exposure scenarios as a result of treatments to the home environment and the pet in the same period (such as carpet powder and pet shampoo treatments). Episodic ingestion of granules by toddlers is anticipated, but an assessment for this scenario is not included, since an acute dietary endpoint was not selected.

4. *Cumulative effects from substances with a common mechanism of toxicity*. Section 408(b)(2)(D)(v) of the FFDCA requires that, when considering whether to establish, modify, or revoke a tolerance, the Agency consider ''available information'' concerning the cumulative effects of a particular pesticide's residues and ''other substances that have a common mechanism of toxicity.''

Unlike other pesticides for which EPA has followed a cumulative risk approach based on a common mechanism of toxicity, EPA has not made a common mechanism of toxicity finding as to pyriproxyfen and any other substances and pyriproxyfen does not appear to produce a toxic metabolite produced by other substances. For the purposes of this tolerance action, therefore, EPA has not assumed that pyriproxyfen has a common mechanism of toxicity with other substances. For information regarding EPA's efforts to determine which chemicals have a common mechanism of toxicity and to evaluate the cumulative effects of such chemicals, see EPA's website at *http://www.epa.gov/pesticides/cumulative*.

D. Safety Factor for Infants and Children

1. *In general*. Section 408 of FFDCA provides that EPA shall apply an additional (''10X'') tenfold margin of safety for infants and children in the case of threshold effects to account for prenatal and postnatal toxicity and the completeness of the data base on toxicity and exposure unless EPA determines based on reliable data that a different margin of safety will be safe for infants and children. This additional margin of safety is commonly referred to as the FQPA safety factor. In applying this provision, EPA either retains the default value of 10X when reliable data do not support the choice of a different factor, or, if reliable data are available, EPA uses a different additional FQPA safety factor value based on the use of traditional uncertainty/safety factors and/or special FQPA safety factors, as appropriate.

2. *Prenatal and postnatal sensitivity*. Based on the available data, there is no quantitative and qualitative evidence of increased susceptibility observed following *in utero* pyriproxyfen exposure to rats and rabbits or following prenatal/postnatal exposure in the 2–generation reproduction study.

3. *Conclusion*. EPA has determined that reliable data show that it would be safe for infants and children to reduce the FQPA safety factor to 1X. That decision is based on the following findings:

i. The toxicity database for pyriproxyfen is complete.

ii. There is no indication that pyriproxyfen is a neurotoxic chemical and there is no need for a developmental neurotoxicity study or additional uncertainty factors to account for neurotoxicity.

iii. There is no evidence that pyriproxyfen results in increased susceptibility in *in utero* rats or rabbits in the prenatal developmental studies or in young rats in the 2–generation reproduction study.

iv. There are no residual uncertainties identified in the exposure databases. The dietary food exposure assessments were performed based on 100% CT and tolerance-level residues. Conservative ground water and surface water modeling estimates were used. Similarly conservative Residential Standard Operating Procedues (SOPs) were used to assess post-application exposure to children as well as incidental oral exposure of toddlers. These assessments will not underestimate the exposure and risks posed by pyriproxyfen.

E. Aggregate Risks and Determination of Safety

Safety is assessed for acute and chronic risks by comparing aggregate exposure to the pesticide to the aPAD and cPAD. The aPAD and cPAD are calculated by dividing the LOC by all applicable uncertainty/safety factors. For linear cancer risks, EPA calculates the probability of additional cancer cases given aggregate exposure. Short-term, intermediate-term, and long-term risks are evaluated by comparing aggregate exposure to the LOC to ensure that the MOE called for by the product of all applicable uncertainty/safety factors is not exceeded.

1. *Acute risk*. No such effects were identified in the toxicological studies for pyriproxyfen; therefore, a quantitative acute risk assessment is unnecessary.

2. *Chronic risk*. Using the exposure assumptions described in this unit for chronic exposure, EPA has concluded that exposure to pyriproxyfen from food and water will utilize 10% of the cPAD for the population group children 1-2 years old. A long-term post-application residential assessment was performed for toddlers only since they are anticipated to have the higher exposures than adults from treated home environments and pets due to their behavior patterns. The total chronic dietary and residential aggregate MOEs range from 570 to 4,700.

3. *Short-term and intermediate-term risk*. Short and intermediate-term aggregate exposures take into account residential exposure plus chronic exposure to food and water (considered to be a background exposure level). Pyriproxyfen is currently registered for use that could result in short-term and intermediate-term residential exposures and the Agency has determined that it is appropriate to aggregate chronic food and water for short-term and intermediate-term exposures for pyriproxyfen.

Using the exposure assumptions described in this unit for short-term exposures, EPA has concluded that food, water, and residential exposures aggregated result in aggregate MOEs range from 1,200 to 14,000 for children 1-2 years old, and females 13-49 years old, respectively.

Using the exposure assumptions described in this unit for intermediate-term exposures, EPA has concluded that food, water, and residential exposures aggregated result in aggregate MOEs range from 430 to 4,700 for children 1-2 years old, and females 13-49 years old, respectively.

4. *Aggregate cancer risk for U.S. population*. Pyriproxyfen is classified as a ''Group E'' chemical (negative for carcinogenicity to humans). This classification is based on the lack of evidence of carcinogenicity in mice and rats. EPA does not expect pyriproxyfen to pose a cancer risk.

5. *Determination of safety*. Based on these risk assessments, EPA concludes that there is a reasonable certainty that no harm will result to the general population, or to infants and children from aggregate exposure to pyriproxyfen residues.

IV. Other Considerations

A. Analytical Enforcement Methodology

Adequate enforcement methodology (gas chromatography/nitrogen-phosphorous detector (GC/NPD)) is available to enforce the tolerance expression. The method may be requested from: Chief, Analytical Chemistry Branch, Environmental Science Center, 701 Mapes Rd., Ft. Meade, MD 20755–5350; telephone number: (410) 305–2905; e-mail address: *residuemethods@epa.gov*.

B. International Residue Limits

There are currently no established Codex maximum residue limits (MRLs) for pyriproxyfen.

C. Response to Comments

One comment was received by the Agency from a private citizen. The comment applies to the use of ''available data'' concerning the cumulative effects of the pesticide's residues and ''other substances that have a common mechanism of toxicity.'' In this case, EPA did not assume that this chemical has a common mechanism of toxicity with other substances as the chemical does not generate metabolites produced also by other chemicals. For specific information regarding EPA's approach to the use of common mechanism of toxicity to evaluate the cumulative effects of chemicals, please refer to EPA's website at *http://www.epa.gov/pesticides/cumulative/* to see policy statements.

V. Conclusion

Following review of the residue data submitted with the petition, EPA has made several revisions to the petition's request for the establishment of tolerances. First, due to absence of confirmatory data, the Agency is not establishing in this regulation the tolerances proposed for vegetable, leaves of root, and tuber, group 2; vegetable, leafy, except, Brassica, group 4; vegetable, legume, group 6; vegetable, foliage of legume, group 7; artichoke, globe; asparagus; kiwifruit; and watercress at this time. Second, EPA determined that proposed tolerances for various raw agricultural commodities (beets, potatoes, rice, coffee, pineapples) did not appropriately address residue levels that could occur in foods processed from those raw commodities. Accordingly, relying on the theoretical processing factors or processing factors from the Agency's pyriproxyfen database, EPA is establishing tolerances for the processed commodities of beet, dry pulp; potato granules/flakes, chips, and wet peel; rice, hulls; coffee, instant; and pineapple processed residue.

Therefore, tolerances are established for residues of pyriproxyfen, 2-[1-methyl-2-(4-phenoxyphenoxy)ethoxypyridine, in or on the commodities listed in Unit III. paragraph 2.

VI. Statutory and Executive Order Reviews

This final rule establishes a tolerance under section 408(d) of FFDCA in response to a petition submitted to the Agency. The Office of Management and Budget (OMB) has exempted these types of actions from review under Executive Order 12866, entitled *Regulatory Planning and Review* (58 FR 51735, October 4, 1993). Because this rule has been exempted from review under Executive Order 12866, this rule is not subject to Executive Order 13211, *Actions Concerning Regulations That Significantly Affect Energy Supply, Distribution, or Use* (66 FR 28355, May 22, 2001) or Executive Order 13045,

entitled *Protection of Children from Environmental Health Risks and Safety Risks* (62 FR 19885, April 23, 1997). This final rule does not contain any information collections subject to OMB approval under the Paperwork Reduction Act (PRA), 44 U.S.C. 3501 *et seq.*, nor does it require any special considerations under Executive Order 12898, entitled *Federal Actions to Address Environmental Justice in Minority Populations and Low-Income Populations* (59 FR 7629, February 16, 1994).

Since tolerances and exemptions that are established on the basis of a petition under section 408(d) of FFDCA, such as the tolerance in this final rule, do not require the issuance of a proposed rule, the requirements of the Regulatory Flexibility Act (RFA) (5 U.S.C. 601 *et seq.*) do not apply.

This final rule directly regulates growers, food processors, food handlers and food retailers, not States or tribes, nor does this action alter the relationships or distribution of power and responsibilities established by Congress in the preemption provisions of section 408(n)(4) of FFDCA. As such, the Agency has determined that this action will not have a substantial direct effect on States or tribal governments, on the relationship between the national government and the States or tribal governments, or on the distribution of power and responsibilities among the various levels of government or between the Federal Government and Indian tribes. Thus, the Agency has determined that Executive Order 13132, entitled *Federalism* (64 FR 43255, August 10, 1999) and Executive Order 13175, entitled *Consultation and Coordination with Indian Tribal Governments* (65 FR 67249, November 6, 2000) do not apply to this rule. In addition, This rule does not impose any enforceable duty or contain any unfunded mandate as described under Title II of the Unfunded Mandates Reform Act of 1995 (UMRA) (Public Law 104–4).

This action does not involve any technical standards that would require Agency consideration of voluntary consensus standards pursuant to section 12(d) of the National Technology Transfer and Advancement Act of 1995 (NTTAA), Public Law 104–113, section 12(d) (15 U.S.C. 272 note).

VII. Congressional Review Act

The Congressional Review Act, 5 U.S.C. 801 *et seq.*, generally provides that before a rule may take effect, the agency promulgating the rule must submit a rule report to each House of the Congress and to the Comptroller General of the United States. EPA will submit a report containing this rule and other required information to the U.S. Senate, the U.S. House of Representatives, and the Comptroller General of the United States prior to publication of this final rule in the **Federal Register**. This final rule is not a ''major rule'' as defined by 5 U.S.C. 804(2).

List of Subjects in 40 CFR Part 180

Environmental protection, Administrative practice and procedure, Agricultural commodities, Pesticides and pests, Reporting and recordkeeping requirements.

Dated: August 9, 2007.

Donald R. Stubbs,

Acting Director, Registration Division, Office of Pesticide Programs.

■ Therefore, 40 CFR chapter I is amended as follows:

PART 180—[AMENDED]

■ 1. The authority citation for part 180 continues to read as follows:

Authority: 21 U.S.C. 321(q), 346a and 371.

■ 2. Section 180.510 is amended by alphabetically adding the following commodities to the table in paragraph (a)(1) to read as follows:

§ 180.510 Pyriproxyfen; tolerances for residues.

(a) * * *

(1) * * *

Commodity	Parts per million
* * * * *	
Animal feed, nongrass, group 18, forage	0.70
Animal feed, nongrass, group 18, hay	1.1
Animal feed, nongrass, group 18, seed	2.0
* * * * *	
Banana	0.20
Beet, sugar, dried pulp	3.0
* * * * *	
Cacao bean, dried	0.02
Caneberry, subgroup 13-A	1.0
Canola, seed	0.20
* * * * *	
Coffee, instant	0.10
Coffee, green bean	0.02
* * * * *	
Cranberry	1.0
* * * * *	
Date	0.30
* * * * *	
Grain, cereal, group 15	1.1

Commodity	Parts per million
Grain, cereal, forage, fodder and straw, group 16	1.1
* * * * *	
Pawpaw	1.0
Peanut	0.20
Pineapple	0.30
Pineapple, process residue	1.1
* * * * *	
Pomegranate	0.20
Potato, chips	0.75
Potato, granules/flakes	0.75
Potato, wet peel	0.75
* * * * *	
Rice, hulls	5.5
* * * * *	
Safflower, seed	0.20
* * * * *	
Sesame, seed	0.02
Sugarcane	1.1
Tea	0.02
Vegetable, bulb, group 3, except onion, bulb	0.70
Vegetable, root and tuber, group 1	0.15

[FR Doc. E7–16310 Filed 8–21–07; 8:45 am]
BILLING CODE 6560–50–S

FEDERAL COMMUNICATIONS COMMISSION

47 CFR Part 36

[CC Docket Nos. 96–45 and 00–256; FCC 01–157]

Federal-State Joint Board on Universal Service; Multi-Association Group (MAG) Plan for Regulation of Interstate Services of Non-Price-Cap Incumbent Local Exchange Carriers and Interexchange Carriers; Correction

AGENCY: Federal Communications Commission.

ACTION: Correcting amendments.

SUMMARY: This document contains corrections to the final regulations regarding rural high-cost universal service support that were published in the **Federal Register** of Tuesday, June 5, 2001, 66 FR 30080. The regulations relate to reforms to rural high-cost universal service support recommended by the Rural Task Force.

DATES: Effective August 22, 2007.

FOR FURTHER INFORMATION CONTACT: Katie King, Wireline Competition Bureau, Telecommunications Access Policy Division at (202) 418–7400 (voice), (202) 418–0484 (TTY), or e-mail at *Katie.King@fcc.gov.*

SUPPLEMENTARY INFORMATION:

Background

The final regulations that are the subject of these corrections amended the Commission's rules relating to high-cost universal service support for rural carriers in response to recommendations of the Rural Task Force. Among other things, the amendments added §§ 36.602 and 36.603 to the Commission's rules and provided that, effective July 1, 2001, §§ 36.602 and 36.603 supersede § 36.601(c) of the Commission's rules. Section 36.622 of the Commission's rules previously contained a reference to § 36.601(c), and additional references to §§ 36.602 and 36.603 were inadvertently omitted in the final rules.

Need for Correction

As published, the final regulations omit references to rule sections that were added, and this omission may be misleading and needs to be corrected.

List of Subjects in 47 CFR Part 36

Jurisdictional separations, Reporting and recordkeeping requirements, Telecommunications, Telephone.

Federal Communications Commission.

Marlene H. Dortch,

Secretary.

■ Accordingly, 47 CFR part 36 is corrected by making the following correcting amendments:

PART 36—JURISDICTIONAL SEPARATIONS PROCEDURES; STANDARD PROCEDURES FOR SEPARATING TELECOMMUNICATIONS PROPERTY COSTS, REVENUES, EXPENSES, TAXES AND RESERVES FOR TELECOMMUNICATIONS COMPANIES

Subpart F—Universal Service Fund

■ 1. The authority citation for part 36 continues to read as follows:

Authority: 47 U.S.C. 151, 154(i) and (j), 205, 221(c), 254, 403 and 410.

■ 2. Revise paragraph (c)(2) of § 36.622 to read as follows:

§ 36.622 National and study area average unseparated loop cost.

* * * * *

(c) * * *

(2) Until June 30, 2001, an amount calculated to produce the maximum total Universal Service Fund allowable pursuant to § 36.601(c). Effective July 1, 2001, for non-rural carriers, an amount calculated to produce the maximum non-rural carrier portion of nationwide loop cost expense adjustment allowable pursuant to § 36.602. Effective July 1, 2001, for rural carriers, an amount calculated to produce the maximum rural incumbent local exchange carrier portion of nationwide loop cost expense adjustment allowable pursuant to § 36.603(a).

[FR Doc. E7–16569 Filed 8–21–07; 8:45 am]

BILLING CODE 6712–01–P

FEDERAL COMMUNICATIONS COMMISSION

47 CFR Part 54

[CC Docket No. 96–45; FCC 97–157]

Universal Service; Correction

AGENCY: Federal Communications Commission.

ACTION: Correcting amendments.

SUMMARY: This document contains corrections to the authority citation to the final regulations, 47 CFR Part 54, which were published in the **Federal Register** of Tuesday, June 17, 1997, 62 FR 32912. The regulations implemented the statutory requirements of the Telecommunications Act of 1996 relating to universal service.

DATES: Effective August 22, 2007.

FOR FURTHER INFORMATION CONTACT: Katie King, Wireline Competition Bureau, Telecommunications Access Policy Division at (202) 418–7400 (voice), (202) 418–0484 (TTY), or e-mail at *Katie.King@fcc.gov*.

SUPPLEMENTARY INFORMATION:

Background

The final regulations that are the subject of these corrections implemented section 254 of the Communications Act of 1934, as amended, and relate to universal service. Section 254 was added to the Communications Act by section 101 of the Telecommunications Act of 1996 (Pub. L. 104–104, 110 Stat. 56).

Need for Correction

As published, the authority citation contains errors that may be misleading and needs to be corrected.

List of Subjects in 47 CFR Part 54

Communications common carriers, Health facilities, Infants and children, Libraries, Reporting and recordkeeping requirements, Schools, Telecommunications, Telephone.

Federal Communications Commission.

Marlene H. Dortch,

Secretary.

■ Accordingly, 47 CFR part 54 is corrected by making the following correcting amendments:

PART 54—UNIVERSAL SERVICE

■ 1. The authority citation for part 54 is revised to read as follows:

Authority: 47 U.S.C. 151, 154(i), 201, 205, 214, and 254 unless otherwise noted.

[FR Doc. E7–16573 Filed 8–21–07; 8:45 am]

BILLING CODE 6712–01–P

Proposed Rules

Federal Register
Vol. 72, No. 162
Wednesday, August 22, 2007

This section of the FEDERAL REGISTER contains notices to the public of the proposed issuance of rules and regulations. The purpose of these notices is to give interested persons an opportunity to participate in the rule making prior to the adoption of the final rules.

DEPARTMENT OF HOMELAND SECURITY

6 CFR Part 5

Privacy Act of 1974: Implementation of Exemptions

AGENCY: Office of the Secretary, Department of Homeland Security.

ACTION: Notice of proposed rulemaking.

SUMMARY: The Department of Homeland Security is giving concurrent notice of a revised and updated system of records pursuant to the Privacy Act of 1974 for the Arrival and Departure Information System (ADIS). In this proposed rulemaking, the Department proposes to exempt this system of records from one or more provisions of the Privacy Act because of criminal, civil, and administrative enforcement requirements.

DATES: Comments must be received on or before September 21, 2007.

ADDRESSES: You may submit comments, identified by docket number DHS–2007–0050, by one of the following methods:

Federal e-Rulemaking Portal: http://www.regulations.gov. Follow the instructions for submitting comments.

Fax: 1–866–466–5370.

Mail: Hugo Teufel III, Chief Privacy Officer, Department of Homeland Security, Washington, DC 20528.

Instructions: All submissions received must include the agency name and docket number for this notice. All comments received will be posted without change to *http://www.regulations.gov*, including any personal information provided.

Docket: For access to the docket to read background documents or comments received, go to *http://www.regulations.gov*.

FOR FURTHER INFORMATION CONTACT: For general questions, contact Claire Miller, Acting US-VISIT Privacy Officer, 245 Murray Lane, SW., Washington, DC 20528. For privacy-related questions, contact Hugo Teufel III, Chief Privacy Officer, Department of Homeland Security, Washington, DC 20528; telephone (703) 235–0780.

SUPPLEMENTARY INFORMATION:

Background

The Department of Homeland Security (DHS) is republishing the Privacy Act system of records notice for the Arrival and Departure Information System (ADIS) in order to expand its authority and capability to serve additional programs that require information on individuals throughout the immigrant and non-immigrant pre-entry, entry, status management, and exit processes. These changes include the addition of a routine use to allow sharing of information with the intelligence community in support of the DHS mission to protect the United States from potential terrorist activities; the addition of a routine use for cases of identity theft; clarification on the sources of data in ADIS, potentially including foreign governments; and a reduction of the retention period for ADIS data. The notice for this system of records was last published in the **Federal Register** on December 12, 2003 (68 FR 69412). In this notice of proposed rulemaking, DHS now is proposing to exempt ADIS from certain provisions of the Privacy Act.

The Privacy Act embodies fair information principles in a statutory framework governing the means by which the United States Government collects, maintains, uses, and disseminates personally identifiable information. The Privacy Act applies to information that is maintained in a ''system of records.'' A ''system of records'' is a group of any records under the control of an agency from which information is retrieved by the name of an individual or by some identifying number, symbol, or other identifying particular assigned to the individual. Individuals may request their own records that are maintained in a system of records in the possession or under the control of DHS by complying with DHS Privacy Act regulations, 6 CFR part 5.

The Privacy Act requires each agency to publish in the **Federal Register** a description of the type and character of each system of records that the agency maintains, and the routine uses that are contained in each system in order to make agency recordkeeping practices transparent, to notify individuals regarding the uses to which personally identifiable information is put, and to assist individuals in finding such files within the agency.

The Privacy Act allows Government agencies to exempt certain records from the access and amendment provisions. If an agency claims an exemption, however, it must issue a notice of proposed rulemaking to make clear to the public the reasons why a particular exemption is claimed.

DHS is claiming exemption from certain requirements of the Privacy Act for ADIS. Information in ADIS relates to official DHS national security, law enforcement, immigration, and intelligence activities. These exemptions are needed to protect information relating to DHS investigatory and enforcement activities from disclosure to subjects or others related to these activities. Specifically, the exemptions are required to preclude subjects of these activities from frustrating these processes; to avoid disclosure of activity techniques; to protect the identities and physical safety of confidential informants and of immigration and border management and law enforcement personnel; to ensure DHS's ability to obtain information from third parties and other sources; to protect the privacy of third parties; and to safeguard classified information. Disclosure of information to the subject of an inquiry could also permit the subject to avoid detection or apprehension.

The exemptions proposed here are standard law enforcement and national security exemptions exercised by a large number of Federal law enforcement and intelligence agencies. In appropriate circumstances, where compliance would not appear to interfere with or adversely affect the law enforcement purposes of this system and the overall law enforcement process, the applicable exemptions may be waived.

List of Subjects in 6 CFR Part 5

Freedom of information, Privacy.

For the reasons stated in the preamble, DHS proposes to amend Chapter I of Title 6, Code of Federal Regulations, as follows:

PART 5—DISCLOSURE OF RECORDS AND INFORMATION

1. The authority citation for part 5 continues to read as follows:

Authority: Pub. L. 107–296, 116 Stat. 2135, 6 U.S.C. 101 et seq.; 5 U.S.C. 301. Subpart A also issued under 5 U.S.C. 552. Subpart B also issued under 5 U.S.C. 552a.

2. At the end of Appendix C to Part 5, add the following new paragraph ''5'' to read as follows:

Appendix C—DHS Systems of Records Exempt from the Privacy Act

* * * * *

5. The Department of Homeland Security Arrival and Departure Information System (ADIS) consists of centralized computerized records and will be used by DHS and its components. ADIS is the primary repository of data held by DHS for near real-time immigrant and non-immigrant status tracking through pre-entry, entry, status management, and exit processes, based on data collected by DHS or other Federal or foreign government agencies and used in connection with DHS national security, law enforcement, immigration, intelligence, and other DHS mission-related functions, and to provide associated testing, training, management reporting, planning and analysis, or other administrative uses. The information is collected by, on behalf of, in support of, or in cooperation with DHS and its components and may contain personally identifiable information collected by other Federal, state, local, tribal, foreign, or international government agencies.

Pursuant to exemptions 5 U.S.C. 552a(j)(2) of the Privacy Act, this system is exempt from 5 U.S.C. 552a(c)(3) and (4); (d); (e)(1), (e)(2), (e)(3), (e)(4)(G), (e)(4)(H), (e)(5), (e)(8); (f); and (g). Pursuant to 5 U.S.C. 552a (k)(2), this system is exempt from the following provisions of the Privacy Act, subject to the limitations set forth in those subsections: 5 U.S.C. 552a (c)(3); (d); (e)(1), (e)(4)(G), (e)(4)(H); and (f). Exemptions from these particular subsections are justified, on a case-by-case basis to be determined at the time a request for release or disclosure is made, for the following reasons:

(a) From subsection (c)(3) and (4) (Accounting for Disclosures) because release of the accounting of disclosures could alert the subject of an investigation of an actual or potential criminal, civil, or regulatory violation to the existence of that investigation and reveal investigative interest on the part of DHS as well as the recipient agency. Disclosure of the accounting would therefore present a serious impediment to law enforcement efforts and/or efforts to preserve national security. Disclosure of the accounting would also permit the individual who is the subject of a record to impede the investigation, to tamper with witnesses or evidence, and to avoid detection or apprehension, which would undermine the entire investigative process.

(b) From subsection (d) (Access to Records) because access to the records contained in this system of records could inform the subject of an investigation of an actual or potential criminal, civil, or regulatory violation to the existence of that investigation and reveal investigative interest on the part of DHS or another agency. Access to the records could permit the individual who is the subject of a record to impede the investigation, to tamper with witnesses or evidence, and to avoid detection or apprehension. Amendment of the records could interfere with ongoing investigations and law enforcement activities and would impose an unreasonable administrative burden by requiring investigations to be continually reinvestigated. In addition, permitting access and amendment to such information could disclose security-sensitive information that could be detrimental to homeland security.

(c) From subsection (e)(1) (Relevancy and Necessity of Information) because in the course of investigations into potential violations of Federal law, the accuracy of information obtained or introduced occasionally may be unclear, or the information may not be strictly relevant or necessary to a specific investigation. In the interests of effective law enforcement, it is appropriate to retain all information that may aid in establishing patterns of unlawful activity.

(d) From subsection (e)(2) (Collection of Information from Individuals) because requiring that information be collected from the subject of an investigation would alert the subject to the nature or existence of the investigation, thereby interfering with that investigation and related law enforcement activities.

(e) From subsection (e)(3) (Notice to Subjects) because providing such detailed information could impede law enforcement by compromising the existence of a confidential investigation or reveal the identity of witnesses or confidential informants.

(f) From subsections (e)(4)(G) and (H) and (f) (Agency Requirements) because portions of this system are exempt from the individual access provisions of subsection (d) and thus would not require DHS to apply rules for records or portions of records which are exempted from access or amendment upon request. Access to, and amendment of, system records that are not exempt or for which exemption is waived may be obtained under procedures described in the related system of records notice (SORN) or Subpart B of this Part.

(g) From subsection (e)(5) (Collection of Information) because with the collection of information for law enforcement purposes, it is impossible to determine in advance what information is accurate, relevant, timely, and complete. Compliance with subsection (e)(5) would preclude DHS agents from using their investigative training and exercise of good judgment to both conduct and report on investigations.

(h) From subsection (e)(8) (Notice on Individuals) because compliance would interfere with DHS's ability to obtain, serve, and issue subpoenas, warrants, and other law enforcement mechanisms that may be filed under seal and could result in disclosure of investigative techniques, procedures, and evidence.

(i) From subsection (g) (Civil Remedies) to the extent that the system is exempt from other specific subsections of the Privacy Act.

Dated: August 15, 2007.

John Kropf,

Acting Chief Privacy Officer, Department of Homeland Security.

BILLING CODE 4410–10–P

DEPARTMENT OF HOMELAND SECURITY

U.S. Citizenship and Immigration Services

8 CFR Parts 1, 264, and 299

[CIS No. 2354–05; DHS Docket No. USCIS–2005–0056]

RIN 1615–AB36

Application Process for Replacing Forms I–551 Without an Expiration Date

AGENCY: U.S. Citizenship and Immigration Services, DHS.

ACTION: Notice of proposed rulemaking.

SUMMARY: U.S. Citizenship and Immigration Services (USCIS) issues Permanent Resident Cards (Forms I–551) to lawful permanent residents to serve as evidence of immigration status, registration, identity, and employment authorization, and as an entry document upon return from a trip outside of the United States. Currently, there are numerous lawful permanent residents who possess cards without expiration dates. USCIS intends to terminate the validity of such Forms I–551. This rule proposes to establish a 120-day period for lawful permanent residents who have Forms I–551 that do not bear expiration dates to apply for replacement cards. This rule also proposes to amend USCIS regulations to remove references to outdated application procedures for Forms I–551. The application process proposed by this rule will enable USCIS to issue more secure Forms I–551 to affected aliens, update cardholder information, conduct background checks, and electronically store applicants' biometric information that can be used for biometric comparison and authentication purposes consistent with the goals of the Enhanced Border Security and Visa Entry Reform Act of 2002.

In addition, USCIS proposes to notify the public of the termination date for Forms I–551 without expiration dates by a subsequent Notice published in the **Federal Register**. This rule also proposes to correct the title and edition date of the ''Application to Replace

Lawful Permanent Resident Card,'' Form I–90.

DATES: Written comments must be submitted on or before September 21, 2007.

ADDRESSES: You may submit comments, identified by DHS Docket No. USCIS–2005–0056, by one of the following methods:

- *Federal eRulemaking Portal: http://www.regulations.gov.* Follow the instructions for submitting comments.
- *E-mail:* You may submit comments directly to USCIS by e-mail at *rfs.regs@dhs.gov.* Include DHS Docket No. USCIS–2005–0056 in the subject line of the message.
- *Mail:* The Chief, Regulatory Management Division, U.S. Citizenship and Immigration Services, Department of Homeland Security, 111 Massachusetts Avenue, NW., 3rd Floor, Washington, DC 20529. To ensure proper handling, please reference DHS Docket No. USCIS–2005–0056 on your correspondence. This mailing address may also be used for paper, disk, or CD–ROM submissions.
- *Hand Delivery/Courier:* U.S. Citizenship and Immigration Services, Department of Homeland Security, 111 Massachusetts Avenue, NW., 3rd Floor, Washington, DC 20529. Contact Telephone Number is (202) 272–8377.

FOR FURTHER INFORMATION CONTACT: R. Mark Phillips, Supervisory Adjudications Policy Officer, U.S. Citizenship and Immigration Services, 20 Massachusetts Ave., Suite 2304, Washington, DC 20529, telephone (202) 272–8350.

SUPPLEMENTARY INFORMATION:

I. Public Participation

Interested persons are invited to participate in this rulemaking by submitting written data, views, or arguments on all aspects of the proposed rule. The Department of Homeland Security (DHS) and U.S. Citizenship and Immigration Services (USCIS) also invite comments that relate to the economic or federalism effects that might result from this proposed rule. Comments that will provide the most assistance to USCIS will reference a specific portion of the proposed rule, explain the reason for any recommended change, and include data, information, or authority to support such recommended change.

Instructions: All submissions received must include the agency name and DHS docket No. USCIS–2005–0056 for this rulemaking. All comments received will be posted without change to *http://www.regulations.gov,* including any personal information provided. See **ADDRESSES** above for information on how to submit comments.

Docket: For access to the docket to read background documents or comments received, go to *http://www.regulations.gov.* Submitted comments may also be inspected at the office of the Director, Regulatory Management Division, U.S. Citizenship and Immigration Services, Department of Homeland Security, 111 Massachusetts Avenue, NW., 3rd Floor, Washington, DC 20529.

II. Background

A. Statutory and Regulatory Authority and Purpose

A lawful permanent resident (LPR) is an alien who has been granted the privilege of permanently living and working in the United States (lawful permanent resident status), either by adjusting status from a prior immigration status within the United States or by being admitted to the United States on an immigrant visa issued abroad by the U.S. Department of State (DOS). In most cases, USCIS must first approve an immigrant petition for the intending immigrant. Typically, these petitions are filed by an employer (e.g., Form I–140, Immigrant Petition for Alien Worker) or relative (Form I–130, Petition for Alien Relative). After the petition is granted, individuals living within the United States can apply for adjustment of status with USCIS or, for those in removal proceedings, the immigration court, using Form I–485, ''Application to Register Permanent Residence or Adjust Status.'' Individuals living abroad must file an application for an immigrant visa with a DOS consular office. *See* 22 CFR 42.63(a)(1) (DS–230, Application for Immigrant Visa and Alien Registration).

As part of the adjustment of status application process, applicants are required to appear at a local USCIS Application Support Center (ASC) and submit to registration and biometrics capture by USCIS. Biometrics capture currently includes fingerprint imaging and a digital photograph. Following approval of an adjustment application or after admission to the United States on an immigration visa, the new LPR will receive a Form I–551, Permanent Resident Card.[1] (commonly referred to as a ''green card''). A Form I–551 is evidence of the holder's authorization to live and work in the United States. *See* Immigration and Nationality Act (INA) sections 264(d), 274A(b)(1)(B)(ii) (8 U.S.C. 1304(d), 1324a(b)(1)(B)(ii)); 8 CFR 264.1(b); 8 CFR 274a.2(b)(1)(v)(A)(2).

USCIS has been authorized to collect information and require the registration of aliens under section 262 of the INA, 8 U.S.C. 1302. Aliens registering with USCIS are required to provide information regarding the date and place of the alien's entry into the United States; the activities in which the alien has been and intends to be engaged; the length of time the alien expects to remain in the United States; the police and criminal record, if any, of the alien; and any additional matters prescribed by DHS or DOS. INA sec. 264(a), 8 U.S.C. 1304(a). All registered aliens over 18 years of age must carry evidence of registration. INA sec. 264(e), 8 U.S.C. 1304(e). The failure to carry evidence of registration is a misdemeanor offense. *Id.* The Form I–551 is a form of evidence of registration issued to individuals who are LPRs. 8 CFR 264.1(b). The Form I–551 also serves as evidence of employment authorization and identity (see 8 CFR 274a.2(b)(1)(v)(A)(2)), and is used as an entry document upon return from a trip outside the United States (see 8 CFR 211.1(a)(2)).

Until 1989, Forms I–551 issued to LPRs did not contain expiration dates; therefore, those still in circulation do not require periodic replacement. *See* Memorandum from Commissioner James L. Buck on Alien Registration Documentation (Form I–551) (July 18, 1989).[2] In August 1989, however, the then-Immigration and Naturalization Service (INS) began issuing Forms I–551 with a 10-year expiration date, thereby requiring the cardholder to apply periodically for a new card, and, in so doing, appear before USCIS to update personal information, the photograph contained on the card, and other biometric information, such as fingerprints. *See* 8 CFR 264.5(a), (b), (c); Instructions to Form I–90, ''Application to Replace Permanent Resident Card.'' The Form I–551 replacement process gives DHS an opportunity to collect updated biometric information, conduct background checks, and issue updated cards.

When the 10-year Form I–551 was introduced in 1989, it was not administratively feasible for the INS to terminate the validity of all the millions of Forms I–551 in circulation that did not have expiration dates. USCIS now

[1] Form I–551 has two titles—Alien Registration Receipt Card and Permanent Resident Card—because it underwent a name change in January 20, 1999 from ''Alien Registration Receipt Card'' to ''Permanent Resident Card,'' and both versions of Form I–551 remain in circulation. 63 FR 70313 (Dec. 21, 1998).

[2] The public can access a copy of this memorandum from the public docket for this rulemaking at *http://www.regulations.gov*, DHS Docket No. USCIS–2005–0056.

has established processes to enable it to require LPRs with Forms I–551 without expiration dates to apply for new cards and terminate the validity of Forms I–551 without expiration dates. These processes include the establishment, in 1997 and 1998, of Application Support Centers (ASCs) across the United States that, through electronic scheduling of appointments, currently serve as efficient intake centers. In addition, biometrics began to be captured electronically in 1999. Finally, USCIS implemented a new, highly-automated filing procedure in May 2005 where applicants file their Forms I–90 with a U.S. Treasury Department-designated and operated lockbox provider that allows USCIS to process the applications and associated fees more expeditiously. As a result of these improvements, USCIS now has the capability to process a large influx of Forms I–90 over a short period of time.

The need to remove Forms I–551 without expiration dates from circulation is supported by the Enhanced Border Security and Visa Entry Reform Act of 2002 (''BSA''), Public Law 107–173, 116 Stat. 543 (May 14, 2002), amended by Public Law 108–299, 118 Stat. 1100 (Aug. 9, 2004). Section 302(b)(1) of the BSA, 8 U.S.C. 1732(b)(1), requires the Secretary of Homeland Security and the Secretary of State, to issue, not later than October 26, 2004, only machine-readable, tamper-resistant visas and other travel and entry documents that use biometrics identifiers. The Form I–551 falls within the scope of the BSA because, in addition to serving as evidence of registration, it also serves as an entry document for LPRs returning to the United States after a trip abroad. *See* 8 CFR 211.1(a)(2).

Prior to October 26, 2004, USCIS determined that the Form I–551 was compliant with the requirements of section 302(b)(1) of the BSA, 8 U.S.C. 1732(b)(1). The Form I–551, including the version that does not contain an expiration date, is machine-readable and contains tamper-resistant features and biometrics identifiers. While compliant, older versions of the Form I–551 without expiration dates do not contain the same level of tamper-resistant features and biometric identifiers as the current version. Forms I–551 with expiration dates must be renewed periodically, at which point USCIS can issue new cards containing updated technologies and biometrics information. This is not possible for Forms I–551 without expiration dates. Consequently, in order to ensure that the Forms I–551 in circulation contain the higher level of tamper-resistant features and biometric identifiers that currently-issued cards contain, USCIS intends to terminate the validity of Forms I–551 without expiration dates. In addition, USCIS must ensure that it maintains current biometrics to enable it to conduct background checks on Form I–551 holders to confirm that they are compliant with the laws of the United States and that they are not a threat to national security. By periodically requiring all Form I–551 holders to apply for replacement cards, USCIS will be able to confirm this information and update background and biometric information.

For these reasons, USCIS proposes to set the form, manner and time that alien registration receipt cards are issued as authorized under section 264(d) of the INA, 8 U.S.C. 1304(d). The rule proposes to amend the regulations to require bearers of Forms I–551 without expiration dates to apply for a replacement card during a 120-day application period. This proposed rule also amends the regulations governing the application process for replacing Forms I–551 and makes technical corrections to the title of the application used to replace Forms I–551. Finally, this rule proposes a mechanism for terminating Forms I–551 without an expiration date by notice in the **Federal Register**.

B. Changes Made by This Rule

1. Requirement To Replace Forms I–551 Without Expiration Dates

This rule proposes to amend 8 CFR 264.5(c)(1) to add Form I–551 without an expiration date to the current list of outdated permanent resident cards that are required to be replaced by the filing of Form I–90, ''Application to Replace Permanent Resident Card.'' The current list consists of Forms AR–3, AR–103, and I–151. This proposed amendment also would impose a 120-day application period for those LPRs holding Forms I–551 without an expiration date to apply for a replacement card. Through the Form I–90 application process, applicants would be required to provide their current biographic and biometric information. Based on this information, USCIS would conduct security checks to verify the identity of card recipients and continued eligibility for LPR status. USCIS would charge the standard, Form I–90 application fee and the biometric information collection service fee to cover all associated costs. The current fees are $290 for the Form I–90 and $80 for the biometric information collection service.[3] After completion of the 120-day application period, USCIS would set a termination date for the validity of such Forms I–551.

USCIS believes that an application period of 120 days will be sufficient for affected LPRs to learn of the new requirement and to complete the required Form I–90. USCIS plans to conduct an extensive outreach program to alert the affected group of LPRs of the need to apply for new cards. This outreach program would include issuing press releases, posting program announcements and question-and-answer (Q&A) documents to the USCIS website, distributing fliers and pamphlets at USCIS field offices, and conducting informational meetings with community-based organizations (CBOs). USCIS also will encourage applicants to file the Form I–90 electronically, rather than on paper. In general, USCIS can process I–90 applications submitted electronically faster than those applications filed on paper. The application form itself is not complicated and takes an estimated average time of 55 minutes to complete. USCIS seeks public comment on the application period.

After the 120-day application period expires, LPRs who failed to timely file Forms I–90 to replace their Forms I–551 would still be required to apply for a replacement card. An alien who fails to file a Form I–90 during this application period will still hold the status of an alien who has been lawfully admitted for permanent residence, since this status continues until it is terminated by entry of a removal order against the alien. 8 CFR 1.1(p). The alien will not, however, be in compliance with the requirement under section 264(e) of the Act, 8 U.S.C. 1304(e), that the alien must have in his or her possession at all times the evidence of his or her having registered. To obtain new evidence of registration, the alien will need to file a Form I–90. For any alien who does not file before the application period expires, however, USCIS would not be able to ensure that the alien will receive a new Form I–551 before the old Form I–551 is deemed to have expired. Strictly speaking, an alien who is at least 18 years old, who fails to file a timely Form I–90, and whose current Form I–551, therefore, expires, could be prosecuted for violating section 264(e).

[3] If an applicant is able to demonstrate that he or she is unable to pay the standard Form I–90 fee and/or the biometric service fee associated with the filing of a Form I–90, he or she may request a fee waiver pursuant to 8 CFR 103.7(c). However, at present, USCIS does not waive the biometric service fee associated with the filing of a Form I–90. 69 FR 20528, 20529 (Apr. 15, 2004).

If convicted, the person could be sentenced to pay a fine of up to $100, to imprisonment for up to 30 days, or both. It is also a misdemeanor under section 266(a) of the Act, 8 U.S.C. 1306(a), for an alien to fail to register as required. The alien can be prosecuted for failure to register, however, only if the failure to register is proven to be willful. USCIS does not anticipate that either of these criminal sanctions would be routinely used against aliens who fail to obtain new Forms I–551. The far more common action, should USCIS discover that an alien's Form I–551 has expired, will be to advise the alien to file a Form I–551 to obtain a new Form I–551. If the alien still fails to apply for a new Form I–551, it may become feasible to prove that the failure to do so is willful. USCIS anticipates, however, that aliens will, generally, comply with the requirement to obtain a new Form I–551, once they become aware of the requirement.

Once implemented as a final rule, LPRs affected by the requirements proposed under this rule may choose to apply for naturalization during the 120-day application period instead of a new Form I–551. However, USCIS would not be able to guarantee the completion of its adjudication of such naturalization applications before it terminates the validity of Forms I–551 without expiration dates. For those LPRs who have applied for, but do not receive, a grant of naturalization by the time USCIS sets the termination date, USCIS may issue interim evidence of registration.

2. Termination of the Validity of Forms I–551 Without an Expiration Date

Forms I–551 without an expiration date will remain valid throughout the 120-day application period that will be set by the final rule for replacing such Forms I–551. After the 120-day application period, USCIS will assess the number of applications received and the timeframes for application processing and card production. Once USCIS has processed the applications and issued replacement Forms I–551, USCIS will be in a position to set a date for terminating the validity of Forms I–551 without expiration dates. This rule proposes amendments to 8 CFR 264.5(c)(1) to provide that USCIS will announce the termination date after the 120-day application period through a Notice published in the **Federal Register**.

USCIS is proceeding in this way to minimize the possibility that applicants will not have received a replacement Form I–551 in hand when the validity of their previous Form I–551 is terminated. USCIS cannot precisely estimate the number of applications it will receive to allow USCIS to plan exact timelines for card production and, in turn, a termination date. USCIS will only be able to set timelines based upon the actual volume of applications received. Issuing a separate Notice published in the **Federal Register** to advise the public of the termination of the validity of Forms I–551 without expiration dates would allow USCIS to implement a termination date that accommodates USCIS's processing needs and applicants' need for valid documentation.

In addition to establishing the mechanism for terminating Forms I–551 without expiration dates, this rule also clarifies that ''Form I–551,'' when used elsewhere in the regulations, means a valid, unexpired Form I–551. To do so, this proposed rule would amend the list of terms defined in 8 CFR 1.1 by adding a limiting definition of Form I–551. Current regulations do not define Form I–551; instead, the regulations identify its uses. As stated earlier in this Supplementary Information, the regulations identify Form I–551 as an entry document in 8 CFR 211.1(a)(2), evidence of registration in 8 CFR 264.1(b), an immigration status document in 8 CFR 274a.12(a)(1), and a combination identity and employment authorization document in 8 CFR 274a.2(b)(1)(v)(A)(2). These references to Form I–551 apply to both the version of the card with an expiration date and the version of the card without an expiration date. This rule proposes introducing a limiting definition of Form I–551 rather than amend each reference so that it is clear to the public what constitutes a valid Form I–551 with respect to any of its uses, particularly following the termination date of the validity of Forms I–551 without an expiration date. This rule proposes to limit the term, ''Form I–551'' to mean the version of the form with an expiration date. See proposed 8 CFR 1.1(AA). A Form I–551 that does not bear an expiration date would not be valid for any use under the regulations unless otherwise specifically provided in the regulations. *Id.*

Until the validity of Forms I–551 without an expiration is terminated via Notice published in the **Federal Register**, this rule, at 8 CFR 264.1(c)(1), proposes that such Forms I–551 would remain valid. To do otherwise would have the effect of prematurely terminating the validity of Forms I–551. The current regulations permit the use of expired Forms I–551 in other circumstances as well. For example, an expired Form I–551 may be used for entry to the United States and for presenting evidence of identity to an employer. 8 CFR 211.3 (entry); 8 CFR 274a.2(b)(1)(v)(B)(1)(v) (identity). Under this proposed rule, such Forms I–551 and those without expiration dates would remain valid in these instances.

It is important to note that the planned termination of Forms I–551 without expiration dates as proposed under this rule would not affect the immigration status and employment authorization of the holders of such cards; they remain LPRs and their employment is authorized incident to status. *See* INA 274A(h)(3)(A), 8 U.S.C. 1324a(h)(3)(A); 8 CFR 274a.12(a).

Under the requirements proposed in this rule, an LPR who fails to obtain a new Form I–551 by the I–551 termination date would not be in possession of a valid Form I–551. As a result, he or she may experience difficulties in meeting other requirements where valid documentation is necessary. For example, the LPR with an invalid Form I–551 may experience difficulty returning to the United States after a trip abroad or in obtaining new employment, and would not be in possession of valid registration documentation. *See* 8 CFR 211.1(a) (entry to the United States); 8 CFR 274a.2(b)(1)(v)(A) (employment); 8 CFR 264.1(b) (registration).

3. Changes to the Application Process for Replacing Forms I–551

This rule also proposes amending the regulations at 8 CFR 264.5(e) to update the application procedures for replacing Forms I–551. Current regulations at 8 CFR 264.5(e) cover the following application requirements: The documentation that must accompany Form I–90 upon filing, including the Permanent Resident Card being replaced, photographs, evidence of name change, and signature on the Data Collection Form (Form I–89); proper filing locations; fingerprint submissions; interviews; and waiver of the photograph, in-person filing, and signature requirements. Form I–90 processing procedures are also provided in the instructions to the Form I–90. Because the form instructions are more current, some of the information in the form instructions reflect changes to procedures that are not also reflected in 8 CFR 264.5(e). Whereas 8 CFR 264.5(e)(1) requires the submission of photographs and supporting documentary evidence with the application upon filing, current form instructions provide that this biometric information and evidence will be accepted by USCIS when the applicant

appears at an Application Support Center (ASC) (a USCIS facility that captures biometrics) following submission of the application. In addition, 8 CFR 264.5(e)(2)(i) provides that applicants must file Forms I–90 with the local office or Service Center having jurisdiction over their place of residence; instructions to the Form I–90 provide that the application must be submitted to the lockbox address specified in the instructions or filed electronically. Finally, while 8 CFR 264.5(e)(3)(i) only requires applicants who are replacing their Permanent Resident Cards because they have reached 14 years of age to submit to fingerprinting, the instructions to the Form I–90 require all applicants to appear at a USCIS ASC to submit to biometrics capture. Biometrics capture is a broader term than fingerprinting and covers fingerprints, photographs, and signatures. 69 FR 5088, 5090 (Feb. 3, 2004) (proposing a fee increase for biometric capture services, as well as other immigration and naturalization benefits and services).

To ensure that applicants receive clear and consistent filing information, this rule proposes to revise 8 CFR 264.5(e) in its entirety to remove outdated filing instructions, refer applicants to the instructions accompanying the form, and update biometrics capture requirements. Proposed 8 CFR 264.5(e) includes a paragraph on filing requirements, biometrics capture, and interviews. Rather than specify the filing requirements, this proposed rule refers applicants to the Form I–90 instructions. Proposed 8 CFR 264.5(e)(1). The Form I–90, including the filing instructions, is available on the USCIS Web site at *http://www.uscis.gov.* USCIS has determined that filing information is better placed in form instructions alone, which are reviewed and updated periodically and are more accessible to the public than regulatory provisions. By providing one source for stating the filing requirements, USCIS will avoid confusion and potential conflict between the requirements stated in the regulations and those stated in the form instructions.

This rule also proposes to amend USCIS regulations to reflect the biometrics capture requirements in the current Form I–90 instructions. Proposed 8 CFR 264.5(e)(2). Those instructions require all applicants to appear at an ASC for biometrics capture and pay a separate biometrics fee with the Form I–90 filing. By contrast, the current regulations require all applicants to provide a photograph and signature, but only require individuals replacing their Form I–551 on the basis that they have turned 14 years of age to be subject to fingerprinting. *See* 8 CFR 264.5(e)(3)(i). This rule proposes to amend the regulations to require all applicants to submit to all of the types of biometrics capture, including fingerprinting. USCIS is proposing to expand the fingerprinting requirement to all Form I–90 applicants to enable USCIS to obtain current biometrics information needed for Form I–551 card production, conduct appropriate background checks before cards are issued, and store this information for biometrics comparison and authentication purposes required by section 302(b)(2)(A) of the BSA, 8 U.S.C. 1732(b)(2)(A).

Note, in particular, that this proposed rule would change the current provision in current 8 CFR 264.5(e)(3)(iii) concerning the USCIS authority to waive the submission of biometric information. In light of the security concerns arising from the September 11, 2001, terrorist attack on the United States, it has been USCIS policy not to exercise this authority by actually waiving the photograph or other requirements. See Memorandum from William R. Yates for Regional Directors and Center Directors, Alterations to the ADIT photograph requirements (September 4, 2003) Memorandum from Johnny N. Williams for Regional Directors, Waiver of Photograph for I–90 Applicants Seeking Replacement or Renewal Form I–551 (February 14, 2003). The Memoranda are included in the public docket for this rule at *http://www.regulations.gov,* DHS Docket No. USCIS–2005–56. A Form I–551 without a photograph of the person to whom it relates does not serve the essential purpose of the Form I–551: To provide for a ready means of identifying the actual person who has been lawfully admitted for permanent residence. In the case of an alien who is physically unable to come to a USCIS facility due to advanced age or physical infirmity, the practice has not been actually to *waive* the photograph and other biometrics requirements. Instead, the practice has been to provide an alternative means for collecting this evidence. The most common practice is to permit the applicant to provide passport-style photographs, police clearance letters, and other appropriate evidence.

The rule, once final, would retain the provisions governing waivers of the biometrics capture requirement in current 8 CFR 264.5(e)(3)(iii) and interviews in current 8 CFR 264.5(e)(3)(ii), except that the provisions are renumbered to new 8 CFR 264.5(e)(2) and (e)(3). In addition, the rule simplifies the text of these provisions; no substantive changes are proposed.

This rule also proposes technical corrections to 8 CFR 299.1 and 299.5 by adding the updated edition date (03/31/05) and title of the Form I–90 to those sections. The Form I–90's proper title is ''Application to Replace Permanent Resident Card.'' The form was revised to reflect this title; however, the regulations listing immigration forms were never revised.

III. Regulatory Requirements

A. Regulatory Flexibility Act

The Regulatory Flexibility Act (RFA) (5 U.S.C. 605(b)), as amended by the Small Business Regulatory Enforcement and Fairness Act of 1996 (SBRFA), requires an agency to prepare and make available to the public a regulatory flexibility analysis that describes the effect of the rule on small entities (i.e., small businesses, small organizations, and small governmental jurisdictions). DHS has considered the impact of this rule on small entities and has determined that this rule will not have a significant economic impact on a substantial number of small entities. The individual lawful permanent residents to whom this rule applies are not small entities as that term is defined in 5 U.S.C. 601(6). There is no change expected in any process as a result of this rule that would have a direct effect, either positive or negative, on a small entity. Accordingly, this rule, once final, will not have a significant economic impact on a substantial number of small entities.

B. Unfunded Mandates Reform Act of 1995

This rule will not result in the expenditure by State, local and tribal governments in the aggregate of $100 million or more in any one year. However, as discussed below under Executive Order 12866, this action will result in the expenditure by the private sector of more than $100 million over the period of time that the program is in place. Only holders of Forms I–551, ''Permanent Resident Cards,'' without expiration dates will bear the costs of this rule.

C. Small Business Regulatory Enforcement Fairness Act of 1996

This rule is a major rule as defined by section 804 of the Small Business Regulatory Enforcement Fairness Act of 1996. This rule, once final, will result in an effect on the economy of

approximately $290 million in the first year after this rule is published, $24 million in the second year after this rule is published, and $13 million in the third year after this rule is published. This increase is directly associated with the expected increase in the number of Forms I–90 and amount of accompanying filing and biometrics fees that USCIS will receive to replace Forms I–551, '' Permanent Resident Cards,'' without expiration dates prior to termination of such cards.

D. Executive Order 12866

This rule has been identified as an economically significant rule under Executive Order 12866, section 3(f)(1), Regulatory Planning and Review. Accordingly, this rule has been submitted to the Office of Management and Budget for review. USCIS has assessed both the costs and benefits of this rule, as required by Executive Order 12866, and has made a reasoned determination that the benefits justify the costs.

USCIS estimates that 750,000 persons will apply for a replacement Form I–551, ''Permanent Resident Card,'' in accordance with this rule. The most likely estimated cost of this rule for these persons is $327 million over a three-year period of analysis (2007–2009). Over the three-year period of analysis, the present value cost of this proposed rule is approximately $267 million at 7%. A three-year period of analysis was chosen since those aliens who are required by this rulemaking to obtain a new Form I–551 will do so only in 2007, 2008, and 2009. The $327 million estimate consists of $278 million in fees associated with the Form I–90, $42 million in opportunity cost for an applicant's time, and $7 million in transportation costs for round trip transit to the nearest USCIS Application Support Center (ASC). The calendar year breakdown of these costs is $290 million for Calendar Year (CY) 2007 ($278 million in fees plus $12 million in applicant time and transportation costs), $24 million for CY 2008 (applicant time and transportation costs), and $13 million for CY 2009 (applicant time and transportation costs). The cost assessment, which includes a discussion of both the maximum and most likely estimated costs of this rule, follows.

In an effort to improve the security of the documents that USCIS issues for use by the public, this rule calls for a 120-day period, beginning 30 days from the date of publication of the final rule in the **Federal Register**, within which time LPRs holding Forms I–551 without expiration dates must apply to replace their card. To apply, they must file Form I–90 with a fee of $290 and an additional biometrics capture fee of $80. The total current cost is $370.

Those who apply for a replacement Form I–551 under this rule must submit biometrics that will be used for background checks and stored for future use. Based on technology and processes being developed by DHS, stored biometrics will be available for access by DHS for other immigration and law enforcement uses (a security benefit to the public at large), and these applicants might not need to return to an ASC for purposes of triggering certain background checks such as FBI fingerprints, should they decide to naturalize or apply for a replacement Form I–551 in the future.

The primary benefit to the government resulting from this rule is enhanced national security. Once the program is complete, all LPRs will have Forms I–551 with late-model technology. The biometrics of the rightful holder will be electronically stored in a secure DHS database that is easily retrievable and that can be used for data matching purposes among the DHS components. The card itself will bear a current photograph, facilitating its use by employers and the travel industry.

USCIS considered a number of alternatives to this proposed rulemaking. One alternative was for USCIS to maintain the current regulations. However, such an action would result in the agency's failure to fully meet the goals of section 303(b) of the BSA, 8 U.S.C. 1732(b). Another alternative was to expire pre-1989 cards, but lower the fees for replacing the cards. However, under this alternative, the agency would fail to meet its general obligation to ensure that the fees for such services are established at rates that allow the agency to recoup its costs, and would unfairly transfer the costs of this program to all other applicants for benefits and services from USCIS. See OMB Circular A–25 (available at *http://www.whitehouse.gov/omb/circulars/a025/a025.html*).

USCIS data indicates that the number of Forms I–551 without an expiration date issued, minus the number of persons known to have held these cards before naturalizing, is 1.9 million. Consequently, the maximum number of aliens impacted by this rule is 1.9 million.[4] The direct cost to each applicant for replacement of a card under this program is $370 in fees ($290 for the application plus $80 for the biometrics capture fee). These costs fall exclusively upon individuals who possess cards issued before August of 1989 and which do not have an expiration date. Because these persons would not otherwise have to acquire new cards, and would not otherwise have all their biometrics captured, we believe these fees would be generated only by this new rule. Based upon these figures, this rule will cost applicants a maximum of $703 million in fees ($370 × 1.9 million).

Furthermore, each member of this group would be required to spend two hours and 55 minutes complying with this rule. USCIS estimates that each applicant will spend ten minutes reading the application Form I–90 instructions. Each applicant also will take ten minutes to complete the form and thirty-five minutes to assemble and submit the form, for a total of 55 minutes of each applicant's time.

Applicants will also be required to travel to the nearest USCIS Application Support Center (ASC). While travel times and distances will vary, USCIS estimates the average round-trip to an ASC will be 20 miles, and that the average time for that trip will be an hour. It will take an average of one hour for an applicant to wait for service, and to have his or her biometrics collected.

Total time for each applicant to comply with this requirement is two hours and fifty-five minutes. The Bureau of Labor Statistics reports in its 2006 national compensation survey that the average, U.S.-employed person earned $19.29 an hour (BLS Web site). In addition, the average wage of this large group should mimic the national average. Consequently, USCIS believes that $19.29 an hour is a reasonable proxy to use to value the opportunity cost of time for the applicants subject to this rule. The total cost for applicant time spent is calculated as $107 million (1.9 million persons × 2.916 hours × $19.29).

Additionally, there is the cost of travel. USCIS anticipates most applicants will drive privately-owned vehicles to the ASCs. GSA's published decision of February 1, 2007, on this subject calculates the cost of operating a privately-owned vehicle as 48.5 cents a mile. (GSA Web site, reporting on findings for February 1, 2007). Therefore, USCIS calculates the transportation costs as $19 million (1.9 million persons × 48.5 cents per mile × 20 miles).

Thus, if all holders of cards issued without expiration dates filed a replacement application, the total

[4] As stated above, and as explained below, USCIS only anticipates that 750,000 persons will apply for a replacement card. This discussion uses the figure 1.9 million instead to reflect the maximum number of persons that may be impacted by this rule.

maximum cost of the program would consist of $703 million in fees, $107 million in time, and $19 million in transportation costs. The total maximum cost of compliance to this rule by 1.9 million persons is $829 million ($703 million + $107 million + $19 million).

Notwithstanding, experience from the replacement program for an earlier, now-invalid version of the Permanent Resident Card (Form I–151) has shown that a portion of these applicants will apply for naturalization rather than replace their Permanent Resident Cards and thus significantly reduce the overall cost of this rule. Other holders of affected cards may be deceased, may have relinquished their United States residence, or may have previously replaced their cards for other reasons, such as the replacement of a lost or mutilated card. In addition, some potential applicants may choose not to spend time and money to replace their cards, because they do not habitually travel outside the United States. Some potential applicants, in spite of USCIS's public relations efforts, may not learn of the requirement that such cards be changed. Also, some cards may be in possession of persons who obtained them fraudulently or who have committed serious criminal offenses since obtaining their cards. USCIS theorizes that these persons may choose not to take the perceived risk of contacting DHS and of calling into question their right to be in the United States.

USCIS accordingly estimates the most likely outcome of this program is that 750,000 persons issued cards without expiration dates, but not yet recorded as naturalized, will apply for replacement cards under this rule. USCIS calculates the cost of the primary estimate as $327 million ($829 million × 0.395 or 750,000 of 1.9 million maximum applicants). Based on the formulas provided above, USCIS's $327 million estimate consists of $278 million in fees associated with the Form I–90, $42 million in opportunity costs for an applicant's time, and $7 million in transportation costs for round trip transit to the nearest USCIS Application Support Center.

Accounting Statement

As required by OMB Circular A–4 (available at *http://www.whitehouse.gov/omb/circulars/a004/a-4.html*), in Table 1, USCIS has prepared an accounting statement showing the classification of the expenditures associated with this economically significant rule. The table provides USCIS's primary or most likely estimate of the dollar amount of these costs expressed on an annualized basis and also includes USCIS's maximum annualized estimate at both the three percent and seven percent discount rates. The period of analysis is three years (2007, 2008, and 2009). Based on USCIS's primary or most likely estimate, the undiscounted total cost of this rule will be approximately $327 million. USCIS anticipates that the duration of the I–551 replacement card program implemented by the final rule will be three (3) years. Consequently, when the undiscounted total cost is broken down into calendar years, this rulemaking is expected to cost $290 million in 2007, $24 million in 2008, and $13 million in 2009. Below is the expected annualized cost of this rulemaking, at both 3% and 7%, over the three year period of analysis. Enhanced security and the capabilities accompanying the storage of full fingerprint sets for subsequent retrieval constitute non-quantified benefits.

E. Executive Order 13132

This proposed rule will not have substantial direct effects on the States, on the relationship between the National Government and the States, or on the distribution of power and responsibilities among the various levels of government. Therefore, in accordance with section 6 of Executive Order 13132, it is determined that this rule does not have sufficient federalism implications to warrant the preparation of a federalism summary impact statement.

F. Executive Order 12988 Civil Justice Reform

This proposed rule meets the applicable standards set forth in sections 3(a) and 3(b)(2) of Executive Order 12988.

G. Paperwork Reduction Act

Under the Paperwork Reduction Act of 1995, Public Law 104–13, all departments are required to submit to the Office of Management and Budget (OMB), for review and approval, any reporting requirements inherent in a rule. This rule includes an approved information collection. The OMB control number for this collection is 1615–0082 and is contained in 8 CFR 299.5. However, this rule will increase the number of respondents and the burden hours, and public costs. Accordingly, when this rule is finalized, USCIS will submit to OMB for approval an 83–C Change Worksheet that reflects any change in Form I–90 filings and any related changes to the public costs associated with this collection.

List of Subjects

8 CFR Part 1

Administrative practice and procedure, Immigration.

8 CFR Part 264

Reporting and recordkeeping requirements.

8 CFR Part 299

Immigration, Reporting and recordkeeping requirements.

PART 1—DEFINITIONS

1. The authority citation for part 1 continues to read as follows:

Authority: 8 U.S.C. 1101; 8 U.S.C. 1103; 5 U.S.C. 301; Public Law 107–296, 116 Stat. 2135 (6 U.S.C. 1 *et seq.*).

2. Section 1.1(aa) is added to read as follows:

§ 1.1 Definitions.

* * * * *

(aa) The term *Form I–551* means a Permanent Resident Card, or an Alien Registration Receipt Card, issued on a Form I–551 with an expiration date. Unless otherwise specifically provided in this chapter I, a Form I–551 is not valid for any use under this chapter I unless it bears an expiration date and is unexpired.

PART 264—REGISTRATION AND FINGERPRINTING OF ALIENS IN THE UNITED STATES

3. The authority citation for part 264 continues to read as follows:

Authority: 8 U.S.C. 1103, 1201, 1303–1305; 8 CFR part 2.

4. Section 264.5 is amended by:

a. Revising paragraph (c)(1); and by

b. Revising paragraph (e).

The revisions read as follows:

§ 264.5 Application for a replacement Permanent Resident Card.

* * * * *

(c) * * *

(1) A permanent resident must apply on Form I–90 to replace a prior edition of the Alien Registration Receipt Card issued on Form AR–3, AR–103, or I–151. A permanent resident must apply between October 22, 2007 and February 19, 2008 on Form I–90 to replace a prior edition of Form I–551 without an expiration date. A permanent resident who fails to apply during this 120-day application period still must apply to replace a Form I–551 without an expiration date but might not be issued a replacement Form I–551 before the termination of the validity of all Forms I–551 without an expiration date. USCIS will announce the termination date of the validity of Forms I–551 without an expiration date in a Notice published in the **Federal Register**. Forms I–551 without an expiration date will remain valid until such termination date.

* * * * *

(e) *Application process*—(1) *Filing requirements.* Form I–90 must be filed in accordance with the instructions on the form.

(2) *Biometrics capture.* If the application is properly filed, the applicant will receive a notice to appear in person at a USCIS facility for biometrics capture. In the case of an applicant who is physically incapable, because of the applicant's confinement due to advanced age or physical infirmity, of appearing at a USCIS facility for biometrics capture, USCIS may excuse the applicant's personal appearance at a USCIS facility and provide an appropriate alternative means for obtaining the applicant's photograph or other biometrics information.

(3) *Interview.* An applicant may be required to appear in person before an immigration or consular officer and be interviewed under oath in connection with this application.

* * * * *

PART 299—IMMIGRATION FORMS

5. The authority citation for part 299 continues to read as follows:

Authority: 8 U.S.C. 1101 and note, 1103; 8 CFR part 2.

6. Section 299.1 is amended in the table by revising the entry for Form ''I–90'', to read as follows:

§ 299.1 Prescribed forms.

* * * * *

Form No.	Edition date	Title and description
* * * * * * *		
I–90	03/31/05	Application to Replace Permanent Resident Card
* * * * * * *		

§ 299.5 Display of control numbers.

7. Section 299.5 is amended in the table by revising the entry for Form ''I–90'', to read as follows:

* * * * *

Form No.	Form title	Currently assigned OMB control No.
* * * * * * *		
I–90	Application to Replace Permanent Resident Card	1615–0082

BILLING CODE 4410–10–P

DEPARTMENT OF TRANSPORTATION

Federal Aviation Administration

14 CFR Part 71

[Docket No. FAA–200–28869; Airspace Docket No. 07–ACE–11]

Proposed Establishment of Class E5 Airspace; Tarkio, MO

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Notice of proposed rulemaking.

SUMMARY: This action proposes to establish Class E airspace at Gould Peterson Municipal Airport, Tarkio, MO. The development of an Area Navigation (RNAV) Standard Instrument Approach Procedure (SIAP) to serve flights operating into the Gould Peterson Municipal Airport during Instrumental Flight Rules (IFR) conditions makes this action necessary. Controlled airspace extending upward from 700 feet Above Ground Level (AGL) is needed to contain aircraft executing an approach. The area would be depicted on aeronautical charts for pilot reference.

DATES: Comments must be received on or before October 1, 2007.

ADDRESSES: Send comments on this proposal to the Docket Management System, U.S. Department of Transportation, Docket Operations, M–30, West Building Ground Floor, Room W12–140, 1200 New Jersey Avenue, SE., Washington, DC 20590. You must identify the docket number FAA–2007–28869/Airspace Docket No. 07–ACE–11, at the beginning of your comments. You may also submit comments on the Internet at *http://dms.dot.gov.* You may review the public docket containing the proposal, any comments received, and any final disposition in person in the Dockets Office between 9 a.m. and 5 p.m., Monday through Friday, except Federal holidays. The Docket Office (telephone 1–800–647–5527) is on the ground floor of the building at the above address.

FOR FURTHER INFORMATION CONTACT: Grant Nichols, System Support, DOT Regional Headquarters Building, Federal Aviation Administration, 901 Locust, Kansas City, MO 64106; telephone: (816) 329–2522.

SUPPLEMENTARY INFORMATION:

Comments Invited

Interested parties are invited to participate in this proposed rulemaking by submitting such written data, views, or arguments, as they may desire. Comments that provide the factual basis supporting the views and suggestions presented are particularly helpful in developing reasoned regulatory decisions on the proposal. Comments are specifically invited on the overall regulatory, aeronautical, economic, environmental, and energy-related aspects of the proposal. Communications should identify both docket numbers and be submitted in triplicate to the address listed above. Commenters wishing the FAA to acknowledge receipt of their comments on this notice must submit with those comments a self-addressed, stamped postcard on which the following statement is made: ''Comments to Docket No. FAA–2007–28869/Airspace Docket No. 07–ACE–11.'' The postcard will be date/time stamped and returned to the commenter.

Availability of NPRMs

An electronic copy of this document may be downloaded through the Internet at *http://dms.dot.gov.* Recently published rulemaking documents can also be accessed through the FAA's Web page at *http://www.faa.gov* or the Superintendent of Documents' Web page at *http://www.access.gpo.gov/nara.*

Additionally, any person may obtain a copy of this notice by submitting a request to the Federal Aviation Administration (FAA), Office of Air Traffic Airspace Management, ATA–400, 800 Independence Avenue, SW., Washington, DC 20591, or by calling (202) 267–8793. Communications must identify both docket numbers for this notice. Persons interested in being placed on a mailing list for future NPRMs should contact the FAA's Office of Rulemaking (202) 267–9677, to request a copy of Advisory Circular No. 11–2A, Notice of Proposed Rulemaking Distribution System, which describes the application procedure.

The Proposal

The FAA is proposing to amend Title 14 Code of Federal Regulations (14 CFR) part 71 by establishing Class E airspace at Tarkio, MO. Controlled airspace is necessary to accommodate aircraft using the new RNAV(GPS) IAP at Gould Peterson Municipal Airport. This action would enhance the safety and management of aircraft operations at Gould Peterson Municipal Airport, Tarkio, MO.

Class E airspace areas extending upward from 700 feet or more above the surface of the earth are published in Paragraph 6005 of FAA Order 7400.9P, dated September 1, 2006, and effective September 16, 2006, which is incorporated by reference in 14 CFR 71.1. The Class E airspace designations listed in this document would be published subsequently in the Order.

The FAA has determined that this proposed regulation only involves an established body of technical regulations for which frequent and routine amendments are necessary to keep them operationally current. It, therefore, (1) is not a ''significant regulatory action'' under Executive Order 12866; (2) is not a ''significant rule'' under DOT Regulatory Policies and Procedures (44 FR 11034; February 26, 1979); and (3) does not warrant preparation of a Regulatory Evaluation as the anticipated impact is so minimal. Since this is a routine matter that will only affect air traffic procedures and air navigation, it is certified that this rule, when promulgated, will not have a significant economic impact on a substantial number of small entities under the criteria of the Regulatory Flexibility Act.

List of Subjects in 14 CFR Part 71

Airspace, Incorporation by reference, Navigation (Air).

The Proposed Amendment

In consideration of the foregoing, the Federal Aviation Administration proposes to amend 14 CFR part 71 as follows:

PART 71—DESIGNATION OF CLASS A, CLASS B, CLASS C, CLASS D, AND CLASS E AIRSPACE AREAS; AIRWAYS; ROUTES; AND REPORTING POINTS

1. The authority citation for part 71 continues to read as follows:

Authority: 49 U.S.C. 106(g); 40103, 40113, 40120; E.O. 10854, 24 FR 9565, 3 CFR, 1959–1963 Comp., p. 389.

§ 71.1 [Amended]

2. The incorporation by reference in 14 CFR 71.1 of Federal Aviation Administration Order 7400.9P, Airspace Designations and Reporting Points, dated September 1, 2006, and effective September 15, 2006, is amended as follows:

Paragraph 6005 Class E airspace areas extending upward from 700 feet or more above the surface of the earth.

* * * * *

ACE E5 Tarkio, MO [New]

Gould Peterson Municipal Airport, Tarkio, MO
(Lat. 40°26′45″ N., long. 95°21′46″ W.)

That airspace extending upward from 700 feet above the surface within a 7.6-mile radius of Gould Peterson Municipal Airport, Tarkio, MO.

* * * * *

Issued in Fort Worth, Texas, on August 7, 2007.

BILLING CODE 4910–13–M

DELAWARE RIVER BASIN COMMISSION

18 CFR Part 410

Proposed Temporary Amendments to the Water Quality Regulations, Water Code and Comprehensive Plan To Extend the Designation of the Lower Delaware River as a Special Protection Water

AGENCY: Delaware River Basin Commission.

ACTION: Proposed rule; notice of public hearing.

SUMMARY: The Delaware River Basin Commission (''Commission'' or DRBC) will hold a public hearing to receive comments on a proposed amendment to the Commission's *Water Quality Regulations, Water Code,* and *Comprehensive Plan* to extend through May 15, 2008 the temporary classification of the Lower Delaware River as Significant Resource Waters (SRW). Permanent classification is anticipated following an additional notice and comment rulemaking that is expected to begin shortly. Extending the temporary classification will help to protect the exceptional scenic, recreational and water quality values of the Lower Delaware from degradation pending completion of that process.

DATES: The public hearing will take place on Wednesday, September 26, 2007 during the Commission's regular business meeting, beginning at 1:30 p.m. Written comments will be accepted through the close of the public hearing; however earlier submittals would be appreciated. Persons wishing to testify are asked to register in advance with the Commission Secretary, at (609) 883–9500 ext. 203.

ADDRESSES: The public hearing will take place at the Commission's office building, located at 25 State Police Drive, West Trenton, New Jersey. Directions are available on the Commission's Web site, *http://www.drbc.net.* Please do not rely upon MapQuest or other Internet mapping services for driving directions, as they may not provide accurate directions to the DRBC. Written comments may be submitted by e-mail to *paula.schmitt@drbc.state.nj.us;* by U.S. Mail to Commission Secretary, DRBC, P.O. Box 7360, West Trenton, NJ 08628–0360; or by fax to 609–883–9522. In all cases, the commenter's name, affiliation if any, and address should be provided in the comment document, and ''Lower Delaware SPW Extension'' should appear in the subject line.

FOR FURTHER INFORMATION CONTACT: For further information, please contact Pamela M. Bush, Commission Secretary and Assistant General Counsel, Delaware River Basin Commission, at 609–883, 9500 ext. 203.

SUPPLEMENTARY INFORMATION: The Lower Delaware extends from the southern boundary of the Delaware Water Gap National Recreation Area at River Mile (''RM'') 209.4 to the head of tide at Trenton, New Jersey, RM 144.4. The effect of temporary classification of the Lower Delaware as SRW has been to make this portion of the main stem Delaware River and its drainage area subject to all applicable provisions of the Commission's Special Protection Waters regulations, Section 3.10.3 A.2 of the Commission's *Water Code* and *Water Quality Regulations,* incorporated by reference at 18 CFR Part 410, except those that depend for implementation upon the use of numeric values for existing water quality.

Key provisions of the Special Protection Waters Regulations that will continue to apply within the drainage area to the Lower Delaware River if the proposed extension of the SRW classification is approved include but are not limited to the following: Subsections 3.10.3 A.2.c.1 through 3, in part requiring that no new or expanded wastewater discharges may be permitted in waters classified as Special Protection Waters until all non-discharge-load reduction alternatives have been fully evaluated and rejected because of technical or financial infeasibility; subsections 3.10.3 A.2.d.1. through 7., setting forth requirements for wastewater treatment facilities; and subsections 3.10.3 A.2.e.1. and 2., conditioning project approval on the existence of an approved Non-Point Source Pollution Control Plan for the project area and requiring that approval of a new or expanded withdrawal and/or wastewater discharge project be subject to the condition that new connections to the project system be limited to service areas regulated by a non-point source pollution control plan approved by the Commission.

Temporary SRW classification of the Lower Delaware was enacted by Commission Resolution No. 2005–2 on January 19, 2005 and initially was due to expire on September 30, 2005. By Resolution No. 2005–15 approved on September 26, 2005, the temporary classification was extended through September 30, 2006 in order to allow time for the Commission to evaluate implementation options and establish numeric values for existing water quality. By Resolution No. 2006–22 on September 27, 2006, the Commission extended temporary designation a second time, through September 30, 2007, because it had not completely resolved implementation issues. The Commission has nearly resolved all remaining issues with respect to implementation, but in order to allow time to complete this process and conduct notice and comment rulemaking on permanent designation of the Lower Delaware as Special Protection Waters, the Commission is proposing to extend the temporary classification for approximately eight months more. If approved, the classification would thus expire on May 15, 2008 unless the Commission should either permanently classify the Lower Delaware River or once again extend the temporary classification by rule amendment prior to that date.

Previous **Federal Register** notices concerning designation of the Lower Delaware River as Special Protection Waters include notices published on

September 23, 2004 (69 FR 57008) (proposed Special Protection Waters designation), August 22, 2005 (70 FR 48923) (proposed extension through September 30, 2006), and August 21, 2006 (71 FR 48497) (proposed extension through September 30, 2007). The proposed and final versions of the initial designation, approved by Resolution No. 2005–2, and the subsequent extensions approved by Resolutions Nos. 2005–15 (extension through September 30, 2006) and 2006–22 (extension through September 30, 2007) were also published on the Commission's Web site, *http://www.drbc.net.*

Resolution No. 2005–2, temporarily amending the *Water Quality Regulations, Water Code,* and *Comprehensive Plan* of the Commission by designating the Lower Delaware River a Special Protection Water, and Resolutions Nos. 2005–15 and 2006–22, extending the temporary amendment approved by Resolution No. 2005–2, are available on the Commission's Web site at *http://www.drbc.net* or upon request from the Delaware River Basin Commission, P.O. Box 7360, West Trenton, NJ 08628–0360. Maps depicting the designated area are also available on the Web site.

Dated: August 16, 2007.

Pamela M. Bush,

Commission Secretary.

BILLING CODE 6360–01–P

DEPARTMENT OF THE TREASURY

26 CFR Part 1

[REG–143397–05]

RIN 1545–BE99

Partner's Distributive Share

AGENCY: Internal Revenue Service (IRS), Treasury.

ACTION: Notice of proposed regulations and notice of public hearing.

SUMMARY: This document contains regulations that provide rules concerning the application of sections 704(c)(1)(B) and 737 to distributions of property after two partnerships engage in an assets-over merger. The proposed regulations affect partnerships and their partners. This document also provides a notice of public hearing on these proposed regulations.

DATES: Written or electronic comments must be received by November 20, 2007. Outlines of the topic to be discussed at the public hearing scheduled for December 5, 2007 at 10 a.m. must be received by November 21, 2007.

ADDRESSES: Send submissions to: CC:PA:LPD:PR (REG–143397–05), room 5203, Internal Revenue Service, PO Box 7604, Ben Franklin Station, Washington, DC 20044. Submissions may be hand delivered Monday through Friday, between the hours of 8 a.m. and 4 p.m. to CC:PA:LPD:PR (REG–143397–05), Courier's Desk, Internal Revenue Service, 1111 Constitution Avenue, NW., Washington, DC or sent electronically via the Federal eRulemaking Portal at *http://www.regulations.gov* (IRS REG–143397–05). The public hearing will be held in the Auditorium, Internal Revenue Building, 1111 Constitution Avenue, NW., Washington, DC.

FOR FURTHER INFORMATION CONTACT: Concerning the proposed regulations, Jason Smyczek or Laura Fields (202) 622–3050, concerning submissions of comments, the hearing, and/or to be placed on the building access list to attend the hearing, Richard Hurst, *Richard.A.Hurst@irscounsel.treas.gov*, (202) 622–7180 (not toll-free numbers).

SUPPLEMENTARY INFORMATION:

Background

Section 704(c)(1)(B) provides that a partner that contributes section 704(c) property to a partnership must recognize gain or loss on the distribution of such property to another partner within seven years of its contribution to the partnership in an amount equal to the gain or loss that would have been allocated to such partner under section 704(c) if the distributed property had been sold by the partnership to the distributee partner for its fair market value at the time of the distribution.

Section 737(a) provides that a partner that contributes section 704(c) property to the partnership and then receives a distribution of property (other than money) within seven years of its contribution must recognize gain in an amount equal to the lesser of (1) The excess (if any) of (A) the fair market value of property (other than money) received in the distribution over (B) the adjusted basis of the partner's interest in the partnership immediately before the distribution reduced (but not below zero) by the amount of money received in the distribution, or (2) the net precontribution gain of the partner.

Section 737(b) provides that for purposes of section 737, the term ''net precontribution gain'' means the net gain (if any) which would have been recognized by the distributee partner under section 704(c)(1)(B) if all property which (1) Had been contributed to the partnership by the distributee partner within seven years of the distribution, and (2) is held by the partnership immediately before the distribution, had been distributed by the partnership to another partner.

Rev. Rul. 2004–43, 2004–1 CB 842, (*see* § 601.601(d)(2) of this chapter) issued on April 12, 2004, addressed the application of sections 704(c)(1)(B) and 737 in an assets-over partnership merger described in § 1.708–1(c)(3). Rev. Rul. 2004–43 held that section 704(c)(1)(B) applies to newly created section 704(c) gain or loss in property contributed by the transferor partnership to the transferee partnership in an assets-over partnership merger. The revenue ruling also held that for purposes of section 737(b), net precontribution gain includes newly created section 704(c) gain or loss in property contributed by the transferor partnership to the transferee partnership in an assets-over partnership merger. In addition, the revenue ruling held that section 704(c)(1)(B) will not apply to, and, for purposes of section 737, net precontribution gain will not include, reverse section 704(c) gain or loss resulting from a revaluation of property of the transferee partnership.

Some commentators argued that Rev. Rul. 2004–43 was not consistent with the existing regulations under sections 704(c)(1)(B) and 737, and that the conclusions contained in the ruling should not be applied retroactively. In response to these comments, the Treasury Department and the IRS issued Notice 2005–15, 2005–7 IRB 527, (*see* § 601.601(d)(2) of this chapter) indicating their intent to issue regulations under sections 704(c)(1)(B) and 737 implementing the principles of the ruling, and issued Rev. Rul. 2005–10, 2005–7 IRB 492 (*see* § 601.601(d)(2) of this chapter) officially revoking Rev. Rul. 2004–43. The Notice provided that any such regulations would be effective for distributions made after January 19, 2005.

Explanation of Provisions

A. Assets-Over Partnership Mergers

These proposed regulations implement the principles articulated in Rev. Rul. 2004–43. The proposed regulations under § 1.704–4(c)(4) and § 1.737–2(b) provide that in an assets-over merger, sections 704(c)(1)(B) and 737 do not apply to the transfer by a partnership (the transferor partnership) of all of its assets and liabilities to another partnership (the transferee partnership), followed by a distribution of the interests in the transferee

partnership in liquidation of the transferor partnership as part of the same plan or arrangement.

The proposed regulations, however, provide that section 704(c)(1)(B) applies to a subsequent distribution by the transferee partnership of section 704(c) property contributed in the assets-over merger by the transferor partnership to the transferee partnership. The proposed regulations also provide that section 737 applies when a partner of the transferor partnership receives a subsequent distribution of property (other than money) from the transferee partnership.

The proposed regulations provide that for property contributed to the transferor partnership (original contribution), the amount of original section 704(c) gain or loss is the difference between the property's fair market value and the contributing partner's adjusted basis at the time of contribution to the extent such difference has not been eliminated by section 704(c) allocations, prior revaluations, or in connection with the merger. In the case of property contributed with original section 704(c) loss, section 704(c)(1)(C) which was added by the American Jobs Creation Act of 2004 provides special rules for determining the basis of the property contributed. The Treasury Department and IRS are currently developing guidance that will implement the provisions of section 704(c)(1)(C). Thus, the proposed regulations do not address the impact of section 704(c)(1)(C) in applying these rules. However, when finalized, these regulations will clarify the application of section 704(c)(1)(C) to these rules.

The proposed regulations provide that the seven year period will not restart with respect to the original section 704(c) gain or loss as a result of the merger. Accordingly, a subsequent distribution by the transferee partnership of property with original section 704(c) gain or loss is subject to sections 704(c)(1)(B) and 737 if the distribution occurs within seven years of the contribution of the property to the transferor partnership (original contribution). However, with respect to new section 704(c) gain or loss, the regulations provide that the seven-year period in sections 704(c)(1)(B) and 737 begins on the date of merger. Thus, a subsequent distribution by the transferee partnership of property with new section 704(c) gain or loss is subject to sections 704(c)(1)(B) and 737 if the distribution occurs within seven years of the merger.

The regulations further provide that no original section 704(c) gain or loss will be recognized under section 704(c)(1)(B) or section 737 if property that was originally contributed to the transferor partnership is distributed to the original contributor. If property has new section 704(c) gain or loss, then a subsequent distribution of such property within seven years of the merger to one of the former partners of the transferor partnership (former partner) is subject to section 704(c)(1)(B) only to the extent of the other former partners' shares of such gain or loss.

New section 704(c) gain or loss shall be allocated among the partners of the transferor partnership in a manner consistent with the principles of §§ 1.704–3(a)(7) and newly designated 1.704–3(a)(10) (previously § 1.704–3(a)(9)). In addition, the partners of the transferor partnership are deemed to have contributed an undivided interest in the assets of the partnership. The proposed regulations provide that the determination of the partners' undivided interest for this purpose shall be made by the transferor partnership using any reasonable method. The Treasury Department and the IRS request comments on methods that should be considered reasonable for this purpose.

The proposed regulations also provide that if less than all of a section 704(c) property is distributed, then a proportionate amount of original and new section 704(c) gain or loss must be recognized under section 704(c)(1)(B). Similarly, if gain is required to be recognized under section 737, a proportionate amount of original and new section 704(c) gain must be recognized under section 737. Each partner must recognize its respective proportionate share of gain or loss required to be recognized.

The proposed regulations further provide a subsequent merger rule. This rule provides that if the transferee partnership is subsequently merged (a subsequent merger) the new section 704(c) gain or loss that resulted from the original merger shall be subject to section 704(c)(1)(B) for seven years from the time of the original merger and the new section 704(c) gain or loss that resulted from the subsequent merger will be subject to section 704(c)(1)(B) for seven years from the time of the subsequent merger.

In addition, the proposed regulations provide an identical ownership and a de minimis change in ownership exception to sections 704(c)(1)(B) and 737 with regard to assets-over partnership mergers. Under the identical ownership exception, section 704(c)(1)(B) will not apply to, and section 737 net precontribution gain will not include, new section 704(c) gain or loss in any property contributed in an assets-over partnership merger where the ownership of both partnerships is identical. In order for merging partnerships to qualify for the identical ownership exception, each partner must own identical interests in book capital and in each item of income, gain, loss, deductions and credit, and identical shares of distributions and liabilities in each of the transferor and transferee partnerships. Where ownership of both partnerships is identical, the merger more accurately represents a change in form, and should have no substantive tax consequences. The same principles apply where the change in ownership is de minimis. For purposes of the de minimis exception, a difference in ownership is de minimis if ninety seven percent of the interests in book capital, items of income, gain, loss, deduction and credit and share of distributions and liabilities of the transferor partnership and transferee partnership are owned by the same owners in the same proportions.

Proposed regulations under § 1.704–3(c)(4)(iii) provide that taxpayers may distinguish between the original and new portions of section 704(c) gain or loss. The proposed regulations provide that the transferee partnership may continue to use the section 704(c) allocation method adopted by the transferor partnership with respect to original section 704(c) property, or it may adopt another reasonable section 704(c) method. In addition, the transferee partnership may adopt any reasonable section 704(c) method with respect to new section 704(c) gain or loss. With respect to both the original and the new section 704(c) gain or loss, the transferee partnership must use a reasonable method that is consistent with the purpose of sections 704(b) and 704(c).

B. Miscellaneous Provisions

As part of this proposed regulation, the Treasury Department and the IRS are also making certain regulatory changes to reflect statutory changes that occurred as part of the Taxpayer Relief Act of 1997 (Public Law 105–34). Effective June 8, 1997, Congress lengthened the period of time from five years to seven for accounting for section 704(c) gain or loss with respect to distributions. Consistent with the statutory changes, various provisions in § 1.704–4 and § 1.737–1 have been amended.

Effective Dates

Except as otherwise provided, these proposed regulations will be effective

for any distributions of property after January 19, 2005, if such property was contributed in an assets-over merger after May 3, 2004. Provisions relating to the change in the regulations in § 1.704–4 and § 1.737–1 from the previous five-year rule to the seven-year rule will be effective August 22, 2007.

Special Analyses

It has been determined that this notice of proposed rulemaking is not a significant regulatory action as defined in Executive Order 12866. Therefore, a regulatory assessment is not required. It has also been determined that section 553(b) of the Administrative Procedure Act (5 U.S.C. chapter 5) does not apply to these regulations, and because the regulation does not impose a collection of information on small entities, the Regulatory Flexibility Act (5 U.S.C. chapter 6) does not apply. Pursuant to section 7805(f) of the Code, this notice of proposed rulemaking will be submitted to the Chief Counsel for Advocacy of the Small Business Administration for comment on its impact on small business.

Comments and Public Hearing

Before these proposed regulations are adopted as final regulations, consideration will be given to any written comments (a signed original and eight (8) copies) or electronic comments that are submitted timely to the IRS. The Treasury Department and IRS request comments on the clarity of the proposed rules and how they may be made easier to understand. All comments will be available for public inspection and copying.

A public hearing has been scheduled for December 5, 2007, 10 a.m. in the Auditorium, Internal Revenue Building, 1111 Constitution Avenue, NW., Washington, DC. Due to building security procedures, visitors must enter at the Constitution Avenue entrance. In addition, all visitors must present photo identification to enter the building. Because of access restrictions, visitors will not be admitted beyond the immediate entrance area more than 15 minutes before the hearing starts. For information about having your name placed on the building access list to attend the hearing, see the **FOR FURTHER INFORMATION CONTACT** section of this preamble.

The rules of 26 CFR 601.601(a)(3) apply to the hearing. Persons who wish to present oral comments at the hearing must submit written or electronic comments by November 20, 2007 and an outline of the topics to be discussed and time to be devoted to each topic (a signed original and eight (8) copies) by November 21, 2007. A period of 10 minutes will be allotted to each person for making comments. An agenda showing the scheduling of the speakers will be prepared after the deadline for receiving outlines has passed. Copies of the agenda will be available free of charge at the hearing.

Drafting Information

The principal authors of these proposed regulations are Jason Smyczek and Laura Fields, Office of the Associate Chief Counsel (Passthroughs and Special Industries), IRS. However, other personnel from the IRS and the Treasury Department participated in their development.

List of Subjects in 26 CFR Part 1

Income taxes, Reporting and recordkeeping requirements.

Proposed Amendments to the Regulations

Accordingly, 26 CFR part 1 is proposed to be amended as follows:

PART 1—INCOME TAXES

Paragraph 1. The authority citation for part 1 continues to read in part as follows:

Authority: 26 U.S.C. 7805 * * *

Section 1.704–3 also issued under 26 U.S.C. 704. * * *

Par. 2. Section 1.704–3 is amended as follows:

1. Paragraphs (a)(9) through (a)(12) are redesignated as paragraphs (a)(10) through (a)(13) respectively.

2. New paragraph (a)(9) is added.

3. Paragraph (f) is amended by revising the paragraph heading and adding one additional sentence at the end of the paragraph.

The revisions and additions read as follows:

§ 1.704–3 Contributed Property.

(a) * * *

(9) *Section 704(c) property transferred in an assets-over merger.* Assets transferred to a transferee partnership from the transferor partnership in an assets-over merger as defined in § 1.708–1(c)(3) (the transferor partnership being the partnership considered to have been terminated under § 1.708–1(c)(1) and the transferee partnership being the partnership considered to be the resulting partnership under § 1.708–(1)(c)(1)) may have both original section 704(c) gain or loss (see § 1.704–4(c)(4)(ii)(A) for the definition of original section 704(c) gain or loss) and new section 704(c) gain or loss. The transferee partnership may continue to use the section 704(c) allocation method adopted by the transferor partnership with respect to section 704(c) property originally contributed to the transferor partnership or it may adopt another reasonable section 704(c) method. Also, the transferee partnership may continue to use the section 704(c) allocation method adopted by the transferor partnership with respect to new section 704(c) gain or loss to account for differences between book value and adjusted tax basis as a result of a prior revaluation. In addition, the transferee partnership may adopt any reasonable section 704(c) method with respect to new section 704(c) gain or loss in excess of the amount of new section 704(c) gain or loss described in the prior sentence. With respect to both original and new section 704(c) gain or loss, the transferee partnership must use a reasonable method that is consistent with the purpose of sections 704(b) and 704(c).

* * * * *

(f) *Effective/applicability date.* * * * Paragraph (a)(9) is effective for any distribution of property after January 19, 2005, if such property was contributed in a merger using the assets-over form after May 3, 2004.

Par. 3. Section 1.704–4 is amended as follows:

1. Paragraph (a)(1) is amended by removing the phrase ''five years'' and adding in its place the phrase ''seven years.''

2. Paragraph (a)(4)(i) is amended by removing the phrase ''five-year'' and adding in its place ''seven-year.''

3. Paragraph (a)(4)(ii) is amended by removing the phrase ''five-year'' and adding in its place the phrase ''seven-year.''

4. Paragraphs (c)(4)(i) and (c)(4)(ii) are added.

5. Paragraph (c)(7) is redesignated as paragraph (c)(8).

6. A new paragraph (c)(7) is added.

7. Paragraphs (f)(2), Examples (1) and (2) are amended by removing the language ''five-year'' and replacing it with the language ''seven-year'' wherever it appears throughout both examples.

8. Paragraph (g) is amended by revising the paragraph heading and adding two sentences at the end of the paragraph.

The revisions and additions read as follows:

§ 1.704–4 Distribution of contributed property.

* * * * *

(c) * * *

(4) *Complete transfer to another partnership (Assets-Over Merger).*— (i) *In general.* Section 704(c)(1)(B) and this

section do not apply to the transfer in an assets-over merger as defined in § 1.708–1(c)(3) by a partnership (the transferor partnership, which is considered to be the terminated partnership as a result of the merger) of all of its assets and liabilities to another partnership (the transferee partnership, which is considered to be the resulting partnership after the merger), followed by a distribution of the interest in the transferee partnership in liquidation of the transferor partnership as part of the same plan or arrangement.

(ii) *Subsequent distributions.* Except as provided in paragraph (c)(4)(E) below, section 704(c)(1)(B) and this section apply to the subsequent distribution by the transferee partnership of section 704(c) property contributed by the transferor partnership to the transferee partnership in an assets-over merger, as provided in paragraphs (c)(4)(ii)(A) through (D) of this section.

(A) *Original section 704(c) gain or loss.* The seven-year period in section 704(c)(1)(B) does not restart with respect to original section 704(c) gain or loss as a result of the transfer of the section 704(c) property to the transferee partnership. For purposes of this paragraph (c)(4)(ii)(A), the amount of original section 704(c) gain or loss is the difference between the property's fair market value and the contributing partner's adjusted tax basis, at the time of contribution, to the extent such difference has not been eliminated by section 704(c) allocations, prior revaluations, or in connection with the merger. See §§ 1.704–4(a) and (b) for post-merger distributions of property contributed to the transferee partnership prior to the merger. A subsequent distribution by the transferee partnership of property with original section 704(c) gain or loss to a partner other than the partner that contributed such property to the transferor partnership is subject to section 704(c)(1)(B) if the distribution occurs within seven years of the contribution of the property to the transferor partnership. See § 1.704–4(c)(4)(ii)(B) for rules relating to the distribution of property with new section 704(c) gain or loss. See § 1.737–2(b)(1)(ii)(A) for a similar rule in the context of section 737.

(B) *New section 704(c) gain or loss.* A subsequent distribution of property with new section 704(c) gain or loss by the transferee partnership to a partner other than the contributing partner is subject to section 704(c)(1)(B) if the distribution occurs within seven years of the contribution of the property to the transferee partnership by the transferor partnership. For these purposes, a partner of the transferor partnership is deemed to have contributed to the transferee partnership an undivided interest in the property of the transferor partnership. The determination of the partners' undivided interest for this purpose shall be determined by the transferor partnership using any reasonable method. New section 704(c) gain or loss shall be allocated among the partners of the transferor partnership in a manner consistent with the principles of §§ 1.704–3(a)(7) and 1.704–3(a)(10). See § 1.737–2(d)(4) for a similar rule in the context of section 737.

(C) *Ordering Rule.*— (1) *Post-merger partial recognition.* For purposes of this section, if less than all of a section 704(c) property is distributed, then a proportionate amount of original and new section 704(c) gain or loss must be recognized.

(2) *Post-merger revaluation.* Revaluations after a merger that reflect a reduction in the amount of built-in gain or loss inherent in property will reduce new section 704(c) gain or loss prior to reducing original section 704(c) gain or loss.

(D) *Subsequent Mergers.* If the transferee partnership (first transferee partnership) is subsequently merged into another partnership (new transferee partnership) the new section 704(c) gain or loss that resulted from the merger of the transferor partnership into the first transferee partnership shall be subject to section 704(c)(1)(B) for seven years from the time of the contribution by the transferor partnership to the first transferee partnership (original merger) and new section 704(c) gain or loss that resulted from the merger of the first transferee into the new transferee (subsequent merger) shall be subject to section 704(c)(1)(B) for seven years from the time of the subsequent merger. See § 1.737–2(b)(1)(ii)(D) for a similar rule in the context of section 737.

(E) *Identical Ownership or De Minimis Change in Ownership Exception.* Section 704(c)(1)(B) and this section do not apply to new section 704(c) gain or loss in property transferred by the transferor partnership to the transferee partnership if both the transferor partnership and the transferee partnership are owned by the same owners in the same proportions or the difference in ownership is *de minimis*. The transferor partnership and the transferee partnership are owned by the same owners in the same proportions if each partner owns identical interests in book capital and in each item of income, gain, loss, deduction, and credit, and identical shares of distributions and liabilities in each of the transferor and transferee partnerships. A difference in ownership is *de minimis* if ninety seven percent of the interests in book capital and in each item of income, gain, loss, deduction and credit and shares of distributions, and liabilities of the transferor partnership and transferee partnership are owned by the same owners in the same proportions.

(F) *Examples.* The following examples illustrate the rules of paragraph (c)(4)(ii) of this section.

Example (1). New section 704(c) gain. (i) *Facts.* On January 1, 2005, A contributes Asset 1, with a basis of $200x and a fair market value of $300x, to partnership PRS1 in exchange for a 50 percent interest. On the same date, B contributes $300x of cash to PRS1 in exchange for a 50 percent interest. Also on January 1, 2005, C contributes Asset 2, with a basis of $100x and a fair market value of $200x, to partnership PRS2 in exchange for a 50 percent interest. D contributes $200x of cash to PRS2 in exchange for a 50 percent interest. On January 1, 2008, PRS1 and PRS2 undertake an assets-over partnership merger in which PRS1 is the continuing partnership and PRS2 is the terminating partnership for both state law and federal tax purposes. At the time of the merger, PRS1's only assets are Asset 1, with a fair market value of $900x, and $300x in cash. PRS2's only assets are Asset 2, with a fair market value of $600x, and $200x in cash. After the merger, the partners have book capital and profits interests in PRS1 as follows: A, 30 percent; B, 30 percent; C, 20 percent; and D, 20 percent. PRS1 and PRS2 both have provisions in their respective partnership agreements requiring the revaluation of partnership property upon entry of a new partner. PRS1 would not be treated as an investment company (within the meaning of section 351) if it were incorporated. Neither partnership holds any unrealized receivables or inventory for purposes of section 751. In addition, neither partnership has a section 754 election in place. Asset 1 and Asset 2 are nondepreciable capital assets. On January 1, 2013, PRS1 has the same assets that it had after the merger. Each asset has the same value that it had at the time of the merger. On this date, PRS1 distributes Asset 2 to A in liquidation of A's interest.

(ii) *Analysis.* On the date of the merger of PRS2 into PRS1, the fair market value of Asset 2 ($600x) exceeded its adjusted tax basis ($100x). Thus, pursuant to § 1.704–4(c)(4)(ii)(A), when Asset 2 was contributed to PRS1 in the merger, it was section 704(c) gain property. The total amount of the section 704(c) gain was $500x ($600x (fair market value) − $100x (adjusted basis)). The amount of original section 704(c) gain attributable to Asset 2 equals $100x, the difference between its fair market value ($200x) and adjusted tax basis ($100x) upon contribution to PRS2 by C. The amount of new section 704(c) gain attributable to Asset 2 equals $400x, the total amount of section 704(c) gain ($500x) less the amount of the original section 704(c) gain ($100x). The distribution of Asset 2 to A occurs more than seven years after the contribution by C of

Asset 2 to PRS2. Therefore, pursuant to § 1.704–4(c)(4)(ii)(A), section 704(c)(1)(B) does not apply to the $100x of original section 704(c) gain. The distribution of Asset 2 to A, however, occurs within seven years of the contribution in the merger of Asset 2 to PRS1 by PRS2. Pursuant to § 1.704–4(c)(4)(ii)(B), section 704(c)(1)(B) applies to the new section 704(c) gain. As the transferees of PRS2's partnership interest in PRS1, C and D succeed to one-half of the $400x of the new section 704(c) gain created by the merger. Thus, as a result of the distribution of Asset 2 to A within seven years of the merger, C and D are required to recognize $200x of gain each. See § 1.737–2(b)(1)(ii)(F), *Example (1)* for analysis of a similar example under section 737.

Example (2). Revaluation gain and merger gain. (i) *Facts.* The facts are the same as *Example (1),* except that during 2005, PRS2 admitted E as a new partner in PRS2 at a time when the fair market value of Asset 2 was $300x and PRS2's only other asset was cash of $200X. In exchange for a contribution of cash of $250x, E was admitted as a one-third partner in PRS2. In accordance with the terms of PRS2's partnership agreement, the partnership revalued its assets pursuant to § 1.704–1(b)(2)(iv)(f) upon admission of E so that the unrealized gain of $100X attributable to Asset 2 was allocated equally between C and D, or $50X each. On January 1, 2008, PRS2 merges into PRS1. At the time of the merger, PRS1's only assets are Asset 1, with a fair market value of $550x, and $300x in cash. PRS2's only assets are Asset 2, with a fair market value of $400x, and $450x in cash. After the merger, the partners have book capital and profits and loss interests in PRS1 as follows: A, 25%; B, 25%; C, 16.67%; D, 16.67% and E, 16.67%. On January 1, 2011, Asset 2 is distributed to A when its value is still $400x.

(ii) *Analysis.* On the date of the merger of PRS2 into PRS1, the fair market value of Asset 2 ($400x) exceeded its adjusted tax basis ($100x). Thus, when Asset 2 was contributed to PRS1 in the merger, it was section 704(c) gain property. The total amount of the section 704(c) gain was $300x ($400x (fair market value) − $100x (adjusted basis)). The amount of the original section 704(c) gain attributable to Asset 2 equals $100x, the difference between its fair market value of $200x and adjusted tax basis $100x upon contribution to PRS2 by C. The amount of the new section 704(c) gain attributable to Asset 2 equals $200x, the total section 704(c) gain ($300x) less the amount of the original section 704(c) gain ($100x). The distribution of Asset 2 to A occurs within seven years after the contribution by C to PRS2. Therefore, pursuant to § 1.704–4(c)(4)(ii)(A), section 704(c)(1)(B) applies to the original section 704(c) gain. The distribution of Asset 2 to A also occurs within seven years of the contribution of Asset 2 to PRS1 by PRS2. Pursuant to § 1.704–4(c)(4)(ii)(B), section 704(c)(1)(B) applies to the new section 704(c) gain. As the transferees of PRS2's partnership interest in PRS1, C and D each succeed to $50x of new section 704(c) gain as a result of the revaluation of Asset 2 upon admission of E as a partner. Moreover, C, D and E each succeed to $33.33x of new section 704(c) gain as a result of the merger. C also has $100 of original section 704(c) gain as a result of the original contribution of Asset 2 to PRS2. Thus, as a result of the distribution of Asset 2 to A within seven years of the merger, C, D and E are each required to recognize gain. C will recognize a total of $183.33x of gain ($100x of original section 704(c) gain and $83.33x of new section 704(c) gain). D will recognize a total of $83.33x of gain (all new section 704(c) gain) and E will recognize $33.33x of gain (all new section 704(c) gain). See § 1.737–2(b)(1)(ii)(F), *Example (2)* for a similar example under section 737.

Example (3). Revaluation loss and merger gain. (i) *Facts.* The facts are the same as *Example (1)* except that during 2005, PRS2 admitted E as a new partner in PRS2 at a time when the fair market value of Asset 2 was $150x and PRS2's only other asset was cash of $200x. In exchange for a contribution of cash of $175x, E was admitted as a one-third partner in PRS2. In accordance with the terms of PRS2's partnership agreement, the partnership revalued its assets upon admission of E so that the unrealized loss of $50x attributable to Asset 2 was allocated equally between C and D, or $25x each. On January 1, 2008, PRS2 merges into PRS1. At the time of the merger, PRS1's only assets are Asset 1, with a fair market value of $900x, and $300x in cash. PRS2's only assets are Asset 2, with a fair market value of $600x, and $375x in cash. After the merger, the partners have book capital and profits and loss interests in PRS1 as follows: A, 27.5%; B, 27.5%; C, 15%; D, 15% and E, 15%. On January 1, 2013, Asset 2 is distributed to A when its value is still $600.

(ii) *Analysis.* On the date of the merger of PRS2 into PRS1, the fair market value of Asset 2 ($600x) exceeded its adjusted tax basis ($100x). Thus, when Asset 2 was contributed to PRS1 in the merger, it was section 704(c) gain property. The total amount of the section 704(c) gain was $500x ($600x (fair market value) − 100x (adjusted basis)). The amount of the original section 704(c) gain attributable to Asset 2 equals $50x, the difference between its fair market value ($200x) and adjusted tax basis ($100x) upon contribution to PRS2 by C, less the unrealized loss ($50X) attributable to the revaluation of PRS2 on the admission of E as a partner in PRS2. The amount of the new section 704(c) gain attributable to Asset 2 equals $450x, the total section 704(c) gain ($500x) less the amount of the original section 704(c) gain ($50x). The distribution of Asset 2 to A occurs more than seven years after the contribution by C to PRS2. Therefore, pursuant to § 1.704–4(c)(4)(ii)(A), section 704(c)(1)(B) does not apply to the original section 704(c) gain. The distribution of Asset 2 to A, however, occurs within seven years of the contribution of Asset 2 to PRS1 and PRS2. Pursuant to § 1.704–4(c)(4)(ii)(B), section 704(c)(1)(B) applies to the new section 704(c) gain. As the transferees of PRS2's partnership interest in PRS1, C, D and E each succeed to $150 of new section 704(c) gain. Thus, as a result of the distribution of Asset 2 to A within seven years of the merger, C, D and E are each required to recognize $150 of gain.

Example (4). Reverse section 704(c) gain. (i) *Facts.* The facts are the same as *Example (1),* except that on January 1, 2013, PRS1 distributes Asset 1 to C in liquidation of C's interest in PRS1.

(ii) *Analysis.* The distribution of Asset 1 to C occurs more than seven years after the contribution of Asset 1 to PRS1. Thus, pursuant to § 1.704–4(c)(4)(ii)(A), section 704(c)(1)(B) does not apply to the original section 704(c) gain. Pursuant to § 1.704–4(c)(7), section 704(c)(1)(B) does not apply to reverse section 704(c) gain in Asset 1 resulting from a revaluation of PRS1's partnership property at the time of the merger. Accordingly, neither A nor B will recognize gain under section 704(c)(1)(B) as a result of the distribution of Asset 1 to C. See § 1.737–2(b)(1)(ii)(F), *Example (4)* for a similar example under section 737.

Example (5). Identical ownership exception. (i) *Facts.* In 1990, A, an individual, and B, a subchapter C corporation, formed PRS1, a partnership. A owned 75 percent of the interests in the book capital (as determined for purposes of § 1.704–1(b)(2)(iv)), profits, losses, distributions, and liabilities (under section 752) of PRS1. B owned the remaining 25 percent interest in the book capital, profits, losses, distributions, and liabilities of PRS1. In the same year, A and B also formed another partnership, PRS2, with A owning 75 percent of the interests in the book capital, profits, losses, distributions, and liabilities of PRS2 and B owning the remaining 25 percent of the book capital, profits, losses, distributions, and liabilities. Upon formation of the partnerships, A contributed the Asset X to PRS1 and Asset Y to PRS2 and B contributed cash. Both Assets X and Y had section 704(c) built-in gain at the time of contribution to the partnerships.

(ii) In January 2005, PRS1 is merged into PRS2 in an assets-over merger in which PRS1 is the terminating partnership and PRS2 as the continuing partnership for both state law and federal income tax purposes. At the time of the merger, both Asset X and Y had increased in value from the time they were contributed to PRS1 and PRS2, respectively. As a result, a new layer of section 704(c) gain was created with respect to Asset X in PRS1, and reverse section 704(c) gain was created with respect to Asset Y in PRS2. After the merger, A had a 75 percent interest in PRS2's capital, profits, losses, distributions, liabilities, and all other items. B held the remaining 25 percent interest in PRS2's capital, profits, losses, distributions, liabilities, and all other items. In 2006, PRS2 distributes all of Asset X to A.

(iii) *Analysis.* The 2006 distribution of Asset X occurs more than seven years after the formation of the partnerships and the original contribution of both Assets X and Y to the partnerships. Therefore, the original layer of built-in gain created on the original contribution of Asset X to PRS1 is not taken into account in applying section 704(c)(1)(B) to the proposed distribution. In addition, paragraph (c)(4)(ii)(E) of this section provides that section 704(c)(1)(B) and paragraph (c)(4)(ii)(B) of this section do not apply to new section 704(c) gain or loss in property transferred by the transferor partnership to the transferee partnership if both the transferor partnership and the transferee

partnership are owned by the same owners in the same proportions. The transferor partnership and the transferee partnership are owned by the same owners in the same proportions if each partner's percentage interest in the transferor partnership's book capital, profits, losses, distributions, and liabilities, is the same as the partner's percentage interest in those items of the transferee partnership. In this case, A owned 75 percent and B owned 25 percent of the interests in the book capital, and in each item of income, gain, loss and credit, and share of distributions and liabilities of PRS1 and PRS2 prior to the merger and 75 percent and 25 percent, respectively, of PRS2 after the merger. As a result, the requirements of the identical ownership exception of paragraph (c)(4)(ii)(E) of this section are satisfied. Thus, the new built-in gain created upon contribution of Asset X in connection with the partnership merger will not be taken into account in applying section 704(c)(1)(B) to the proposed distribution. See § 1.737–2(b)(1)(ii)(F), *Example (5)* for a similar example under section 737.

* * * * *

(7) *Reverse section 704(c) gain or loss.* Section 704(c)(1)(B) and this section do not apply to reverse section 704(c) gain or loss as described in § 1.704–3(a)(6)(i).

* * * * *

(g) *Effective/applicability date.* * * * Paragraphs (a)(1), (a)(4)(i), (a)(4)(ii), and (f)(2), *Examples (1) and (2)* are effective August 22, 2007. Paragraphs (c)(4)(i), (c)(4)(ii), (c)(4)(ii)(A), (c)(4)(ii)(B), (c)(4)(ii)(C), (c)(4)(ii)(D), (c)(4)(ii)(E), (c)(4)(ii)(F), and (c)(7) are effective for any distributions of property after January 19, 2005, if such property was contributed in a merger using the assets-over form after May 3, 2004.

Par. 4. Section 1.737–1(c)(1) is amended by removing the phrase ''five years'' and adding in its place the phrase ''seven years''.

Par. 5. Section 1.737–2 is amended as follows:

1. Paragraph (b) is revised.

2. Paragraph (f) is added.

The additions and revisions read as follows:

§ 1.737–2 Exceptions and special rules.

* * * * *

(b) *Transfers to another partnership.*—(1) *Complete transfer to another partnership (Assets-over merger).*—(i) *In General.* Section 737 and this section do not apply to a transfer in an assets-over merger as defined in § 1.708–1(c)(3) by a partnership (the transferor partnership, which is considered to be the terminated partnership as a result of the merger) of all of its assets and liabilities to another partnership (the transferee partnership, which is considered to be the resulting partnership after the merger) followed by a distribution of the interest in the transferee partnership in liquidation of the transferor partnership as part of the same plan or arrangement.

(ii) *Subsequent distributions.*—(A) *Original section 704(c) gain.* If, immediately before the assets-over merger, the transferor partnership holds property that has original built-in gain (as defined in § 1.704–4(c)(4)(ii)(A)), the seven year period in section 737(b) does not restart with respect to such gain as a result of the transfer of such section 704(c) property to the transferee partnership. A subsequent distribution of other property by the transferee partnership to the partner who contributed the original section 704(c) gain property to the transferor partnership is only subject to section 737 with respect to the original section 704(c) gain if the distribution occurs within seven years of the time such property was contributed to the transferor partnership. See § 1.704–4(c)(4)(ii)(A) for a similar provision in the context of section 704. See § 1.737–1 for post-merger distribution of property contributed to the transferee partnership prior to the merger.

(B) *New section 704(c) gain.* Except as provided in paragraph (b)(1)(ii)(E) of this section, if new built-in gain is created upon the contribution of assets by the transferor partnership to the transferee partnership, a subsequent distribution by the transferee partnership of property to a partner of the transferee partnership (other than property deemed contributed by such partner) is subject to section 737, if such distribution occurs within seven years of the contribution by the transferor partnership to the transferee partnership. For these purposes, a partner of the transferor partnership is deemed to have contributed to the transferee partnership an undivided interest in the property of the transferor partnership. The determination of the partner's undivided interest for this purpose shall be determined by the transferor partnership using any reasonable method. See § 1.704–4(c)(4)(ii)(B) for a similar provision in the context of section 704.

(C) *Ordering Rule.* For purposes of this section, if a partner is required to recognize gain under this section, the partner shall recognize a proportionate amount of original and new section 704(c) gain.

(D) *Subsequent Mergers.* If the transferee partnership (first transferee partnership) is subsequently merged into another partnership (new transferee partnership) the section 704(c) gain that resulted from the merger of the transferor partnership into the first transferee partnership shall be subject to section 737 for seven years from the time of the contribution by the transferor partnership to the first transferee partnership (original merger) and section 704(c) gain that resulted from the merger of the first transferee partnership into the new transferee partnership shall be subject to section 737 for seven years from the time of the contribution by the first transferee partnership to the new transferee partnership (subsequent merger). See § 1.704–4(c)(4)(ii)(D) for a similar rule in the context of section 704.

(E) *Identical Ownership or De Minimis Change in Ownership.*

For purposes of section 737(b) and this section, net precontribution gain does not include new section 704(c) gain in property transferred by the transferor partnership to the transferee partnership if both the transferor partnership and the transferee partnership are owned by the same owners in the same proportions or if the difference in ownership is de minimis. The transferor partnership and the transferee partnership are owned by the same owners in the same proportions if each partner owns identical interests in book capital and each item of income, gain, loss, deduction, and credit, and identical shares of distributions and liabilities in each of the transferor and transferee partnerships. A difference in ownership is de minimis if ninety-seven percent of interests in book capital and each item of income, gain, loss, deduction and credit and shares in distributions and liabilities of the transferor partnership and transferee partnership are owned by the same owners in the same proportions. See § 1.704–4(c)(4)(ii)(E) for a similar provision in the context of section 704.

(F) *Examples.* The following examples illustrate the rules of paragraph (b)(3) of this section.

Example (1). No net precontribution gain. (i) *Facts.* On January 1, 2005, A contributes Asset 1, with a basis of $200x and a fair market value of $300x, to partnership PRS1 in exchange for a 50 percent interest. On the same date, B contributes $300x of cash to PRS1 in exchange for a 50 percent interest. Also on January 1, 2005, C contributes Asset 2, with a basis of $100x and a fair market value of $200x, to partnership PRS2 in exchange for a 50 percent interest. D contributes $200x of cash to PRS2 in exchange for a 50 percent interest. On January 1, 2008, PRS1 and PRS2 undertake an assets-over partnership merger in which PRS1 is the continuing partnership and PRS2 is the terminating partnership for both state law and federal tax purposes. At the time of the merger, PRS1's only assets are Asset 1, with a fair market value of $900x, and $300x in cash. PRS2's only assets are Asset 2, with a fair market value of $600x and $200x in

cash. After the merger, the partners have capital and profits interests in PRS1 as follows: A, 30 percent; B, 30 percent; C, 20 percent; and D, 20 percent. PRS1 and PRS2 both have provisions in their respective partnership agreements requiring the revaluation of partnership property upon entry of a new partner. PRS1 would not be treated as an investment company (within the meaning of section 351) if it were incorporated. Neither partnership holds any unrealized receivables or inventory for purposes of section 751. In addition, neither partnership has a section 754 election in place. Asset 1 and Asset 2 are nondepreciable capital assets. On January 1, 2013, PRS1 has the same assets that it had after the merger. Each asset has the same value that it had at the time of the merger. On this date, PRS1 distributes Asset 2 to A in liquidation of A's interest.

(ii) *Analysis.* Section 737(a) requires A to recognize gain when it receives a distribution of property in an amount equal to the lesser of the excess distribution or the partner's net precontribution gain. The distribution of Asset 2 to A results in an excess distribution of $400x ($600x fair market value of Asset 2 − $200x adjusted basis in A's partnership interest). However, the distribution of Asset 2 to A occurs more than seven years after the contribution by A of Asset 1 to PRS1 and A made no subsequent contributions to PRS1. Therefore, A's net precontribution gain for purposes of section 737(b) at the time of the distribution is zero. The $600x of reverse section 704(c) gain in Asset 1, resulting from a revaluation of PRS1's partnership property at the time of the merger, is not net precontribution gain (*see* § 1.737–2(e)). Accordingly, A will not recognize gain under section 737 as a result of the distribution of Asset 2. See § 1.704–4(c)(4)(ii)(F), *Example (1)* for a similar example under section 704.

Example (2). Revaluation gain and merger gain. (i) *Facts.* The facts are the same as Example (1), except that on January 1, 2007, E joins PRS2 as a one-third partner for $250x in cash. At the time E joins the partnership, Asset 2 has a fair market value of $300x. On January 1, 2008, PRS2 merges into PRS1. At the time of the merger, Asset 1 and Asset 2 both have a fair market value of $400x. On January 1, 2011, Asset 1 is distributed to C when its value is $275x.

(ii) *Analysis.* Section 737(a) requires A to recognize gain when it receives a distribution of property in an amount equal to the lesser of the excess distribution or the partner's net precontribution gain. The distribution of Asset 1 to C results in an excess distribution of $175x ($275x fair market value of Asset 1 − $100x adjusted basis in C's partnership interest). The distribution of Asset 1 to C occurs within seven years of the original contribution of Asset 2 by C to PRS2. Therefore, C's net precontribution gain at the time of the distribution is $183.33x, which includes C's original section 704(c) gain from the contribution of Asset 2 to PRS2 of $100x plus C's share of new section 704(c) gain of $83.33x ($50x of reverse section 704(c) gain upon the admission of E, plus $33.33x of additional section 704(c) gain upon merger). C's excess distribution is less than C's net precontribution gain. Thus, C will recognize $175x of gain upon receipt of Asset 1 in accordance with section 737(a). See § 1.704–4(c)(4)(ii)(F), *Example (2)* for a similar example under section 704.

Example (3). Fluctuations in the value of an asset. (i) *Facts.* The facts are the same as *Example (1),* except that on January 1, 2011, Asset 1 is distributed to C when its fair market value is $300x. Immediately prior to the distribution, PRS1 revalues its property in accordance with § 1.704–1(b)(2)(iv)(f).

(ii) *Analysis.* The distribution of Asset 1 to C occurs within seven years of the original contribution of Asset 2 by C to PRS2 and within seven years of the date of the merger. Therefore, C's net precontribution gain at the time of the distribution equals $300x ($100x of original section 704(c) gain from the contribution of Asset 2 to PRS2 and $200x of new section 704(c) gain). The distribution of Asset 1 to C results in an excess distribution of $200x ($300x fair market value of Asset 1 − $100x adjusted basis in C's partnership interest). Accordingly, in accordance with section 737(a), C will recognize gain of $200x upon receipt of Asset 1.

Example (4). Reverse section 704(c) gain. (i) *Facts.* The facts are the same as *Example (1),* except that on January 1, 2011, PRS1 distributes Asset 2 to A in liquidation of A's interest in PRS1. At the time of the distribution, Asset 2 has a value of $600x.

(ii) *Analysis.* Section 737(a) requires A to recognize gain when it receives a distribution of property in an amount equal to the lesser of the excess distribution or the partner's net precontribution gain. The distribution of Asset 2 to A results in an excess distribution of $400x ($600x fair market value − $200x adjusted basis in A's partnership interest). The distribution of Asset 2 to A occurs within seven years after the contribution of Asset 1 to PRS1 by A. Thus, A's net precontribution gain for purposes of section 737(b) at the time of the distribution is $100x (A's original section 704(c) gain from the contribution of Asset 1 to PRS1). Under § 1.737–2(e), A's net precontribution gain does not include A's reverse section 704(c) gain upon the revaluation of the Assets of PRS1 prior to the merger. Accordingly, A will recognize $100x of gain (the lesser of the excess distribution or net precontribution gain) under section 737 as a result of the distribution of Asset 2. See § 1.704–4(c)(4)(ii)(F), *Example (4)* for a similar example under section 704.

Example (5). Identical ownership exception. (i) *Facts.* In 1990, A, an individual, and B, a subchapter C corporation, formed PRS1, a partnership. A owned 75 percent of the interests in the book capital, profits, losses, distributions, and liabilities of PRS1. B owned the remaining 25 percent interest in the book capital, profits, losses, distributions, and liabilities of PRS1. In the same year, A and B also formed another partnership, PRS2, with A owning 75 percent of the interests in PRS2 and B owning the remaining 25 percent. Upon formation of the partnerships, A contributed Asset X to PRS1 and Asset Y to PRS2 and B contributed cash. Both Assets X and Y had section 704(c) built-in gain at the time of contribution to the partnerships.

(ii) In January 2005, PRS1 is merged into PRS2 in an assets-over merger in which PRS1 is the terminating partnership and PRS2 is the continuing partnership for both state law and federal income tax purposes. At the time of the merger, both Assets X and Y had increased in value from the time they were contributed to PRS1 and PRS2, respectively. As a result, a new layer of section 704(c) gain was created with respect to Asset X in PRS1. After the merger, A had a 75 percent interest in PRS2's book capital, profits, losses, distributions, and liabilities. B held the remaining 25 percent interest in PRS2's book capital, profits, losses, distributions, and liabilities. In 2006, PRS2 distributes all of Asset X to A.

(iii) *Analysis.* The 2006 distribution by PRS2 occurs more than seven years after the formation of the partnerships and the original contribution of Asset X to the partnerships. Therefore, the original layer of built-in gain created on the original contribution of Asset X to the partnerships should not be taken into account in applying section 737 to the proposed liquidation. In addition, paragraph (b)(1)(ii)(E) of this section provides that section 737(a) does not apply to newly created section 704(c) gain in property transferred by the transferor partnership to the transferee partnership if both the transferor partnership and the transferee partnership are owned by the same owners in the same proportions. The transferor partnership and the transferee partnership are owned by the same owners in the same proportions if each partner's percentage interest in the transferor partnership's book capital, profits, losses, distributions, and liabilities is the same as the partner's percentage interest in those items of the transferee partnership. In this case, A owned 75 percent and B owned 25 percent of the interests in the book capital, profits, losses, distributions, and liabilities of PRS1 and PRS2 prior to the merger and 75 percent and 25 percent, respectively, of PRS2 after the merger. As a result, the requirements of the identical ownership exception of paragraph (b)(1)(ii)(E) of this section are satisfied. Thus, the new built-in gain created upon contribution of Asset X in connection with the partnership merger will not be taken into account in applying section 737 to the proposed distribution. See § 1.704–4(c)(4)(ii)(F), *Example (5)* for a similar example under section 704.

(2) *Certain divisive transactions.*—(i) *In general.* Section 737 and this section do not apply to a transfer by a partnership (transferor partnership) of all of the section 704(c) property contributed by a partner to a second partnership (transferee partnership) in an exchange described in section 721, followed by a distribution as part of the same plan or arrangement of an interest in the transferee partnership (and no other property) in complete liquidation of the interest of the partner that originally contributed the section 704(c) property to the transferor partnership (divisive transactions).

(ii) *Subsequent distributions.* After a divisive transaction referred to in paragraph (b)(2)(i) of this section, a

subsequent distribution of property by the transferee partnership to a partner of the transferee partnership that was formerly a partner of the transferor partnership is subject to section 737 to the same extent that a distribution from the transferor partnership would have been subject to section 737.

* * * * *

(f) *Reverse section 704(c) gain.* For purposes of section 737(b), net precontribution gain does not include reverse section 704(c) gain as described in § 1.704–3(a)(6)(i).

Par. 6. Section 1.737–5 is amended by revising the section heading and adding two additional sentences at the end of the paragraph to read as follows:

§ 1.737–5 Effective/applicability date.

* * * Section 1.737–1(c) is effective as of August 22, 2007. Section 1.737–2(b)(1) is effective for any distribution of property after January 19, 2005, if such property was contributed in a merger using the assets-over form after May 3, 2004.

Kevin M. Brown,

Deputy Commissioner for Service and Enforcement.

ENVIRONMENTAL PROTECTION AGENCY

40 CFR Part 52

[EPA–R04–OAR–2004–SC–0004–200706 (b); FRL–8457–1]

Approval and Promulgation of Implementation Plans South Carolina: Revisions to Ambient Air Quality Standards

AGENCY: Environmental Protection Agency (EPA).

ACTION: Proposed rule.

SUMMARY: EPA is proposing to approve the State Implementation Plan (SIP) revisions submitted by the South Carolina Department of Health and Environmental Control (SC DHEC) on November 19, 2004, for the purpose of incorporating EPA's July 18, 1997, revisions to the National Ambient Air Quality Standards and to ensure consistency between state and Federal regulations. The proposed revisions consist of the amendments published in the South Carolina State Register on September 24, 2004, revising Regulation 61–62.5, Standard Number 2, Ambient Air Quality Standards. In the Final Rules Section of this **Federal Register**, EPA is approving the State's SIP revision as a direct final rule without prior proposal because the Agency views this as a noncontroversial submittal and anticipates no adverse comments. A detailed rationale for the approval is set forth in the direct final rule. If no adverse comments are received in response to this rule, no further activity is contemplated. If EPA receives adverse comments, the direct final rule will be withdrawn and all public comments received will be addressed in a subsequent final rule based on this proposed rule. EPA will not institute a second comment period on this document. Any parties interested in commenting on this document should do so at this time.

DATES: Written comments must be received on or before September 21, 2007.

ADDRESSES: Submit your comments, identified by Docket ID No. EPA–R04–OAR–2004–SC–0004, by one of the following methods:

1. *http://www.regulations.gov:* Follow the on-line instructions for submitting comments.
2. *E-mail: ward.nacosta@epa.gov.*
3. *Fax:* 404–562–9019.
4. *Mail:* ''EPA–R04–OAR–2004–SC–0004'', Regulatory Development Section, Air Planning Branch, Air, Pesticides and Toxics Management Division, U.S. Environmental Protection Agency, Region 4, 61 Forsyth Street, SW., Atlanta, Georgia 30303–8960.
5. Hand Delivery or Courier. Deliver your comments to: Nacosta C. Ward, Regulatory Development Section, Air Planning Branch, Air, Pesticides and Toxics Management Division, U.S. Environmental Protection Agency, Region 4, 61 Forsyth Street, SW., Atlanta, Georgia 30303–8960. Such deliveries are only accepted during the Regional Office's normal hours of operation. The Regional Office's official hours of business are Monday through Friday, 8:30 a.m. to 4:30 p.m., excluding federal holidays.

Please see the direct final rule which is located in the Rules section of this **Federal Register** for detailed instructions on how to submit comments.

FOR FURTHER INFORMATION CONTACT: Nacosta C. Ward, Regulatory Development Section, Air Planning Branch, Air, Pesticides and Toxics Management Division, U.S. Environmental Protection Agency, Region 4, 61 Forsyth Street, SW., Atlanta, Georgia 30303–8960. The telephone number is (404) 562–9140. Ms. Ward can also be reached via electronic mail at *ward.nacosta@epa.gov.*

SUPPLEMENTARY INFORMATION: For additional information see the direct final rule which is published in the Rules Section of this **Federal Register**.

Dated: July 31, 2007.

BILLING CODE 6560–50–P

FEDERAL COMMUNICATIONS COMMISSION

47 CFR Parts 2 and 25

[IB Docket No. 06–123; FCC 07–76]

Establishment of Policies and Service Rules for the Broadcasting-Satellite Service

AGENCY: Federal Communications Commission.

ACTION: Proposed rules.

SUMMARY: The Federal Communications Commission initiates a Further Notice of Proposed Rulemaking (FNPRM) to address technical issues related to potential interference unique to the ''reverse band'' operating environment in the 17/24 GHz BSS. In the *NPRM* in this proceeding, the Commission sought comment on what measures were needed to address issues concerning reverse band operations. These included measures to mitigate against space-path interference between DBS and 17/24 GHz BSS satellites (space-path interference) and to protect 17/24 GHz BSS subscribers from DBS feeder links (ground-path interference). The record on these issues is insufficient to develop requirements. While most commenters advocate certain general approaches, we need more information to build on the generalities and derive specific requirements. Thus, we seek further comment on the issues concerning reverse band operations.

DATES: Comments are due on or before November 5, 2007 and reply comments are due on or before December 5, 2007. Public and agency comments on the Initial Paperwork Reduction Act of 1995 (IFRA) analysis are due October 22, 2007.

ADDRESSES: You may submit comments, identified by IB Docket No. 06–123, by any of the following methods:

- *Federal eRulemaking Portal: http://www.regulations.gov.* Follow the instructions for submitting comments.
- *Federal Communications Commission's Web Site: http://www.fcc.gov/cgb/ecfs/.* Follow the instructions for submitting comments.

• *Mail:* Office of the Secretary, Federal Communications Commission, 445 12th Street, SW., Washington, DC 20554.

• *People with Disabilities:* Contact the FCC to request reasonable accommodations (accessible format documents, sign language interpreters, CART, etc.) by e-mail: *FCC504@fcc.gov* or phone: 202–418–0530 or TTY: 202–418–0432.

For detailed instructions for submitting comments and additional information on the rulemaking process, see the **SUPPLEMENTARY INFORMATION** section of this document.

FOR FURTHER INFORMATION CONTACT: Andrea Kelly (202) 418–7877, Satellite Division, International Bureau, Federal Communications Commission, Washington, DC 20554. For additional information concerning the information collection(s) contained in this document, contact Judith B. Herman at 202–418–0214, or via the Internet at *Judith-B.Herman@fcc.gov*.

SUPPLEMENTARY INFORMATION: This is a summary of the Commission's *Further Notice of Proposed Rulemaking* (FNPRM) in IB Docket No. 06–123, FCC 07–76, adopted May 2, 2007 and released on May 4, 2007. The full text of the FNPRM is available for public inspection and copying during regular business hours at the FCC Reference Information Center, Portals II, 445 12th Street, SW., Room CY–A257, Washington, DC 20554. The document may also be purchased from the Commission's duplicating contractor, Best Copy and Printing, Inc., Portals II, 445 12th Street, SW., Room CY–B402, Washington, DC 20554, telephone 202–488–5300, facsimile 202–488–5563, or via e-mail *FCC@BCPIWEB.com.*

Pursuant to the Regulatory Flexibility Act, the Commission has prepared an Initial Regulatory Flexibility Analysis (IRFA) of the possible significant economic impact on small entities by the rules adopted in the R&O and the proposals considered in the FNPRM. The text of the IRFA is set forth in Appendix H of the R&O and FNPRM. Written public comments are requested on the IRFA. Comments must be filed in accordance with the same filing deadlines for comments on the FNPRM, and they should have a separate and distinct heading designating them as responses to the IRFA.

In addition, the Commission, as part of its continuing effort to reduce paperwork burdens, invites the general public and the Office of Management and Budget (OMB) to comment on the information collection requirements contained in this document, as required by the Paperwork Reduction Act of 1995, Public Law 104–13. Public and agency comments are due October 22, 2007. Comments should address: (a) Whether the proposed collection of information is necessary for the proper performance of the functions of the Commission, including whether the information shall have practical utility; (b) the accuracy of the Commission's burden estimates; (c) ways to enhance the quality, utility, and clarity of the information collected; and (d) ways to minimize the burden of the collection of information on the respondents, including the use of automated collection techniques or other forms of information technology. In addition, pursuant to the Small Business Paperwork Relief Act of 2002, Public Law 107–198, *see* 44 U.S.C. 3506(c)(4), we seek specific comment on how we might ''further reduce the information collection burden for small business concerns with fewer than 25 employees.''

Paperwork Reduction Act Requirements

OMB Control Number: 3060–1097.

Title: Service Rules and Policies for the Broadcasting Satellite Service (BSS).

Form No.: Not Applicable.

Type of Review: On-going collection.

Respondents: Businesses or other for-profit entities.

Number of Respondents: 4 respondents; 24 responses.

Estimated Time Per Response: 10 hours.

Frequency of Response: On occasion and annual reporting requirements.

Estimated Total Annual Burden: 240 hours.

Estimated Total Annual Costs: $12,451,700.00.

Privacy Act Impact Assessment: Not Applicable.

Needs and Uses: The purpose of this information collection is to address the Paperwork Reduction Act (PRA) requirements proposed in the Commission's Notice of Proposed Rulemaking (FCC 06–90) to establish policies and service rules for the new Broadcasting Satellite Service under IB Docket No. 06–123. In this FNPRM, the Commission proposes three new information collection requirements applicable to Broadcasting Satellite Service licensees: (1) Annual reporting requirement on status of space station construction and anticipated launch dates, (2) milestone schedules and (3) performance bonds that are posted within 30 days of the grant of the license.

Without the information collected through the Commission's satellite licensing procedures, we would not be able to determine whether to permit applicants for satellite licenses to provide telecommunications services in the U.S. Therefore, we would be unable to fulfill our statutory responsibilities in accordance with the Communications Act of 1934, as amended; as well as the obligations imposed on parties to the World Trade Organization (WTO) Basic Telecom Agreement.

Summary of Further Notice of Proposed Rulemaking

1. Further Notice of Proposed Rulemaking: In the *NPRM*, the Commission sought comment on what measures were needed to address issues concerning reverse band operations. These included measures to mitigate against space-path interference between DBS and 17/24 GHz BSS satellites (space-path interference) and to protect 17/24 GHz BSS subscribers from DBS feeder links (ground-path interference). The record on these issues is insufficient to develop requirements. While most commenters advocate certain general approaches, we need more information to build on the generalities and derive specific requirements. Thus, we seek further comment on the issues concerning reverse band operations.

2. Ground-Path Interference in Reverse Band Operations. As discussed in the *NPRM,* ground path interference will occur when the signals from transmitting DBS feeder link earth stations operating in the 17.3–17.7 GHz band are detected at the receiving earth stations of 17/24 GHz BSS subscribers. This interference situation will be the most severe in areas surrounding the DBS feeder uplink stations. In addition, 17/24 GHz BSS operators who choose to co-locate their TT&C earth stations with DBS TT&C earth stations systems may experience difficulty in receiving the downlinked telemetry signal from the 17/24 GHz BSS spacecraft. Although at present there are a relatively small number of DBS feeder link and TT&C earth stations, the *NPRM* recognized that DBS feeder link earth stations that transmit in the Earth-to-space direction may increasingly locate in populated areas, thereby escalating the potential for interference into 17/24 GHz BSS subscriber antennas. The *NPRM* also anticipated that future entrants, such as short-spaced DBS systems, or non-U.S. DBS satellites serving the U.S. market, could result in the deployment of an even greater number of feeder link earth stations at multiple sites within the United States. The *NPRM* also raised concerns that the interference problem could be further exacerbated by the

proliferation of small-diameter 17/24 GHz BSS subscriber receiving antennas with relatively poor off-axis discrimination properties.

3. Grandfathering Existing DBS Uplink Facilities. DIRECTV notes that, although DBS operators have recently sought authority for additional feeder link earth stations to uplink local broadcast signals from regional collection sites, the number of such sites is still very small. DIRECTV states, by way of illustration, that it operates DBS feeder links from only four sites across the country, and has no plans for additional regional sites. DIRECTV proposes that we ''grandfather'' licensed and operating DBS uplink facilities so that they may continue to operate in the manner in which they were designed in reliance on the rules then in effect. Accordingly, DIRECTV does not support off-axis EIRP density or other transmitting power limits for existing DBS feeder link antennas, or a requirement that such be shielded. EchoStar also advocates ''grandfathering'' of existing DBS feeder link earth stations, arguing that there are relatively few in number, and that the majority are located in less populated areas so that they pose little problem.

4. The Commission did not discuss this issue in the *NPRM*. Nevertheless, based on the record, we tentatively conclude that existing DBS feeder link earth stations should not be subject to new interference-mitigation requirements imposed as a result of this rulemaking. Accordingly, we intend to define an area around existing DBS feeder link earth stations that transmit in the 17.3–17.7 GHz band, within which 17/24 GHz BSS receiving earth stations cannot claim protection from the DBS feeder uplink transmissions. We discuss this issue in more detail below.

5. Protection Zones for Existing DBS Uplink Facilities. We propose to limit any protection zone to some area surrounding the specific geographic location and frequencies within the 17.3–17.7 GHz BSS band in which the DBS feeder link earth station licensee is already authorized to transmit. In addition, we agree that the feeder link operator should have some ability to upgrade facilities at existing sites, as long as the modification does not cause any increase in interference to 17/24 GHz BSS receiving antennas outside of the defined protection zone.

6. We seek comment on these tentative conclusions and on how a protection zone should be defined. One option is to define the boundary of the protection zone as a fixed distance away from the coordinates of the DBS Feeder Link Earth Station. DIRECTV presents an analysis demonstrating that, in the absence of shielding, the separation distance between a DBS feeder link earth station and a receiving 17/24 GHz subscriber antenna can become significant, i.e., on the order of 22 miles. EchoStar suggests that likely separation distances necessary to mitigate groundpath interference are on the order of 10 to 60 miles. SES Americom states that levels of interference could be harmful if the subscriber earth station is located within 20–30 km (12.5–18.6 miles) of the DBS feeder link station.

7. We note too that the DBS feeder link earth station's transmissions will not be equal in all directions, but will vary in part as a function of azimuth and elevation angle, and this picture may be complicated by the presence of multiple transmitting antennas at a particular site. In addition, we recognize that different areas of the country will have differing climate, rainfall and terrain conditions that will also mitigate groundpath interference. Accordingly, a second option is to employ a more detailed methodology that takes into account these site-specific characteristics, rather than impose a uniform radius around the earth station coordinates. Parties supporting this approach should explain in detail how exactly they would adjust for climate, rainfall, or terrain conditions, or any other variables that they believe should be reflected in the protection zone.

8. Thus, we invite comment on each of the two protection zone options set forth above: (1) To set the boundary at some fixed distance from the DBS feeder link earth station; or (2) to adjust that boundary to account for climate, terrain, or other considerations. We also seek comment on any other approaches we might adopt. Commenting parties should provide specific details on any such proposal.

9. Upgrades to Grandfathered Facilities. EchoStar urges the Commission to make clear that any protection is afforded to existing DBS uplink sites, and not just to currently licensed earth stations to protect the operator's ability to expand their existing uplink sites. EchoStar argues that this approach would promote efficiency by reducing the number of new geographically diverse sites. Specifically, EchoStar proposes that ''grandfathering'' would apply both to existing earth stations and to new earth stations located ''within a mile of the easternmost, westernmost, northernmost and southernmost coordinates of existing earth stations in each site.'' We seek comment on EchoStar's proposal to extend ''grandfathered'' status to any new earth stations located within a mile of an existing earth station site. Parties commenting on this proposal should explain in detail the reasons for their positions. Among other things, we invite comment on whether, and to what extent, adding new DBS feeder link earth stations within a mile of an existing DBS feeder link earth station is likely to increase the probability of harmful interference to 17/24 GHz BSS receivers.

10. As an alternative approach, we could define a pfd level at the boundary of the protection zone that would take into account the cumulative effect of any modified operations of the existing earth station site. If these modified operations do not exceed this pfd level, the modification would not be subject to the new coordination requirements. We seek comment on this approach. We also seek comment on what pfd level at the boundary might be suitable.

11. Coordination between DBS and 17/24 GHz BSS Operators. Commenters addressing the issue of new DBS feeder link earth stations recognize that to protect the interests of 17/24 GHz BSS consumers, these earth stations will need to be subject to some restrictions. As detailed below, we seek comment on developing a coordination zone and a coordination methodology.

12. Coordination Zone. In the *NPRM*, the Commission observed that its rules do not contain a procedure to coordinate co-frequency, DBS feeder link earth stations with BSS subscriber terminals. Consequently, the Commission proposed to establish ''coordination zones'' or, in other words, areas around DBS feeder link earth stations in which coordination would be required. The Commission proposed to define these areas based on the methodology outlined in Annex 3 of Appendix 7 of the ITU Radio Regulations.

13. The Commission further observed that it had used Appendix 7 as the basis of other coordination rules it had adopted. The Commission also noted, however, that Table 9b of Appendix 7, which includes data needed for determining the coordination zone for services in several frequency bands, does not include some data needed for determining the coordination zone for services in the 17.3–17.8 GHz band. Accordingly, the Commission invited parties to recommend data for a table based on Table 9b that would allow operators to calculate coordination areas for the 17.3–17.8 GHz band in a way comparable to the method operators in other frequency bands use Table 9b to determine their coordination distances.

14. Consistent with our proposal in the *NPRM,* we tentatively conclude that use of the procedure in Table 9b to establish the coordination zone for DBS feeder link earth stations and BSS subscriber terminals is appropriate. In this *FNPRM,* we seek comment on the specific values for Table 9b as set forth below. We seek comment on the appropriateness of this approach. Parties proposing an alternative set of values should provide a detailed justification for those values.

TABLE 9B.—PARAMETERS REQUIRED FOR THE DETERMINATION OF COORDINATION DISTANCE FOR A TRANSMITTING EARTH STATION IN BANDS SHARED BIDIRECTIONALLY WITH RECEIVING EARTH STATIONS

Parameter(s)		Value	Description
Orbit		GSO	Orbit in which the space service in which receiving earth station operates (GSO or NGSO).
Modulation at receiving earth station.		N	Analog or digital.
Receiving earth station interference parameters and criteria.	p_0 (%)	0.003	Percentage of the time during which interference from all sources may exceed the threshold value.
	N	2	Number of equivalent, equal level, equal probability entries of interference, assumed to be uncorrelated for small percentages of the time.
	p (%)	0.0015	Percentage of the time during which the interference from one source may exceed the permissible interference power value; since the entries of interference are not likely to occur simultaneously, $p=p_0/n$.
	N_L (dB)	1	Link noise contribution.
	M_s (dB)	5	Link performance margin.
	W (dB)	0	A thermal noise equivalence factor for interfering emissions in the reference bandwidth; it is positive when the interfering emissions would cause more degradation than thermal noise.
Receiving earth station parameters.	G_m (dBi)	36	On-axis gain of the receive earth station antenna.
	G_r	10	Horizon antenna gain for the receive earth station.
	εmin	5°	Minimum elevation angle of operation in degrees.
	T_e (K)	300K	The thermal noise temperature of the receiving system at the terminal of the receiving antenna. See 2.1 of Annex 7 to Appendix 7 of the ITU Radio Regulations which provides a default value for two earth stations operating in opposite directions of transmission at frequencies greater than 17/24 GHz.
Reference Bandwidth	B (Hz)	1.0×10^6	Reference bandwidth (Hz), i.e., the bandwidth in the receiving station that is subject to the interference and over which the power of the interfering emission can be averaged.
Permissible interference power	$P_r(p)$ (dBW) in B	−139.5	Permissible interference power of the interfering emission (dBW) in the reference bandwidth to be exceeded no more than p÷ of the time at the receiving antenna terminal of a station subject to interference, from a single source of interference, using the general formula: $P_r(p) = 10 \log (k T_e B) + N_L + 10 \log (10^{Ms/10} - 1) - W$.

15. DIRECTV proposes that the Commission establish a coordination zone around any new DBS feeder uplink earth stations and that within this zone, a new the DBS operator would be required to coordinate its operations with 17/24 GHz BSS subscriber earth stations. DIRECTV asserts further that this process would be greatly facilitated if new DBS uplink facilities were required to operate with strict pfd limits on transmissions toward the horizon and/or to employ shielding. Although DIRECTV suggests that this coordination zone could be relatively large (*e.g.*, 10 km) it proposes no specific methodology for how such a zone might be defined, nor does it propose pfd limits in the direction of the horizon.

16. However, EchoStar proposes that, rather than defining a coordination zone, the Commission should define an area around any new DBS feeder link earth station within which 17/24 GHz BSS earth stations would become, in effect, secondary to the DBS operation and thus would required to accept all interference. For this reason, EchoStar contends that the methodology of Appendix 7 is not likely to determine particularly realistic separation distances, as it is intended to calculate threshold separations to initiate coordination. EchoStar also contends that there are several other methodologies that the Commission might consider for determining the spacing between DBS feeder link stations and 17/24 GHz BSS earth stations. Specifically, EchoStar suggests that ITU–R Recommendation P.452 defines a general propagation model that could be applied, and ITU–R Recommendation S.1712, although intended for the 14 GHz band, might provide additional useful methodologies that could be extrapolated to the 17 GHz band. In addition, EchoStar proposes that the choice of methodology for computing the separation distance should be left to the operators concerned.

17. Accordingly, we seek comment on the above proposals, and which, if any we should adopt to facilitate reverse-band operations in the 17 GHz band. As an initial matter, we request interested parties to discuss whether the Commission should adopt a coordination zone of any type, or whether the defined zone should be an area in which the 17/24 GHz BSS is secondary to DBS as EchoStar recommends. We invite interested parties to discuss whether they prefer to define such a zone using a methodology

based on Appendix 7, Annex 3 as proposed in the *NPRM,* or based on one of the ITU recommendations suggested by EchoStar (*i.e.*, ITU–R Recommendation P.452 or S.1712). We request comment on all these proposals, and invite commenters to propose different coordination or separation distances, provided that they can provide adequate justification on the record for their proposals.

18. In addition, we seek comment on whether we should permit operators to determine jointly among themselves the choice of methodology to calculate the corresponding separation distance as EchoStar suggests. We also seek comment on how, under this approach, established 17/24 GHz BSS subscriber antennas might be protected from interference from newer DBS feeder link operations seeking to locate nearby. Such parties should explain in detail why they support their preferred methodology, and why they believe their methodology is superior to other options. Finally, we invite parties to recommend the appropriate parameter values necessary to employ the method they support.

19. Coordination Methodology. We invite comment here on the methodology to be used within that zone to coordinate DBS feeder links and 17/24 GHz BSS earth stations, should the Commission adopt a coordination zone as discussed above. The *NPRM* envisioned that both DBS operators and 17/24 GHz BSS operators will be deploying new earth stations over time, so that new stations of one service will continually be established among existing stations from the other. The Commission made a similar observation in the *MVDDS Second R&O,* in which it addressed a frequency sharing situation that presented ground path interference issues and gradual build-out of interspersed earth stations similar to those we envision in the 17.3–17.7 GHz band.

20. In the *MVDDS Second R&O,* the Commission concluded that careful MVDDS system design and the use of various mitigation techniques could achieve successful sharing of the 12 GHz frequency band by both services. To accomplish this goal, the Commission adopted, among other things, a coordination procedure that requires that a MVDDS operator entering a market where DBS receivers are already established must satisfy certain requirements in order to protect these customers. In addition, a mechanism is established for information exchange between the operators of both services, in particular to take into account recently acquired DBS customers. The *NPRM* sought comment on whether we should adopt a similar approach to sharing between DBS feeder link earth stations and 17/24 GHz BSS receiving earth stations. We seek further comment here. Specifically we ask whether we should adopt service rules similar to those in § 25.203(c), requiring all applications for new (non-grandfathered) DBS feeder link earth stations or new 17 GHz transmitting TT&C stations to complete prior frequency coordination with existing and planned 17/24 GHz BSS receiving stations.

21. The Commission recognizes that requiring 17/24 GHz BSS operators to make available a list of their subscriber earth stations raises issues of sensitive customer information, particularly if the DBS feeder link applicant is also a competitor. Accordingly, we tentatively conclude that use of a neutral, third-party frequency coordinator is appropriate to assuage such concerns. Thus, we propose that, prior to filing an application with the Commission, a DBS operator planning a new feeder link earth station or 17 GHz transmitting TT&C station must provide certain specified technical information to a qualified frequency coordinator. The frequency coordinator would make this technical information available to all licensed 17/24 GHz operators. Interested parties could obtain both a list of potentially-affected and active 17/24 GHz BSS customer locations that are within a defined coordination area, as well as a list of potentially-affected 17/24 GHz TT&C earth stations for which applications are on file with the Commission within the defined coordination area. The 17/24 GHz BSS operators would be required to provide these lists within 30 days upon receipt of the new DBS feeder link earth station technical information and the notice. A DBS operator would be allowed to file an application with the Commission for a new DBS feeder link or TT&C transmitting earth station within 6 months of successfully completing coordination with all stations on these lists. If the Commission grants a license for the newly proposed 17 GHz transmitting station, any 17/24 GHz receiving earth station not on these lists would be unable to claim protection from this new DBS feeder link earth station. We seek comment on this proposal, and on the method that should be employed to calculate such a coordination area.

22. We also seek comment on the types of technical information DBS feeder link earth station operators should make available for the purposes of earth station coordination with 17/24 GHz BSS operators. In the case of satellite and terrestrial earth station coordination, Commission rules now require that all transmitting satellite earth station applicants submit an interference analysis as required by § 25.203 of the Commission's rules, 47 CFR 25.203(c)(2). § 25.203(c)(2) requires that the earth station applicant provide each terrestrial station licensee with specific technical details. Similarly, we propose that DBS feeder link earth station applicants provide the following information to the qualified frequency coordinator:

i. The geographical coordinates of the proposed earth station antenna(s);

ii. Proposed operating frequency band(s) and emission(s);

iii. Antenna diameter (meters);

iv. Antenna center height above ground and ground elevation above mean sea level;

v. Antenna gain pattern(s) in the plane of the main beam;

vi. Longitude range of geostationary satellite orbit (GSO) satellites at which an antenna may be pointed, for proposed earth station antenna(s) accessing GSO satellites;

vii. Horizon elevation plot;

viii. Antenna horizon gain plot(s) determined in accordance with the procedure in section 2.1 of Annex 5 to Appendix 7 of the ITU Radio Regulations;

ix. Minimum elevation angle;

x. Maximum equivalent isotropically radiated power (EIRP) density in the main beam in any MHz band;

xi. Maximum available RF transmit power density in any 1 MHz band at the input terminals of the antenna(s);

xii. A plot of the coordination distance contour(s) and rain scatter coordination distance contour(s) as determined by Table 2 of section 3 to Appendix 7.

23. We ask what reference bandwidths would be appropriate in items (x) and (xi). In addition, we seek comment on whether the parameters listed here or other technical information would be appropriate to provide in order to facilitate coordination between new DBS feeder link earth stations and receiving 17/24 GHz BSS antennas.

24. Other Measures to Protect 17/24 GHz BSS Operations. In addition to the protection zone and coordination requirements proposed above, some commenters assert that further measures are necessary to protect 17/24 GHz BSS earth stations from harmful interference from DBS feeder link earth stations. Those measures include: (1) Limits on DBS feeder link earth station EIRP toward the horizon; (2) placement of

new DBS feeder link facilities in low-population density areas; (3) technical showing requirements for co-located DBS and 17/24 GHz BSS earth stations; and (4) antenna shielding requirements. These proposed approaches are not necessarily mutually exclusive, and it is entirely possible that we might employ several methods in combination with each other, as well as adopting the protection zone and coordination requirements discussed above. Moreover, as DIRECTV correctly notes, a decision to employ one approach may influence the extent to which we simultaneously apply another. However, no commenter has been specific in its proposals, nor provided a comprehensive approach necessary to definitively address the issue. Consequently, we do not believe that the record is sufficiently developed so that we may determine whether to adopt requirements at this time.

25. Accordingly, we invite further comment on each of the additional measures suggested by commenters. In particular, commenters supporting any of these proposals should explain in detail why that additional measure would be necessary to protect 17/24 GHz BSS earth stations from harmful interference, in the event that we adopt coordination procedures of the kind discussed above. Moreover, such commenters should discuss whether they support adoption of all the additional measures discussed here, or whether some of the additional measures would provide adequate protection from harmful interference.

26. Power Level Limits. In the *NPRM,* the Commission noted that § 25.204(b) of the Commission's rules places limits on earth station EIRP in bands above 15 GHz shared coequally with terrestrial radiocommunication services, in order to facilitate sharing with these services. The Commission sought comment on whether the Commission should extend this requirement to new DBS feeder link earth stations operating in the entire 17.3–17.7 GHz band. The Commission also asked whether the EIRP density limits in § 25.204(b) through (e) would be sufficient to protect 17/24 GHz BSS earth stations, or if DBS feeder link earth stations should meet some more stringent requirements. We seek further comment on these questions.

27. Under EchoStar's power limit proposal, new DBS earth stations would be constrained only in terms of EIRP density toward the horizon. We invite comment on whether any such limit would be necessary if we adopt a coordination procedure as discussed above. Alternatively, we ask whether the adoption of EIRP density limits toward the horizon would obviate the need for coordination procedures. Advocates of EIRP density limits should include a specific limit in their discussions, and advocates of both approaches should provide adequate justification for their recommendations.

28. Restrictions on Placement of New DBS Earth Stations. DIRECTV and EchoStar advocate requiring DBS feeder link earth station operators to locate their earth stations only in areas of low population density. Although neither define precisely how such sparely populated locations would be determined, DIRECTV notes that counties with populations less that ten people per square mile comprise a significant portion of the contiguous United States. We seek comment on this approach, either alone, or in conjunction with other proposals, and ask how the Commission should determine what constitutes a low-population density site. We also request parties to explain how DBS feeder link operators would be able to protect 17/24 GHz BSS consumer earth stations that are already deployed in these areas.

29. EchoStar makes its proposal to restrict new DBS feeder link earth stations to low population-density areas in conjunction with its proposal to require those earth stations to meet strict off-axis EIRP density limits towards the horizon. Presumably however, even areas of low population density may contain 17/24 GHz BSS subscribers. Thus, although this approach might be applied to new DBS feeder uplink stations locating in areas yet unoccupied by 17/24 GHz BSS subscriber earth stations, EchoStar does not make clear how subscriber terminals would be protected if the DBS applicant sought to locate in an area where 17/24 GHz BSS consumer earth stations were already deployed. We request commenters to address this issue.

30. Technical Showing Requirement for Co-Located Earth Stations. The *NPRM* also addressed groundpath interference that may occur between transmitting DBS feeder uplinks and the receiving telemetry stations of 17/24 GHz BSS systems that choose to locate their TT&C facilities at or near to existing DBS feeder uplink sites. The Commission recognized that choice of facility site is a system design parameter that is under the control of the operator, and does not necessarily require a Commission action to remedy. Moreover, given the large financial investment required to launch and operate a satellite, we believe that 17/24 GHz BSS operators have strong incentive to make correct technical decisions with regard to their choice of TT&C facility sites and equipment design. However, the *NPRM* also recognized that interference into TT&C systems can present a serious problem due to the potential for loss of satellite control, and sought comment on whether the Commission should adopt requirements to guard against such scenarios.

31. Specifically, the Commission proposed to require earth station applicants planning to co-locate their 17/24 GHz BSS TT&C stations with DBS feeder link earth stations to make a technical showing to the Commission demonstrating their ability to maintain sufficient margin in their telemetry links in the presence of the interfering DBS signal. Similarly, the Commission proposed to require DBS feeder link earth station applicants planning to co-locate with their 17/24 GHz BSS telemetry earth stations to make an analogous technical showing to the Commission. The Commission sought comment on these proposals and asked what parameters would be appropriate in such a showing. It also asked whether it should preclude co-location of 17 GHz BSS TT&C and DBS feeder link facilities altogether, or whether it should require some minimum separation between such facilities.

32. DIRECTV responds that, with careful planning, it should be possible to coordinate the operations of these two services, even to the point where the facilities can be co-located. Accordingly, DIRECTV does not believe that the Commission should limit operator flexibility by precluding such co-location or by requiring some minimum separation distance. Rather, DIRECTV supports the Commission's proposal that operators seeking to co-locate such facilities should be required to make a technical showing demonstrating their ability to maintain sufficient margin in the 17/24 GHz BSS telemetry links in the presence of the interfering DBS signal. DIRECTV asserts that this will enable those operators who want to capture the efficiencies of co-location to do so, provided they can prove to the Commission that receipt of critical 17/24 GHz BSS telemetry data will not be subject to disruption. EchoStar also believes that such interference can be avoided by careful frequency planning of the 17 GHz uplink and downlink signals, and believes that this frequency planning can be conducted by the operator alone, within its own earth station complex. Accordingly, we will restate the proposal to require a technical showing to the Commission in the event of co-location of DBS feeder link and 17/24

GHz BSS telemetry earth stations, and seek any further comment on the issue.

33. Shielding. We also seek comment on whether we should impose any additional requirements on either DBS feeder link earth station operators or on 17/24 GHz BSS operators in order to mitigate interference into 17/24 GHz BSS subscriber receiving antennas. We ask whether, as most commenters suggest, a requirement to employ shielding should be adopted in conjunction with any of the approaches discussed above, and if so what form such a requirement might take.

34. Space Path Interference in Reverse Band Operations. The *NPRM* sought comment on how best to manage the problem of space path interference arising when the transmitted signals from 17/24 GHz BSS satellites are received by the feeder link receivers on satellites operating in the DBS service. In addition, the *NPRM* sought comment on the particular instance where applicants sought to locate within the same cluster as co-frequency receiving DBS satellites and asked whether this was feasible at all, and if so what measures might be required to facilitate such co-clustering. The Commission also sought comment on the more general question of locating 17/24 GHz BSS satellites at close distances to co-frequency DBS satellites and asked what measures, including a minimum orbital separation requirement, off-axis EIRP limits, antenna discrimination requirements, or other requirements might be adopted to protect DBS receiving antennas from unacceptable interference. Finally, the *NPRM* sought comment on the particular problem of interference to DBS TT&C transmissions in the 17 GHz band that could result in loss of satellite control. The Commission proposed to require 17/24 GHz BSS space station applicants seeking to co-locate with DBS satellites to make a technical showing demonstrating their ability to sufficiently minimize interference such that adequate margin is maintained in the DBS telecommand links. An analogous requirement was proposed for any future DBS applicant seeking to co-locate with 17/24 BSS satellites to make a similar technical showing demonstrating its ability to maintain sufficient TT&C link margin.

35. Commenters addressing these issues all realize the potential for space path interference between 17/24 GHz BSS and DBS satellites, but generally maintain that co-location is feasible at relatively small orbital separations, typically on the order of a few tenths of a degree. EchoStar asserts that a separation of 0.4 degrees is sufficient, however only if the DBS and 17/24 BSS satellites are operated by the same licensee. EchoStar argues that the risk of interference in such situations is most severe, and is best avoided by assigning space-to-Earth frequencies at that location only to the 17/24 GHz BSS operator that uses these same frequencies in the Earth-to-space direction for its DBS feeder link operations. DIRECTV also believes that co-frequency operation may be possible at small orbital separations, but that this will depend upon a number of factors including the gain toward the GSO of both transmitting and receiving satellites as well as the desired protection level of the DBS system. DIRECTV also believes that given the many uncertainties involved, it is best to permit only operators who control transmissions in both directions at a given location to locate in close proximity as they can best ''self coordinate'' their operations. DIRECTV also suggest that the Commission may want to consider a strict off-axis gain specification for 17/24 GHz BSS satellites wishing to locate within a certain distance of a DBS satellite.

36. SES Americom and Intelsat oppose the idea that 17/24 GHz BSS satellites seeking to operate at the same frequency and location as DBS satellites should only be licensed to the corresponding DBS licensee, arguing that this restriction is unnecessary and unfairly favors incumbent DBS operators. SES Americom believes that spacepath interference issues can be resolved through the use of offset orbital locations and coordination between operators. Similarly, Intelsat believes that a four-degree orbital spacing plan with small offsets in combination with coordination between operators will be sufficient to mitigate spacepath interference issues between closely spaced 17/24 GHz BSS and DBS satellites. In section III. D. of this Order, we require 17/24 GHz BSS satellite licensees to design their satellites to be capable of operating in a four-degree spacing environment. We will license satellites in this band only if they comply with the orbital spacing rules we adopt in this Order.

37. EchoStar also proposes that the spacepath interference into DBS receivers can be managed by establishing a pfd value at the victim (*i.e.*, DBS) receiver above which coordination is required. Specifically, EchoStar proposes a pfd threshold level at the victim satellite receiver of -93 dBW/m^2/24 MHz and derives this value from the ITU 6% $\Delta T/T$ requirement used to determine the need for coordination between Administrations, contained in Appendix 30A of the Radio Regulations. EchoStar also proposes that the Commission should require a minimum separation between DBS and 17/24 GHz BSS satellites of at least 0.2–0.3 degrees, although these parameters might be relaxed in the event of agreement among all affected parties.

38. We concur with EchoStar's proposed approach to managing spacepath interference between 17/24 GHz BSS and DBS satellites by requiring coordination when pfd values are exceeded at the DBS satellite receiver. This approach is consistent with the method used by the ITU, *See* Annex 4 of Appendix 30A of the ITU Radio Regulations, and has proved workable for international coordination of satellite systems. However, as EchoStar notes, its proposed pfd value depends in part on certain assumptions about the DBS off-axis receiving antenna gain and may not afford sufficient to protection to all systems, particularly as DBS off-axis antenna gain patterns are not necessarily well known. Accordingly, in order to protect receiving DBS satellites from unacceptable levels of interference, we propose to adopt an off-axis pfd coordination trigger of -93 dBW/m^2/24 MHz at the DBS receiving antenna. Coordination with affected co-frequency licensees, both existing and planned, would be required in the event that the 17/24 GHz BSS satellite exceeds this level at the DBS receiving antenna; coordination would not be required in cases where no frequency overlap occurs. We seek comment on this proposal and ask whether it is sufficient to protect existing DBS operations from interference, or whether some other approach or additional requirement might better protect DBS receiving antennas from unwanted spacepath interference. We also ask how such a requirement might apply to future DBS operations that might be affected, including in particular any replacement satellites.

39. We also seek comment on the particular information that 17/24 GHz BSS applicants should be required to submit to the Commission. Clearly, reliable information concerning the off-axis transmitting antenna gain of the 17/24 GHz BSS satellite will need to be made available. Presumably this information will need to include all frequencies in the 17.3–17.7(8) GHz range so that any future DBS applicant will also have sufficient information to protect its operations from unwanted interference. We seek comment on what form this information should take (*i.e.*, measured data, charts, graphs). We ask whether off-axis gain in the plane of the GSO is sufficient and over what angular

range it should be provided (*e.g.*, ±30°, ±45° with respect to the plane passing through the x- and y-axes of the satellite.)

40. In its reply comments EchoStar also proposes the Commission adopt a minimum orbital separation between 17/24 GHz BSS and DBS satellites of 0.2–0.3 degrees. SES Americom also believes that an orbital offset of at least 0.2–0.3 degrees is necessary for co-frequency operation of DBS and 17/24 GHz BSS satellites. DIRECTV however indicates that a minimum orbital separation value as small as 0.05 degrees would be sufficient to permit co-frequency operation, provided modest care in satellite antenna design is employed. We seek comment on EchoStar's proposal to require a minimum orbital separation between co-frequency operation of DBS and 17/24 GHz BSS satellites, and we ask what separation value is appropriate should we adopt such a requirement. We also seek comment on whether such a requirement is necessary should we adopt the pfd threshold and coordination requirements discussed above, particularly if, as EchoStar suggests, this separation value might be relaxed by agreement among the affected operators.

41. Finally, the *NPRM* sought comment on our proposal to protect DBS TT&C operations, particularly in recognition of the potential for loss of satellite control. DIRECTV comments on this proposal, asserting that the Commission should allow co-location of 17/24 GHz BSS and DBS space stations only if the affected DBS operator gives its consent, and only if the 17/24 GHz BSS applicant demonstrates its ability to maintain sufficient margin in the DBS telecommand links in the presence of the interfering 17/24 GHz BSS signal. We believe this proposal has merit, for both 17/24 GHz BSS operators seeking to locate in close proximity to DBS satellites, and also in the case where DBS operators may seek to locate in close proximity to established 17/24 BSS GHz satellites. Accordingly, we propose to adopt a requirement that a 17/24 GHz BSS applicant proposing to locate its satellite in the vicinity of a DBS space station make a technical showing to the Commission demonstrating its ability to sufficiently minimize interference into the DBS systems, such that adequate margin is maintained in the DBS telecommand links in the presence of the interfering BSS signal. Similarly we will require that a DBS applicant proposing to locate its satellite in the vicinity of existing 17/24 GHz BSS space station make a technical showing to the Commission demonstrating its ability to maintain sufficient margin in its telecommand links in the presence of the interfering BSS signal. We seek comment on these proposals. We ask under what circumstances such a technical showing should be required, *e.g.*, co-location at less than some minimum distance, or on the basis of a threshold pfd value. We seek comment on whether the threshold pfd level of -93 dBW/m^2/MHz proposed above is also a suitable coordination trigger for DBS telecommand links, or whether some other value might be more appropriate. We also seek comment on the maximum orbital separation distance at which would be appropriate to require such a technical showing.

42. SES Americom also commented on 17/24 GHz BSS interference into DBS telecommand links, stating that issues relating to space path interference can be resolved through offset of orbital locations and coordination between the involved operators with respect to TT&C frequencies. SES Americom also stated that it believes that a frequency separation of as little as 500 kHz is adequate to prevent interference from the beacon of a 17/24 GHz BSS satellite into the command carrier of a DBS space station. We seek comment on whether some minimum frequency separation is required between the signals transmitted by a 17/24 GHz BSS space station and the telecommand frequencies of DBS space station located in close proximity to the 17/24 GHz BSS space station, or a combination of frequency separation and pfd limits, and what the appropriate parameters would be.

43. Conclusion. We adopt a Further Notice of Proposed Rulemaking to seek comment on technical issues related to reverse band operations to address potential interference concerns.

Ex Parte Presentations

44. This proceeding shall be treated as a ''permit-but-disclose'' proceeding in accordance with the Commission's ex parte rules. Persons making oral ex parte presentations are reminded that memoranda summarizing the presentations must contain summaries of the substance of the presentations and not merely a listing of the subjects discussed. More than a one- or two-sentence description of the views and arguments presented is generally required. Other rules pertaining to oral and written presentations are set forth in § 1.1206(b) of the Commission's rules as well.

Paperwork Reduction Act

45. The actions contained herein have been analyzed with respect to the Paperwork Reduction Act of 1995 at the initiation of the Notice of Proposed Rulemaking in this proceeding, and we have previously received approval of the associated information collection requirements from the Office of Management and Budget (OMB) under OMB Control No. 3060–1097. The Report and Order and Further Notice of Proposed Rulemaking does not contain any new or modified ''information collection burden for small business concerns with fewer than 25 employees,'' pursuant to the Small Business Paperwork Relief Act of 2002, Public Law 107–198, see 44 U.S.C. 3506(c)(4).

Initial Regulatory Flexibility Analysis

46. As required by the Regulatory Flexibility Act of 1980, as amended (RFA), the Commission has prepared this present Initial Regulatory Flexibility Analysis (IRFA) of the possible significant economic impact on a substantial number of small entities by the policies and rules proposed in this item, the Establishment of Policies and Service Rules for the Broadcasting-Satellite Service at the 17.3–17.7 GHz Frequency Band and at the 17.7–17.8 GHz Frequency Band Internationally, and at the 24.75–25.25 GHz Frequency Band for Fixed Satellite Services Providing Feeder Links to the Broadcasting-Satellite Service and for the Broadcasting Satellite Service Operating Bi-Directionally in the 17.3–17.8 GHz Frequency Band, Report and Order and Further Notice of Proposed Rulemaking (*R&O and FNPRM*). Written public comments are requested on this IRFA. Comments must be identified as responses to the IRFA and must be filed by the deadlines for comments on the *FNPRM* provided in paragraph 194 of this *NPRM*. The Commission will send a copy of the *FNPRM*, including this IRFA, to the Chief Counsel for Advocacy of the Small Business Administration (SBA). In addition, the *FNPRM* and IRFA (or summaries thereof) will be published in the **Federal Register**.

Need for, and Objectives of, the Proposed Rules

47. The objective of the proposed rules is to address potential interference scenarios which arise in the reverse band operating environment. In the *NPRM*, we sought comment on what measures were needed to address issues concerning reverse band operations. These included measures to mitigate against space-path interference between

DBS and 17/24 GHz BSS satellites (space-path interference) and to protect 17/24 GHz BSS subscribers from DBS feeder links (ground-path interference). The record on these issues is insufficient to develop requirements. While most commenters advocate certain general approaches, we need more information to build on the generalities and derive specific requirements. Thus, we seek further comment on the issues concerning reverse band operations.

48. The two types of interference which might occur in the reverse band operating environment are ground path interference and space path interference. Ground path interference will occur when the signals from transmitting DBS feeder link earth stations operating the 17.3–17.7 GHz band are detected at the receiving earth stations of 17/24 GHz BSS subscribers. This interference will be the most severe in areas surrounding the DBS feeder uplink stations. Space path interference will occur when the transmitted signals from 17/24 GHz BSS satellites are received by the feeder link receivers on satellites operating in the DBS service.

49. In order to mitigate against ground path and space path interference, we are proposing a variety of measures, such as the establishment of protection zones, coordination zones, power level limits, geographic restrictions of earth stations, informational requirements for coordination, and required technical showings.

Legal Basis

50. This *NPRM* is adopted pursuant to sections 1, 4(i), 7(a), 301, 303(c), 303(f), 303(g), 303(r), 303(y), and 308 of the Communications Act of 1934, as amended, 47 U.S.C. 151, 154(i), 154(j), 157(a), 301, 303(c), 303(f), 303(g), 303(r), 303(y), 308.

Description and Estimate of the Number of Small Entities to Which the Proposals Will Apply

51. The RFA directs agencies to provide a description of and, where feasible, an estimate of the number of small entities that may be affected by the rules adopted herein. The RFA generally defines the term ''small entity'' as having the same meaning as the terms ''small business,'' ''small organization,'' and ''small governmental jurisdiction.'' In addition, the term ''small business'' has the same meaning as the term ''small business concern'' under the Small Business Act. A small business concern is one which: (1) Is independently owned and operated; (2) is not dominant in its field of operation; and (3) satisfies any additional criteria established by the Small Business Administration (SBA). Below, we further describe and estimate the number of small entity licensees that may be affected by the adopted rules.

52. Satellite Telecommunications. The SBA has developed a small business size standard for the two broad census categories of ''Satellite Telecommunications'' and ''Other Telecommunications.'' Under both categories, a business is considered small if it has $13.5 million or less in annual receipts. The category of Satellite Telecommunications ''comprises establishments primarily engaged in providing point-to-point telecommunications services to other establishments in the telecommunications and broadcasting industries by forwarding and receiving communications signals via a system of satellites or reselling satellite telecommunications.'' For this category, Census Bureau data for 2002 show that there were a total of 371 firms that operated for the entire year. Of this total, 307 firms had annual receipts of under $10 million, and 26 firms had receipts of $10 million to $24,999,999. Consequently, we estimate that the majority of Satellite Telecommunications firms are small entities that might be affected by our action.

53. The category of Other Telecommunications ''comprises establishments primarily engaged in (1) providing specialized telecommunications applications, such as satellite tracking, communications telemetry, and radar station operations; or (2) providing satellite terminal stations and associated facilities operationally connected with one or more terrestrial communications systems and capable of transmitting telecommunications to or receiving telecommunications from satellite systems.'' For this category, Census Bureau data for 2002 show that there were a total of 332 firms that operated for the entire year. Of this total, 259 firms had annual receipts of under $10 million and 15 firms had annual receipts of $10 million to $24,999,999. Consequently, we estimate that the majority of Other Telecommunications firms are small entities that might be affected by our action.

54. Space Stations (Geostationary). Commission records reveal that there are 44 space station licensees. We do not request nor collect annual revenue information concerning such licensees, and thus are unable to estimate the number of geostationary space station licensees that would constitute a small business under the SBA definition cited above, or apply any rules providing special consideration for geostationary space station licensees that are small businesses.

55. 17 GHz Transmitting Earth Stations. Currently there are approximately 47 operational earth stations in the 17.3–17.7 GHz bands. The Commission does not request or collect annual revenue information, and thus is unable to estimate the number of earth stations that would constitute a small business under the SBA definition.

56. Cellular and Other Wireless Telecommunications. The SBA has developed a small business size standard for Cellular and Other Wireless Telecommunications, which consists of all such firms having 1,500 or fewer employees. According to Census Bureau data for 2002, in this category there were 1,397 firms that operated for the entire year. Of this total, 1,378 firms had employment of 999 or fewer employees, and 19 firms had employment of 1,000 employees or more. Thus, under this category and size standard, the majority of firms can be considered small.

Description of Projected Reporting, Recordkeeping, and Other Compliance Requirements

57. In this Further Notice of Proposed Rulemaking, the Commission invites comment on various issues related to the mitigation of harmful interference in the reverse band operating environment, which is unique to operation in the 17/24 GHz BSS. None of the proposed methods are intended to increase the projected reporting, recordkeeping, and other compliance requirements.

Steps Taken To Minimize Significant Economic Impact on Small Entities, and Significant Alternatives Considered

58. The RFA requires that, to the extent consistent with the objectives of applicable statutes, the analysis shall discuss significant alternatives such as: (1) The establishment of differing compliance or reporting requirements or timetables that take into account the resources available to small entities; (2) the clarification, consolidation, or simplification of compliance and reporting requirements under the rule for small entities; (3) the use of performance, rather than design, standards; and (4) an exemption from coverage of the rule, or any part thereof, for small entities.

59. The measures proposed are necessary to mitigate against space-path interference between DBS and 17/24 GHz BSS satellites (space-path interference) and to protect 17/24 GHz BSS subscribers from DBS feeder links

(ground-path interference). The measures include the establishment of protection zones, coordination zones, power level limits, geographic restrictions of earth stations, and technical showings. We believe that these proposals are the most equitable solutions to the potential interference problems posed by operation in the 17/24 GHz BSS. We seek comment on viable alternatives to these rules or their reporting requirements that would lessen the economic impact on small entities. We also seek comment on the establishment of differing compliance or reporting requirements that take into account the resources available to small entities.

Federal Rules That May Duplicate, Overlap, or Conflict With the Proposed Rules

60. None.

Comment Filing Procedures

61. Pursuant to §§ 1.415 and 1.419 of the Commission's rules, *47 CFR 1.415, 1.419*, interested parties may file comments in response to this *FNPRM* no later than on or before 75 days after **Federal Register** publication. Reply comments to these comments may be filed no later than on or before 105 days after **Federal Register** publication. All pleadings are to reference IB Docket No. 06–123. Comments may be filed using the Commission's Electronic Comment Filing System (ECFS) or by filing paper copies. Parties are strongly encouraged to file electronically. See *Electronic Filing of Documents in Rulemaking Proceedings*, 63 FR 24121 (1998).

62. Comments filed through the ECFS can be sent as an electronic file via the Internet to *http://www.fcc/gov/e-file/ecfs.html.* Parties should transmit one copy of their comments to the docket in the caption of this rulemaking. In completing the transmittal screen, commenters should include their full name, U.S. Postal Service mailing address, and the applicable docket or rulemaking number. Parties may also submit an electronic comment by Internet e-mail. To get filing instructions for e-mail comments, commenters should send an e-mail to *ecfs@fcc.gov* and should include the following words in the body of the message, ''get form <your e-mail address>.'' A sample form and directions will be sent in reply.

63. Parties choosing to file by paper must file an original and four copies of each filing in IB Docket No. 06–123. Filings can be sent by hand or messenger delivery, by commercial overnight courier, or by first-class or overnight U.S. Postal Service mail (although we continue to experience delays in receiving U.S. Postal Service mail). If more than one docket or rulemaking number appears in the caption of this proceeding, commenters must submit two additional copies for each additional docket or rulemaking number. The Commission's mail contractor, Natek, Inc., will receive hand-delivered or messenger-delivered paper filings for the Commission's Secretary at 236 Massachusetts Avenue, NE., Suite 110, Washington, DC 20002. The filing hours at this location are 8 a.m. to 7 p.m. All hand deliveries must be held together with rubber bands or fasteners. Any envelopes must be disposed of before entering the building. Commercial overnight mail (other than U.S. Postal Service Express Mail and Priority Mail) must be sent to 9300 East Hampton Drive, Capitol Heights, MD 20743. U.S. Postal Service first-class mail, Express Mail, and Priority Mail should be addressed to 445 12th Street, SW., Washington, DC 20554. All filings must be addressed to the Commission's Secretary, Office of the Secretary, Federal Communications Commission.

64. Comments submitted on diskette should be on a 3.5 inch diskette formatted in an IBM-compatible format using Word for Windows or compatible software. The diskette should be clearly labeled with the commenter's name, proceeding (including the docket number, in this case, IB Docket No. 06–123), type of pleading (comment or reply comment), date of submission, and the name of the electronic file on the diskette. The label should also include the following phrase ''Disk Copy—Not an Original.'' Each diskette should contain only one party's pleadings, preferably in a single electronic file.

65. All parties must file one copy of each pleading electronically or by paper to each of the following: (1) The Commission's duplicating contractor, Best Copy and Printing, Inc., 445 12th Street, SW., Room CY-B402, Washington, DC 20554, telephone (202) 488–5300, facsimile (202) 488–5563, or via e-mail at *FCC@BCPIWEB.COM.*

66. Comments and reply comments and any other filed documents in this matter may be obtained from Best Copy and Printing, Inc., in person at 445 12th Street, SW., Room CY–B402, Washington, DC 20554, via telephone at (202) 488–5300, via facsimile (202) 488–5563, or via e-mail at *FCC@BCPIWEB.COM.* The pleadings will be also available for public inspection and copying during regular business hours in the FCC Reference Information Center, Room CY-A257, 445 Twelfth Street, SW., Washington, DC 20554 and through the Commission's Electronic Filing System (ECFS) accessible on the Commission's World Wide Web site, *http://www.fcc.gov.*

67. Comments and reply comments must include a short and concise summary of the substantive arguments raised in the pleading. Comments and reply comments must also comply with § 1.49 and all other applicable sections of the Commission's rules. All parties are encouraged to utilize a table of contents, and to include the name of the filing party and the date of the filing on each page of their submission. We also strongly encourage that parties track the organization set forth in this *NPRM* in order to facilitate our internal review process.

68. Commenters who file information that they believe is proprietary may request confidential treatment pursuant to § 0.459 of the Commission's rules. Commenters should file both their original comments for which they request confidentiality and redacted comments, along with their request for confidential treatment. Commenters should not file proprietary information electronically. *See Examination of Current Policy Concerning the Treatment of Confidential Information Submitted to the Commission, Report and Order, 13 FCC Rcd 24816 (1998), Order on Reconsideration, 14 FCC Rcd 20128 (1999).* Even if the Commission grants confidential treatment, information that does not fall within a specific exemption pursuant to the Freedom of Information Act (FOIA) must be publicly disclosed pursuant to an appropriate request. *See 47 CFR 0.461; 5 U.S.C. 552.* We note that the Commission may grant requests for confidential treatment either conditionally or unconditionally. As such, we note that the Commission has the discretion to release information on public interest grounds that does fall within the scope of a FOIA exemption.

69. Accordingly, *it is ordered* that, pursuant to the authority contained in sections 1, 4(i), 4(j), 7(a), 301, 303(c), 303(f), 303(g), 303(r), 303(y), and 308 of the Communications Act of 1934, as amended, 47 U.S.C. 151, 154(i), 154(j), 157(a), 301, 303(c), 303(f), 303(g), 303(r), 303(y), 308, this *Further Notice of Proposed Rulemaking is adopted.*

70. *It is further ordered* that the Commission's Consumer and Governmental Affairs Bureau, Reference Information Center shall send a copy of this *Further Notice Of Proposed Rulemaking*, including the initial regulatory flexibility analysis, to the Chief Counsel for Advocacy of the Small Business Administration, in accordance with section 603(a) of the Regulatory

Flexibility Act, *5 U.S.C. 601, et seq. (1981).*

71. *It is further ordered* that the Commission *shall send* a copy of this *Further Notice of Proposed Rulemaking* in a report to be sent to Congress and the General Accountability Office pursuant to the Congressional Review Act, see 5 U.S.C. 801(a)(1)(A).

FEDERAL COMMUNICATIONS COMMISSION

47 CFR Part 73

[DA 07–3558; MB Docket No. 07–165; RM–11371]

Radio Broadcasting Services; Blanca, CO

AGENCY: Federal Communications Commission.

ACTION: Proposed rule.

SUMMARY: This document requests comments on a petition for rulemaking filed by Kevin J. Youngers requesting the allotment of Channel 249C2 at Blanca, Colorado, as the community's first local aural transmission service. To accommodate the allotment, United States CP, LLC, permittee on Channel 249A at Westcliffe, Colorado, has consented to substitute Channel 269A for Channel 249A at Westcliffe. Channel 249C2 can be allotted at Blanca, Colorado with a site restriction of 6.6 kilometers (4.1 miles) east of the community at coordinates 37–26–35 NL and 105–26–29 WL .

DATES: Comments must be filed on or before October 1, 2007, and reply comments on or before October 16, 2007.

ADDRESSES: Federal Communications Commission, 445 Twelfth Street, SW., Washington, DC 20554. In addition to filing comments with the FCC, interested parties should serve the petitioner's counsel as follows: A. Wray Fitch, Esq., Gammon & Grange, PC, 8280 Greensboro Dr., 7th Floor, McLean, VA 22102–3807.

FOR FURTHER INFORMATION CONTACT: Victoria McCauley, Media Bureau, (202) 418–2180.

SUPPLEMENTARY INFORMATION: This is a synopsis of the Commission's Notice of Proposed Rule Making, MB Docket No. 07–165, adopted August 8, 2007, and released August 10, 2007. The full text of this Commission decision is available for inspection and copying during normal business hours in the FCC's Reference Information Center at Portals II, CY–A257, 445 Twelfth Street, SW, Washington, DC 20554. This document may also be purchased from the Commission's copy contractor, Best Copy and Printing, Inc., Portals II, 445 12th Street, SW., Room CY–B402, Washington, DC 20554, telephone 1–800–378–3160 or *http://www.BCPIWEB.com*.

This document does not contain proposed information collection requirements subject to the Paperwork Reduction Act of 1995, Public Law 104–13. In addition, therefore, it does not contain any proposed information collection burden ''for small business concerns with fewer than 25 employees,'' pursuant to the Small Business Paperwork Relief Act of 2002, Public Law 107–198, *see* 44 U.S.C. 3506(c)(4). Provisions of the Regulatory Flexibility Act of 1980 do not apply to this proceeding.

Members of the public should note that from the time a Notice of Proposed Rule Making is issued until the matter is no longer subject to Commission consideration or court review, all *ex parte* contacts are prohibited in Commission proceedings, such as this one, which involve channel allotments. See 47 CFR 1.1204(b) for rules governing permissible *ex parte* contacts.

For information regarding proper filing procedures for comments, see 47 CFR 1.415 and 1.420.

List of Subjects in 47 CFR Part 73

Radio, Radio broadcasting

For the reasons discussed in the preamble, the Federal Communications Commission proposes to amend 47 CFR Part 73 as follows:

PART 73—RADIO BROADCAST SERVICES

1. The authority citation for part 73 continues to read as follows:

Authority: 47 U.S.C. 154, 303, 334, 336.

§ 73.202 [Amended]

2. Section 73.202(b), the Table of FM Allotments under Colorado is amended by adding Blanca, Channel 249C2.

Federal Communications Commission.

John A. Karousos,

Assistant Chief, Audio Division Media Bureau.

[FR Doc. E7–16568 Filed 8–21–07; 8:45 am]

FEDERAL COMMUNICATIONS COMMISSION

47 CFR Part 73

[DA 07–3561; MB Docket No. 07–163; RM–11385]

Radio Broadcasting Services; Markham, TX

AGENCY: Federal Communications Commission.

ACTION: Proposed rule.

SUMMARY: This document requests comments on a petition for rulemaking filed by Katherine Pyeatt, requesting the allotment of Channel 235A at Markham, Texas, as the community's second local aural transmission service. Channel 235A can be allotted at Markham, Texas, with a site restriction of 12 kilometers (7.5 miles) south at coordinates 28–51–18 NL and 96–02–06 WL .

DATES: Comments must be filed on or before October 1, 2007, and reply comments on or before October 16, 2007.

ADDRESSES: Federal Communications Commission, 445 Twelfth Street, SW., Washington, DC 20554. In addition to filing comments with the FCC, interested parties should serve the petitioner as follows: Katherine Pyeatt, 3500 Maple Avenue, #1320, Dallas, Texas 75219; Gene Bechtel, Esq., Suite 600, 1050 17th Street, NW., Washington, DC 20036 (Petitioner's counsel).

FOR FURTHER INFORMATION CONTACT: Victoria McCauley, Media Bureau, (202) 418–2180.

SUPPLEMENTARY INFORMATION: This is a synopsis of the Commission's Notice of Proposed Rule Making, MB Docket No. 07–163, adopted August 8, 2007, and released August 10, 2007. The full text of this Commission decision is available for inspection and copying during normal business hours in the FCC's Reference Information Center at Portals II, CY–A257, 445 Twelfth Street, SW., Washington, DC 20554. This document may also be purchased from the Commission's copy contractor, Best Copy and Printing, Inc., Portals II, 445 12th Street, SW., Room CY–B402, Washington, DC 20554, telephone 1–800–378–3160 or *http://www.BCPIWEB.com*.

This document does not contain proposed information collection requirements subject to the Paperwork Reduction Act of 1995, Public Law 104–13. In addition, therefore, it does not contain any proposed information collection burden ''for small business concerns with fewer than 25 employees,'' pursuant to the Small Business Paperwork Relief Act of 2002, Public Law 107–198, *see* 44 U.S.C. 3506(c)(4). Provisions of the Regulatory Flexibility Act of 1980 do not apply to this proceeding.

Members of the public should note that from the time a Notice of Proposed Rule Making is issued until the matter is no longer subject to Commission consideration or court review, all *ex parte* contacts are prohibited in Commission proceedings, such as this one, which involve channel allotments. See 47 CFR 1.1204(b) for rules governing permissible *ex parte* contacts.

For information regarding proper filing procedures for comments, see 47 CFR 1.415 and 1.420.

List of Subjects in 47 CFR Part 73

Radio, Radio broadcasting.

For the reasons discussed in the preamble, the Federal Communications Commission proposes to amend 47 CFR Part 73 as follows:

NATIONAL AERONAUTICS AND SPACE ADMINISTRATION

48 CFR Part 33

[FAR Case 2006–031; Docket 2007–0001; Sequence 8]

RIN 9000–AK79

Federal Acquisition Regulation; FAR Case 2006–031, Enhanced Access for Small Business

AGENCIES: Department of Defense (DoD), General Services Administration (GSA), and National Aeronautics and Space Administration (NASA).

ACTION: Proposed rule with request for comments.

SUMMARY: The Civilian Agency Acquisition Council and the Defense Acquisition Regulations Council (Councils) are proposing to amend the Federal Acquisition Regulation (FAR) to implement Section 857 of the John Warner National Defense Authorization Act for Fiscal Year 2007 (Pub. L. 109–364).

DATES: Interested parties should submit written comments to the FAR Secretariat on or before October 22, 2007 to be considered in the formulation of a final rule.

ADDRESSES: Submit comments identified by FAR case 2006–031 by any of the following methods:

• Federal eRulemaking Portal: *http://www.regulations.gov*. Search for any document by first selecting the proper document types and selecting ''Federal Acquisition Regulation'' as the agency of choice. At the ''Keyword'' prompt, type in the FAR case number (for example, FAR Case 2006–031) and click on the ''Submit'' button. You may also search for any document by clicking on the ''Advanced search/document search'' tab at the top of the screen, selecting from the agency field ''Federal Acquisition Regulation'', and typing the FAR case number in the keyword field. Select the ''Submit'' button. Please include any personal and/or business information inside the document.

• Fax: 202–501–4067.

• Mail: General Services Administration, Regulatory Secretariat (VIR), 1800 F Street, NW., Room 4035, ATTN: Laurieann Duarte, Washington, DC 20405.

Instructions: Please submit comments only and cite FAR case 2006–031 in all correspondence related to this case. All comments received will be posted without change to *http://www.regulations.gov*, including any personal and/or business confidential information provided.

FOR FURTHER INFORMATION CONTACT: Ms. Meredith Murphy, Procurement Analyst, at (202) 208–6925 for clarification of content. For information pertaining to status or publication schedules, contact the FAR Secretariat at (202) 501–4755. Please cite FAR case 2006–031.

SUPPLEMENTARY INFORMATION:

A. Background

Section 857 of the John Warner National Defense Authorization Act Fiscal Year 2007 (Pub. L. 109–364) created a higher ceiling for small businesses to use the small claims procedure to appeal a contracting officer's final decision. This proposed rule amends the FAR to add the higher ceiling at 33.211(a)(4)(v).

This is not a significant regulatory action and, therefore, was not subject to review under Section 6(b) of Executive Order 12866, Regulatory Planning and Review, dated September 30, 1993. This rule is not a major rule under 5 U.S.C. 804.

B. Regulatory Flexibility Act

The Councils do not expect this proposed rule to have a significant economic impact on a substantial number of small entities within the meaning of the Regulatory Flexibility Act, 5 U.S.C. 601, *et seq.*, because this proposed rule does not change the rules for buying and does not add an information collection requirement. An Initial Regulatory Flexibility Analysis has, therefore, not been performed. We invite comments from small businesses and other interested parties. The Councils will consider comments from small entities concerning the affected FAR Part 33 in accordance with 5 U.S.C. 610. Interested parties must submit such comments separately and should cite 5 U.S.C. 601, *et seq.* (FAR case 2006–031), in correspondence.

C. Paperwork Reduction Act

The Paperwork Reduction Act does not apply because the proposed changes to the FAR do not impose information collection requirements that require the approval of the Office of Management and Budget under 44 U.S.C. 3501, *et seq.*

List of Subjects in 48 CFR Part 33

Government procurement.

Dated: August 14, 2007

Al Matera,

Director, Office of Acquisition Policy.

Therefore, DoD, GSA, and NASA propose amending 48 CFR part 33 as set forth below:

1. The authority citation for 48 CFR part 33 continues to read as follows:

Authority: 40 U.S.C. 121(c); 10 U.S.C. chapter 137; and 42 U.S.C. 2473(c).

PART 33—PROTESTS, DISPUTES, AND APPEALS

2. Amend section 33.211 by revising paragraph (a)(4) to read as follows:

33.211 Contracting officer's decision.

(a) * * *

(4) Prepare a written decision that shall include a—

(i) A description of the claim or dispute;

(ii) A reference to the pertinent contract terms;

(iii) A statement of the factual areas of agreement and disagreement;

(iv) A statement of the contracting officer's decision, with supporting rationale;

(v) Paragraphs substantially as follows:

''This is the final decision of the Contracting Officer. You may appeal this decision to the agency board of contract appeals. If you decide to appeal, you must, within 90 days from the date you receive this decision, mail or otherwise furnish written notice to the agency board of contract appeals and provide a copy to the Contracting Officer from whose decision this appeal is taken. The notice shall indicate that an appeal is intended, reference this decision, and identify the contract by number. With regard to appeals to the agency board of contract appeals, you may, solely at your election, proceed under the board's—

(1) Small claim procedure for claims of $50,000 or less or, in the case of a small business concern (as defined in the Small Business Act and regulations under that Act), $150,000 or less; or

(2) Accelerated procedure for claims of $100,000 or less.

Instead of appealing to the agency board of contract appeals, you may bring an action directly in the United States Court of Federal Claims (except as provided in the Contract Disputes Act of 1978, 41 U.S.C. 603, regarding Maritime Contracts) within 12 months of the date you receive this decision''; and

(vi) Demand for payment prepared in accordance with 32.610(b) in all cases where the decision results in a finding that the contractor is indebted to the Government.

* * * * *

Federal Register
Vol. 72, No. 162
Wednesday, August 22, 2007

This section of the FEDERAL REGISTER contains documents other than rules or proposed rules that are applicable to the public. Notices of hearings and investigations, committee meetings, agency decisions and rulings, delegations of authority, filing of petitions and applications and agency statements of organization and functions are examples of documents appearing in this section.

DEPARTMENT OF AGRICULTURE

Submission for OMB Review; Comment Request

August 17, 2007.

The Department of Agriculture has submitted the following information collection requirement(s) to OMB for review and clearance under the Paperwork Reduction Act of 1995, Public Law 104–13. Comments regarding (a) whether the collection of information is necessary for the proper performance of the functions of the agency, including whether the information will have practical utility; (b) the accuracy of the agency's estimate of burden including the validity of the methodology and assumptions used; (c) ways to enhance the quality, utility and clarity of the information to be collected; (d) ways to minimize the burden of the collection of information on those who are to respond, including through the use of appropriate automated, electronic, mechanical, or other technological collection techniques or other forms of information technology should be addressed to: Desk Officer for Agriculture, Office of Information and Regulatory Affairs, Office of Management and Budget (OMB), *OIRA_Submission@OMB.EOP.GOV* or fax (202) 395–5806 and to Departmental Clearance Office, USDA, OCIO, Mail Stop 7602, Washington, DC 20250–7602. Comments regarding these information collections are best assured of having their full effect if received within 30 days of this notification. Copies of the submission(s) may be obtained by calling (202) 720–8681.

An agency may not conduct or sponsor a collection of information unless the collection of information displays a currently valid OMB control number and the agency informs potential persons who are to respond to the collection of information that such persons are not required to respond to the collection of information unless it displays a currently valid OMB control number.

Agricultural Marketing Service

Title: Reporting and Recordkeeping Requirements Under Regulations (Other than Rules of Practice) Under the Perishable Agricultural Commodities Act, 1930.

OMB Control Number: 0581–0031.

Summary of Collection: The Perishable Agricultural Commodities Act (PACA) establishes a code of fair trading practices covering the marketing of fresh and frozen fruits and vegetables in interstate or foreign commerce. It protects growers, shippers and distributors by prohibiting unfair practices. PACA requires nearly all persons who operate as commission merchants, dealers (of which now restaurants are a subset) and brokers buying or selling fruit and or vegetables in interstate or foreign commerce to be licensed. The license for retailers and grocery wholesalers is effective for three years and for all other licensees up to three years, unless withdrawn.

Need and Use of the Information: AMS will collect information from the applicant to administer licensing provisions under the Act, to adjudicate contract disputes, and for the purpose of enforcing the PACA and its regulations. If this information were unavailable, it would be impossible to identify and regulate those individuals or firms that are restricted due to sanctions imposed because of the reparation or administrative actions.

Description of Respondents: Business or other for-profit; Farms.

Number of Respondents: 14,686.

Frequency of Responses: Recordkeeping; Reporting: On occasion.

Total Burden Hours: 154,785.

Agricultural Marketing Service

Title: Customer Service Survey for USDA—Donated Food Products.

OMB Control Number: 0581–0182.

Summary of Collection: Each year the Agricultural Marketing Service (AMS) procures about $700 million dollars of poultry, livestock, fruit, and vegetable products for the school lunch and other domestic feeding programs under authority of 7 CFR 250, Regulations for the Donation of Food for Use in the United States, its Territories and possessions and areas under its jurisdiction. To maintain and improve the quality of these products, AMS has sought to make this process more customer-driven and therefore is seeking opinions from the users of these products. AMS will use AMS–11, ''Customer Opinion Postcard,'' to collect information. Customers that use USDA-procured commodities to prepare and serve meals retrieve these cards from the boxes and use them to rate their perception of product flavor, texture, and appearance as well as overall satisfaction.

Need and Use of the Information: AMS will collect information on the product type, production lot, and identify the location and type of facility in which the product was served. USDA program managers will use survey responses to maintain and improve product quality through the revision of USDA commodity specifications and follow-up action with producers of designated production lots.

Description of Respondents: State, Local or Tribal Government; Not-for-profit Institutions.

Number of Respondents: 8,400.

Frequency of Responses: Reporting: On occasion.

Total Burden Hours: 700.

Charlene Parker,

Departmental Information Collection Clearance Officer.

COMMISSION ON CIVIL RIGHTS

Agenda and Notice of Public Meeting of the Hawaii State Advisory Committee

Notice is hereby given, pursuant to the provisions of the rules and regulations of the U.S. Commission on Civil Rights and the regulations of the Federal Advisory Committee Act (FACA), that a planning meeting and briefing of the Hawaii Advisory Committee will convene at 10 p.m. and adjourn at 5 p.m. on Wednesday, September 5, 2007 in the South Pacific Ballroom of the Hilton Hawaiian Village Hotel located at 2005 Kalia Road, in Honolulu, Hawaii. The purpose of the planning meeting is for the committee to consider future projects and the purpose of the briefing is to hear from experts about the ''The Native Hawaiian Government Reorganization Act of 2007.''

Members of the public are entitled to submit written comments; the comments must be received in the Western Regional Office by September 10, 2007. The address is 300 North Los Angeles Street, Suite 2010, Los Angeles, CA 90012. Persons wishing to e-mail their comments, or to present their comments verbally at the meeting, or who desire additional information should contact Angelica Trevino, Secretary, Western Regional Office, U.S. Commission on Civil Rights at (213) 894–3437 [TDY] 213–894–3435, or by e-mail at *atrevino@usccr.gov.*

Hearing impaired persons who will attend the meeting and require the services of a sign language interpreter should contact the Eastern Regional Office at least ten (10) working days before the scheduled date of the planning meeting.

Records generated from this meeting may be inspected and reproduced at the Western Regional Office, as they become available, both before and after the meeting. Persons interested in the work of this advisory committee are advised to go to the Commission's Web site, *http://www.usccr.gov*, or to contact the Eastern Regional Office at the above e-mail or street address.

The meeting will be conducted pursuant to the provisions of the rules and regulations of the Commission and FACA.

Dated at Washington, DC, August 17, 2007.

Ivy L. Davis,

Acting Chief, Regional Programs Coordination Unit.

BILLING CODE 6335–01–P

DEPARTMENT OF COMMERCE

Submission for OMB Review; Comment Request

The Department of Commerce will submit to the Office of Management and Budget (OMB) for clearance the following proposal for collection of information under the provisions of the Paperwork Reduction Act (44 U.S.C. Chapter 35).

Agency: National Telecommunications and Information Administration (NTIA).

Title: Application for the Digital-to-Analog Converter Box Coupon.

Form Number(s): DTV–1.

OMB Approval Number: None.

Type of Review: Regular submission.

Burden Hours: 27,500,000.

Number of Respondents: 110,000,000.

Average Hours Per Response: 15 minutes.

Needs and Uses: NTIA is required to create a program to provide coupons for consumers to purchase digital-to-analog converter boxes. These converter boxes are necessary for consumers who wish to continue receiving broadcast programming over-the-air using analog-only television sets after February 17, 2009—the date that television stations are required by law to cease analog broadcasting. As part of this program, eligible U.S. households may obtain a maximum of two coupons of $40 each (valid for three months after issuance) to be applied towards the purchase of a digital-to-analog converter box(es).

Affected Public: Individuals or households.

Frequency: One-time-only.

Respondent's Obligation: Required to obtain or retain benefits.

OMB Desk Officer: Jasmeet Seehra, (202) 395–3123.

Copies of the above information collection proposal can be obtained by calling or writing Diana Hynek, Departmental Paperwork Clearance Officer, (202) 482–0266, Department of Commerce, Room 6625, 1401 Constitution Avenue, NW., Washington, DC 20230 (or via the Internet at *dHynek@doc.gov*).

Written comments and recommendations for the proposed information collection should be sent within 30 days of publication of this notice to Jasmeet Seehra, OMB Desk

Officer, Fax number, (202) 395–5167 or via the Internet at *Jasmeet_K._Seehra@omb.eop.gov*.

Dated: August 16, 2007.

Gwellnar Banks,

Management Analyst, Office of the Chief Information Officer.

BILLING CODE 3510–60–P

DEPARTMENT OF COMMERCE

International Trade Administration

Proposed Information Collection; Comment Request; Non-Tariff Barriers Survey

ACTION: Notice.

SUMMARY: The Department of Commerce, as part of its continuing effort to reduce paperwork and respondent burdens, invites the general public and other Federal agencies to take this opportunity to comment on the continuing information collections, as required by the Paperwork Reduction Act of 1995, Public Law 104–13 (44 U.S.C. 3506(c)(2)(A)).

DATES: Written comments must be submitted on or before October 22, 2007.

ADDRESSES: Direct all written comments to Diana Hynek, Departmental Paperwork Clearance Officer, Department of Commerce, Room 6625, 14th & Constitution Avenue, NW., Washington, DC 20230 or via the Internet at *DHynek@doc.gov*

FOR FURTHER INFORMATION CONTACT: Request for additional information or copies of the information collection instrument and instructions should be directed to: Marc Lemmond, Manufacturing and Services, Division of Manufacturing, Office of Energy and Environmental Industries, Room 4053; U.S. Department of Commerce, 14th & Constitution Avenue, NW., Washington, DC 20230; Phone number: (202) 482–5225.

SUPPLEMENTARY INFORMATION:

I. Abstract

The International Trade Administration's Office of Energy and Environmental Industries (OEEI) is the principal resource and key contact point within the U.S. Department of Commerce for American energy and environmental technology companies. It's goal is to facilitate and increase exports of energy and environmental technologies, goods and services by providing support and guidance to U.S. exporters. One aspect of increasing exports is to reduce trade barriers and non-tariff measures. OEEI works closely with the Office of the U.S. Trade Representative on trade negotiations and trade liberalization initiatives. The information collected by this survey will be used to support these projects and enable OEEI to maintain a current, up-to-date list of non-tariff measures that create trade barriers for U.S. exports of environmental goods and services.

II. Method of Collection

Electronic submission.

III. Data

OMB Number: 0625–0241.

Form Number: ITA–4150P.

Type of Review: Regular Submission.

Affected Public: Business or other for profit organizations.

Estimated Number of Respondents: 200.

Estimated Time Per Response: 10 minutes.

Estimated Total Annual Burden Hours: 33.

Estimated Total Annual Costs: $7,000.

IV. Request for Comments

Comments are invited on (a) whether the proposed collection of information is necessary for the proper performance of the functions of the agency, including whether the information shall have practical utility; (b) the accuracy of the agency's estimate of the burden (including hours and costs) of the proposed collection of information; (c) ways to enhance the quality, utility, and clarity of the information to be collected; and (d) ways to minimize the burden of the collection of information on respondents, including through the use of automated collection techniques or forms of information technology.

Comments submitted in response to this notice will be summarized and/or included in the request for OMB approval of this information collection; they also will become a matter of public record.

Dated: August 16, 2007.

Gwellnar Banks,

Management Analyst, Office of the Chief Information Officer.

DEPARTMENT OF COMMERCE

International Trade Administration

[A–533–838]

Carbazole Violet Pigment 23 From India: Extension of Time Limit for Preliminary Results of Antidumping Duty Administrative Review

AGENCY: Import Administration, International Trade Administration, Department of Commerce.

DATES: *Effective Date:* August 22, 2007.

FOR FURTHER INFORMATION CONTACT: Yang Jin Chun or Richard Rimlinger, AD/CVD Operations, Office 5, Import Administration, International Trade Administration, U.S. Department of Commerce, 14th Street and Constitution Avenue, NW., Washington, DC 20230; telephone: (202) 482–5760 and (202) 482–4477, respectively.

SUPPLEMENTARY INFORMATION:

Background

At the request of an interested party, the Department of Commerce (the Department) initiated the administrative review of the antidumping duty order on carbazole violet pigment 23 from India for the period December 1, 2005, through November 30, 2006. See *Initiation of Antidumping and Countervailing Duty Administrative Reviews and Request for Revocation in Part,* 72 FR 5005 (February 2, 2007). The preliminary results of the review are currently due no later than September 4, 2007.

Extension of Time Limit for Preliminary Results of Antidumping Duty Administrative Review

Section 751(a)(3)(A) of the Tariff Act of 1930, as amended (the Act), requires the Department to make a preliminary determination within 245 days after the last day of the anniversary month of an order for which a review is requested and a final determination within 120 days after the date on which the preliminary determination is published. If it is not practicable to complete the review within these time periods, section 751(a)(3)(A) of the Act allows the Department to extend the time limit for the preliminary determination to a maximum of 365 days after the last day of the anniversary month.

We determine that it is not practicable to complete the preliminary results of this review within the original time limit because we need additional time to obtain and analyze information regarding constructed value. Therefore, we are extending the time period for issuing the preliminary results of this

review by 45 days until October 19, 2007.

This notice is published in accordance with section 751(a)(3)(A) of the Act and 19 CFR 351.213(h)(2).

Dated: August 16, 2007.

Gary Taverman,

Acting Deputy Assistant Secretary for Import Administration.

DEPARTMENT OF COMMERCE

International Trade Administration

[A–570–893]

Certain Frozen Warmwater Shrimp From the People's Republic of China: Partial Rescission of the 2006/2007 Antidumping Duty Administrative Review

AGENCY: Import Administration, International Trade Administration, Department of Commerce.

DATES: *Effective Date:* August 22, 2007.

FOR FURTHER INFORMATION CONTACT: Anya Naschak, AD/CVD Operations, Office 9, Import Administration, International Trade Administration, U.S. Department of Commerce, 14th Street and Constitution Avenue, NW., Washington, DC 20230; telephone: (202) 482–6375.

Background

On April 6, 2007, the Department of Commerce (''the Department'') published in the **Federal Register** a notice of initiation listing 105 firms for which it received timely, sufficient, requests for an administrative review of this antidumping duty order. See Notice of Initiation of Administrative Reviews of the Antidumping Duty Orders on Certain Frozen Warmwater Shrimp From the Socialist Republic of Vietnam and the People's Republic of China, 72 FR 17095 (April 6, 2007) (''Initiation Notice''). The period of review (''POR'') is February 1, 2006, through January 31, 2007.

On July 5, 2007, as clarified in submissions dated July 13, 2007, and July 30, 2007, the Louisiana Shrimp Association (''LSA'') withdrew its request for an administrative review of the companies listed in Attachment I to this notice. The LSA's clarifications of its withdrawal requests by submissions dated July 13, 2007, and July 30, 2007, are considered timely because the Department requested clarification on the LSA's July 5, 2007, withdrawal requests.

Partial Rescission

Pursuant to 19 CFR 351.213(d)(1), the Department will rescind an administrative review, in whole or in part, if a party who requested the review withdraws the request within ninety days of the date of publication of notice of initiation of the requested review, and may extend this time limit if the Department decides that it is reasonable to do so. See 19 CFR 351.213(d)(1).

For seven of the companies for which the LSA withdrew its request for review, the Department has on the record of this proceeding requests for review by other parties. Therefore, the Department is not rescinding this review for: Allied Pacific (H.K.) Co., Ltd., Allied Pacific Food (Dalian) Co., Ltd., Asian Seafoods (Zhanjiang) Co., Ltd., Hai Li Aquatic Co., Ltd. Zhao An, Fujian, King Royal Investments Ltd., Zhanjiang Allied Pacific Aquaculture Co., Ltd., and Zhanjiang Evergreen Aquatic Product Science and Technology Co., Ltd. Further, the LSA has not withdrawn its request for review for Guolian Aquatic Products or Yelin Enterprise Co., Ltd. Hong Kong; the Department is not rescinding the review with respect to these entities.

Because the LSA's withdrawal of requests for review was timely and no other party requested a review of the companies listed in Attachment II to this notice, in accordance with 19 CFR 351.213(d)(1) we are rescinding this review with respect to these entities.

For those companies that submitted information stating that they did not have any shipments of subject merchandise during the POR, and for which there remains an active request for review, we will evaluate the no-shipment information and may rescind the review for such companies at a later date. With respect to the issues raised by the LSA on the identity of Guolian Aquatic Products and Zhanjiang Guolian Aquatic Products Co., Ltd., the Department will further consider these issues in the preliminary results of review, currently scheduled for October 31, 2007.

Accordingly, the following companies remain subject to this administrative review: Allied Pacific (H.K.) Co. Ltd., Allied Pacific Aquatic Products (Zhanjiang) Co., Ltd., Allied Pacific Food (Dalian) Co., Ltd., Asian Seafoods (Zhanjiang) Co., Ltd., Guolian Aquatic Products, Hai Li Aquatic Co., Ltd. Zhao An, Fujian/Haili Aquatic Co., Ltd. Zhaoan Fujian, King Royal Investments Ltd., Yelin Enterprise Co., Ltd. Hong Kong, Zhanjiang Allied Pacific Aquaculture Co., Ltd., and Zhanjiang Evergreen Aquatic Product Science and Technology Co., Ltd.

Assessment Rates

The Department will instruct U.S. Customs and Border Protection (''CBP'') to assess antidumping duties on all appropriate entries. For those companies for which this review has been rescinded and which have a separate rate, antidumping duties shall be assessed at rates equal to the cash deposit of estimated antidumping duties required at the time of entry, or withdrawal from warehouse, for consumption, in accordance with 19 CFR 351.212(c)(2). The Department intends to issue assessment instructions to CBP 15 days after the date of publication of this notice. For those companies for which this review has been rescinded but do not have a separate rate at this time (and thus remain part of the PRC-wide entity), the Department will issue assessment instructions upon the completion of this administrative review.

Notification to Importers

This notice serves as a final reminder to importers for whom this review is being rescinded, as of the publication date of this notice, of their responsibility under 19 CFR 351.402(f)(2) to file a certificate regarding the reimbursement of antidumping duties prior to liquidation of the relevant entries during this review period. Failure to comply with this requirement could result in the Secretary's presumption that reimbursement of the antidumping duties occurred and the subsequent assessment of double antidumping duties.

Notification Regarding APOs

This notice also serves as a reminder to parties subject to administrative protective orders (''APO'') of their responsibility concerning the return or destruction of proprietary information disclosed under APO in accordance with 19 CFR 351.305, which continues to govern business proprietary information in this segment of the proceeding. Timely written notification of the return/destruction of APO materials or conversion to judicial protective order is hereby requested. Failure to comply with the regulations and terms of an APO is a violation which is subject to sanction.

This notice is issued and published in accordance with section 777(i)(1) of the Act and 19 CFR 351.213(d)(4).

Dated: August 14, 2007.

Gary Taverman,

Acting Deputy Assistant Secretary for Import Administration.

International Trade Administration

[A–570–890]

Amended Final Results of Antidumping Duty Administrative Review and New Shipper Reviews: Wooden Bedroom Furniture From the People's Republic of China

AGENCY: Import Administration, International Trade Administration, Department of Commerce.

SUMMARY: On February 9, 2007, the Department of Commerce (''the Department'') published its preliminary results in the antidumping duty administrative review and new shipper reviews and notice of partial rescission for wooden bedroom furniture from the People's Republic of China. The period of review (''POR'') for the administrative review and the new shipper reviews is June 24, 2004 through December 31, 2005. For the final results of administrative review, see this notice. As a result of an inadvertent error, the version of this notice released on Wednesday, August 8, 2007, contained the appendix from the investigation of this proceeding, rather than the appendix intended for this administrative review. These amended final results correct this error. No changes to the analysis, methodologies employed, or the rates calculated were made. Because this error was discovered prior to publication in the **Federal Register**, this amendment is being published in place of the original version released on August 8, 2007.

In the administrative review, we have determined that all five mandatory respondents (*i.e.*, Fine Furniture (Shanghai) Limited and its affiliates (''Fine Furniture''); Foshan Guanqiu Furniture Co., Ltd. (''Foshan Guanqiu''); Fujian Lianfu Forestry Co./Fujian Wonder Pacific Inc./Fuzhou Huan Mei Furniture Co., Ltd./Jiangsu Dare Furniture Co., Ltd. (''Dare Group''); Shanghai Aosen Furniture Co., Ltd. (''Shanghai Aosen'') and Shanghai Starcorp Furniture Co., Ltd, Starcorp Furniture (Shanghai) Co., Ltd., Orin Furniture (Shanghai) Co., Ltd., Shanghai Star Furniture Co., Ltd., and Shanghai Xing Ding Furniture Industrial Co., Ltd. (collectively, ''Starcorp'')) made sales in the United States at prices below normal value. With respect to the remaining respondents in the administrative review (collectively, ''Separate Rate Applicants''), we have determined that 42 entities have provided sufficient evidence that they are separate from the state-controlled entity, and we have established a weighted-average margin based on the rates we have calculated for the five mandatory respondents, excluding any rates that are zero, *de minimis*, or based entirely on adverse facts available, to be applied to these separate-rate entities. We invited interested parties to comment on our preliminary results of review. For the new shipper reviews, the Department also reviewed two exporters/producers, *i.e.*, Dongguan Huanghouse Furniture Co., Ltd. (''Huanghouse'') and Tianjin First Wood Co., Ltd. (''First Wood''). Based on our analysis of the comments we received, we have made certain changes to our calculations for all mandatory respondents. The final dumping margins for this review are listed in the ''Final Results Margins'' section below.

DATES: *Effective Date:* August 22, 2007.

FOR FURTHER INFORMATION CONTACT: Gene Degnan or Robert Bolling, Import Administration, International Trade Administration, U.S. Department of Commerce, 14th Street and Constitution Avenue, NW., Washington, DC 20230; telephone: (202) 482–0414 and (202) 482–3434, respectively.

Background

The Department published its preliminary results on February 9, 2007. *See Wooden Bedroom Furniture from the People's Republic of China: Preliminary Results of Antidumping Duty Administrative Review, Preliminary Results of New Shipper Reviews and Notice of Partial Rescission*, 72 FR 6201 (February 9, 2007) (''*Preliminary Results*''). The Department conducted verification of two of the mandatory respondents' and certain Separate-Rate Applicants' data in the People's Republic of China (''PRC''). *See* Verification section, below, for additional information.

On June 12, 2007, the Department extended the deadline for the final results of review to August 8, 2007. *See Wooden Bedroom Furniture from the People's Republic of China: Extension of Time Limits for the Final Results of the Antidumping Duty Administrative Review and New Shipper Reviews*, 72 FR 32281 (June 12, 2007).

We invited parties to comment on the *Preliminary Results*. We received comments from the Petitioners, certain mandatory respondents, certain Separate-Rate Applicants, and other interested parties to this review. On June 18, 2007, parties submitted case briefs. On June 26, 2007, parties submitted rebuttal briefs. On July 12, 2007, the Department held public and closed hearings.

Analysis of Comments Received

All issues raised in the case and rebuttal briefs by parties in this review are addressed in the memorandum from Stephen J. Claeys, Deputy Assistant Secretary for Import Administration, to David M. Spooner, Assistant Secretary for Import Administration, ''Issues and Decision Memorandum for the Final Results of the Antidumping Duty Administrative Review and New Shipper Reviews on Wooden Bedroom Furniture from the People's Republic of China,'' Issues and Decision Memorandum, dated August 8, 2007, which is hereby adopted by this notice (''Issues and Decision Memorandum''). A list of the issues which parties raised and to which we respond in the Issues and Decision Memorandum is attached to this notice as an Appendix. The Issues and Decision Memorandum is a public document and is on file in the Central Records Unit (''CRU''), Main Commerce Building, Room B–099, and is accessible on the Web at *http://ia.ita.doc.gov/frn*. The paper copy and electronic version of the memorandum are identical in content.

Period of Review

The POR is June 24, 2004 through December 31, 2005.

Scope of Order

The product covered by the order is wooden bedroom furniture. Wooden bedroom furniture is generally, but not

exclusively, designed, manufactured, and offered for sale in coordinated groups, or bedrooms, in which all of the individual pieces are of approximately the same style and approximately the same material and/or finish. The subject merchandise is made substantially of wood products, including both solid wood and also engineered wood products made from wood particles, fibers, or other wooden materials such as plywood, oriented strand board, particle board, and fiberboard, with or without wood veneers, wood overlays, or laminates, with or without non-wood components or trim such as metal, marble, leather, glass, plastic, or other resins, and whether or not assembled, completed, or finished.

The subject merchandise includes the following items: (1) Wooden beds such as loft beds, bunk beds, and other beds; (2) wooden headboards for beds (whether stand-alone or attached to side rails), wooden footboards for beds, wooden side rails for beds, and wooden canopies for beds; (3) night tables, night stands, dressers, commodes, bureaus, mule chests, gentlemen's chests, bachelor's chests, lingerie chests, wardrobes, vanities, chessers, chifforobes, and wardrobe-type cabinets; (4) dressers with framed glass mirrors that are attached to, incorporated in, sit on, or hang over the dresser; (5) chests-on-chests, [1] highboys, [2] lowboys, [3] chests of drawers, [4] chests, [5] door chests, [6] chiffoniers, [7] hutches, [8] and armoires; [9] (6) desks, computer stands, filing cabinets, book cases, or writing tables that are attached to or incorporated in the subject merchandise; and (7) other bedroom furniture consistent with the above list.

The scope of the order excludes the following items: (1) Seats, chairs, benches, couches, sofas, sofa beds, stools, and other seating furniture; (2) mattresses, mattress supports (including box springs), infant cribs, water beds, and futon frames; (3) office furniture, such as desks, stand-up desks, computer cabinets, filing cabinets, credenzas, and bookcases; (4) dining room or kitchen furniture such as dining tables, chairs, servers, sideboards, buffets, corner cabinets, china cabinets, and china hutches; (5) other non-bedroom furniture, such as television cabinets, cocktail tables, end tables, occasional tables, wall systems, book cases, and entertainment systems; (6) bedroom furniture made primarily of wicker, cane, osier, bamboo or rattan; (7) side rails for beds made of metal if sold separately from the headboard and footboard; (8) bedroom furniture in which bentwood parts predominate [10]; (9) jewelry armories [11]; (10) cheval mirrors [12]; (11) certain metal parts [13];(12) mirrors that do not attach to, incorporate in, sit on, or hang over a dresser if they are not designed and marketed to be sold in conjunction with a dresser as part of a dresser-mirror set; and (13) upholstered beds. [14]

Imports of subject merchandise are classified under subheading 9403.50.9040 of the HTSUS as ''wooden * * * beds'' and under subheading 9403.50.9080 of the HTSUS as ''other * * * wooden furniture of a kind used in the bedroom.'' In addition, wooden headboards for beds, wooden footboards for beds, wooden side rails for beds, and wooden canopies for beds may also be entered under subheading 9403.50.9040 of the HTSUS as ''parts of wood'' and framed glass mirrors may also be entered under subheading 7009.92.5000 of the HTSUS as ''glass mirrors * * * framed.'' This order covers all wooden bedroom furniture meeting the above description, regardless of tariff classification. Although the HTSUS subheadings are provided for convenience and customs purposes, our written description of the scope of this proceeding is dispositive.

[1] A chest-on-chest is typically a tall chest-of-drawers in two or more sections (or appearing to be in two or more sections), with one or two sections mounted (or appearing to be mounted) on a slightly larger chest; also known as a tallboy.

[2] A highboy is typically a tall chest of drawers usually composed of a base and a top section with drawers, and supported on four legs or a small chest (often 15 inches or more in height).

[3] A lowboy is typically a short chest of drawers, not more than four feet high, normally set on short legs.

[4] A chest of drawers is typically a case containing drawers for storing clothing.

[5] A chest is typically a case piece taller than it is wide featuring a series of drawers and with or without one or more doors for storing clothing. The piece can either include drawers or be designed as a large box incorporating a lid.

[6] A door chest is typically a chest with hinged doors to store clothing, whether or not containing drawers. The piece may also include shelves for televisions and other entertainment electronics.

[7] A chiffonier is typically a tall and narrow chest of drawers normally used for storing undergarments and lingerie, often with mirror(s) attached.

[8] A hutch is typically an open case of furniture with shelves that typically sits on another piece of furniture and provides storage for clothes.

[9] An armoire is typically a tall cabinet or wardrobe (typically 50 inches or taller), with doors, and with one or more drawers (either exterior below or above the doors or interior behind the doors), shelves, and/or garment rods or other apparatus for storing clothes. Bedroom armoires may also be used to hold television receivers and/or other audio-visual entertainment systems.

[10] As used herein, bentwood means solid wood made pliable. Bentwood is wood that is brought to a curved shape by bending it while made pliable with moist heat or other agency and then set by cooling or drying. See Customs' Headquarters' Ruling Letter 043859, dated May 17, 1976.

[11] Any armoire, cabinet or other accent item for the purpose of storing jewelry, not to exceed 24'' in width, 18'' in depth, and 49'' in height, including a minimum of 5 lined drawers lined with felt or felt-like material, at least one side door (whether or not the door is lined with felt or felt-like material), with necklace hangers, and a flip-top lid with inset mirror. *See* Issues and Decision Memorandum from Laurel LaCivita to Laurie Parkhill, Office Director, Concerning Jewelry Armoires and Cheval Mirrors in the Antidumping Duty Investigation of Wooden Bedroom Furniture from the People's Republic of China, dated August 31, 2004. *See also Wooden Bedroom Furniture from the People's Republic of China: Notice of Final Results of Changed Circumstances Review and Revocation in Part*, 71 FR 38621 (July 7, 2006).

[12] Cheval mirrors are, *i.e.*, any framed, tiltable mirror with a height in excess of 50'' that is mounted on a floor-standing, hinged base. Additionally, the scope of the order excludes combination cheval mirror/jewelry cabinets. The excluded merchandise is an integrated piece consisting of a cheval mirror, *i.e.*, a framed tiltable mirror with a height in excess of 50 inches, mounted on a floor-standing, hinged base, the cheval mirror serving as a door to a cabinet back that is integral to the structure of the mirror and which constitutes a jewelry cabinet lined with fabric, having necklace and bracelet hooks, mountings for rings and shelves, with or without a working lock and key to secure the contents of the jewelry cabinet back to the cheval mirror, and no drawers anywhere on the integrated piece. The fully assembled piece must be at least 50 inches in height, 14.5 inches in width, and 3 inches in depth. *See Wooden Bedroom Furniture From the People's Republic of China: Final Results of Changed Circumstances Review and Determination To Revoke Order in Part*, 72 FR 948 (January 9, 2007).

[13] Metal furniture parts and unfinished furniture parts made of wood products (as defined above) that are not otherwise specifically named in this scope (*i.e.*, wooden headboards for beds, wooden footboards for beds, wooden side rails for beds, and wooden canopies for beds) and that do not possess the essential character of wooden bedroom furniture in an unassembled, incomplete, or unfinished form. Such parts are usually classified under the Harmonized Tariff Schedule of the United States (''HTSUS'') subheading 9403.90.7000.

[14] Upholstered beds that are completely upholstered, *i.e.*, containing filling material and completely covered in sewn genuine leather, synthetic leather, or natural or synthetic decorative fabric. To be excluded, the entire bed (headboards, footboards, and side rails) must be upholstered except for bed feet, which may be of wood, metal, or any other material and which are no more than nine inches in height from the floor. *See Wooden Bedroom Furniture from the People's Republic of China: Final Results of Changed Circumstances Review and Determination to Revoke Order in Part*, 72 FR 7013 (February 14, 2007).

Verification

As provided in section 782(i) of the Tariff Act of 1930, as amended (''Act''), we verified the information submitted by certain mandatory respondents and certain Separate-Rate Applicants for use in our final results. *See* the Department's verification reports on the record of this review in the CRU with respect to Shanghai Aosen; Starcorp; Baigou Crafts Factory of Fengkai (''Baigou Crafts''); Dongguan Dihao Furniture Co., Ltd. (''Dihao''); and Transworld (Zhangzhou) Furniture Co., Ltd. (''Transworld''). For all verified companies, we used standard verification procedures, including examination of relevant accounting and production records, as well as original source documents provided by respondents. For the further details on the verifications, *see* the aforementioned verification reports.

Changes Since the Preliminary Results

Based on an analysis of comments received, the Department has made certain changes in the margin calculations. For the final results, the Department has made the following changes with respect to Shanghai Aosen, Dare Group, Foshan Guanqui, Starcorp, and Fine Furniture.

General Issues

Calculation of Surrogate Financial Ratios

• For the final results, the Department is no longer using the Nizamuddin Furnitures Private Limited 2004–2005 financial statement in the calculation of the surrogate financial ratios. *See* Issues and Decision Memorandum.

• For the final results, the Department is using the following additional financial statements (not used in the preliminary results) to calculate surrogate financial ratios: (1) Nizamuddin Furnitures Private Limited (2005–2006); (2) James Andrew Newton Art Export Pvt. Ltd. (2004–2005); (3) Nikhil Decore Industries Pvt. Ltd. (2004–2005); and (4) Indian Furniture Products Limited (2005–2006). *See* Issues and Decision Memorandum at Comment 17, and ''First Administrative Review of Wooden Bedroom Furniture from the People's Republic of China: Factor Valuation Memorandum for the Final Results'' dated August 8, 2007 (''WBF Final Factor Valuation Memorandum'').

• For the final results, in the calculation of Akriti Perfections India Pvt. Ltd.'s surrogate financial ratios, the Department has reclassified ''Consumables'' from raw material to manufacturing overhead. *See* Issues and Decision Memorandum at Comment 21, and WBF Final Factor Valuation Memorandum.

• For the final results, the Department has excluded ''Octroi'' expenses from the calculation of Huzaifa Furniture Industries Pvt. Ltd.'s surrogate financial ratios. *See* Issues and Decision Memorandum at Comment 25.

• For the final results, the Department has included the line-item ''Contract Manufacturing'' in manufacturing overhead of Ahuja Furnishers Private Limited's surrogate financial ratios. *See* Issues and Decision Memorandum at Comment 18, and WBF Final Factor Valuation Memorandum.

• For the final results, the Department has re-classified ''Bonuses'' and ''Gratuities'' from manufacturing overhead or selling, general and administrative expenses to the direct labor portion of Materials, Labor and Energy (''ML&E'') in the calculation of surrogate financial ratios for Ahuja Furnishers Private Limited, Huzaifa Furniture Industries Pvt. Ltd., and Indian Furniture Products Limited. *See* Issues and Decision Memorandum at Comment 20 and WBF Final Factor Valuation Memorandum.

• For the final results, the Department has included ''Closing Stock'' and ''Opening Stock'' in the material portion of ML&E in the calculation of Fusion Design Private Ltd.'s surrogate financial ratios. *See* Issues and Decision Memorandum at Comment 23, and WBF Final Factor Valuation Memorandum.

Recalculation of Surrogate Values

• For the final results, the Department has recalculated surrogate values for the polymers of styrene, cardboard, paint, and resin. *See* Issues and Decision Memorandum at Comments 10, 13, 14, 47, and 48 and WBF Final Factor Valuation Memorandum.

• For the final results, the Department has calculated a surrogate value for mirrors using *Glass Yug* instead of the *Monthly Statistics of the Foreign Trade of India, Volume II: Imports. See http://www.gtis.com/wta.htm*, which we used for the preliminary results. *See* Issues and Decision Memorandum at Comment 12 and WBF Final Factor Valuation Memorandum.

• For the final results, the Department has recalculated the surrogate value for labor using the surrogate value of $0.83 per hour instead of $0.97 per hour used for the preliminary results. *See* Issues and Decision Memorandum at Comment 17 and WBF Final Factor Valuation Memorandum.

Company-Specific Issues

Dare Group

• For the final results, the Department has revised the Harmonized Tariff Schedule (''HTS'') category used to calculate the surrogate value for cardboard. *See* Issues and Decision Memorandum at Comment 34 and WBF Final Factor Valuation Memorandum.

• For the final results, the Department has revised certain assessment rate calculations. *See* Issues and Decision Memorandum at Comment 36 and ''Analysis Memorandum for the Final Results of Administrative Review of Wooden Bedroom Furniture from the People's Republic of China for Fujian Lianfu Forestry Co., Ltd., Fuzhou Huan Mei Furniture Co. Ltd., and Jiangsu Dare Furniture Co, Ltd.'' dated (August 8, 2007) (''WBF Dare Group Final Results Analysis Memo 08/08/07'').

• For the final results, the Department has excluded certain non-scope merchandise from the margin calculation. *See* Issues and Decision Memorandum at Comment 37 and WBF Dare Group Final Results Analysis Memo 08/08/07.

• For the final results, the Department is using a material-specific conversion rate to calculate surrogate values for ''FIBERBOARDMD'', ''PAPEREDFIBERBOARDMD'', and ''FIBERBOARDPACKING.'' *See* Issues and Decision Memorandum at Comment 40 and WBF Dare Group Final Results Analysis Memo 08/08/07.

• For the final results, the Department has corrected a conversion error in the calculation of the surrogate values for ''WOODPLUG'' and ''OKOUEMEVEMEER.'' *See* Issues and Decision Memorandum at Comments 41 and 42 and WBF Dare Group Final Results Analysis Memo 08/08/07.

• For the final results, the Department is using data from a different HTS category to calculate the surrogate value of ''PIGMENT_O''. *See* Issues and Decision Memorandum at Comment 31 and WBF Dare Group Final Results Analysis Memo 08/08/07.

• For the final results, the Department is using updated quantity data submitted by Dare Group and is no longer applying facts available to certain sales where Dare Group reported zero quantity in gross unit kilograms. *See* Issues and Decision Memorandum at Comment 39 and WBF Dare Group Final Results Analysis Memo 08/08/07.

• In the preliminary results, the Department used partial adverse facts available (''AFA'') to value the indirect and packing labor which was not reported for certain control numbers (''CONNUMs''). For the final results, the

Department is continuing to apply as partial AFA the highest labor values reported by Dare Group for any CONNUM. *See* ''Application of Partial Facts Available'' section, below, the Issues and Decision Memorandum at Comment 38, and WBF Dare Group Final Results Analysis Memo 08/08/07.

Fine Furniture

• For the final results, the Department has determined not to apply partial facts available with respect to certain of Fine Furniture's sample sales. With respect to Fine Furniture's sample sales, we are using Fine Furniture's reported data in our margin calculation. *See* ''Analysis Memorandum for the Final Results of the First Administrative Review of Wooden Bedroom Furniture from the People's Republic of China: Fine Furniture (Shanghai) Limited'' dated August 8, 2007.

Foshan Guanqiu

• For the final results, the Department has recalculated surrogate values for resin and paint used by Foshan Guanqiu. *See* Issues and Decision Memorandum at Comments 47 and 48, and ''Analysis Memorandum for the Final Results of the First Administrative Review of Wooden Bedroom Furniture from the People's Republic of China: Foshan Guanqiu'' dated August 8. 2007.

Starcorp

• For the preliminary results, we calculated a dumping margin of 74.69 percent for Starcorp, using partial adverse facts available. However, for the final results, we are applying total AFA. *See* Adverse Facts Available section, below. *See also* Issues and Decision Memorandum at Comment 63, and the companion Memorandum regarding ''Application of Adverse Facts Available for Shanghai Starcorp Funiture Co., Ltd, Starcorp Furniture (Shanghai) Co., Ltd., Orin Furniture (Shanghai) Co., Ltd., Shanghai Star Furniture Co., Ltd., and Shanghai Xing Ding Furniture Industrial Co., Ltd. in the Final Results of Antidumping Duty Administrative Review of Wooden Bedroom Furniture from the People's Republic of China,'' dated August 8, 2007 (''Starcorp AFA Memorandum'').

Surrogate Country

In the preliminary results, the Department stated that it treats the PRC as a non-market economy (''NME'') country, and therefore, the Department calculated normal value in accordance with section 773(c) of the Act, which applies to NME countries. Also, the Department stated that it selected India as the appropriate surrogate country to use in this review for the following reasons: (1) India is at a level of economic development comparable to that of the PRC; (2) India is a significant producer of comparable merchandise; and (3) India provides the best opportunity to use quality, publicly available data to value the factors of production (''FOP''). *See Preliminary Results,* 72 FR at 6208. For the final results, the Department has made no changes to its findings with respect to the selection of a surrogate country. *See* Issues and Decision Memorandum at Comment 1.

Separate Rates

In proceedings involving NME countries, the Department begins with a rebuttable presumption that all companies within the country are subject to government control and, thus, should be assigned a single antidumping duty deposit rate (''PRC-wide rate''). It is the Department's policy to assign all exporters of merchandise subject to review in an NME country this single rate unless an exporter can demonstrate that it is free of *de jure* (in law) and *de facto* (in fact) control over its export decisions, so as to be entitled to a separate rate.

In the *Preliminary Results,* the Department found that the mandatory respondents and numerous companies which provided responses to the separate-rate application or separate-rate certification were eligible for a rate separate from the PRC-wide rate. *See Preliminary Results,* 72 FR at 6208, 6210. For the final results, we have determined that additional companies qualify for separate-rate status. For a complete listing of all the companies that received a separate rate, see the Final Results Margins section, below. *See* also, Memorandum regarding ''Wooden Bedroom Furniture from the People's Republic of China: Separate Rates for Producers/Exporters that Submitted Separate Rate Certifications and Applications'' (''Final Separate-Rates Memo''), dated August 8, 2007.

In the *Preliminary Results,* we did not grant separate-rate status for 14 companies. *See Preliminary Results* 72 FR at 6209, 6210. Of those, we stated that we would request additional information from six applicants after the *Preliminary Results,* whereupon we would reevaluate their eligibility for a separate rate for the final results. *See Preliminary Results* 72 FR at 6210. Also, three additional companies (*i.e.,* Zhejiang Niannian Hong Industrial Co. Ltd. (''Nanaholy''); Triple J Enterprises Co. Ltd. (''Triple J''), Zhongshan Winny Furniture Ltd. (''Winny'')) filed post-preliminary submissions asking that the Department reconsider its preliminary decision to deny them separate-rate status. *See* Final Separate-Rates Memo.

Based on the information submitted in response to our post-preliminary supplemental questionnaires, we find that Guangdong New Four Seas Furniture Manufacturing Ltd.; King Kei Furniture Factory/King Kei Trading Co., Ltd./Jin Ching Trading Co. Ltd.; and Top Art Furniture Factory/Sanxig Top Art Funiture/Ngai Kun Trading have provided sufficient information to establish an absence of government control and eligibility for separate-rate status. Therefore, the evidence placed on the record of this administrative review by these separate-rate respondents demonstrates an absence of government control, both in law and in fact, with respect to each of the exporter's exports of the subject merchandise, in accordance with the criteria identified in *Final Determination of Sales at Less Than Fair Value: Sparklers from the People's Republic of China,* 56 FR 20588 (May 6, 1991), and *Final Determination of Sales at Less Than Fair Value: Silicon Carbide from the People's Republic of China,* 59 FR 22585 (May 2,1994). As a result, for the purposes of these final results, we have granted separate rate status to the above-named separate-rate applicants that shipped wooden bedroom furniture to the United States during the POR. Additionally, we have granted a separate rate to other separate-rate applicants.[15] *See* Final Separate-Rates Memo.

[15] Ace Furniture & Crafts Ltd. (a.k.a. Deqing Ace Furniture & Crafts Limited); Baigou Crafts Factory of Fengkai; Best King International Ltd.; Dalian Pretty Home Furniture; Decca Furniture Limited; Der Cheng Wooden Works of Factory; Dongguan Dihao Furniture Co., Ltd.; Dongguan Hua Ban Furniture Co., Ltd.; Dongguan Mingsheng Furniture Co., Ltd.; Dongguan New Technology Import & Export Co., Ltd.; Dongguan Sunpower Enterprise Co., Ltd.; Dongguan Yihaiwei Furniture Limited; Kalanter (Hong Kong) Furniture Company Limited; Foshan Guanqiu Furniture Co., Ltd.; Fujian Lianfu Forestry Co., Ltd./Fujian Wonder Pacific Inc.; Furnmart Ltd.; Fuzhou Huan Mei Furniture Co. Ltd.; Guangdong New Four Seas Furniture Manufacturing Ltd.; Guangzhou Lucky Furniture Co. Ltd.; Hong Yu Furniture (Shenzhen) Co. Ltd.; Hung Fai Wood Products Factory, Ltd.; Hwang Ho International Holdings Limited; Jiangsu Dare Furniture Co, Ltd.; King Kei Furniture Factory; Kingwood Furniture Co. Ltd.; Meikangchi Nantong Furniture Company Ltd.; Nantong Yangzi Furniture Co., Ltd.; Po Ying Industrial Co.; Profit Force Ltd.; Qingdao Beiyuan-Shengli Furniture Co., Ltd.; Qingdao Shenchang Wooden Co., Ltd.; Red Apple Trading Co. Ltd.; Shanghai Aosen Furniture Co., Ltd.; Starcorp Furniture Co., Ltd., Starcorp Furniture (Shanghai) Co., Ltd., Orin Furniture (Shanghai) Co., Ltd., Shanghai Star Furniture Co., Ltd., and Shanghai Xing Ding Furniture Industrial Co., Ltd. (collectively ''Starcorp''); Shenyang Kunyu Wood Industry Co., Ltd.; Shenzhen Dafuhao Industrial Development Co., Ltd.; Shenzhen Shen Long Hang Industry Co., Ltd.; Sino Concord

Furthermore, we continue to find that the following separate-rate applicants have not demonstrated an absence of government control over their export activities, both in law and in fact: Conghua J. L. George Timber & Co. Ltd. (''Conghua''); Zhongshan Youcheng Wooden Arts & Crafts Co., Ltd. (''ZY Wooden'') and Macau Youcheng Trading Co. (''MY Trading'') (collectively, ''ZY Wooden/MY Trading''); Kunwa Enterprise Company (''Kunwa''), Nanaholy; Triple J, Winny, Kong Fong Art Factory and Kong Fong Mao Iek Hong (''Kong Fong''), Putian Ou Dian Furniture Co., Ltd. (''Putian''), and Speedy International, Ltd. (''Speedy''). Therefore, we determine that Conghua, Kunwa, Nanaholy, Triple J, Winny, ZY Wooden/MY Trading, Kong Fong, Putian, and Speedy are part of the PRC-wide entity and, therefore, do not qualify for a separate rate and will be subject to PRC-wide rate. *See* Final Separate-Rates Memo.

The margin we calculated in the *Preliminary Results* for these separate-rate companies was 62.94 percent. Because the rates of the selected mandatory respondents have changed since the *Preliminary Results,* we have recalculated the rate for Separate-Rate Applicants. The final rate is 35.38 percent. *See* Memorandum to the File from Eugene Degnan, ''Calculation of Separate Rate,'' dated August 8, 2007.

Affiliation

In the *Preliminary Results,* we stated Fujian Lianfu Forestry Co. Ltd./Fujian Wonder Pacific Inc./Fuzhou Huan Mei Furniture Co., Ltd./Jiangsu Dare Furniture Co., Ltd., collectively, (''Dare Group'') were affiliated pursuant to sections 771(33)(A), (E) and (F) of the Act and that these companies should be treated as a single entity for the purposes of the antidumping administrative review of wooden bedroom furniture from the PRC. *See Preliminary Results,* 72 FR at 6208. For the final results, we have made no changes to our findings with respect to Dare Group's affiliation.

Adverse Facts Available

Sections 776(a)(1) and (2) of the Act provide that the Department shall apply ''facts otherwise available'' if necessary information is not on the record or an interested party or any other person (A) withholds information that has been requested, (B) fails to provide information within the deadlines established, or in the form and manner requested by the Department, subject to subsections (c)(1) and (e) of section 782, (C) significantly impedes a proceeding, or (D) provides information that cannot be verified as provided by section 782(i) of the Act.

Where the Department determines that a response to a request for information does not comply with the request, section 782(d) of the Act provides that the Department will so inform the party submitting the response and will, to the extent practicable, provide that party the opportunity to remedy or explain the deficiency. If the party fails to remedy the deficiency within the applicable time limits and subject to section 782(e) of the Act, the Department may disregard all or part of the original and subsequent responses, as appropriate. Section 782(e) of the Act provides that the Department ''shall not decline to consider information that is submitted by an interested party and is necessary to the determination but does not meet all applicable requirements established by the administering authority'' if the information is timely, can be verified, is not so incomplete that it cannot be used, and if the interested party acted to the best of its ability in providing the information. Where all of these conditions are met, the statute requires the Department to use the information if it can do so without undue difficulties.

Section 776(b) of the Act further provides that the Department may use an adverse inference in applying the facts otherwise available when a party has failed to cooperate by not acting to the best of its ability to comply with a request for information. Section 776(b) of the Act also authorizes the Department to use as AFA information derived from the petition, the final determination, a previous administrative review, or other information placed on the record.

Application of Facts Available

First Wood

In the *Preliminary Results,* we determined pursuant to sections 776(a)(1), 776(a)(2), and 776(b) of the Act to apply AFA to First Wood in the new shipper review because First Wood: withheld the sales and cost reconciliations as well as extensive factors of production (''FOP'') data requested by the Department; failed to provide the units of measure for its FOP consumption in a form or manner requested by the Department; reported its FOP consumption in units of measure in a manner that does not allow the Department to identify the actual consumption rates or calculate the value for the FOP consumed in the production of subject merchandise, thereby significantly impeding the proceeding, resulting in the sales and FOP data being unverifiable. *See Preliminary Results,* 72 FR at 6212–13. We also determined that First Wood did not act ''to the best of its ability,'' as required by the statute. *See Preliminary Results,* 72 FR at 6212–13. Thus, based on First Wood's actions, we preliminarily determined that it failed to cooperate to the best of its ability in responding to the Department's requests for information. Therefore, we preliminarily determined that, when selecting from among the facts otherwise available, an adverse inference is warranted for First Wood pursuant to section 776(b) of the Act. *See Preliminary Results,* 72 FR at 6212, 6213. For the final results, we have made no changes to our findings with respect to First Wood's total AFA determination. *See* Issues and Decision Memorandum at Comments 43 and 44.

Huanghouse

In the *Preliminary Results,* we determined that because Huanghouse ceased participating in the new shipper review, and none of its submitted information could be verified, Huanghouse did not demonstrate its entitlement to a separate rate and was, therefore, subject to the PRC-wide rate. *See Preliminary Results,* 72 FR at 6212–13. For the final results, we made no changes to our findings with respect to Huanghouse's determination.

Kong Fong Art Factory and Kong Fong Mao Iek Hong

In the *Preliminary Results,* we determined that because Kong Fong ceased participating in the administrative review and would not provide a response to the Department's supplemental questionnaire, Kong Fong did not demonstrate its entitlement to a separate rate and was, therefore, subject to the PRC-wide rate. *See Preliminary Results,* 72 FR at 6210–12. For the final results, we made no changes to our findings with respect to Huanghouse's determination.

Putian Ou Dian Furniture Co., Ltd.

In the *Preliminary Results,* we determined that because Putian submitted a withdrawal of its request for the administrative review after the 90-day regulatory deadline (*i.e.*, November 30, 2006), and stated that it would not provide a response to the Department's

International Corporation; T.J. Maxx International Co. Ltd.; Top Art Furniture Factory/Sanxig Top Art Funiture/Ngai Kun Trading; Top Goal Development Co.; Transworld (Zhangzhou) Furniture Co. Ltd.; Wan Bao Chen Group Hong Kong Co. Ltd.; Winmost Enterprises Limited; Xilinmen Group Co. Ltd.; Yongxin Industrial (Holdings) Limited; Zhongshan Gainwell Furniture Co. Ltd.

supplemental questionnaire. Thus Putian stopped participating in this review, did not demonstrate its entitlement to a separate rate and was, therefore, subject to the PRC-wide rate. *See Preliminary Results,* 72 FR at 6211–12. For the final results, we made no changes to our findings with respect to Putian's determination.

Speedy International, Ltd.

In the *Preliminary Results,* we determined that because Speedy International, Ltd. (''Speedy'') failed to support its claim that its owner was a citizen of Taiwan, and did not complete the sections of the separate rate application for NME owned entities, thus, Speedy did not demonstrate its entitlement to a separate rate and was, therefore, subject to the PRC-wide rate. *See Preliminary Results,* 72 FR at 6211–12. For the final results, we have made no changes to our findings with respect to Speedy's determination.

Starcorp

The Department finds that the information necessary to calculate an accurate and reliable margin is not available on the record with respect to Starcorp. *See* Issues and Decision Memo at Comment 63; and Starcorp AFA Memorandum. Specifically, Starcorp has significantly impeded the Department's ability to calculate accurate margins for a significant percentage of its U.S. sales as a direct result of its misreporting and withholding of information that would have served as the basis for the Department's analysis. Therefore, we find use of facts available appropriate pursuant to sections 776(a)(2)(A), (B) and (C) of the Act, and as discussed in extensive detail in the Starcorp AFA Memorandum. Despite having numerous opportunities to provide the Department with requested information with respect to merchandise sold but not produced during the POR, the facts on the record lead the Department to the conclusion that Starcorp did not act as a reasonable respondent by withholding certain information necessary to calculate an accurate margin (*i.e.,* it failed to disclose the methodology it used to derive its proxy FOPs for merchandise sold but not produced during the POR (*i.e.,* proxy FOPs) and failed to provide forthcoming responses in a timely manner to the Department's numerous direct questions regarding its reporting methodology (*i.e.,* use of proxy FOPs and use of sales quantities instead of production quantities to weight certain FOPs within numerous CONNUMs)). *See* Starcorp AFA Memorandum and Comment 63 of the Issues and Decision Memorandum. These failures significantly impeded the Department's ability to comprehend and analyze Starcorp's data adequately within the Department's statutory timeframe. As a result of Starcorp's repeated misreporting and failure to provide information that was responsive to the Department's requests, the Department's ability to calculate accurate margins for a significant portion of Starcorp's sales was compromised.

Starcorp further impeded the Department's ability to calculate accurate margins as a direct result of its failure to provide, in the form and manner requested by the Department and within the Department's established deadlines, the information that would have served as the basis of the Department's analysis, pursuant to sections 776(a)(2)(B) and (C) of the Act. Specifically, and as discussed in great detail in the Starcorp AFA Memorandum, Starcorp did not provide plant-specific plant data until very late in the proceeding, and did not disclose that these data do not contain FOPs for all of the CONNUMs correlating to its U.S. sales (*i.e.,* the plant-specific databases did not contain the requisite data for calculating normal values for all of Starcorp's U.S. sales and thus do not contain the data necessary to calculate a dumping margin for those sales). Despite having numerous opportunities to provide the plant-specific and weighted-average data in a timely manner, as evidenced by the Department's numerous supplemental questionnaires addressing deficiencies in Starcorp's responses, Starcorp did not do so. Thus, as explained in detail in the Starcorp AFA Memorandum, the facts on the record lead the Department to the conclusion that Starcorp failed to provide forthcoming responses in a timely manner to the Department's numerous direct requests, and this failure significantly impeded the Department's ability to comprehend and analyze Starcorp's data adequately within the Department's statutory time frame. As a result, the Department's ability to calculate accurate margins for any of Starcorp's sales was compromised.

Further, the Department also found Starcorp's financial statements to be unreliable. *See* Comment 56 of the Issues and Decision Memorandum and the Starcorp AFA Memo. Because the Department finds that Starcorp's submitted information cannot be tied to reliable financial statements or a reliable financial recording system, the Department must conclude that any submitted data are also not reliable.

Finally, there remain significant discrepancies between Starcorp's numerous data files and the narrative descriptions Starcorp provided purporting to explain those data files. For example, there are inconsistencies related to: which unique products were not sold during the POR and which FOPs were therefore based on proxy FOP data; Starcorp's reported production quantities for sets, notwithstanding Starcorp's repeated statements that it does not produce sets; and Starcorp's inclusion of the same product in the FOP buildups for more than one CONNUM.

Based on the analysis above, for the final results, we applied facts available pursuant to sections 776(a)(2)(A), (B), and (C) of the Act with respect to Starcorp's sales. Furthermore, it is apparent from the facts on the record, *i.e.,* Starcorp's repeated unresponsiveness to information requests, its repeated failure to provide requested data in a timely manner, its withholding of its methodology to determine the product-specific source of proxy FOP data, and the significant level of inconsistencies and contradictions in its data and narrative submissions (including information obtained at verification), that Starcorp did not act as a reasonable respondent because its failure to be responsive was unnecessary. *See* Starcorp AFA Memorandum. Thus, we find that Starcorp failed to cooperate by not acting to the best of its ability. For this reason, we find it appropriate that an adverse inference be applied when selecting from among the facts available in accordance with section 776(b) of the Act.

As AFA we are applying a rate of 216.01 percent, the rate calculated for a respondent in the most recently completed new shipper reviews of wooden bedroom furniture from the PRC, covering the first 12 months of this administrative review. *See Final Results of the 2004–2005 Semi-Annual New Shipper Reviews: Wooden Bedroom Furniture from the People's Republic of China,* 71 FR 70739 (December 6, 2006) (''*04–05 New Shipper Reviews*''). This represents the highest rate from the history of this proceeding.

Application of Partial Facts Available

Sections 776(a)(2)(A) and (B) of the Act provide for the use of facts available when an interested party withholds information that has been requested by the Department or when an interested party fails to provide the information requested in a timely manner and in the form required. Additionally, section 776(b) of the Act provides for the use of

AFA when an interested party has failed to cooperate by not acting to the best of its ability. We have concluded that the Dare Group did not cooperate to the best of its ability.

Dare Group

Because the Dare Group did not provide complete information with respect to indirect and packing labor for certain CONNUMs, as requested in the Department's questionnaires, we preliminarily determined that the use of an adverse inference was warranted to value these FOPs. *See Preliminary Results,* 72 FR at 6214. For the final results, we have determined to continue to apply sections 776(a)(2)(A), (a)(2)(B), and (b) of the Act because the Dare Group did not provide us with the information we requested. Therefore, in accordance with sections 776(a)(2) and (b) of the Act, we have applied partial AFA in calculating the Dare Group's margin. For each CONNUM for which zero labor hours were reported, we have applied the highest labor hour value for any CONNUM reported in the Dare Group's FOP database. *See* Issues and Decision Memorandum at Comment 38.

Corroboration

Section 776(c) of the Act provides that, when the Department relies on secondary information rather than on information obtained in the course of an investigation or review, it shall, to the extent practicable, corroborate that information from independent sources that are reasonably at its disposal. Secondary information is information derived from the petition that gave rise to the investigation or review, the final determination concerning the subject merchandise, or any previous review under section 751 concerning the subject merchandise. *See e.g., Statement of Administration Action accompanying the Uruguay Round Agreements Act,* H.R. Rep. No. 103–316, (1994) (SAA) at 870. Corroborate means that the Department will satisfy itself that the secondary information to be used has probative value. To corroborate secondary information, the Department will, to the extent practicable, examine the reliability and relevance of the information to be used. *See e.g., Tapered Roller Bearings and Parts Thereof, Finished and Unfinished from Japan, and Tapered Roller Bearings, Four Inches or Less in Outside Diameter, and Components Thereof, from Japan; Preliminary Results of Antidumping Duty Administrative Reviews and Partial Termination of Administrative Reviews,* 61 FR 57391, 57392 (November 6, 1996) (unchanged in the final determination). Independent sources used to corroborate such evidence may include, for example, published price lists, official import statistics and customs data, and information obtained from interested parties during the particular investigation or review. *See* 19 CFR 351.308(d).

The AFA rate that the Department is now using was determined in the recently published new shipper review. *See 04–05 New Shipper Reviews* 71 FR at 70741. In that new shipper review, the Department calculated a company-specific rate of 216.01 percent, which was above the PRC-wide rate established in the less-than-fair-value investigation. Because this new rate is a company-specific calculated rate concerning subject merchandise, we have determined this rate to be reliable.

With respect to the relevance aspect of corroboration, the Department will consider information reasonably at its disposal to determine whether a margin continues to have relevance. Where circumstances indicate that the selected margin is not appropriate as AFA, the Department will disregard the margin and determine an appropriate margin. For example, in *Fresh Cut Flowers From Mexico: Final Results of Antidumping Duty Administrative Review,* 61 FR 6812 (February 22, 1996), the Department disregarded the highest margin in that case as adverse best information available (the predecessor to facts available), because the margin was based on another company's uncharacteristic business expense resulting in an unusually high margin. Similarly, the Department does not apply a margin that has been discredited. See *D&L Supply Co.* v. *United States,* 113 F.3d 1220, 1221 (Fed. Cir. 1997) where the Court ruled that the Department will not use a margin that has been judicially invalidated. Nothing on the record of this review calls into question the relevance of the margin selected as AFA. Further, the selected margin is a company-specific calculated rate for another respondent for a period covering 12 months (*i.e.,* June 24, 2004, through June 30, 2005) of this 18-month administrative review. Moreover, this rate has not been invalidated judicially, and falls within the range of margins calculated for another respondent in this review. Therefore, it is appropriate to use the selected rate as AFA and we have determined the 216.01 percent rate to be relevant for use in this administrative review.

As the adverse margin is both reliable and relevant, we determine that it has probative value. Accordingly, we determine that this rate meets the corroboration criteria established in section 776(c) that secondary information have probative value. As a result, the Department determines that the margin is corroborated for the purposes of this administrative review and may reasonably be applied to First Wood, Huanghouse, Kong Fong, Putian, Speedy, and Starcorp, and the PRC-wide entity as AFA.

The PRC-Wide Rate

Because we begin with the presumption that all companies within an NME country are subject to government control and because only the companies listed under these ''Final Results Margins'' section, below, have overcome that presumption, we are applying a single antidumping rate (*i.e.,* the PRC-wide rate) to all other exporters of subject merchandise from the PRC. Such companies did not demonstrate entitlement to a separate rate. *See e.g., Notice of Final Determination of Sales at Less Than Fair Value: Synthetic Indigo from the People's Republic of China,* 65 FR 25706, 25707 (May 3, 2000). The PRC-wide rate applies to all entries of subject merchandise except for entries from the respondents that are listed in the ''Final Results Margins'' section, below (except as noted).

The Department based the margin for the PRC-wide entity on adverse facts available. *See Preliminary Results,* 72 FR at 6212, 6214. Pursuant to section 776(a) of the Act, the Department found that because the PRC-wide entity failed to respond to the Department's questionnaires, withheld or failed to provide information in a timely manner or in the form or manner requested by the Department, submitted information that could not be verified, or otherwise impeded the process, it was appropriate to apply a dumping margin for the PRC-wide entity using facts otherwise available on the record. The Department further determined that an adverse inference was appropriate because the PRC-wide entity failed to respond to requests for information and therefore failed to cooperate by not acting to the best of its ability. As AFA we are applying the highest calculated rate from the history of this proceeding, a rate calculated for a respondent in the most recently completed new shipper reviews of wooden bedroom furniture from the PRC, covering the first 12 months of this administrative review. *See Wooden Bedroom Furniture from the People 's Republic of China: Final Results of the 2004–2005 Semi-Annual New Shipper Reviews,* 71 FR 70739 (December 6, 2006).

Final Results Margins

We determine that the following percentage weighted-average margins exist for the POR:

WOODEN BEDROOM FURNITURE FROM THE PRC

Producer/exporter	Weighted-average margin (percent)
Fujian Lianfu Forestry Co. Ltd /Fujian Wonder Pacific Inc. (Dare Group)	48.97
Fuzhou Huan Mei Furniture Co., Ltd (Dare Group)	48.97
Jiangsu Dare Furniture Co., Ltd (Dare Group)	48.97
Fine Furniture (Shanghai) Limited	1.97
Foshan Guanqiu Furniture Co., Ltd	11.72
Shanghai Aosen Furniture Co., Ltd	0.53
Starcorp Funiture Co., Ltd, Starcorp Furniture (Shanghai) Co., Ltd, Orin Furniture (Shanghai) Co., Ltd, Shanghai Star Furniture Co., Ltd, and Shanghai Xing Ding Furniture Industrial Co., Ltd *	216.01
Tianjin First Wood Co., Ltd	216.01
Ace Furniture & Crafts Ltd (a.k.a. Deqing Ace Furniture and Crafts Limited)	35.38

Top Goal Development Co.	35.38
Transworld (Zhangzhou) Furniture Co. Ltd	35.38
Wan Bao Chen Group Hong Kong Co. Ltd	35.38
Winmost Enterprises Limited	35.38
Xilinmen Group Co. Ltd	35.38
Yongxin Industrial (Holdings) Limited	35.38
Zhongshan Gainwell Furniture Co. Ltd	35.38
PRC-Wide Rate	216.01

Starcorp is not subject to the PRC-wide rate.

Assessment Rates

The Department has determined, and U.S. Customs and Border Protection (''CBP'') shall assess, antidumping duties on all appropriate entries. For customers/importers of respondents that did not report entered value, we calculated customer/importer-specific antidumping duty assessment amounts based on the ratio of the total amount of antidumping duties calculated for the examined sales of subject merchandise to the total quantity of subject merchandise sold in those transactions. For customers/importers of respondents that reported entered value, we calculated customer-specific antidumping duty assessment amounts based on customer/importer-specific ad valorem rates in accordance with 19 CFR 351.212(b)(1). For the companies receiving a separate rate that were not selected for individual review (i.e., separate rate companies) we will calculate an assessment rate based on the weighted average of the cash deposit rates calculated for the companies

selected for individual review excluding any that are zero, de minimis, or based entirely on AFA pursuant to section 735(c)(5)(B) of the Act. The Department intends to issue assessment instructions to CBP within 15 days after the date of publication of these final results of administrative and new shippers review.

Cash Deposit Requirements

The following cash deposit requirements will be effective upon publication of these final results of this administrative review and new shippers for all shipments of the subject merchandise entered, or withdrawn from warehouse, for consumption on or after the publication date, as provided for by section 751(a)(2)(C) of the Act: (1) For the exporters listed above, the cash deposit rate will be the rates shown for those companies (except if the rate is de minimis, i.e., less than 0.5 percent, no cash deposit will be required for that company); (2) for previously investigated or reviewed PRC and non-PRC exporters not listed above that have separate rates, the cash deposit rate will continue to be the exporter-specific rate published for the most recent period; (3) for all PRC exporters of subject merchandise which have not been found to be entitled to a separate rate, the cash deposit rate will be the PRC-wide rate of 216.01 percent; and (4) for all non-PRC exporters of subject merchandise which have not received their own rate, the cash deposit rate will be the rate applicable to the PRC exporters that supplied that non-PRC exporter. These deposit requirements shall remain in effect until further notice.

Notification of Interested Parties

This notice also serves as a final reminder to importers of their responsibility under 19 CFR 351.402(f)(2) to file a certificate regarding the reimbursement of antidumping duties prior to liquidation of the relevant entries during this review period. Failure to comply with this requirement could result in the Secretary's presumption that reimbursement of the antidumping duties occurred and the subsequent assessment of double antidumping duties.

This notice also serves as a reminder to parties subject to administrative protective orders (''APOs'') of their responsibility concerning the return or destruction of proprietary information disclosed under the APO in accordance with 19 CFR 351.305(a)(3), which continues to govern business proprietary information in this segment of the proceeding. Timely written notification of the return/destruction of APO materials or conversion to judicial protective order is hereby requested. Failure to comply with the regulations and terms of an APO is a violation which is subject to sanction.

Disclosure

We will disclose the calculations performed within five days of the date of publication of this notice to parties in this proceeding in accordance with 19 CFR 351.224(b).

We are issuing and publishing this determination and notice in accordance with sections 751(a)(1) and 777(i)(1) of the Act.

Dated: August 15, 2007.

David M. Spooner,

Assistant Secretary for Import Administration.

BILLING CODE 3510–DS–P

DEPARTMENT OF COMMERCE

National Oceanic and Atmospheric Administration

Proposed Information Collection; Comment Request; Certification Requirements for NOAA's Hydrographic Product Quality Assurance Program

AGENCY: National Oceanic and Atmospheric Administration (NOAA), Commerce.

ACTION: Notice.

SUMMARY: The Department of Commerce, as part of its continuing effort to reduce paperwork and respondent burden, invites the general public and other Federal agencies to take this opportunity to comment on proposed and/or continuing information collections, as required by the Paperwork Reduction Act of 1995.

DATES: Written comments must be submitted on or before October 22, 2007.

ADDRESSES: Direct all written comments to Diana Hynek, Departmental Paperwork Clearance Officer, Department of Commerce, Room 6625, 14th and Constitution Avenue, NW., Washington, DC 20230 (or via the Internet at *dHynek@doc.gov*).

FOR FURTHER INFORMATION CONTACT: Requests for additional information or copies of the information collection instrument and instructions should be directed to David Enabnit, 301–71302770 x132, *Dave.Enabnit@NOAA.gov.*

SUPPLEMENTARY INFORMATION:

I. Abstract

The National Oceanic and Atmospheric Administration (NOAA) was mandated to develop and implement a quality assurance program under which the Administrator may certify privately-made hydrographic products. The Administrator fulfilled this mandate by establishing procedures by which hydrographic products are proposed for certification; by which standards and compliance tests are developed, adopted, and applied for those products; and by which certification is awarded or denied. These procedures are now 15 CFR part 996. The application and recordkeeping requirements at 15 CFR part 996 are basis for this collection of information.

II. Method of Collection

Paper applications and electronic reports are required from participants. Methods of submittal include mail, Internet, and facsimile transmission of paper forms.

III. Data

OMB Number: 0648–0507.
Form Number: None.
Type of Review: Regular submission.
Affected Public: Business or other for-profit.
Estimated Number of Respondents: 2.
Estimated Time per Response: 4 hours.
Estimated Total Annual Burden Hours: 24.
Estimated Total Annual Cost to Public: $0.

IV. Request for Comments

Comments are invited on: (a) Whether the proposed collection of information is necessary for the proper performance of the functions of the agency, including whether the information shall have practical utility; (b) the accuracy of the agency's estimate of the burden (including hours and cost) of the proposed collection of information; (c) ways to enhance the quality, utility, and clarity of the information to be collected; and (d) ways to minimize the burden of the collection of information on respondents.

Comments submitted in response to this notice will be summarized and/or included in the request for OMB approval of this information collection; they also will become a matter of public record.

Dated: August 16, 2007.

Gwellnar Banks,

Management Analyst, Office of the Chief Information Officer.

DEPARTMENT OF COMMERCE

National Oceanic and Atmospheric Administration

RIN 0648–XB42

Endangered and Threatened Species; Recovery Plans

AGENCY: National Marine Fisheries Service (NMFS), National Oceanic and Atmospheric Administration, Commerce.

ACTION: Notice of availability; recovery plan and 5-year review for the Hawaiian monk seal.

SUMMARY: The National Marine Fisheries Service (NMFS) announces the adoption of an Endangered Species Act (ESA) Recovery Plan (Recovery Plan) and 5-year review for the Hawaiian monk seal (*Monachus schauinslandi*). The Recovery Plan contains revisions and additions in consideration of public comments on the proposed draft Recovery Plan for the Hawaiian Monk Seal. This is the first 5-year review completed for the Hawaiian monk seal.

ADDRESSES: Additional information about the Recovery Plan and 5-year review may be obtained by writing to Dr. Michelle Yuen, National Marine Fisheries Service, Pacific Islands Regional Office, Protected Resources Division, 1601 Kapiolani Boulevard Suite 1110, Honolulu, HI, 96814 or send an electronic message to *michelle.yuen@noaa.gov*.

Electronic copies of the Recovery Plan, the 5-year review, and a summary of NMFS's response to public comments on the Recovery Plan are available online at the NMFS Office of Protected Resources website: *www.nmfs.noaa.gov/pr/species/mammals/pinnipeds/hawaiianmonkseal.htm*

FOR FURTHER INFORMATION CONTACT: Michelle Yuen (808–944–2243), e-mail: *michelle.yuen@noaa.gov.*

SUPPLEMENTARY INFORMATION:

Recovery Plan Background

Recovery plans describe actions considered necessary for the conservation and recovery of species listed under the Endangered Species Act of 1973 (ESA), as amended (16 U.S.C. 1531 *et seq.*). The ESA requires that recovery plans incorporate (1) objective, measurable criteria that, when met, would result in a determination that the species is no longer threatened or endangered; (2) site-specific management actions necessary to achieve the plan's goals; and (3) estimates of the time required and costs to implement recovery actions. The ESA requires the development of recovery plans for listed species unless such a plan would not promote the recovery of a particular species. NMFS's goal is to restore the endangered Hawaiian monk seal population to the point where they are again secure, self-sustaining members of their ecosystem and no longer need the protections of the ESA.

The Hawaiian monk seal has the distinction of being the only endangered marine mammal species whose entire range, historical and current, lies within the United States of America. The majority of the population of Hawaiian monk seals now occupies the northwestern Hawaiian Islands (NWHI) with six main breeding sub-populations. The species is also found in lower numbers in the main Hawaiian Islands (MHI), where the population size and range both appear to be expanding. The Hawaiian monk seal was listed as an endangered species under the ESA on November 23, 1976 (41 FR 51611). On April 30, 1986 (51 FR 16047), critical habitat was designated at all beach areas, lagoon waters, and ocean waters out to a depth of 10 fathoms around Kure Atoll, Midway, Pearl and Hermes Reef, Lisianski Island, Laysan Island, Gardner Pinnacles, French Frigate Shoals, Necker Island and Nihoa Island; critical habitat was extended to include Maro Reef and waters around all habitat out to the 20 fathom isobath on May 26, 1988. The best estimate of the total population size in 2006 is 1,202 seals.

The Recovery Plan was originally drafted by the Hawaiian Monk Seal Recovery Team at the request of the Assistant Administrator for Fisheries. The Recovery Team includes experts on marine mammals from the private sector, academia, and government, as well as experts on endangered species conservation. NMFS released the draft Recovery Plan and requested comments from the public on November 28, 2006 (71 FR 68801). A summary of comments and NMFS responses to comments are available electronically (see **ADDRESSES**). Concurrent with the public comment period, NMFS requested comments from four independent peer-reviewers.

The final Recovery Plan contains: (1) a comprehensive review of the Hawaiian monk seal population distribution, life history, and habitat use, (2) a threats assessment, (3) conservation efforts, (4) biological and recovery criteria for downlisting and delisting, (5) actions necessary for the recovery of the species, (6) an implementation schedule, and (7) estimates of time and cost to recovery. The threats assessment includes three levels of threats: (1) Crucial (ongoing and apparent threat at most sites in the NWHI), (2) Serious (potential cause of localized threats), and (3) Moderate (localized impacts possible but not considered a serious or immediate threat). The crucial threats to Hawaiian monk seals are: food limitation, entanglement, and shark predation. The serious threats to Hawaiian monk seals are: infectious disease, habitat loss, fishery interaction, male aggression, and human interaction. Finally, the moderate threats to Hawaiian monk seals are: biotoxins, vessel groundings and contaminants.

Criteria for the reclassification of the Hawaiian monk seal are included in the final Recovery Plan. In summary, Hawaiian monk seals may be reclassified from endangered to threatened when all of the following have been met: (1) aggregate numbers exceed 2,900 total individuals in the NWHI; (2) at least 5 of the 6 main sub-population in the NWHI are above 100 individuals, and the MHI population is above 500; (3) the survivorship of females in each subpopulation in the NWHI and in the MHI is high enough that, in conjunction with the birth rates in each subpopulation, the calculated population growth rate for each subpopulation is not negative. The population will be considered for a delisting if the downlisting criteria continue to be met for 20 consecutive years without new crucial or serious threats being identified. Time and cost for recovery actions are contained in the final Recovery Plan. The recovery program will cost $35,915,000 for the first five fiscal years and $378,425,000 to full recovery assuming the best case scenario that the population could grow to the stipulated total population size in the NWHI within 12 years and that the stipulated numbers in the MHI could be reached within 34 years.

In accordance with the 2003 Peer Review Policy as stated in Appendix R of the Interim Endangered and Threatened Species Recovery Planning Guidance, NMFS solicited independent peer-review on the draft Plan concurrent with the public comment period. Independent peer-reviews were requested from four scientists and managers with expertise in recovery planning, statistical analyses, fisheries, and marine mammals. Many of the recommendations that were made by the reviewers were addressed and provided in detail in the final plan.

5-year Review Background

Section 4(c)(2)(A) of the ESA requires that NMFS conduct a review of listed species at least once every five years. On the basis of such reviews under section 4(c)(2)(B), NMFS will determine whether or not any species should be removed from the list (delisted), or reclassified from endangered to threatened or from threatened to endangered. Delisting a species must be supported by the best scientific and commercial data available and only considered if such data substantiates that the species is neither endangered nor threatened for one or more of the following reasons: (1) the species is considered extinct; (2) the species is considered to be recovered; and/or (3) the original data available when the species was listed, or the interpretation of such data, were in error. Any change in Federal classification would require a separate rulemaking process.

The 5-year review considered the best scientific and commercial data and all new information that has become available since the listing determination or most recent status review. Categories of information include (A) species biology including, but not limited to, population trends, distribution, abundance, demographics, and genetics; (B) habitat conditions including, but not limited to, amount, distribution, and suitability; (C) conservation measures that have been implemented that benefit the species; (D) status and trends of threats; and (E) other new information, data, or corrections including, but not limited to, taxonomic or nomenclatural changes, identification of erroneous information contained in the List, and improved analytical methods. NMFS

concluded that the status of the Hawaiian monk seal remains ''endangered''.

NMFS announced the initiation of the 5-year review and requested information from the public on January 22, 2007 (72 FR 2650). Information was received from the Ocean Conservancy and the Marine Mammal Commission.

Conclusion

NMFS revised the final Recovery Plan for the Hawaiian Monk Seal and evaluated all comments received by the public as well as independent peer-reviewers. NMFS has also completed the first 5-year review for the Hawaiian Monk Seal based on public comments received and internal review. NMFS concludes that both the Recovery Plan and the 5-year review meet the requirements of the ESA.

Dated: August 16, 2007.

Angela Somma,

Chief, Endangered Species Division, Office of Protected Resources, National Marine Fisheries Service.

BILLING CODE 3510–22–S

DEPARTMENT OF EDUCATION

Notice of Proposed Information Collection Requests

AGENCY: Department of Education.

SUMMARY: The Acting Leader, Information Management Case Services Team, Regulatory Information Management Services, Office of Management, invites comments on the proposed information collection requests as required by the Paperwork Reduction Act of 1995.

DATES: Interested persons are invited to submit comments on or before October 22, 2007.

SUPPLEMENTARY INFORMATION: Section 3506 of the Paperwork Reduction Act of 1995 (44 U.S.C. Chapter 35) requires that the Office of Management and Budget (OMB) provide interested Federal agencies and the public an early opportunity to comment on information collection requests. OMB may amend or waive the requirement for public consultation to the extent that public participation in the approval process would defeat the purpose of the information collection, violate State or Federal law, or substantially interfere with any agency's ability to perform its statutory obligations. The Acting Leader, Information Management Case Services Team, Regulatory Information Management Services, Office of Management, publishes that notice containing proposed information collection requests prior to submission of these requests to OMB. Each proposed information collection, grouped by office, contains the following: (1) Type of review requested, e.g. new, revision, extension, existing or reinstatement; (2) Title; (3) Summary of the collection; (4) Description of the need for, and proposed use of, the information; (5) Respondents and frequency of collection; and (6) Reporting and/or Recordkeeping burden. OMB invites public comment.

The Department of Education is especially interested in public comment addressing the following issues: (1) Is this collection necessary to the proper functions of the Department; (2) will this information be processed and used in a timely manner; (3) is the estimate of burden accurate; (4) how might the Department enhance the quality, utility, and clarity of the information to be collected; and (5) how might the Department minimize the burden of this collection on the respondents, including through the use of information technology.

Dated: August 16, 2007.

James Hyler,

Acting Leader, Information Management Case Services Team, Regulatory Information Management Services, Office of Management.

Federal Student Aid

Type of Review: Extension of a currently approved collection.

Title: Federal Perkins Loan Program Regulations.

Frequency: Annually.

Affected Public: Not-for-profit institutions (primary), Individuals or households, Businesses or other for-profit.

Reporting and Recordkeeping Hour Burden:

Responses: 2,800,642.

Burden Hours: 61,879.

Abstract: Institutions of higher education make Perkins loans. Information is necessary in order to monitor a school's reimbursement to its Perkins loan revolving fund, monitor how collection costs are charged to borrowers on rehabilitated loans and to monitor the assignment of defaulted Perkins loans to the Department.

Requests for copies of the proposed information collection request may be accessed from *http://edicsweb.ed.gov,* by selecting the ''Browse Pending Collections'' link and by clicking on link number 3448. When you access the information collection, click on ''Download Attachments'' to view. Written requests for information should be addressed to U.S. Department of Education, 400 Maryland Avenue, SW., Potomac Center, 9th Floor, Washington, DC 20202–4700. Requests may also be electronically mailed to *ICDocketMgr@ed.gov* or faxed to 202–245–6623. Please specify the complete title of the information collection when making your request.

Comments regarding burden and/or the collection activity requirements should be electronically mailed to *ICDocketMgr@ed.gov.* Individuals who use a telecommunications device for the deaf (TDD) may call the Federal Information Relay Service (FIRS) at 1–800–877–8339.

[FR Doc. E7–16578 Filed 8–21–07; 8:45 am]

DEPARTMENT OF EDUCATION

Office of Special Education and Rehabilitative Services (OSERS); Overview Information; National Institute on Disability and Rehabilitation Research (NIDRR)—Small Business Innovative Research Program (SBIR)—Phase I Notice Inviting Applications for New Awards for Fiscal Year (FY) 2008.

(Catalog of Federal Domestic Assistance (CFDA) Number: 84.133S–1.)

Dates: Applications Available: August 22, 2007.

Deadline for Transmittal of Applications: October 22, 2007.

Full Text of Announcement

I. Funding Opportunity Description

Purpose of Program

The purpose of this program is to stimulate technological innovation in the private sector, strengthen the role of small business in meeting Federal research or research and development (R/R&D) needs, increase the commercial application of the U.S. Department of Education (Department) supported research results, and improve the return on investment from federally funded research for economic and social benefits to the Nation.

Note: This program is in concert with President George W. Bush's New Freedom Initiative (NFI) and NIDRR's Final Long-Range Plan for FY 2005–2009 (Plan). The NFI can be accessed on the Internet at the following site: *http://www.whitehouse.gov/infocus/newfreedom.*

The Plan, which was published in the **Federal Register** on February 15, 2006 (71 FR Doc 8166), can be accessed on the Internet at the following site: *http://www.ed.gov/about/offices/list/osers/nidrr/policy.html.*

Through the implementation of the NFI and the Plan, NIDRR seeks to (1)

improve the quality and utility of disability and rehabilitation research; (2) foster an exchange of expertise, information, and training to facilitate the advancement of knowledge and understanding of the unique needs of traditionally underserved populations; (3) determine best strategies and programs to improve rehabilitation outcomes for underserved populations; (4) identify research gaps; (5) identify mechanisms of integrating research and practice; and (6) disseminate findings.

NIDRR Supports Manufacturing-Related Innovation (Executive Order 13329)

Executive Order 13329 states that continued technological innovation is critical to a strong manufacturing sector in the United States economy and ensures that Federal agencies assist the private sector in its manufacturing innovation efforts. The Department's SBIR program encourages innovative research and development (R&D) projects that are manufacturing-related, as defined by Executive Order 13329. Manufacturing-related R&D encompasses improvements in existing methods or processes, or wholly new processes, machines or systems. Broadly speaking, the Department's SBIR program encourages R&D in manufacturing through systems level technologies. The projects supported under the Department's SBIR program encompass a range of manufacturing-related R&D, including projects leading to the manufacture of such items as artificial intelligence or information technology devices, software, and systems. For more information on Executive Order 13329, please visit the following Web site: *http://www.sba.gov/sbir/execorder.html* or contact Lynn Medley at: *lynn.medley@ed.gov*.

Background

The Small Business Reauthorization Act of 2000 (Act) was enacted on December 21, 2000. The Act requires certain agencies, including the Department, to establish SBIR programs by reserving a statutory percentage of their extramural R&D budgets to be awarded to small business concerns through a uniform, highly competitive three-phase process.

The three phases of the SBIR program are:

Phase I: Phase I projects determine, insofar as possible, the scientific or technical merit and feasibility of ideas submitted under the SBIR program. An application for Phase I should concentrate on research that will significantly contribute to proving the scientific or technical feasibility of the approach or concept. Scientific or technical feasibility is a prerequisite to further support by the Department in Phase II.

Phase II: Phase II projects expand on the results of and further pursue the development of Phase I projects. Phase II is the principal R/R&D effort of the SBIR program. Applications for Phase II projects must be more comprehensive than applications for Phase I projects; Phase II applications must outline the proposed effort in detail, including the commercial potential of projects or processes developed or researched during the Phase I project. Phase II applicants must be Phase I grantees with approaches that appear sufficiently promising as a result of their efforts in Phase I. Phase II awards are for periods of up to two years in amounts up to a maximum total of $500,000 over a period of two years.

Phase III: In Phase III, the small business grantee must use non-SBIR capital to pursue commercial applications of the R/R&D. Also, under Phase III, Federal agencies may award non-SBIR follow-on funding for products or processes that meet the needs of those agencies.

All SBIR projects funded by NIDRR must address the needs of individuals with disabilities and their families. (See 29 U.S.C. 762). Activities may include conducting manufacturing-related R&D that encompasses improvements in existing methods or processes, or wholly new processes, machines, or systems; exploring the uses of technology to ensure equal access to education, employment, community environments, and information for individuals with disabilities; and improving the quality and utility of disability and rehabilitation research.

Priorities: Under this competition we are particularly interested in applications that address one of the following priorities.

Invitational Priorities: For FY 2008 these priorities are invitational priorities. Under 34 CFR 75.105(c)(1) we do not give an application that meets one of these invitational priorities a competitive or absolute preference over other applications.

These priorities are:

Each of the following priorities relate to innovative research utilizing new technologies to address the needs of individuals with disabilities and their families. Applicants who choose to respond to one of the invitational priorities must propose projects whose activities contribute to one of the following outcomes:

(1) Increased independence of individuals with disabilities in the workplace, recreational settings, or educational settings through the development of technology to support access and promote integration of individuals with disabilities.

(2) Enhanced sensory or motor function of individuals with disabilities through the development of technology to support improved functional capacity.

(3) Enhanced workforce participation through the development of technology to support access to employment, promote sustained employment, and promote employment advancement for individuals with disabilities.

(4) Enhanced community participation and living for individuals with disabilities through the development of accessible information technology including Web access technology, software, and other systems and devices that promote access to information in educational, employment, and community settings, and voting technology that improves access for individuals with disabilities.

(5) Improved interventions and increased use of health-care resources through the development of technology to support independent access to health-care services in the community for individuals with disabilities.

Applicants should describe the approaches they expect to use to collect empirical evidence that demonstrates the effectiveness of the technology they are proposing. This empirical evidence should facilitate the assessment of the efficacy and usefulness of the technology.

Note: NIDRR encourages applicants to adhere to universal-design principles and guidelines for more accessible designs. Universal design is defined as ''the design of products and environments to be usable by all people, to the greatest extent possible, without the need for adaptation or specialized design'' (The Center for Universal Design, 1997, n.p.). Accessible design of consumer products minimizes or alleviates barriers that reduce the ability of individuals with disabilities to effectively or safely use standard consumer products. (For more information see— *http://www.trace.wisc.edu/docs/consumer_product_guidelines/consumer.pcs/disabil.htm).*

Reference: The Principles of Universal Design, Version 2.0. Raleigh, NC: North Carolina State University.

Web: http://www.design.ncsu.edu.

Program Authority: The Small Business Act, Pub. L. 85–536, as amended (15 U.S.C. 631 and 638), and Title II of the Rehabilitation Act of 1973, as amended (29 U.S.C. 760 *et seq.*).

Applicable Regulations: The Education Department General Administrative Regulations (EDGAR) in 34 CFR parts 75, 77, 81, 82, 84, 85, 97, 98, and 99.

II. Award Information

Type of Award: Discretionary grants.

Estimated Available Funds: The Administration has requested $106,705,000 for the National Institute on Disability and Rehabilitation Research for FY 2008, of which we intend to use an estimated $1,125,000 for new Phase I awards under the SBIR program. The actual level of funding, if any, depends on final congressional action.

However, we are inviting applications to allow enough time to complete the grant process if Congress appropriates funds for this program.

Note: The estimated amount of funds available for new Phase I awards is based upon the estimated threshold SBIR allocation for OSERS, minus prior commitments for Phase II continuation awards.

Estimated Range of Awards: $70,000–75,000.

Estimated Average Size of Awards: $72,000.

Maximum Award: We will reject any application that proposes a budget exceeding $75,000 for a single budget period of 6 months. The Assistant Secretary for Special Education and Rehabilitative Services may change the maximum amount through a notice published in the **Federal Register**.

Note: The maximum award amount includes direct and indirect costs and fees.

Estimated Number of Awards: 15.

Note: The Department is not bound by any estimates in this notice.

Project Period: Up to six months.

III. Eligibility Information

1. *Eligible Applicants:* Entities that are, at the time of award, small business concerns as defined by the Small Business Administration (SBA). This definition is included in the application package.

All technology, science, or engineering firms with strong research capabilities in any of the priority areas listed in this notice are encouraged to participate.

Consultative or other arrangements between these firms and universities or other non-profit organizations are permitted, but the small business concern must serve as the grantee. For Phase I projects, at least two-thirds of the research and/or analytic activities must be performed by the proposing small business concern. Furthermore, the total of all consultant fees, facility leases or usage fees, and other subcontracts or purchase agreements may not exceed one-third of the total funding award.

If it appears that an applicant organization does not meet the eligibility requirements, we will request an evaluation by the SBA. Under circumstances in which eligibility is unclear, we will not make an SBIR award until the SBA makes a determination.

2. *Cost Sharing or Matching:* This program does not require cost sharing or matching.

IV. Application and Submission Information

1. *Address to Request Application Package:* You can obtain an application package via the Internet or from the Education Publications Center (ED Pubs). To obtain a copy via the Internet, use the following address: *http://www.ed.gov/fund/grant/apply/grantapps/index.html.* To obtain a copy from ED Pubs, write, fax, or call the following: Education Publications Center, P.O. Box 1398, Jessup, MD 20794–1398. Telephone, toll free: 1–877–433–7827. FAX: (301) 470–1244. If you use a telecommunications device for the deaf (TDD), call, toll free: 1–877–576–7734.

You can contact ED Pubs at its Web site, also: *http://www.ed.gov/pubs/edpubs.html* or at its e-mail address: *edpubs@inet.ed.gov*.

If you request an application from ED Pubs, be sure to identify this competition as follows: CFDA number 84.133S–1.

Individuals with disabilities can obtain a copy of the application package in an alternative format (e.g., Braille, large print, audiotape, or computer diskette) by contacting the person listed under **FOR FURTHER INFORMATION CONTACT** in section VII of this notice.

2. *Content and Form of Application Submission:* Requirements concerning the content of an application, together with the forms you must submit, are in the application package for this competition.

Page Limit: The application narrative is where you, the applicant, address the selection criteria that reviewers use to evaluate your application. You must limit the application narrative to no more than 25 pages, excluding any documentation of prior multiple Phase II awards, if applicable, and required forms, using the following standards:

- A ''page'' is 8.5″ x 11″, on one side only, with 1″ margins at the top, bottom, and both sides.
- Double space (no more than three lines per vertical inch) all text in the application narrative. Single spacing may be used for titles, headings, footnotes, quotations, references, and captions, as well as all text in charts, tables, figures, and graphs.
- Use a font that is either 12 point or larger or no smaller that 10 pitch (characters per inch).
- Use one of the following fonts: Times New Roman, Courier, Courier New, or Arial.

The page limit does not apply to Part I, the coversheet; Part II, the budget section, including the narrative budget justification; Part IV, the assurances and certifications; or the one-page abstract, the resumes, the bibliography, the letters of support; related application(s) or award(s); or documentation of multiple Phase II awards, if applicable. However, the page limit does apply to all of the application narrative section.

We will reject your application if you exceed the page limit.

3. *Content Restrictions:* If an applicant chooses to respond to more than one invitational priority, the applicant must submit a separate application for each priority. There is no limitation on the number of different applications that an applicant may submit under this competition. An applicant may submit separate applications on different priorities, or different applications on the same priority. However, an applicant may address only one priority in an application.

The NIDRR Long Range Plan is organized around the following research domains and arenas: (1) Community Living and Participation; (2) Health and Function; (3) Technology; (4) Employment; and (5) Demographics. Applicants should indicate, for each application, the domain or arena under which they are applying. In their applications, applicants should clearly indicate whether they are applying for a research grant in the area of (1) Community Living and Participation; (2) Health and Function; (3) Technology; (4) Employment; or (5) Demographics. No more than one designation should be selected for each application.

4. *Submission Dates and Times:* Applications Available: August 22, 2007.

Deadline for Transmittal of Applications: October 22, 2007.

Applications for grants under this competition may be submitted electronically using the *http://Grants.gov.* Apply on site (*http://Grants.gov*), or in paper format by mail or hand delivery. For information (including dates and times) about how to submit your application electronically, or in paper format by mail or hand delivery, please refer to section IV. 7. *Other Submission Requirements* in this notice.

We do not consider an application that does not comply with the deadline requirements.

Individuals with disabilities who need an accommodation or auxiliary aid in connection with the application process should contact the person listed under **FOR FURTHER INFORMATION CONTACT** in section VII in this notice. If the Department provides an accommodation or auxiliary aid to an individual with a disability in connection with the application process, the individual's application remains subject to all other requirements and limitations in this notice.

5. *Intergovernmental Review:* This program is not subject to Executive Order 12372 and the regulations in 34 CFR part 79.

6. *Funding Restrictions:* We reference regulations outlining funding restrictions in the *Applicable Regulations* section in this notice.

7. *Other Submission Requirements:* Applications for grants under this program may be submitted electronically or in paper format by mail or hand delivery.

a. Electronic Submission of Applications

To comply with the President's Management Agenda, we are participating as a partner in the Governmentwide Grants.gov Apply site. The Small Business Innovative Research Program, CFDA Number 84.133S–1, is included in this project. We request your participation in Grants.gov.

If you choose to submit your application electronically, you must use the Governmentwide Grants.gov Apply site at *http://www.Grants.gov.* Through this site, you will be able to download a copy of the application package, complete it offline, and then upload and submit your application. You may not e-mail an electronic copy of a grant application to us.

You may access the electronic grant application for the Small Business Innovative Research Program at: *http://www.Grants.gov.* You must search for the downloadable application package for this competition by the CFDA number. Do not include the CFDA number's alpha suffix in your search (e.g., search for 84.133, not 84.133S).

Please note the following:

- Your participation in *http://Grants.gov* is voluntary.
- When you enter the *http://Grants.gov* site, you will find information about submitting an application electronically through the site, as well as the hours of operation.
- Applications received by *http://Grants.gov* are date and time stamped. Your application must be fully uploaded and submitted and must be date and time stamped by the *http://Grants.gov* system no later than 4:30 p.m., Washington, DC time, on the application deadline date. Except as otherwise noted in this section, we will not consider your application if it is date and time stamped by the *http://Grants.gov* system later than 4:30 p.m., Washington, DC time, on the application deadline date. When we retrieve your application from *http://Grants.gov,* we will notify you if we are rejecting your application because it was date and time stamped by the *http://Grants.gov* system after 4:30 p.m., Washington, DC time, on the application deadline date.
- The amount of time it can take to upload an application will vary depending on a variety of factors, including the size of the application and the speed of your Internet connection. Therefore, we strongly recommend that you do not wait until the application deadline date to begin the submission process through *http://Grants.gov.*
- You should review and follow the Education Submission Procedures for submitting an application through Grants.gov that are included in the application package for this competition to ensure that you submit your application in a timely manner to the Grants.gov system. You can also find the Education Submission Procedures pertaining to Grants.gov at *http://e-Grants.ed.gov/help/GrantsgovSubmissionProcedures.pdf.*
- To submit your application via Grants.gov, you must complete all steps in the Grants.gov registration process (see *http://www.grants.gov/applicants/get_registered.jsp*). These steps include (1) registering your organization, a multi-part process that includes registration with the Central Contractor Registry (CCR); (2) registering yourself as an Authorized Organization Representative (AOR); and (3) getting authorized as an AOR by your organization. Details on these steps are outlined in the Grants.gov 3-Step Registration Guide (see *http://www.grants.gov/section910/Grants.govRegistrationBrochure.pdf*). You also must provide on your application the same D–U–N–S Number used with this registration. Please note that the registration process may take five or more business days to complete, and you must have completed all registration steps to allow you to submit successfully an application via Grants.gov. In addition you will need to update your CCR registration on an annual basis. This may take three or more business days to complete.
- You will not receive additional point value because you submit your application in electronic format, nor will we penalize you if you submit your application in paper format.
- If you submit your application electronically, you must submit all documents electronically, including all information you typically provide on the following forms: Application for Federal Assistance (SF 424), the Department of Education Supplemental Information for SF 424, Budget Information—Non-Construction Programs (ED 524), and all necessary assurances and certifications. Please note that two of these forms—the SF 424 and the Department of Education Supplemental Information for SF 424—have replaced the ED 424 (Application for Federal Education Assistance).
- If you submit your application electronically, you must attach any narrative sections of your application as files in a .DOC (document), .RTF (rich text), or .PDF (Portable Document) format. If you upload a file type other than the three file types specified in this paragraph or submit a password-protected file, we will not review that material.
- Your electronic application must comply with any page-limit requirements described in this notice.
- After you electronically submit your application, you will receive from *http://Grants.gov* an automatic notification of receipt that contains a Grants.gov tracking number. (This notification indicates receipt by *http://Grants.gov* only, not receipt by the Department.) The Department then will retrieve your application from *http://Grants.gov* and send a second notification to you by e-mail. This second notification indicates that the Department has received your application and has assigned your application a PR/Award number (an ED-specified identifying number unique to your application).
- We may request that you provide us original signatures on forms at a later date.

Application deadline date extension in case of technical issues with the Grants.gov system: If you are experiencing problems submitting your application through Grants.gov, please contact the Grants.gov Support Desk, toll free, at 1–800–518–4726. You must obtain a *http://Grants.gov* Support Desk Case Number and must keep a record of it.

If you are prevented from electronically submitting your application on the application deadline date because of technical problems with the Grants.gov system, we will grant you an extension until 4:30 p.m., Washington, DC time, the following

business day to enable you to transmit your application electronically or by hand delivery. You also may mail your application by following the mailing instructions described elsewhere in this notice.

If you submit an application after 4:30 p.m., Washington, DC time, on the application deadline date, please contact the person listed under **FOR FURTHER INFORMATION CONTACT** in section VII in this notice and provide an explanation of the technical problem you experienced with *http://Grants.gov,* along with the *http://Grants.gov* Support Desk Case Number. We will accept your application if we can confirm that a technical problem occurred with the *http://Grants.gov* system and that that problem affected your ability to submit your application by 4:30 p.m., Washington, DC time, on the application deadline date. The Department will contact you after a determination is made on whether your application will be accepted.

Note: The extensions to which we refer in this section apply only to the unavailability of, or technical problems with, the *http://Grants.gov* system. We will not grant you an extension if you failed to fully register to submit your application to *http://Grants.gov* before the application deadline date and time or if the technical problem you experienced is unrelated to the Grants.gov system.

b. Submission of Paper Applications by Mail

If you submit your application in paper format by mail (through the U.S. Postal Service or a commercial carrier), you must mail the original and two copies of your application, on or before the application deadline date, to the Department at the applicable following address:

By mail through the U.S. Postal Service: U.S. Department of Education, Application Control Center, Attention: (CFDA Number 84.133S–1), 400 Maryland Avenue, SW., Washington, DC 20202–4260; or

By mail through a commercial carrier: U.S. Department of Education, Application Control Center, Stop 4260, Attention: (CFDA Number 84.133S–1), 7100 Old Landover Road, Landover, MD 20785–1506.

Regardless of which address you use, you must show proof of mailing consisting of one of the following:

(1) A legibly dated U.S. Postal Service postmark.

(2) A legible mail receipt with the date of mailing stamped by the U.S. Postal Service.

(3) A dated shipping label, invoice, or receipt from a commercial carrier.

(4) Any other proof of mailing acceptable to the Secretary of the U.S. Department of Education.

If you mail your application through the U.S. Postal Service, we do not accept either of the following as proof of mailing:

(1) A private metered postmark.

(2) A mail receipt that is not dated by the U.S. Postal Service.

If your application is postmarked after the application deadline date, we will not consider your application.

Note: The U.S. Postal Service does not uniformly provide a dated postmark. Before relying on this method, you should check with your local post office.

c. Submission of Paper Applications by Hand Delivery.

If you submit your application in paper format by hand delivery, you (or a courier service) must deliver the original and two copies of your application by hand, on or before the application deadline date, to the Department at the following address: U.S. Department of Education, Application Control Center, Attention: (CFDA Number 84.133S–1), 550 12th Street, SW., Room 7041, Potomac Center Plaza, Washington, DC 20202–4260.

The Application Control Center accepts hand deliveries daily between 8 a.m. and 4:30 p.m., Washington, DC time, except Saturdays, Sundays, and Federal holidays.

Note for Mail or Hand Delivery of Paper Applications: If you mail or hand deliver your application to the Department—

(1) You must indicate on the envelope and—if not provided by the Department—in Item 11 of the SF 424 the CFDA number, including suffix letter, if any, of the competition under which you are submitting your application; and

(2) The Application Control Center will mail to you a notification of receipt of your grant application. If you do not receive this notification within 15 business days from the application deadline date, you should call the U.S. Department of Education Application Control Center at (202) 245–6288.

V. Application Review Information

The selection criteria for this competition are from 35 CFR Selection Criteria: 75.210 of EDGAR and are listed in the application package.

VI. Award Administration Information

1. *Award Notices:* If your application is successful, we notify your U.S. Representative and U.S. Senators and send you a Grant Award Notice (GAN). We may notify you informally, also.

If your application is not evaluated or not selected for funding, we notify you.

2. *Administrative and National Policy Requirements:* We identify administrative and national policy requirements in the application package and reference these and other requirements in the *Applicable Regulations* section in this notice.

We reference the regulations outlining the terms and conditions of an award in the *Applicable Regulations* section in this notice and include these and other specific conditions in the GAN. The GAN also incorporates your approved application as part of your binding commitments under the grant.

3. *Reporting:* At the end of your project period, you must submit a final performance report, including financial information, as directed by the Secretary. If you receive a multi-year award, you must submit an annual performance report that provides the most current performance and financial expenditure information as directed by the Secretary under 34 CFR 75.118. The Secretary may also require more frequent performance reports under 34 CFR 75.720(c). For specific requirements on reporting, please go to: *http://www.ed.gov/fund/grant/apply/appforms/appforms.html.*

4. *Performance Measures:* To evaluate the overall success of its research program, NIDRR assesses the quality of its funded projects through review of grantee performance and products. Each year, NIDRR examines, through expert review, a portion of its grantees to determine:

- The degree to which the grantees are conducting high-quality research, as reflected in the appropriateness of study designs, the rigor with which accepted standards of scientific and engineering methods are applied, and the degree to which the research builds on and contributes to the level of knowledge in the field; and
- The number of new or improved assistive and universally designed technologies, products, and devices developed by grantees that are deemed to improve rehabilitation services and outcomes, enhance opportunities for participation by individuals with disabilities, and are successfully transferred to industry or other private entities for potential commercialization.

VII. Agency Contact

For Further Information Contact: Lynn Medley, U.S. Department of Education, 400 Maryland Avenue, SW., Room 6027, Potomac Center Plaza, Washington, DC 20202–2700. Telephone: (202) 245–7338 or by e-mail: *Lynn.Medley@ed.gov.*

If you use a TDD, call the TDD number at (202) 205–4475.

VIII. Other Information

Alternate Format: Individuals with disabilities can obtain this document and a copy of the application packet in an alternative format (e.g., Braille, large print, audiotape, or computer diskette) on request to the program contact person listed under **FOR FURTHER INFORMATION CONTACT** in section VII in this notice.

Electronic Access to This Document: You can view this document, as well as all other documents of this Department published in the **Federal Register**, in text or Adobe Portable Document Format (PDF) on the Internet at the following site: *http://www.ed.gov/news/fedregister.*

To use PDF you must have Adobe Acrobat Reader, which is available free at this site. If you have questions about using PDF, call the U.S. Government Printing Office (GPO), toll free, at 1–888–293–6498; or in the Washington, DC, area at (202) 512–1530.

Note: The official version of this document is the document published in the **Federal Register**. Free Internet access to the official edition of the **Federal Register** and the Code of Federal Regulations is available on GPO Access at: *http://www.gpoaccess.gov/nara/index.html.*

Dated: August 17, 2007.

William W. Knudsen,

Acting Deputy Assistant Secretary for Special Education and Rehabilitative Services.

BILLING CODE 4000–01–P

DEPARTMENT OF EDUCATION

Advisory Committee on Student Financial Assistance: Meeting

AGENCY: Advisory Committee on Student Financial Assistance, Education.

ACTION: Notice of an Open Teleconference Meeting.

SUMMARY: This notice sets forth the schedule and proposed agenda of a forthcoming teleconference meeting of the Advisory Committee on Student Financial Assistance (The Advisory Committee). This notice also describes the functions of the Advisory Committee. Notice of this meeting is required under Section 10(a)(2) of the Federal Advisory Committee Act. This document is intended to notify the general public.

Date and Time: Thursday, September 13, 2007, beginning at 2 p.m. and ending at approximately 3 p.m.

ADDRESSES: Office of the Advisory Committee on Student Financial Assistance, 80 F Street, NW., Room 412, Washington, DC 20001.

FOR FURTHER INFORMATION CONTACT: Dr. William J. Goggin, Executive Director or Dr. Michelle Asha Cooper, Deputy Director, Advisory Committee on Student Financial Assistance, Capitol Place, 80 F Street, NW., Suite 413, Washington, DC 20202–7582, (202) 219–2099.

Individuals who use a telecommunications device for the deaf (TDD) may call the Federal Information Relay Service (FRS) at 1–800–8339.

SUPPLEMENTARY INFORMATION: The Advisory Committee on Student Financial Assistance is established under Section 491 of the Higher Education Act of 1965 as amended by Public Law 100–50 (20 U.S.C. 1098). The Advisory Committee serves as an independent source of advice and counsel to the Congress and the Secretary of Education on student financial aid policy. Since its inception, the congressional mandate requires the Advisory Committee to conduct objective, nonpartisan, and independent analyses on important aspects of the student assistance programs under Title IV of the Higher Education Act, and to make recommendations that will result in the maintenance of access to postsecondary education for low- and middle-income students. In addition, Congress expanded the Advisory Committee's mission in the Higher Education Amendments of 1998 to include several important areas: Access, Title IV modernization, distance education, and early information and needs assessment. Specifically, the Advisory Committee is to review, monitor and evaluate the Department of Education's progress in these areas and report recommended improvements to Congress and the Secretary.

The Advisory Committee has scheduled this teleconference meeting solely to conduct the election of officers.

Individuals who will need accommodations for a disability in order to participate in the teleconference meeting (i.e., interpreting services, assistive listening devices, and/or materials in alternative format) should notify the Advisory Committee no later than Thursday, September 6, 2007 by contacting Ms. Hope Gray at (202) 219–2099 or via e-mail at *hope.gray@ed.gov.* We will attempt to meet requests after this date, but cannot guarantee availability of the requested accommodation. The meeting site is accessible to individuals with disabilities.

Space for the teleconference meeting is limited and you are encouraged to register early if you plan to participate. You may register by sending an e-mail to the following address: *ACSFA@ed.gov* or *Tracy.Deanna.Jones@ed.gov.* Please include your name, title, affiliation, complete address (including Internet and e-mail address, if available), and telephone and fax numbers. If you are unable to register electronically, you may fax your registration information to the Advisory Committee staff office at (202) 219–3032. You may also contact the Advisory Committee staff directly at (202) 219–2099. The registration deadline is Tuesday, September 11, 2007.

Records are kept for Advisory Committee proceedings, and are available for inspection at the Office of the Advisory Committee on Student Financial Assistance, Capitol Place, 80 F Street, NW., Suite 413, Washington, DC from the hours of 9 a.m. to 5:30 p.m., Monday through Friday, except Federal holidays. Information regarding the Advisory Committee is available on the Committee's Web site, *http://www.ed.gov/ACSFA.*

Electronic Access to This Document: You may view this document, as well as other documents of this Department published in the **Federal Register**, in text or Adobe Portable Document Format (PDF) on the Internet at the following site: *http://www.ed.gov/news/fedregister/index.html.*

To use PDF you must have Adobe Acrobat Reader, which is available free at this site. If you have questions about using PDF, call the U.S. Government Printing Office (GPO), toll free at 1–888–293–6498; or in the Washington DC area at (202) 512–1530.

Note: The official version of this document is the document published in the **Federal Register**. Free Internet access to the official edition of the **Federal Register** and the Code of Federal Regulations is available on GPO Access at: *http://www.gpoaccess.gov/nara/index.html.*

Dated: August 16, 2007.

William J. Goggin,

Executive Director, Advisory Committee on Student Financial Assistance.

BILLING CODE 4000–01–P

DEPARTMENT OF ENERGY

Environmental Management Site-Specific Advisory Board, Northern New Mexico

AGENCY: Department of Energy.

ACTION: Notice of Open Meeting.

SUMMARY: This notice announces a meeting of the Environmental Management Site-Specific Advisory Board (EM SSAB), Northern New Mexico. The Federal Advisory Committee Act (Pub. L. No. 92–463, 86 Stat. 770) requires that public notice of this meeting be announced in the **Federal Register**.

DATES: Wednesday, September 19, 2007. 2 p.m.–8:30 p.m.

ADDRESSES: Santa Fe Community College, Jemez Complex, 6401 Richards Avenue, Santa Fe, New Mexico.

FOR FURTHER INFORMATION CONTACT: Menice Santistevan, Northern New Mexico Citizens' Advisory Board (NNMCAB), 1660 Old Pecos Trail, Suite B, Santa Fe, NM 87505. Phone (505) 995–0393; Fax (505) 989–1752 or e-mail: *msantistevan@doeal.gov.*

SUPPLEMENTARY INFORMATION:

Purpose of the Board: The purpose of the Board is to make recommendations to DOE in the areas of environmental restoration, waste management, and related activities.

Tentative Agenda

2 p.m.—Call to Order by Deputy Designated Federal Officer, Christina Houston.
Establishment of a Quorum.
Welcome and Introductions, Rosemary Romero.
Approval of Agenda.
Approval of Minutes of July 25, 2007, Board Meeting.
2:30 p.m.—Board Business/Reports.
- Old Business, Rosemary Romero.
- Report from Chair, J.D. Campbell.
- Report from Department of Energy, Christina Houston.
- Report from Executive Director, Menice Santistevan.
- Other Matters, Board Members.
- New Business.

3 p.m.—Break.
3:15 p.m.—Committee Business/Reports.
A. Environmental Monitoring, Surveillance and Remediation Committee, Introduction of Recommendation 2007–03, Pam Henline.
B. Waste Management Committee, Update on Spring NNMCAB Sponsored Forum, Ralph Phelps.
C. Approval of Final Fiscal Year 2008 Committee Work Plans.
4:15 p.m.—Reports from Liaison Members.
U.S. Environmental Protection Agency (EPA), Rich Mayer. DOE, George Rael.
Los Alamos National Security, LLC, Sue Stiger.
New Mexico Environment Department (NMED), James Bearzi.
5 p.m.—Dinner Break.
6 p.m.—Public Comment.
6:15 p.m.—Consideration and Action on Recommendation 2007–03.
7 p.m.—Presentation on Proposed Responses to the 17 National Academies of Sciences' Recommendations Regarding Groundwater Monitoring Issues at Los Alamos National Laboratory.
8 p.m.—Round Robin on Board Meeting and Presentations, Board Members.
8:15 p.m.—Recap of Meeting: Issuance of Press Releases, Editorials, etc., Rosemary Romero.
8:30 p.m.—Adjourn, Christina Houston.

This agenda is subject to change at least one day in advance of the meeting.

Public Participation: The meeting is open to the public. Written statements may be filed with the Board either before or after the meeting. Individuals who wish to make oral statements pertaining to agenda items should contact Menice Santistevan at the address or telephone number listed above. Requests must be received five days prior to the meeting and reasonable provision will be made to include the presentation in the agenda. The Deputy Designated Federal Officer is empowered to conduct the meeting in a fashion that will facilitate the orderly conduct of business. Individuals wishing to make public comment will be provided a maximum of five minutes to present their comments.

Minutes: Minutes of this meeting will be available for public review and copying at the U.S. Department of Energy's Freedom of Information Public Reading Room, 1E–190, Forrestal Building, 1000 Independence Avenue, SW., Washington, DC 20585 between 9 a.m. and 4 p.m., Monday–Friday, except Federal holidays. Minutes will also be available at the Public Reading Room located at the Board's office at 1660 Old Pecos Trail, Suite B, Santa Fe, NM. Hours of operation for the Public Reading Room are 9 a.m.–4 p.m. on Monday through Friday. Minutes will also be made available by writing or calling Menice Santistevan at the Board's office address or telephone number listed above. Minutes and other Board documents are on the Internet at: *http://www.nnmcab.org.*

Issued at Washington, DC on August 16, 2007.

BILLING CODE 6450–01–P

DEPARTMENT OF ENERGY

Environmental Management Advisory Board Meeting

AGENCY: Department of Energy.

ACTION: Notice of Open Meeting.

SUMMARY: This notice announces a meeting of the Environmental Management Advisory Board (EMAB). The Federal Advisory Committee Act (Pub. L. No. 92–463, 86 Stat. 770) requires that public notice of this meeting be announced in the **Federal Register**.

DATES: Thursday, September 13, 2007. 8 a.m.–4 p.m.

ADDRESSES: La Fonda on the Plaza, 100 East San Francisco Street, Santa Fe, New Mexico 87501.

FOR FURTHER INFORMATION CONTACT: Terri Lamb, Designated Federal Officer, Environmental Management Advisory Board (EM–13), U.S. Department of Energy, 1000 Independence Avenue, SW., Washington, DC 20585. Phone (202) 586–9007; fax (202) 586–0293 or e-mail: *terri.lamb@em.doe.gov.*

SUPPLEMENTARY INFORMATION:

Purpose of the Board: The purpose of the Board is to provide the Assistant Secretary for Environmental Management with advice and recommendations on corporate issues confronting the Environmental Management Program. The Board will contribute to the effective operation of the Environmental Management Program by providing individual citizens and representatives of interested groups an opportunity to present their views on issues facing the Office of Environmental Management and by helping to secure consensus recommendations on those issues.

Tentative Agenda:

8 a.m. Welcome and Overview.
8:15 a.m. Los Alamos Site Office Presentation.
8:45 a.m. EM Program Update.
9:30 a.m. Roundtable Discussion.
9:45 a.m. Northern New Mexico Citizens' Advisory Board Presentation.
10 a.m. Roundtable Discussion.
10:15 a.m. Break.
10:30 a.m. Environmental Compliance Assessment Program Overview.
11 a.m. Roundtable Discussion.
11:15 a.m. Public Comment Period.
11:30 a.m. Lunch.
1 p.m. Board Business and Committee Reports.
- Approval of March 6–7, 2007, Meeting Minutes.
- Organizational Efficiency

Subcommittee.
- EMAB Communications Team.
- Small Business, Acquisition, and Project Management.
- Employee Recruitment and Retention.
- Discretionary Budgeting.
- Technical Uncertainty and Risk Reduction.
- New Business.
- Roundtable Discussion.
- Set Date for Next Meeting.

3:30 p.m. Public Comment Period.
4p.m. Adjournment.

Public Participation: The meeting is open to the public. Written statements may be filed with the Board either before or after the meeting. Individuals who wish to make oral statements pertaining to agenda items should contact Terri Lamb at the address or telephone number above. Requests must be received five days prior to the meeting and reasonable provision will be made to include the presentation in the agenda. Those who call in and register in advance will be given the opportunity to speak first. Others will be accommodated as time permits. The Board Chair is empowered to conduct the meeting in a fashion that will facilitate the orderly conduct of business. Individuals wishing to make public comment will be provided a maximum of five minutes to present their comments.

Minutes: The minutes of the meeting will be available at *http://www.em.doe.gov/stakepages/emabmeetings.aspx* for viewing and copying. Minutes will also be available by calling Terri Lamb at (202) 586–9007.

Issued at Washington, DC on August 17, 2007.

BILLING CODE 6450–01–P

DEPARTMENT OF ENERGY

Onyx Optics, Inc.

AGENCY: Office of the General Counsel, Department of Energy.

ACTION: Notice of intent to grant exclusive patent license.

SUMMARY: Notice is hereby given to an intent to grant to Onyx Optics, Inc. (''Onyx''), of Dublin, California, an exclusive license to practice the inventions described in U.S. Patent No. 6,544,330, entitled ''Bonded, Walk-off Compensated Optical Elements''. The inventions are owned by the United States of America, as represented by the U.S. Department of Energy (DOE).

DATES: Written comments or nonexclusive license applications are to be received at the address listed below no later than September 21, 2007.

ADDRESSES: Office of the Assistant General Counsel for Technology Transfer and Intellectual Property, U.S. Department of Energy, 1000 Independence Ave., SW., Washington, DC 20585.

FOR FURTHER INFORMATION CONTACT: John T. Lucas, Office of the Assistant General Counsel for Technology Transfer and Intellectual Property, U.S. Department of Energy, Forrestal Building, Room 6F–067, 1000 Independence Ave., SW., Washington, DC 20585; Telephone (202) 586–2939.

SUPPLEMENTARY INFORMATION: 35 U.S.C. 209 provides federal agencies with authority to grant exclusive licenses in federally-owned inventions, if, among other things, the agency finds that the public will be served by the granting of the license. The statute requires that no exclusive license may be granted unless public notice of the intent to grant the license has been provided, and the agency has considered all comments received in response to that public notice, before the end of the comment period.

Onyx, of Dublin, California, has applied for an exclusive license to practice the inventions embodied in U.S. Patents No. 6,544,330 and has plans for commercialization of the inventions.

The exclusive license will be subject to a license and other rights retained by the U.S. Government, and other terms and conditions to be negotiated. DOE intends to negotiate to grant the license, unless, within 30 days of this notice, the Assistant General Counsel for Technology Transfer and Intellectual Property, Department of Energy, Washington, DC 20585, receives in writing any of the following, together with supporting documents:

(i) A statement from any person setting forth reason why it would not be in the best interests of the United States to grant the proposed license; or

(ii) An application for a nonexclusive license to the invention in which applicant states that it already has brought the invention to practical application or is likely to bring the invention to practical application expeditiously.

The Department will review all timely written responses to this notice, and will proceed with negotiating the license if, after consideration of written responses to this notice, a finding is made that the license is in the public interest.

Issued in Washington, DC on August 16, 2007.

Robert Marchick,

Acting Assistant General Counsel for Technology Transfer and Intellectual Property.

Federal Energy Regulatory Commission

[Docket Nos. RP07–572–000; RP07–569–000; RP07–568–000; RP07–542–000; RP07–570–000; RP07–573–000; RP07–543–000; RP07–544–000; RP07–547–000; RP07–564–000; RP07–566–000; RP07–545–000]

ANR Pipeline Company; ANR Storage Company; Blue Lake Gas Storage Company; Canyon Creek Compression Company; CenterPoint Energy—Mississippi River Transmission Corporation; Gulf South Pipeline Company, LP; Do Horizon Pipeline Company, L.L.C.; Natural Gas Pipeline Company of America; Northern Border Pipeline Company; Ozark Gas Transmission, L.L.C.; Texas Gas Transmission, LLC; Trailblazer Pipeline Company; Notice of Proposed Change on FERC Gas Tariff

August 15, 2007.

Take notice that the above-referenced pipelines tendered for filing their tariff sheets respectively, pursuant to section 154.402 of the Commission's Regulations to reflect the Commission's change in the unit rate for the Annual Charge Adjustment (ACA) surcharge to be applied to rates for recovery of 2007 Annual Charges pursuant to Order No. 472, in Docket No. RM87–3–000. The proposed effective date of the tariff sheets is October 1, 2007.

The above-referenced pipelines states that the purpose of their filings is to reflect the revised ACA effective for the twelve-month period beginning October 1, 2007. The pipelines states that their tariff sheets reflect a increase of $.0003 per Dth from $.0016 per Dth in the ACA adjustment surcharge, resulting in a new ACA rate of $.0019 Dth as specified by the Commission in its invoice dated June 28, 2007 for the Annual Charge Billing—Fiscal Year 2007.

Any person desiring to intervene or to protest this filing must file in accordance with Rules 211 and 214 of the Commission's Rules of Practice and Procedure (18 CFR 385.211 and 385.214). Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Any person wishing to become a party must file a notice of intervention or motion to intervene, as appropriate. Such notices, motions, or protests must be filed on or before the date as indicated below. Anyone filing an intervention or protest must serve a copy of that document on the Applicant. Anyone filing an intervention or protest on or before the intervention or protest date need not serve motions to intervene or protests on persons other than the Applicant.

Any person desiring to become a party in any of the listed dockets must file a separate motion to intervene in each docket for which they wish party status.

The Commission encourages electronic submission of protests and interventions in lieu of paper using the ''eFiling'' link at *http://www.ferc.gov*. Persons unable to file electronically should submit an original and 14 copies of the protest or intervention to the Federal Energy Regulatory Commission, 888 First Street, NE., Washington, DC 20426.

This filing is accessible online at *http://www.ferc.gov,* using the ''eLibrary'' link and is available for review in the Commission's Public Reference Room in Washington, DC. There is an ''eSubscription'' link on the Web site that enables subscribers to receive e-mail notification when a document is added to a subscribed docket(s). For assistance with any FERC Online service, please e-mail *FERCOnlineSupport@ferc.gov,* or call (866) 208–3676 (toll free). For TTY, call (202) 502–8659.

Comment Date: 5 p.m. eastern time, August 23, 2007.

Basin Electric Power Cooperative; Notice of Filing

August 15, 2007.

Take notice that on August 10, 2007, Basin Electric Power Cooperative filed a compliance filing, pursuant to the Federal Energy Regulatory Commission's July 11, 2007, letter order.

Any person desiring to intervene or to protest this filing must file in accordance with Rules 211 and 214 of the Commission's Rules of Practice and Procedure (18 CFR 385.211, 385.214). Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Any person wishing to become a party must file a notice of intervention or motion to intervene, as appropriate. Such notices, motions, or protests must be filed on or before the comment date. Anyone filing a motion to intervene or protest must serve a copy of that document on the Applicant and all the parties in this proceeding.

The Commission encourages electronic submission of protests and interventions in lieu of paper using the ''eFiling'' link at *http://www.ferc.gov*. Persons unable to file electronically should submit an original and 14 copies of the protest or intervention to the Federal Energy Regulatory Commission, 888 First Street, NE., Washington, DC 20426.

This filing is accessible online at *http://www.ferc.gov*, using the ''eLibrary'' link and is available for review in the Commission's Public Reference Room in Washington, DC. Bridgeline Holdings, L.P.; Notice of Deferral of Action on Petition for Rate Approval

August 16, 2007.

On August 2, 2007, Bridgeline Holdings, L.P. (Bridgeline) filed a motion for a sixty-day deferral of action on its Petition for Rate Approval filed on June 1, 2007, in the above-docketed proceeding. Bridgeline states that it intends to acquire by way of merger all interest and assets of Bridgeline Distribution and Bridgeline Storage on or about September 1, 2007. Because of these transactions, Bridgeline is requesting a sixty-day deferral of action on its petition for rate approval filed in Docket No. PR07–14–000 until the merger of these assets is complete. Bridgeline further states that on or about September 1, 2007, they will make the necessary filings to the Commission to facilitate this merger. At that time Bridgeline intends to withdraw the instant petition for rate approval in the above-docketed proceeding.

Upon consideration, notice is hereby given that a sixty-day deferral of action on its Petition for Rate Approval is granted to and including October 2, 2007.

BILLING CODE 6717–01–P

DEPARTMENT OF ENERGY

Federal Energy Regulatory Commission

[Docket No. CP07–434–000]

CenterPoint Energy Gas Transmission Company; Notice of Request Under Blanket Authorization

August 15, 2007.

Take notice that on August 10, 2007, CenterPoint Energy Gas Transmission Company (CEGT), 1111 Louisiana Street, Houston, Texas 77002–5231, filed in Docket No. CP07–434–000, a prior notice request pursuant to sections 157.205 and 157.211 of the Federal Energy Regulatory Commission's regulations under the Natural Gas Act for authorization to construct, own, and operate a delivery point, located in Caddo County, Louisiana, all as more fully set forth in the application, which is on file with the Commission and open to public inspection. The filing may also be viewed on the Web at *http://www.ferc.gov* using the ''eLibrary'' link. Enter the docket number excluding the last three digits in the docket number field to access the document. For assistance, contact FERC at *FERCOnlineSupport@ferc.gov* or call toll-free, (886) 208–3676 or TYY, (202) 502–8659.

Specifically, CEGT proposes to install a six-inch tap and a six-inch orifice meter skid with six-inch flow control regulator on CEGT's Line N in order to serve Calumet Lubricants Company, L.P.. CEGT estimates the cost of construction to be $208,457. CEGT states that the facilities will have the capability of delivering up to 10,000 Dth per day.

Any questions regarding the application should be directed to Lawrence O. Thomas, Director—Rate & Regulatory, CenterPoint Energy Gas Transmission Company, P.O. Box 21734, Shreveport, Louisiana 71151, or call at (318) 429–2804.

Any person or the Commission's Staff may, within 60 days after the issuance of the instant notice by the Commission, file pursuant to Rule 214 of the Commission's Procedural Rules (18 CFR 385.214) a motion to intervene or notice of intervention and, pursuant to section 157.205 of the Commission's Regulations under the Natural Gas Act (NGA) (18 CFR 157.205) a protest to the request. If no protest is filed within the time allowed therefore, the proposed activity shall be deemed to be authorized effective the day after the time allowed for protest. If a protest is filed and not withdrawn within 30 days after the time allowed for filing a

protest, the instant request shall be treated as an application for authorization pursuant to Section 7 of the NGA.

The Commission strongly encourages electronic filings of comments, protests, and interventions via the Internet in lieu of paper. See 18 CFR 385.2001(a) (1) (iii) and the instructions on the Commission's Web site (*http://www.ferc.gov*) under the ''e-Filing'' link.

Federal Energy Regulatory Commission

[Docket No. RP07–571–000]

Centerpoint Energy Gas Transmission Company; Notice of Proposed Changes in FERC Gas Tariff

August 15, 2007.

Take notice that on August 13, 2007, CenterPoint Energy Gas Transmission Company (CEGT) tendered for filing as part of its FERC Gas Tariff, Sixth Revised Volume No. 1, First Revised Sheet No. 572, effective September 12, 2007.

CEGT states that the purpose of this filing is to amend and clarify the operational controls provisions of its Tariff.

Any person desiring to intervene or to protest this filing must file in accordance with Rules 211 and 214 of the Commission's Rules of Practice and Procedure (18 CFR 385.211 and 385.214). Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Any person wishing to become a party must file a notice of intervention or motion to intervene, as appropriate. Such notices, motions, or protests must be filed in accordance with the provisions of section 154.210 of the Commission's regulations (18 CFR 154.210). Anyone filing an intervention or protest must serve a copy of that document on the Applicant. Anyone filing an intervention or protest on or before the intervention or protest date need not serve motions to intervene or protests on persons other than the Applicant.

The Commission encourages electronic submission of protests and interventions in lieu of paper using the ''eFiling'' link at *http://www.ferc.gov*. Persons unable to file electronically should submit an original and 14 copies of the protest or intervention to the Federal Energy Regulatory Commission, 888 First Street, NE., Washington, DC 20426.

This filing is accessible on-line at *http://www.ferc.gov*, using the ''eLibrary'' link and is available for review in the Commission's Public Reference Room in Washington, DC. BILLING CODE 6717–01–P

DEPARTMENT OF ENERGY

Federal Energy Regulatory Commission

[Docket No. CP07–433–000]

Columbia Gas Transmission Corporation; Notice of Application

August 15, 2007.

Take notice that on August 10, 2007, Columbia Gas Transmission Corporation (Columbia), 1700 MacCorkle Avenue, SE., Charleston, West Virginia 25314, pursuant to section 7(c) of the Natural Gas Act (NGA), filed an application for a certificate of public convenience and necessity, seeking authority to test and evaluate its Lanham, Terra Alta, and Terra Alta South storage fields, all located in West Virginia. Columbia will collect and analyze the information it obtains to validate using these storage fields to develop further storage services, all as more fully set forth in the application which is on file with the Commission and open to public inspection. This filing is available for review at the Commission in the Public Reference Room or may be viewed on the Commission's Web site at *http://www.ferc.gov* using the ''e-Library'' link. Enter the docket number excluding the last three digits in the docket number field to access the document. For assistance, contact FERC at FERCOnlineSupport or call toll-free, (866) 208–3676, or for TTY, (202) 502–8659.

Any questions regarding this application should be directed to Fredric J. Geroge, Lead Counsel, Columbia Gas Transmission Corporation, P.O. Box 1273, Charleston, West Virginia 25325 at (304) 357–2359 or fax (304) 357–3206.

Pursuant to section 157.9 of the Commission's rules, 18 CFR 157.9, within 90 days of this Notice the Commission staff will either: Complete its environmental assessment (EA) and place it into the Commission's public record (e-Library) for this proceeding; or issue a Notice of Schedule for Environmental Review. If a Notice of Schedule for Environmental Review is issued, it will indicate, among other milestones, the anticipated date for the Commission staff's issuance of the final environmental impact statement (FEIS) or EA for this proposal. The filing of the EA in the Commission's public record for this proceeding or the issuance of a Notice of Schedule for Environmental Review will serve to notify federal and state agencies of the timing for the completion of all necessary reviews, and the subsequent need to complete all federal authorizations within 90 days of the date of issuance of the Commission staff's FEIS or EA.

There are two ways to become involved in the Commission's review of this project. First, any person wishing to obtain legal status by becoming a party to the proceedings for this project should, on or before the comment date stated below, file with the Federal Energy Regulatory Commission, 888 First Street, NE., Washington, DC 20426, a motion to intervene in accordance with the requirements of the Commission's Rules of Practice and Procedure (18 CFR 385.214 or 385.211) and the Regulations under the NGA (18 CFR 157.10). A person obtaining party status will be placed on the service list maintained by the Secretary of the Commission and will receive copies of all documents filed by the applicant and by all other parties. A party must submit 14 copies of filings made with the Commission and must mail a copy to the applicant and to every other party in the proceeding. Only parties to the proceeding can ask for court review of Commission orders in the proceeding.

However, a person does not have to intervene in order to have comments considered. The second way to participate is by filing with the Secretary of the Commission, as soon as possible, an original and two copies of comments in support of or in opposition to this project. The Commission will consider these comments in determining the appropriate action to be taken, but the filing of a comment alone will not serve to make the filer a party to the proceeding. The Commission's rules require that persons filing comments in opposition to the project

provide copies of their protests only to the party or parties directly involved in the protest.

Persons who wish to comment only on the environmental review of this project should submit an original and two copies of their comments to the Secretary of the Commission. Environmental commentors will be placed on the Commission's environmental mailing list, will receive copies of the environmental documents, and will be notified of meetings associated with the Commission's environmental review process. Environmental commentors will not be required to serve copies of filed documents on all other parties. However, the non-party commentors will not receive copies of all documents filed by other parties or issued by the Commission (except for the mailing of environmental documents issued by the Commission) and will not have the right to seek court review of the Commission's final order.

The Commission strongly encourages electronic filings of comments protests and interventions via the Internet in lieu of paper. See 18 CFR 385.2001(a)(1)(iii) and the instructions on the Commission's Web (*http://www.ferc.gov*) site under the ''e-Filing'' link.

Comment Date: September 5, 2007.

[Docket No. RP97–81–039]

Kinder Morgan Interstate Gas Transmission LLC; Notice of Compliance Filing

August 15, 2007.

Take notice that on August 3, 2007 Kinder Morgan Interstate Gas Transmission LLC (KMIGT) tendered for filing as part of its FERC Gas Tariff, Fourth Revised Volume No. 1–A, the following tariff sheets, to be effective August 3, 2007:

Original Sheet No. 4G.02.
Original Sheet No. 4N.

KMIGT states that the tariff sheets are being filed in compliance with the Commission's December 31, 1996 ''Order Accepting Tariff Filing Subject to Conditions'' in Docket No. RP97–81 (77 FERC ¶ 61,350) and the Commission's Letter Orders dated March 28, 1997 and November 30, 2000 in Docket Nos. RP97–81–001 and RP01–70–000, respectively.

KMIGT states that a copy of this filing has been served upon all parties to this proceeding, KMIGT's customers and affected state commissions.

Any person desiring to protest this filing must file in accordance with Rule 211 of the Commission's Rules of Practice and Procedure (18 CFR 385.211). Protests to this filing will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Such protests must be filed in accordance with the provisions of section 154.210 of the Commission's regulations (18 CFR 154.210). Anyone filing a protest must serve a copy of that document on all the parties to the proceeding.

The Commission encourages electronic submission of protests in lieu of paper using the ''eFiling'' link at *http://www.ferc.gov.* Persons unable to file electronically should submit an original and 14 copies of the protest to the Federal Energy Regulatory Commission, 888 First Street, NE., Washington, DC 20426.

This filing is accessible online at *http://www.ferc.gov,* using the ''eLibrary'' link and is available for review in the Commission's Public Reference Room in Washington, DC. There is an ''eSubscription'' link on the Web site that enables subscribers to receive e-mail notification when a document is added to a subscribed docket(s). For assistance with any FERC Online service, please e-mail *FERCOnlineSupport@ferc.gov,* or call (866) 208–3676 (toll free). For TTY, call (202) 502–8659.

[Docket No. RP07–574–000]

Northern Natural Gas Company; Notice of Proposed Changes in FERC Gas Tariff

August 15, 2007.

Take notice that on August 14, 2007, Northern Natural Gas Company (Northern), tendered for filing as part of its FERC Gas Tariff, Fifth Revised Volume No. 1, the following tariff sheets, with an effective date of November 1, 2007:

Fourth Revised Sheet No. 263F.
Fourth Revised Sheet No. 263G.
Eleventh Revised Sheet No. 263H.
Tenth Revised Sheet No. 263H.1.

Northern states that it is filing the above referenced tariff sheets to reflect adjusted Carlton flow obligations as a result of Appendix B customers' elections to source or buy out of their flow obligations pursuant to section 29 (C) 2 of Northern's Tariff. The above referenced sheets also contain various Carlton sourcing clarifications.

Northern further states that copies of the filing have been mailed to each of its customers and interested State Commissions.

Any person desiring to intervene or to protest this filing must file in accordance with Rules 211 and 214 of the Commission's Rules of Practice and Procedure (18 CFR 385.211 and 385.214). Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Any person wishing to become a party must file a notice of intervention or motion to intervene, as appropriate. Such notices, motions, or protests must be filed in accordance with the provisions of section 154.210 of the Commission's regulations (18 CFR 154.210). Anyone filing an intervention or protest must serve a copy of that document on the Applicant. Anyone filing an intervention or protest on or before the intervention or protest date need not serve motions to intervene or protests on persons other than the Applicant.

The Commission encourages electronic submission of protests and interventions in lieu of paper using the ''eFiling'' link at *http://www.ferc.gov.* Persons unable to file electronically should submit an original and 14 copies of the protest or intervention to the Federal Energy Regulatory Commission, 888 First Street, NE., Washington, DC 20426.

This filing is accessible online at *http://www.ferc.gov*, using the ''eLibrary'' link and is available for review in the Commission's Public Reference Room in Washington, DC. Northern Natural Gas Company; Notice of Proposed Changes in FERC Gas Tariff

August 15, 2007.

Take notice that on August 14, 2007, Northern Natural Gas Company (Northern), tendered for filing as part of its FERC Gas Tariff, Fifth Revised Volume No. 1, the following tariff sheets, to be effective on September 14, 2007:

Fourth Revised Sheet No. 447.
First Revised Sheet No. 448.
First Revised Sheet No. 449.

Northern states that it is filing the above referenced tariff sheets to add a 2008 FDD market-based rate expansion pro-forma service agreement to its tariff.

Northern further states that copies of the filing have been mailed to each of its customers and interested State Commissions.

Any person desiring to intervene or to protest this filing must file in accordance with Rules 211 and 214 of the Commission's Rules of Practice and Procedure (18 CFR 385.211 and 385.214). Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Any person wishing to become a party must file a notice of intervention or motion to intervene, as appropriate. Such notices, motions, or protests must be filed in accordance with the provisions of section 154.210 of the Commission's regulations (18 CFR 154.210). Anyone filing an intervention or protest must serve a copy of that document on the Applicant. Anyone filing an intervention or protest on or before the intervention or protest date need not serve motions to intervene or protests on persons other than the Applicant.

The Commission encourages electronic submission of protests and interventions in lieu of paper using the ''eFiling'' link at *http://www.ferc.gov.* Persons unable to file electronically should submit an original and 14 copies of the protest or intervention to the Federal Energy Regulatory Commission, 888 First Street, NE., Washington, DC 20426.

PetroLogistics Natural Gas Storage, LLC; Notice of Application

August 15, 2007.

Take notice that on August 2, 2007, PetroLogistics Natural Gas Storage, LLC (PetroLogistics), 900 Fannin, Suite 2630, Houston, Texas 77010, pursuant to section 7(c) of the Natural Gas Act (NGA) and Parts 157 and 284 of the Commission's regulations, filed an abbreviated application for certificates of public convenience and necessity, seeking authority to own, operate, construct, install, and maintain a high deliverability natural gas salt dome storage cavern and header pipeline at the Bayou Choctaw storage facility in Iberville Parish, Louisiana; to provide open-access firm and interruptible storage and hub services in interstate commerce at market-based rates under 18 CFR Part 284, Subpart G; and to undertake the limited construction and operation activities permitted under 18 CFR Part 157, Subpart F. This filing is available for review at the Commission in the Public Reference Room or may be viewed on the Commission's Web site at *http://www.ferc.gov* using the ''e-Library'' link. Enter the docket number excluding the last three digits in the docket number field to access the document. For assistance, contact FERC at FERCOnlineSupport or call toll-free, (866) 208–3676, or for TTY, (202) 502–8659.

PetroLogistics proposes to offer open access firm and interruptible storage and hub services and requests authority to charge market-based rates for its proposed services. The proposed terms and conditions for Golden Triangle's services are included in the *pro forma* tariff included in Exhibit P of the application.

Any questions regarding this application should be directed to Randall S. Rich, Bracewell & Giuliani

LLP, 2000 K Street, NW., Suite 500, Washington, DC 20006 at (202) 828–5800 or *randy.rich@bgllp.com.*

Pursuant to section 157.9 of the Commission's rules, 18 CFR 157.9, within 90 days of this Notice the Commission staff will either: Complete its environmental assessment (EA) and place it into the Commission's public record (eLibrary) for this proceeding; or issue a Notice of Schedule for Environmental Review. If a Notice of Schedule for Environmental Review is issued, it will indicate, among other milestones, the anticipated date for the Commission staff's issuance of the final environmental impact statement (FEIS) or EA for this proposal. The filing of the EA in the Commission's public record for this proceeding or the issuance of a Notice of Schedule for Environmental Review will serve to notify federal and state agencies of the timing for the completion of all necessary reviews, and the subsequent need to complete all federal authorizations within 90 days of the date of issuance of the Commission staff's FEIS or EA.

There are two ways to become involved in the Commission's review of this project. First, any person wishing to obtain legal status by becoming a party to the proceedings for this project should, on or before the comment date stated below, file with the Federal Energy Regulatory Commission, 888 First Street, NE., Washington, DC 20426, a motion to intervene in accordance with the requirements of the Commission's Rules of Practice and Procedure (18 CFR 385.214 or 385.211) and the Regulations under the NGA (18 CFR 157.10). A person obtaining party status will be placed on the service list maintained by the Secretary of the Commission and will receive copies of all documents filed by the applicant and by all other parties. A party must submit 14 copies of filings made with the Commission and must mail a copy to the applicant and to every other party in the proceeding. Only parties to the proceeding can ask for court review of Commission orders in the proceeding.

However, a person does not have to intervene in order to have comments considered. The second way to participate is by filing with the Secretary of the Commission, as soon as possible, an original and two copies of comments in support of or in opposition to this project. The Commission will consider these comments in determining the appropriate action to be taken, but the filing of a comment alone will not serve to make the filer a party to the proceeding. The Commission's rules require that persons filing comments in opposition to the project provide copies of their protests only to the party or parties directly involved in the protest.

Persons who wish to comment only on the environmental review of this project should submit an original and two copies of their comments to the Secretary of the Commission. Environmental commentors will be placed on the Commission's environmental mailing list, will receive copies of the environmental documents, and will be notified of meetings associated with the Commission's environmental review process. Environmental commentors will not be required to serve copies of filed documents on all other parties. However, the non-party commentors will not receive copies of all documents filed by other parties or issued by the Commission (except for the mailing of environmental documents issued by the Commission) and will not have the right to seek court review of the Commission's final order.

The Commission strongly encourages electronic filings of comments, protests and interventions via the Internet in lieu of paper. See 18 CFR 385.2001(a)(1)(iii) and the instructions on the Commission's Web (*http://www.ferc.gov*) site under the ''e-Filing'' link.

Pine Prairie Energy Center, LLC; Notice of Filing

August 15, 2007.

Take notice that on August 1, 2007 Pine Prairie Energy Center, LLC (Pine Prairie) submitted a compliance filing pursuant to the Commission order issued on November 23, 2004, in Docket Nos. CP04–379–000, CP04–380–000 and CP04–381–000 (Pine Prairie Energy Center, LLC, 109 FERC ¶ 61,215 (2004)).

Pine Prairie states that copies of the filing were served on parties on the official service list in the above-captioned proceeding.

Any person desiring to intervene or to protest this filing must file in accordance with Rules 211 and 214 of the Commission's Rules of Practice and Procedure (18 CFR 385.211 and 385.214). Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Any person wishing to become a party must file a notice of intervention or motion to intervene, as appropriate. Such notices, motions, or protests must be filed in accordance with the provisions of section 154.210 of the Commission's regulations (18 CFR 154.210). Anyone filing an intervention or protest must serve a copy of that document on the Applicant. Anyone filing an intervention or protest on or before the intervention or protest date need not serve motions to intervene or protests on persons other than the Applicant.

The Commission encourages electronic submission of protests and interventions in lieu of paper using the ''eFiling'' link at *http://www.ferc.gov.* Persons unable to file electronically should submit an original and 14 copies of the protest or intervention to the Federal Energy Regulatory Commission, 888 First Street, NE., Washington, DC 20426.

Transwestern Pipeline Company, LLC; Notice of Compliance Filing

August 15, 2007.

Take notice that on August 3, 2007, Transwestern Pipeline Company, LLC (Transwestern) tendered for filing as part of its FERC Gas Tariff, Third Revised Volume No. 1, the tariff sheets in Appendix A attached to the filing to become effective August 1, 2007.

Transwestern states that the filing is being made in compliance with the February 1, 2007 Stipulation and Agreement in the above referenced proceedings, as approved by Commission order dated June 26, 2007.

Any person desiring to protest this filing must file in accordance with Rule 211 of the Commission's Rules of Practice and Procedure (18 CFR 385.211). Protests to this filing will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Such protests must be filed in accordance with the provisions of Section 154.210 of the Commission's regulations (18 CFR 154.210). Anyone filing a protest must serve a copy of that document on all the parties to the proceeding.

The Commission encourages electronic submission of protests in lieu of paper using the ''eFiling'' link at *http://www.ferc.gov.* Persons unable to file electronically should submit an original and 14 copies of the protest to the Federal Energy Regulatory Commission, 888 First Street, NE., Washington, DC 20426.

This filing is accessible on-line at *http://www.ferc.gov,* using the ''eLibrary'' link and is available for review in the Commission's Public Reference Room in Washington, DC. There is an ''eSubscription'' link on the Web site that enables subscribers to receive e-mail notification when a document is added to a subscribed docket(s). For assistance with any FERC Online service, please e-mail *FERCOnlineSupport@ferc.gov,* or call (866) 208–3676 (toll free). For TTY, call (202) 502–8659.

Kimberly D. Bose,

Secretary.

Tuscarora Gas Transmission Company; Notice of Compliance Filing

August 15, 2007.

Take notice that on August 3, 2007, Tuscarora Gas Transmission Company (Tuscarora) tendered for filing as part of its FERC Gas Tariff, Original Volume No. 1, the following tariff sheets to become effective August 31, 2007:

First Revised Sheet No. 64.
Original Sheet No. 64A.

Tuscarora states that the filing is being made to comply with the Commission's Order Accepting Tariff Sheet, and Directing Additional Tariff Revision issued on July 6, 2007 in Docket No. RP07–482–000 (120 FERC ¶ 61,022).

Any person desiring to protest this filing must file in accordance with Rule 211 of the Commission's Rules of Practice and Procedure (18 CFR 385.211). Protests to this filing will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Such protests must be filed in accordance with the provisions of Section 154.210 of the Commission's regulations (18 CFR 154.210). Anyone filing a protest must serve a copy of that document on all the parties to the proceeding.

The Commission encourages electronic submission of protests in lieu of paper using the ''eFiling'' link at *http://www.ferc.gov.* Persons unable to file electronically should submit an original and 14 copies of the protest to the Federal Energy Regulatory Commission, 888 First Street, NE., Washington, DC 20426.

[Docket No. CP07–436–000]

Williston Basin Interstate Pipeline Company; Notice of Application

August 15, 2007.

Take notice that on August 13, 2007, Williston Basin Interstate Pipeline Company (Williston Basin), P.O. Box 5601, Bismarck, North Dakota 58506–5601, filed in Docket No. CP07–436–000 an application pursuant to section 7(b) of the Natural Gas Act (NGA) for permission and approval to abandon sections of mainline natural gas pipeline facilities, located in Dawson County, Montana, all as more fully set forth in the application.

The application is on file with the Commission and open for public inspection. This filing is available for review at the Commission in the Public Reference Room or may be viewed on the Commission's Web site at *http://www.ferc.gov* using the ''eLibrary'' link. Enter the docket number excluding the last three digits in the docket number field to access the document. For assistance, please contact FERC Online Support at *FERCOnlineSupport@ferc.gov* and follow the instructions or toll-free at (866) 208–3676, or for TTY, contact (202) 502–8659.

Any questions concerning this request may be directed to Keith A. Tiggelaar, Director of Regulatory Affairs for Williston Basin, 1250 West Century Avenue, Bismarck, North Dakota 58503, or call (701) 530–1560, or e-mail *keith.tiggelaar@wbip.com.*

Williston Basin proposes to abandon certain segments of two different vintage pipeline river crossings of the Yellowstone River located in Dawson County, Montana. The first vintage pipeline to be abandoned, it is said, consists of approximately 1,390 feet of 8-inch pipeline, the majority of which hangs from the Burlington Northern Santa Fe (BNSF) railroad bridge.

It is stated, that on May 13, 1998, Williston Basin filed for, and received, authorization in Docket No. CP98–544–000 to construct a new 16-inch river crossing and to disconnect an 8-inch river crossing hanging on the BNSF railroad bridge. Williston Basin points out that this 8-inch pipeline has not been used since it was disconnected in 1998. Thus, Williston Basin contends that no customers would be affected by the abandonment of this facility. Williston Basin proposes to remove approximately 60 feet of this 8-inch pipeline which lies underground (40 feet on the north side of the river and 20 feet on the south side of the river), with the remainder (approximately 1,330 feet) of this pipeline to be abandoned in place and to remain on the BNSF railroad bridge.

The second vintage pipeline, Williston Basin states it proposes to remove, would be approximately 410 feet of 16-inch pipeline from the north side of the Yellowstone River and approximately 300 feet of 16-inch pipeline from the south side of the Yellowstone River. Williston Basin maintains that these segments of pipeline, abandoned in place in 1999, lie in close proximity to the active 16-inch line constructed in 1998. Williston Basin concludes that removing these segments of 16-inch pipeline would ensure that they are not exposed by any future Yellowstone River bank erosion.

Williston Basin avers that the sections of pipeline proposed to be abandoned are neither strategic nor integral to Williston Basin's primary business of transporting natural gas in interstate commerce. Additionally, Williston Basin states that these facilities currently are not needed and are not being used to perform Williston Basin's service obligations.

Pursuant to Section 157.9 of the Commission's rules, 18 CFR 157.9, within 90 days of this Notice the Commission staff will either: Complete its environmental assessment (EA) and place it into the Commission's public record (eLibrary) for this proceeding, or issue a Notice of Schedule for Environmental Review. If a Notice of Schedule for Environmental Review is issued, it will indicate, among other milestones, the anticipated date for the Commission staff's issuance of the final environmental impact statement (FEIS) or EA for this proposal. The filing of the EA in the Commission's public record for this proceeding or the issuance of a Notice of Schedule for Environmental Review will serve to notify federal and state agencies of the timing for the completion of all necessary reviews, and the subsequent need to complete all federal authorizations within 90 days of the date of issuance of the Commission staff's FEIS or EA.

There are two ways to become involved in the Commission's review of this project. First, any person wishing to obtain legal status by becoming a party to the proceedings for this project should, on or before the comment date stated below file with the Federal Energy Regulatory Commission, 888 First Street, NE., Washington, DC 20426, a motion to intervene in accordance with the requirements of the

Commission's Rules of Practice and Procedure (18 CFR 385.214 or 385.211) and the Regulations under the NGA (18 CFR 157.10). A person obtaining party status will be placed on the service list maintained by the Secretary of the Commission and will receive copies of all documents filed by the applicant and by all other parties. A party must submit 14 copies of filings made with the Commission and must mail a copy to the applicant and to every other party in the proceeding. Only parties to the proceeding can ask for court review of Commission orders in the proceeding.

However, a person does not have to intervene in order to have comments considered. The second way to participate is by filing with the Secretary of the Commission, as soon as possible, an original and two copies of comments in support of or in opposition to this project. The Commission will consider these comments in determining the appropriate action to be taken, but the filing of a comment alone will not serve to make the filer a party to the proceeding. The Commission's rules require that persons filing comments in opposition to the project provide copies of their protests only to the party or parties directly involved in the protest.

The Commission strongly encourages electronic filings of comments, protests and interventions via the Internet in lieu of paper. See, 18 CFR 385.2001(a)(1)(iii) and the instructions on the Commission's Web site *http://www.ferc.gov* under the ''e-Filing'' link.

Comment Date: September 5, 2007.

Combined Notice of Filings # 1

August 16, 2007.

Take notice that the Commission received the following electric corporate filings:

Docket Numbers: EC07–125–000.

Applicants: Calpine Acadia Holdings, LLC; Acadia Power Partners, LLC; Cajun Gas Energy, LLC.

Description: Acadia Power Partners, LLC et al submits a Joint Application for approval of Calpine Acadia Holdings, LLC submit indirect transfer of its existing interest in Acadia Power Partners, LLC to Cajun Gas Energy, LLC.

Filed Date: 08/08/2007.

Accession Number: 20070814–0050.

Comment Date: 5 p.m. Eastern Time on Wednesday, August 29, 2007.

Take notice that the Commission received the following electric rate filings:

Docket Numbers: ER04–839–002.

Applicants: MAG Energy Solutions, Inc.

Description: MAG Energy Solutions Inc submits its Triennial Updated Market Power Analysis and Revised Market-Based Rate Tariff.

Filed Date: 08/14/2007.

Accession Number: 20070815–0177.

Comment Date: 5 p.m. Eastern Time on Tuesday, September 04, 2007.

Docket Numbers: ER07–809–002.

Applicants: Florida Power Corporation.

Description: Florida Power Corp d/b/a Progress Energy Florida, Inc submits corrections to its 8/2/07 response to FERC's 6/21/07 deficiency letter.

Filed Date: 08/14/2007.

Accession Number: 20070815–0157.

Comment Date: 5 p.m. Eastern Time on Tuesday, September 04, 2007.

Docket Numbers: ER07–1161–001.

Applicants: Public Power & Utility, Inc.

Description: Public Power & Utility, Inc submits a petition for acceptance of FERC Electric Tariff, Original Volume 1.

Filed Date: 08/08/2007.

Accession Number: 20070813–0075.

Comment Date: 5 p.m. Eastern Time on Wednesday, August 29, 2007.

Docket Numbers: ER07–1180–001.

Applicants: California Independent System Operator Corporation.

Description: California Independent System Operator Corp submits an errata to their 7/20/07 filing of a petition to waive sanctions for violation of Section 31.1.4.1 of its Tariff through 10/18/06.

Filed Date: 08/09/2007.

Accession Number: 20070813–0082.

Comment Date: 5 p.m. Eastern Time on Thursday, August 30, 2007.

Docket Numbers: ER07–1207–001.

Applicants: Premier Energy Marketing LLC.

Description: Application of Premier Energy Marketing LLC for acceptance of Initial Rate Schedule, Waiver and Blanket Authority.

Filed Date: 08/14/2007.

Filed Date: 08/14/2007.

Accession Number: 20070815–0158.

Comment Date: 5 p.m. Eastern Time on Tuesday, September 04, 2007.

Any person desiring to intervene or to protest in any of the above proceedings must file in accordance with Rules 211 and 214 of the Commission's Rules of Practice and Procedure (18 CFR 385.211 and 385.214) on or before 5 p.m. Eastern time on the specified comment date. It is not necessary to separately intervene again in a subdocket related to a compliance filing if you have previously intervened in the same docket. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Anyone filing a motion to intervene or protest must serve a copy of that document on the Applicant. In reference to filings initiating a new proceeding, interventions or protests submitted on or before the comment deadline need not be served on persons other than the Applicant.

The Commission encourages electronic submission of protests and interventions in lieu of paper, using the FERC Online links at *http://www.ferc.gov.* To facilitate electronic service, persons with Internet access who will eFile a document and/or be listed as a contact for an intervenor must create and validate an eRegistration account using the eRegistration link. Select the eFiling link to log on and submit the intervention or protests.

Persons unable to file electronically should submit an original and 14 copies of the intervention or protest to the

Federal Energy Regulatory Commission, 888 First St., NE., Washington, DC 20426.

The filings in the above proceedings are accessible in the Commission's eLibrary system by clicking on the appropriate link in the above list. They are also available for review in the Commission's Public Reference Room in Washington, DC. There is an eSubscription link on the Web site that enables subscribers to receive e-mail notification when a document is added to a subscribed docket(s). For assistance with any FERC Online service, please e-mail *FERCOnlineSupport@ferc.gov,* or call (866) 208–3676 (toll free). For TTY, call (202) 502–8659.

BILLING CODE 6717–01–P

DEPARTMENT OF ENERGY

Federal Energy Regulatory Commission

[Docket No. CP07–107–000]

Northern Natural Gas Company; Notice of Intent To Prepare an Environmental Assessment for the Proposed Cunningham Storage Boundary Extension Project and Request for Comments on Environmental Issues

August 15, 2007.

The staff of the Federal Energy Regulatory Commission (FERC or Commission) will prepare an environmental assessment (EA) that will discuss the environmental impacts of the Cunningham Storage Boundary Extension Project involving Northern Natural Gas Company's (Northern) extension of the certificated boundary of the Cunningham Gas Storage Field in Pratt and Kingman Counties, Kansas.[1] This EA will be used by the Commission in its decision-making process to determine whether the project is in the public convenience and necessity.

If you are a landowner receiving this notice, you may be contacted by a gas storage company representative about the acquisition of natural gas storage rights beneath your property. The gas storage company would seek to negotiate a mutually acceptable agreement for the rights to operate a natural gas storage field beneath your property. It should be noted that the current proposal does not involve the construction of any facilities at this time. Any future proposal to construct jurisdictional facilities at the Cunningham Storage Field would be subject to an appropriate environmental review by the Commission.

A fact sheet prepared by the FERC entitled ''An Interstate Natural Gas Facility on My Land? What Do I Need To Know?'' was attached to the project notice that Northern provided to landowners. This fact sheet addresses a number of typically asked questions, including the use of eminent domain and how to participate in the Commission's proceedings. It is available for viewing on the FERC Internet Web site (*http://www.ferc.gov*).

Summary of the Proposed Project

Northern is proposing to extend its existing Cunningham Gas Storage Field by 4,800 acres in order to protect the integrity of the storage field. Northern believes that third party operators outside of the storage field boundaries are producing storage gas. The location of the proposed storage field extension is shown in Appendix 1.[2]

Land Requirements

No facilities would be constructed. Northern's proposal is for extension of the certificated Cunningham Storage Field boundary by an additional 4,800 acres. This area is located due north and adjacent to the northern boundary of the storage field.

The EA Process

The National Environmental Policy Act (NEPA) requires the Commission to take into account the environmental impacts that could result from an action whenever it considers the issuance of a Certificate of Public Convenience and Necessity. NEPA also requires us to discover and address concerns the public may have about proposals. This process is referred to as ''scoping''. The main goal of the scoping process is to focus the analysis in the EA on the important environmental issues. By this Notice of Intent, the Commission staff requests public comments on the scope of the issues to address in the EA. All comments received are considered during the preparation of the EA. State and local government representatives are encouraged to notify their constituents of this proposed action and encourage them to comment on their areas of concern.

In the EA we[3] will discuss impacts that could occur as a result of the storage field extension. We will also evaluate possible alternatives to the proposed project or portions of the project, and make recommendations on how to lessen or avoid impacts on the various resource areas.

Our independent analysis of the issues will be in the EA. Depending on the comments received during the scoping process, the EA may be published and mailed to federal, state, and local agencies, public interest groups, interested individuals, affected landowners, newspapers, libraries, and the Commission's official service list for this proceeding. A comment period will be allotted for review if the EA is published. We will consider all comments on the EA before we make our recommendations to the Commission.

To ensure your comments are considered, please carefully follow the instructions in the public participation section below.

Public Participation

You can make a difference by providing us with your specific comments or concerns about the project. By becoming a commentor, your concerns will be addressed in the EA and considered by the Commission. You should focus on the potential environmental effects of the proposal, alternatives to the proposal, and measures to avoid or lessen environmental impact. The more specific your comments, the more useful they will be. Please carefully follow these instructions to ensure that your comments are received in time and properly recorded:

- Send an original and two copies of your letter to: Kimberly D. Bose, Secretary, Federal Energy Regulatory Commission, 888 First St., NE., Room 1A, Washington, DC 20426.
- Label one copy of the comments for the attention of Gas Branch 3.
- Reference Docket No. CP07–107–000.
- Mail your comments so that they will be received in Washington, DC on or before September 17, 2007.

The Commission strongly encourages electronic filing of any comments or interventions or protests to this proceeding. See 18 CFR 385.2001(a)(1)(iii) and the instructions

[1] Northern's application was filed with the Commission under Section 7 of the Natural Gas Act.

[2] The appendices referenced in this notice are not being printed in the **Federal Register**. Copies of all appendices, other than Appendix 1 (map), are available on the Commission's Web site at the ''eLibrary'' link or from the Commission's Public Reference Room, 888 First Street, NE., Washington, DC 20426, or call (202) 502–8371. For instructions on connecting to eLibrary refer to the last page of this notice. Copies of the appendices were sent to all those receiving this notice in the mail.

[3] ''We'', ''us'', and ''our'' refer to the environmental staff of the Office of Energy Projects (OEP).

on the Commission's Web site at *http://www.ferc.gov* under the ''e-Filing'' link and the link to the User's Guide. Before you can file comments you will need to create a free account which can be created on-line.

We may mail the EA for comment. If you are interested in receiving it, please return the Information Request (Appendix 2). If you do not return the Information Request, you will be taken off the mailing list.

Becoming an Intervenor

In addition to involvement in the EA scoping process, you may want to become an official party to the proceeding, or ''intervenor''. To become an intervenor you must file a motion to intervene according to Rule 214 of the Commission's Rules of Practice and Procedure (18 CFR 385.214). Intervenors have the right to seek rehearing of the Commission's decision. Motions to Intervene should be electronically submitted using the Commission's eFiling system at *http://www.ferc.gov*. Persons without Internet access should send an original and 14 copies of their motion to the Secretary of the Commission at the address indicated previously. Persons filing Motions to Intervene on or before the comment deadline indicated above must send a copy of the motion to the Applicant. All filings, including late interventions, submitted after the comment deadline must be served on the Applicant and all other intervenors identified on the Commission's service list for this proceeding. Persons on the service list with e-mail addresses may be served electronically; others must be served a hard copy of the filing.

Affected landowners and parties with environmental concerns may be granted intervenor status upon showing good cause by stating that they have a clear and direct interest in this proceeding which would not be adequately represented by any other parties. You do not need intervenor status to have your environmental comments considered.

Environmental Mailing List

An effort is being made to send this notice to all individuals, organizations, and government entities interested in and/or potentially affected by the proposed project. This includes all landowners who are potential right-of-way grantors, whose property may be used temporarily for project purposes, or who own homes within distances defined in the Commission's regulations of certain aboveground facilities.

Additional Information

Additional information about the project is available from the Commission's Office of External Affairs, at 1–866–208–FERC or on the FERC Internet Web site (*http://www.ferc.gov*) using the eLibrary link. Click on the eLibrary link, click on ''General Search'' and enter the docket number excluding the last three digits in the Docket Number field. Be sure you have selected an appropriate date range. For assistance, please contact FERC Online Support at *FercOnlineSupport@ferc.gov* or toll free at 1–866–208–3676, or for TTY, contact (202) 502–8659. The eLibrary link also provides access to the texts of formal documents issued by the Commission, such as orders, notices, and rulemakings.

In addition, the Commission now offers a free service called eSubscription, which allows you to keep track of all formal issuances and submittals in specific dockets. This can reduce the amount of time you spend researching proceedings by automatically providing you with notification of these filings, document summaries and direct links to the documents. Go to *http://www.ferc.gov/esubscribenow.htm.*

Finally, public meetings or site visits will be posted on the Commission's calendar located at *http://www.ferc.gov/EventCalendar/EventsList.aspx* along with other related information.

Kimberly D. Bose,

Secretary.

BILLING CODE 6717–01–P

DEPARTMENT OF ENERGY

Federal Energy Regulatory Commission

[Project No. 1864–079]

Upper Peninsula Power Company; Notice of Application for Amendment of License and Soliciting Comments, Motions To Intervene, and Protests

August 15, 2007.

Take notice that the following hydroelectric application has been filed with the Commission and is available for public inspection:

a. *Application Type:* Amendment of License to Permanent Modifications to Articles 401 and 402.

b. *Project No:* 1864–079.

c. *Date Filed:* July 3, 2007.

d. *Applicant:* Upper Peninsula Power Company.

e. *Name of Project:* Bond Falls Hydroelectric Project.

f. *Location:* On the Ontonagon River, in Ontonagon and Gogebic Counties, Michigan, and Vilas County, Wisconsin. One of the project's four developments, Bond Falls, occupies 73.5 acres of land within the Ottawa National Forest.

g. *Filed Pursuant to:* Federal Power Act, 16 U.S.C. 791a–825r.

h. *Applicant Contact:* Terry P. Jensky, Vice President, Energy Supply Operations, Upper Peninsula Power Company, 700 North Adams Street, P.O. Box 19001, Green Bay, WI 54307–9001; (715) 355–2047.

i. *FERC Contact:* Jake Tung, Telephone (202) 502–8757, and e-mail: *hong.tung@ferc.gov.*

j. *Deadline for filing comments, motions to intervene, and protest:* September 17, 2007. All documents (original and eight copies) should be filed with: Secretary, Federal Energy Regulatory Commission, 888 First Street, NE., Washington, DC 20426. The Commission's Rules of Practice and Procedure require all intervenors filing documents with the Commission to serve a copy of that document on each person whose name appears on the official service list for the project. Further, if an intervenor files comments or documents with the Commission relating to the merits of an issue that may affect the responsibilities of a particular resource agency, they must also serve a copy of the document on that resource agency. A copy of any motion to intervene must also be served upon each representative of the Applicant specified in the particular application.

k. *Description of Request:* The applicant proposes to amend the license for the Bond Falls Hydroelectric Project at the Bergland Development (Lake Gogebic), as follows: (1) change end of month target elevations from 1295.7 to 1295.9 ft msl in June and from 1295.7 to 1295.5 ft msl in August and September; (2) change minimum flow trigger-elevations to match the proposed target elevations from 1295.4 to 1295.9 ft msl in June, from 1295.4 to 1295.7 ft msl in July, and from 1295.4 to 1295.5 ft msl for the period August 1 through September 14.

l. *Locations of the Application:* A copy of the application is available for inspection and reproduction at the Commission's Public Reference Room, located at 888 First Street, NE., Room 2A, Washington, DC 20426, or by calling (202) 502–8371. This filing may also be viewed on the Commission's Web site at *http://www.ferc.gov* using the ''eLibrary'' link. Enter the docket number excluding the last three digits in the docket number field to access the document. You may also register online

at *http://www.ferc.gov/docs-filing/esubscription.asp* to be notified via e-mail of new filings and issuances related to this or other pending projects. For assistance, call 1–866–208–3676 or e-mail *FERCOnlineSupport@ferc.gov,* for TTY, call (202) 502–8659. A copy is also available for inspection and reproduction at the address in item (h) above.

m. Individuals desiring to be included on the Commission's mailing list should so indicate by writing to the Secretary of the Commission.

n. *Comments, Protests, or Motions to Intervene:* Anyone may submit comments, a protest, or a motion to intervene in accordance with the requirements of Rules of Practice and Procedure, 18 CFR 385.210, .211, .214. In determining the appropriate action to take, the Commission will consider all protests or other comments filed, but only those who file a motion to intervene in accordance with the Commission's Rules may become a party to the proceeding. Any comments, protests, or motions to intervene must be received on or before the specified comment date for the particular application.

o. Any filings must bear in all capital letters the title ''COMMENTS'', ''PROTEST'', or ''MOTION TO INTERVENE'', as applicable, and the Project Number of the particular application to which the filing refers.

p. *Agency Comments:* Federal, state, and local agencies are invited to file comments on the described application. A copy of the application may be obtained by agencies directly from the Applicant. If an agency does not file comments within the time specified for filing comments, it will be presumed to have no comments. One copy of an agency's comments must also be sent to the Applicant's representatives.

q. Comments, protests and interventions may be filed electronically via the Internet in lieu of paper. See, 18 CFR 385.2001(a)(1)(iii) and the instructions on the Commission's Web site at *http://www.ferc.gov* under the ''e-Filing'' link.

Kimberly D. Bose,

Secretary.

BILLING CODE 6717–01–P

ENVIRONMENTAL PROTECTION AGENCY

[EPA–HQ–SFUND–2007–0707; FRL–8458–3]

Agency Information Collection Activities; Proposed Collection; Comment Request; National Oil and Hazardous Substance Pollution Contingency Plan (NCP) (Renewal); EPA ICR Number 1463.07, OMB Control Number 2050–0096

AGENCY: Environmental Protection Agency (EPA).

ACTION: Notice.

SUMMARY: In compliance with the Paperwork Reduction Act (PRA) (44 U.S.C. 3501 *et seq.*), this document announces that EPA is planning to submit a request to renew an existing approved Information Collection Request (ICR) to the Office of Management and Budget (OMB). This ICR is scheduled to expire on January 31, 2008. Before submitting the ICR to OMB for review and approval, EPA is soliciting comments on specific aspects of the proposed information collection as described below.

DATES: Comments must be submitted on or before October 22, 2007.

ADDRESSES: Submit your comments, identified by Docket ID No. EPA–HQ–SFUND–2007–0707, by one of the following methods:

- *http://www.regulations.gov:* Follow the on-line instructions for submitting comments.
- E-mail: *superfund.docket@epa.gov.*
- Mail: EPA Docket Center, Environmental Protection Agency, Superfund Docket, Mail Code 2822T, 1200 Pennsylvania Ave., NW., Washington, DC 20460.
- Hand Delivery: Superfund Docket, EPA West 3334, 1301 Constitution Ave., NW., Washington, DC 20004. Such deliveries are only accepted during the Docket's normal hours of operation, and special arrangements should be made for deliveries of boxed information.

Instructions: Direct your comments to Docket ID No. EPA–HQ–SFUND–2007–0707. EPA's policy is that all comments received will be included in the public docket without change and may be made available online at *http://www.regulations.gov*, including any personal information provided, unless the comment includes information claimed to be Confidential Business Information (CBI) or other information whose disclosure is restricted by statute. Do not submit information that you consider to be CBI or otherwise protected through *http://www.regulations.gov* or e-mail. The *http://www.regulations.gov* Web site is an ''anonymous access'' system, which means EPA will not know your identity or contact information unless you provide it in the body of your comment. If you send an e-mail comment directly to EPA without going through *http://www.regulations.gov* your e-mail address will be automatically captured and included as part of the comment that is placed in the public docket and made available on the Internet. If you submit an electronic comment, EPA recommends that you include your name and other contact information in the body of your comment and with any disk or CD–ROM you submit. If EPA cannot read your comment due to technical difficulties and cannot contact you for clarification, EPA may not be able to consider your comment. Electronic files should avoid the use of special characters, any form of encryption, and be free of any defects or viruses. For additional information about EPA's public docket visit the EPA Docket Center homepage at *http://www.epa.gov/epahome/dockets.htm.*

FOR FURTHER INFORMATION CONTACT: S. Steven Chang, Assessment and Remediation Division, Office of Superfund Remediation and Technology

Innovation (Mail Code 5204P), Environmental Protection Agency, 1200 Pennsylvania Ave., NW., Washington, DC 20460; telephone number: 703–603–9017; fax number: 703–603–9112; e-mail address: *chang.steven@epa.gov.*

SUPPLEMENTARY INFORMATION:

How Can I Access the Docket and/or Submit Comments?

EPA has established a public docket for this ICR under Docket ID No. EPA–HQ–SFUND–2007–0707 which is available for online viewing at *http://www.regulations.gov*, or in person viewing at the Superfund Docket in the EPA Docket Center (EPA/DC), EPA West, Room 3334, 1301 Constitution Ave., NW., Washington, DC. The EPA/DC Public Reading Room is open from 8 a.m. to 4:30 p.m., Monday through Friday, excluding legal holidays. The telephone number for the Reading Room is 202–566–1744, and the telephone number for the Superfund Docket is 202–566–0276.

Use *http://www.regulations.gov* to obtain a copy of the draft collection of information, submit or view public comments, access the index listing of the contents of the docket, and to access those documents in the public docket that are available electronically. Once in the system, select ''search,'' then key in the docket ID number identified in this document.

What Information Is EPA Particularly Interested in?

Pursuant to section 3506(c)(2)(A) of the PRA, EPA specifically solicits comments and information to enable it to:

(i) Evaluate whether the proposed collection of information is necessary for the proper performance of the functions of the Agency, including whether the information will have practical utility;

(ii) evaluate the accuracy of the Agency's estimate of the burden of the proposed collection of information, including the validity of the methodology and assumptions used;

(iii) enhance the quality, utility, and clarity of the information to be collected; and

(iv) minimize the burden of the collection of information on those who are to respond, including through the use of appropriate automated electronic, mechanical, or other technological collection techniques or other forms of information technology, e.g., permitting electronic submission of responses. In particular, EPA is requesting comments from very small businesses (those that employ less than 25) on examples of specific additional efforts that EPA could make to reduce the paperwork burden for very small businesses affected by this collection.

What Should I Consider When I Prepare My Comments for EPA?

You may find the following suggestions helpful for preparing your comments:

1. Explain your views as clearly as possible and provide specific examples.

2. Describe any assumptions that you used.

3. Provide copies of any technical information and/or data you used that support your views.

4. If you estimate potential burden or costs, explain how you arrived at the estimate that you provide.

5. Offer alternative ways to improve the collection activity.

6. Make sure to submit your comments by the deadline identified under **DATES**.

7. To ensure proper receipt by EPA, be sure to identify the docket ID number assigned to this action in the subject line on the first page of your response. You may also provide the name, date, and **Federal Register** citation.

What Information Collection Activity or ICR Does This Apply to?

Affected entities: Entities potentially affected by this action are state/tribal governments and individual community members who voluntarily participate in the remedial phase of the Superfund program and in associated community involvement activities throughout the Superfund process.

Title: National Oil and Hazardous Substances Pollution Contingency Plan (NCP) (Renewal).

ICR numbers: EPA ICR 1463.07, OMB Control Number 2050–0096.

ICR status: This ICR is currently scheduled to expire on January 31, 2008. An Agency may not conduct or sponsor, and a person is not required to respond to, a collection of information, unless it displays a currently valid OMB control number. The OMB control numbers for EPA's regulations in title 40 of the CFR, after appearing in the **Federal Register** when approved, are listed in 40 CFR part 9, are displayed either by publication in the **Federal Register** or by other appropriate means, such as on the related collection instrument or form, if applicable. The display of OMB control numbers in certain EPA regulations is consolidated in 40 CFR part 9.

Abstract: This Information Collection Request is a renewal ICR that covers the remedial portion of the Superfund Program, as specified in the Comprehensive Environmental Response, Compensation, and Liability Act of 1980 as amended (CERCLA) and the National Oil and Hazardous Substance Pollution Contingency Plan (NCP). All remedial actions covered by this ICR (*e.g.*, Remedial Investigations/Feasibility Studies) are stipulated in the statute (CERCLA) and are instrumental in the process of cleaning up National Priorities List (NPL) sites to be protective of human health and the environment. Some community involvement activities covered by this ICR are not required at every site (*e.g.*, Technical Assistance Grants) and depend very much on the community and the nature of the site and cleanup. All community activities seek to involve the public in the cleanup of the sites, gain the input of community members, and include the community's perspective on the potential future reuse of Superfund NPL sites. Community involvement activities can enhance the remedial process and increase community acceptance and the potential for productive and useful reuse of the sites.

Burden Statement: The annual public reporting and recordkeeping burden for this collection of information is estimated to average 80 hours per response. Burden means the total time, effort, or financial resources expended by persons to generate, maintain, retain, or disclose or provide information to or for a Federal agency. This includes the time needed to review instructions; develop, acquire, install, and utilize technology and systems for the purposes of collecting, validating, and verifying information, processing and maintaining information, and disclosing and providing information; adjust the existing ways to comply with any previously applicable instructions and requirements which have subsequently changed; train personnel to be able to respond to a collection of information; search data sources; complete and review the collection of information; and transmit or otherwise disclose the information.

The ICR provides a detailed explanation of the Agency's estimate, which is only briefly summarized here:

Estimated total number of potential respondents: 7,970.

Frequency of response: On occasion.

Estimated total average number of responses for each respondent: As required.

Estimated total annual burden hours: 71,165 hours.

Estimated total annual costs: $572,415. This includes an estimated annual burden cost of $61,245 for States and an estimated cost of $511,170 for communities.

Dated: August 15, 2007.

James E. Woolford,

Office Director, Office of Superfund Remediation and Technology Innovation.

[EPA–HQ–SFUND–2007–0840; FRL–8458–6]

Agency Information Collection Activities: Proposed Collection; Comment Request; Application for Reimbursement to Local Governments for Emergency Response to Hazardous Substance Releases Under CERCLA Section 123, EPA ICR Number 1425.06, OMB Control Number 2050–0077

AGENCY: Environmental Protection Agency.

ACTION: Notice.

SUMMARY: In compliance with the Paperwork Reduction Act (44 U.S.C. 3501 *et seq.*), this document announces that EPA is planning to submit a continuing Information Collection Request (ICR) to the Office of Management and Budget (OMB). This is a request to renew an existing approved collection. This ICR is scheduled to expire on February 28, 2008. Before submitting the ICR to OMB for review and approval, EPA is soliciting comments on specific aspects of the proposed information collection as described below.

DATES: Comments must be submitted on or before October 22, 2007.

ADDRESSES: Submit your comments, identified by Docket ID No. EPA–HQ–SFUND–2007–0840 by one of the following methods:

- *http://www.regulations.gov:* Follow the on-line instructions for submitting comments.
- E-mail: *Boynton.Lisa@epa.gov.*
- Fax: 202–564–8729.
- Mail ICR Renewal for Local Governments Reimbursement Application, Environmental Protection Agency, Mailcode: 5104A, 1200 Pennsylvania Ave., NW., Washington, DC.
- *Instructions:* Direct your comments to Docket ID No. EPA–HQ–SFUND–2007–0840. EPA's policy is that all comments received will be included in the public docket without change and may be made available online at *http://www.regulations.gov,* including any personal information provided, unless the comment includes information claimed to be Confidential Business Information (CBI) or other information whose disclosure is restricted by statute. Do not submit information that you consider to be CBI or otherwise protected through *http://www.regulations.gov* or e-mail. The *http://www.regulations.gov* Web site is an ''anonymous access'' system, which means EPA will not know your identity or contact information unless you provide it in the body of your comment. If you send an e-mail comment directly to EPA without going through *http://www.regulations.gov* your e-mail address will be automatically captured and included as part of the comment that is placed in the public docket and made available on the Internet. If you submit an electronic comment, EPA recommends that you include your name and other contact information in the body of your comment and with any disk or CD–ROM you submit. If EPA cannot read your comment due to technical difficulties and cannot contact you for clarification, EPA may not be able to consider your comment. Electronic files should avoid the use of special characters, any form of encryption, and be free of any defects or viruses. For additional information about EPA's public docket visit the EPA Docket Center homepage at *http://www.epa.gov/epahome/dockets.htm.*

FOR FURTHER INFORMATION CONTACT: Lisa Boynton, Office of Solid Waste and Emergency Response, Office of Emergency Management, (5104A) Environmental Protection Agency, 1200 Pennsylvania Ave., NW., Washington, DC 20460; telephone number: 202–564–2487; fax number: 202–564–8729; e-mail address: *Boynton.Lisa@epa.gov.*

SUPPLEMENTARY INFORMATION:

How Can I Access the Docket and/or Submit Comments?

EPA has established a public docket for this ICR under Docket ID No. EPA–HQ–SFUND–2007–0840 which is available for online viewing at *http://www.regulations.gov,* or in person viewing at the Superfund Docket in the EPA Docket Center (EPA/DC), EPA West, Room 3334, 1301 Constitution Ave., NW., Washington, DC. The EPA/DC Public Reading Room is open from 8 a.m. to 4:30 p.m., Monday through Friday, excluding legal holidays. The telephone number for the Reading Room is 202–566–1744, and the telephone number for the Superfund Docket is 202–566–1677.

Use *http://www.regulations.gov* to obtain a copy of the draft collection of information, submit or view public comments, access the index listing of the contents of the docket, and to access those documents in the public docket that are available electronically. Once in the system, select ''search,'' then key in the docket ID number identified in this document.

What Information Is EPA Particularly Interested in?

Pursuant to section 3506(c)(2)(A) of the PRA, EPA specifically solicits comments and information to enable it to:

(i) Evaluate whether the proposed collection of information is necessary for the proper performance of the functions of the Agency, including whether the information will have practical utility;

(ii) evaluate the accuracy of the Agency's estimate of the burden of the proposed collection of information, including the validity of the methodology and assumptions used;

(iii) enhance the quality, utility, and clarity of the information to be collected; and

(iv) minimize the burden of the collection of information on those who are to respond, including through the use of appropriate automated electronic, mechanical, or other technological collection techniques or other forms of information technology, e.g., permitting electronic submission of responses. In particular, EPA is requesting comments from very small businesses (those that employ less than 25) on examples of specific additional efforts that EPA could make to reduce the paperwork burden for very small businesses affected by this collection.

What Should I Consider When I Prepare My Comments for EPA?

You may find the following suggestions helpful for preparing your comments:

1. Explain your views as clearly as possible and provide specific examples.

2. Describe any assumptions that you used.

3. Provide copies of any technical information and/or data you used that support your views.

4. If you estimate potential burden or costs, explain how you arrived at the estimate that you provide.

5. Offer alternative ways to improve the collection activity.

6. Make sure to submit your comments by the deadline identified under **DATES**.

7. To ensure proper receipt by EPA, be sure to identify the docket ID number assigned to this action in the subject line on the first page of your response. You may also provide the name, date, and **Federal Register** citation.

What Information Collection Activity or ICR Does This Apply to?

[Docket ID No. EPA–HQ–SFUND–2007–0840]

Affected entities: Entities potentially affected by this action are Local Governments that apply for reimbursement under this program.

Title: Local Governments Reimbursement Application.

ICR numbers: EPA ICR No. 1425.05, OMB Control No. 2050–0077.

ICR status: This ICR is currently scheduled to expire on February 28, 2008. An Agency may not conduct or sponsor, and a person is not required to respond to, a collection of information, unless it displays a currently valid OMB control number. The OMB control numbers for EPA's regulations in title 40 of the CFR, after appearing in the **Federal Register** when approved, are listed in 40 CFR part 9, are displayed either by publication in the **Federal Register** or by other appropriate means, such as on the related collection instrument or form, if applicable. The display of OMB control numbers in certain EPA regulations is consolidated in 40 CFR part 9.

Abstract: The Agency requires applicants for reimbursement under this program authorized under section 123 of CERCLA to submit an application that demonstrates consistency with program eligibility requirements. This is necessary to ensure proper use of the Superfund. EPA reviews the information to ensure compliance with all statutory and program requirements. The applicants are local governments who have incurred expenses, above and beyond their budgets, for hazardous substance response. Submission of this information is voluntary and to the applicant's benefit.

Burden Statement: The annual public reporting and recordkeeping burden for this collection of information is estimated to average 9 hours per response. Burden means the total time, effort, or financial resources expended by persons to generate, maintain, retain, or disclose or provide information to or for a Federal agency. This includes the time needed to review instructions; develop, acquire, install, and utilize technology and systems for the purposes of collecting, validating, and verifying information, processing and maintaining information, and disclosing and providing information; adjust the existing ways to comply with any previously applicable instructions and requirements which have subsequently changed; train personnel to be able to respond to a collection of information; search data sources; complete and review the collection of information; and transmit or otherwise disclose the information.

The ICR provides a detailed explanation of the Agency's estimate, which is only briefly summarized here:

Estimated total number of potential respondents: 45.

Frequency of response: Voluntary, on occasion.

Estimated total average number of responses for each respondent: 1.

Estimated total annual burden hours: 405 hours.

Estimated total annual costs: $7,493 This includes an estimated burden cost of $18.50/hour and there are no capital investment or maintenance and operational costs.

Are There Changes in the Estimates From the Last Approval?

At this time, the Agency anticipates that because the number of respondents has decreased, the estimated annual burden has also decreased.

What Is the Next Step in the Process for This ICR?

EPA will consider the comments received and amend the ICR as appropriate. The final ICR package will then be submitted to OMB for review and approval pursuant to 5 CFR 1320.12. At that time, EPA will issue another **Federal Register** notice pursuant to 5 CFR 1320.5(a)(1)(iv) to announce the submission of the ICR to OMB and the opportunity to submit additional comments to OMB. If you have any questions about this ICR or the approval process, please contact the technical person listed under **FOR FURTHER INFORMATION CONTACT**.

Dated: August 16, 2007.

Deborah Y. Dietrich,

Director, Office of Emergency Management.

BILLING CODE 6560–50–P

ENVIRONMENTAL PROTECTION AGENCY

[FRL–8458–2]

National Environmental Justice Advisory Council; Notification of Public Meeting and Public Comment

AGENCY: Environmental Protection Agency (EPA).

ACTION: Notification of Public Meeting.

SUMMARY: Pursuant to the Federal Advisory Committee Act (FACA), Public Law 92–463, the U.S. Environmental Protection Agency (EPA) hereby provides notice that the National Environmental Justice Advisory Council (NEJAC) will meet on the dates and times described below. All meetings are open to the public. Members of the public are encouraged to provide comments relevant to the specific issues being considered by the NEJAC. For additional information about registering for public comment, please *see* **SUPPLEMENTARY INFORMATION**. Due to limited space, seating at the NEJAC meeting will be on a first-come basis.

DATES: The NEJAC meeting will convene Tuesday, September 18, 2007, from 9 a.m. to 9:30 p.m., and reconvene Wednesday, September 19, 2007, from 9 a.m. to 6 p.m., and Thursday, September 20, 2007, from 9 a.m. to 3 p.m. One public comment session relevant to the specific issues being considered by the NEJAC (*see* **SUPPLEMENTARY INFORMATION**) is scheduled for Tuesday evening, September 18, 2007, from 6:30 p.m. to 9:30 p.m. All times noted are Eastern Time. Members of the public who wish to participate in the public comment period are encouraged to pre-register by Wednesday, September 12, 2007.

ADDRESSES: The NEJAC committee meeting will be held at the Tremont Grand Conference Center, 225 North Charles Street, Baltimore, Maryland 21201, telephone 443–573–8444.

FOR FURTHER INFORMATION, CONTACT: Correspondence concerning the meeting should be sent to Ms. Victoria Robinson, NEJAC Program Manager, U.S. Environmental Protection Agency, at 1200 Pennsylvania Avenue, NW., (MC2201A), Washington, DC 20460; via e-mail at *environmental-justice-epa@epa.gov;* by telephone at (202) 564–6349; or by Fax at (202) 564–1624. Additional information about the meeting is available at the Internet Web site: *http://www.epa.gov/compliance/environmentaljustice/nejac/meetings.html*

Pre-registration for all attendees is recommended. To register online, visit the Web site above. Requests for pre-registration forms should be sent to Ms. Julianne Pardi of ICF International at: 9300 Lee Highway, Fairfax, Virginia 22031; Telephone: (703) 934–3873; E-mail: *jpardi@icfi.com,* or Fax: (703) 934–3270. Hearing-impaired individuals or non-English speaking attendees wishing to arrange for a sign language or foreign language interpreter may make appropriate arrangements using these numbers also.

SUPPLEMENTARY INFORMATION: The Charter of the NEJAC states that the advisory committee shall provide independent advice to the Administrator on areas that may

include, among other things, ''advice about EPA's progress, quality and adequacy in planning, developing and implementing environmental justice strategies, projects and programs'' relating to environment justice.

The meeting shall be used to receive comments, discuss, and provide recommendations regarding two major areas: (1) Strategies to identify, mitigate, and/or prevent the disproportionate burden on communities of air pollution resulting from goods movement activities; and (2) key issues related to integration of environmental justice considerations in EPA's programs, policies, and activities.

A. Air Pollution Impacts of Goods Movement on Communities: Environmental pollution from the movement of freight is becoming a major public health concern at the national, regional and community level. Also known as ''goods movement,'' the distribution of freight involves diesel-powered vehicles and equipment almost every step of the way, resulting in significant emissions of particulate matter (PM), nitrogen oxides (NO_X), hydrocarbons, and other air toxics throughout the process. A substantial body of scientific evidence asserts these emissions are or could be linked to respiratory disorders, cancer, heart disease, and premature death. Concern over goods movement has increased due to recent and projected increases in foreign trade require significant improvements to the essential infrastructure needed to move freight from coastal ports to the rest of the country. In most cases, goods movement involves an entire system of transportation facilities, including seaports, airports, railways, truck lanes, logistics centers, and border crossings. It is becoming increasingly important that these entities operate sustainably, *i.e.*, economically viable, environmentally and socially responsible, safe, and secure.

EPA has requested that the NEJAC provide advice and recommendations regarding how the Agency can most effectively promote strategies, in partnership with federal, state, tribal, and local government agencies, to identify, mitigate, and/or prevent the disproportionate burden on communities of air pollution resulting from goods movement activities.

B. Key Issues Related to Integration of Environmental Justice Considerations in EPA's Programs, Policies and Activities: The Agency will provide briefings about two key initiatives to further its efforts toward environmental justice integration: (1) The Environmental Justice Strategic Enforcement Assessment Tool, and (2) Environmental Justice Program Reviews:

(1) Environmental Justice Strategic Enforcement Assessment Tool (EJSEAT)'' identifies areas with potential environmental justice concerns based on indicators (*e.g.*, health, environmental, compliance and social demographics) described in EPA's environmental justice guidance document, ''Toolkit for Assessing Potential Allegations of Environmental Injustice.'' EJSEAT enhances EPA's ability to protect minority and low-income communities and other burdened communities from adverse human health and environmental effects. EPA enforcement personnel will use EJSEAT to identify, in a more consistent and analytically rigorous manner, areas that may be disproportionately and adversely affected by environmental effects. EJSEAT will assist EPA's Office of Enforcement and Compliance Assistance (OECA) to make fair and efficient resource deployment decisions. EPA will evaluate the potential for applying the tool in other Agency programs and activities.

(2) Environmental Justice Program Reviews: On September 18, 2006, EPA's Inspector General (OIG) issued an evaluation report entitled, ''EPA Needs to Conduct Environmental Justice Reviews of its Programs, Policies, and Activities.'' The OIG conducted this review to determine whether EPA performed environmental justice reviews of their program, policies, and activities as required by Executive Order 12898, and whether additional guidance is needed.

The evaluation report identified four recommendations which EPA concurred with:

- Require the Agency's program and regional offices to identify which programs, policies, and activities need environmental justice reviews and require these offices to establish a plan to complete the necessary reviews.
- Ensure that environmental justice reviews determine whether the programs, policies, and activities may have a disproportionately high and adverse health or environmental impact on minority and low-income populations.
- Require each program and regional office to develop, with the assistance of the Office of Environmental Justice, specific environmental justice review guidance, which includes protocols, a framework, or directions for conducting environmental justice reviews.
- Designate a responsible office to: (a) Compile the results of environmental justice reviews, and (b) recommend appropriate actions to review findings and make recommendations to the decision-making office's senior leadership.

Deputy Administrator Marcus Peacock stated in a memorandum dated December 18, 2006, in response to the OIG report that, ''the Agency needs a more systematic, broader-scale approach to identifying and addressing disproportionate impacts to human health and the environment.'' Deputy Administrator Peacock then stated that EPA will begin by developing the necessary protocols to provide guidance on conducting environmental justice reviews of its programs, policies and activities.

C. Public Comment: Individuals or groups making oral presentations during the public comment period will be limited to a total time of five minutes. Only one representative of a community, an organization, or a group will be allowed to speak. Any number of written comments can be submitted for the record. The suggested format for individuals making public comment should be as follows: Name of Speaker, Name of Organization/Community, Address/Telephone/E-mail, Description of Concern and its Relationship to the policy issue(s), and Recommendations or desired outcome. Written comments received by September 10, 2007, will be included in the materials distributed to the members of the NEJAC. Written comments received after that date will be provided to the NEJAC as logistics allow. All information should be sent to the address, e-mail, or fax number listed in the Contact section above.

D. Information about Services for the Handicapped: Individuals requiring special accommodations at this meeting, including wheelchair access to the conference room, should contact Ms. Julianne Pardi at least five business days prior to the meeting so that appropriate arrangements can be made to facilitate their participation. For information about facilities or services for the handicapped or to request special assistance at the meetings, contact Ms. Pardi as soon as possible. All requests should be sent to the address, e-mail, or fax number listed in the Contact section above.

Dated: August 9, 2007.

Charles Lee,

Designated Federal Officer, National Environmental Justice Advisory Council.

BILLING CODE 6560–50–P

ENVIRONMENTAL PROTECTION AGENCY

[EPA–HQ–ORD–2007–0484; FRL–8458–4]

Board of Scientific Counselors, National Center for Environmental Research (NCER) Standing Subcommittee Meeting—2007

AGENCY: Environmental Protection Agency (EPA).

ACTION: Notice of Meeting.

SUMMARY: Pursuant to the Federal Advisory Committee Act, Public Law 92–463, the Environmental Protection Agency, Office of Research and Development (ORD), gives notice of a meeting of the Board of Scientific Counselors (BOSC) National Center for Environmental Research (NCER) Standing Subcommittee.

DATES: The meeting (a teleconference call) will be held on Tuesday, September 11, 2007 from 1 p.m. to 3 p.m. All times noted are eastern time. The meeting may adjourn early if all business is finished. Requests for the draft agenda or for making oral presentations at the conference call will be accepted up to 1 business day before the meeting.

ADDRESSES: Participation in the meeting will be by teleconference only—meeting rooms will not be used. Members of the public may obtain the call-in number and access code for the call from Susan Peterson, whose contact information is listed under the FOR **FURTHER INFORMATION CONTACT** section of this notice. Submit your comments, identified by Docket ID No. EPA–HQ–ORD–2007–0484, by one of the following methods:

- *http://www.regulations.gov:* Follow the on-line instructions for submitting comments.
- *E-mail:* Send comments by electronic mail (e-mail) to: *ORD.Docket@epa.gov,* Attention Docket ID No. EPA–HQ–ORD–2007–0484.
- Fax: Fax comments to: (202) 566–0224, Attention Docket ID No. EPA–HQ–ORD–2007–0484.
- *Mail:* Send comments by mail to: Board of Scientific Counselors, National Center for Environmental Research (NCER) Standing Subcommittee—2007 Docket, Mailcode: 28221T, 1200 Pennsylvania Ave., NW., Washington, DC 20460, Attention Docket ID No. EPA–HQ–ORD–2007–0484.
- *Hand Delivery or Courier:* Deliver comments to: EPA Docket Center (EPA/DC), Room B102, EPA West Building, 1301 Constitution Avenue, NW., Washington, DC, Attention Docket ID No. EPA–HQ–ORD–2007–0484. Note: this is not a mailing address. Such deliveries are only accepted during the docket's normal hours of operation, and special arrangements should be made for deliveries of boxed information.

Instructions: Direct your comments to Docket ID No. EPA–HQ–ORD–2007–0484. EPA's policy is that all comments received will be included in the public docket without change and may be made available online at *http://www.regulations.gov,* including any personal information provided, unless the comment includes information claimed to be Confidential Business Information (CBI) or other information whose disclosure is restricted by statute. Do not submit information that you consider to be CBI or otherwise protected through *http://www.regulations.gov* or e-mail. The *http://www.regulations.gov* Web site is an ''anonymous access'' system, which means EPA will not know your identity or contact information unless you provide it in the body of your comment. If you send an e-mail comment directly to EPA without going through *http://www.regulations.gov,* your e-mail address will be automatically captured and included as part of the comment that is placed in the public docket and made available on the Internet. If you submit an electronic comment, EPA recommends that you include your name and other contact information in the body of your comment and with any disk or CD–ROM you submit. If EPA cannot read your comment due to technical difficulties and cannot contact you for clarification, EPA may not be able to consider your comment. Electronic files should avoid the use of special characters, any form of encryption, and be free of any defects or viruses. For additional information about EPA's public docket visit the EPA Docket Center homepage at *http://www.epa.gov/epahome/dockets.htm.*

Docket: All documents in the docket are listed in the *http://www.regulations.gov* index. Although listed in the index, some information is not publicly available, e.g., CBI or other information whose disclosure is restricted by statute. Certain other material, such as copyrighted material, will be publicly available only in hard copy. Publicly available docket materials are available either electronically in *http://www.regulations.gov* or in hard copy at the Board of Scientific Counselors, National Center for Environmental Research (NCER) Standing Subcommittee—2007 Docket, EPA/DC, EPA West, Room B102, 1301 Constitution Ave., NW., Washington, DC. The Public Reading Room is open from 8:30 a.m. to 4:30 p.m., Monday through Friday, excluding legal holidays. The telephone number for the Public Reading Room is (202) 566–1744, and the telephone number for the ORD Docket is (202) 566–1752.

FOR FURTHER INFORMATION CONTACT: The Designated Federal Officer via mail at: Susan Peterson, Mail Code 8104–R, Office of Science Policy, Office of Research and Development, Environmental Protection Agency, 1200 Pennsylvania Avenue, NW., Washington, DC 20460; via phone/voice mail at: (202) 564–1077; via fax at: (202) 565–2911; or via e-mail at: *peterson.susan@epa.gov.*

SUPPLEMENTARY INFORMATION:

General Information

Participation in the meeting will be by teleconference only—meeting rooms will not be used. Members of the public who wish to obtain the call-in number and access code to participate in the conference call may contact Susan Peterson, the Designated Federal Officer, via any of the contact methods listed in the **FOR FURTHER INFORMATION CONTACT** section above, by 4 working days prior to the conference call.

The purpose of the meeting is to provide follow-up to the subcommittee from the July 24–25, 2007 face-to-face meeting. Proposed agenda items for the conference call include, but are not limited to: presentations on ORD communications, and discussion of the charge questions to subcommittee. The conference call is open to the public.

Information on Services for Individuals with Disabilities: For information on access or services for individuals with disabilities, please contact Susan Peterson at (202) 564–1077 or *peterson.susan@epa.gov.* To request accommodation of a disability, please contact Susan Peterson, preferably at least 10 days prior to the meeting, to give EPA as much time as possible to process your request.

Dated: August 15, 2007.

Mary Ellen Radzikowski,

Acting Director, Office of Science Policy.

[FR Doc. E7–16608 Filed 8–21–07; 8:45 am]

BILLING CODE 6560–50–P

ENVIRONMENTAL PROTECTION AGENCY

[EPA–HQ–OPP–2006–1005; FRL–8149–5]

Pesticide Reregistration Performance Measures and Goals

AGENCY: Environmental Protection Agency (EPA).

ACTION: Notice.

SUMMARY: This notice announces EPA's progress in meeting its performance measures and goals for pesticide reregistration during fiscal year 2006. The Federal Insecticide, Fungicide, and Rodenticide Act (FIFRA) requires EPA to publish information about EPA's annual achievements in this area. This notice discusses the integration of tolerance reassessment with the reregistration process, and describes the status of various regulatory activities associated with reregistration and tolerance reassessment. The notice gives total numbers of chemicals and products reregistered, tolerances reassessed, Data Call-Ins issued, and products registered under the ''fast-track'' provisions of FIFRA. This notice also contains the schedule for completion of activities for specific chemicals during fiscal years 2007 through 2008.

DATES: This notice is not subject to a formal comment period. Nevertheless, EPA welcomes input from stakeholders and the general public. Written comments, identified by the docket ID number [EPA–HQ–OPP–2006–1005], should be received on or before October 22, 2007.

ADDRESSES: Submit your comments, identified by docket identification (ID) number EPA–HQ–OPP–2006–1005, by one of the following methods:

- *Federal eRulemaking Portal: http://www.regulations.gov/*. Follow the on-line instructions for submitting comments.
- *Mail*: Office of Pesticide Programs (OPP) Regulatory Public Docket (7502P), Environmental Protection Agency, 1200 Pennsylvania Ave., NW., Washington, DC 20460–0001.
- *Delivery*: OPP Regulatory Public Docket (7502P), Environmental Protection Agency, Rm. S-4400, One Potomac Yard (South Building), 2777 S. Crystal Drive, Arlington, VA. Deliveries are only accepted during the Docket's normal hours of operation (8:30 a.m. to 4 p.m., Monday through Friday, excluding legal holidays). Special arrangements should be made for deliveries of boxed information. The Docket telephone number is (703) 305–5805.

Instructions: Direct your comments to docket ID number EPA–HQ–OPPT–2006–1005. EPA's policy is that all comments received will be included in the public docket without change and may be made available on-line at *http://www.regulations.gov/*, including any personal information provided, unless the comment includes information claimed to be Confidential Business Information (CBI) or other information whose disclosure is restricted by statute. Do not submit information that you consider to be CBI or otherwise protected through www.regulations.gov or e-mail. The www.regulations.gov website is an ''anonymous access'' system, which means EPA will not know your identity or contact information unless you provide it in the body of your comment. If you send an e-mail comment directly to EPA without going through www.regulations.gov, your e-mail address will be captured automatically and included as part of the comment that is placed in the public docket and made available on the Internet. If you submit an electronic comment, EPA recommends that you include your name and other contact information in the body of your comment and with any disk or CD ROM you submit. If EPA cannot read your comment due to technical difficulties and cannot contact you for clarification, EPA may not be able to consider your comment. Electronic files should avoid the use of special characters, any form of encryption, and be free of any defects or viruses. For additional information about EPA's public docket, visit the EPA Docket Center homepage at*http://www.epa.gov/epahome/docket.htm/*.

Docket: All documents in the docket are listed in the index. Although listed in the index, some information is not publicly available, i.e., CBI or other information whose disclosure is restricted by statute. Certain other material, such as copyrighted material, will be publicly available only in hard copy. Publicly available docket materials are available either in the electronic docket at*http://www.regulations.gov*, or, if only available in hard copy, at the OPP Regulatory Public Docket in Rm. S-4400, One Potomac Yard (South Building), 2777 S. Crystal Drive, Arlington, VA. The hours of operation of this Docket Facility are from 8:30 a.m. to 4 p.m., Monday through Friday, excluding legal holidays. The Docket telephone number is (703) 305–5805.

FOR FURTHER INFORMATION CONTACT: Carol P. Stangel, Special Review and Reregistration Division (7508P), Office of Pesticide Programs, Environmental Protection Agency, 1200 Pennsylvania Ave., NW., Washington, DC 20460; telephone: (703) 308–8007; e-mail:*stangel.carol@epa.gov*.

SUPPLEMENTARY INFORMATION:

I. General Information

A. Does this Action Apply to Me?

This action is directed to the public in general. Although this action may be of particular interest to persons who are interested in the progress and status of EPA's pesticide reregistration and tolerance reassessment programs, the Agency has not attempted to describe all the specific entities that may be affected by this action. If you have any questions regarding the information in this notice, consult the person listed under **FOR FURTHER INFORMATION CONTACT**.

B. What Should I Consider as I Prepare My Comments for EPA?

1. *Submitting CBI.* Do not submit this information to EPA through EDOCKET, regulations.gov, or e-mail. Clearly mark the part or all of the information that you claim to be CBI. For CBI information in a disk or CD ROM that you mail to EPA, mark the outside of the disk or CD ROM as CBI and then identify electronically within the disk or CD ROM the specific information that is claimed as CBI. In addition to one complete version of the comment that includes information claimed as CBI, a copy of the comment that does not contain the information claimed as CBI must be submitted for inclusion in the public docket. Information so marked will not be disclosed except in accordance with procedures set forth in 40 CFR part 2.

2. *Tips for preparing your comments.* When submitting comments, remember to:

i. Identify the document by docket ID number and other identifying information (subject heading, **Federal Register** date, and page number).

ii. Follow directions. The Agency may ask you to respond to specific questions or organize comments by referencing a Code of Federal Regulations (CFR) part or section number.

iii. Explain why you agree or disagree; suggest alternatives and substitute language for your requested changes.

iv. Describe any assumptions and provide any technical information and/or data that you used.

v. If you estimate potential costs or burdens, explain how you arrived at your estimate in sufficient detail to allow for it to be reproduced.

vi. Provide specific examples to illustrate your concerns, and suggest alternatives.

vii. Explain your views as clearly as possible, avoiding the use of profanity, obscene language, or personal threats.

viii. Make sure to submit your comments by the comment period deadline.

II. Background

EPA must establish and publish in the **Federal Register** its annual performance measures and goals for pesticide

reregistration, tolerance reassessment, and expedited registration, under section 4(l) of FIFRA, as amended by the Food Quality Protection Act of 1996 (FQPA). Specifically, such measures and goals are to include:

- The status of reregistration.
- The number of products reregistered, canceled, or amended.
- The number and type of data requests or Data Call-In (DCI) notices under section 3(c)(2)(B) issued to support product reregistration by active ingredient.
- Progress in reducing the number of unreviewed, required reregistration studies.
- The aggregate status of tolerances reassessed.
- The number of applications for registration submitted under subsection (k)(3) (which provides for expedited processing and review of similar applications), that were approved or disapproved.
- The future schedule for reregistrations in the current and succeeding fiscal year.
- The projected year of completion of the reregistrations under section 4.

FIFRA, as amended in 1988, authorizes EPA to conduct a comprehensive pesticide reregistration program--a complete review of the human health and environmental effects of older pesticides originally registered before November 1, 1984. Pesticides meeting today's scientific and regulatory standards may be declared ''eligible'' for reregistration. To be eligible, an older pesticide must have a substantially complete data base, and must not cause unreasonable adverse effects to human health or the environment when used according to Agency approved label directions and precautions.

In addition, all pesticides with food uses must meet the safety standard of section 408 of the Federal Food, Drug, and Cosmetic Act (FFDCA) 21 U.S.C. 346a, as amended by the Food Quality Protection Act (FQPA) of 1996. Under FFDCA, EPA must make a determination that pesticide residues remaining in or on food are ''safe''; that is, ''that there is reasonable certainty that no harm will result from aggregate exposure to the pesticide chemical residue'' from dietary and other sources. In determining allowable levels of pesticide residues in food, EPA must perform a more comprehensive assessment of each pesticide's risks, considering:

- Aggregate exposure (from food, drinking water, and residential uses).
- Cumulative effects from all pesticides sharing a common mechanism of toxicity.
- Possible increased susceptibility of infants and children; and
- Possible endocrine or estrogenic effects.

As amended by FQPA, FFDCA required the reassessment of all existing tolerances (pesticide residue limits in food) and tolerance exemptions within 10 years, to ensure that they met the safety standard of the law. EPA was directed to give priority to the review of those pesticides that appeared to pose the greatest risk to public health, and to reassess 33% of the 9,721 existing tolerances and exemptions within 3 years (by August 3, 1999), 66% within 6 years (by August 3, 2002), and 100% in 10 years (by August 3, 2006).The Agency met the first two statutory deadlines and substantially met the third, completing over 99% of all required tolerance reassessment decisions by August 3, 2006. These decisions represent significant enhancements in public health and environmental protection. By successfully implementing FQPA, EPA is ensuring that all pesticides used on food in the United States meet the law's new, more stringent safety standard. EPA's approach to tolerance reassessment under FFDCA is described fully in the Agency's document, ''Raw and Processed Food Schedule for Pesticide Tolerance Reassessment'' (62 FR 42020, August 4, 1997) (FRL–5734–6). The Agency's accomplishments under FQPA during the past 10 years are discussed at*http://www.epa.gov/pesticides/regulating/laws/fqpa/fqpa_accomplishments.htm.*

The Pesticide Registration Improvement Act (PRIA) of 2003 became effective on March 23, 2004. Among other things, PRIA directed EPA to complete Reregistration Eligibility Decisions (REDs) for pesticides with food uses/tolerances by August 3, 2006, and to complete all non-food use pesticide REDs by October 3, 2008. The Agency completed 99% of the REDs due by August 3, 2006, and plans to complete all remaining REDs by October 3, 2008. EPA's schedule for meeting these deadlines is available on the Agency's website at*http://www.epa.gov/pesticides/reregistration/decision_schedule.htm.*

III. FQPA and Program Accountability

One of the hallmarks of the FQPA amendments to the FFDCA is enhanced accountability. Through this summary of performance measures and goals for pesticide reregistration, tolerance reassessment, and expedited registration, EPA describes progress made during the past year in each of the program areas included in FIFRA section 4(l).

A. Status of Reregistration

During fiscal year (FY) 2006 (from October 1, 2005, through September 30, 2006), EPA made significant progress in completing risk assessments and risk management decisions for pesticide reregistration (See Table 1).

The Agency's decisions are embodied in Reregistration Eligibility Decision (RED) documents, Interim Reregistration Eligibility Decisions (IREDs), and Reports on FQPA Tolerance Reassessment Progress and (Interim) Risk Management Decisions (TREDs).

TABLE 1.—REREGISTRATION/RISK MANAGEMENT DECISIONS COMPLETED: IN FY 2006 AND FY 1991 THROUGH FY 2006

FY 2006 Decisions	Total, FY 1991 through FY 2006
59 FY 2006 REDs (37 REDs + 22 OP IREDs became REDs) ADBAC Aliphatic alkyl quarternaries (DDAC) Aliphatic solvents Alkyl benzene sulfonates Atrazine (2003 IRED became a RED, 4-6-06) Cacodylic acid Chlorine dioxide Copper and oxides Copper compounds II Copper salts Copper sulfate Cypermethrin Dicamba Dichloran (DCNA) Imazapyr Inorganic chlorates (sodium chlorate) Inorganic sulfites Iodine Malathion (OP RED) MCPB Metaldehyde Methanearsonic acid, salts (DSMA, MSMA, CAMA) MGK-264 Mineral bases, weak (sodium carbonate) PCNB Permethrin 2-Phenylphenol and salts Phytophthora palmivora Piperonyl butoxide Propiconazole Propylene oxide Pyrethrins Resmethrin Salicylic acid Simazine (triazine RED) TCMTB Triadimefon **22 OP IREDs became REDs on 7–31–06** Acephate Azinphos-methyl Bensulide Chlorpyrifos Diazinon Dichlorvos or DDVP Dicrotophos Dimethoate Disulfoton Ethoprop Methamidophos Methidathion Methyl Parathion Naled Oxydemeton-methyl (ODM) Phorate Phosmet Pirimiphos-methyl Profenofos Propetamphos Terbufos Tribufos (DEF)	330 REDs
4 IREDs Carbofuran (N-methyl carbamate) Dichlorvos (DDVP) (OP IRED, became a RED on 7–31–06) Dimethoate (OP IRED, became a RED on 7–31–06) Formetanate HCl (N-methyl carbamate)	4 IREDs

TABLE 1.—REREGISTRATION/RISK MANAGEMENT DECISIONS COMPLETED: IN FY 2006 AND FY 1991 THROUGH FY 2006—Continued

FY 2006 Decisions	Total, FY 1991 through FY 2006
19 TREDs Acetochlor Amitraz Azadirachitin Bitertanol Boric acid group CP enolpyruvylshikimate-3-phosphate Ethephon Ethylene oxide (ETO) (RED in FY 2007) Inert ingredients of semichemical dispensers Imazaquin Methyl bromide (commodity uses RED & TRED in FY 2006; soil fumigant uses RED in FY 2007) Neomycinphosphotransferase II Oxytetracycline Propazine Rotenone (RED in FY 2007) Sodium Cyanide Streptomycin Triadimenol Tridemorph	95 TREDs

1. *REDs.* Through the reregistration program, EPA is reviewing current scientific data for older pesticides (those initially registered before November 1984), reassessing their effects on human health and the environment, and requiring risk mitigation measures as necessary. Pesticides that have sufficient supporting data and whose risks can be successfully mitigated may be declared ''eligible'' for reregistration. EPA presents these pesticide findings in a RED document.

i. *Overall RED progress.* EPA's overall progress at the end of FY 2006 in completing Reregistration Eligibility Decisions (REDs) for groups of related pesticide active ingredients or cases is summarized in Table 2.

TABLE 2.—OVERALL RED PROGRESS, FY 1991 THROUGH FY 2006

REDs completed	330 (54%)
Cases canceled	229 (37%)
REDs to be completed	54 (9%)
Total reregistration cases	613 (100%)

ii. *Profile of completed REDs.* A profile of the REDs completed by the end of FY 2006 is presented in Table 3.

TABLE 3.—PROFILE OF 330 REDS COMPLETED, FY 1991 THROUGH FY 2006

Pesticide active ingredients	527

TABLE 3.—PROFILE OF 330 REDS COMPLETED, FY 1991 THROUGH FY 2006—Continued

Pesticide products	over 20,000

iii. *Risk reduction in REDs.* Through the reregistration program, EPA seeks to reduce risks associated with the use of older pesticides. In developing REDs, EPA works with stakeholders including pesticide registrants, growers and other pesticide users, and environmental and public health interests groups, as well as the States, USDA, and other Federal agencies and others to develop measures to effectively reduce risks of concern. Almost every RED includes some measures or modifications to reduce risks. The options for such risk reduction are extensive and include voluntary cancellation of pesticide products or deletion of uses; declaring certain uses ineligible or not yet eligible (and then proceeding with follow-up action to cancel the uses or require additional supporting data); restricting use of products to certified applicators; limiting the amount or frequency of use; improving use directions and precautions; adding more protective clothing and equipment requirements; requiring special packaging or engineering controls; requiring no-treatment buffer zones; employing ground water, surface water, or other environmental and ecological safeguards; and other measures.

2. *Interim REDs or IREDs.* EPA issues IREDs for pesticides that are undergoing reregistration, require a reregistration eligibility decision, and also must be included in a cumulative assessment under FQPA because they are part of a group of pesticides that share a common mechanism of toxicity. An IRED is issued for each individual pesticide in the cumulative group when EPA completes the pesticide's risk assessment and interim risk management decision. An IRED may include measures to reduce risks from food, drinking water, residential, occupational, and/or ecological exposure while the cumulative risk assessment is pending. For example, EPA generally did not consider individual organophosphate (OP) pesticide decisions made in advance of the cumulative risk assessment to be completed REDs or tolerance reassessments. Instead, the Agency issued IREDs for these chemicals. EPA completed the risk assessments and reregistration eligibility decisions for those OP pesticides with IREDs, once the Agency completed the OP cumulative risk assessment on July 31, 2006.See *http://www.epa.gov/pesticides/cumulative/*.

3. *Tolerance reassessment ''TREDs.''* EPA issues Reports on FFDCA Tolerance Reassessment Progress and [Interim] Risk Management Decisions, known as TREDs, for pesticides that require tolerance reassessment decisions under FFDCA, but do not require a reregistration eligibility decision at present because:

- The pesticide was first registered after November 1, 1984, and is considered a ''new'' active ingredient, not subject to reregistration;

• EPA completed a RED for the pesticide before FQPA was enacted; or

• The pesticide is not registered for use in the U.S. but tolerances are established that allow crops treated with the pesticide to be imported from other countries.

As with IREDs, EPA does not complete risk assessment and risk management for pesticides subject to TREDs that are part of a cumulative group until cumulative risks have been considered for the group.

During FY 2006, EPA completed 19 TREDs. By August 3, 2006, EPA also completed tolerance assessment decisions for food use pesticide inert ingredients that are exempted from the tolerance requirement. Almost 900 of the 9,721 tolerance reassessment decisions required by the amended FFDCA were for such inert ingredient tolerance exemptions.

As a result of the FQPA, food-contact surface sanitizing solutions previously regulated by both EPA and the Food and Drug Administration were transferred to EPA's sole jurisdiction. Consequently, the approximately 107 ingredients that made up these sanitizer solutions in 21 CFR 178.1010 were transferred to 40 CFR 180.940. In addition to reassessing the 9,721 tolerances and exemptions for food and feed commodities, EPA also was required to reassess these sanitizer tolerance exemptions by August 3, 2006. The Antimicrobials Division (AD) in EPA's Office of Pesticide Programs is responsible for reassessing exemptions from the requirement of a tolerance for the food-contact surface sanitizing solutions requiring reassessment. AD completed the reassessment of 120 tolerance exemptions in FY 2006, resulting in a total of 174 tolerance exemptions reassessed for the food-contact surface sanitizing solutions.

4. *Goals for FY 2007 and future years*. EPA's major pesticide reregistration and tolerance reassessment goals for FY 2007 and future years are as follows.

i. *Complete individual pesticide risk management decisions*. EPA's goal in conducting the reregistration program is to complete 6 remaining Reregistration Eligibility Decisions (REDs) and Interim REDs (IREDs) for pesticides with food uses and 19 REDs for pesticides with no food uses during FY 2007. The Agency plans to complete the remaining 29 non-food use REDs in FY 2008. EPA's schedule for completing these decisions appears near the end of this document, and also is available on the Agency's website at *http://www.epa.gov/pesticides/reregistration/decision_schedule.htm*.

ii. *Complete tolerance reassessment decisions*. EPA completed over 99% of all required tolerance reassessment decisions by August 3, 2006, the 10–year anniversary of FQPA. EPA expects to complete the N-methyl carbamate cumulative risk assessment and the Agency's final 84 tolerance reassessment decisions, thereby completing theFQPA tolerance reassessment program.

iii. *Evaluate cumulative risks*. EPA completed cumulative risk assessments for the organophosphate (OP), triazine, and chloroacetanilide pesticides during FY 2006. Once EPA completes an individual decision for aldicarb, the Agency will make a cumulative risk finding for the N-methyl carbamate common mechanism group of pesticides. No other groups are scheduled at present for cumulative risk assessments. For further information, see EPA's Assessing Pesticide Cumulative Risk web page,*http//www.epa.gov/pesticides/cumulative/index.htm*.

B. Product Reregistration; Numbers of Products Reregistered, Canceled, and Amended

At the end of the reregistration process, after EPA has issued a RED and declared a pesticide reregistration case eligible for reregistration, individual end-use products that contain pesticide active ingredients included in the case still must be reregistered. This concluding part of the reregistration process is called ''product reregistration.''

In issuing a completed RED document, EPA sends registrants a Data Call-In (DCI) notice requesting any product-specific data and specific revised labeling needed to complete reregistration for each of the individual pesticide products covered by the RED. Based on the results of EPA's review of these data and labeling, products found to meet FIFRA and FFDCA standards may be reregistered.

A variety of outcomes are possible for pesticide products completing this final phase of the reregistration process. Ideally, in response to the DCI notice accompanying the RED document, the pesticide producer, or registrant, will submit the required product-specific data and revised labeling, which EPA will review and find acceptable. At that point, the Agency may reregister the pesticide product. If, however, the product contains multiple active ingredients, the Agency instead issues an amendment to the product's registration, incorporating the labeling changes specified in the RED. A product with multiple active ingredients may not be fully reregistered until the last active ingredient in its formulation is eligible for reregistration. In other situations, the Agency may temporarily suspend a product's registration if the registrant has not submitted required product-specific studies within the time frame specified. The Agency may cancel a product's registration because the registrant did not pay the required registration maintenance fee. Alternatively, the registrant may request a voluntary cancellation of their end-use product registration.

1. *Product reregistration actions in FY 2006*. EPA counts each of the post-RED product outcomes described above as a product reregistration action. A single pesticide product may be the subject of several product reregistration actions within the same year. For example, a product's registration initially may be amended, then the product may be reregistered, and later the product may be voluntarily canceled, all within the same year. During FY 2006, EPA completed the product reregistration actions detailed in Table 4.

TABLE 4.—PRODUCT REREGISTRATION ACTIONS COMPLETED DURING FY 2006

Product reregistration actions	169
Product amendment actions	40
Product cancellation actions	297
Product suspension actions	0
Total actions	506

2. *Status of the product reregistration universe*. The status of the universe of pesticide products subject to reregistration at the end of FY 2006 is shown in Table 5 below. This overall status information is not ''cumulative''--it is not derived from summing up a series of annual actions. Adding annual actions would result in a larger overall number since each individual product is subject to multipleactions--it can be amended, reregistered, and/or canceled, over time. Instead, the ''big picture'' status information in Table 5 should be considered a snapshot in time. As registrants and EPA make marketing and regulatory decisions in the future, the status of individual products may change, and numbers in this table are expected to fluctuate.

TABLE 5.—STATUS OF THE UNIVERSE OF PRODUCTS SUBJECT TO PRODUCT REREGISTRATION, FOR FY 2006 (AS OF SEPTEMBER 30, 2006)

Products reregistered	2,063
Products amended	554

TABLE 5.—STATUS OF THE UNIVERSE OF PRODUCTS SUBJECT TO PRODUCT REREGISTRATION, FOR FY 2006 (AS OF SEPTEMBER 30, 2006)—Continued

Products canceled	4,672
Products sent for suspension	30
Total products with actions completed	7,319
Products with actions pending	12,932
Total products in product reregistration universe	20,251

The universe of 20,251 products in product reregistration at the end of FY 2006 represented an increase of 8,638 products from the FY 2005 universe of 11,613 products. The increase consists of 8,613 products associated with FY 2006 REDs, IREDs, and TREDs, and 25 products that were added as a result of DCI activities and processing for several previously issued REDs and IREDs.

At the end of FY 2006, 12,932 products had product reregistration decisions pending. Some pending products await science reviews, label reviews, or reregistration decisions by EPA. Others are not yet ready for product reregistration actions, but they are associated with more recently completed REDs. Their product-specific data are not yet due to be submitted to or reviewed by the Agency. EPA's goal is to complete 545 product reregistration actions during fiscal year 2007.

C. Number and Type of DCIs to Support Product Reregistration by Active Ingredient

1. *DCIs for REDs and IREDs.* The number and type of Data Call-In requests or DCIs that EPA is preparing to issue under FIFRA section 3(c)(2)(B) to support product reregistration for pesticide active ingredients included in FY 2006 REDs and IREDs are shown in Table 6.

TABLE 6.—DCIS ISSUED TO SUPPORT PRODUCT REREGISTRATION FOR FY 2006 REDS AND IREDS

Case Name	Case No.	Number of Products Covered by the RED[1]	Number of Product Chemistry Studies Required[2]	Number of Acute Toxicology Studies Required[3]	Number of Efficacy Studies Required
ADBAC	0350	1,047	PDCI has not been completed yet	Antimicrobial RED – Acute toxicity batching not completed yet	PDCI has not been completed yet
Aliphatic Alkyl Quarternaries (DDAC)	3003	382	PDCI has not been completed yet	Antimicrobial RED – Acute toxicity batching not completed yet	PDCI has not been completed yet
Aliphatic Solvents	3004	158	31	Acute toxicity batching not completed yet	PDCI has not been completed yet
Alkylbenzene Sulfonates	4006	20	0	Antimicrobial RED – Acute toxicity batching not completed yet	5
Cacodylic Acid	2080	36	31	See footnote 4 below	0

Triadimefon	2700	56	31	102 (7 batches/ 10 not batched)	0
Total No. of Products	---	8,606	---	---	---

[1]The number of registered products containing a pesticide active ingredient can change over time. The product total that appears in the RED document (counted when the RED is signed) may be different than the number of products that EPA is tracking for product reregistration (counted later, when the RED is issued). This table reflects the final number of products associated with each RED, as they are being tracked for product reregistration.

[2]This column shows the number of product chemistry studies that are required for each product covered by the RED.

[3]In an effort to reduce the time, resources, and number of animals needed to fulfill acute toxicity data requirements, EPA ''batches'' products that can be considered similar from an acute toxicity standpoint. For example, one batch could contain five products. In this instance, if six acute toxicology studies usually were required per product, only six studies (rather than 30 studies) would be required for the entire batch. Factors considered in the sorting process include each product's active and inert ingredients (e.g., identity, percent composition, and biological activity), type of formulation (e.g., emulsifiable concentrate, aerosol, wettable powder, granular), and labeling (e.g., signal word, use classification, precautionary labeling). The Agency does not describe batched products as ''substantially similar,'' because all products within a batch may not be considered chemically similar or have identical use patterns.(Note: FIFRA section 24(c) or Special Local Need (SLN) registrations are not included in the acute toxicity batchings because they are supported by a valid parent product (section 3) registration.)

[4]Ineligible for reregistration; public comments under consideration. Depending on the Agency's formal response to the public comments, PDCIs may or may not be required for these chemicals.

2. *DCIs for TREDs*. There are cases in which product-specific DCIs may be required for TREDs, particularly if the Agency believes that adequate product chemistry or acute toxicity data are not currently on file to support the reregistration of the products associated with the TREDs. The Agency is requiring product-specific DCIs for the following TRED:

TABLE 7.—DCIS ISSUED TO SUPPORT PRODUCT REREGISTRATION FOR FY 2006 TRED

Case Name	Case No.	Number of Products Covered by the TRED[1]	Number of Product Chemistry Studies Required[2]	Number of Acute Toxicology Studies Required[3]	Number of Efficacy Studies Required
Triadimenol	NA	7	31	42 (7 products not batched)	0

TABLE 7.—DCIs ISSUED TO SUPPORT PRODUCT REREGISTRATION FOR FY 2006 TRED—Continued

Case Name	Case No.	Number of Products Covered by the TRED[1]	Number of Product Chemistry Studies Required[2]	Number of Acute Toxicology Studies Required[3]	Number of Efficacy Studies Required
Total No. of Products	---	7	---	---	---

[1]The number of registered products containing a pesticide active ingredient can change over time. The product total that appears in the RED document (counted when the RED is signed) may be different than the number of products that EPA is tracking for product reregistration (counted later, when the RED is issued). This table reflects the final number of products associated with each RED, as they are being tracked for product reregistration.

[2]This column shows the number of product chemistry studies that are required for each product covered by the RED.

[3]In an effort to reduce the time, resources, and number of animals needed to fulfill acute toxicity data requirements, EPA ''batches'' products that can be considered similar from an acute toxicity standpoint. For example, one batch could contain five products. In this instance, if six acute toxicology studies usually were required per product, only six studies (rather than 30 studies) would be required for the entire batch. Factors considered in the sorting process include each product's active and inert ingredients (e.g., identity, percent composition, and biological activity), type of formulation (e.g., emulsifiable concentrate, aerosol, wettable powder, granular), and labeling (e.g., signal word, use classification, precautionary labeling). The Agency does not describe batched products as ''substantially similar,'' because all products within a batch may not be considered chemically similar or have identical use patterns.(Note: FIFRA section 24(c) or Special Local Need (SLN) registrations are not included in the acute toxicity batchings because they are supported by a valid parent product (section 3) registration.)

D. Progress in Reducing the Number of Unreviewed, Required Reregistration Studies

EPA has made progress in reviewing scientific studies submitted by pesticide registrants in support of pesticides undergoing reregistration (See Table 8). The percent of studies reviewed by EPA remained constant in FY 2006.

TABLE 8.—REVIEW STATUS OF STUDIES SUBMITTED FOR PESTICIDE REREGISTRATION, END OF FY 2006

Pesticide Reregistration List, per FIFRA Section 4(c)(2)	Studies Reviewed + Extraneous[1]	Studies Awaiting Review	Total Studies Received
List A	11,262 + 588 = 11,850 (87%)	1,788 (13%)	13,638
List B	6,585 + 1,041 = 7,626 (81%)	1,748 (19%)	9,374
List C	2,097 + 334 = 2,431 (84%)	463 (16%)	2,894
List D	1,266 + 133 = 1,399 (86%)	228 (14%)	1,627
Total Lists A - D	21,210 + 2,096 = 23,306 (84.65%)	4,227 (15.35%)	27,533 (100%)

[1]Extraneous studies is a term used to classify those studies that are not needed because the guideline or data requirement has been satisfied by other studies or has changed.

E. Aggregate Status of Tolerances Reassessed

During FY 2006, EPA completed 1,820 tolerance reassessments and ended the fiscal year with a total of 9,637 tolerance reassessment decisions to date, addressing over 99% of the 9,721 tolerances that require reassessment (See Table 9).

EPA reassessed over 33% of all food tolerances by August 3, 1999, and completed over 66% of all required tolerance reassessment decisions by August 3, 2002, meeting two important statutory deadlines established by the FQPA. EPA's general schedule for tolerance reassessment (62 FR 42020, August 4, 1997) identified three groups of pesticides to be reviewed; this grouping continues to reflect the Agency's overall scheduling priorities. In completing tolerance reassessment, EPA continues to give priority to pesticides in Group 1, the Agency's highest priority group for reassessment.

1. *Aggregate accomplishments through reregistration and other programs.* EPA is accomplishing tolerance reassessment through the registration and reregistration programs; by revoking tolerances for pesticides that have been canceled (many as a result of reregistration); by reevaluating pesticides with pre-FQPA REDs, and through other decisions not directly related to registration or reregistration, described further below. EPA is using the Tolerance Reassessment Tracking System (TORTS) to compile this updated information and report on the status of tolerance reassessment (See Table 9).

TABLE 9.—TOLERANCE REASSESSMENTS COMPLETED POST-FQPA BY FISCAL YEAR, THROUGH FY 2006*

Tolerances Reassessed Through...	Late FY 96	FY 1997	FY 1998	FY 1999	FY 2000	FY 2001	FY 2002	FY 2003	FY 2004	FY 2005	FY 2006	Total, End of FY 2006
Reregistration/REDs	25	339	277	359	44	46	231	79	87	413	1,037	2,937

TABLE 9.—TOLERANCE REASSESSMENTS COMPLETED POST-FQPA BY FISCAL YEAR, THROUGH FY 2006*—Continued

Tolerances Reassessed Through...	Late FY 96	FY 1997	FY 1998	FY 1999	FY 2000	FY 2001	FY 2002	FY 2003	FY 2004	FY 2005	FY 2006	Total, End of FY 2006
Tolerance Reassessments/TREDs	0	0	0	0	0	0	776	14	119	69	306	1,284
Registration	0	224	308	340	55	216	200	0	71	0	1	1,415
Tolerance revocations	3	0	812	513	22	35	545	0	172	75	185	2,362
Other decisions including inerts	0	1	0	233	0	0	905	26	18	165	291	1,639
Total tolerances reassessed	28	564	1,397	1,445	121	297	2,657	119	467	722	1,820	9.637

*Includes corrected counts for some previous years.

i. *Reregistration/REDs.* EPA is using the reregistration program to accomplish much of tolerance reassessment. For each of the tolerance reassessment decisions made through REDs since enactment of the FQPA, the Agency has made the finding as to whether there is a reasonable certainty of no harm, as required by FFDCA. Many tolerances reassessed through reregistration remain the same while others may be raised, lowered, or revoked.

ii. *Tolerance reassessments/TREDs.* Tolerances initially evaluated through REDs that were completed before FQPA was enacted in August 1996 now are being reassessed to ensure that they meet the new FFDCA safety standard. EPA issues these post-RED tolerance reassessment decisions as TREDs. The Agency also issues TREDs summarizing tolerance reassessment decisions for some developing REDs, for new pesticide active ingredients not subject to reregistration, and for pesticides with import tolerances only. Tolerance reassessments for the OPs, triazines, and chloroacetanilides (groups with completed cumulative risk assessments) and for pesticides that are not part of a cumulative group may be counted at present and are included in the FY 2006 accomplishments.Tolerance reassessments for pesticides that are part of the N-methyl carbamate cumulative group are not included in the Agency's lists of accomplishments. The reassessment of these 84 tolerances will be completed after EPA completes a cumulative risk evaluation for the group in FY 2007.

iii. *Registration.* Like older pesticides, all new pesticide registrations must meet the safety standard of FFDCA. Many of the registration applications EPA receives are for new uses of pesticides already registered for other uses. To reach a decision on a proposed new food use of an already registered pesticide, EPA must reassess the aggregate risk of the the existing tolerances, as well as the proposed new tolerances, to make sure there is reasonable certainty that no harm will result to the public from aggregate exposure from all uses.

iv. *Tolerance revocations.* Revoked tolerances represent uses of many different pesticide active ingredients that have been canceled in the past. Some pesticides were canceled due to the Agency's risk concerns. Others were canceled voluntarily by their manufacturers, based on lack of support for reregistration. Tolerance revocations are important even if there are no domestic uses of a pesticide because residues in or on imported commodities treated with the chemical could still present dietary risks that may exceed the FFDCA ''reasonable certainty of no harm'' standard, either individually or cumulatively with other substances that share a common mechanism of toxicity.

v. *Other reassessment decisions.* In addition to the types of reassessment actions described above, a total of 1,639 additional tolerance reassessment decisions have been made. Some have been made for inert ingredient tolerance exemptions through actions not directly related to registration or reregistration.

2. *Accomplishments for priority pesticides.* During FY 2006, EPA completed tolerance reassessment decisions for many high priority pesticides in review, including OPs, carbamates, and carcinogens (See Table 10).

TABLE 10.—TOLERANCE REASSESSMENTS COMPLETED FOR PRIORITY PESTICIDES

Pesticide Class	Tolerances to be Reassessed	Reassessed by End of FY 2006
Carbamates	545	461 (84.6%)
Carcinogens	2,008	2,008 (100%)
Inert ingredient tolerance exemptions	844	844 (100%)
Organochlorines	253	253 (100%)
Organophosphates (OPs)	1,691	1,691 (100%)
Other	4,380	4,380 (100%)
Total	9,721	9,637 (99.1%)

3. *Tolerance reassessment and the organophosphates*. EPA developed an approach for assessing cumulative risk for the OP pesticides as a group, as required by FFDCA, and applied this methodology in conducting an OP cumulative risk assessment. The Agency issued preliminary and revised OP cumulative risk assessment documents in December 2001 and June 2002, and completed an OP Cumulative Risk Assessment; 2006 Update in August 2006, available on EPA's website at*http://www.epa.gov/pesticides/cumulative*.

EPA completed IREDs and REDs for the three remaining individual OP pesticides (DDVP, dimethoate, and malathion) in FY 2006.With the mitigation measures identified for the individual OP pesticides in the pertinent IREDs completed during the past several years, EPA determined that the cumulative risks associated with the OPs do not exceed the FFDCA safety standard. The individual OP pesticides are indeed eligible for reregistration provided that they met the interim reregistration eligibility criteria of the pertinent IREDs.

F. Applications for Registration Requiring Expedited Processing; Numbers Approved and Disapproved

By law, EPA must expedite its processing of certain types of applications for pesticide product registration, i.e., applications for end use products that would be identical or substantially similar to a currently registered product; amendments to current product registrations that do not require review of scientific data; and products for public health pesticide uses. During FY 2006, EPA considered and approved the numbers of applications for registration requiring expedited processing (also known as ''fast track'' applications) shown in Table 11.

TABLE 11.—FAST TRACK APPLICATIONS APPROVED IN FY 2006

Me-too product registrations/Fast track	308
Amendments/Fast track	3,332
Total applications processed by fast track means	3,640

For those applications not approved, the Agency generally notifies the registrant of any deficiencies in the application that need to be corrected or addressed before the application can be approved. Applications may have been withdrawn after discussions with the Agency, but none were formally ''disapproved'' during FY 2006.

On a financial accounting basis, EPA devoted 26.8 full-time equivalents (FTEs) in FY 2006 to reviewing and processing applications for fast track me-too product registrations and label amendments. The Agency spent approximately $3.35 million in FY 2006 in direct costs (i.e., time on task, not including administrative expenses, computer systems, management overhead, and other indirect costs) on expedited processing and reviews.

G. Future Schedule for Reregistrations

EPA plans to complete the remaining 7 REDs for pesticides with food uses in FY 2007, as well as 18 of the remaining non-food use REDs. The remaining REDs for pesticides that have no food uses or tolerances will be completed by October 3, 2008. The Agency's schedule for completing these decisions is as follows. This schedule also is available on EPA's website at*http://www.epa.gov/pesticides/reregistration/decision_schedule.htm*.

1. *RED and IRED Schedule for FY 2007*. List 1 contains pesticides scheduled for Reregistration Eligibility Decisions (REDs) and Interim REDs (IREDs) in FY 2007.

List 1.—FY 2007 RED and IRED Schedule

2,4 DP
Aldicarb (N-methyl carbamate IRED and RED)
Aliphatic alcohols
Aliphatic esters
Alkyl trimethylenediamines
Allethrin stereoisomers
4-Aminopyridine
Antimycin A
Benzoic acid
Bioban-p-1487
Bromonitrostyrene
Chlorflurenol
Dikegulac sodium
Ethylene oxide (ETO) (TRED completed in FY 2006)
Glutaraldehyde
MCPP
Mefluidide
Naphthenate salts
Octhilinone
Rotenone (TRED completed in FY 2006)
Trimethoxysilyl quats

The following N-methyl carbamate IREDs will become REDs when EPA completes the cumulative risk assessment for this common mechanism group.

Carbaryl
Carbofuran
Formetanate HCl
Oxamyl

List 2.—FY 2008 REDs Schedule

Acrolein
Amical 48
Busan 77
Chloropicrin
Chromated arsenicals (CCA)
Coal tar/creosote
Dazomet
Flumetralin
Formaldehyde
Grotan
Inorganic thiosulfates (ammonium and calcium thiosulfate)
Methyl bromide (soil fumigant uses RED; commodity uses TRED & RED completed FY 2006)
Methyldithiocarbamate salts (metam sodium/metam potassium)
MITC
Naphthalene
Nicotine
Organic esters of phosphoric acid
p-Dichlorobenzene
Pentachlorophenol
Polypropylene glycol
Prometon
Siduron
Sodium fluoride
Sulfometuron methyl
Sumithrin
TBT-containing compounds
Tetramethrin
Triforine
Triclosan (Ingasan)

H. Projected Year of Completion of Reregistrations

EPA expects to complete seven remaining reregistration eligibility decisions for N-methyl carbamate pesticides and others with food uses in FY 2007, and to complete decisions for the remaining 47 pesticides with no food uses or tolerances during FY 2007 and FY 2008 (by October 3, 2008).Product reregistration, which takes place only after the reregistration eligibility decisions have been completed for the active ingredients, will not likely be completed before 2012.

List of Subjects

Environmental protection, Pesticides and pests.

Dated: August 15, 2007.

James B. Gulliford,

Assistant Administrator, Office of Prevention, Pesticides and Toxic Substances.

BILLING CODE 6560–50–S

ENVIRONMENTAL PROTECTION AGENCY

[EPA–HQ–OPP–2006-0936; FRL–8145–1]

Notice of Filing of Pesticide Petitions for Residues of Pesticide Chemicals in or on Various Commodities

AGENCY: Environmental Protection Agency (EPA).

ACTION: Notice.

SUMMARY: This notice announces the initial filing of pesticide petitions proposing the establishment or modification of regulations for residues of pesticide chemicals in or on various commodities.

DATES: Comments must be received on or before September 21, 2007.

ADDRESSES: Submit your comments, identified by docket identification (ID) number and the pesticide petition number (PP) of interest, by one of the following methods:

• *Federal eRulemaking Portal*: *http://www.regulations.gov*. Follow the on-line instructions for submitting comments.

• *Mail*: Office of Pesticide Programs (OPP) Regulatory Public Docket (7502P), Environmental Protection Agency, 1200 Pennsylvania Ave., NW., Washington, DC 20460–0001.

• *Delivery*: OPP Regulatory Public Docket (7502P), Environmental Protection Agency, Rm. S–4400, One Potomac Yard (South Bldg.), 2777 S. Crystal Dr., Arlington, VA. Deliveries are only accepted during the Docket's normal hours of operation (8:30 a.m. to 4 p.m., Monday through Friday, excluding legal holidays). Special arrangements should be made for deliveries of boxed information. The Docket Facility telephone number is (703) 305–5805.

Instructions: Direct your comments to the assigned docket ID number and the pesticide petition number of interest. EPA's policy is that all comments received will be included in the docket without change and may be made available on-line at *http://www.regulations.gov*, including any personal information provided, unless the comment includes information claimed to be Confidential Business Information (CBI) or other information whose disclosure is restricted by statute. Do not submit information that you consider to be CBI or otherwise protected through regulations.gov or e-mail. The regulations.gov website is an ''anonymous access'' system, which means EPA will not know your identity or contact information unless you provide it in the body of your comment. If you send an e-mail comment directly to EPA without going through regulations.gov, your e-mail address will be automatically captured and included as part of the comment that is placed in the docket and made available on the Internet. If you submit an electronic comment, EPA recommends that you include your name and other contact information in the body of your comment and with any disk or CD-ROM you submit. If EPA cannot read your comment due to technical difficulties and cannot contact you for clarification, EPA may not be able to consider your comment. Electronic files should avoid the use of special characters, any form of encryption, and be free of any defects or viruses.

Docket: All documents in the docket are listed in the docket index available in regulations.gov. To access the electronic docket, go to *http://www.regulations.gov*, select ''Advanced Search,'' then ''Docket Search.'' Insert the docket ID number where indicated and select the ''Submit'' button. Follow the instructions on the regulations.gov website to view the docket index or access available documents. Although listed in the index, some information is not publicly available, e.g., CBI or other information whose disclosure is restricted by statute. Certain other material, such as copyrighted material, is not placed on the Internet and will be publicly available only in hard copy. Publicly available docket materials are available electronically at *http://www.regulations.gov*, or, if only available in hard copy, at the OPP Regulatory Public Docket in Rm. S–4400, One Potomac Yard (South Bldg.), 2777 S. Crystal Dr., Arlington, VA. The hours of operation of this Docket Facility are from 8:30 a.m. to 4 p.m., Monday through Friday, excluding legal holidays. The Docket Facility telephone number is (703) 305–5805.

FOR FURTHER INFORMATION CONTACT: The person listed at the end of the pesticide petition summary of interest.

SUPPLEMENTARY INFORMATION:

I. General Information

A. Does this Action Apply to Me?

You may be potentially affected by this action if you are an agricultural producer, food manufacturer, or pesticide manufacturer. Potentially affected entities may include, but are not limited to:

• Crop production (NAICS code 111).

• Animal production (NAICS code 112).

• Food manufacturing (NAICS code 311).

• Pesticide manufacturing (NAICS code 32532).

This listing is not intended to be exhaustive, but rather provides a guide for readers regarding entities likely to be affected by this action. Other types of entities not listed in this unit could also be affected. The North American Industrial Classification System (NAICS) codes have been provided to assist you and others in determining whether this action might apply to certain entities. If you have any questions regarding the applicability of this action to a particular entity, consult the person listed at the end of the pesticide petition summary of interest.

B. What Should I Consider as I Prepare My Comments for EPA?

1. *Submitting CBI*. Do not submit this information to EPA through regulations.gov or e-mail. Clearly mark the part or all of the information that you claim to be CBI. For CBI information in a disk or CD-ROM that you mail to EPA, mark the outside of the disk or CD-ROM as CBI and then identify electronically within the disk or CD-ROM the specific information that is claimed as CBI. In addition to one complete version of the comment that includes information claimed as CBI, a copy of the comment that does not contain the information claimed as CBI must be submitted for inclusion in the public docket. Information so marked will not be disclosed except in accordance with procedures set forth in 40 CFR part 2.

2. *Tips for preparing your comments*. When submitting comments, remember to:

i. Identify the document by docket ID number and other identifying information (subject heading, **Federal Register** date and page number).

ii. Follow directions. The Agency may ask you to respond to specific questions or organize comments by referencing a Code of Federal Regulations (CFR) part or section number.

iii. Explain why you agree or disagree; suggest alternatives and substitute language for your requested changes.

iv. Describe any assumptions and provide any technical information and/or data that you used.

v. If you estimate potential costs or burdens, explain how you arrived at your estimate in sufficient detail to allow for it to be reproduced.

vi. Provide specific examples to illustrate your concerns and suggest alternatives.

vii. Explain your views as clearly as possible, avoiding the use of profanity or personal threats.

viii. Make sure to submit your comments by the comment period deadline identified.

II. Docket ID Numbers

When submitting comments, please use the docket ID number and the pesticide petition number of interest, as shown in the table.

PP Number	Docket ID Number
PP 7E7224	EPA–HQ–OPP–2007–0672
PP 5F7006	EPA–HQ–OPP–2007–0876

III. What Action is the Agency Taking?

EPA is printing notice of the filing of pesticide petitions received under section 408 of the Federal Food, Drug, and Cosmetic Act (FFDCA), 21 U.S.C. 346a, proposing the establishment or modification of regulations in 40 CFR part 180 for residues of pesticide chemicals in or on various food commodities. EPA has determined that the pesticide petitions described in this notice contain data or information regarding the elements set forth in FFDCA section 408(d)(2); however, EPA has not fully evaluated the sufficiency of the submitted data at this time or whether the data support granting of the pesticide petitions. Additional data may be needed before EPA rules on these pesticide petitions.

Pursuant to 40 CFR 180.7(f), a summary of each of the petitions included in this notice, prepared by the petitioner, is included in a docket EPA has created for each rulemaking. The docket for each of the petitions is available on-line at *http://www.regulations.gov*.

New Tolerances

1. *PP 7E7224*. (EPA–HQ–OPP–2007–0672). Bayer CropScience, 2 T.W., Alexander Drive, P.O. Box 12014, Research Triangle Park, NC 27709, proposes to establish a tolerance for residues of the mefenpyr-diethyl, 1-(2,4-dichlorophenyl)-4,5-dihydro-5-methyl-1H-pyrazole-3,5-dicarboxylic acid, diethyl ester and its 2,4-dichlorophenyl -pyrazoline metabolites in or on food commodity soybean, seed at 0.02 parts per million (ppm); soybean, forage at 0.1 ppm; soybean, hay at 0.1 ppm; and canola, seed at 0.02 ppm. A practical analytical method utilizing gas chromatography and a mass selective detector (GC/MSD) is available for detecting and measuring levels of mefenpyr-diethyl and its 2,4-dichlorophenylpyrazoline containing metabolites in plant material. The limit of quantitation (LOQ) was validated at 0.01 milligram/kilogram (mg/kg/ppm) in wheat and barley grain, 0.05 mg/kg/ppm in wheat and barley straw and wheat hay, and 0.1 ppm in wheat forage. An analytical method for the determination of mefenpyr-diethyl and its metabolites in beef liver is also available using GC/MSD. The limit of quantification for both mefenpyr-diethyl and its metabolites is 0.05 ppm. Contact: Tracy H. Ward, telephone number: (703) 308–9361; e-mail address: *ward.tracyH@epa.gov*.

2. *PP 5F7006*. (EPA–HQ–OPP–2007–0876). Dow AgroSciences LLC, 9330 Zionsville Road, Indianapolis, IN 46268, proposes to establish a tolerance for residues of the insecticide XDE–175 (expressed as combination of XDE–175–J): 1-H-as-Indaceno[3,2-d] oxacyclododecin-7,15-dione, 2-[(6-deoxy-3-O-ethyl-2,4-di-O-methyl-a-L-mannopyranosyl)oxy]-13-[[(2R,5S,6R)-5-(dimethylamino)t tetrahydro-6-methyl-2H-pyran-2-yl]oxy]-9-ethyl-2,3,3a,4,5,5a,5b,6,9,10,11,12,13,14,16a,16b-hexadecahydro1 14-methyl-, (2R,3aR,5aR,5bS,9S,13S,14R,16aS,16bR) and XDE–175–L: 1H-as-Indaceno[3,2-d] oxacyclododecin-7,15-dione, 2-[(6-deoxy-3-O-ethyl-2,4-di-O-methyl-a-L-mannopyranosyl)oxy]-13-[[(2R,5S,6R)-5-(dimethylamino)t tetrahydro-6-methyl-2H-pyran-2-yl]oxy]-9-ethyl-2,3,3a,5a,5b,6,9,10,11,12,13,14,16a,16b-tetradecahydro-4,14-dimethyl-, (2S,3aR,5aS,5bS,9S,13S,14R,16aS,16bS] in or on food commodities acerola at 1.5 parts per million (ppm); almond, hulls at 2 ppm; amaranth, grain, grain at 1 ppm; apple, wet pomace at 0.5 ppm; artichoke, globe at 0.3 ppm; asparagus at 0.2 ppm; atemoya at 0.3 ppm; avocado at 0.3 ppm; banana at 0.25 ppm; barley, hay and straw at 5 ppm; beet, sugar, molasses at 0.75 ppm; biriba at 0.3 ppm; *Brassica*, head and stem, subgroup 5A at 2 ppm; bushberry, subgroup 13B at 0.25 ppm; caneberry, subgroup 13A at 0.7 ppm; canistel at 0.3 ppm; cattle, fat at 2 ppm; cattle, meat byproducts at 1 ppm; cattle, meat at 0.1 ppm; cherimoya at 0.3 ppm; citrus, dried pulp at 0.5 ppm; citrus, oil at 3 ppm; coriander, leaves at 8 ppm; corn, field, forage at 1.5 ppm; corn, field, hay at 1 ppm; corn, field, stover at 5 ppm; corn, field, straw at 1 ppm; corn, sweet, forage at 1.5 ppm; corn, sweet, kernel plus cob with husks removed at 0.02 ppm; corn, sweet, stover at 5 ppm; cotton, gin byproducts at 1.5 ppm; cotton, undelinted seed at 0.02 ppm; cranberry at 0.01 ppm; custard apple at 0.3 ppm; feijoa at 0.05 ppm; fig at 0.1 ppm; fruit, citrus, group 10 at 0.3 ppm; fruit, pome, group 11 at 0.2 ppm; fruit, stone, group 12 at 0.2 ppm; goat, fat at 2 ppm; goat, meat byproducts at 1 ppm; goat, meat at 0.1 ppm; grain, aspirated fractions at 5 ppm; grain, cereal, group 15 at 0.02 ppm; grape at 0.5 ppm; guava at 0.3 ppm; herb, dried, subgroup 19B at 22 ppm; herbs, fresh, subgroup 19A at 3 ppm; hog, fat at 1 ppm; hog, meat at 0.1 ppm; hog, meat byproducts at 0.5 ppm; hops at 22 ppm; horse, fat at 2 ppm; horse, meat at 0.1 ppm; horse, meat byproducts at 1 ppm; ilama at 0.3 ppm; jaboticaba at 0.3 ppm; juneberry at 0.25 ppm; vegetables, leafy (except *Brassica* vegetables), group 4 at 8 ppm; vegetables, legume, dried shell pea and bean (except soybean), crop subgroup 6C at 0.02 ppm; vegetables, legume, edible podded, crop subgroup 6A at 0.3 ppm; vegetables, legume, succulent shelled pea and bean, crop subgroup 6B at 0.02 ppm; lingonberry at 0.25 ppm; longan at 0.3 ppm; lychee at 0.3 ppm; mango at 0.3 ppm; milk at 0.5 ppm; milk, fat at 1 ppm; millet, forage at 1.5 ppm; millet, hay and straw at 5 ppm; nut, tree, group 14 at 0.02 ppm; oat, forage at 1.5 ppm; oat, hay and straw at 5 ppm; okra at 0.4 ppm; onion, dry, bulb at 0.1 ppm; onion, green at 2 ppm; papaya at 0.3 ppm; passionfruit at 0.3 ppm; peanut at 0.02 ppm; peanut, hay at 11 ppm; peppermint, tops at 3.5 ppm; pistachio at 0.02 ppm; plantain at 0.25 ppm; pulasan at 0.3 ppm; rambutan at 0.3 ppm; rye, forage at 1.5 ppm; rye, straw at 5 ppm; salal at 0.25 ppm; sapodilla at 0.3 ppm; sapote, black at 0.3 ppm; sapote, mamey at 0.3 ppm; sapote, white at 0.3 ppm; sheep, fat at 2 ppm; sheep, meat at 0.1 ppm; sheep, meat byproducts at 1 ppm; sorghum, forage at 1.5 ppm; sorghum, hay at 5 ppm; sorghum, stover at 5 ppm; soursop at 0.3 ppm; soybean at 0.02 ppm; Spanish lime at 0.3 ppm; spearmint, tops at 3.5 ppm; star apple at 0.3 ppm; starfruit at 0.3 ppm; strawberry at 1 ppm; sugar apple at 0.3 ppm; teosinte, forage at 1.5 ppm; ti, leaves at 10 ppm; triticale, forage at 1.5 ppm; triticale, hay at 5 ppm; vegetable, *Brassica*, leafy, group 5 at 10 ppm; vegetable, bulb, (except green onion, group 3 at 0.1 ppm; vegetable, cucurbit (cucumber, melon, squashes)), group 9 at 0.3 ppm; vegetable, foliage of legume, group 7 at 8 ppm; vegetable, fruiting, group 8 at 0.4 ppm; vegetable, leaves of root and tuber, group 2 at 10 ppm; vegetable, root and tuber, group 1 at 0.1 ppm; watercress at 8 ppm; wax jambu at 0.3 ppm; wheat, forage at 1.5 ppm; wheat, hay and straw at 5 ppm.

There is a practical method liquid chromatography with positive ion electrospray ionization (ESI) tandem mass spectrometry (LC/MS/MS) for detection of residues. The limit of detection (LOD) and LOQ are 0.003 g/g and 0.01 g/g, respectively for each parent and metabolite are suitable for detecting and measuring levels of XDE–

175 in or on food that allows monitoring of food with residues at or above the level set for these tolerances. The method had undergone successful independent laboratory validation. Contact: Bonaventure Akinlosotu, telephone number: (703) 605–0653; e-mail address: *akinlosotu.bonaventure@epa.gov*.

Notice of Filing of Pesticide Petitions for Residues of Pesticide Chemicals in or on Various Commodities

AGENCY: Environmental Protection Agency (EPA).

ACTION: Notice.

SUMMARY: This notice announces the initial filing of pesticide petitions proposing the establishment or modification of regulations for residues of pesticide chemicals in or on various commodities.

DATES: Comments must be received on or before September 21, 2007.

ADDRESSES: Submit your comments, identified by docket identification (ID) number and the pesticide petition number (PP) of interest, by one of the following methods:

• *Federal eRulemaking Portal*: *http://www.regulations.gov*. Follow the on-line instructions for submitting comments.

• *Mail*: Office of Pesticide Programs (OPP) Regulatory Public Docket (7502P), Environmental Protection Agency, 1200 Pennsylvania Ave., NW., Washington, DC 20460–0001.

• *Delivery*: OPP Regulatory Public Docket (7502P), Environmental Protection Agency, Rm. S–4400, One Potomac Yard (South Bldg.), 2777 S. Crystal Dr., Arlington, VA. Deliveries are only accepted during the Docket's normal hours of operation (8:30 a.m. to 4 p.m., Monday through Friday, excluding legal holidays). Special arrangements should be made for deliveries of boxed information. The Docket Facility telephone number is (703) 305–5805.

Instructions: Direct your comments to the assigned docket ID number and the pesticide petition number of interest. EPA's policy is that all comments received will be included in the docket without change and may be made available on-line at *http://www.regulations.gov*, including any personal information provided, unless the comment includes information claimed to be Confidential Business Information (CBI) or other information whose disclosure is restricted by statute. Do not submit information that you consider to be CBI or otherwise protected through regulations.gov or e-mail. The regulations.gov website is an ''anonymous access'' system, which means EPA will not know your identity or contact information unless you provide it in the body of your comment. If you send an e-mail comment directly to EPA without going through regulations.gov, your e-mail address will be automatically captured and included as part of the comment that is placed in the docket and made available on the Internet. If you submit an electronic comment, EPA recommends that you include your name and other contact information in the body of your comment and with any disk or CD-ROM you submit. If EPA cannot read your comment due to technical difficulties and cannot contact you for clarification, EPA may not be able to consider your comment. Electronic files should avoid the use of special characters, any form of encryption, and be free of any defects or viruses.

Docket: All documents in the docket are listed in the docket index available in regulations.gov. To access the electronic docket, go to *http://www.regulations.gov*, select ''Advanced Search,'' then ''Docket Search.'' Insert the docket ID number where indicated and select the ''Submit'' button. Follow the instructions on the regulations.gov website to view the docket index or access available documents. Although listed in the index, some information is not publicly available, e.g., CBI or other information whose disclosure is restricted by statute. Certain other material, such as copyrighted material, is not placed on the Internet and will be publicly available only in hard copy. Publicly available docket materials are available electronically at *http://www.regulations.gov*, or, if only available in hard copy, at the OPP Regulatory Public Docket in Rm. S–4400, One Potomac Yard (South Bldg.), 2777 S. Crystal Dr., Arlington, VA. The hours of operation of this Docket Facility are from 8:30 a.m. to 4 p.m., Monday through Friday, excluding legal holidays. The Docket Facility telephone number is (703) 305–5805.

FOR FURTHER INFORMATION CONTACT: The person listed at the end of the pesticide petition summary of interest.

SUPPLEMENTARY INFORMATION:

I. General Information

A. Does this Action Apply to Me?

You may be potentially affected by this action if you are an agricultural producer, food manufacturer, or pesticide manufacturer. Potentially affected entities may include, but are not limited to:

• Crop production (NAICS code 111).

• Animal production (NAICS code 112).

• Food manufacturing (NAICS code 311).

• Pesticide manufacturing (NAICS code 32532).

This listing is not intended to be exhaustive, but rather provides a guide for readers regarding entities likely to be affected by this action. Other types of entities not listed in this unit could also be affected. The North American Industrial Classification System (NAICS) codes have been provided to assist you and others in determining whether this action might apply to certain entities. If you have any questions regarding the applicability of this action to a particular entity, consult the person listed at the end of the pesticide petition summary of interest.

B. What Should I Consider as I Prepare My Comments for EPA?

1. *Submitting CBI*. Do not submit this information to EPA through regulations.gov or e-mail. Clearly mark the part or all of the information that you claim to be CBI. For CBI information in a disk or CD-ROM that you mail to EPA, mark the outside of the disk or CD-ROM as CBI and then identify electronically within the disk or CD-ROM the specific information that is claimed as CBI. In addition to one complete version of the comment that includes information claimed as CBI, a copy of the comment that does not contain the information claimed as CBI must be submitted for inclusion in the public docket. Information so marked will not be disclosed except in accordance with procedures set forth in 40 CFR part 2.

2. *Tips for preparing your comments*. When submitting comments, remember to:

i. Identify the document by docket ID number and other identifying information (subject heading, **Federal Register** date and page number).

ii. Follow directions. The Agency may ask you to respond to specific questions or organize comments by referencing a Code of Federal Regulations (CFR) part or section number.

iii. Explain why you agree or disagree; suggest alternatives and substitute language for your requested changes.

iv. Describe any assumptions and provide any technical information and/or data that you used.

v. If you estimate potential costs or burdens, explain how you arrived at your estimate in sufficient detail to allow for it to be reproduced.

vi. Provide specific examples to illustrate your concerns and suggest alternatives.

vii. Explain your views as clearly as possible, avoiding the use of profanity or personal threats.

viii. Make sure to submit your comments by the comment period deadline identified.

II. Docket ID Numbers

When submitting comments, please use the docket ID number and the pesticide petition number of interest, as shown in the table.

PP Number	Docket ID Number
PP 6E7074	EPA–HQ–OPP–2007–0536
PP 6E7120	EPA–HQ–OPP–2007–0541
PP 6F7115	EPA–HQ–OPP–2007–0541
PP 7E7213	EPA–HQ–OPP–2007–0472
PP 7E7230	EPA–HQ–OPP–2007–0604
PP 7E7233	EPA–HQ–OPP–2007–0555
PP 6F7123	EPA–HQ–OPP–2007–0539
PP 7F7171	EPA–HQ–OPP–2007–0539

III. What Action is the Agency Taking?

EPA is printing notice of the filing of pesticide petitions received under section 408 of the Federal Food, Drug, and Cosmetic Act (FFDCA), 21 U.S.C. 346a, proposing the establishment or modification of regulations in 40 CFR part 180 for residues of pesticide chemicals in or on various food commodities. EPA has determined that the pesticide petitions described in this notice contain data or information regarding the elements set forth in FFDCA section 408(d)(2); however, EPA has not fully evaluated the sufficiency of the submitted data at this time or whether the data support granting of the pesticide petitions. Additional data may be needed before EPA rules on these pesticide petitions.

Pursuant to 40 CFR 180.7(f), a summary of each of the petitions included in this notice, prepared by the petitioner, is included in a docket EPA has created for each rulemaking. The docket for each of the petitions is available on-line at *http://www.regulations.gov*.

New Tolerances

1. *PP 6E7074*. (EPA–HQ–OPP–2007–0536). Interregional Research Project Number 4 (IR–4), 500 College Road East, Suite 201W, Princeton, NJ 08540–6635, proposes to establish a tolerance for residues of the fungicide fenarimol [alpha-(2-chlorophenyl)-alpha-(4-chlorophenyl)-5-pyrimidinemethanol] in or on food commodity hop at 1.0 parts per million (ppm). Analytical methodologies used for hop are slight modifications of the basic pesticide analytical manual (PAM) II method for fenarimol (method R039). Residues are extracted with methanol. Aqueous sodium chloride (5%) is added and the extract is partitioned with dichloromethane. Residues are cleaned up on a florisil or alumina column and detected by gas chromatography with electron capture detection (GC/ECD). In hop samples, method validation recoveries ranged from 72% to 94%, and the limit of detection was 0.04 ppm. Contact: Shaja R. Brothers, telephone number: (703) 308–3194; e-mail address: *brothers.shaja@epa.gov*.

2. *PP 6E7120* and *6F7115*. (EPA–HQ–OPP–2007–0541). Syngenta Crop Protection, Inc., P.O. Box 18300, Greensboro, NC 27419, proposes to establish a tolerance for residues of the fungicide difenoconazole (1-[2-[2-chloro-4-(4-chlorophenoxy)phenyl]-4-methyl-1,3-dioxolan-2-ylmethyl]-1H-1,2,4-triazole) in or on food commodities fruit, pome, group 11 at 0.6 ppm; vegetable, fruiting, group 8 at 0.5 ppm; vegetables, tuberous and corm, subgroup 1C at 0.02 ppm; sugar beet roots at 0.3 ppm; sugar beet tops at 7.0 ppm; and imported whole papaya fruit at 0.3 ppm.

i. *Food*. Syngenta Crop Protection, Inc., has submitted a practical analytical method (AG–575B, master record identification (MRID) 428065–04) for detecting and measuring levels of difenoconazole in or on food with a limit of quantitation (LOQ) that allows monitoring of food with residues at or above the levels set in the proposed tolerances. EPA has validated this method and copies have been provided to FDA for insertion into PAM II. The method is available to anyone who is interested, and may be obtained from the Field Operations Division, Office of Pesticide Programs.

ii. *Livestock*. Syngenta Crop Protection, Inc., has submitted a practical analytical method (AG–544A, MRID 432924–01) for detecting and measuring levels of difenoconazole in or on cattle tissues, milk, poultry tissues and eggs, with a LOQ that allows monitoring of food with residues at or above the levels set in the proposed tolerances. EPA has validated this method and copies have been provided to FDA for insertion into PAM II. The method is available to anyone who is interested, and may be obtained from the Field Operations Division, Office of Pesticide Programs. Tolerances in meat, milk, poultry or eggs were established for enforcement purposes. Contact: Janet Whitehurst, telephone number: (703) 305–6129; e-mail address: *whitehurst.janet@epa.gov*.

3. *PP 7E7213*. (EPA–HQ–OPP–2007–0472). Interregional Research Project Number 4 (IR–4), 500 College Road East, Suite 201W, Princeton, NJ 08540–6635, proposes to establish a tolerance for residues of the herbicide thiobencarb in or on food commodity rice, wild at 0.2 ppm. Adequate methods are available for enforcement and data collection purposes for both plant and animal commodities. Successful radiovalidation of the enforcement methods, using samples from the metabolism studies, has also been conducted. Residues of thiobencarb are completely recovered using multi-residue method section 302 (Luke method; Protocol D), and variably recovered using method section 304 (Mills, Onley, Gaither method; fatty food). Contact: Shaja R. Brothers, telephone number: (703) 308–3194; e-mail address: *brothers.shaja@epa.gov*.

4. PP 7E7230. (EPA–HQ–OPP–2007–0604). Interregional Research Project Number 4 (IR–4), 500 College Road East, Suite 201W, Princeton, NJ 08540–6635, proposes to establish a tolerance for residues of the herbicide dichlobenil, 2,6-dichlorobenzonitrile and its metabolite 2,6-dichlorobenzamide in or on food commodities rhubarb at 0.15 ppm; caneberry, subgroup 13A and wild raspberry at 0.1 ppm; and bushberry, subgroup 13B; aronia berry; blueberry, lowbush; buffalo currant; chilian guava; European barberry; highbush cranberry; honeysuckle; jostaberry; Juneberry; lingonberry; native currant; salal; and sea buckthorn at 0.15 ppm. Dichlobenil and 2,6-dichlorobenzamide (BAM) are extracted with a solution of ethyl acetate in hexane. A cleanup system utilizes an alumina column. Detection and quantitation are achieved by a gas chromatograph equipped with an electron capture detector. The lowest limit of method validation for dichlobenil and BAM is 0.05 and 0.01 ppm, respectively. Contact: Susan

Stanton, telephone number: (703) 305–5218; e-mail address: *stanton.susan@epa.gov*.

5. *PP 7E7233*. (EPA–HQ–OPP–2007–0555). Syngenta Crop Protection, Inc., P.O. Box 18300, Greensboro, NC 27419, proposes to establish a tolerance for residues of the inert safener, cloquintocet-mexyl, (acetic acid, [(5-chloro-8-quniolinyl)oxy]-, 1-methylhexyl ester) (CAS Reg. No. 99607–70–2) and its acid metabolite (5-chloro-8-quinlinoxyacetic acid, also known as Syngenta Code CGA–153433)] when used as an inert ingredient (safener) in pesticide formulations containing either the herbicide clodinafop-propargyl or pinoxaden in a 1:4 ratio of safener to active ingredient in or on food commodities wheat, forage at 0.20 ppm and wheat, hay at 0.50 ppm. Syngenta Crop Protection, Inc., has submitted practical analytical methodology for detecting and measuring combined levels of cloquintocet–mexyl and its acid metabolite (5-chloro-8-quinlinoxyacetic acid). The method is based upon acid hydrolysis extraction, which converts the parent and all conjugates to the acid metabolite. The acid metabolite is subject to commodity specific cleanup procedures and high performance liquid chromatography (HPLC) determination with triple stage quadruple mass spectrometry (LC/MS/MS). The LOQ as demonstrated by the lowest acceptable recovery samples, is 0.01 ppm for grain, and 0.02 ppm for forage, hay and straw. Contact: Tracy H. Ward, telephone number: (703) 308–9361; e–mail address: *ward.tracyH@epa.gov*.

6. *PP 6F7123* and *7F7171*. (EPA–HQ–OPP–2007–0539). Bayer CropScience, P.O. Box 12014, 2 T. W. Alexander Drive, Research Triangle Park, NC 27709, proposes to establish a tolerance for residues of the fungicide trifloxystrobin and the free form of its acid metabolite (CGA– 32113) in or on food commodities in *PP 6F7123*: Fruit, citrus, group 10 at 0.4 ppm; citrus, oil at 36.0 ppm; citrus, dry pulp at 1.0 ppm; and in *PP 7F7171*: Strawberry at 1.1 ppm. A practical analytical methodology for detecting and measuring levels of trifloxystrobin in or on raw agricultural commodities has been submitted. The limit of detection (LOD) for each analyte of this method is 0.08 ng injected, and the LOQ is 0.02 ppm. The method is based on crop specific cleanup procedures and determination by gas chromatography with nitrogen-phosphorus detection. Contact: Janet Whitehurst, telephone number: (703) 305–6129; e-mail address: *whitehurst.janet@epa.gov*.

ENVIRONMENTAL PROTECTION AGENCY

[EPA-HQ-OPP–2007–0307; FRL–8143–6]

Pesticide Emergency Exemptions; Agency Decisions and State and Federal Agency Crisis Declarations

AGENCY: Environmental Protection Agency (EPA).

ACTION: Notice.

SUMMARY: EPA has granted or denied emergency exemptions under the Federal Insecticide, Fungicide, and Rodenticide Act (FIFRA) for use of pesticides as listed in this notice. The exemptions or denials were granted during the period January 1, 2007 to March 31, 2007 to control unforeseen pest outbreaks.

FOR FURTHER INFORMATION CONTACT: See each emergency exemption or denial for the name of a contact person. The following information applies to all contact persons: Team Leader, Emergency Response Team, Registration Division (7505P), Office of Pesticide Programs, Environmental Protection Agency, 1200 Pennsylvania Ave., NW., Washington, DC 20460–0001; telephone number: (703) 308–9366.

SUPPLEMENTARY INFORMATION: EPA has granted or denied emergency exemptions to the following State and Federal agencies. The emergency exemptions may take the following form: Crisis, public health, quarantine, or specific. EPA has also listed denied emergency exemption requests in this notice.

I. General Information

A. Does this Action Apply to Me?

You may be potentially affected by this action if you are an agricultural producer, food manufacturer, or pesticide manufacturer. Potentially affected entities may include, but are not limited to:

- Crop production (NAICS code 111).
- Animal production (NAICS code 112).
- Food manufacturing (NAICS code 311).
- Pesticide manufacturing (NAICS code 32532).

This listing is not intended to be exhaustive, but rather provides a guide for readers regarding entities likely to be affected by this action. Other types of entities not listed in this unit could also be affected. The North American Industrial Classification System (NAICS) codes have been provided to assist you and others in determining whether this action might apply to certain entities. To determine whether you or your business may be affected by this action, you should carefully examine the applicability provisions discussed above. If you have any questions regarding the applicability of this action to a particular entity, consult the person listed under **FOR FURTHER INFORMATION CONTACT**.

B. How Can I Get Copies of this Document and Other Related Information?

1. *Docket*. EPA has established a docket for this action under docket identification (ID) number EPA–HQ–OPP–2007–0307. Publicly available docket materials are available either electronically at *http://www.regulations.gov,* or, if only available in hard copy, at the OPP Regulatory Public Docket in Rm. S–4400, One Potomac Yard (South Bldg.), 2777 S. Crystal Dr., Arlington, VA. The hours of operation of this Docket Facility is open from 8:30 a.m. to 4 p.m., Monday through Friday, excluding legal holidays. The Docket Facility telephone number is (703) 305–5805.

2. *Electronic access*. You may access this **Federal Register** document electronically through the EPA Internet under the **Federal Register** listings at *http://www.epa.gov/fedrgstr*.

II. Background

Under FIFRA section 18, EPA can authorize the use of a pesticide when emergency conditions exist. Authorizations (commonly called emergency exemptions) are granted to State and Federal agencies and are of four types:

1. A ''specific exemption'' authorizes use of a pesticide against specific pests on a limited acreage in a particular State. Most emergency exemptions are specific exemptions.

2. ''Quarantine'' and ''public health'' exemptions are a particular form of specific exemption issued for quarantine or public health purposes. These are rarely requested.

3. A ''crisis exemption'' is initiated by a State or Federal agency (and is

confirmed by EPA) when there is insufficient time to request and obtain EPA permission for use of a pesticide in an emergency.

EPA may deny an emergency exemption: If the State or Federal agency cannot demonstrate that an emergency exists, if the use poses unacceptable risks to the environment, or if EPA cannot reach a conclusion that the proposed pesticide use is likely to result in ''a reasonable certainty of no harm'' to human health, including exposure of residues of the pesticide to infants and children.

If the emergency use of the pesticide on a food or feed commodity would result in pesticide chemical residues, EPA establishes a time-limited tolerance meeting the ''reasonable certainty of no harm standard'' of the Federal Food, Drug, and Cosmetic Act (FFDCA).

In this document: EPA identifies the State or Federal agency granted the exemption or denial, the type of exemption, the pesticide authorized and the pests, the crop or use for which authorized, number of acres (if applicable), and the duration of the exemption. EPA also gives the **Federal Register** citation for the time-limited tolerance, if any.

III. Emergency Exemptions and Denials

A. U. S. States and Territories

Alabama

Department of Agriculture and Industries
Specific Exemptions: EPA authorized the use of coumaphos in beehives to control varroa mite and the small hive beetle); January 30, 2007 to February 1, 2008. Contact: Stacey Groce.
EPA authorized the use of sulfosulfuron on bermudagrass pastures and hayfields to control Johnsongrass (Sorghum halepense); February 16, 2007 to September 15, 2007. Contact: Libby Pemberton.

Arkansas

State Plant Board
Specific Exemption: EPA authorized the use of coumaphos in beehives to control varroa mite and the small hive beetle); January 30, 2007 to February 1, 2008. Contact: Stacey Groce.
Quarantine Exemption: EPA authorized the use of flutriafol on soybeans to control soybean rust; February 12, 2007 to February 12, 2010. Contact: Princess Campbell.

California

Environmental Protection Agency, Department of Pesticide Regulation
Specific Exemptions: EPA authorized the use of coumaphos in beehives to control varroa mite and the small hive beetle); January 30, 2007 to February 1, 2008. Contact: Stacey Groce.
EPA authorized the use of maneb on walnuts to control bacterial blight; March 1, 2007 to June 15, 2007. Contact: Libby Pemberton.
EPA authorized the use of tebuconazole on garlic to control garlic rust (Puccinia Porr -P. alli); March 2, 2007 to July 3, 2007. Contact: Libby Pemberton.
EPA authorized the use of thiamethoxam on artichokes to control proba bugs; March 1, 2007 to February 28, 2008. Contact: Stacey Groce.
EPA authorized the uses of propiconazole on peach and nectarine, post-harvest, to control sour rot (Geotricum candidum); May 15, 2007 to September 30, 2007. Contact: Andrea Conrath.

Colorado

Department of Agriculture
Specific Exemptions: EPA authorized the use of coumaphos in beehives to control varroa mite and the small hive beetle); January 30, 2007 to February 1, 2008. Contact: Stacey Groce.
EPA authorized the use of thiophanate-methyl in mushroom cultivation, to control green mold (Trichoderma aggresivum); March 1, 2007 to March 1, 2008. Contact: Andrea Conrath.
EPA authorized the use of lambda-cyhalothrin on barley to control Russian wheat aphids, cereal leaf beetles, and cutworms; April 7, 2007 to July 15, 2007. Contact: Andrew Ertman.
Quarantine Exemption: EPA authorized the use of chlorophene in laboratories to control prions; February 2, 2007 to February 2, 2010. Contact: Princess Campbell.

Connecticut

Department of Environmental Protection
Specific Exemption: EPA authorized the use of coumaphos in beehives to control varroa mite and the small hive beetle); February 23, 2007 to February 1, 2008. Contact: Stacey Groce.

Delaware

Department of Agriculture
Specific Exemption: EPA authorized the use of thiophanate-methyl in mushroom cultivation, to control green mold (Trichoderma aggresivum); January 8, 2007 to January 8, 2008. Contact: Andrea Conrath.

Florida

Department of Agriculture and Consumer Services
Specific Exemptions: EPA authorized the use of coumaphos in beehives to control varroa mite and the small hive beetle); February 12, 2007 to February 1, 2008. Contact: Stacey Groce.
EPA authorized the use of thiophanate-methyl on citrus, to control post-bloom fruit drop (Colletotrichum acutatum) and stem end rot (Lasiodiplodia theobromae); March 2, 2007 to March 2, 2008. Contact: Andrea Conrath.
EPA authorized the use of thiophanate-methyl on fruiting vegetables, to control white mold (Sclerotinia sclerotiorum); April 12, 2007 to April 12, 2008. Contact: Andrea Conrath.

Georgia

Department of Agriculture
Specific Exemptions: EPA authorized the use of coumaphos in beehives to control varroa mite and the small hive beetle); February 5, 2007 to February 1, 2008. Contact: Stacey Groce.
EPA authorized the use of sulfosulfuron on bermudagrass and bahiagrass pastures and hayfields to control Johnsongrass (Sorghum halepense); February 16, 2007 to September 15, 2007. Contact: Libby Pemberton.

Idaho

Department of Agriculture
Specific Exemptions: EPA authorized the use of thiabendazole on lentils, to control Ascochyta blight; February 21, 2007 to June 1, 2007. Contact: Andrea Conrath.
EPA authorized the use of coumaphos in beehives to control varroa mite and the small hive beetle); February 23, 2007 to February 1, 2008. Contact: Stacey Groce.
EPA authorized the use of fenpyroximate in beehives to control varroa mites); March 22, 2007 to February 28, 2008. Contact: Stacey Groce.
EPA authorized the use of oxytetracycline on apples to control fire blight; April 1, 2007 to August 1, 2007. Contact: Andrew Ertman.

Illinois

Department of Agriculture
Specific Exemption: EPA authorized the use of coumaphos in beehives to control varroa mite and the small hive beetle); January 31, 2007 to February 1, 2008. Contact: Stacey Groce.

Indiana

Office of Indiana State Chemist
Quarantine Exemption: EPA authorized the use of flutriafol on soybeans to control soybean rust; February 12, 2007 to February 12, 2010. Contact: Princess Campbell.

Iowa

Department of Agriculture and Land Stewardship
Specific Exemption: EPA authorized the use of coumaphos in beehives to control varroa mite and the small hive beetle);

March 12, 2007 to February 1, 2008. Contact: Stacey Groce.
Quarantine Exemption: EPA authorized the use of flutriafol on soybeans to control soybean rust; February 12, 2007 to February 12, 2010. Contact: Princess Campbell.

Kansas

Department of Agriculture
Quarantine Exemption: EPA authorized the use of flutriafol on soybeans to control soybean rust; February 12, 2007 to February 12, 2010. Contact: Princess Campbell.

Kentucky

Department of Agriculture
Specific Exemption: EPA authorized the use of coumaphos in beehives to control varroa mite and the small hive beetle); January 31, 2007 to February 1, 2008. Contact: Stacey Groce.
EPA authorized the use of tebuconazole on wheat to control Fusarium head blight (FHB); March 26, 2007 to May 30, 2007. Contact: Libby Pemberton.
Quarantine Exemption: EPA authorized the use of flutriafol on soybeans to control soybean rust; February 12, 2007 to February 12, 2010. Contact: Princess Campbell.

Louisiana

Department of Agriculture and Forestry
Specific Exemption: EPA authorized the use of etofenprox on rice to control rice water weevil (Lissorhoptrus oryzophilus); January 24, 2007 to January 24, 2008. Contact: Libby Pemberton.
EPA authorized the use of coumaphos in beehives to control varroa mite and the small hive beetle); February 28, 2007 to February 1, 2008. Contact: Stacey Groce.

Maryland

Department of Agriculture
Specific Exemption: EPA authorized the use of thiophanate-methyl in mushroom cultivation, to control green mold (Trichoderma aggresivum); January 8, 2007 to January 8, 2008. Contact: Andrea Conrath.
EPA authorized the use of coumaphos in beehives to control varroa mite and the small hive beetle); January 30, 2007 to February 1, 2008. Contact: Stacey Groce.

Maine

Department of Agriculture, Food, and Rural Resources
Specific Exemption: EPA authorized the use of coumaphos in beehives to control varroa mite and the small hive beetle); February 28, 2007 to February 1, 2008. Contact: Stacey Groce.

Michigan

Michigan Department of Agriculture
Specific Exemption: EPA authorized the use of zoxamide on ginseng to control Phytophthora blight; February 1, 2007 to October 31, 2007. Contact: Stacey Groce.
EPA authorized the use of coumaphos in beehives to control varroa mite and the small hive beetle); February 5, 2007 to February 1, 2008. Contact: Stacey Groce.
EPA authorized the use of chlorothalonil on ginseng to control Botrytis blight and Alternaria stem and leaf blight); February 9, 2007 to October 31, 2007. Contact: Stacey Groce.
EPA authorized the use of thiophanate-methyl in mushroom cultivation, to control green mold (Trichoderma aggresivum); March 1, 2007 to March 1, 2008. Contact: Andrea Conrath.
EPA authorized the use of oxytetracycline on apples to control fire blight; April 1, 2007 to June 30, 2007. Contact: Andrew Ertman.
EPA authorized the use of tebuconazole on asparagus to control rust (Puccinia spp.); May 1, 2007 to November 1, 2007. Contact: Libby Pemberton.
EPA authorized the use of sulfentrazone on strawberries to control broadleaf weeds; June 25, 2007 to December 15, 2007. Contact: Andrew Ertman.
Quarantine Exemption: EPA authorized the use of flutriafol on soybeans to control soybean rust; February 12, 2007 to February 12, 2010. Contact: Princess Campbell.

Minnesota

Department of Agriculture
Specific Exemption: EPA authorized the use of coumaphos in beehives to control varroa mite and the small hive beetle); January 30, 2007 to February 1, 2008. Contact: Stacey Groce.
EPA authorized the use of fenpyroximate in beehives to control varroa mites); March 22, 2007 to February 28, 2008. Contact: Stacey Groce.
EPA authorized the use of lambda-cyhalothrin on wild rice to control rice worms; August 1, 2007 to September 10, 2007. Contact: Andrew Ertman.
Quarantine Exemption: EPA authorized the use of flusilazole on soybeans to control Australasian soybean rust; February 7, 2007 to February 7, 2010. Contact: Andrea Conrath.

Mississippi

Department of Agriculture and Commerce
Specific Exemption: EPA authorized the use of coumaphos in beehives to control varroa mite and the small hive beetle); January 30, 2007 to February 1, 2008. Contact: Stacey Groce.
EPA authorized the use of sulfosulfuron on bermudagrass and bahiagrass pastures and hayfields to control Johnsongrass (Sorghum halepense); February 16, 2007 to September 15, 2008. Contact: Libby Pemberton.

Missouri

Department of Agriculture
Specific Exemption: EPA authorized the use of coumaphos in beehives to control varroa mite and the small hive beetle); March 22, 2007 to February 1, 2008. Contact: Stacey Groce.
Quarantine Exemption: EPA authorized the use of flutriafol on soybeans to control soybean rust; February 12, 2007 to February 12, 2010. Contact: Princess Campbell.

Montana

Department of Agriculture
Specific Exemption: EPA authorized the use of coumaphos in beehives to control varroa mite and the small hive beetle); January 30, 2007 to February 1, 2008. Contact: Stacey Groce.
EPA authorized the use of thiabendazole on lentils, to control Ascochyta blight; February 21, 2007 to June 1, 2007. Contact: Andrea Conrath.

Nebraska

Department of Agriculture
Specific Exemption: EPA authorized the use of fenpyroximate in beehives to control varroa mites); February 28, 2007 to February 28, 2008. Contact: Stacey Groce.
Quarantine Exemption: EPA authorized the use of flutriafol on soybeans to control soybean rust; February 12, 2007 to February 12, 2010. Contact: Princess Campbell.

New Jersey

Department of Environmental Protection
Specific Exemption: EPA authorized the use of thiophanate-methyl on tomatoes to control white mold; April 1, 2007 to October 31, 2007. Contact: Andrew Ertman..

New York

Department of Environmental Conservation
Specific Exemption: EPA authorized the use of coumaphos in beehives to control varroa mite and the small hive beetle); January 30, 2007 to February 1, 2008. Contact: Stacey Groce.
EPA authorized the use of fenpyroximate in beehives to control varroa mites); March 22, 2007 to February 28, 2008. Contact: Stacey Groce.

Nevada

Department of Agriculture
Specific Exemption: EPA authorized the use of bifenazate on Timothy grass, to control Banks Grass Mite; March 16,

2007 to September 1, 2007. Contact: Andrea Conrath.

North Carolina

Department of Agriculture
Specific Exemption: EPA authorized the use of coumaphos in beehives to control varroa mite and the small hive beetle); February 12, 2007 to February 1, 2008. Contact: Stacey Groce.

North Dakota

Department of Agriculture
Specific Exemption: EPA authorized the use of thiabendazole on lentils, to control Ascochyta blight; February 21, 2007 to June 1, 2007. Contact: Andrea Conrath.
EPA authorized the use of coumaphos in beehives to control varroa mite and the small hive beetle); March 12, 2007 to February 1, 2008. Contact: Stacey Groce.
EPA authorized the use of fenpyroximate in beehives to control varroa mites); March 22, 2007 to February 28, 2008. Contact: Stacey Groce.

Ohio

Department of Agriculture
Specific Exemption: EPA authorized the use of coumaphos in beehives to control varroa mite and the small hive beetle); March 12, 2007 to February 1, 2008. Contact: Stacey Groce.
EPA authorized the use of thiophanate-methyl on fruiting vegetables, to control white mold (Sclerotinia sclerotiorum); March 30, 2007 to September 30, 2007. Contact: Andrea Conrath.
EPA authorized the use of sulfentrazone on strawberries to control broadleaf weeds; June 20, 2007 to December 15, 2007. Contact: Andrew Ertman.

Oklahoma

Department of Agriculture
Specific Exemption: EPA authorized the use of coumaphos in beehives to control varroa mite and the small hive beetle); March 12, 2007 to February 1, 2008. Contact: Stacey Groce.
Quarantine Exemption: EPA authorized the use of flutriafol on soybeans to control soybean rust; February 12, 2007 to February 12, 2010. Contact: Princess Campbell.

Oregon

Department of Agriculture
Specific Exemption: EPA authorized the use of thiabendazole on lentils, to control Ascochyta blight; February 21, 2007 to June 1, 2007. Contact: Andrea Conrath.
EPA authorized the use of sulfentrazone on strawberries to control broadleaf weeds; March 22, 2007 to February 28, 2008. Contact: Andrew Ertman.
EPA authorized the use of fenpyroximate in beehives to control varroa mites); March 22, 2007 to February 28, 2008. Contact: Stacey Groce.
EPA authorized the use of mesotrione on cranberry to control bog St. John's Wort (Hypericum boreala), rushes (Juncus Canadensis, J. effuses, J. Bufonlus,J. Tenuis), sedges spp. (Carex spp.), yellow loosestrife (Lysimachia terrestris),and silverleaf (Potentilla pacifica); March 30, 2007 to October 15, 2007. Contact: Libby Pemberton.
EPA authorized the use of oxytetracycline on apples to control fire blight; April 1, 2007 to August 1, 2007. Contact: Andrew Ertman.

Pennsylvania

Department of Agriculture
Specific Exemption: EPA authorized the use of thiophanate-methyl in mushroom cultivation, to control green mold (Trichoderma aggresivum); January 8, 2007 to January 8, 2008. Contact: Andrea Conrath.
EPA authorized the use of coumaphos in beehives to control varroa mite and the small hive beetle); January 30, 2007 to February 1, 2008. Contact: Stacey Groce.

South Carolina

Clemson University
Specific Exemption: EPA authorized the use of coumaphos in beehives to control varroa mite and the small hive beetle); April 3, 2007 to February 1, 2008. Contact: Stacey Groce.

South Dakota

Department of Agriculture
Quarantine Exemption: EPA authorized the use of flusilazole on soybeans to control Australasian soybean rust; February 7, 2007 to February 7, 2010. Contact: Andrea Conrath.

Tennessee

Department of Agriculture
Specific Exemption: EPA authorized the use of coumaphos in beehives to control varroa mite and the small hive beetle); March 12, 2007 to February 1, 2008. Contact: Stacey Groce.
Quarantine Exemption: EPA authorized the use of flutriafol on soybeans to control soybean rust; February 12, 2007 to February 12, 2010. Contact: Princess Campbell.

Texas

Department of Agriculture
Crisis Exemption: On March 20, 2007, for the use of fenpyroximate in beehives to control varroa mites. This program is expected to end on February 28, 2008. Contact: Stacey Groce.
Specific Exemption: EPA authorized the use of coumaphos in beehives to control varroa mite and the small hive beetle); February 12, 2007 to February 1, 2008. Contact: Stacey Groce.

Virginia

Department of Agriculture and Consumer Services
Specific Exemption: EPA authorized the use of coumaphos in beehives to control varroa mite and the small hive beetle); March 12, 2007 to February 1, 2008. Contact: Stacey Groce.

Washington

Department of Agriculture
Specific Exemption: EPA authorized the use of thiabendazole on lentils, to control Ascochyta blight; February 13, 2007 to June 1, 2007. Contact: Andrea Conrath.
EPA authorized the use of coumaphos in beehives to control varroa mite and the small hive beetle); February 23, 2007 to February 1, 2008. Contact: Stacey Groce.
EPA authorized the use of fenpyroximate in beehives to control varroa mites); March 22, 2007 to February 28, 2008. Contact: Stacey Groce.
EPA authorized the use of sulfentrazone on strawberries to control broadleaf weeds; March 22, 2007 to February 28, 2008. Contact: Andrew Ertman.
EPA authorized the use of mesotrione on cranberry to control bog St. John's wort (Hypericum boreala), rushes (Juncus Canadensis, J. effuses, J. Bufonlus,J. Tenuis), sedges spp. (Carex spp.), yellow loosestrife (Lysimachia terrestris),and silverleaf (Potentilla pacifica); March 30, 2007 to October 31, 2007. Contact: Libby Pemberton.
EPA authorized the use of oxytetracycline on apples to control fire blight; April 1, 2007 to August 1, 2007. Contact: Andrew Ertman.

Wisconsin

Department of Agriculture, Trade, and Consumer Protection
Specific Exemption: EPA authorized the use of mancozeb on ginseng to control Alternaria stem and leaf blight); January 31, 2007 to October 31, 2007. Contact: Stacey Groce.
EPA authorized the use of zoxamide on ginseng to control Phytophthora blight ; February 1, 2007 to October 31, 2007. Contact: Stacey Groce.
EPA authorized the use of chlorothalonil on ginseng to control Botrytis blight and Alternaria stem and leaf blight; March 2, 2007 to October 31, 2007. Contact: Stacey Groce.
EPA authorized the use of sulfentrazone on strawberries to control broadleaf

weeds; June 20, 2007 to December 15, 2007. Contact: Andrew Ertman.

B. Federal Departments and Agencies

Department of Agriculture

Quarantine Exemption: EPA authorized the use of ethylene oxide on animal isolators to inactivate all microbes; January 30, 2007 to January 30, 2009. Contact: Princess Campbell.
Animal and Plant Health Inspector Service
Crisis Exemption: On March 2, 2007, for the use of methyl bromide on avocados, bananas, plantains, blackberries, raspberries, certain cucurbit vegetables and edible seeds, fresh herbs and spices, kiwi, certain leafy vegetables, longan, lychee fruit, fresh and dried mint, opuntia, rambutan, certain root and tuber vegetables, and snow peas to control exotic pests. This program is expected to end on March 3, 2008. Contact: Libby Pemberton.

List of Subjects

Environmental protection, Pesticides and pests.

Pesticide Emergency Exemptions; Agency Decisions and State and Federal Agency Crisis Declarations

AGENCY: Environmental Protection Agency (EPA).

ACTION: Notice.

SUMMARY: EPA has granted or denied emergency exemptions under the Federal Insecticide, Fungicide, and Rodenticide Act (FIFRA) for use of pesticides as listed in this notice. The exemptions or denials were granted during the period October 1, 2006 to December 31, 2006 to control unforeseen pest outbreaks.

FOR FURTHER INFORMATION CONTACT: See each emergency exemption or denial for the name of a contact person. The following information applies to all contact persons: Team Leader, Emergency Response Team, Registration Division (7505P), Office of Pesticide Programs, Environmental Protection Agency, 1200 Pennsylvania Ave., NW., Washington, DC 20460–0001; telephone number: (703) 308–8179.

SUPPLEMENTARY INFORMATION:

I. General Information

A. Does this Action Apply to Me?

You may be potentially affected by this action if you are an agricultural producer, food manufacturer, or pesticide manufacturer. Potentially affected entities may include, but are not limited to:

- Crop production (NAICS code 111).
- Animal production (NAICS code 112).
- Food manufacturing (NAICS code 311).
- Pesticide manufacturing (NAICS code 32532).

This listing is not intended to be exhaustive, but rather provides a guide for readers regarding entities likely to be affected by this action. Other types of entities not listed in this unit could also be affected. The North American Industrial Classification System (NAICS) codes have been provided to assist you and others in determining whether this action might apply to certain entities. To determine whether you or your business may be affected by this action, you should carefully examine the applicability provisions discussed above. If you have any questions regarding the applicability of this action to a particular entity, consult the person listed under **FOR FURTHER INFORMATION CONTACT**.

B. How Can I Get Copies of this Document and Other Related Information?

1. *Docket*. EPA has established a docket for this action under docket identification (ID) number EPA–HQ–OPP–2006–0983. Publicly available docket materials are available either electronically at *http://www.regulations.gov,* or, if only available in hard copy, at the OPP Regulatory Public Docket in Rm. S–4400, One Potomac Yard (South Bldg.), 2777 S. Crystal Dr., Arlington, VA. The hours of operation of this Docket Facility is open from 8:30 a.m. to 4 p.m., Monday through Friday, excluding legal holidays. The Docket Facility telephone number is (703) 305–5805.

2. *Electronic access*. You may access this **Federal Register** document electronically through the EPA Internet under the **Federal Register** listings at *http://www.epa.gov/fedrgstr*.

II. Background

EPA has granted or denied emergency exemptions to the following State and Federal agencies. The emergency exemptions may take the following form: Crisis, public health, quarantine, or specific. EPA has also listed denied emergency exemption requests in this notice.

Under FIFRA section 18, EPA can authorize the use of a pesticide when emergency conditions exist. Authorizations (commonly called emergency exemptions) are granted to State and Federal agencies and are of four types:

1. A ''specific exemption'' authorizes use of a pesticide against specific pests on a limited acreage in a particular State. Most emergency exemptions are specific exemptions.

2. ''Quarantine'' and ''public health'' exemptions are a particular form of specific exemption issued for quarantine or public health purposes. These are rarely requested.

3. A ''crisis exemption'' is initiated by a State or Federal agency (and is confirmed by EPA) when there is insufficient time to request and obtain EPA permission for use of a pesticide in an emergency.

EPA may deny an emergency exemption: If the State or Federal agency cannot demonstrate that an emergency exists, if the use poses unacceptable risks to the environment, or if EPA cannot reach a conclusion that the proposed pesticide use is likely to result in ''a reasonable certainty of no harm'' to human health, including exposure of residues of the pesticide to infants and children.

If the emergency use of the pesticide on a food or feed commodity would result in pesticide chemical residues, EPA establishes a time-limited tolerance meeting the ''reasonable certainty of no harm standard'' of the Federal Food, Drug, and Cosmetic Act (FFDCA).

In this document: EPA identifies the State or Federal agency granted the exemption or denial, the type of exemption, the pesticide authorized and the pests, the crop or use for which authorized, number of acres (if applicable), and the duration of the exemption. EPA also gives the **Federal Register** citation for the time-limited tolerance, if any.

III. Emergency Exemptions and Denials

A. U. S. States and Territories

Arizona

Department of Agriculture
Specific Exemption:EPA authorized the use of coumaphos in beehives to control varroa mites and small hive beetles; November 6, 2006 to February 1, 2007. Contact: Stacey Groce.

California

Environmental Protection Agency, Department of Pesticide Regulation
Specific Exemptions: EPA authorized the use of thiophanate-methyl on mushroom to control green mold; October 26, 2006 to October 26, 2007. Contact: Andrea Conrath.
EPA authorized the use of thiabendazole on Brussels sprout, cabbage, and cauliflower to control black leg disease (Phoma lingam); November 17, 2006 to November 17, 2007. Contact: Stacey Groce.

Colorado

Department of Agriculture
*Specific Exemption:*EPA authorized the use of clothianidin as a seed treatment on sugarbeet seeds to control beet leafhopper (beet curly top virus); December 19, 2006 to July 31, 2007. Contact: Stacey Groce.

Georgia

Department of Agriculture
*Specific Exemption:*EPA authorized the use of coumaphos in beehives on December 20, 2006 to control varroa mite and small hive beetle; Effective February 2, 2007 to February 1, 2008. Contact: Stacey Groce.
Denial: On November 21, 2006 EPA denied the use of pyridalyl on brassica leafy vegetables to control diamondback moths. This request was denied because available data indicate that pyridalyl is persistent, bioaccumulative, and toxic (PBT). The bioaccumulative potential for pyridalyl exceeds the parameters for EPA's models designed to assess bioaccumulation. Contact: Andrea Conrath.

Idaho

Department of Agriculture
*Specific Exemption:*EPA authorized the use of flufenacet, coformulated with metribuzin, on wheat to control Italian ryegrass or annual ryegrass (Lolium multiflorum); October 2, 2006 to December 31, 2006. Contact: Andrew Ertman.

Ohio

Department of Agriculture
Denial: On November 6, 2006 EPA denied the use of s-metolachlor on leafy greens and herbs to control common purslane and prostrate pigweed. This request was denied because the situation as described in the application does not meet the criteria for an emergency because the Agency was unable to identify the non-routine aspect of the weed problem on leafy greens and herbs in Ohio. Contact: Andrew Ertman.

Oregon

Department of Agriculture
*Specific Exemptions:*EPA authorized the use of flufenacet, co-formulated with metribuzin on wheat to control Italian ryegrass or annual ryegrass: (Lolium multiflorum); October 2, 2006 to December 31, 2006. Contact: Andrew Ertman.
EPA authorized the use of thiophanate-methyl on mushrooms to control green mold (Sclerotinia sclerotiorum); October 26, 2006 to October 26, 2007. Contact: Andrea Conrath.
EPA authorized the use of clothianidin on sugar beets to control beet leafhopper; December 19, 2006 to July 31, 2007. Contact: Stacey Groce.

Texas

Department of Agriculture
*Specific Exemption:*EPA authorized the use of dinotefuran on brassica leafy green vegetables to control white flies; December 18, 2006 to April 30, 2007. Contact: Andrea Conrath.

Washington

Department of Agriculture
*Specific Exemptions:*EPA authorized the use of flufenacet co-formulated with metribuzin on wheat to control Italian ryegrass or annual ryegrass (Lolium multiflorum); October 2, 2006 to December 31, 2006. Contact: Andrew Ertman.EPA authorized the use of thiabendazole as a seed treatment on Brussels sprout, cabbage, and cauliflower seeds to control black leg disease (Phoma lingam); November 17, 2006 to November 17, 2007. Contact: Stacey Groce.

Wisconsin

Department of Agriculture, Trade, and Consumer Protection
*Specific Exemptions:*EPA authorized the use of thymol in beehives to control varroa mites; October 4, 2006 to March 15, 2007. Contact: Stacey Groce.
EPA authorized the use of anthraquinone on corn seed to control (repel) sandhill cranes; on November 27, 2006. Effective January 31, 2007 to October 31, 2007. Contact: Marcel Howard.

Wyoming

Department of Agriculture
*Specific Exemption:*EPA authorized the use of clothianidin as a seed treatment on sugar beet seeds to control beet leafhopper (beet curly top virus); December 19, 2006 to July 31, 2007. Contact: Stacey Groce.

B. Federal Departments and Agencies

Interior Department

Public Health Exemption: EPA authorized the use of sodium hypochlorite on items potentially contaminated with Bacillus anthracis spores on reusable equipment such as respirators and other personal protective equipment, hard non porous surfaces, and wastewater, to inactivate potential contamination with anthrax spores; December 7, 2006 to March 7, 2007. The Boca Building was closed by the Palm Beach County Department of Health on October 7, 2001 after two employees were admitted to the hospital with anthrax. The inside of the building was fumigated in July 2004, and an environmental clearance sampling was performed inside the building to verify the effectiveness of the contamination. Contact: Andrew Ertman.

ENVIRONMENTAL PROTECTION AGENCY

[EPA–HQ–OPP–2007– 2007–0361; FRL–8143–8]

Pesticide Emergency Exemptions; Agency Decisions and State and Federal Agency Crisis Declarations

AGENCY: Environmental Protection Agency (EPA).

ACTION: Notice.

SUMMARY: EPA has granted or denied emergency exemptions under the Federal Insecticide, Fungicide, and Rodenticide Act (FIFRA) for use of pesticides as listed in this notice. The exemptions or denials were granted during the period April 1 to June 30, 2007 to control unforeseen pest outbreaks.

FOR FURTHER INFORMATION CONTACT: See each emergency exemption or denial for the name of a contact person. The following information applies to all contact persons: Team Leader, Emergency Response Team, Registration Division (7505P), Office of Pesticide Programs, Environmental Protection Agency, 1200 Pennsylvania Ave., NW., Washington, DC 20460–0001; telephone number: (703) 308–8179.

SUPPLEMENTARY INFORMATION: EPA has granted or denied emergency exemptions to the following State and Federal agencies. The emergency exemptions may take the following form: Crisis, public health, quarantine,

or specific. EPA has also listed denied emergency exemption requests in this notice.

I. General Information

A. Does this Action Apply to Me?

You may be potentially affected by this action if you are an agricultural producer, food manufacturer, or pesticide manufacturer. Potentially affected entities may include, but are not limited to:

- Crop production (NAICS code 111).
- Animal production (NAICS code 112).
- Food manufacturing (NAICS code 311).
- Pesticide manufacturing (NAICS code 32532).

This listing is not intended to be exhaustive, but rather provides a guide for readers regarding entities likely to be affected by this action. Other types of entities not listed in this unit could also be affected. The North American Industrial Classification System (NAICS) codes have been provided to assist you and others in determining whether this action might apply to certain entities. To determine whether you or your business may be affected by this action, you should carefully examine the applicability provisions discussed above. If you have any questions regarding the applicability of this action to a particular entity, consult the person listed under **FOR FURTHER INFORMATION CONTACT**.

B. How Can I Get Copies of this Document and Other Related Information?

1. *Docket*. EPA has established a docket for this action under docket identification (ID) number EPA–HQ–OPP–2007–0361. Publicly available docket materials are available either electronically at *http://www.regulations.gov,* or, if only available in hard copy, at the OPP Regulatory Public Docket in Rm. S–4400, One Potomac Yard (South Bldg.), 2777 S. Crystal Dr., Arlington, VA. The hours of operation of this Docket Facility is open from 8:30 a.m. to 4 p.m., Monday through Friday, excluding legal holidays. The Docket Facility telephone number is (703) 305–5805.

2. *Electronic access*. You may access this **Federal Register** document electronically through the EPA Internet under the ''**Federal Register**'' listings at *http://www.epa.gov/fedrgstr*.

II. Background

Under FIFRA section 18, EPA can authorize the use of a pesticide when emergency conditions exist. Authorizations (commonly called emergency exemptions) are granted to State and Federal agencies and are of four types:

1. A ''specific exemption'' authorizes use of a pesticide against specific pests on a limited acreage in a particular State. Most emergency exemptions are specific exemptions.

2. ''Quarantine'' and ''public health'' exemptions are a particular form of specific exemption issued for quarantine or public health purposes. These are rarely requested.

3. A ''crisis exemption'' is initiated by a State or Federal agency (and is confirmed by EPA) when there is insufficient time to request and obtain EPA permission for use of a pesticide in an emergency.

EPA may deny an emergency exemption: If the State or Federal agency cannot demonstrate that an emergency exists, if the use poses unacceptable risks to the environment, or if EPA cannot reach a conclusion that the proposed pesticide use is likely to result in ''a reasonable certainty of no harm'' to human health, including exposure of residues of the pesticide to infants and children.

If the emergency use of the pesticide on a food or feed commodity would result in pesticide chemical residues, EPA establishes a time-limited tolerance meeting the ''reasonable certainty of no harm standard'' of the Federal Food, Drug, and Cosmetic Act (FFDCA).

In this document: EPA identifies the State or Federal agency granted the exemption or denial, the type of exemption, the pesticide authorized and the pests, the crop or use for which authorized, number of acres (if applicable), and the duration of the exemption. EPA also gives the **Federal Register** citation for the time-limited tolerance, if any.

III. Emergency Exemptions and Denials

A. U. S. States and Territories

Alabama

Department of Agriculture and Industries

Specific Exemption: EPA authorized the use of diuron in catfish ponds to control blue-green algae (*Oscillatoria chalybea* (*cyanobacteria*)); April 16, 2007 to April 16, 2008. Contact: (Libby Pemberton).
Quarantine Exemption: EPA authorized the use of flusilazole on soybeans to control Australasian soybean rust (*Phakopsora pachyrhizi*); June 15, 2007 to June 15, 2010. Contact: (Andrea Conrath).

EPA authorized the use of cyproconazole on soybeans to control Australasian soybean rust (*Phakopsora pachyrhizi*); May 4, 2007 to March 31, 2009. Contact: (Stacey Groce).

EPA authorized the use of metconazole on soybeans to control Australasian soybean rust (*Phakopsora pachyrhizi*); June 15, 2007 to April 19, 2007. Contact: (Stacey Groce).

EPA authorized the use of flutriafol on soybeans to control Australasian soybean rust (*Phakopsora pachyrhizi*); May 11, 2007 to May 11, 2010. Contact: (Princess Campbell).

Arkansas

State Plant Board

Specific Exemption: EPA authorized the use of diuron in catfish ponds to control blue-green algae (*Oscillatoria chalybea* (*cyanobacteria*)); April 16, 2007 to April 16, 2008. Contact: (Libby Pemberton).

EPA authorized the use of sulfosulfuron on bermudagrass and bahiagrass pastures and hayfields to control Johnsongrass (*Sorghum halepense*); May 29, 2007 to September 15, 2007. Contact: (Libby Pemberton).

EPA authorized the use of fenpyroximate in beehives to control varroa mites; June 15, 2007 to February 28, 2008. Contact: (Stacey Groce).
Crisis: On April 20, 2007, for the use of metribuzin on corn to control freeze damaged corn. This program ended on May 5, 2007. Contact: (Marcel Howard).

On May 15, 2007, for the use of thifensulfuron on wheat to control frost damaged wheat. This program ended on May 29, 2007. Contact: (Marcel Howard).
Quarantine Exemption: EPA authorized the use of flusilazole on soybeans to control Australasian soybean rust (*Phakopsora pachyrhizi*); June 15, 2007 to June 15, 2010. Contact: (Andrea Conrath).

EPA authorized the use of metconazole on soybeans to control Australasian soybean rust (*Phakopsora pachyrhizi*); June 15, 2007 to April 19, 2009. Contact: (Stacey Groce).

California

Environmental Protection Agency, Department of Pesticide Regulation

Specific Exemption: EPA authorized the use of oxytetracycline on Pink Lady apples to control fire blight; March 16, 2007 to August 1, 2007. Contact: (Andrew Ertman).

EPA authorized the use of fenamidone on carrots to control cavity spot; June 30, 2007 to June 30, 2008. Contact: (Andrea Conrath).

EPA authorized the use of myclobutanil on bell and non-bell peppers to control powdery mildew; June 1, 2007 to May 31, 2008. Contact: (Stacey Groce).

Crisis: On March 16, 2007, for the use of oxytetracycline on Pink Lady apples to control fire blight. This program ended on August 1, 2007. Contact: (Andrew Ertman).
Quarantine: EPA authorized the use of diflubenzuron on commercial, institutional, and residential plantings of trees, shrubs (including containerized nursery stock), citrus fruits, avocados, subtropical and tropical fruits that have been quarantined to treat diaprepes root weevil; April 20, 2007 to April 14, 2010. Contact: (Libby Pemberton).

Colorado

Department of Agriculture

Specific Exemption: EPA authorized the use of formetanate hydrochloride on onion, bulb to control thrips; May 16, 2007 to September 30, 2007. Contact: (Andrew Ertman).

EPA authorized the use of abamectin on onion, bulb to control thrips; June 25, 2007 to September 30, 2007. Contact: (Andrew Ertman).

EPA authorized the use of fenpyroximate in beehives to control varroa mites; May 4, 2007 to February 28, 2008. Contact: (Stacey Groce).

Delaware

Department of Agriculture

Quarantine Exemption: EPA authorized the use of flusilazole on soybeans to control Australasian soybean rust (*Phakopsora pachyrhizi*); June 15, 2007 to June 15, 2010. Contact: (Andrea Conrath).

EPA authorized the use of cyproconazole on soybeans to control Australasian soybean rust (*Phakopsora pachyrhizi*); May 4, 2007 to March 31, 2009. Contact: (Stacey Groce).

EPA authorized the use of metconazole on soybeans to control Australasian soybean rust (*Phakopsora pachyrhizi*); June 15, 2007 to April 19, 2009. Contact: (Stacey Groce).

EPA authorized the use of flutriafol on soybeans to control Australasian soybean rust (*Phakopsora pachyrhizi*); June 7, 2007 to June 7, 2010. Contact: (Princess Campbell).

Georgia

Department of Agriculture

Quarantine Exemption: EPA authorized the use of flusilazole on soybeans to control Australasian soybean rust (*Phakopsora pachyrhizi*); July 6, 2007 to June 15, 2010. Contact: (Andrea Conrath).

EPA authorized the use of flutriafol on soybeans to control Australasian soybean rust (*Phakopsora pachyrhizi*); May 11, 2007 to May 11, 2010. Contact: (Princess Campbell).

Idaho

Department of Agriculture

Specific Exemption: EPA authorized the use of lambda cyhalothin on barley to control Russian wheat aphids, cereal leaf beetles, cutworms, and armyworms; May 1, 2007 to August 15, 2007. Contact: (Andrew Ertman).

EPA authorized the use of formetanate hydrochloride on onion, bulb to control thrips; May 15, 2007 to September 15, 2007. Contact: (Andrew Ertman).

Illinois

Department of Agriculture

Specific Exemption: EPA authorized the use of tebuconazole on wheat to control *Fusarium* head blight (FHB); April 13, 2007 to June 20, 2007. Contact: (Libby Pemberton).
Crisis: On May 18, 2007, for the use of thifensulfuron on wheat to control frost damaged wheat. This program ended on June 1, 2007. Contact: (Marcel Howard).
Quarantine Exemption: EPA authorized the use of flusilazole on soybeans to control Australasian soybean rust (*Phakopsora pachyrhizi*); June 15, 2007 to June 15, 2010. Contact: (Andrea Conrath).

EPA authorized the use of metconazole on soybeans to control Australasian soybean rust (*Phakopsora pachyrhizi*); June 15, 2007 to April 19, 2009. Contact: (Stacey Groce).

EPA authorized the use of flutriafol on soybeans to control Australasian soybean rust (*Phakopsora pachyrhizi*); May 11, 2007 to May 11, 2010. Contact: (Princess Campbell).

Indiana

Office of Indiana State Chemist

Specific Exemption: EPA authorized the use of tebuconazole on wheat to control *Fusarium* head blight (FHB); May 2, 2007 to June 30, 2007. Contact: (Libby Pemberton).
Crisis: On May 12, 2007, for the use of clethodim on corn to control burndown frost damaged corn. This program ended on May 26, 2007. Contact: (Marcel Howard)
Quarantine Exemption:EPA authorized the use of flusilazole on soybeans to control Australasian soybean rust (*Phakopsora pachyrhizi*); June 15, 2007 to June 15, 2010. Contact: (Andrea Conrath).

EPA authorized the use of myclobutanil on soybeans to control Australasian soybean rust (*Phakopsora pachyrhizi*; May 4, 2007 to May 31, 2009. Contact: (Stacey Groce).

EPA authorized the use of cyproconazole on soybeans to control Australasian soybean rust (*Phakopsora pachyrhizi*); May 4, 2007 to March 31, 2009. Contact: (Stacey Groce).

EPA authorized the use of metconazole on soybeans to control Australasian soybean rust (*Phakopsora pachyrhizi*); June 15, 2007 to April 19, 2009. Contact: (Stacey Groce).

Iowa

Department of Agriculture and Land Stewardship

Specific Exemption: EPA authorized the use of sulfentrazone on strawberries to control broadleaf weeds; June 25, 2007 to December 15, 2007. Contact: (Andrew Ertman).

Quarantine Exemption:EPA authorized the use of flusilazole on soybeans to control Australasian soybean rust (*Phakopsora pachyrhizi*); June 15, 2007 to June 15, 2010. Contact: (Andrea Conrath).

EPA authorized the use of metconazole on soybeans to control Australasian soybean rust (*Phakopsora pachyrhizi*); June 15, 2007 to April 19, 2009. Contact: (Stacey Groce).

Kansas

Department of Agriculture

Specific Exemption: EPA authorized the use of mesotrione on sorghum to control broadleaf weeds; April 24, 2007 to June 15, 2007. Contact: (Andrew Ertman).

EPA authorized the use of coumaphos in beehives to control varroa mites and small hive beetles; April 13, 2007 to February 1, 2008. Contact: (Stacey Groce).
Quarantine Exemption: EPA authorized the use of flusilazole on soybeans to control Australasian soybean rust (*Phakopsora pachyrhizi*); June 15, 2007 to June 15, 2010. Contact: (Andrea Conrath).

EPA authorized the use of cyproconazole on soybeans to control Australasian soybean rust (*Phakopsora pachyrhizi*); May 4, 2007 to March 31, 2009. Contact: (Stacey Groce).

EPA authorized the use of metconazole on soybeans to control Australasian soybean rust (*Phakopsora pachyrhizi*); June 15, 2007 to April 19, 2009. Contact: (Stacey Groce).

Kentucky

Department of Agriculture

Crisis: On May 7, 2007, for the use of thifensulfuron on wheat to control frost damaged wheat. This program ended on May 22, 2007. Contact: (Marcel Howard).
Quarantine Exemption:EPA authorized the use of flusilazole on soybeans to control Australasian soybean rust (*Phakopsora pachyrhizi*); June 15, 2007 to June 15, 2010. Contact: (Andrea Conrath).

EPA authorized the use of cyproconazole on soybeans to control Australasian soybean rust (*Phakopsora pachyrhizi*); May 4, 2007 to March 31, 2009. Contact: (Stacey Groce).

EPA authorized the use of metconazole on soybeans to control Australasian soybean rust (*Phakopsora pachyrhizi*); June 15, 2007 to April 19, 2009. Contact: (Stacey Groce).

Louisiana

Department of Agriculture and Forestry

Quarantine Exemption:EPA authorized the use of flusilazole on soybeans to control Australasian soybean rust (*Phakopsora pachyrhizi*); June 15, 2007 to June 15, 2010. Contact: (Andrea Conrath).

EPA authorized the use of cyproconazole on soybeans to control Australasian soybean rust (*Phakopsora pachyrhizi*); May 4, 2007 to March 31, 2009. Contact: (Stacey Groce).

EPA authorized the use of metconazole on soybeans to control Australasian soybean rust (*Phakopsora pachyrhizi*); June 15, 2007 to April 19, 2009. Contact: (Stacey Groce).

EPA authorized the use of flutriafol on soybeans to control Australasian soybean rust (*Phakopsora pachyrhizi*); June 7, 2007 to June 7, 2010. Contact: (Princess Campbell).

Maryland

Department of Agriculture

Quarantine Exemption: EPA authorized the use of flusilazole on soybeans to control Australasian soybean rust (*Phakopsora pachyrhizi*); June 15, 2007 to June 15, 2010. Contact: (Andrea Conrath).

EPA authorized the use of metconazole on soybeans to control Australasian soybean rust (*Phakopsora pachyrhizi*); June 15, 2007 to April 19, 2009. Contact: (Stacey Groce).

EPA authorized the use of flutriafol on soybeans to control Australasian soybean rust (*Phakopsora pachyrhizi*); May 11, 2007 to May 11, 2010. Contact: (Princess Campbell).

Massachusetts

Massachusetts Department of Food and Agriculture

Specific Exemption:EPA authorized the use of coumaphos in beehives to control varroa mites and small hive beetles; May 17, 2007 to February 1, 2008. Contact: (Stacey Groce).

EPA authorized the use of pronamide on cranberry to control dodder; April 24, 2007 to June 30, 2007. Contact: (Marcel Howard).

Michigan

Michigan Department of Agriculture

Specific Exemption: EPA authorized the use of tebuconazole on wheat to control *Fusarium* head blight (FHB); April 13, 2007 to June 25, 2007. Contact: (Libby Pemberton).

EPA authorized the use of mancozeb on ginseng to control alternaria stem and leaf blight; April 19, 2007 to October 31, 2007. Contact: (Stacey Groce).

EPA authorized the use of formetanate hydrochloride on onion, bulb to control thrips; July 15, 2007 to August 31, 2007. Contact: (Andrew Ertman).

Quarantine Exemption:EPA authorized the use of flusilazole on soybeans to control Australasian soybean rust (*Phakopsora pachyrhizi*); June 15, 2007 to June 15, 2010. Contact: (Andrea Conrath).

EPA authorized the use of cyproconazole on soybeans to control Australasian soybean rust (*Phakopsora pachyrhizi*); May 4, 2007 to March 31, 2009. Contact: (Stacey Groce).

EPA authorized the use of metconazole on soybeans to control Australasian soybean rust (*Phakopsora pachyrhizi*); June 15, 2007 to April 19, 2009. Contact: (Stacey Groce).

Minnesota

Department of Agriculture

Specific Exemption:EPA authorized the use of tebuconazole on barley and wheat to control *Fusarium* head blight (FHB); May 2, 2007 to September 1, 2007. Contact: (Libby Pemberton).

Mississippi

Department of Agriculture and Commerce

Specific Exemption:EPA authorized the use of diuron in catfish ponds to control blue-green algae (*Oscillatoria chalybea* (*cyanobacteria*)); April 16, 2007 to April 16, 2008. Contact: (Libby Pemberton).

EPA authorized the use of fenpyroximate in beehives to control varroa mites; June 15, 2007 to February 28, 2008. Contact: (Stacey Groce).

Crisis: On April 24, 2007, for the use of clethodim on corn to control freeze damaged corn. This program ended on May 8, 2007. Contact: (Marcel Howard).

Quarantine Exemption:EPA authorized the use of flusilazole on soybeans to control Australasian soybean rust (*Phakopsora pachyrhizi*); June 15, 2007 to June 15, 2010. Contact: (Andrea Conrath).

EPA authorized the use of cyproconazole on soybeans to control Australasian soybean rust (*Phakopsora pachyrhizi*); May 4, 2007 to March 31, 2009. Contact: (Stacey Groce).

EPA authorized the use of metconazole on soybeans to control Australasian soybean rust (*Phakopsora pachyrhizi*); June 15, 2007 to April 19, 2009. Contact: (Stacey Groce).

EPA authorized the use of flutriafol on soybeans to control Australasian soybean rust (*Phakopsora pachyrhizi*); May 11, 2007 to May 11, 2010. Contact: (Princess Campbell).

Missouri

Department of Agriculture

Quarantine Exemption: EPA authorized the use of flusilazole on soybeans to control Australasian soybean rust (*Phakopsora pachyrhizi*); June 15, 2007 to June 15, 2010. Contact: (Andrea Conrath).

EPA authorized the use of metconazole on soybeans to control Australasian soybean rust (*Phakopsora pachyrhizi*); June 15, 2007 to April 19, 2009. Contact: (Stacey Groce).

Specific Exemption: EPA authorized the use of fenpyroximate in beehives to control varroa mites; June 8, 2007 to February 28, 2008. Contact: (Stacey Groce).

Montana

Department of Agriculture

Specific Exemption:EPA authorized the use of lambda cyhalothrin on barley to control Russian wheat aphid, cereal leaf beetle, armyworms, and cutworms; April 19, 2007 to July 30, 2007. Contact: (Andrew Ertman).

EPA authorized the use of tebuconazole on barley and wheat to control *Fusarium* head blight (FHB); May 15, 2007 to July 20, 2007. Contact: (Libby Pemberton).

Nebraska

Department of Agriculture

Specific Exemption:EPA authorized the use of mesotrione on sorghum to control broadleaf weeds; April 24, 2007 to June 15, 2007. Contact: (Andrew Ertman).

Quarantine Exemption:EPA authorized the use of flusilazole on soybeans to control Australasian soybean rust (*Phakopsora pachyrhizi*); June 15, 2007 to June 15, 2010. Contact: (Andrea Conrath).

EPA authorized the use of metconazole on soybeans to control Australasian soybean rust (*Phakopsora pachyrhizi*); June 15, 2007 to April 19, 2009. Contact: (Stacey Groce).

New Jersey

Department of Environmental Protection

Specific Exemption:EPA authorized the use of coumaphos in beehives to control varroa mites and small hive beetles; April 13, 2007 to February 1, 2008. Contact: (Stacey Groce).

EPA authorized the use of pronamide on cranberry to control dodder; April

27, 2007 to December 15, 2007. Contact: (Marcel Howard).

New Mexico

Department of Agriculture

Specific Exemption: EPA authorized the use of mylcobutanil on chile (non-bell) peppers to control powdery mildew; June 28, 2007 to October 15, 2007. Contact: (Stacey Groce).

New York

Department of Environmental Conservation

Specific Exemption: EPA authorized the use of desmedipham on garden (red table) beet to control several important broadleaf weeds, including hairy galinsoga, common ragweed, redroot pigweed, common lambsquarters, velvetleaf, nightshade *spp.* and wild mustard; May 8, 2007 to August 15, 2007. Contact: (Libby Pemberton).

EPA authorized the use of formetanate hydrochloride on onion, bulb to control thrips; July 15, 2007 to September 15, 2007. Contact: (Andrew Ertman).
Quarantine: EPA authorized the use of cyproconazole on soybeans to control Australasian soybean rust (*Phakopsora pachyrhizi*); May 4, 2007 to March 31, 2009. Contact: (Stacey Groce).

EPA authorized the use of metconazole on soybeans to control Australasian soybean rust (*Phakopsora pachyrhizi*); June 15, 2007 to April 19, 2009. Contact: (Stacey Groce).

North Carolina

Department of Agriculture and Consumer Services

Crisis: On May 30, 2007, for the use of thifensulfuron on wheat to control frost damaged wheat. This program ended on June 13, 2007. Contact: (Marcel Howard).
Quarantine Exemption:EPA authorized the use of flusilazole on soybeans to control Australasian soybean rust (*Phakopsora pachyrhizi*); June 15, 2007 to June 15, 2010. Contact: (Andrea Conrath).

EPA authorized the use of cyproconazole on soybeans to control Australasian soybean rust (*Phakopsora pachyrhizi*); May 4, 2007 to March 31, 2009. Contact: (Stacey Groce).

EPA authorized the use of metconazole on soybeans to control Australasian soybean rust (*Phakopsora pachyrhizi*); June 15, 2007 to April 19, 2009. Contact: (Stacey Groce).

EPA authorized the use of flutriafol on soybeans to control Australasian soybean rust (*Phakopsora pachyrhizi*); June 7, 2007 to June 7, 2010. Contact: (Princess Campbell).

North Dakota

Department of Agriculture

Specific Exemption:EPA authorized the use of tebuconazole on barley and wheat to control *Fusarium* head blight (FHB); April 13, 2007 to September 1, 2007. Contact: (Libby Pemberton).

EPA authorized the use of zeta-cypermethrin on flax to control grasshoppers; May 15, 2007 to September 30, 2007. Contact: (Andrew Ertman).
Quarantine Exemption:EPA authorized the use of flusilazole on soybeans to control Australasian soybean rust (*Phakopsora pachyrhizi*); June 15, 2007 to June 15, 2010. Contact: (Andrea Conrath).

EPA authorized the use of cyproconazole on soybeans to control Australasian soybean rust (*Phakopsora pachyrhizi*); May 4, 2007 to March 31, 2009. Contact: (Stacey Groce).

EPA authorized the use of metconazole on soybeans to control Australasian soybean rust (*Phakopsora pachyrhizi*); June 15, 2007 to April 19, 2009. Contact: (Stacey Groce).

EPA authorized the use of flutriafol on soybeans to control Australasian soybean rust (*Phakopsora pachyrhizi*); May 11, 2007 to May 11, 2010. Contact: (Princess Campbell).

Ohio

Department of Agriculture

Specific Exemption:EPA authorized the use of formetanate hydrochloride on onion, bulb to control thrips; July 1, 2007 to September 15, 2007. Contact: (Andrew Ertman).
Quarantine Exemption:EPA authorized the use of flusilazole on soybeans to control Australasian soybean rust (*Phakopsora pachyrhizi*); June 15, 2007 to June 15, 2010. Contact: (Andrea Conrath).

EPA authorized the use of cyproconazole on soybeans to control Australasian soybean rust (*Phakopsora pachyrhizi*); May 4, 2007 to March 31, 2009. Contact: (Stacey Groce).

EPA authorized the use of metconazole on soybeans to control Australasian soybean rust (*Phakopsora pachyrhizi*); June 15, 2007 to April 19, 2007. Contact: (Stacey Groce).

EPA authorized the use of flutriafol on soybeans to control Australasian soybean rust (*Phakopsora pachyrhizi*); May 11, 2007 to May 11, 2010. Contact: (Princess Campbell).
Crisis: On May 9, 2007, for the use of clethodim on corn to control burndown frost damaged corn. This program ended on June 15, 2007. Contact: (Marcel Howard).

Oklahoma

Department of Agriculture

Specific Exemption:EPA authorized the use of sulfosulfuron on bermudagrass pastures and hayfields to control Johnsongrass (*Sorghum halepense*); May 11, 2007 to September 30, 2007. Contact: (Libby Pemberton).

EPA authorized the use of fenpyroximate in beehives to control varroa mites; June 15, 2007 to February 28, 2008. Contact: (Stacey Groce).
Quarantine Exemption:EPA authorized the use of flusilazole on soybeans to control Australasian soybean rust (*Phakopsora pachyrhizi*); June 15, 2007 to June 15, 2010. Contact: (Andrea Conrath).

EPA authorized the use of cyproconazole on soybeans to control Australasian soybean rust (*Phakopsora pachyrhizi*); May 4, 2007 to March 31, 2009. Contact: (Stacey Groce).

EPA authorized the use of metconazole on soybeans to control Australasian soybean rust (*Phakopsora pachyrhizi*); June 15, 2007 to April 19, 2009. Contact: (Stacey Groce).

Oregon

Department of Agriculture

Specific Exemption:EPA authorized the use of formetanate hydrochloride on onion, bulb to control thrips; May 15, 2007 to September 15, 2007. Contact: (Andrew Ertman).

EPA authorized the use of fenamidone on carrots to control cavity spot; May 2, 2007 to November 1, 2007. Contact: (Andrea Conrath).

EPA authorized the use of bifenthrin on orchardgrass grown for seed to control Banks grass mite; April 10, 2007 to November 15, 2007. Contact: (Andrea Conrath).

EPA authorized the use of dimethenamid on winter squash to control nightshade and other summer annual weeds; April 2, 2007 to August 1, 2007. Contact: (Marcel Howard).

EPA authorized the use of fipronil on turnip and rutabaga to control the cabbage maggot; May 4, 2007 to September 30, 2007. Contact: (Andrea Conrath).

Rhode Island

Department of Environmental Management

Specific Exemption:EPA authorized the use of pronamide on cranberry to control dodder; April 24, 2007 to June 30, 2007. Contact: (Marcel Howard).

ENVIRONMENTAL PROTECTION AGENCY

[EPA–HQ–OAR–2007–0643; FRL–8458–5]

Proposed Approval of the Central Characterization Project's Remote-Handled Waste Characterization Program at Los Alamos National Laboratory

AGENCY: Environmental Protection Agency.

ACTION: Notice of availability; opening of public comment period.

SUMMARY: The Environmental Protection Agency (EPA or we) is announcing the availability of, and soliciting public comments for 45 days on, the proposed approval of the radioactive, remote-handled (RH), transuranic (TRU) waste characterization program implemented by the Central Characterization Project (CCP) at Los Alamos National Laboratory (LANL). This waste is intended for disposal at the Waste Isolation Pilot Plant (WIPP) in New Mexico.

In accordance with the WIPP Compliance Criteria, EPA evaluated the characterization of RH TRU debris waste from LANL–CCP during an inspection conducted the week of May 8, 2007. Using the systems and processes developed as part of the U.S. Department of Energy's (DOE's) Carlsbad Field Office (CBFO) program to characterize RH TRU waste, EPA verified whether DOE could adequately characterize RH TRU waste consistent with the Compliance Criteria. The results of EPA's evaluation of the LANL–CCP program and its proposed approval are described in the Agency's inspection report, which is available for review in the public dockets listed in **ADDRESSES**. We will consider public comments received on or before the due date mentioned in **DATES**.

This notice summarizes the waste characterization processes evaluated by EPA and EPA's proposed approval. As required by the 40 CFR 194.8, at the end of a 45-day comment period EPA will evaluate public comments received, and if appropriate, finalize the reports responding to the relevant public comments, and a final report and approval letter to DOE.

DATES: Comments must be received on or before October 9, 2007.

ADDRESSES: Submit your comments, identified by Docket ID No. EPA–HQ–OAR–2007–0643, by one of the following methods:

- *http://www.regulations.gov:* Follow the on-line instructions for submitting comments.
- E-mail to: a-and-r-docket@epa.gov.
- Fax: 202–566–1741.
- Mail: Air and Radiation Docket and Information Center, Environmental Protection Agency, Mailcode: 6102T, 1200 Pennsylvania Ave., NW., Washington, DC 20460.

Instructions: Direct your comments to Attn: Docket ID No. EPA–HQ–OAR–2007–0643. The Agency's policy is that all comments received will be included in the public docket without change and may be made available online at *http://www.regulations.gov,* including any personal information provided, unless the comment includes information claimed to be Confidential Business Information (CBI) or other information whose disclosure is restricted by statute. Do not submit information that you consider to be CBI or otherwise protected through *http://www.regulations.gov* or e-mail. The *http://www.regulations.gov* Web site is an ''anonymous access'' system, which means EPA will not know your identity or contact information unless you provide it in the body of your comment. If you send an e-mail comment directly to EPA without going through *http://www.regulations.gov* your e-mail address will be automatically captured and included as part of the comment that is placed in the public docket and made available on the Internet. If you submit an electronic comment, EPA recommends that you include your name and other contact information in the body of your comment and with any disk or CD–ROM you submit. If EPA cannot read your comment due to technical difficulties and cannot contact you for clarification, EPA may not be able to consider your comment. Electronic files should avoid the use of special characters, any form of encryption, and be free of any defects or viruses. For additional information about EPA's public docket visit the EPA Docket Center homepage at *http://www.epa.gov/epahome/dockets.htm.*

Docket: All documents in the docket are listed in the *http://www.regulations.gov* index. Although listed in the index, some information is not publicly available, e.g., CBI or other information whose disclosure is restricted by statute. Certain other material, such as copyrighted material, will be publicly available only in hard copy. Publicly available docket materials are available either electronically at *http://www.regulations.gov.*

As of September 22, 2006, the EPA Docket Center (EPA/DC) Public Reading Room will be temporarily inaccessible to the public until November 6, 2006, due to construction. Public access to docket materials will still be provided. We strongly encourage you to visit the EPA Dockets Web site frequently (*http://www.epa.gov/epahome/dockets.htm*) in order to receive the latest status concerning the Public Reading Room and public access to docket materials.

If you wish to obtain materials from a docket in the EPA/DC, please go first to Regulations.gov (*http://www.regulations.gov*) and obtain electronic copies. If the materials are listed in the docket index but the documents themselves are not available in Regulations.gov, please call (202) 566–1744 or e-mail the applicable Program Office Docket.

EPA Docket Center operations will still continue during this period. In addition to electronic access through regulations.gov, public inspection of docket materials will be available by appointment during this period. Appointments may be made by calling (202) 566–1744 or by e-mailing the appropriate Docket Office.

If you wish to hand deliver comments during this period, you may drop them off between the hours of 8:30 a.m. and 4:30 p.m. Eastern Standard Time (EST), Monday through Friday, excluding Federal holidays at the EPA Headquarters, Room 6146F in the EPA West Building located at 1301 Constitution Avenue, NW., Washington, DC.

EPA visitors are required to show photographic identification and sign the EPA visitor log. After processing

through the X-ray and magnetometer machines, visitors will be given an EPA/DC badge that must be visible at all times, and be escorted to Room 6146F to drop off comments.

If you have any other questions concerning the temporary closing of the EPA/DC Public Reading Room, you may call (202) 566–1744 between the hours of 8:30 a.m. and 4:30 p.m. Eastern Standard Time.

These documents are also available for review in hard-copy form at the following three EPA WIPP informational docket locations in New Mexico: in Carlsbad at the Municipal Library, Hours: Monday–Thursday, 10 a.m.–9 p.m., Friday–Saturday, 10 a.m.–6 p.m., and Sunday, 1 p.m.–5 p.m., phone number: 505–885–0731; in Albuquerque at the Government Publications Department, Zimmerman Library, University of New Mexico, Hours: Vary by semester, phone number: 505–277–2003; and in Santa Fe at the New Mexico State Library, Hours: Monday–Friday, 9 a.m.–5 p.m., phone number: 505–476–9700. As provided in EPA's regulations at 40 CFR part 2, and in accordance with normal EPA docket procedures, if copies of any docket materials are requested, a reasonable fee may be charged for photocopying.

FOR FURTHER INFORMATION CONTACT: Rajani Joglekar or Ed Feltcorn, Radiation Protection Division, Center for Federal Regulations, Mail Code 6608J, U.S. Environmental Protection Agency, 1200 Pennsylvania Avenue, Washington, DC 20460; telephone number: 202–343–9601; fax number: 202–343–2305; e-mail address: *joglekar.rajani@epa.gov* or *feltcorn.ed@epa.gov.*

SUPPLEMENTARY INFORMATION:

I. General Information

A. What Should I Consider as I Prepare My Comments for EPA?

1. *Submitting CBI.* Do not submit this information to EPA through *http://www.regulations.gov* or e-mail. Clearly mark the part or all of the information that you claim to be CBI. For CBI information in a disk or CD–ROM that you mail to EPA, mark the outside of the disk or CD–ROM as CBI and then identify electronically within the disk or CD–ROM the specific information that is claimed as CBI. In addition to one complete version of the comment that includes information claimed as CBI, a copy of the comment that does not contain the information claimed as CBI must be submitted for inclusion in the public docket. Information so marked will not be disclosed except in accordance with procedures set forth in 40 CFR part 2.

2. *Tips for Preparing Your Comments.* When submitting comments, remember to:

- Identify the rulemaking by docket number and other identifying information (subject heading, **Federal Register** date and page number).
- Follow directions—The agency may ask you to respond to specific questions or organize comments by referencing a Code of Federal Regulations (CFR) part or section number.
- Explain why you agree or disagree; suggest alternatives and substitute language for your requested changes.
- Describe any assumptions and provide any technical information and/or data that you used.
- If you estimate potential costs or burdens, explain how you arrived at your estimate in sufficient detail to allow for it to be reproduced.
- Provide specific examples to illustrate your concerns, and suggest alternatives.
- Explain your views as clearly as possible, avoiding the use of profanity or personal threats.
- Make sure to submit your comments by the comment period deadline identified.

II. Background

DOE is developing the WIPP, near Carlsbad in southeastern New Mexico, as a deep geologic repository for disposal of TRU radioactive waste. As defined by the WIPP Land Withdrawal Act (LWA) of 1992 (Pub. L. 102–579), as amended (Pub. L. 104–201), TRU waste consists of materials that have atomic numbers greater than 92 (with half-lives greater than twenty years), in concentrations greater than 100 nanocuries of alpha-emitting TRU isotopes per gram of waste. Much of the existing TRU waste consists of items contaminated during the production of nuclear weapons, such as rags, equipment, tools, and sludges.

TRU waste is itself divided into two categories, based on its level of radioactivity. Contact-handled (CH) TRU waste accounts for about 97 percent of the volume of TRU waste currently destined for the WIPP. It is packaged in 55-gallon metal drums or in metal boxes and can be handled under controlled conditions without any shielding beyond the container itself. The maximum radiation dose at the surface of a CH TRU waste container is 200 millirems per hour. CH waste primarily emits alpha particles that are easily shielded by a sheet of paper or the outer layer of a person's skin.

Remote-handled (RH) TRU waste emits more radiation than CH TRU waste and must therefore be both handled and transported in shielded casks. Surface radiation levels of unshielded containers of remote-handled transuranic waste exceed 200 millirems per hour. RH waste primarily emits gamma radiation, which is very penetrating and requires concrete, lead, or steel to block it.

On May 13, 1998, EPA announced its final compliance certification decision to the Secretary of Energy (published May 18, 1998, 63 FR 27354). This decision stated that the WIPP will comply with EPA's radioactive waste disposal regulations at 40 CFR part 191, Subparts B and C.

The final WIPP certification decision includes conditions that (1) Prohibit shipment of TRU waste for disposal at WIPP from any site other than the Los Alamos National Laboratories (LANL) until the EPA determines that the site has established and executed a quality assurance program, in accordance with §§ 194.22(a)(2)(i), 194.24(c)(3), and 194.24(c)(5) for waste characterization activities and assumptions (Condition 2 of Appendix A to 40 CFR Part 194); and (2) (with the exception of specific, limited waste streams and equipment at LANL) prohibit shipment of TRU waste for disposal at WIPP (from LANL or any other site) until EPA has approved the procedures developed to comply with the waste characterization requirements of § 194.22(c)(4) (Condition 3 of Appendix A to 40 CFR part 194). The EPA's approval process for waste generator sites is described in § 194.8 (revised July 2004).

Condition 3 of the WIPP Certification Decision requires EPA to conduct independent inspections at DOE's waste generator/storage sites of their TRU waste characterization capabilities before approving their program and the waste for disposal at the WIPP. EPA's inspection and approval process gives EPA (a) Discretion in establishing technical priorities, (b) the ability to accommodate variation in the site's waste characterization capabilities, and (c) flexibility in scheduling site WC inspections.

As described in section 194.8(b), EPA's baseline inspections evaluate each WC process component (equipment, procedures, and personnel training/experience) for its adequacy and appropriateness in characterizing TRU waste destined for disposal at WIPP. During an inspection, the site demonstrates its capabilities to characterize TRU waste(s) and its ability to comply with the regulatory limits and tracking requirements under § 194.24. A baseline inspection may describe any limitations on approved waste streams or waste characterization processes

[§ 194.8(b)(2)(iii)]. In addition, a baseline inspection approval must specify what subsequent WC program changes or expansion should be reported to EPA [§ 194.8(b)(4)]. The Agency is required to assign Tier 1 (T1) and Tier 2 (T2) to the reportable changes depending on their potential impact on data quality. A T1 designation requires that the site must notify EPA of proposed changes to the approved components of an individual WC process (such as radioassay equipment or personnel), and EPA must also approve the change before it can be implemented. A WC element with a T2 designation allows the site to implement changes to the approved components of individual WC processes (such as visual examination procedures) but requires EPA notification. The Agency may choose to inspect the site to evaluate technical adequacy before approval. EPA inspections conducted to evaluate T1 or T2 changes are follow-up inspections under the authority of § 194.24(h). In addition to the follow-up inspections, if warranted, EPA may opt to conduct continued compliance inspections at TRU waste sites with a baseline approval under the authority of § 194.24(h).

The site inspection and approval process outlined in § 194.8 requires EPA to issue a **Federal Register** notice proposing the baseline compliance decision, docket the inspection report for public review, and seek public comment on the proposed decision for a period of 45 days. The report must describe the WC processes EPA inspected at the site, as well as their compliance with § 194.24 requirements.

EPA previously issued a preliminary approval of DOE's general framework for characterizing RH waste on March 26, 2004 (Docket A–98–49, Item II–B2–21). This approval requires DOE to provide site-specific RH waste characterization plans and characterization procedures for EPA approval prior to implementing them for characterizing RH waste.

III. Proposed Baseline Compliance Decision

EPA has performed a baseline inspection of RH TRU waste characterization activities at LANL–CCP (EPA Inspection No. EPA–LANL–CCP–RH–5.07–8). The purpose of EPA's inspection was to verify that the RH waste characterization program implemented at LANL–CCP for characterizing RH TRU, retrievably-stored, debris waste is adequate for the 16 RH waste canisters. EPA evaluated whether the RH waste characterized meets the regulatory requirements at 40 CFR 194.24.

This inspection was different from previous RH baseline inspections conducted at Idaho National Laboratory (INL) and Argonne National Laboratory East (ANL–E) (see Docket ID No. EPA–HQ–OAR–2006–0881), as well as previous contact-handled (CH) baseline inspections. Generally, EPA's RH and CH baseline inspections evaluate WC programs for technical adequacy and when approved the TRU sites would continue to implement the approved program components to characterize additional wastes on an ongoing basis. However, the characterization activities within the scope of this inspection had occurred at LANL in the 1990's and were completed prior to this inspection. This inspection's sole focus was to evaluate the records that had been assembled to document WC activities, including recently performed modeling, interpretation, and further calculations based on previously-generated RH measurement data for a LANL RH debris waste stream No. LA–MHD03.002. There will be no further waste characterization activities relative to this waste, and this proposed approval is directed to a discrete set of canisters within this LANL RH debris waste stream, as supported by the documentation the EPA inspection team evaluated during this inspection. Note that this is a retrospective approval of LANL RH debris waste characterization activities knowing that no additional RH debris waste will be characterized by LANL CCP in the future based on this baseline approval.

The purpose of the LANL–CCP RH WC inspection was to evaluate the adequacy of the site's WC programs for 16 canisters in a single RH debris waste stream for disposal at WIPP. The 16 canisters of RH debris in this waste stream were generated from the examination of fuel pins at the LANL Chemical, Metallurgical Research (CMR) facility from 1970 through 1984. In the early 1990's, wastes derived from examination of these fuel pins were loaded into 364 1½-gallon steel cans that were welded shut. These 364 cans were later assembled into 12 canisters and four other canisters were assembled with bulk-loaded debris from the same activities. The WC activity examined during the inspection was acceptable knowledge (AK) for these 16 canisters of RH retrievably-stored TRU debris (S5000) waste. CCP has assured EPA that these 16 sealed canisters will be disposed of ''as is'' at WIPP and will not be repackaged with any other RH debris waste.

The EPA inspection team determined that the records documenting LANL–CCP's RH WC program represented activities that were technically adequate. EPA, therefore, is proposing to approve the LANL–CCP RH WC program for the 16 RH TRU canisters in LANL RH Waste Stream No. LA–MHD03.002 evaluated during this baseline inspection described and documented in this report. The approval includes the following:

(1) The AK process for 16 canisters of RH retrievably-stored TRU debris in the waste stream designated LANL RH Waste Stream No. LA–MHD03.002.

(2) The radiological characterization (RC) process using dose-to-fissile gram, dose-to-curie (DTC), curie-to-dose and modeling-derived scaling factors for assigning radionuclide values to 16 canisters of RH retrievably-stored TRU debris in one waste stream, designated as LANL RH Waste Stream No. LA–MHD03.002 and documented in CCP–AK–LANL–501, Revision 0 and detailed in this report.

Since no additional WC activities that will occur relative to the 16 canisters of RH debris waste, changes to the WC activities evaluated during the baseline inspection are not expected to occur. Accordingly, this report does not list any tiering (T1 or T2) designations relative to this waste and waste characterization components proposed for the approval.

IV. Availability of the Baseline Inspection Report for Public Comment

EPA has placed the report discussing the results of the Agency's inspection of LANL–CCP in the public docket as described in **ADDRESSES**. In accordance with 40 CFR 194.8, EPA is providing the public 45 days to comment on these documents. The Agency requests comments on the proposed approval decision, as described in the inspection report. EPA will accept public comment on this notice and supplemental information as described in section 1.B. above. EPA will not make a determination of compliance before the 45-day comment period ends. At the end of the public comment period, EPA will evaluate all relevant public comments and revise the inspection report as necessary. If appropriate, the Agency will then issue a final approval letter and inspection report, both of which will be posted on the WIPP Web site.

Information on the certification decision is filed in the official EPA Air Docket, Docket No. A–93–02 and is available for review in Washington, DC, and at the three EPA WIPP informational docket locations in New

Mexico (as listed in **ADDRESSES**). The dockets in New Mexico contain only major items from the official Air Docket in Washington, DC, plus those documents added to the official Air Docket since the October 1992 enactment of the WIPP LWA.

Dated: August 16, 2007.

Elizabeth Cotsworth,

Director, Office of Radiation and Indoor Air.

ENVIRONMENTAL PROTECTION AGENCY

EPA–HQ–OPPT–2007–0817; FRL–8144–7

Certain New Chemicals; Receipt and Status Information

AGENCY: Environmental Protection Agency (EPA).

ACTION: Notice.

SUMMARY: Section 5 of the Toxic Substances Control Act (TSCA) requires any person who intends to manufacture (defined by statute to include import) a new chemical (i.e., a chemical not on the TSCA Inventory) to notify EPA and comply with the statutory provisions pertaining to the manufacture of new chemicals. Under sections 5(d)(2) and 5(d)(3) of TSCA, EPA is required to publish a notice of receipt of a premanufacture notice (PMN) or an application for a test marketing exemption (TME), and to publish periodic status reports on the chemicals under review and the receipt of notices of commencement to manufacture those chemicals. This status report, which covers the period from April 29, 2007 to August 3, 2007, consists of the PMNs and TMEs, both pending or expired, and the notices of commencement to manufacture a new chemical that the Agency has received under TSCA section 5 during this time period.

DATES: Comments identified by the specific PMN number or TME number, must be received on or before September 21, 2007.

ADDRESSES: Submit your comments, identified by docket identification (ID) number EPA–HQ–OPPT–2007–0817, by one of the following methods.

- *Federal eRulemaking Portal*: *http://www.regulations.gov*. Follow the on-line instructions for submitting comments.
- *Mail*: Document Control Office (7407M), Office of Pollution Prevention and Toxics (OPPT), Environmental Protection Agency, 1200 Pennsylvania Ave., NW., Washington, DC 20460–0001.
- *Hand Delivery*: OPPT Document Control Office (DCO), EPA East Bldg., Rm. 6428, 1201 Constitution Ave., NW., Washington, DC. Attention: Docket ID number EPA–HQ–OPPT–2007–0817. The DCO is open from 8 a.m. to 4 p.m., Monday through Friday, excluding legal holidays. The telephone number for the DCO is (202) 564–8930. Such deliveries are only accepted during the Docket's normal hours of operation, and special arrangements should be made for deliveries of boxed information.

Instructions: Direct your comments to docket ID number EPA–HQ–OPPT–2007–0817. EPA's policy is that all comments received will be included in the public docket without change and may be made available online at *http://www.regulations.gov*, including any personal information provided, unless the comment includes information claimed to be Confidential Business Information (CBI) or other information whose disclosure is restricted by statute. Do not submit information that you consider to be CBI or otherwise protected through regulations.gov or e-mail. The regulations.gov website is an ''anonymous access'' systems, which means EPA will not know your identity or contact information unless you provide it in the body of your comment. If you send an e-mail comment directly to EPA without going through *http://regulations.gov* your e-mail address will be automatically captured and included as part of the comment that is placed in the public docket and made available on the Internet. If you submit an electronic comment, EPA recommends that you include your name and other contact information in the body of your comment and with any disk or CD ROM you submit. If EPA cannot read your comment due to technical difficulties and cannot contact you for clarification, EPA may not be able to consider your comment. Electronic files should avoid the use of special characters, any form of encryption, and be free of any defects or viruses. For additional information about EPA's public docket, visit the EPA Docket Center homepage at *http://www.epa.gov/epahome/dockets.htm*.

Docket: All documents in the docket are listed in the docket's index available in regulations.gov. To access the electronic docket, go to *http://www.regulations.gov*, select ''Advanced Search,'' then ''Docket Search.'' Insert the docket ID number where indicated and select the ''Submit'' button. Follow the instructions on the regulations.gov web site to view the docket index or access available documents. Although listed in the index, some information is not publicly available, e.g., Confidential Business Information (CBI) or other information whose disclosure is restricted by statute. Certain other material, such as copyrighted material, will be publicly available only in hard copy. Publicly available docket materials are available electronically at *http://www.regulations.gov*, or, if only available in hard copy, at the OPPT Docket. The OPPT Docket is located in the EPA Docket Center (EPA/DC) at Rm. 3334, EPA West Bldg., 1301 Constitution Ave., NW., Washington, DC. The EPA/DC PublicReading Room hours of operation are 8:30 a.m. to 4:30 p.m., Monday through Friday, excluding Federal holidays. The telephone numberof the EPA/DC Public Reading Room is (202) 566–1744, and the telephone number for the OPPT Docket is (202) 566–0280. Docket visitors are required to show photographic identification, pass through a metal detector, and sign the EPA visitor log. All visitor bags are processed through an X-ray machine and subject to search. Visitors will be provided an EPA/DC badge that must be visible at all times in the building and returned upon departure.

FOR FURTHER INFORMATION CONTACT: Colby Lintner, Regulatory Coordinator, Environmental Assistance Division, Office of Pollution Prevention and Toxics (7408M), Environmental Protection Agency, 1200 Pennsylvania Ave., NW., Washington, DC 20460–0001; telephone number: (202) 554–1404; e-mail address: *TSCA-Hotline@epa.gov*.

SUPPLEMENTARY INFORMATION:

I. General Information

A. Does this Action Apply to Me?

This action is directed to the public in general. As such, the Agency has not attempted to describe the specific entities that this action may apply to. Although others may be affected, this action applies directly to the submitter of the premanufacture notices addressed in the action. If you have any questions regarding the applicability of this action to a particular entity, consult the person listed under **FOR FURTHER INFORMATION CONTACT**.

B. What Should I Consider as I Prepare My Comments for EPA?

1. *Submitting CBI*. Do not submit this information to EPA through regulations.gov or e-mail. Clearly mark the part or all of the information that you claim to be CBI. For CBI information in a disk or CD ROM that you mail to EPA, mark the outside of the disk or CD ROM as CBI and then identify electronically within the disk or CD ROM the specific information that is

claimed CBI). In addition to one complete version of the comment that includes information claimed as CBI, a copy of the comment that does not contain the information claimed as CBI must be submitted for inclusion in the public docket. Information so marked will not be disclosed except in accordance with procedures set forth in 40 CFR part 2.

2. *Tips for preparing your comments.* When submitting comments, remember to:

i. Identify the document by docket number and other identifying information (subject heading, **Federal Register** date and page number).

ii. Follow directions - The agency may ask you to respond to specific questions or organize comments by referencing a Code of Federal Regulations (CFR) part or section number.

iii. Explain why you agree or disagree; suggest alternatives and substitute language for your requested changes.

iv. Describe any assumptions and provide any technical information and/or data that you used.

v. If you estimate potential costs or burdens, explain how you arrived at the estimate.

vi. Provide specific examples to illustrate your concerns, and suggested alternatives.

vii. Explain your views as clearly as possible, avoiding the use of profanity or personal threats.

viii. Make sure to submit your comments by the comment period deadline identified.

II. Why is EPA Taking this Action?

Section 5 of TSCA requires any person who intends to manufacture (defined by statute to include import) a new chemical (i.e., a chemical not on the TSCA Inventory to notify EPA and comply with the statutory provisions pertaining to the manufacture of new chemicals. Under sections 5(d)(2) and 5(d)(3) of TSCA, EPA is required to publish a notice of receipt of a PMN or an application for a TME and to publish periodic status reports on the chemicals under review and the receipt of notices of commencement to manufacture those chemicals. This status report, which covers the period from April 29, 2007 to August 3, 2007, consists of the PMNs and TMEs, both pending or expired, and the notices of commencement to manufacture a new chemical that the Agency has received under TSCA section 5 during this time period.

III. Receipt and Status Report for PMNs and TMEs

This status report identifies the PMNs and TMEs, both pending or expired, and the notices of commencement to manufacture a new chemical that the Agency has received under TSCA section 5 during this time period. If you are interested in information that is not included in the following tables, you may contact EPA as described in Unit II. to access additional non-CBI information that may be available.

In Table I of this unit, EPA provides the following information (to the extent that such information is not claimed as CBI) on the PMNs received by EPA during this period: the EPA case number assigned to the PMN; the date the PMN was received by EPA; the projected end date for EPA's review of the PMN; the submitting manufacturer; the potential uses identified by the manufacturer in the PMN; and the chemical identity.

I. 193 PREMANUFACTURE NOTICES RECEIVED FROM: 04/27/07 TO 08/03/07

Case No	Received Date	Projected Notice End Date	Manufacturer/Importer	Use	Chemical
P–07–0410	04/30/07	07/28/07	CBI	(G) Intermediate	(G) Laureth maleate
P–07–0411	05/01/07	07/29/07	CBI	(G) Open non-dispersive (elastomer)	(G) Mdi prepolymer

FEDERAL COMMUNICATIONS COMMISSION

Notice of Public Information Collection(s) Being Submitted for Review to the Office of Management and Budget

July 25, 2007.

SUMMARY: The Federal Communications Commission, as part of its continuing effort to reduce paperwork burden invites the general public and other Federal agencies to take this opportunity to comment on the following information collection(s), as required by the Paperwork Reduction Act (PRA) of 1995, Public Law 104–13. An agency may not conduct or sponsor a collection of information unless it displays a currently valid control number. No person shall be subject to any penalty for failing to comply with a collection of information subject to the Paperwork Reduction Act (PRA) that does not display a valid control number. Comments are requested concerning (a) Whether the proposed collection of information is necessary for the proper performance of the functions of the Commission, including whether the information shall have practical utility; (b) the accuracy of the Commission's burden estimate; (c) ways to enhance the quality, utility, and clarity of the information collected; and (d) ways to minimize the burden of the collection of information on the respondents, including the use of automated collection techniques or other forms of information technology.

DATES: Written Paperwork Reduction Act (PRA) comments should be submitted on or before September 21, 2007. If you anticipate that you will be submitting PRA comments, but find it difficult to do so within the period of time allowed by this notice, you should advise the FCC contact listed below as soon as possible.

ADDRESSES: Direct all PRA comments to Jasmeet K. Seehra, Office of Management and Budget, Room 10236 NEOB, Washington, DC 20503, (202) 395–3123, or via fax at 202–395–5167 or via Internet at *Jasmeet_K._Seehra@omb.eop.gov* and to *Judith-B.Herman@fcc.gov,* Federal Communications Commission, Room 1–B441, 445 12th Street, SW., DC 20554 or an e-mail to *PRA@fcc.gov.* If you would like to obtain or view a copy of this information collection, you may do so by visiting the FCC PRA Web page at: *http://www.fcc.gov/omd/pra.*

FOR FURTHER INFORMATION CONTACT: For additional information or copies of the information collection(s), contact Judith B. Herman at 202–418–0214 or via the Internet at *Judith-B.Herman@fcc.gov.*

SUPPLEMENTARY INFORMATION: *OMB Control Number:* 3060–0779.

Title: Amendment of Part 90 of the Commission's Rules to Provide for Use of the 220 MHz Band by the Private Land Mobile Radio Service (PLMRS), PR Docket No. 89–552.

Form No.: N/A.

Type of Review: Revision of a currently approved collection.

Respondents: Business or other for-profit, not-for-profit institutions, and state, local or tribal government.

Number of Respondents: 2,313 respondents; 2,313 responses.

Estimated Time Per Response: 2–20 hours.

Frequency of Response: On occasion reporting requirement and third party disclosure requirement.

Obligation to Respond: Required to obtain or retain benefits.

Total Annual Burden: 23,433 hours.

Total Annual Cost: $430,600.

Privacy Act Impact Assessment: N/A.

Nature and Extent of Confidentiality: There is a need for confidentiality.

Needs and Uses: The Commission will submit this information collection to OMB as a revision during this comment period to obtain the full three-year clearance from them. The Commission is reporting a decrease in the total annual burden hours and annual costs because some of the rules are no longer applicable because Phase I licenses are no longer issued. In other respects, some areas of this collection are nil pending the potential influx of

re-auctioned licensees. This collection includes rules to govern the future operation and licensing of the 220–222 MHz band (220 MHz service). In establishing this licensing plan, FCC's goal is to establish a flexible regulatory framework that allows for efficient licensing of the 220 MHz service, eliminates unnecessary regulatory burdens, and enhances the competitive potential of the 220 MHz service in the mobile service marketplace. However, as with any licensing and operational plan for a radio service, a certain number of regulatory and information collection burdens are necessary to verify licensee compliance with FCC rules.

Federal Communications Commission.

William F. Caton,

Deputy Secretary.

BILLING CODE 6712–01–P

FEDERAL COMMUNICATIONS COMMISSION

Notice of Public Information Collection(s) Being Reviewed by the Federal Communications Commission for Extension Under Delegated Authority, Comments Requested

August 14, 2007.

SUMMARY: The Federal Communications Commission, as part of its continuing effort to reduce paperwork burden invites the general public and other Federal agencies to take this opportunity to comment on the following information collection(s), as required by the Paperwork Reduction Act of 1995, Public Law 104–13. An agency may not conduct or sponsor a collection of information unless it displays a currently valid control number. No person shall be subject to any penalty for failing to comply with a collection of information subject to the Paperwork Reduction Act (PRA) that does not display a valid control number. Comments are requested concerning (a) Whether the proposed collection of information is necessary for the proper performance of the functions of the Commission, including whether the information shall have practical utility; (b) the accuracy of the Commission's burden estimate; (c) ways to enhance the quality, utility, and clarity of the information collected; and (d) ways to minimize the burden of the collection of information on the respondents, including the use of automated collection techniques or other forms of information technology.

DATES: Persons wishing to comment on this information collection should submit comments October 22, 2007. If you anticipate that you will be submitting comments, but find it difficult to do so within the period of time allowed by this notice, you should advise the contact listed below as soon as possible.

ADDRESSES: Direct all PRA comments to Nicholas A. Fraser, Office of Management and Budget (OMB), (202) 395–5887, or via fax at 202–395–5167, or via the Internet at *Nicholas_A._Fraser@omb.eop.gov* and to *Judith-B.Herman@fcc.gov,* Federal Communications Commission (FCC), Room 1–B441, 445 12th Street, SW., Washington, DC 20554. To submit your comments by e-mail send them to: *PRA@fcc.gov.* If you would like to obtain or view a copy of this information collection after the 60 day comment period, you may do so by visiting the FCC PRA Web page at: *http://www.fcc.gov/omd/pra.*

FOR FURTHER INFORMATION CONTACT: For additional information about the information collection(s) send an e-mail to *PRA@fcc.gov* or contact Judith B. Herman at 202–418–0214.

SUPPLEMENTARY INFORMATION:

OMB Control No.: 3060–0995.

Title: Section 1.2105(c), Bidding Procedures and Certification Procedures; Prohibition of Collusion.

Form No.: N/A.

Type of Review: Extension of a currently approved collection.

Respondents: Business or other for-profit, not-for-profit institutions, and state, local or tribal government.

Number of Respondents: 10 respondents; 10 responses.

Estimated Time per Response: 5 hours (2 hours with in-house staff) + 1.5 hours with in-house counsel + 1.5 hours to prepare and file with the FCC).

Frequency of Response: On occasion reporting requirement.

Obligation to Respond: Required to obtain or retain benefits.

Total Annual Burden: 50 hours.

Annual Cost Burden: $6,000.

Privacy Act Impact Assessment: N/A.

Nature and Extent of Confidentiality: Respondents are entitled to request confidentiality in accordance with 47 CFR 0.459 of the Commission's rules.

Needs and Uses: This collection will be submitted as an extension (no change in reporting requirements) after this 60-day comment period to Office of Management and Budget (OMB) in order to obtain the full three-year clearance. There is no change in the number of respondents or burden hours.

Section 1.2105(c) prohibits auction applicants that are eligible to bid on any of the same geographic areas from cooperating or collaborating with respect to, discussing or disclosing to each other in any manner the substance of their bids or bidding strategies from the short-form application filing deadline to the post-auction down payment deadline, unless such applicants are members of a bidding consortium or other joint bidding agreement(s) reported on their short-form application.

Section 1.2105(c) requires auction applicants that make or receive a communication of bids or bidding strategies prohibited by this rule section, to report such a communication to the Commission, in writing, immediately, but in no case later than five business days after the communication occurs.

The information collection requirement that is subject to OMB review and approval is to ensure that no bidder gains unfair advantage over other bidders in its spectrum auctions and thus enhance the competitiveness and fairness of its auctions. The information collected will be reviewed and, if warranted, referred to the Commission's Enforcement Bureau for possible investigation and administrative action. The Commission may also refer allegations of anticompetitive auction conduct to the Department of Justice for investigation.

OMB Control No.: 3060–0998.

Title: Section 87.109, Station Logs.

Form No.: N/A.

Type of Review: Extension of a currently approved collection.

Respondents: Business or other for-profit.

Number of Respondents: 3 respondents; 3 responses.

Estimated Time per Response: 100 hours.

Frequency of Response: Recordkeeping requirement.

Obligation to Respond: Required to obtain or retain benefits.

Total Annual Burden: 300 hours.

Annual Cost Burden: N/A.

Privacy Act Impact Assessment: N/A.

Nature and Extent of Confidentiality: There is no need for confidentiality.

Needs and Uses: This collection will be submitted as an extension (no change in recordkeeping requirements) after this 60-day comment period to Office of Management and Budget (OMB) in order to obtain the full three-year clearance. There is no change in the number of respondents or burden hours.

Section 87.109 of the Commission's rules require that a station at a fixed location in the international aeronautical mobile service (IAMS) must maintain a log (written or

electronic/automatic) in accordance with the Annex 10 provisions of the International Civil Aviation Organization (ICAO) Convention. This log is necessary to document the quality of service provided by fixed stations, including the harmful interference, equipment failure, and logging of distress and safety calls where applicable.

The information is used by the Commission to ensure that particular stations are licensed and operated in compliance with applicable rules, statutes, and treaties.

Federal Communications Commission.

William F. Caton,

Deputy Secretary.

BILLING CODE 6712–01–P

FEDERAL COMMUNICATIONS COMMISSION

Notice of Public Information Collection(s) Being Submitted to the Office of Management and Budget, Comments Requested

August 14, 2007.

SUMMARY: The Federal Communications Commission, as part of its continuing effort to reduce paperwork burden invites the general public and other Federal agencies to take this opportunity to comment on the following information collection(s), as required by the Paperwork Reduction Act (PRA) of 1995, Public Law 104–13. An agency may not conduct or sponsor a collection of information unless it displays a currently valid control number. No person shall be subject to any penalty for failing to comply with a collection of information subject to the Paperwork Reduction Act (PRA) that does not display a valid control number. Comments are requested concerning (a) Whether the proposed collection of information is necessary for the proper performance of the functions of the Commission, including whether the information shall have practical utility; (b) the accuracy of the Commission's burden estimate; (c) ways to enhance the quality, utility, and clarity of the information collected; and (d) ways to minimize the burden of the collection of information on the respondents, including the use of automated collection techniques or other forms of information technology.

DATES: Written Paperwork Reduction Act (PRA) comments should be submitted on or before October 22, 2007. If you anticipate that you will be submitting PRA comments, but find it difficult to do so within the period of time allowed by this notice, you should advise the FCC contact listed below as soon as possible.

ADDRESSES: Direct all PRA comments to Nicholas A. Fraser, Office of Management and Budget, (202) 395–5887, or via fax at 202–395–5167 or via Internet at *Nicholas_A._Fraser@omb.eop.gov* and to *Judith-B.Herman@fcc.gov*, Federal Communications Commission, Room 1–B441, 445 12th Street, SW., DC 20554 or an e-mail to *PRA@fcc.gov*. If you would like to obtain or view a copy of this information collection after the 60 day comment period, you may do so by visiting the FCC PRA Web page at: *http://www.fcc.gov/omd/pra*.

FOR FURTHER INFORMATION CONTACT: For additional information or copies of the information collection(s), contact Judith B. Herman at 202–418–0214 or via the Internet at *Judith-B.Herman@fcc.gov*.

SUPPLEMENTARY INFORMATION:

OMB Control Number: 3060–0767.

Title: Auction Forms and License Transfer Disclosures—Supplement to Second Order on Reconsideration of the Fifth Report and Order in WT Docket No. 97–82 (Sections 47 CFR 1.2110, 1.2111, and 1.2112).

Form No.: N/A.

Type of Review: Extension of a currently approved collection.

Respondents: Business or other for-profit, not-for-profit institutions, and state, local or tribal government.

Number of Respondents: 22,000 respondents; 20,000 responses.

Estimated Time per Response: 5.25 hours.

Frequency of Response: On occasion reporting requirement, third party disclosure requirement and recordkeeping requirement.

Obligation to Respond: Required to obtain or retain benefits.

Total Annual Burden: 770,250 hours.

Total Annual Cost: $47,333,000.

Privacy Act Impact Assessment: N/A.

Nature and Extent of Confidentiality: There is no need for confidentiality.

Needs and Uses: The Commission will submit this extension (no change in the reporting, recordkeeping, or third party disclosure requirements) to the OMB after this 60 day comment period to obtain the full three-year clearance from them.

The information collection requirements will enable the Commission to ensure that no bidder gains an unfair advantage over other bidders in its spectrum auctions and thus enhance the competitiveness and fairness of its auctions. The information collected will be reviewed and, if warranted, referred to the Commission's Enforcement Bureau for possible investigation and administrative action. The Commission may also refer allegations of anticompetitive auction conduct to the Department of Justice for investigation. *See* 47 CFR 1.2110, 1.2111, and 1.2112.

FEDERAL COMMUNICATIONS COMMISSION

[FCC 07–145; MM Docket No. 95–31]

FCC Seeks Comment on Proposed Application Limit for NCE FM New Station Applications in October 12–October 19, 2007 Window

AGENCY: Federal Communications Commission.

ACTION: Notice.

SUMMARY: The Commission seeks comment on a proposed application limit in the noncommercial educational FM broadcast application filing window scheduled for October 12–October 19, 2007. The purpose of the proposed limit is to deter speculation and permit the expeditious processing of applications filed in the window. The Commission tentatively concludes that an appropriate limit for any party is an attributable interest in no more than ten applications for new noncommercial educational FM broadcast stations filed in the window, excluding major modification applications and pending applications.

DATES: Comments are due September 6, 2007. Reply comments are due September 17, 2007. 47 CFR 1.4(b)(1) governs the calculation of such filing dates.

ADDRESSES: Mail comments and reply comments to the Federal Communications Commission, 445 12th Street, SW., Washington, DC 20554, with a copy to the Commission's duplicating contractor, Best Copy and Printing, Inc., Portals II, 445 12th Street, SW., Room CY–B402, Washington, DC 20554.

FOR FURTHER INFORMATION CONTACT: Irene Bleiweiss, 202–418–2785.

SUPPLEMENTARY INFORMATION:

Electronic Access and Filing Addresses. Comments may be filed electronically using the Internet by accessing the ECFS: *http://www.fcc.gov/cgb/ecfs/* or the Federal eRulemaking

Portal: *http://www.regulations.gov.* For ECFS filers, in completing the transmittal screen, filers should include their full name, U.S. Postal service mailing address, and the applicable docket number: MM Docket No. 95–31. Parties may also submit an electronic comment by Internet e-mail. To get filing instructions, filers should send an e-mail to *ecfs@fcc.gov*, and include the following words in the body of the message: ''get form''. A sample form and instructions will be sent in response.

Statement of Legal Authority. The Commission's legal authority for limiting the number of applications a party may file during a broadcast filing window is found in 47 U.S.C. 151, 152(a), 154(i) and (j), 301, 303(g) and (r), 308(b), and 309(j).

Ex Parte Restrictions. This proceeding has been designated ''permit but disclose'' for purposes of the Commission's ex parte rules, 47 CFR 1.1200–1.1216. Ex parte presentations will be governed by the procedures set forth in 47 CFR 1.1206 applicable to non-restricted proceedings.

Regulatory Flexibility Act. Although we are not proposing a rule change, we have prepared an Initial Regulatory Flexibility Analysis (''IRFA'') which is set forth in the Appendix to the Public Notice. Written public comments are requested on the IRFA. These comments must be filed in accordance with the same filing procedures and deadlines for comments on the proposed application limit, and should have a separate and distinct heading designating them as responses to the IRFA. The Commission will send a copy of the Public Notice, including this IRFA, to the Chief Counsel for Advocacy of the Small Business Administration (''SBA''). *See* 5 U.S.C. 603(a). In addition, the Public Notice and the IRFA (or summaries thereof) [are here] published in the **Federal Register**. *See id.*

A. Need for, and Objectives of, the Proposed Limit

The Commission has determined that, absent a limit on the number of applications that a party may file in the filing window described in the Public Notice, it is likely that some parties may file a large number of speculative applications. Accordingly, the Commission has tentatively determined that a limit of ten applications for new NCE FM construction permits in the filing window is an appropriate procedural safeguard to deter speculation and permit the expeditious processing of the NCE FM applications filed in the window. The Commission believes that the proposed limit will benefit small entities, as defined below.

B. Legal Basis

The Public Notice is released pursuant to sections 1, 2(a), 4(i) and (j), 301, 303(g) and (r), 308(b), and 309(j) of the Communications Act of 1934, as amended, 47 U.S.C. 151, 152(a), 154(i) and (j), 301, 303(g) and (r), 308(b), and 309(j).

C. Description and Estimate of the Number of Small Entities To Which the Proposed Rules Will Apply

The RFA directs agencies to provide a description of, and, where feasible, an estimate of the number of small entities that may be affected by the proposed rules, if adopted. 5 U.S.C. 603(b)(3), The Small Business Administration defines a radio broadcasting entity that has $6.5 million or less in annual receipts as a small business. 13 CFR121.201, NAICS Code 515112. Business concerns included in this industry are those ''primarily engaged in broadcasting aural programs by radio to the public.'' See NAICS Code 515112. We estimate that 95% or more of all NCE FM applicants will be small businesses according to this definition. According to Commission staff review of the BIA Financial Network, Inc., Media Access Radio Analyzer Database as of July 10, 2007, about 10,520 (95 percent) of 11,055 commercial radio stations have revenues of $6.5 million or less.

We note, however, that in assessing whether a business entity qualifies as small under the above definition, business control affiliations must be included. Our estimate, therefore, may slightly overstate the number of small entities that might be affected by the proposed application limit, because the revenue figures on which this estimate is based do not include or aggregate revenues from affiliated companies. In this context, the application of the statutory definition to radio stations is of concern. An element of the definition of ''small business'' is that the entity not be dominant in its field of operation. We are unable at this time and in this context to define or quantify the criteria that would establish whether a specific radio station is dominant in its field of operation. Accordingly, the foregoing estimate of small businesses to which the application limit may apply does not exclude any radio station from the definition of a small business on this basis and is therefore over-inclusive to that extent. An additional element of the definition of ''small business'' is that the entity must be independently owned and operated. We note that it is difficult at times to assess these criteria in the context of media entities, and our estimates of small businesses to which they apply may be over-inclusive to this extent.

D. Description of Projected Reporting, Recordkeeping, and Other Compliance Requirements

We anticipate that none of the changes adopted as a result of the Public Notice would result in an increase to the reporting and recordkeeping requirements of broadcast stations or applicants for NCE FM authorizations. As noted above, we invite small business entities to comment in response to the Public Notice.

E. Steps Taken To Minimize Significant Impact on Small Entities, and Significant Alternatives Considered

The Public Notice describes and seeks comment on a proposed limit on the number of new NCE FM applications that may be filed during the filing window described in the Public Notice. The proposed limit is intended to benefit all small NCE entities seeking to establish a new NCE FM service on a local or regional basis by preventing mass filings of speculative applications. The proposed limit excludes both pending applications by NCE FM stations and applicants and new major change applications by existing NCE FM stations seeking to modify their existing authorizations, so the proposal involves no detriment to those applicants. At the same time, the proposed limit should benefit such applicants by expediting the review and processing of applications filed during the window. The proposed limit does not impose any significant compliance or reporting requirements because it would merely set a limit on the number of applications for new NCE FM authorizations that a party could file during the window. Accordingly, we are not aware of any alternatives that would benefit small entities. We encourage small entities to comment on the proposed limit described in the Public Notice.

F. Federal Rules That May Duplicate, Overlap, or Conflict With the Proposed Limit

None.

Federal Communications Commission.

William F. Caton,

Deputy Secretary.

BILLING CODE 6712–01–P

FEDERAL MARITIME COMMISSION

Notice of Agreements Filed

The Commission hereby gives notice of the filing of the following agreements under the Shipping Act of 1984. Interested parties may submit comments on agreements to the Secretary, Federal Maritime Commission, Washington, DC 20573, within ten days of the date this notice appears in the **Federal Register**. Copies of agreements are available through the Commission's Office of Agreements (202–523–5793 or *tradeanalysis@fmc.gov*).

Agreement No.: 011963–001.

Title: Maersk Line/USL Space Charter Agreement.

Parties: A.P. Moller-Maersk A/S and U.S. Lines Limited.

Filing Party: Wayne R. Rohde, Esq.; Sher & Blackwell LLP; 1850 M Street, NW.; Suite 900; Washington, DC 20036.

Synopsis: The amendment revises the amount of space Maersk will charter to U.S. Lines.

Agreement No.: 012012.

Title: CSCL/Wan Hai Slot Charter Agreement.

Parties: China Shipping Container Lines (Hong Kong) Co., Ltd. and Wan Hai Lines Ltd.

Filing Party: Andrew W. Dyer, Jr., Esq.; Blank Rome LLP; 600 New Hampshire Avenue, NW.; Washington, DC 20037.

Synopsis: The agreement authorizes China Shipping to charter space to Wan Hai in the trade between U.S. West Coast ports and ports in the Far East.

By Order of the Federal Maritime Commission.

Dated: August 17, 2007.

Karen V. Gregory,

Assistant Secretary.

BILLING CODE 6730–01–P

FEDERAL RESERVE SYSTEM

Change in Bank Control Notices; Acquisition of Shares of Bank or Bank Holding Companies

The notificants listed below have applied under the Change in Bank Control Act (12 U.S.C. 1817(j)) and § 225.41 of the Board's Regulation Y (12 CFR 225.41) to acquire a bank or bank holding company. The factors that are considered in acting on the notices are set forth in paragraph 7 of the Act (12 U.S.C. 1817(j)(7)).

The notices are available for immediate inspection at the Federal Reserve Bank indicated. The notices also will be available for inspection at the office of the Board of Governors. Interested persons may express their views in writing to the Reserve Bank indicated for that notice or to the offices of the Board of Governors. Comments must be received not later than September 5, 2007.

A. Federal Reserve Bank of Boston (Richard Walker, Community Affairs Officer) P.O. Box 55882, Boston, Massachusetts 02106-2204:

1. James J. Mawn, Sr., Gloucester, Massachusetts; individually and to act in concert with the Mawn Family Group, consisting of Rita M. Mawn; Mary Catherine Riley; Joseph Riley; Rita M. Barger; Sheila E. Carpenter; James J. Mawn, Jr.; Marylyn C. Mawn; Alicia J. Mawn–Mahlau; Sam A. Mawn–Mahlau; the Mawn Family Limited Partnership;

Louise S. McDonough and Mary E. Negri; to acquire additional voting shares of Northern Bancorp, Inc., Woburn, Massachusetts, and thereby indirectly acquire voting shares of Northern Bank and Trust Company, Woburn, Massachusetts.

Board of Governors of the Federal Reserve System, August 16, 2007.

Jennifer J. Johnson,

Secretary of the Board.

BILLING CODE 6210–01–S

DEPARTMENT OF HEALTH AND HUMAN SERVICES

Agency for Toxic Substances and Disease Registry

[ATSDR–234]

Public Health Assessments and Health Consultations Completed; April 2007–June 2007

AGENCY: Agency for Toxic Substances and Disease Registry (ATSDR), Department of Health and Human Services (HHS).

ACTION: Notice.

SUMMARY: This notice announces those sites for which ATSDR has completed

public health assessments and health consultations during the period from April 1, 2007, through June 30, 2007. This list includes sites that are on or proposed for inclusion on the National Priorities List (NPL) and includes sites for which assessments or consultations were prepared in response to requests from the public.

FOR FURTHER INFORMATION CONTACT: William Cibulas, Jr., Ph.D., Director, Division of Health Assessment and Consultation, Agency for Toxic Substances and Disease Registry, 1600 Clifton Road, NE., Mailstop E–32, Atlanta, Georgia 30333, telephone (404) 498–0007.

SUPPLEMENTARY INFORMATION: The most recent list of completed public health assessments and health consultations was published in the **Federal Register** on May 8, 2007 [72 FR 26119]. This announcement is the responsibility of ATSDR under the regulation ''Public Health Assessments and Health Effects Studies of Hazardous Substances Releases and Facilities'' [42 CFR Part 90]. This rule sets forth ATSDR's procedures for the conduct of public health assessments under section 104(i) of the Comprehensive Environmental Response, Compensation, and Liability Act (CERCLA), as amended by the Superfund Amendments and Reauthorization Act (SARA) [42 U.S.C. 9604(i)].

Availability

The completed public health assessments and health consultations are available for public inspection at the ATSDR Records Center, 1825 Century Boulevard, Atlanta, Georgia (not a mailing address), between 8 a.m. and 4:30 p.m., Monday through Friday except legal holidays. Public health assessments and health consultations are often available for public review at local repositories such as libraries in corresponding areas. Many public health assessments and health consultations are available through ATSDR's Web site at *http://www.atsdr.cdc.gov/hac/PHA/index.asp.* In addition, the completed public health assessments are available by mail through the U.S. Department of Commerce, National Technical Information Service (NTIS), 5285 Port Royal Road, Springfield, Virginia 22161, or by telephone at (800) 553–6847. NTIS charges for copies of public health assessments. The NTIS order numbers are listed in parentheses following the site names.

Public Health Assessments Completed or Issued

Between April 1, 2007, and June 30, 2007, public health assessments were issued for the sites listed below:

NPL and Proposed NPL Sites

New York

Peninsula Boulevard Groundwater Plume—(PB2007–107915); April 24, 2007.

North Carolina

Blue Ridge Plating Company Site—Evaluation of Surface Soil, Dry Sediment, and Surface Water Data—(PB2007–109821); May 18, 2007.

Utah

Bountiful/Woods Cross 5th PCE Plume—(PB2007–107912); April 18, 2007.

West Virginia

Allegany Ballistics Laboratory—(PB2007–111686); May 21, 2007.

Non-NPL Petitioned Sites

Alaska

Galena Airport (a/k/a USAF Galena Air Force Station)—(PB2007-109917); May 21, 2007.

New Jersey

Mercer Rubber Company Site—(PB2007–107914); April 25, 2007.

Oregon

Red Rock Road—(PB2007–109919); May 30, 2007.

Health Consultations Completed or Issued

Between April 1, 2007, and June 30, 2007, health consultations were issued for the sites listed below:

Alaska

Interior Alaska Indoor Shooting Range; June 18, 2007.

Arizona

Arsenic Exposure from Private Drinking Water Wells; April 16, 2007.

Arkansas

County Road (CR)—109—Pesticide Contamination of Groundwater in Mississippi County Well #3; May 16, 2007.

California

A1-Lube Division of Far Best Corporation Facility; May 4, 2007.
Evaluation of Hydrogen Sulfide Migration at Twin Lakes Beach and Adjacent to the Santa Cruz Harbor; June 6, 2007.
Former California Zonolite/W.R. Grace & Company Site; June 11, 2007.
Germain's Seed Company; May 11, 2007.

Colorado

Proposed Data Collections Submitted for Public Comment and Recommendations

In compliance with the requirement of Section 3506(c)(2)(A) of the Paperwork Reduction Act of 1995 for opportunity for public comment on proposed data collection projects, the Centers for Disease Control and Prevention (CDC) will publish periodic summaries of proposed projects. To request more information on the proposed projects or to obtain a copy of the data collection plans and instruments, call 404–639–5960 or send comments to Maryam I. Daneshvar, CDC Assistant Reports Clearance Officer, 1600 Clifton Road, MS–D74, Atlanta, GA 30333 or send an e-mail to *omb@cdc.gov.*

Comments are invited on: (a) Whether the proposed collection of information is necessary for the proper performance of the functions of the agency, including whether the information will have practical utility; (b) the accuracy of the agency's estimate of the burden of the proposed collection of information; (c) ways to enhance the quality, utility, and clarity of the information to be collected; and (d) ways to minimize the burden of the collection of information on respondents, including through the use of automated collection techniques or other forms of information technology. Written comments should be received within 60 days of this notice.

Proposed Project

Respiratory Protective Devices—42 CFR part 84—Regulation—(0920–0109)—Extension—National Institute for Occupational Safety and Health (NIOSH), of the Centers for Disease Control and Prevention (CDC).

Background and Brief Description

This data collection was formerly named Respiratory Protective Devices 30 CFR part 11 but in 1995, the respirator standard was moved to 42 CFR part 84. The regulatory authority for the National Institute for Occupational Safety and Health (NIOSH) certification program for respiratory protective devices is found in the Mine Safety and Health Amendments Act of 1977 (30 U.S.C. 577a, 651 *et seq.*, and 657(g)) and the Occupational Safety and Health Act of 1970 (30 U.S.C. 3, 5, 7, 811, 842(h), 844). These regulations have as their basis the performance tests and criteria for approval of respirators used by millions of American construction workers, miners, painters, asbestos removal workers, fabric mill workers, and fire fighters. In addition to benefiting industrial workers, the testing requirements also benefit health care workers implementing the current CDC *Guidelines for Preventing the Transmission of Tuberculosis.* Regulations of the Environmental Protection Agency (EPA) and the Nuclear Regulatory Commission (NRC) also require the use of NIOSH-approved respirators. Recent developments in this program have provided approvals for self-contained breathing apparatus (SCBA), Air-Purifying respirators, Powered Air-Purifying (PAPR) and Air-Purifying Escape respirators for use by fire fighters and other first responders to potential terrorist attacks. These regulations also establish methods for respirator manufacturers to submit respirators for testing under the regulation and have them certified as NIOSH-approved if they meet the criteria given in the above regulation. NIOSH, in accordance with 42 CFR 84: (1) Issues certificates of approval for respirators which have met specified construction, performance, and protection requirements; (2) establishes procedures and requirements to be met in filing applications for approval; (3) specifies minimum requirements and methods to be employed by NIOSH and by applicants in conducting inspections, examinations, and tests to determine effectiveness of respirators; (4) establishes a schedule of fees to be charged applicants for testing and certification, and (5) establishes approval labeling requirements. Information is collected from those who apply for certification in order to properly establish the scope and intent of request. Contact information, type of respirator, quality assurance plans and procedures that are used in producing the respirator, and draft labels, as specified in the regulation, are the types of data collected. Respirator manufacturers (approximately 43), are the respondents and upon completion of

the forms, their requests for approval are evaluated. There is no cost to respondents other than their time to participate.

Estimated Annualized Burden Hours:

Section name	Data type	Number of respondents	Number of responses per respondent	Average burden response (in hours)	Total burden hours
84.11	Applications	43	8	86	29,584
84.33	Labeling	43	8	2	688
84.35	Modifications	43	8	66	22,704
84.41	Reporting	43	8	23	7,912
84.43	Record Keeping	43	8	46	15,824
84.257	Labeling	43	8	3	1,032
84.1103	Labeling	43	8	3	1,032
Total					78,776

Maryam I. Daneshvar,

Acting Reports Clearance Officer, Centers for Disease Control and Prevention.

BILLING CODE 4163–18–P

DEPARTMENT OF HEALTH AND HUMAN SERVICES

Centers for Disease Control and Prevention

National Institute for Occupational Safety and Health (NIOSH) Advisory Board on Radiation and Worker Health (ABRWH or Advisory Board)

In accordance with section 10(a)(2) of the Federal Advisory Committee Act (Pub. L. 92–463), the Centers for Disease Control and Prevention announces the following committee meeting:

Name: Advisory Board on Radiation and Worker Health, National Institute for Occupational Safety and Health.

Audio Conference Call Time and Date: 11 a.m.–4 p.m., EST, Tuesday, September 4, 2007.

Place: Audio Conference Call via FTS Conferencing. The USA toll free dial in number is 1–866–643–6504 with a pass code of 9448550.

Status: Open to the public, but without a public comment period.

Background: The Advisory Board was established under the Energy Employees Occupational Illness Compensation Program Act of 2000 to advise the President on a variety of policy and technical functions required to implement and effectively manage the new compensation program. Key functions of the Advisory Board include providing advice on the development of probability of causation guidelines which have been promulgated by the Department of Health and Human Services (HHS) as a final rule, advice on methods of dose reconstruction which have also been promulgated by HHS as a final rule, advice on the scientific validity and quality of dose estimation and reconstruction efforts being performed for purposes of the compensation program, and advice on petitions to add classes of workers to the Special Exposure Cohort (SEC).

In December 2000, the President delegated responsibility for funding, staffing, and operating the Advisory Board to HHS, which subsequently delegated this authority to the CDC. NIOSH implements this responsibility for CDC. The charter was issued on August 3, 2001, renewed at appropriate intervals, most recently, August 3, 2007, and will expire on August 3, 2009.

Purpose: This Advisory Board is charged with (a) providing advice to the Secretary, HHS, on the development of guidelines under Executive Order 13179; (b) providing advice to the Secretary, HHS, on the scientific validity and quality of dose reconstruction efforts performed for this program; and (c) upon request by the Secretary, HHS, advising the Secretary on whether there is a class of employees at any Department of Energy facility who were exposed to radiation but for whom it is not feasible to estimate their radiation dose, and on whether there is reasonable likelihood that such radiation doses may have endangered the health of members of this class.

Matters To Be Discussed: The agenda for the conference call includes: Report of Board Member Votes Recorded Since the Last Board Meeting; Update on Rocky Flats Follow-Up Actions; Update on SC&A Review of TBD 6000 and General Steel Industries Appendix; Report on SC&A Contract Talks for FY08; Discussions of Initial Steps for a Board Contractor for FY09 and Beyond; Report on Privacy Act ''Clearance'' Procedures; Update on Letters to DOE and DOL on Chapman Valve; Work Group Updates; Status of and Plans for Future Board Activities; and Board Working Time.

The agenda is subject to change as priorities dictate.

Recommended changes to the agenda from the Office of General Counsel resulted in the **Federal Register** notice being published less that fifteen days before the date of the meeting.

Because there is not a public comment period, written comments may be submitted. Any written comments received will be included in the official record of the meeting and should be submitted to the contact person below well in advance of the meeting.

Contact Person for More Information: Dr. Lewis V. Wade, Executive Secretary, NIOSH, CDC, 4676 Columbia Parkway, Cincinnati, OH 45226, Telephone 513.533.6825, Fax 513.533.6826.

The Director, Management Analysis and Services Office, has been delegated the authority to sign **Federal Register** notices pertaining to announcements of meetings and other committee management activities, for both CDC and the Agency for Toxic Substances and Disease Registry.

Dated: August 16, 2007.

Michael Tropauer,

Acting Director, Management Analysis and Services Office, Centers for Disease Control and Prevention.

BILLING CODE 4163–18–P

DEPARTMENT OF HEALTH AND HUMAN SERVICES

Centers For Medicare & Medicaid Services

Privacy Act of 1974; Report of a Modified System of Records

AGENCY: Department of Health and Human Services (HHS), Center for Medicare & Medicaid Services (CMS).

ACTION: Notice of a Modified System of Records (SOR).

SUMMARY: In accordance with the requirements of the Privacy Act of 1974, we propose to modify an existing system titled, ''National Emphysema Treatment Trial (NETT), System No. 09–70–0531,'' established at 65 **Federal Register** 47995 (August 4, 2000). We propose to modify existing routine use number 1 that permits disclosure to agency contractors and consultants to include disclosure to CMS grantees who perform a task for the agency. CMS grantees, charged with completing

projects or activities that require CMS data to carry out that activity, are classified separate from CMS contractors and/or consultants. The modified routine use will remain as routine use number 1. We will delete routine use number 4 authorizing disclosure to support constituent requests made to a congressional representative. If an authorization for the disclosure has been obtained from the data subject, then no routine use is needed. The Privacy Act allows for disclosures with the ''prior written consent'' of the data subject.

We will broaden the scope of routine uses number 5 and 6, authorizing disclosures to combat fraud and abuse in the Medicare and Medicaid programs to include combating ''waste'' which refers to specific beneficiary or recipient practices that result in unnecessary cost to all federally-funded health benefit programs. Additionally, we will broaden the scope of this system by including the section titled ''Additional Circumstances Affecting Routine Use Disclosures,'' that addresses ''Protected Health Information (PHI)'' and ''small cell size.'' The requirement for compliance with HHS regulation ''Standards for Privacy of Individually Identifiable Health Information'' apply when ever the system collects or maintain PHI. This system may contain PHI. In addition, our policy to prohibit release if there is a possibility that an individual can be identified through ''small cell size'' will apply to the data disclosed from this system.

We are modifying the language in the remaining routine uses to provide a proper explanation as to the need for the routine use and to provide clarity to CMS's intention to disclose individual-specific information contained in this system. The routine uses will then be prioritized and reordered according to their usage. We will also take the opportunity to update any sections of the system that were affected by the recent reorganization or because of the impact of the Medicare Prescription Drug, Improvement, and Modernization Act of 2003 (MMA) (Pub. L. 108–173) provisions and to update language in the administrative sections to correspond with language used in other CMS SORs.

The primary purpose of the system of records is to collect and maintain data that will allow CMS to provide secure data on participants in the randomized phase of the study, pay claims, and to monitor and evaluate the clinical trial. Information retrieved from this system of records will also be disclosed to: (1) Support regulatory, reimbursement and policy functions performed within the agency or by a contractor, consultant, or CMS grantee; (2) assist another Federal or state agency to enable such agency to administer a Federal health benefits program, or to enable such agency to fulfill a requirement of a Federal statute or regulation that implements a health benefits program funded in whole or in part with Federal funds; (3) support research, evaluation, or epidemiological projects related to the prevention of disease or disability, or the restoration or maintenance of health, and for payment related projects; (4) support litigation involving the agency; and (5) combat fraud, waste, and abuse in certain health benefits programs. We have provided background information about the new system in the **SUPPLEMENTARY INFORMATION** section below. Although the Privacy Act requires only that CMS provide an opportunity for interested persons to comment on the proposed routine uses, CMS invites comments on all portions of this notice. See **EFFECTIVE DATE** section for comment period.

EFFECTIVE DATE: CMS filed a modified system report with the Chair of the House Committee on Government Reform and Oversight, the Chair of the Senate Committee on Homeland Security and Governmental Affairs, and the Administrator, Office of Information and Regulatory Affairs, Office of Management and Budget (OMB) on August 10, 2007. To ensure that all parties have adequate time in which to comment, the modified SOR, including routine uses, will become effective 40 days from the publication of the notice, or from the date it was submitted to OMB and the Congress, whichever is later, unless CMS receives comments that require alterations to this notice.

ADDRESSES: The public should address comments to: CMS Privacy Officer, Division of Privacy Compliance, Enterprise Architecture and Strategy Group, Office of Information Services, CMS, Room N2–04–27, 7500 Security Boulevard, Baltimore, Maryland 21244–1850. Comments received will be available for review at this location, by appointment, during regular business hours, Monday through Friday from 9 a.m.–3 p.m., Eastern Time zone.

FOR FURTHER INFORMATION CONTACT: Joanna Baldwin, Health Insurance Specialist, Division of Medical and Surgical Services, Coverage and Analysis Group, Office of Clinical Standards and Quality, CMS, Room C1–10–25, 7500 Security Boulevard, Baltimore, Maryland 21244–1850. Her telephone number is (410) 786–7205. She can be reached by telephone at 410–786–7205 or e-mail *Joanna.Baldwin@cms.hhs.gov.*

SUPPLEMENTARY INFORMATION:

I. Description of the Proposed System of Records

A. Statutory and Regulatory Basis for SOR

The statutory authority for this system is given under the provisions of Section 1862(a) (1) (A) of the Social Security Act, and 42 U.S.C. 1395, which states that Medicare must provide coverage for items and services that are ''reasonable and necessary for the diagnosis or treatment of illness or injury or to improve the functioning of a malformed body member.''

B. Collection and Maintenance of Data in the System

This system will collect and maintain individually identifiable and other data collected on Medicare beneficiaries and providers participating in the study. Data will be collected from Medicare administrative and claims records, patient medical charts, physician records, and via survey instruments administered to beneficiaries and providers. The collected information will include, but is not limited to Medicare claims and eligibility data, name, address, telephone number, health insurance claims number, race/ethnicity, gender, date of birth, provider name, unique provider identification number, medical record number, as well as clinical, demographic, health/well-being, family and/or caregiver contact information, and background information relating to Medicare issues.

II. Agency Policies, Procedures, and Restrictions on Routine Uses

A. The Privacy Act permits us to disclose information without an individual's consent if the information is to be used for a purpose that is compatible with the purpose(s) for which the information was collected. Any such disclosure of data is known as a ''routine use.'' The Government will only release NETT information that can be associated with an individual as provided for under ''Section III. Proposed Routine Use Disclosures of Data in the System.'' Both identifiable and non-identifiable data may be disclosed under a routine use. We will only collect the minimum personal data necessary to achieve the purpose of NETT.

CMS has the following policies and procedures concerning disclosures of information that will be maintained in the system. Disclosure of information from the system will be approved only

to the extent necessary to accomplish the purpose of the disclosure and only after CMS:

1. Determines that the use or disclosure is consistent with the reason that the data is being collected; e.g., to collect and maintain data that will allow CMS to provide secure data on participants in the randomized phase of the study, pay claims, and to monitor and evaluate the clinical trial.

2. Determines that:

a. The purpose for which the disclosure is to be made can only be accomplished if the record is provided in individually identifiable form;

b. The purpose for which the disclosure is to be made is of sufficient importance to warrant the effect and/or risk on the privacy of the individual that additional exposure of the record might bring; and

c. There is a strong probability that the proposed use of the data would in fact accomplish the stated purpose(s).

3. Requires the information recipient to:

a. Establish administrative, technical, and physical safeguards to prevent unauthorized use of disclosure of the record;

b. Remove or destroy, at the earliest time, all patient-identifiable information; and

c. Agree to not use or disclose the information for any purpose other than the stated purpose under which the information was disclosed.

4. Determines that the data are valid and reliable.

III. Proposed Routine Use Disclosures of Data in the System

A. The Privacy Act allows us to disclose information without an individual's consent if the information is to be used for a purpose that is compatible with the purpose(s) for which the information was collected. Any such compatible use of data is known as a ''routine use.'' The proposed routine uses in this system meet the compatibility requirement of the Privacy Act. We are proposing to establish the following routine use disclosures of information maintained in the system:

1. To agency contractors, consultants or CMS grantees, who have been engaged by the agency to assist in the performance of a service related to this collection and who need to have access to the records in order to perform the activity.

We contemplate disclosing information under this routine use only in situations in which CMS may enter into a contractual or similar agreement with a third party to assist in accomplishing CMS function relating to purposes for this system.

CMS occasionally contracts out certain of its functions when doing so would contribute to effective and efficient operations. CMS must be able to give a contractor, consultant or CMS grantees whatever information is necessary for the contractor or consultant to fulfill its duties. In these situations, safeguards are provided in the contract prohibiting the contractor, consultant or CMS grantees from using or disclosing the information for any purpose other than that described in the contract and requires the contractor, consultant or CMS grantees to return or destroy all information at the completion of the contract.

2. To another Federal or state agency to:

a. contribute to the accuracy of CMS's proper payment of Medicare benefits;

b. enable such agency to administer a Federal health benefits program, or, as necessary, to enable such agency to fulfill a requirement of a Federal statute or regulation that implements a health benefits program funded in whole or in part with Federal funds; and/or

c. assist Federal/state Medicaid programs within the state.

Other Federal or state agencies, in their administration of a Federal health program, may require NETT information in order to support evaluations and monitoring of Medicare claims information of beneficiaries, including proper reimbursement for services provided.

3. To an individual or organization for a research project or in support of an evaluation project related to the prevention of disease or disability, the restoration or maintenance of health, or payment related projects.

The NETT data will provide for research or support of evaluation projects and a broader, longitudinal, national perspective of the status of Medicare beneficiaries. CMS anticipates that many researchers will have legitimate requests to use these data in projects that could ultimately improve the care provided to Medicare beneficiaries and the policies that govern their care.

4. To the Department of Justice (DOJ), court or adjudicatory body when:

a. the agency or any component thereof, or

b. any employee of the agency in his or her official capacity, or

c. any employee of the agency in his or her individual capacity where the DOJ has agreed to represent the employee, or

d. the United States Government, is a party to litigation or has an interest in such litigation, and, by careful review, CMS determines that the records are both relevant and necessary to the litigation and that the use of such records by the DOJ, court or adjudicatory body is compatible with the purpose for which the agency collected the records.

Whenever CMS is involved in litigation, and occasionally when another party is involved in litigation and CMS policies or operations could be affected by the outcome of the litigation, CMS would be able to disclose information to the DOJ, court or adjudicatory body involved.

5. To a CMS contractor (including, but not necessarily limited to, fiscal intermediaries and carriers) that assists in the administration of a CMS-administered health benefits program, or to a grantee of a CMS-administered grant program, when disclosure is deemed reasonably necessary by CMS to prevent, deter, discover, detect, investigate, examine, prosecute, sue with respect to, defend against, correct, remedy, or otherwise combat fraud, waste, and abuse in such program.

We contemplate disclosing information under this routine use only in situations in which CMS may enter into a contractual, grantee, cooperative agreement or consultant relationship with a third party to assist in accomplishing CMS functions relating to the purpose of combating fraud, waste, and abuse.

CMS occasionally contracts out certain of its functions or makes grants or cooperative agreements when doing so would contribute to effective and efficient operations. CMS must be able to give a contractor, grantee, consultant or other legal agent whatever information is necessary for the agent to fulfill its duties. In these situations, safeguards are provided in the contract prohibiting the agent from using or disclosing the information for any purpose other than that described in the contract and requiring the agent to return or destroy all information.

6. To another Federal agency or to an instrumentality of any governmental jurisdiction within or under the control of the United States (including any State or local governmental agency), that administers, or that has the authority to investigate potential fraud, waste, or abuse in, a health benefits program funded in whole or in part by Federal funds, when disclosure is deemed reasonably necessary by CMS to prevent, deter, discover, detect, investigate, examine, prosecute, sue with respect to, defend against, correct, remedy, or otherwise combat fraud, waste, and abuse in such programs.

Other agencies may require NETT information for the purpose of combating fraud, waste, and abuse in such Federally-funded programs.

B. Additional Provisions Affecting Routine Use Disclosures

To the extent this system contains Protected Health Information (PHI) as defined by HHS regulation ''Standards for Privacy of Individually Identifiable Health Information'' (45 CFR Parts 160 and 164, Subparts A and E) 65 FR 82462 (12–28–00). Disclosures of such PHI that are otherwise authorized by these routine uses may only be made if, and as, permitted or required by the ''Standards for Privacy of Individually Identifiable Health Information.'' (See 45 CFR 164–512 (a) (1).)

In addition, our policy will be to prohibit release even of data not directly identifiable, except pursuant to one of the routine uses or if required by law, if we determine there is a possibility that an individual can be identified through implicit deduction based on small cell sizes (instances where the patient population is so small that individuals could, because of the small size, use this information to deduce the identity of the beneficiary).

IV. Safeguards

CMS has safeguards in place for authorized users and monitors of such users to ensure against unauthorized use. Personnel having access to the system have been trained in the Privacy Act and information security requirements. Employees who maintain records in this system are instructed not to release data until the intended recipient agrees to implement appropriate management, operational and technical safeguards sufficient to protect the confidentiality, integrity and availability of the information and information systems and to prevent unauthorized access.

This system will conform to all applicable Federal laws and regulations and Federal, HHS, and CMS policies and standards as they relate to information security and data privacy. These laws and regulations may apply but are not limited to: The Privacy Act of 1974; the Federal Information Security Management Act of 2002; the Computer Fraud and Abuse Act of 1986; the Health Insurance Portability and Accountability Act of 1996; the E-Government Act of 2002, the Clinger-Cohen Act of 1996; the Medicare Modernization Act of 2003, and the corresponding implementing regulations. OMB Circular A–130, Management of Federal Resources, Appendix III, Security of Federal Automated Information Resources also applies. Federal, HHS, and CMS policies and standards include but are not limited to: All pertinent National Institute of Standards and Technology publications; the HHS Information Systems Program Handbook and the CMS Information Security Handbook.

V. Effects of the Modified System of Records on Individual Rights

CMS proposes to establish this system in accordance with the principles and requirements of the Privacy Act and will collect, use, and disseminate information only as prescribed therein. Data in this system will be subject to the authorized releases in accordance with the routine uses identified in this system of records.

CMS will take precautionary measures to minimize the risks of unauthorized access to the records and the potential harm to individual privacy or other personal or property rights of patients whose data are maintained in this system. CMS will collect only that information necessary to perform the system's functions. In addition, CMS will make disclosure from the proposed system only with consent of the subject individual, or his/her legal representative, or in accordance with an applicable exception provision of the Privacy Act. CMS, therefore, does not anticipate an unfavorable effect on individual privacy as a result of information relating to individuals.

Dated: August 7, 2007.

Charlene Frizzera,

Chief Operating Officer, Centers for Medicare & Medicaid Services.

SYSTEM NO.:

09–70–0531.

SYSTEM NAME:

''National Emphysema Treatment Trial (NETT),'' HHS/CMS/OCSQ.

SECURITY CLASSIFICATION:

Level Three Privacy Act Sensitive Data.

SYSTEM LOCATION:

CMS Data Center, 7500 Security Boulevard, North Building, First Floor, Baltimore, Maryland 21244–1850 and at various other contractor locations.

CATEGORIES OF INDIVIDUALS COVERED BY THE SYSTEM:

This system will collect and maintain individually identifiable and other data collected on Medicare beneficiaries and providers participating in the study.

CATEGORIES OF RECORDS IN THE SYSTEM:

Data will be collected from Medicare administrative and claims records, patient medical charts, physician records, and via survey instruments administered to beneficiaries and providers. The collected information will include, but is not limited to Medicare claims and eligibility data, name, address, telephone number, health insurance claims number, race/ethnicity, gender, date of birth, provider name, unique provider identification number, medical record number, as well as clinical, demographic, health/well-being, family and/or caregiver contact information, and background information relating to Medicare issues.

AUTHORITY FOR MAINTENANCE OF THE SYSTEM:

The statutory authority for this system is given under the provisions of Section 1862(a)(1)(A) of the Social Security Act, and 42 U.S.C. 1395, which states that Medicare must provide coverage for items and services that are ''reasonable and necessary for the diagnosis or treatment of illness or injury or to improve the functioning of a malformed body member.''

PURPOSE(S) OF THE SYSTEM:

The primary purpose of the system of records is to collect and maintain data that will allow CMS to provide secure data on participants in the randomized phase of the study, pay claims, and to monitor and evaluate the clinical trial. Information retrieved from this system of records will also be disclosed to: (1) Support regulatory, reimbursement and policy functions performed within the agency or by a contractor, consultant, or CMS grantee; (2) assist another Federal or state agency to enable such agency to administer a Federal health benefits program, or to enable such agency to fulfill a requirement of a Federal statute or regulation that implements a health benefits program funded in whole or in part with Federal funds; (3) support research, evaluation, or epidemiological projects related to the prevention of disease or disability, or the restoration or maintenance of health, and for payment related projects; (4) support litigation involving the agency; and (5) combat fraud, waste, and abuse in certain health benefits programs.

ROUTINE USES OF RECORDS MAINTAINED IN THE SYSTEM, INCLUDING CATEGORIES OR USERS AND THE PURPOSES OF SUCH USES:

A. The Privacy Act allows us to disclose information without an individual's consent if the information is to be used for a purpose that is compatible with the purpose(s) for which the information was collected. Any such compatible use of data is known as a ''routine use.'' The proposed routine uses in this system meet the

compatibility requirement of the Privacy Act. We are proposing to establish the following routine use disclosures of information maintained in the system:

1. To agency contractors, consultants or CMS grantees, who have been engaged by the agency to assist in the performance of a service related to this collection and who need to have access to the records in order to perform the activity.

2. To another Federal or state agency to:

a. contribute to the accuracy of CMS's proper payment of Medicare benefits;

b. enable such agency to administer a Federal health benefits program, or, as necessary, to enable such agency to fulfill a requirement of a Federal statute or regulation that implements a health benefits program funded in whole or in part with Federal funds; and/or

c. assist Federal/state Medicaid programs within the state.

3. To an individual or organization for a research project or in support of an evaluation project related to the prevention of disease or disability, the restoration or maintenance of health, or payment related projects.

4. To the Department of Justice (DOJ), court or adjudicatory body when:

a. the agency or any component thereof, or

b. any employee of the agency in his or her official capacity, or

c. any employee of the agency in his or her individual capacity where the DOJ has agreed to represent the employee, or

d. the United States Government, is a party to litigation or has an interest in such litigation, and, by careful review, CMS determines that the records are both relevant and necessary to the litigation and that the use of such records by the DOJ, court or adjudicatory body is compatible with the purpose for which the agency collected the records.

5. To a CMS contractor (including, but not necessarily limited to, fiscal intermediaries and carriers) that assists in the administration of a CMS-administered health benefits program, or to a grantee of a CMS-administered grant program, when disclosure is deemed reasonably necessary by CMS to prevent, deter, discover, detect, investigate, examine, prosecute, sue with respect to, defend against, correct, remedy, or otherwise combat fraud, waste, and abuse in such program.

6. To another Federal agency or to an instrumentality of any governmental jurisdiction within or under the control of the United States (including any State or local governmental agency), that administers, or that has the authority to investigate potential fraud or abuse in, a health benefits program funded in whole or in part by Federal funds, when disclosure is deemed reasonably necessary by CMS to prevent, deter, discover, detect, investigate, examine, prosecute, sue with respect to, defend against, correct, remedy, or otherwise combat fraud, waste, and abuse in such programs.

B. Additional Provisions Affecting Routine Use Disclosures

To the extent this system contains Protected Health Information (PHI) as defined by HHS regulation ''Standards for Privacy of Individually Identifiable Health Information'' (45 CFR Parts 160 and 164, Subparts A and E) 65 FR 82462 (12–28–00). Disclosures of such PHI that are otherwise authorized by these routine uses may only be made if, and as, permitted or required by the ''Standards for Privacy of Individually Identifiable Health Information.'' (See 45 CFR 164–512 (a) (1).)

In addition, our policy will be to prohibit release even of data not directly identifiable, except pursuant to one of the routine uses or if required by law, if we determine there is a possibility that an individual can be identified through implicit deduction based on small cell sizes (instances where the patient population is so small that individuals could, because of the small size, use this information to deduce the identity of the beneficiary).

POLICIES AND PRACTICES FOR STORING, RETRIEVING, ACCESSING, RETAINING, AND DISPOSING OF RECORDS IN THE SYSTEM:

STORAGE:

All records are stored on electronic media.

RETRIEVABILITY:

The collected data are retrieved by an individual identifier; e.g., beneficiary name or HICN, and unique provider identification number.

SAFEGUARDS:

CMS has safeguards in place for authorized users and monitors such users to ensure against unauthorized use. Personnel having access to the system have been trained in the Privacy Act and information security requirements. Employees who maintain records in this system are instructed not to release data until the intended recipient agrees to implement appropriate management, operational and technical safeguards sufficient to protect the confidentiality, integrity and availability of the information and information systems and to prevent unauthorized access.

This system will conform to all applicable Federal laws and regulations and Federal, HHS, and CMS policies and standards as they relate to information security and data privacy. These laws and regulations may apply but are not limited to: The Privacy Act of 1974; the Federal Information Security Management Act of 2002; the Computer Fraud and Abuse Act of 1986; the Health Insurance Portability and Accountability Act of 1996; the E-Government Act of 2002, the Clinger-Cohen Act of 1996; the Medicare Modernization Act of 2003, and the corresponding implementing regulations. OMB Circular A–130, Management of Federal Resources, Appendix III, Security of Federal Automated Information Resources also applies. Federal, HHS, and CMS policies and standards include but are not limited to: All pertinent National Institute of Standards and Technology publications; the HHS Information Systems Program Handbook and the CMS Information Security Handbook.

RETENTION AND DISPOSAL:

CMS will retain information for a total period not to exceed 25 years. All claims-related records are encompassed by the document preservation order and will be retained until notification is received from DOJ.

SYSTEM MANAGER AND ADDRESS:

Director, Division of Medical and Surgical Services, Coverage and Analysis Group, Office of Clinical Standards and Quality, CMS, Room C4–10–10, 7500 Security Boulevard, Baltimore, Maryland 21244–1850.

NOTIFICATION PROCEDURE:

For purpose of access, the subject individual should write to the system manager who will require the system name, employee identification number, tax identification number, national provider number, and for verification purposes, the subject individual's name (woman's maiden name, if applicable), HICN, and/or SSN (furnishing the SSN is voluntary, but it may make searching for a record easier and prevent delay).

RECORD ACCESS PROCEDURE:

For purpose of access, use the same procedures outlined in Notification Procedures above. Requestors should also reasonably specify the record contents being sought. (These procedures are in accordance with Department regulation 45 CFR 5b.5 (a) (2).)

CONTESTING RECORD PROCEDURES:

The subject individual should contact the system manager named above, and reasonably identify the record and specify the information to be contested.

State the corrective action sought and the reasons for the correction with supporting justification. (These procedures are in accordance with Department regulation 45 CFR 5b.7.)

RECORDS SOURCE CATEGORIES:

The data collected and maintained in this system are retrieved from Medicare enrollment records, Medicare beneficiaries or proxies, and medical providers (such as physicians, medical facilities, home health care providers) for a sample of enrollees.

SYSTEMS EXEMPTED FROM CERTAIN PROVISIONS OF THE ACT:

None.

[FR Doc. 07–4076 Filed 8–21–07; 8:45 am]

BILLING CODE 4120–03–P

DEPARTMENT OF HEALTH AND HUMAN SERVICES

Administration for Children and Families

Proposed Information Collection Activity; Comment Request

Proposed Projects:

Title: National Survey of Child and Adolescent Well-Being—Second Cohort (NSCAW II).

OMB No.: 0970–0202.

Description: The Department of Health and Human Services (HHS) intends to collect data on a new sample of children and families for the National Survey of Child and Adolescent Well-Being (NSCAW). The NSCAW was authorized under Section 427 of the Personal Responsibility and Work Opportunities Reconciliation Act of 1996. The original survey began in November 1999 with a national sample of 5,501 children, ages 0–14, who had been the subject of investigation by Child Protective Services during the baseline data collection period, which extended from November 1999 through April 2000. Direct assessments and interviews were conducted with the children themselves, their primary caregivers, their caseworkers, and, for school-aged children, their teachers; agency directors also were interviewed at baseline. Follow-up data collections were conducted 12 months, 18 months, and 36 months post-baseline, and a fifth data collection is currently under way.

The NSCAW is the only source of nationally representative, firsthand information about the functioning and well-being, service needs, and service utilization of children and families who come to the attention of the child welfare system. Information is collected about children's cognitive, social, emotional, behavioral, and adaptive functioning, as well as family and community factors that are likely to influence their functioning. Family service needs and service utilization also are addressed in the data collection.

The current data collection plan calls for selecting a new cohort of 5,700 children and families and repeating the data collection procedures used in the original study. Selection of a new cohort will allow the comparison of characteristics of children who are entering the child welfare system today with those who entered prior to the implementation of the Adoption and Safe Families Act and prior to the advent of the Child and Family Services Review process. The data collection will follow the same format as that used in previous rounds of data collection, and will employ, with only modest revisions, the same instruments that have been used in previous rounds.

Currently, HHS intends to collect baseline data and one follow-up 18 months later, with future follow-up rounds contingent on funding availability. Data from NSCAW are made available to the research community through licensing arrangements from the National Data Archive on Child Abuse and Neglect at Cornell University.

Respondents: 5,700 Children and their associated permanent or foster caregivers, caseworkers, and teachers; in addition, an administrator will be interviewed in each location from which children are sampled.

ANNUAL BURDEN ESTIMATES

Instrument	Number of respondents	Number of responses per respondent	Average burden hours per response	Total burden hours
Child Interview	5,700	1	1.2	6,840
Permanent Caregiver Interview	3,800	1	2.0	7,600
Foster Caregiver Interview	1,990	1	1.5	2,985
Caseworker Interview	5,700	1	1.0	5,700
Teacher Questionnaire	3,000	1	.75	2,250
Agency Questionnaire	97	1	1.0	97

Estimated Total Annual Burden Hours: 25,472.

In compliance with the requirements of Section 506(c)(2)(A) of the Paperwork Reduction Act of 1995, the Administration for Children and Families is soliciting public comment on the specific aspects of the information collection described above. Copies of the proposed collection of information can be obtained and comments may be forwarded by writing to the Administration for Children and Families, Office of Administration, Office of Information Services, 370 L'Enfant Promenade, SW., Washington, DC 20447, Attn: ACF Reports Clearance Officer. E-mail address: *infocollection@acf.hhs.gov.* All requests should be identified by the title of the information collection.

The Department specifically requests comments on: (a) Whether the proposed collection of information is necessary for the proper performance of the functions of the agency, including whether the information shall have practical utility; (b) the accuracy of the agency's estimate of the burden of the proposed collection of information; (c) the quality, utility, and clarity of the information to be collected; and (d) ways to minimize the burden of the collection of information on respondents, including through the use of automated collection techniques or other forms of information technology. Consideration will be given to comments and suggestions submitted within 60 days of this publication.

Dated: August 15, 2007.

Brendan C. Kelly,

Reports Clearance Officer.

Food and Drug Administration

[Docket No. 2007N–0321]

Agency Information Collection Activities; Proposed Collection; Comment Request; Experimental Evaluation of the Impact of Distraction on Consumer Understanding of Risk and Benefit Information in Direct-to-Consumer Prescription Drug Broadcast Advertisements

AGENCY: Food and Drug Administration, HHS.

ACTION: Notice.

SUMMARY: The Food and Drug Administration (FDA) is announcing an opportunity for public comment on a proposed collection of certain information by the agency. Under the Paperwork Reduction Act of 1995 (the PRA), Federal Agencies are required to publish notice in the **Federal Register** concerning each proposed collection of information, including each proposed extension of an existing collection of information, and to allow 60 days for public comment in response to the notice. This notice solicits comments on a study of consumer evaluations of variations in communicating risk information in direct-to-consumer (DTC) prescription drug broadcast advertisements.

DATES: Submit written or electronic comments on the collection of information by October 22, 2007.

ADDRESSES: Submit electronic comments on the collection of information to: *http://www.fda.gov/dockets/ecomments* or *http://www.regulations.gov*. Submit written comments on the collection of information to the Division of Dockets Management (HFA–305), Food and Drug Administration, 5630 Fishers Lane, rm. 1061, Rockville, MD 20852. All comments should be identified with the docket number found in brackets in the heading of this document.

FOR FURTHER INFORMATION CONTACT: Elizabeth Berbakos, Office of the Chief Information Officer (HFA–250), Food and Drug Administration, 5600 Fishers Lane, Rockville, MD 20857, 301–827–1482.

SUPPLEMENTARY INFORMATION:

I. Background

Under the PRA (44 U.S.C. 3501–3520), Federal agencies must obtain approval from the Office of Management and Budget (OMB) for each collection of information they conduct or sponsor. ''Collection of information'' is defined in 44 U.S.C. 3502(3) and 5 CFR 1320.3(c) and includes agency requests or requirements that members of the public submit reports, keep records, or provide information to a third party. Section 3506(c)(2)(A) of the PRA (44 U.S.C. 3506(c)(2)(A)) requires Federal agencies to provide a 60-day notice in the **Federal Register** concerning each proposed collection of information, including each proposed extension of an existing collection of information, before submitting the collection to OMB for approval. To comply with this requirement, FDA is publishing notice of the proposed collection of information set forth in this document.

With respect to the following collection of information, FDA invites comments on these topics: (1) Whether the proposed collection of information is necessary for the proper performance of FDA's functions, including whether the information will have practical utility; (2) the accuracy of FDA's estimate of the burden of the proposed collection of information, including the validity of the methodology and assumptions used; (3) ways to enhance the quality, utility, and clarity of the information to be collected; and (4) ways to minimize the burden of the collection of information on respondents, including through the use of automated collection techniques, when appropriate, and other forms of information technology.

Experimental Evaluation of the Impact of Distraction on Consumer Understanding of Risk and Benefit Information in DTC Prescription Drug Broadcast Advertisements

Section 1701(a)(4) of the Public Health Service Act (42 U.S.C. 300u(a)(4)) authorizes FDA to conduct research relating to health information. Section 903(b)(2)(c) of the Federal Food, Drug, and Cosmetic Act (the act) (21 U.S.C. 393(b)(2)(c)) authorizes FDA to conduct research relating to drugs and other FDA regulated products in carrying out the provisions of the act.

FDA regulations require that advertisements that make claims about a prescription drug include a ''fair balance'' of information about the benefits and risks of advertised products, in terms of both content and presentation. Ads can present information in ways that can optimize or skew the relative balance of risks and benefits. Both healthcare providers and consumers have expressed concerns to FDA about the effectiveness of its regulation of manufacturers' DTC prescription drug advertising, especially as it relates to assuring balanced communication of risks compared with benefits.

One characteristic of DTC television broadcast ads is the use of compelling visuals. Many assert that the visuals present during the product risk presentation are virtually always positive in tone and often depict product benefits. A consistently raised question is whether advertising visuals of benefits interferes with consumers' understanding and processing of the risk information in the ad's audio or text.

The purpose of the proposed study is, in part, to determine whether the use of competing, compelling visual information about potential drug benefits interferes with viewers' processing and comprehension of risk information about drugs in DTC advertising or with their cognitive representations of the drugs. Positive visual images could influence the processing of risk-related information and the final representation of the advertised drug in multiple ways. First, compelling visuals could simply distract consumers from carefully considering and encoding the risk information. To the extent that compelling visuals cause them to attend to or to process risk information less, participants exposed to risk information with simultaneous compelling positive visuals should recall fewer risks (and perhaps fewer benefits) than do participants exposed to the risk information without the positive visuals. Second, compelling visuals may affect the way consumers think about the brand, specifically their attitudes toward the advertised brand (Ref. 1). An attitude is simply an association between an object and a degree of positivity or negativity. Attitudes can be important determinants of behavior; in some contexts, they may have more impact than factual information. That is, under many circumstances, people rely much less on facts that they know, such as the number of risks associated with ibuprofen, and much more on general feelings they have, such as strong positivity toward Advil. Compelling visuals in DTC advertising have the potential to lead a consumer to form a positive opinion of a drug for no other reason than that it is presented in the same context as positive images.

Another purpose of the present study is to examine the role of textual elements in the processing of risk information. Sponsors often place superimposed text (''supers'') onto the screen to clarify spoken information or to provide extra information that is not included in the audio. For example, information such as adequate provision

statements (''See our ad in...'') and limits to indication statements may appear. This text potentially has the power to distract viewers from the more important audio information, although only if viewers pay attention to the text. Likewise, providing verbatim repetition of the audio risks in text format may facilitate the processing of the risks. We will examine the added distraction or facilitation of the text in the present study in addition to the role of visual information.

We have limited data about how consumers perceive risk and benefit information in DTC broadcast ads as a function of exposure to different content and presentations. Therefore, we do not fully understand the influence of visual and textual factors on the conveyance of a balanced picture of the product.

This study will investigate the impact of visual distraction and the interplay of different sensory modalities (verbal, visual) used to present risk and benefit information during a television prescription drug advertisement. Data from this study will provide useful information to help improve how broadcast ads present a prescription drug's risks and benefits.

Design: This study will employ a between-subjects crossed 3 x 3 factorial design with two independent variables. The first independent variable represents the consistency of the disclosure of risk information between the audio and text (superimposed text, or ''supers'') portions of television ads. It will have three conditions: ''Reinforcing'' text, ''competing'' text, and a ''control'' condition with no text. We define ''reinforcing'' text as a verbatim repetition of the audio risk; ''competing'' text will include contextual information for understanding usage and will not contain risk or benefit information. The second independent variable is the consistency of background visuals with the audio presentation of risk information. It will have three conditions: Consistent visuals, neutral visuals, and inconsistent visuals.

Participants: Data will be collected using a mall-intercept protocol in multiple locations across the continental United States. Consumers over the age of 40 will be screened and recruited by the contractor to represent a range of education levels (some college or less vs. completed college or more). Because the task presumes basic reading abilities, all selected participants must speak English as their primary language and have reading glasses available as needed. In addition, due to the nature of one of our measures requiring a set of neutral stimuli, which we have designated as Chinese characters, it will be necessary for us to eliminate individuals who can read Chinese.

We chose to limit our investigation to one disease condition: High blood pressure. High blood pressure remains a significant public health concern but because there is little DTC promotion for high blood pressure treatment, participants should be less familiar with television ads for these types of drugs, reducing the potential influence of prior experience. Further, many older people have or are at risk for high blood pressure, which should facilitate recruitment.

Procedure: Participants will be shown one DTC ad for high blood pressure. Then a structured interview will be conducted with each participant to examine a number of important perceptions about the advertised product, including perceived riskiness of the drug, comprehension of risk and benefit information, perceived balance of risk and benefit information, and attitudes toward the drug product.

Because attitudes are often a strong determinant of behavior, we will investigate this dependent variable in two ways. First, we will use an implicit measure to determine whether participants have an overall positive or negative attitude toward the drug product. Implicit measurement of attitudes is a relatively new but well-validated process for understanding people's feelings toward particular entities (Ref. 1). The Affect Misattribution Procedure, in which participants are asked to respond to neutral characters (such as Chinese symbols) after viewing pictures of the object of interest, has been validated as an unobtrusive way to attain these measures. We expect attitudes toward the drug product to vary depending on each participant's experimental condition (i.e., whether they have adequately processed the risk information or not). This implicit method will be conducted after participants see the broadcast ad but before they are asked any other questions that might influence their responses. Second, we will assess attitudes and behavioral intentions using more traditional explicit measures, i.e. asking participants directly. Including both types of measures will allow us to further validate these measures in a DTC context.

Finally, demographic and health care utilization information will be collected. The entire procedure is expected to last approximately 15 minutes. A total of 1,020 interviews will be completed. This will be a one-time (rather than annual) information collection.

FDA estimates the burden of this collection of information as follows:

FDA estimates that 2,000 individuals will need to be screened to obtain a respondent sample of 1,020 for the study. The screener is expected to take 30 seconds, for a total screener burden of 16 hours. The 1,020 respondents in the study will then be asked to respond to a series of questions about the advertisement. The ad viewing and questionnaire are expected to take 15 minutes, for a study burden of 255 hours. The estimated total burden for this data collection effort is 271 hours. The respondent burden is provided in table 1 of this document:

TABLE 1.—ESTIMATED ANNUAL REPORTING BURDEN[1]

No. of Respondents	Annual Frequency per Response	Total Annual Responses	Hours per Response	Total Hours
2,000 (screener)	1	2,000	.008	16
1,020 (study)	1	1,020	.25	255
Total				271

[1]There are no capital costs or operating and maintenance costs associated with this collection of information.

DEPARTMENT OF HEALTH AND HUMAN SERVICES

Substance Abuse and Mental Health Services Administration

Agency Information Collection Activities: Submission for OMB Review; Comment Request

Periodically, the Substance Abuse and Mental Health Services Administration (SAMHSA) will publish a summary of information collection requests under OMB review, in compliance with the Paperwork Reduction Act (44 U.S.C. Chapter 35). To request a copy of these documents, call the SAMHSA Reports Clearance Officer on (240) 276–1243.

Project: Independent Evaluation of the Community Mental Health Services Block Grant Program—NEW

The Substance Abuse and Mental Health Services Administration (SAMHSA), the Center for Mental Health Services (CMHS) administers the Community Mental Health Services Block Grant (CMHS BG). The Community Mental Health Services Block Grant was funded by Congress to develop community-based systems of care for adults with serious mental illness (SMI) and children with severe emotional disorders (SED), and has been the largest Federal program dedicated to improving community mental health services. States have latitude in determining how to spend their funds to support services for adults with SMI and children with SED. The only requirements outlined in the authorizing legislation for State receipt of CMHS BG funds are provisions to increase children's services, create a State mental health planning council, and to develop a State mental health plan to be submitted to the Secretary of Health and Human Services (HHS). The State mental health planning council is to comprise various State constituents including providers, administrators, and mental health services consumers. Each State plan must:

- Provide for the establishment and implementation of an organized community-based system of care for individuals with mental illness.
- Estimate the incidence and prevalence of adults with SMI and children with SED within the State.
- Provide for a system of integrated services appropriate for the multiple needs of children.
- Provide for outreach to and services for rural and homeless populations.
- Describe the financial and other resources necessary to implement the plan and describe how the CMHS BG funds are to be spent.

In addition, Congress included a maintenance-of-effort (MOE) requirement that a State's expenditures for community mental health services be no less than the average spent in the two preceding fiscal years.

The CMHS BG received an adequate rating on the OMB PART in 2003. Clearly in the follow up period to that assessment, one of the critical areas that must be addressed is the expectation that an independent and objective evaluation of the program is to be carried out initially and at regular intervals. In addition, the program evaluation has been designed to be of high quality, sufficient scope and unbiased (with appropriate documentation for each of these elements). In fact it is in addressing an evaluation of the program that critical elements of accountability and program performance are also identified and initially assessed. The rigor of the evaluation is seen in how it addresses the effectiveness of the program's impact with regard to its mission and long term goals. By legislative design the CMHS BG Program has previously focused on legislative compliance. Now it addresses the impact of the program nationally, over time, with a view to coming to terms with identified program deficiencies and the corresponding impact of proposed changes.

In this evaluation, a multi-method evaluation approach is being used to examine Federal and State performance with regard to the CMHS BG and its identified goals. This approach emphasizes a qualitative and quantitative examination of both the CMHS BG *process* (e.g., activities and outputs in the logic model) and system-level *outcomes* whereby Federal and State stakeholder perspectives on the CMHS BG, as captured through semi-structured interviews and surveys, are

corroborated and compared to the considerable amount of already-collected source documents provided by States and CMHS (e.g., State plans, implementation reports, review summaries and monitoring site visit reports). More specifically, data collection will be conducted using four primary strategies: interviews and surveys of key stakeholders, data abstraction from source documents (i.e., CMHS BG applications and implementation reports), secondary data analysis (e.g., analysis of Uniform Reporting System (URS) data and National Outcome Measures (NOMS), and case studies highlighting important themes and issues relating to State CMHS BG implementation.

This evaluation is also seeking to measure the effectiveness of the CMHS BG through a variety of infrastructure indicators and NOMS measures. Infrastructure refers to the resources, systems, and policies that support the nation's public mental health service delivery system, and is a potential contributor to significant State behavioral health system outcomes. Examples of infrastructure include staff training, consumer involvement in the State mental health system, policy changes, and service availability. Outcomes related to infrastructure and the NOMS were included in the program logic model that has been developed and are expected to be examined through the data collection strategies listed above.

Infrastructure indicators that can be measured in this evaluation, for which some form of data can be collected include:

- Range of available services within a State.
- Capacity (No. of persons served).
- Specialized services (such as co-occurring disorders).
- Number of persons served by evidence-based practices (EBPs).
- Staff credentialing (identify patterns).
- Program accreditation (as a quality marker).
- Staff/workforce development (TA & training available for State staff).
- Connections with other agencies (e.g., MOUs, joint funding, joint appointments).
- Policy changes initiated.
- Policy changes completed.
- Consumer involvement.

Two data collection strategies will be used for this evaluation: Two (2) open-ended interviews and four (4) Web-based surveys. Interviews will be conducted with Federal staff involved in the administration of the CMHS BG and State staff from all States and Territories involved in their State's implementation of the CMHS BG program. The two interview guides, one for Federal staff and one for State staff, range from 54 to 94 open-ended questions. The Federal staff interview is expected to take one hour to complete while the State staff interview is expected to take two hours on average to complete, and can be done over two sessions. Because of the relatively small number of Federal and State staff participating in the evaluation, interviews are an optimal data collection strategy to gather the extensive qualitative data needed for the evaluation while minimizing reporting burden. Federal staff stakeholders will be interviewed in person due to their close proximity to the interviewers and State staff stakeholder interviews will be conducted via conference call. State Mental Health Agency (SMHA) Commissioners will select those State staff who are knowledgeable about the CMHS BG for participation in the interviews. It is anticipated that, at a minimum, a State Planner, State Data Analyst, and the SMHA Commissioner will participate.

The four (4) Web-based surveys will be distributed nationally to State Planning Council Chairs, State Planning Council Members, CMHS BG Regional Reviewers, and CMHS BG Monitoring Site Visitors. The Web-based surveys will be tailored so that each of the four different stakeholder groups will receive survey questions designed to capture their specific knowledge of and experience with the CMHS BG. It is estimated that any one individual stakeholder will require one hour to complete their own survey, which contains a range of 22 to 42 mostly fill-in-the blank type questions. Each member of the four major stakeholder groups will submit their responses to the survey online over a three-week period.

Table 1 summarizes the estimate of the total time burden to Federal and State staff stakeholders resulting from the interviews. Table 2 summarizes the estimate of the total time burden to Planning Council members, Regional Reviewers, and Monitoring Site Visitors resulting from completion of the web-based surveys. Table 3 summarizes the total reporting burden for all data collection strategies.

TABLE 1.—ESTIMATED REPORTING BURDEN OF INTERVIEWS

Respondent	Number of respondents	Average hours per interview	Estimated total burden (hours)
State Mental Health Agency Commissioner	59	3.5	206.5
State Planners	59	3.5	206.5
State Data Analysts	59	3.5	206.5
Federal CMHS Block Grant Staff	20	1	20
Total Burden	197	.....	639.5

TABLE 2.—ESTIMATED REPORTING BURDEN OF WEB-BASED SURVEYS

Respondent	Number of respondents	Average hours per survey	Estimated total burden (hours)
Planning Council Members	2000	1	2000
Regional Block Grant Reviewers	35	1	35
Monitoring Site Visitors	28	1	28
Total Burden	2,063	.....	2,063

TABLE 3.—ESTIMATED REPORTING BURDEN OF ALL DATA COLLECTION STRATEGIES

Data collection strategy	Estimated total burden (hours)
Interviews	639.5
Web-based Surveys	2,063
Total Burden	2,702.5

Written comments and recommendations concerning the proposed information collection should be sent by September 21, 2007 to: SAMHSA Desk Officer, Human Resources and Housing Branch, Office of Management and Budget, New Executive Office Building, Room 10235, Washington, DC 20503; due to potential delays in OMB's receipt and processing of mail sent through the U.S. Postal Service, respondents are encouraged to submit comments by fax to: 202–395–6974.

Dated: August 13, 2007.

Elaine Parry,

Acting Director, Office of Program Services.

DEPARTMENT OF HEALTH AND HUMAN SERVICES

Substance Abuse and Mental Health Services Administration

Agency Information Collection Activities: Proposed Collection; Comment Request

In compliance with Section 3506(c)(2)(A) of the Paperwork Reduction Act of 1995 concerning opportunity for public comment on proposed collections of information, the Substance Abuse and Mental Health Services Administration (SAMHSA) will publish periodic summaries of proposed projects. To request more information on the proposed projects or to obtain a copy of the information collection plans, call the SAMHSA Reports Clearance Officer on (240) 276–1243.

Comments are invited on: (a) Whether the proposed collections of information are necessary for the proper performance of the functions of the agency, including whether the information shall have practical utility; (b) the accuracy of the agency's estimate of the burden of the proposed collection of information; (c) ways to enhance the quality, utility, and clarity of the information to be collected; and (d) ways to minimize the burden of the collection of information on respondents, including the use of automated collection techniques or other forms of information technology.

Proposed Project: Cross-Site Evaluation of the Minority Substance Abuse/HIV/Hepatitis Prevention Program—NEW

The cross-site evaluation builds on five previous grant programs funded by SAMHSA's Center for Substance Abuse Prevention (CSAP) to provide HIV prevention services for minority populations. The first two were planning grant programs and the last three were service grant programs. HIV Cohort 1 and HIV Cohort 2 funded 2-year planning grants in FY 2000 and FY 2001 respectively. HIV Cohort 3 funded 48 3-year grants in FY 2002, HIV Cohort 4 funded 22 5-year grants in FY 2003 and HIV Cohort 5 funded 46 4-year grants in FY 2004. The goals for the Cohort 3–5 grants were to add, increase, or enhance integrated substance abuse (SA) and HIV prevention services by providing supportive services and strengthening linkages between service providers for at-risk minority populations. The HIV Cohort 1–3 grants previously received OMB clearance No. 0930–0208.

The current HIV Cohort 6 Minority SA/HIV/Hepatitis Prevention Program funded 81 5-year grants in FY 2005 to community based organizations that are required to address the SAMSHA Strategic Prevention Framework (SPF) and participate in this cross-site evaluation. The grantees are expected to provide leadership and coordination on the planning and implementation of the SPF that targets minority populations and the minority reentry population in communities of color with high prevalence of SA, HIV/AIDS, and Hepatitis. The primary objectives of the cross-site evaluation are to: (1) Assess the process of adopting and implementing the SPF with the target populations; (2) measure the effectiveness of specified intervention strategies such as cultural enrichment activities, educational and vocational services; and/or computer-based curricula; and (3) determine the success of the program in delaying, preventing, and/or reducing the use of alcohol, tobacco, and other drugs (ATOD) among the target populations. The grantees are expected to provide an effective prevention process, direction, and a common set of goals, expectations, and accountabilities to be adapted and integrated at the community level. While the grantees have substantial flexibility in choosing their individual evidence-based programs, they are all required to base them on the five steps of the SPF to build service capacity specific to SA, HIV, and Hepatitis prevention services. In FY 2006, all the grantees initiated Steps 1–3 of the SPF, namely conducting a needs assessment, building capacity, and planning how to implement their projects. Once their plans have been approved by their Project Officers they can proceed to Step 4 (implementation) and Step 5 (evaluation). Conducting this cross-site evaluation will assist SAMHSA/CSAP in promoting and disseminating optimally effective prevention programs.

Grantees must also conduct ongoing monitoring and evaluation of their projects to assess program effectiveness including Federal reporting of the Government Performance and Results Act (GPRA) of 1993, the Performance Assessment Rating Tool (PART), SAMHSA/CSAP National Outcome Measures (NOMs), and HIV Counseling and Testing. All of this information will be collected through self-report questionnaires administered to program participants. All grantees will use two instruments, one for youth aged between 12 and 17 and one for adults aged 18 and older. These instruments include baseline, exit and 3–6 month follow-up (post-exit) questionnaires related to GPRA and NOMs augmented by questions pertaining to HIV and Hepatitis. While the GPRA and NOMs measures have already been approved by OMB (OMB No. 0930–0230), the remaining HIV and Hepatitis-related questions have not, hence this data collection. Each questionnaire contains 135 questions, of which 102 relate to HIV and Hepatitis.

Sample size, respondent burden, and intrusiveness have been minimized to be consistent with the cross-site objectives. Procedures are employed to safeguard the privacy and confidentiality of participants. Every effort has been made to coordinate cross-site data collection with local data collection efforts in an attempt to minimize respondent burden.

The cross-site evaluation results will have significant implications for the substance abuse, HIV/AIDS and Hepatitis prevention fields, the allocation of grant funds, and other evaluation activities conducted by multiple Federal, State, and local government agencies. They will be used to develop Federal policy in support of SAMHSA/CSAP program initiatives, inform the public of lessons learned and findings, improve existing programs, and promote replication and dissemination of effective prevention strategies.

The following table shows the estimated annualized burden for data collection.

Response type	Number of respondents	Responses/ respondent	Average burden/ response (hours.)	Average annual burden hours.
Youth	3,400	3	.83	8,466
Adults	3,400	3	.83	8,466
Total	6,800	n/a	n/a	16,932

n/a—Not Applicable.

DEPARTMENT OF HEALTH AND HUMAN SERVICES

Substance Abuse and Mental Health Services Administration

Agency Information Collection Activities: Proposed Collection; Comment Request

In compliance with section 3506(c)(2)(A) of the Paperwork Reduction Act of 1995 concerning opportunity for public comment on proposed collections of information, the Substance Abuse and Mental Health Services Administration will publish periodic summaries of proposed projects. To request more information on the proposed projects or to obtain a copy of the information collection plans, call the SAMHSA Reports Clearance Officer on (240) 276–1243.

Comments are invited on: (a) Whether the proposed collections of information are necessary for the proper performance of the functions of the agency, including whether the information shall have practical utility; (b) the accuracy of the agency's estimate of the burden of the proposed collection of information; (c) ways to enhance the quality, utility, and clarity of the information to be collected; and (d) ways to minimize the burden of the collection of information on respondents, including through the use of automated collection techniques or other forms of information technology.

Proposed Project: SAMHSA/CMHS Initiative To Evaluate Mental Health Transformation: 9 State Incentive Grants—NEW

The Substance Abuse and Mental Health Services Administration (SAMHSA), Center for Mental Health Services (CMHS), has funded an Initiative to help grantees transform their mental health and related service systems. Mental Health Transformation State Incentive Grants (MHT SIG) awards were made to 9 States: Connecticut, Hawaii, Maryland, Missouri, New Mexico, Ohio, Oklahoma, Texas and Washington. Associated with this project is an OMB-required independent evaluation of the program.

With input from CMHS staff, MHT SIG State representatives and consumer and family member consultants, a set of data collection instruments has been identified or created for the cross-site evaluation project. The following survey instruments will be used: (1) A recovery measure for adults, (2) a resilience measure for youth, (3) a system measure on orientation towards recovery, (4) a leadership survey, (5) mental health provider interview guide, (6) GPRA data collection, and (7) consumer/family member focus group facilitation guide/ interview guide. Grantees will be allowed to use recovery, resilience and system orientation instruments of their choice as long as it meets identified CMHS criteria. Discretionary grant NOMs questions which have already received OMB approval (No. 0930–0285) will be used along with the recovery and resilience instruments selected by the States. In addition, during site visits, one each of the following State staff will be interviewed using a uniquely developed discussion guide: MHT SIG Project Director; MHT SIG Transformation Working Group Chair; director or senior staff of the mental health, Medicaid, criminal/ juvenile justice, education, employment, housing agencies. Phone interview also will be conducted using uniquely developed discussion guides with Project Directors to determine the cost impact of the MHT SIG grant in their State.

GPRA data will be submitted annually by the grantees into a database hosted on a password-protected Web extranet site. The recovery, resilience and system recovery orientation data for non-impacted and impacted consumer groups will be collected by the grantees at two points: baseline and twelve months. During grants years 3 and 5, consumer/family member focus groups/ interviews, leadership surveys, and State agency staff interviews will be done. During grant years 3 through 5, mental health provider interviews will be done.

The resulting data will help the cross site evaluation: (1) Determine the extent to which mental health systems have become recovery-oriented, (2) determine the extent to which transformation results in consumer recovery, (3) identify the factors contributing to successful transformation, (4) assist the MHT SIG program in satisfying GPRA requirements, (5) determine changes in client outcomes as measured by NOMs, and (6) demonstrate the cost efficiency of the MHT SIG program. The estimated annual response burden to collect this information is as follows:

Instrument	No. of grantees	No. of respondents/ grantee	Total no. of respondents	Responses/ respondent	Average burden/ response (hours)	Annual burden (hours)
YEAR 1:						
Recovery (non-impacted)	7	75	525	1	0.5	262.5

BILLING CODE 4162–20–P

DEPARTMENT OF HOMELAND SECURITY

Office of the Secretary, US–VISIT

[DHS–2007–0049]

Privacy Act of 1974; US–VISIT; Arrival and Departure Information System (ADIS) System of Records

AGENCY: Privacy Office; Department of Homeland Security.

ACTION: Privacy Act system of records notice.

SUMMARY: The Department of Homeland Security (DHS) is republishing the Privacy Act system of records notice (SORN) for the Arrival and Departure Information System (ADIS) in order to expand its authority and capability to serve additional programs that require information on individuals throughout the immigrant and non-immigrant pre-entry, entry, status management, and exit processes. These changes include the addition of a routine use to allow for sharing of information with the intelligence community in support of the DHS mission to protect the United States from potential terrorist activities; the addition of a routine use for cases of identity theft; clarification on the sources of data in ADIS, potentially including foreign governments; and a reduction of the retention period for ADIS data.

DATES: Written comments must be submitted on or before September 21, 2007

ADDRESSES: You may submit comments, identified by Docket Number DHS–2007–0049, by one of the following methods:

- *Federal e-Rulemaking Portal: http://www.regulations.gov.* Follow the instructions for submitting comments.
- *Fax:* 1–866–466–5370.

• *Mail:* Hugo Teufel, III, DHS Chief Privacy Officer, Department of Homeland Security, Washington, DC 20528.

• *Instructions:* All submissions received must include the agency name and docket number for this system of records notice. All comments received will be posted without change to *http://www.regulations.gov,* including any personal information provided.

• *Docket:* For access to the docket to read background documents or comments received go to *http://www.regulations.gov.*

FOR FURTHER INFORMATION CONTACT: Claire Miller, Acting US–VISIT Privacy Officer, U.S. Department of Homeland Security, Washington, DC 20538, by telephone (202) 298–5200 or by facsimile (202) 298–5201. For privacy issues, please contact: Hugo Teufel III (703–235–0780), Chief Privacy Officer, Privacy Office, U.S. Department of Homeland Security, Washington, DC 20528; telephone (703) 235–0780.

SUPPLEMENTARY INFORMATION: In accordance with the Privacy Act of 1974, 5 U.S.C. 552a, the Department of Homeland Security (DHS) is publishing a revision to existing Privacy Act system of records known as the Arrival and Departure Information System (ADIS). The notice for this system of records was last published in the **Federal Register** on December 12, 2003 (68 FR 69412).

ADIS is a system for the storage and use of biographic, biometric indicator, and encounter data on aliens who have applied for entry, entered, or departed the United States. ADIS consolidates information from various systems in order to provide a repository of data held by DHS for pre-entry, entry, status management, and exit tracking of immigrants and non-immigrants. Its primary use is to facilitate the investigation of subjects of interest who may have violated their immigration status by remaining in the United States beyond their authorized stay. The information is collected by, on behalf of, in support of, or in cooperation with DHS and its components and may contain personally identifiable information collected by other Federal, state, local, tribal, foreign, or international government agencies.

Information stored in ADIS may be shared with other DHS components, as well as appropriate Federal, state, local, tribal, foreign, or international government agencies. Internal and external agencies (including intelligence agencies) will have access to the full range of ADIS data once they have established that they will use the information for a purpose which is compatible with the purpose of the original collection.

This system of records notice (SORN) is primarily being revised to add a routine use to cover sharing of ADIS data with intelligence agencies in support of the DHS mission to identify and prevent acts of terrorism against the United States. Additionally, a routine use is being added to address identity theft issues. The category and sources of records sections were revised to clearly indicate that some data may come from foreign governments. Finally, the retention period is proposed to be reduced from 100 to 75 years in order to conform with other immigration-related SORNs.

Elsewhere in today's **Federal Register**, DHS has published a notice of proposed rulemaking (NPRM) to exempt portions of this system of records from one or more provisions of the Privacy Act because of criminal, civil, and administrative enforcement requirements pursuant to 5 U.S.C. 552a(j)(2) and (k)(2).

The Privacy Act embodies fair information principles in a statutory framework governing the means by which the United States Government collects, maintains, uses and disseminates personally identifiable information. The Privacy Act applies to information that is maintained in a ''system of records.'' A ''system of records'' is a group of any records under the control of an agency from which information is retrieved by the name of an individual or by some identifying number such as property address, or mailing address symbol, assigned to the individual. The ADIS is such a ''system of records.''

The Privacy Act requires each agency to publish in the **Federal Register** a description denoting the type and character of each system of records that the agency maintains, and the routine uses that are contained in each system in order to make agency recordkeeping practices transparent, to notify individuals regarding the uses to which personally identifiable information is put, and to assist individuals to more easily find such files within the agency.

In accordance with 5 U.S.C. 552a(r), DHS has provided a report of this system change to the Office of Management and Budget and to Congress.

DHS/USVISIT–001

SYSTEM NAME:

Arrival and Departure Information System (ADIS).

SYSTEM LOCATION:

Department of Homeland Security (DHS).

Categories of individuals covered by the system:

Categories of individuals covered by this notice consist of aliens who have applied for entry, entered, or departed from the United States at any time. These individuals may be in records collected by DHS or other Federal, state, local, tribal, foreign, or international government organizations. This system primarily consists of records pertaining to alien immigrants (including lawful permanent residents) and non-immigrants. Some of these individuals may change status and become United States citizens.

CATEGORIES OF RECORDS IN THE SYSTEM:

ADIS contains biographic data, biometric indicator data, and encounter data. Biographic data includes, but is not limited to, name, date of birth, nationality, and other personal descriptive data. Biometric indicator data includes, but is not limited to, fingerprint identification numbers. Encounter data provides the context of the interaction between the immigrant or non-immigrant and the border management authority. This data includes, but is not limited to, encounter location, document types, document numbers, document issuance information, and address while in the United States.

ADIS also sometimes contains commentary from immigration enforcement officers which includes references to active criminal and other immigration enforcement investigations and contains other confidential data fields used for enforcement purposes.

ADIS data may be derived from records related to entry or exit data of foreign countries collected by foreign governments in support of their respective entry and exit processes; however, records collected from foreign governments must relate to individuals who have entered or exited the United States at any time, i.e., individuals who have an existing record in ADIS.

AUTHORITY FOR MAINTENANCE OF THE SYSTEM:

6 U.S.C. 202; 8 U.S.C. 1103, 1158, 1201, 1225, 1324, 1357, 1360, 1365a, 1365b, 1372, 1379, and 1732.

PURPOSE(S):

This system of records is the primary repository of data held by DHS for near real-time entry and exit status tracking throughout the immigrant and non-immigrant pre-entry, entry, status management, and exit processes, based on data collected by DHS or other

Federal or foreign government agencies and used in connection with DHS national security, law enforcement, immigration, intelligence, and other DHS mission-related functions. Data is also used to provide associated testing, training, management reporting, planning and analysis, or other administrative purposes. Similar data may be collected from multiple sources to verify or supplement existing data and to ensure a high degree of data accuracy.

Specifically, the ADIS data will be used to identify lawfully admitted non-immigrants who remain in the United States beyond their period of authorized stay, which may have a bearing on an individual's right or authority to remain in the country or to receive governmental benefits; to assist DHS in supporting immigration inspection at ports of entry (POEs) by providing quick retrieval of biographic and biometric indicator data on individuals who may be inadmissible to the United States; and to facilitate the investigation process of individuals who may have violated their immigration status or may be subjects of interest for law enforcement or intelligence purposes.

ROUTINE USES OF RECORDS MAINTAINED IN THE SYSTEM, INCLUDING CATEGORIES OF USERS AND THE PURPOSES OF SUCH USES:

In addition to those disclosures generally permitted under 5 U.S.C. 552a(b) of the Privacy Act, all or a portion of the records or information contained in this system may be disclosed outside DHS as a routine use pursuant to 5 U.S.C. 552a(b)(3), limited by privacy impact assessments, data sharing, or other agreements, as follows:

A. To appropriate Federal, state, local, tribal, foreign, or international governmental agencies seeking information on the subjects of wants, warrants, or lookouts, or any other subject of interest, for purposes related to administering or enforcing the law, national security, or immigration, where consistent with a DHS mission-related function as determined by DHS.

B. To appropriate Federal, state, local, tribal, foreign, or international government agencies charged with national security, law enforcement, immigration, intelligence, or other DHS mission-related functions in connection with the hiring or retention by such an agency of an employee, the issuance of a security clearance, the reporting of an investigation of such an employee, the letting of a contract, or the issuance of a license, grant, loan, or other benefit by the requesting agency.

C. To an actual or potential party or to his or her attorney for the purpose of negotiation or discussion on such matters as settlement of a case or matter, or discovery proceedings.

D. To a Congressional office from the record of an individual in response to an inquiry from that Congressional office made at the request of the individual to whom the record pertains.

E. To the National Archives and Records Administration (NARA) or other Federal government agencies pursuant to records management inspections being conducted under the authority of 44 U.S.C. 2904 and 2906.

F. To contractors, grantees, experts, consultants, students, and others performing or working on a contract, service, grant, cooperative agreement, or other assignment for the Federal government, when necessary to accomplish a DHS mission function related to this system of records in compliance with the Privacy Act of 1974.

G. To appropriate agencies, entities, and persons when: (1) It is suspected or confirmed that the security or confidentiality of information in the system of records has been compromised; (2) DHS has determined that, as a result of the suspected or confirmed compromise, there is a risk of harm to economic or property interests, identity theft or fraud, or harm to the security or integrity of this system or other systems or programs (whether maintained by DHS or another agency or entity) that rely upon the compromised information; and (3) the disclosure is made to such agencies, entities, and persons who are reasonably necessary to assist in DHS's efforts to respond to the suspected or confirmed compromise and prevent, minimize, or remedy such harm.

H. To Federal, state, local, tribal, foreign or international government intelligence or counterterrorism agencies or components where DHS becomes aware of an indication of a threat or potential threat to national or international security, or where such use is to assist in anti-terrorism efforts and disclosure is appropriate to the proper performance of the official duties of the person making the disclosure.

POLICIES AND PRACTICES FOR STORING, RETRIEVING, ACCESSING, RETAINING, AND DISPOSING OF RECORDS IN THE SYSTEM:

STORAGE:

Records are stored in a central computer database.

RETRIEVABILITY:

Records may be retrieved by a variety of data elements including, but not limited to, name, place and date of arrival or departure, document number, and fingerprint identification number.

SAFEGUARDS:

Information in this system is safeguarded in accordance with applicable laws, rules, and policies, including the DHS Information Technology Security Program Handbook. All records are protected from unauthorized access through appropriate administrative, physical, and technical safeguards. These safeguards include restricting access to authorized personnel who have a need to know, using locks, and password protection identification features. DHS file areas are locked after normal duty hours, and the facilities are protected from the outside by security personnel.

RETENTION AND DISPOSAL:

The following proposal for retention and disposal is pending approval with the National Archives and Records Administration (NARA): Testing and training data will be purged when the data is no longer required. Electronic records for which the statute of limitations has expired for all criminal violations or that are older than 75 years, whichever is longer, will be purged.

SYSTEM MANAGER(S) AND ADDRESS:

ADIS System Manager, US–VISIT Program, U.S. Department of Homeland Security, Washington, DC 20528.

NOTIFICATION PROCEDURE:

To determine whether this system contains records relating to you, write to the US–VISIT Privacy Officer, US–VISIT Program, U.S. Department of Homeland Security, Washington, DC 20528.

RECORD ACCESS PROCEDURES:

This system is exempted from this requirement pursuant to 5 U.S.C. 552a(j)(2) and (k)(2). An individual who is the subject of a record in this system may be provided access. A determination whether a record may be accessed will be made at the time a request is received. DHS will review and comply appropriately with information requests on a case-by-case basis. An individual desiring copies of records maintained in this system should direct his or her request to the FOIA Officer, US–VISIT Program, U.S. Department of Homeland Security, Washington, DC 20528.

CONTESTING RECORD PROCEDURES:

This system is exempted from this requirement pursuant to 5 U.S.C. 552a(j)(2) and (k)(2). An individual who is the subject of a record in this system may be provided access. A

determination whether a record may be accessed will be made at the time a request is received. DHS will review and comply appropriately with information requests on a case-by-case basis. Requests for correction of records in this system may be made through the Traveler Redress Inquiry Program (TRIP) at *http://www.dhs.gov/trip* or via mail, facsimile, or e-mail in accordance with instructions available at *http://www.dhs.gov/trip.*

RECORD SOURCE CATEGORIES:

Basic information contained in this system is supplied by individuals covered by this system and other Federal, state, local, tribal, or foreign governments; private citizens; and public and private organizations.

ADIS data may be derived from records related to entry or exit data of foreign countries collected by foreign governments in support of their respective entry and exit processes; however, records collected from foreign governments must relate to individuals who have entered or exited the United States at some time, i.e., have an existing record in ADIS.

EXEMPTIONS CLAIMED FOR THE SYSTEM:

The Secretary of Homeland Security has exempted this system from 5 U.S.C. 552a(c)(3) and (4); (d); (e)(1), (e)(2), (e)(3), (e)(4)(G), (e)(4)(H), (e)(5), (e)(8); (f); and (g) pursuant to 5 U.S.C. 552a(j)(2). In addition, the Secretary of Homeland Security has exempted portions of this system from 5 U.S.C. 552a (c)(3); (d); (e)(1), (e)(4)(G), (e)(4)(H); and (f) pursuant to 5 U.S.C. 552a (k)(2). These exemptions apply only to the extent that records in the system are subject to exemption pursuant to 5 U.S.C. 552a(j)(2) and (k)(2).

Dated: August 15, 2007

John Kropf,

Acting Chief Privacy Officer.

[FR Doc. E7–16473 Filed 8–21–07; 8:45 am]

BILLING CODE 4410–10–P

DEPARTMENT OF HOMELAND SECURITY

Federal Emergency Management Agency

Disaster Housing Assistance Program (DHAP)

AGENCY: Federal Emergency Management Agency, DHS.

ACTION: Notice.

SUMMARY: This document provides notice that the Federal Emergency Management Agency (FEMA) and the Department of Housing and Urban Development (HUD) executed an Interagency Agreement (IAA) establishing a pilot grant program called the Disaster Housing Assistance Program (DHAP). DHAP is a temporary housing rental assistance and case management program for identified individuals and households displaced by Hurricanes Katrina and Rita. Under the IAA, HUD acts as the servicing agency of the DHAP. Monthly rental assistance payments under the DHAP will commence November 1, 2007. Case management services will begin on or after September 1, 2007.

DATES: FEMA and the HUD executed the Interagency Agreement establishing the DHAP on July 26, 2007.

ADDRESSES: Details about the DHAP will be published by HUD in a **Federal Register** Notice. In addition, a copy of the full text of the FEMA–HUD IAA can be accessed via the FEMA Web site at *http://www.fema.gov.* Periodic updates on DHAP will be posted on FEMA's Web site.

FOR FURTHER INFORMATION CONTACT: Donna M. Dannels, Director, Individual Assistance Division, Disaster Assistance Directorate, Federal Emergency Management Agency, Department of Homeland Security, 500 C Street, SW., Washington, DC 20472, telephone (202) 646–7082 (this is not a toll-free number). Individuals with speech or hearing impairments may access this number through TTY by calling the toll-free Federal Information Relay Service at 800–877–8339.

SUPPLEMENTARY INFORMATION: In late August 2005, Hurricane Katrina struck the Gulf Coast area of the United States causing unprecedented and catastrophic damage to property, significant loss of life, and the displacement of tens of thousands of individuals from their homes and communities. In September 2005, Hurricane Rita hit the Gulf Coast area of the United States and added to the damage to property and displacement of individuals and families from their homes and communities.

Under section 408 of the Robert T. Stafford Disaster Relief and Emergency Assistance Act (Stafford Act), 42 U.S.C. 5174, the Federal Emergency Management Agency (FEMA) disaster housing programs are short-term assistance programs with a limitation of 18 months, unless extended by the President. Due to the severity of Hurricanes Katrina and Rita and the Department of Housing and Urban Development's (HUD) expertise in assisting families with long-term housing needs through its existing infrastructure of Public Housing Agencies (PHAs), the President determined that housing assistance should be transitioned to HUD to address this continuing need.

Since HUD is responsible for administering the Housing Choice Voucher Program (HCVP), the nation's largest tenant-based subsidy program, and since HUD assisted those Hurricane Katrina and Rita disaster victims already in HUD programs by implementing the Katrina Disaster Housing Assistance Program (KDHAP) and the Disaster Voucher Program (DVP), FEMA worked with HUD to create the new pilot Disaster Housing Assistance Program (DHAP).

The local PHAs that currently administer the HCVP will be designated by HUD to administer the DHAP in their jurisdiction. PHAs will be awarded grants from FEMA to provide rent subsidies to eligible families for a period not to exceed 16 months commencing November 1, 2007 and ending March 1, 2009. Families eligible for DHAP are those identified by FEMA who: (1) Currently receive rental assistance authorized under section 408 of the Stafford Act, 42 U.S.C. 5174 pursuant to the Presidential major disaster declarations resulting from Hurricanes Katrina or Rita, and are determined by FEMA to be eligible for continued rental assistance; (2) currently receive other housing assistance from FEMA (*e.g.*, a FEMA-provided trailer) and are determined by FEMA to be eligible for rental assistance; (3) have not received rental assistance from FEMA but are determined by FEMA to be eligible for rental assistance before the DHAP ends; or (4) currently reside in a HUD-provided Real-Estate Owned (REO) property through an arrangement between HUD and FEMA, and who are be determined by FEMA to be eligible for continued rental assistance after relocating out of the REO property. FEMA will rely on the eligibility standards established for its temporary housing program at 44 CFR 206.113 in determining who is eligible for referral to the DHAP. All eligible families will be contacted by a PHA and families who agree to participate in the DHAP must sign and execute a HUD-provided DHAP lease addendum to their current lease with their landlord, which sets forth the new obligations to receive the rental subsidy. Similarly, landlords will be contacted by PHAs and those who agree to participate in the DHAP must sign and execute a Disaster Rent Subsidy Contract (DRSC) with the PHA outlining the new conditions and obligations, in addition to signing a lease addendum with the tenant.

The designated PHAs will begin the rent subsidy on November 1, 2007. Beginning in March 1, 2008, the rent subsidy will decrease $50 per month per family, with the goal of leading the family closer to complete housing self-sufficiency at the end of the 16-month program. When the DHAP assistance ends on March 1, 2009, all families are responsible for the full amount of the rent.

The designated PHAs will also provide case management services, which will include a needs assessment and individual development plan (IDP) for each family. The objective of HUD case management services is to promote self-sufficiency for the participating family. Case management services will begin on or after September 1, 2007, for those families transitioning to the DHAP during the initial implementation phase.

Details about DHAP will be published by HUD in a **Federal Register** Notice. In addition, a copy of the full text of the FEMA–HUD IAA can be accessed via the FEMA Web site at *http://www.fema.gov.* Periodic updates on DHAP will be posted on FEMA's Web sites.

Authority

Legal authority for DHAP is based on the Department of Homeland Security's (DHS) general grant authority under section 102(b)(2) of the Homeland Security Act, 6 U.S.C. 112, and sections 306(a), 408(b)(1), and 426 of the Robert T. Stafford Disaster Relief and Emergency Assistance Act (Stafford Act), 42 U.S.C. 5149(a), 5174(b)(1), and 5189d, respectively. As a servicing agency under a grant from FEMA, and consistent with the Economy Act, HUD derives all authority under the program from FEMA.

Dated: August 17, 2007.

R. David Paulison,

Administrator, Federal Emergency Management Agency.

BILLING CODE 9110–10–P

DEPARTMENT OF HOUSING AND URBAN DEVELOPMENT

[Docket No. FR–5117–N–68]

Notice of Submission of Proposed Information Collection to OMB; Humidity Monitoring Survey

AGENCY: Office of the Chief Information Officer, HUD.

ACTION: Notice.

SUMMARY: The proposed information collection requirement described below has been submitted to the Office of Management and Budget (OMB) for review, as required by the Paperwork Reduction Act. The Department is soliciting public comments on the subject proposal.

The purpose of this survey is: (1) Collect moisture load data to support research to better understand the impact of indoor moisture on the durability of homes: (2) Support the development of design criteria, such as ASHRAE Standard 160P, that will minimize durability problems associated with high indoor moisture levels; and (3) Investigate the influence of the interior and exterior conditions on the indoor moisture level of a typical single family home.

DATES: *Comments Due Date:* September 21, 2007.

ADDRESSES: Interested persons are invited to submit comments regarding this proposal. Comments should refer to the proposal by name and/or OMB approval Number (2528–NEW) and should be sent to: HUD Desk Officer, Office of Management and Budget, New Executive Office Building, Washington, DC 20503; fax: 202–395–6974.

FOR FURTHER INFORMATION CONTACT: Lillian Deitzer, Departmental Reports Management Officer, QDAM, Department of Housing and Urban Development, 451 Seventh Street, SW., Washington, DC 20410; e-mail *Lillian_L._Deitzer@HUD.gov* or telephone (202) 708–2374. This is not a toll-free number. Copies of available documents submitted to OMB may be obtained from Ms. Deitzer or from HUD's Web site at *http://www5.hud.gov:63001/po/i/icbts/collectionsearch.cfm.*

SUPPLEMENTARY INFORMATION: This notice informs the public that the Department of Housing and Urban Development has submitted to OMB a request for approval of the information collection described below. This notice is soliciting comments from members of the public and affecting agencies concerning the proposed collection of information to: (1) Evaluate whether the proposed collection of information is necessary for the proper performance of the functions of the agency, including whether the information will have practical utility; (2) Evaluate the accuracy of the agency's estimate of the burden of the proposed collection of information; (3) Enhance the quality, utility, and clarity of the information to be collected; and (4) Minimize the burden of the collection of information on those who are to respond; including through the use of appropriate automated collection techniques or other forms of information technology, *e.g.*, permitting electronic submission of responses.

This notice also lists the following information:

Title of Proposal: Humidity Monitoring Survey.

OMB Approval Number: 2528–New.

Form Numbers: None.

Description of the Need for the Information and Its Proposed Use: The purpose of this survey is: (1) Collect moisture load data to support research to better understand the impact of indoor moisture on the durability of homes; (2) Support the development of design criteria, such as ASHRAE Standard 160P, that will minimize durability problems associated with high indoor moisture levels; and (3) Investigate the influence of the interior and exterior conditions on the indoor moisture level of a typical single family home.

Frequency of Submission: On Occasion, Annually.

Reporting Burden	Number of respondents	Annual responses	X	Hours per response	=	Burden hours
	70	3	....	2	....	420

Total Estimated Burden Hours: 420.
Status: New collection.

Authority: Section 3507 of the Paperwork Reduction Act of 1995, 44 U.S.C. 35, as amended.

Dated: August 15, 2007.

Lillian L. Deitzer,

Departmental Paperwork Reduction Act Officer, Office of the Chief Information Officer.

[FR Doc. E7–16483 Filed 8–21–07; 8:45 am]

BILLING CODE 4210–67–P

DEPARTMENT OF THE INTERIOR

Fish and Wildlife Service

Carolina Sandhills National Wildlife Refuge

AGENCY: Fish and Wildlife Service, Interior.

ACTION: Notice of intent to prepare a comprehensive conservation plan and environmental assessment for Carolina Sandhills National Wildlife Refuge in Chesterfield County, South Carolina.

SUMMARY: The Fish and Wildlife Service intends to gather information necessary to prepare a comprehensive conservation plan and environmental assessment for Carolina Sandhills National Wildlife Refuge. This notice is furnished in compliance with the Service's comprehensive conservation planning policy to advise other agencies and the public of our intentions, and to obtain suggestions and information on the scope of issues to be considered in the planning process.

DATES: To ensure consideration, comments must be received by October 9, 2007.

ADDRESSES: Comments, questions, and requests for more information regarding Carolina Sandhills National Wildlife Refuge should be sent to: Allyne H. Askins, Refuge Manager, Carolina Sandhills National Wildlife Refuge, 23734 U.S. Highway 1, McBee, SC 29101; Telephone: 843/335–8401; Fax: 843/335–8406; e-mail: *fw4rwcarolinasandhills@fws.gov/.* You may find additional information concerning the refuge at the refuge's Internet site: *http://www.fws.gov/carolinasandhills.*

SUPPLEMENTARY INFORMATION: The National Wildlife Refuge System Administration Act of 1966, as amended by the National Wildlife Refuge System Improvement Act of 1997 (16 U.S.C. 668dd–668ee), requires the Service to develop a comprehensive conservation plan for each national wildlife refuge. The purpose in developing a comprehensive conservation plan is to provide refuge managers with a 15-year strategy for achieving refuge purposes and contributing toward the mission of the National Wildlife Refuge System, consistent with sound principles of fish and wildlife management, conservation, legal mandates, and Service policies. In addition to outlining broad management direction on conserving wildlife and their habitats, plans identify wildlife-dependent recreational opportunities available to the public, including opportunities for hunting, fishing, wildlife observation, wildlife photography, and environmental education and interpretation. Public input in this planning process is essential.

Each unit of the National Wildlife Refuge System is established with specific purposes. These purposes are used to develop and prioritize management goals and objectives with the National Wildlife Refuge System mission, and to guide which public uses will occur on the refuge. The planning process is a means for the Service and the public to evaluate management goals and objectives for the best possible conservation efforts of this important wildlife habitat, while providing for wildlife-dependent recreation opportunities that are compatible with the refuge's establishing purposes and the mission of the National Wildlife Refuge System.

A comprehensive conservation planning process will be conducted that will provide opportunities for Tribal, State, and local governments; agencies; organizations; and the public to participate in issue scoping and public comment. The Service invites anyone interested to respond to the following questions:

1. What problems or issues do you want to see addressed in the comprehensive conservation plan?
2. What improvements would you recommend for Carolina Sandhills National Wildlife Refuge?

The above questions have been provided for your optional use. You are not required to provide any information. The Planning Team developed these questions to gather information about individual issues and ideas concerning the refuge. The Planning Team will use comments it receives as part of the planning process; however, it will not reference individual comments or directly respond to them.

Special mailings, newspaper articles, and other media announcements will be used to inform State and local government agencies and the public of the opportunities for input throughout the planning process. An open house style meeting will be held to solicit comments during the scoping phase of the planning process. The date and time will be announced through local mailings, newspaper articles, and other media outlets.

The environmental review of this project will be conducted in accordance with the requirements of the National Environmental Policy Act of 1969, as amended (42 U.S.C. 4321 *et seq.*); NEPA regulations (40 CFR parts 1500–1508); and other appropriate Federal laws and regulations. All comments received become part of the official public record. Before including your address, phone number, e-mail address, or other personal identifying information in your comment, you should be aware that your entire comment, including your personal identifying information, may be made publicly available at any time. While you can ask us in your comment to withhold your personal identifying information from public review, we cannot guarantee that we will be able to do so.

Congress established Carolina Sandhills National Wildlife Refuge in 1939. The refuge comprises more than 45,000 acres of longleaf pine and is home to the largest population of the endangered red-cockaded woodpecker on Service-owned lands. Management of the refuge focuses on longleaf pine restoration, endangered species recovery, migratory and upland game birds, and wildlife-dependent recreational opportunities.

Authority: This notice is published under the authority of the National Wildlife Refuge System Improvement Act of 1997, Public Law 105–57.

Dated: July 24, 2007.

Cynthia K. Dohner,

Acting Regional Director.

[FR Doc. E7–16611 Filed 8–21–07; 8:45 am]

BILLING CODE 4310–55–P

DEPARTMENT OF THE INTERIOR

Fish and Wildlife Service

Rachel Carson National Wildlife Refuge, Wells, York County, ME

AGENCY: Fish and Wildlife Service, Interior.

ACTION: Notice of availability: Final comprehensive conservation plan and finding of no significant impact.

SUMMARY: We, the U.S. Fish and Wildlife Service (Service), announce the availability of the final Comprehensive Conservation Plan (CCP) and Finding of No Significant Impact for Rachel Carson National Wildlife Refuge (NWR).

Prepared in conformance with the National Wildlife Refuge System Administration Act of 1966, as amended by the National Wildlife Refuge System Improvement Act of 1997, and the National Environmental Policy Act of 1969, the plan describes how we intend to manage the refuge over the next 15 years.

ADDRESSES: You may obtain copies of this CCP on compact disk or in print by writing to Rachel Carson NWR, 321 Port Road, Wells, Maine 04090, telephone 207–646–9226. You may also access and download a copy from the Web sites *http://library.fws.gov/ccps.htm* or *http://rachelcarsonrefuge.fws.gov.*

FOR FURTHER INFORMATION CONTACT: Ward Feurt, Refuge Manager, Rachel Carson NWR, at 207–646–9226, or by electronic mail at *Ward_Feurt@fws.gov*.

SUPPLEMENTARY INFORMATION: The National Wildlife Refuge System Administration Act of 1966, as amended by the National Wildlife Refuge System Improvement Act of 1997 (16 U.S.C. 668dd *et seq.*), requires CCPs for all refuges to provide refuge managers with 15-year strategies for achieving refuge purposes and furthering the mission of the National Wildlife Refuge System. Developing CCPs is done according to the sound principles of fish and wildlife science and laws, while adhering to Service planning and related policies. In addition to outlining broad management direction on conserving refuge wildlife and habitat, CCPs identify wildlife-dependent recreational opportunities available to the public, including opportunities for hunting, fishing, wildlife observation and photography, and environmental education and interpretation. We will review and update this CCP at least once every 15 years.

Rachel Carson NWR spans over 5,293 acres, which comprises 10 divisions between the towns of Kittery and Cape Elizabeth in York and Cumberland Counties, Maine. The refuge harbors estuaries that provide nurseries for many marine fish. Its tidal rivers provide passage to upstream spawning areas for anadromous fish. Its diverse aquatic and upland habitats support breeding, migrating, and wintering birds, and provide essential habitat for nationally threatened and endangered species. The Service acquired most of the refuge under authority of the Migratory Bird Conservation Act of 1929 (16 U.S.C. 715–715r) for ''use as an inviolate sanctuary, or for any other management purposes, for migratory birds.''

We distributed a draft CCP/Environmental Assessment (EA) for public review and comment for 30 days between August 17 and September 18, 2006. Its distribution was announced in the **Federal Register** on August 17, 2006 (71 FR 47511). That draft analyzed three alternatives for managing the refuge. We also held two public meetings on August 29 and September 7, 2006, to obtain public comments. We received 41 comments from local towns, conservation and recreational organizations, and local residents. Appendix J of the final CCP includes a summary of those comments and our responses to them.

We selected Alternative B (the Service-proposed action) from the draft CCP/EA as the alternative for implementation. Our final CCP fully describes its details. Staff from Rachel Carson NWR headquarters office in Wells, Maine, will continue to administer all divisions of the refuge. Highlights of Alternative B, which will be incorporated into the final CCP, include:

(1) Acquire the remaining 3,833 acres within the approved acquisition boundary and expand the refuge by 5,558 acres beyond its current approved boundary for future acquisitions;

(2) Build a new administrative complex including office space, maintenance facilities, and visitor contact station;

(3) Combine the Moody, Lower Wells, Upper Wells, and Mousam River Divisions into one Wells Bay Division;

(4) Increase public use opportunities, e.g., provide expanded hunting and fishing opportunities in new land acquisitions;

(5) Improve the availability and quality of interpretive signs and kiosks, nature trails, and parking areas;

(6) Incorporate a pilot recreation fee program to support public use activities;

(7) Enhance outreach and partnerships with local communities, expand the role and membership of our Friends Group, and strengthen our relationships with neighbors and elected officials; and

(8) Develop Rachel Carson NWR as an outstanding center for research and demonstration emphasizing land management techniques for restoring and sustaining healthy estuarine ecosystems in concert with the Service's Land Management Research and Demonstration program.

Dated: July 25, 2007.

Thomas J. Healy,

Acting Regional Director, U.S. Fish and Wildlife Service, Hadley, Massachusetts.

[FR Doc. E7–16614 Filed 8–21–07; 8:45 am]

BILLING CODE 4310–55–P

DEPARTMENT OF THE INTERIOR

Fish and Wildlife Service

Vieques National Wildlife Refuge

AGENCY: Fish and Wildlife Service, Interior.

ACTION: Notice of availability of the Final Comprehensive Conservation Plan and Environmental Impact Statement.

SUMMARY: The Fish and Wildlife Service announces that a Final Comprehensive Conservation Plan and Environmental Impact Statement for Vieques National Wildlife Refuge in Puerto Rico is available for distribution. The plan was prepared pursuant to the National Wildlife Refuge System Improvement Act of 1997, and in accordance with the National Environmental Policy Act of 1969, and describes how the refuge will be managed for the next 15 years. The compatibility determinations for wildlife observation, wildlife photography, and environmental education and interpretation; bicycling, horseback riding, hiking, jogging, and moped/motorcycle riding; and kayaking and canoeing are also available in the plan.

DATES: A Record of Decision may be signed on or after September 21, 2007.

ADDRESSES: A copy of the plan and environmental impact statement is available on compact diskette or hard copy by writing: Oscar Diaz, Refuge Manager, Vieques National Wildlife Refuge, P.O. Box 1527, Vieques, Puerto Rico 00765. The plan and environmental impact statement may also be accessed and downloaded from the Service's Web site address: *http://www.fws.gov/southeast/planning/.*

FOR FURTHER INFORMATION CONTACT: Gisella Burgos, Telephone: 787/741–2138.

SUPPLEMENTARY INFORMATION: The availability of the Draft Comprehensive Conservation Plan and Environmental Impact Statement for Vieques National Wildlife Refuge for a 60-day public review and comment period was announced in the **Federal Register** on February 28, 2007 (72 FR 9018). The plan and environmental impact statement identified and evaluated three alternatives for managing the refuge over the next 15 years.

Alternative A, the ''No Action'' alternative, would have continued current management.

Alternative B would have focused on wildlife and habitat management but would have maintained the existing visitor programs and public uses. Habitat management and monitoring

would have been expanded and agreements with research, governmental, and non-governmental organizations would have been developed to provide information needed for the management of forests, grasslands, coastal wetlands, beaches, and listed species and their habitats. In partnership with others, programs would have been developed for management of nesting sea turtle populations on Vieques beaches.

Alternative C, the preferred alternative, will direct the refuge toward a realistic and achievable level of both habitat management and public use and will provide a management program that will address the needs of the resources and, where appropriate and compatible with the refuge purposes, the needs of the community. This alternative will provide for increases in management efforts to restore habitats without diminishing the wildlife values associated with the current conditions. There is also a focus on management activities to benefit threatened and endangered species. This includes the possible reintroduction of species extirpated from Vieques and expansion of populations of species already found on the refuge. Some priority public uses, as identified in the National Wildlife Refuge System Improvement Act of 1997, will be expanded and other uses that are determined to be compatible with the refuge mission may be permitted. Historic and archaeological resources will be stabilized and, where possible, interpretation of their significance and role in the evolution of Vieques Refuge will be provided.

Vieques National Wildlife Refuge, consisting of approximately 17,771 acres (3,100 acres on western Vieques and 14,671 acres on eastern Vieques), was created from former Navy managed lands by congressional actions in 2001 and 2003. The transferred lands are to be managed in accordance with the National Wildlife Refuge System Administration Act of 1966, as amended by the National Wildlife Refuge System Improvement Act of 1997. The refuge lands were historically used for agricultural purposes and more recently for military training activities. As a result, the wildlife habitats and communities are significantly altered and non-native invasive species are common along with remnants of native habitats. As a result of the military training, portions of the refuge contain unexploded ordnance and other contaminants. These areas have been classified as a ''superfund site'' under the Comprehensive Environmental Response, Compensation, and Liability Act (CERCLA). Cleanup of these portions of the refuge is being conducted by the Navy in accordance with CERCLA. In addition, a Federal Facilities Agreement between the Navy, U.S. Environmental Protection Agency, Fish and Wildlife Service, and the Commonwealth of Puerto Rico will help to guide the cleanup process.

Although the short-term use and management of areas contaminated with unexploded ordnance would be restricted, the alternatives presented were developed with the assumption that these lands would be cleaned of any contaminants that would pose a threat to either the wildlife or visitors to the refuge.

Authority: This notice is published under the authority of the National Wildlife Refuge System Improvement Act of 1997, Public Law 105–57.

Dated: June 14, 2007.

Cynthia K. Dohner,

Acting Regional Director.

BILLING CODE 4310–55–P

DEPARTMENT OF THE INTERIOR

Fish and Wildlife Service

Draft Recovery Plan for the Ivory-billed Woodpecker (*Campephilus principalis*)

AGENCY: Fish and Wildlife Service, Interior.

ACTION: Notice of document availability for review and comment.

SUMMARY: The U.S. Fish and Wildlife Service (''we'') announce the availability of the Draft Recovery Plan for the Ivory-billed Woodpecker (*Campephilus principalis*). This draft recovery plan includes specific criteria and measures that should be taken in order to effectively recover the species to the point where delisting is warranted under the Endangered Species Act of 1973, as amended (Act). We solicit review and comment from local, State, and Federal agencies and the public on this draft recovery plan.

DATES: Comments on the draft recovery plan must be received on or before October 22, 2007.

ADDRESSES: Copies of the draft recovery plan are available by request from the Lafayette Field Office of the U.S. Fish and Wildlife Service, 646 Cajundome Boulevard, Suite 400, Lafayette, Louisiana 70506, or by visiting our recovery plan Web site at *http://endangered.fws.gov/recovery/index.html#plans*. If you wish to comment, you may submit your comments by one of the following methods:

1. You may mail or hand-deliver written comments and materials to the Field Supervisor, at the above address or;

2. You may fax your comments to 337–291–3139.

Comments and materials received are available for public inspection on request, by appointment, during normal business hours at the above address.

FOR FURTHER INFORMATION CONTACT: Deborah Fuller, at the above address, or telephone 337–291–3100.

SUPPLEMENTARY INFORMATION: Restoring listed animals and plants to the point where they are again secure, self-sustaining components of their ecosystems is a primary goal of our threatened and endangered species program. To help guide the recovery effort, we prepare recovery plans for listed species native to the United States, pursuant to section 4(f) of the Act, unless such a plan would not promote the conservation of a particular species. Recovery plans describe actions that may be necessary for conservation of the species, establish criteria for reclassification from endangered to threatened status or removal from the list of threatened and endangered species, and estimate the time and cost for implementing the needed recovery measures.

The Ivory-billed woodpecker is extremely rare and was, until recently, commonly accepted as extirpated from its known range in the United States. The species appeared to be widely distributed throughout the southeast prior to European settlement. The Ivory-billed woodpecker's disappearance is closely linked with logging and clearing of the contiguous forest habitats which once covered much of the southeastern United States. Additionally, as habitats became fragmented and the species increasingly rare, collecting and direct mortality may have extirpated the bird in certain areas.

Despite having been listed since 1967, no recovery plan was prepared, in large part due to the lack of any clear, undisputed evidence (since 1944) of the species' continued existence. Evidence supporting the presence of at least one bird in the Bayou de View area of Cache River National Wildlife Refuge in 2004, as well as additional information, has generated the need to complete a recovery plan. Given the limited information on the current number of individuals throughout the species' range and the limited knowledge on biology, habitat requirements, and genetic information, we recognize the need to generate scientific information to better address the threats and limiting

factors to this species and to develop additional specific recovery criteria.

The recovery strategy will initially focus on learning more about the species' status and ecology, including documenting known locations and characterizing these habitats. Population goals are not identified, but are acknowledged as key to recovery. Current efforts include development of models and additional research that will generate these spatially explicit population goals.

Recovery Objectives: The recovery plan identifies actions needed to achieve long-term viability for the Ivory-billed woodpecker and focuses on these goals:

1. Management to reduce risks to the existing population,
2. Protection and enhancement of suitable habitat, and;
3. Actions to reduce or eliminate threats sufficient to allow restoration of additional wild populations.

The emphasis for recovery will be on the distribution of additional viable populations in the historic range of the species. Discovery, documentation, and subsequent management of additional populations meet scientifically accepted goals for the promotion of viable populations of listed species.

Recovery Criteria:

1. Determine current habitat use and needs of existing populations.
2. Survey potential habitats for new occurrences.
3. Conserve and enhance habitat on public land. Add additional acreage to public habitat inventory via land acquisition from willing sellers.
4. Conserve and enhance habitat on private lands through the use of agreements, conservation easements, habitat conservation plans, and public outreach to facilitate appropriate management actions.
5. Determine viability of existing populations (numbers, breeding success, population genetics, and ecology).
6. Determine the number and geographic distribution of subpopulations needed for a self-sustaining metapopulation and evaluate suitable habitat for species reintroduction.

At present there is limited information on the current population abundance, distribution, habitat requirements, and biology. More specific, quantifiable criteria for downlisting and delisting this species will be developed as additional knowledge concerning these critical attributes is acquired.

Public Comments Solicited

We solicit written comments on the recovery plan described. We will consider all comments received by the date specified in **DATES** section prior to a decision on final approval of the revised recovery plan.

Our practice is to make all comments, including names and home addresses of respondents, available for public review during regular business hours. Individual respondents may request that we withhold their home addresses from the record, which we will honor to the extent allowable by law. In some circumstances, we would withhold also from the record a respondent's identity, as allowable by law. If you wish for us to withhold your name and/or address, you must state this prominently at the beginning of your comments. However, we will not consider anonymous comments. We will make all submissions from organizations or businesses, and from individuals identifying themselves as representatives or officials of organizations or businesses, available for public inspection in their entirety.

Authority

The authority for this action is section 4(f) of the Endangered Species Act, 16 U.S.C. 1533(f).

Dated: April 10, 2007.

Cynthia K. Dohner,

Acting Regional Director, Southeast Region.

Editorial Note: This document was received at the Office of the Federal Register on August 17, 2007.

BILLING CODE 4310–55–P

DEPARTMENT OF THE INTERIOR

Geological Survey

Agency Information Collection Activities: Proposed Collection; Comment Request

AGENCY: U.S. Geological Survey (USGS), Interior.

ACTION: Notice of extension of an information collection (1028–0056).

SUMMARY: To comply with the Paperwork Reduction Act of 1995 (PRA), USGS is inviting comments on a collection of information that we will submit to the Office of Management and Budget (OMB) for review and approval. The information collection request (ICR) concerns the paperwork requirements in the Performance Measures Data, North American Reporting Center for Amphibian Malformations (NARCAM).

DATES: Submit written comments by October 22, 2007.

ADDRESSES: You may submit comments by any of the following methods listed below. Please use the Information Collection Number 1028–0056 as an identifier in your message.

- E-mail USGS at *atravnic@usgs.gov.* Identify with Information Collection Number 1028–0056 in the subject line.
- Fax: 703–787–7069. Identify with Information Collection Number 1028–0056.
- Mail or hand-carry comments to the Department of the Interior; U.S. Geological Survey; Attention: Alfred Travnicek; 12201 Sunrise Valley Drive, MS–807; Reston, Virginia 20192. Please reference ''Information Collection 1028–0056'' in your comments.

FOR FURTHER INFORMATION CONTACT: Alfred Travnicek, Clearance Officer for Information Collections, at (703) 648–7231.

SUPPLEMENTARY INFORMATION:

Title: North American Reporting Center for Amphibian Malformations (NARCAM) Data Collection Form.

OMB Control Number: 1028–0056.

Abstract: Beginning in 1997, the U.S. Geological Survey has collected voluntary submissions from the research and monitoring community, as well as private citizens, of observational data regarding amphibian malformations. Reports are submitted through the World Wide Web to the USGS National Biological Information Infrastructure (NBII) program, which manages the North American Reporting Center for Amphibian Malformations (NARCAM). Each malformation occurrence submitted through theo online NARCAM reporting form is carefully reviewed by trained professional herpetologists for quality and accuracy. Data associated with the validated reports, including species, malformation type, and geospatial information, are made accessible to the public via the NARCAM Web site. Information may be used by scientists and resource managers within Federal, State, and local agencies, as well as the general public, to identify areas where malformed amphibians have been reported, and the rates of occurrence. The NARCAM dataset is the only publicly available, national dataset on amphibian malformations.

We will be requesting OMB approval for an extension of the NARCAM data collection efforts.

We will protect information from respondents considered private under the Freedom of Information Act (5 U.S.C. 552) and its implementing regulations (43 CFR part 2) and under regulations at 30 CFR 250.197, ''Data and information to be made available to

the public or for limited inspection.'' Contact information for individual reporters is collected, but only for purposes of quality control/quality assurance questions regarding the report. Responses are voluntary. We intend to release data collected on the National Biological Information Infrastructure Web site *http://www.nbii.gov*, but all personal data about the reporter—name, address, phone number, and/or e-mail address—are removed from the publicly accessible database. The database complies with all Department of the Interior requirements and policies for security and data integrity.

Frequency: The frequency is once, unless the reporter voluntarily submits more than one observation.

Estimated Number and Description of Respondents: Approximately 50–100 public citizens annually.

Estimated Annual Reporting and Recordkeeping ''Hour'' Burden: The currently approved ''hour'' burden for the NARCAM data collection form is 150 hours. We estimate the public reporting burden averages 30 minutes per response. This includes the time for reviewing instructions, and completing and reviewing the information. Because many individuals submit more than one malformation report during a single online session, some respondents will exceed the average of 30 minutes per reporting session. The approved ''hour'' burden of 150 hours is calculated based upon the total number of average annual malformation reports, and not the average number of citizens submitting a report.

Estimated Annual Reporting and Recordkeeping ''Non-Hour Cost'' Burden: We have identified no ''non-hour cost'' burden associated with the NARCAM form.

Public Disclosure Statement: The PRA (44 U.S.C. 3501, *et seq.*) provides that an agency may not conduct or sponsor a collection of information unless it displays a currently valid OMB control number. Until OMB approves a collection of information, you are not obligated to respond.

Comments; Before submitting an ICR to OMB, PRA section 3506(c)(2)(A) requires each agency ''* * * to provide notice * * * and otherwise consult with members of the public and affected agencies concerning each proposed collection of information * * *''. Agencies must specifically solicit comments to: (a) Evaluate whether the proposed collection of information is necessary for the agency to perform its duties, including whether the information is useful; (b) evaluate the accuracy of the agency's estimate of the burden of the proposed collection of information; (c) enhance the quality, usefulness, and clarity of the information to be collected; and (d) minimize the burden on the respondents, including the use of automated collection techniques or other forms of information technology.

Agencies must also estimate the ''non-hour cost'' burdens to respondents or recordkeepers resulting from the collection of information. Therefore, if you have costs to generate, maintain, and disclose this information, you should comment and provide your total capital and startup cost components or annual operation, maintenance, and purchase of service components. You should describe the methods you use to estimate major cost factors, including system and technology acquisition, expected useful life of capital equipment, discount rate(s), and the period over which you incur costs. Capital and startup costs include, among other items, computers and software you purchase to prepare for collecting information, monitoring, and record storage facilities. You should not include estimates for equipment or services purchased: (i) Before October 1, 1995; (ii) to comply with requirements not associated with the information collection; (iii) for reasons other than to provide information or keep records for the Government; or (iv) as part of customary and usual business or private practices.

We will summarize written responses to this notice and address them in our submission for OMB approval. As a result of your comments, we will make any necessary adjustments to the burden in our submission to OMB.

Public Comment Policy: Before including your address, phone number, e-mail address, or other personal identifying information in your comment, you should be aware that your entire comment—including your personal identifying information—may be made publicly available at any time. While you can ask us in your comment to withhold your personal identifying information from public review, we cannot guarantee that we will be able to do so.

Geological Survey

Scientific Earthquake Studies Advisory Committee

AGENCY: U.S. Geological Survey.

ACTION: Notice of meeting.

SUMMARY: Pursuant to Public Law 106–503, the Scientific Earthquake Studies Advisory Committee (SESC) will hold its 16th meeting. The meeting location is the Paso Robles Inn, 1103 Spring Street, Paso Robles, California 93446. The Committee is comprised of members from academia, industry, and State government. The Committee shall advise the Director of the U.S. Geological Survey (USGS) on matters relating to the USGS's participation in the National Earthquake Hazards Reduction Program.

The Committee will receive updates and provide guidance on Earthquake Hazards Program activities and the status of teams supported by the Program, as well as a report from the Advanced National Seismic System steering committee.

Meetings of the Scientific Earthquake Studies Advisory Committee are open to the public.

DATES: September 5, 2007, commencing at 8:30 a.m. and adjourning at 5 p.m.

Contact: Dr. William S. Leith, U.S. Geological Survey, MS 905, 12201 Sunrise Valley Drive, Reston, Virginia 20192, (703) 648–6786, *wleith@usgs.gov.*

Dated: August 14, 2007.

Bureau of Land Management

[ID–304–2821–HU–DU8G]

Notice of closure; emergency/safety, Idaho

AGENCY: Bureau of Land Management, Interior.

ACTION: Notice of closure—emergency/safety, Idaho.

SUMMARY: The Bureau of Land Management, in coordination with the Salmon-Challis National Forest, has closed the Darling Creek road and associated connecting roads and trails while the agencies fight the Shower Bath Fire, approximately 10 miles north of Challis, Idaho.

DATES: The closure is effective immediately, and will remain in place through the duration of the Shower Bath Fire, or until such time as the Authorized Officer determines the roads are again safe for public use.

ADDRESSES: The address of the BLM Authorized Officer is: Field Manager, Challis Field Office (CFO), 801 Blue Mountain Road, Challis, Idaho 83226.

FOR FURTHER INFORMATION CONTACT: David Rosenkrance, BLM Challis Field Manager, (208) 879–6206.

Authority: This emergency closure notice is issued under the authority of 43 CFR 8364.1(a). Violations of this closure are punishable by a fine not to exceed $1,000 or imprisonment not to exceed 12 months. Persons who are administratively exempt from the closure include any Federal, State, or local officer or employee acting within the scope of their duties, members of any organized rescue or fire-fighting force in the performance of an official duty, or any person holding written permission from the BLM.

Dated: August 15, 2007.

David Rosenkrance,

Challis Field Manager.

DEPARTMENT OF THE INTERIOR

Bureau of Land Management

[AK–930–5420–FR–L042; AA–085787]

Notice of Application for a Recordable Disclaimer of Interest for Lands Underlying the Stikine River in Alaska

AGENCY: Bureau of Land Management, Interior.

ACTION: Notice.

SUMMARY: The State of Alaska (State) has filed an application for a Recordable Disclaimer of Interest from the United States in those lands underlying the Stikine River, located in Southeast Alaska. The State asserts that the Stikine River was navigable and unreserved at the time of statehood; therefore, title to the submerged lands passed to the State at the time of statehood (1959). The lands included in the application are within the exterior boundary of the Tongass National Forest, created by Presidential Proclamation of February 16, 1909, and administered by the U.S. Forest Service in the Department of Agriculture.

DATES: Comments on the State of Alaska's application should be submitted on or before November 20, 2007. The Bureau of Land Management (BLM) has prepared a Draft Summary Report. Comments on the Draft Summary Report should be submitted on or before October 22, 2007. The State's application and the BLM Draft Summary Report will be posted on the BLM-Alaska Web site: *http://www.blm.gov/ak/ak930/rdi/index.html*

ADDRESSES: Comments on the State of Alaska's application or the BLM Draft Summary Report should be sent to the Chief, Branch of Survey Planning and Preparation (AK–927), Division of Cadastral Survey, BLM Alaska State Office, 222 West 7th Avenue, #13, Anchorage, Alaska 99513–7599.

FOR FURTHER INFORMATION CONTACT: Mike Brown at (907) 271–3602 or *Mike_C_Brown@ak.blm.gov* or visit the BLM-Alaska Web site *http://www.blm.gov/ak/ak930/rdi/index.html.*

SUPPLEMENTARY INFORMATION: On February 17, 2005, the State of Alaska (State) filed an application for a Recordable Disclaimer of Interest pursuant to Section 315 of the Federal Land Policy and Management Act and the regulations contained in 43 CFR Subpart 1864 for those lands underlying the Stikine River (AA–085787). A Recordable Disclaimer of Interest, if issued, will confirm the United States has no valid interest in the subject lands. The notice is intended to notify the public of the pending application and the State's grounds for supporting it. The State asserts that the Stikine River is navigable and unreserved; therefore, under the Equal Footing Doctrine and Submerged Lands Act of 1953, ownership of these lands automatically passed from the United States to the State at the time of statehood in 1959. The State did not identify any known adverse claimant or occupant of the affected lands. The applied for lands are within the exterior boundary of the Tongass National Forest, created by Presidential Proclamation of February 16, 1909, and administered by the U.S. Forest Service in the Department of Agriculture.

A final decision on the merits of the application will not be made before November 20, 2007. During the ninety (90) day notice period, interested parties may comment upon the State's application (AA–085787) and supporting evidence. Interested parties may also comment on the evidence presented in the BLM Draft Summary Report within sixty (60) days of the date of this notice. The State's application and the BLM Draft Summary Report will be posted on the BLM-Alaska Web site: *http://www.blm.gov/ak/ak930/rdi/index.html.*

Comments, including names and street addresses of the commenters, will be available for public review at the Alaska State Office (see address above), during regular business hours 7:30 a.m. to 4:30 p.m., Monday through Friday, except Federal holidays. Before including your address, phone number, e-mail address, or other personal identifying information in your comment, you should be aware that your entire comment—including your personal identifying information—may be made publicly available at any time. While you can ask us in your comment to withhold your personal identifying information from public review, we cannot guarantee that we will be able to do so.

Authority: 43 CFR 1864.2(a)).

Dated: June 28, 2007.

Craig Frichtl,

Chief, Branch of Survey Planning and Preparation.

Notice of Applications for Recordable Disclaimers of Interest for Lands Underlying Little Scottie Creek and Scottie Creek in Alaska

AGENCY: Bureau of Land Management, Interior.

ACTION: Notice.

SUMMARY: The State of Alaska (State) has filed applications for Recordable Disclaimers of Interest from the United States in those lands underlying Little Scottie Creek and Scottie Creek, located in the Tanana River region in Interior, Alaska. The State asserts that Scottie Creek and Little Scottie Creek were navigable and unreserved at the time of statehood; therefore, title to the submerged lands passed to the State at the time of statehood (1959). A portion of these lands are within the Tetlin National Wildlife Refuge, administered by the United States Fish and Wildlife Service.

DATES: Comments on the State of Alaska's applications should be submitted on or before November 20, 2007. The Bureau of Land Management (BLM) has prepared two Draft Summary Reports, one for each water body. Comments on the Draft Summary Reports should be submitted on or before October 22, 2007. The State's applications and the BLM Draft Summary Reports will be posted on the

BLM-Alaska Web site: *http://www.blm.gov/ak/ak930/rdi/index.html.*

ADDRESSES: Comments on the State of Alaska's applications or the BLM Draft Summary Reports should be sent to the Chief, Branch of Survey Planning and Preparation (AK–927), Division of Cadastral Survey, BLM Alaska State Office, 222 West 7th Avenue, #13, Anchorage, Alaska 99513–7599.

FOR FURTHER INFORMATION CONTACT: Jack Frost at (907) 271–5531 or *Jack_Frost@ak.blm.gov* or visit the BLM-Alaska Web site: *http://www.blm.gov/ak/ak930/rdi/index.html.*

SUPPLEMENTARY INFORMATION: On January 26, 2006, the State of Alaska (State) filed two applications for Recordable Disclaimers of Interest pursuant to Section 315 of the Federal Land Policy and Management Act and the regulations contained in 43 CFR Subpart 1864 for those lands underlying Little Scottie Creek (FF–94671) and Scottie Creek (FF–94672). A Recordable Disclaimer of Interest, if issued, will confirm the United States has no valid interest in the subject lands. The notice is intended to notify the public of the pending applications and the State's grounds for supporting them. The State asserts that Little Scottie Creek and Scottie Creek are navigable and unreserved; therefore, under the Equal Footing Doctrine and Submerged Lands Act of 1953, ownership of these lands automatically passed from the United States to the State at the time of statehood in 1959. The State did not identify any known adverse claimant or occupant of the affected lands. A portion of the applied for lands are within the exterior boundary of the Tetlin National Wildlife Refuge, administered by the U.S. Fish and Wildlife Service.

A final decision on the merits of the applications will not be made before November 20, 2007. During the ninety (90) day notice period, interested parties may comment upon the State's applications for Little Scottie Creek (FF–94671) and Scottie Creek (FF–94672) and supporting evidence. Interested parties may also comment on the evidence presented in the BLM Draft Summary Reports within sixty (60) days of the date of this notice. The State's applications and the BLM Draft Summary Reports will be posted on the BLM-Alaska Web site: *http://www.blm.gov/ak/ak930/rdi/index.html.*

Comments, including names and street addresses of the commenters, will be available for public review at the Alaska State Office (see address above), during regular business hours 7:30 a.m. to 4:30 p.m., Monday through Friday, except Federal holidays. Before including your address, phone number, e-mail address, or other personal identifying information in your comment, you should be aware that your entire comment—including your personal identifying information—may be made publicly available at any time. While you can ask us in your comment to withhold your personal identifying information from public review, we cannot guarantee that we will be able to do so.

Authority: 43 CFR 1864.2(a)).

DEPARTMENT OF THE INTERIOR

Bureau of Land Management

[AZ–930–5420–EU–A504; AZA–32815]

Notice of Application for Recordable Disclaimer of Interest in La Paz County; AZ

AGENCY: Bureau of Land Management, Interior.

ACTION: Notice.

SUMMARY: An application has been filed by East Bay Group, Inc. (East Bay Group) for a Recordable Disclaimer of Interest from the United States on 8.14 acres of land located in La Paz County, Arizona. A Recordable Disclaimer of Interest, if issued, estops the United States from asserting a claim to an interest in or the ownership of lands that are being disclaimed (43 CFR 1864.0–2(b)). This notice is intended to notify the public of the pending application.

DATES: On or before October 22, 2007, all interested parties may submit comments on East Bay Group's application as follows. Comments on this application should reference case file serial number AZA–32815. Public comments will be accepted if received by the Bureau of Land Management (BLM) or postmarked no later than October 22, 2007. The Bureau of Land Management (BLM) will review all comments timely received, and will address all relevant, substantive issues raised in the comments. A final decision on the merits of the application will not be made until at least November 20, 2007.

ADDRESSES: Comments should be sent to Julie A. Decker, Group Administrator, Lands, Recreation, and Planning, BLM, Arizona State Office, One North Central Avenue, Suite 800, Phoenix, Arizona 85004–4427.

FOR FURTHER INFORMATION CONTACT: Vivian Titus, Land Law Examiner, Lands and Minerals Adjudication, BLM at the address above or at (602) 417–9598.

SUPPLEMENTARY INFORMATION: On June 9, 2004, East Bay Group filed an application for a Disclaimer of Interest pursuant to Section 315 of the Federal Land Policy and Management Act of 1976, as amended (43 U.S.C. 1745), and the regulations contained in 43 CFR Subpart 1864. Based on the BLM Arizona State Office's review of the official survey records on file, the Federal Government has no interest in lands that have lawfully accreted to the northerly side of lots 3 and 5, in sec. 33 of T. 11 N., R. 18 W., Gila and Salt River Meridian, La Paz County, Arizona. In addition, the Bureau of Reclamation, the Bureau of Indian Affairs, and the Corps of Engineers have also reviewed and concurred that they have no Federal interest in the accreted lands.

All persons who wish to present comments, suggestions, or objections in connection with the pending application and proposed disclaimer may do so by writing to Julie A. Decker, Group Administrator, Lands, Recreation, and Planning, at the above mentioned address. Comments, including names and street addresses of commentors, will be available for public review at the Arizona State Office (see address above), during regular business hours (8:30 a.m. to 4:30 p.m. local time), Monday through Friday, except holidays. Before including your address, phone number, e-mail address, or other personal identifying information in your comment, you should be aware that your entire comment, including your personal identifying information, may be publicly available at any time. While you may ask us in your comment to withhold your personal identifying information from public review, we cannot guarantee that we will be able to do so. Anonymous comments will not be accepted. If no valid objection is received, this action will be approved and will clear a cloud on the title of East Bay Group's 8.14 acres of land.

Authority: 43 CFR 1864.2(a)).

Michael A. Taylor,

Acting Arizona State Director.

DEPARTMENT OF THE INTERIOR

Bureau of Land Management

[CA–930–5410–EU–B230; CACA 48686]

Notice of Application for Recordable Disclaimer of Interest in Lands; Lake County, CA

AGENCY: Bureau of Land Management, Interior.

ACTION: Notice.

SUMMARY: An application has been filed with the Bureau of Land Management (BLM) by Isabelle Brown, Attorney-at-Law on behalf of April Jackson-DiWald (personal representative of the estate of Amerdine Snow McCloud, deceased), for a Recordable Disclaimer of Interest from the United States for certain land in Lake County, California.

DATES: Comments to this action should be received by November 20, 2007.

ADDRESSES: Comments or protests must be filed with: State Director (CA930), Bureau of Land Management, 2800 Cottage Way, Rm. W 1834, Sacramento, CA 95825.

FOR FURTHER INFORMATION CONTACT: Kathy Gary, BLM California State Office, at the above address or by phone at 916–978–4677.

SUPPLEMENTARY INFORMATION: Pursuant to Section 315 of the Federal Land Policy and Management Act of 1976 (43 U.S.C. 1745), Isabelle Brown has filed an application on behalf of April Jackson-DiWald (personal representative of the estate of Amerdine Snow McCloud, deceased) requesting the United States issue a Recordable Disclaimer of Interest for the following described land:

Mount Diablo Meridian

T. 15 N., R. 10 W.,

Being that parcel situated in lot 10, sec. 1, more particularly described as Parcel Five (5), as shown on the record of survey for the Upper Lake Rancheria recorded in the Records of Lake County, California, on June 17, 1961 in Book 2 at pages 6 to 11, inclusive.

The area described contains 1.83 acres, more or less, in Lake County.

The above described land belongs to Amerdine Snow McCloud a member of the Upper Lake Rancheria, a federally recognized Indian Tribe. Pursuant to the California Rancheria Termination Act of August 18, 1958, (Pub. L. 85–671, 72 Stat. 69, as amended by the Act of August 11, 1964, 78 Stat. 390), the Bureau of Indian Affairs (BIA) issued a deed conveying fee simple title from the United States to Amerdine Snow McCloud on July 20, 1961. In 1998 Amerdine Snow McCloud recorded her deed in Lake County and attempted to deed her real property back to the United States to be held in trust by the BIA. The deed was never accepted by the BIA. April Jackson-DiWald, daughter of the deceased Amerdine Snow McCloud is seeking to clear title to demonstrate that the land was never taken into trust by the United States.

The United States has no claim to or interest in the land described and issuance of a Recordable Disclaimer of Interest will be approved if no valid objection is received.

Comments, including names and street addresses of respondents will be available for public review at the BLM California State Office (see address above) during regular business hours 8:30 a.m. to 4:30 p.m. Monday through Friday, except Federal holidays. Before including your address, phone number, e-mail address, or other personal identifying information in your comment, you should be aware that your entire comment—including your personal identifying information—may be made publicly available at any time. While you can ask us in your comment to withhold your personal identifying information from public review, we cannot guarantee that we will be able to do so.

Authority: 43 CFR 1864.2(a).

Dated: May 10, 2007.

J. Anthony Danna,

Deputy State Director, Natural Resources.

BILLING CODE 4310–40–P

DEPARTMENT OF THE INTERIOR

Bureau of Reclamation

Central Valley Project Improvement Act, Water Management Plans

AGENCY: Bureau of Reclamation, Interior.

ACTION: Notice of availability.

SUMMARY: The following Water Management Plans are available for review:

- West Stanislaus Irrigation District.
- Contra Costa Water District.
- Stockton East Water District.
- City of Vallejo.
- Shafter-Wasco Irrigation District.
- Dunnigan Water District.

To meet the requirements of the Central Valley Project Improvement Act of 1992 (CVPIA) and the Reclamation Reform Act of 1982, the Bureau of Reclamation (Reclamation) developed and published the Criteria for Evaluating Water Management Plans (Criteria). For the purpose of this announcement, Water Management Plans (Plans) are considered the same as Water Conservation Plans. The above entities have developed a Plan, which Reclamation has evaluated and preliminarily determined to meet the requirements of these Criteria. Reclamation is publishing this notice in order to allow the public to review the plans and comment on the preliminary determinations. Public comment on Reclamation's preliminary (i.e., draft) determination is invited at this time.

DATES: All public comments must be received by September 21, 2007.

ADDRESSES: Please mail comments to Ms. Laurie Sharp, Bureau of Reclamation, 2800 Cottage Way, Sacramento, California 95825, or contact at 916–978–5232 (TDD 978–5608), or e-mail at *lsharp@mp.usbr.gov.*

FOR FURTHER INFORMATION CONTACT: To be placed on a mailing list for any subsequent information, please contact Ms. Laurie Sharp at the e-mail address or telephone number above.

SUPPLEMENTARY INFORMATION: We are inviting the public to comment on our preliminary (i.e., draft) determination of Plan adequacy. Section 3405(e) of the CVPIA (Title 34, Pub. L. 102–575), requires the Secretary of the Interior to establish and administer an office on Central Valley Project water conservation best management practices that shall ''* * * develop criteria for evaluating the adequacy of all water conservation plans developed by project contractors, including those plans required by section 210 of the Reclamation Reform Act of 1982.'' Also, according to Section 3405(e)(1), these criteria must be developed ''* * * with the purpose of promoting the highest level of water use efficiency reasonably achievable by project contractors using best available cost-effective technology and best management practices.'' These criteria state that all parties (Contractors) that contract with Reclamation for water supplies (municipal and industrial contracts over 2,000 acre-feet and agricultural contracts over 2,000 irrigable acres) must prepare Plans that contain the following information:

1. Description of the District
2. Inventory of Water Resources
3. Best Management Practices (BMPs) for Agricultural Contractors
4. BMPs for Urban Contractors
5. Plan Implementation
6. Exemption Process
7. Regional Criteria
8. Five-Year Revisions

Reclamation will evaluate Plans based on these criteria. A copy of these Plans will be available for review at

Reclamation's Mid-Pacific (MP) Regional Office located in Sacramento, California, and the local area office. Our practice is to make comments, including names and home addresses of respondents, available for public review.

Before including your name, address, phone number, e-mail address, or other personal identifying information in your comment, you should be aware that your entire comment—including your personal identifying information—may be made publicly available at any time. While you can ask us in your comment to withhold your personal identifying information from public review, we cannot guarantee that we will be able to do so.

If you wish to review a copy of these Plans, please contact Ms. Laurie Sharp to find the office nearest you.

Dated: August 10, 2007.

Richard J. Woodley,

Regional Resources Manager, Mid-Pacific Region, Bureau of Reclamation.

[FR Doc. E7–16616 Filed 8–21–07; 8:45 am]

BILLING CODE 4310–MN–P

DEPARTMENT OF THE INTERIOR

Bureau of Reclamation

Quarterly Status Report of Water Service, Repayment, and Other Water-Related Contract Negotiations

AGENCY: Bureau of Reclamation, Interior.

ACTION: Notice.

SUMMARY: Notice is hereby given of contractual actions that have been proposed to the Bureau of Reclamation (Reclamation) and are new, modified, discontinued, or completed since the last publication of this notice on May 15, 2007. This notice is one of a variety of means used to inform the public about proposed contractual actions for capital recovery and management of project resources and facilities consistent with section 9(f) of the Reclamation Project Act of 1939. Additional announcements of individual contract actions may be published in the **Federal Register** and in newspapers of general circulation in the areas determined by Reclamation to be affected by the proposed action.

ADDRESSES: The identity of the approving officer and other information pertaining to a specific contract proposal may be obtained by calling or writing the appropriate regional office at the address and telephone number given for each region in the **SUPPLEMENTARY INFORMATION** section.

FOR FURTHER INFORMATION CONTACT: Sandra L. Simons, Manager, Contract Services Office, Bureau of Reclamation, PO Box 25007, Denver, Colorado 80225–0007 telephone 303–445–2902.

SUPPLEMENTARY INFORMATION: Consistent with section 9(f) of the Reclamation Project Act of 1939 and the rules and regulations published in 52 FR 11954, April 13, 1987 (43 CFR 426.22), Reclamation will publish notice of proposed or amendatory contract actions for any contract for the delivery of project water for authorized uses in newspapers of general circulation in the affected area at least 60 days prior to contract execution. Announcments may be in the form of news releases, legal notices, official letters, memorandums, or other forms of written material. Meetings, workshops, and/or hearings may also be used, as appropriate, to provide local publicity. The public participation procedures do not apply to proposed contracts for the sale or surplus or interim irrigation water for a term of 1 year or less. Either of the contracting parties may invite the public to observe contract proceedings. All public participation procedures will be coordinated with those involved in complying with the National Environmental Policy Act. Pursuant to the ''Final Revised Public Participation Procedures'' for water resource-related contract negotiations, published in 47 FR 7763, February 22, 1982, a tabulation is provided of all proposed contractual actions in each of the five Reclamation regions. When contract negotiations are completed, and prior to execution, each proposed contract form must be approved by the Secretary of the Interior, or pursuant to delegated or redelegated authority, the Commissioner of Reclamation or one of the regional directors. In some instances, congressional review and approval of a report, water rate, or other terms and coditions of the contract may be invovled.

Public participation in and receipt of comments on contract proposals will be facilitated by adherence to the following procedures:

1. Only persons authorized to act on behalf of the contracting entities may negotiate the terms and conditions of a specific contract proposal.

2. Advance notice of meetings or hearings will be furnished to those parties that have made a timely written request for such notice to the approproate regional or project office of Reclamation.

3. Written correspondence regarding contracts may be made available to the general public pursuant to the terms and procedures of the Freedom of Information Act, as needed.

4. Written comments on a proposed contract or contract action must be submitted to the appropriate regional officials at the locations and within the time limits set forth in the advance public notices.

5. All written comments received and testimony presented at any public hearing will be reviewed and summarized by the appropriate regional office for use by the contract approving authority.

6. Copies of specific proposed contracts may be obtained from the appropriate regional director or his designated public contact as they become available for review and comment.

7. In the event modifications are made in the form of a proposed contract, the appropriate regional director shall determine whether republication of the notice and/or extension of the comment period is necessary.

Factors considered in making such a determination shall include, but are not limited to (i) The significance of the modification, and (ii) the degree of public interest which has been expressed over the course of the negotiations. At a minimum, the regional director shall furnish revised contracts to all parties who requested the contract in response to the initial public notice.

Completed Contract Action

16. One irrigation water user entity, Boise Project, Idaho: Long-term renewal and/or conversion of one irrigation water service contract for supplemental irrigation use of up to 1,718 acre-feet of storage space in Lucky Peak Reservoir, a USACE project on the Boise River, Idaho. Seventeen water service contracts have been converted to repayment contracts for a total of 68,500 acre-feet of storage space. All original 17 water service contracts have been converted to repayment contracts.

Mid-Pacific Region: Bureau of Reclamation, 2800 Cottage Way, Sacramento, California 95825–1898, telephone 916–978–5250.

Modified Contract Action

25. Orland Unit Water User's Association, Orland Project, California: Repayment contract for SOD costs assigned to the irrigation purposes of Stony Gorge Dam.

Completed Contract Action

37. Gray Lodge Wildlife Area Deep Well Pumping Reimbursement Agreement, Central Valley Project Improvement Act, California: Amendment to extend termination date for 1 more year will be executed by December 2007. Contract executed January 31, 2007.

Lower Colorado Region: Bureau of Reclamation, PO box 61470 (Nevada Highway and Park Street), Boulder City, Nevada 89006–1470, telephone 702–293–8192.

New Contract Actions

32. Basic Management, Inc., BCP, Nevada: Amend contract to add additional service areas where part of the contractor's entitlement can be used.

33. City of Yuma, BCP, Arizona: Amendment to extend contract to allow for the diversion of water through Yuma Project facilities for an additional term of 10 years.

Completed Contract Action

30. City of Needles and The Metropolitan WD of Southern California, Lower Colorado Water Supply Project, California: Contract for acquisition and delivery of Lower Colorado Water Supply Project water. Contract executed March 26, 2007.

Upper Colorado Region: Bureau of Reclamation, 125 South State Street, Room 6107, Salt Lake City, Utah 84138–1102, telephone 801–524–3964.

New Contract Actions

1.(d) John and Joan Holton, Aspinall Storage Unit, CRSP: Mr. and Mrs. Holton have requested a 40-year water service contract for 1 acre-foot of M&I water out of Blue Mesa reservoir, which requires Mr. and Mrs. Holton to present a Plan of Augmentation to the Division 4 Water Court.

1.(e) Old Castle SW Group dba United Companies, Aspinall Storage Unit, CRSP: United Companies has requested a 40-year water service contract for 36 acre-feet of M&I water out of Blue Mesa reservoir, which requires United Companies to present a Plan of Augmentation to the Division 4 Water Court.

32. Aaron Million, Million Conservation Resource Group, Flaming Gorge Storage Unit, CRSP: Mr. Million has requested a Standby Contract to secure the first right to contract up to 165,000 acre-feet annually of M&I water service from Flaming Gorge Reservoir for a proposed, privately financed and constructed transbasin diversion project.

33. Uintah Water Conservancy District, Jensen Unit, Central Utah Project, Utah: Temporary water service contract for 2,520 acre-feet of unsubscribed Jensen Unit M&I water.

34. Weber Basin Water Conservancy District, Weber Basin Project, Utah: Contract providing for the district to repay to the United States 15 percent of the cost of Phase I SOD modifications to Arthur V. Watkins Dam.

35. Weber Basin Water Conservancy District, Weber Basin Project, Utah: Contract providing for the district to repay to the United States 15 percent of the cost of Phase II SOD modifications to Arthur V. Watkins Dam.

Completed Contract Actions

1.(a) Oxbow Mining, LLC, Aspinall Storage Unit, CRSP: Oxbow Mining, LLC has requested a 40-year water service contract for 242 acre-feet of M&I water out of Blue Mesa Reservoir, which requires that an augmentation plan be presented to the Division 4 Water Court. Contract executed April 11, 2007.

21. Carbon Water Conservancy District, Scofield Project, Utah: Contract providing for the district to repay to the United States 15 percent of the cost of SOD modifications to the spillway at Scofield Dam. Contract executed June 1, 2007.

Great Plains Region: Bureau of Reclamation, PO Box 36900, Federal Building, 316 North 26th Street, Billings, Montana 59101, telephone 406–247–7752.

New Contract Actions

52. Hamlin Construction, Inc., Helena Valley Unit, P–SMBP, Montana: Request for a long-term water service contract for M&I purposes for up to 500 acre-feet of water per year.

53. Richard Davis, Helena Valley Unit, P–SMBP, Montana: Request for a long-term water service contract for M&I purposes for up to 24 acre-feet of water per year.

54. Individual Irrigators, Canyon Ferry Unit, P–SMBP, Montana: Replace temporary 1-year contracts with long-term water service contracts for minor amounts of less than 1,000 acre-feet of irrigation water annually from the Missouri River below Canyon Ferry Dam.

55. Individual Irrigators, Lower Marias Unit, P–SMBP, Montana: Execute long-term water service contracts for commercial irrigation from Lake Elwell and the Marias River below Tiber Dam.

56. Turtle Lake ID, Garrison Diversion Unit, North Dakota: Turtle Mountain ID has requested a water service contract under the Dakota Water Resources Act of 2000 as part of the Garrison Diversion Unit.

Modified Contract Actions

5. City of Rapid City, Rapid Valley Unit, P–SMBP, South Dakota: Contract renewal for storage capacity in Pactola Reservoir. A temporary (1 year not to exceed 10,000 acre-feet) water service contract has been executed with the City of Rapid City, Rapid Valley Unit, for use of water from Pactola Reservoir. A long-term storage contract for 49,000 acre-feet has been negotiated with the City, and a final draft of the contract has been tansmitted to the City for approval by their City Council. Execution of the long-term contract is anticipated within the next 2 months.

6. Mid-Dakota Rural Water System, Inc., South Dakota: Pursuant to the Reclamation Projects Authorization and Adjustment Act of 1992, the Secretary of the Interior is authorized to make grants and loans to Mid-Dakota Rural Water System, Inc., a non-profit corporation for the planning and construction of a rural water supply system. Construction of the rural water supply system was completed in September 2006.

Completed Contract Actions

7. City of Berthoud, Colorado-Big Thompson Project, Colorado: Long-term

contract for conveyance of nonproject M&I water through Colorado-Big Thompson Project facilities. Contract was executed March 23, 2007.

29. Buford-Trenton ID, Buford-Ternton Project, P–SMBP, North Dakota: Enter into a new repayment contract and power contract for additional project use pumping power for project purposes in irrigating bench lands existing within the district. Contract was executed May 7, 2007.

31. Ainsworth ID, Ainsworth Unit, Sandhills Division, P–SMBP, Ainsworth, Nebraska: Contract renewal for a long-term water service contract. Contract was executed December 26, 2006.

35. Frenchman-Cambridge ID; Meeker-Driftwood, Red Willow, and Cambridge Units; Frenchman Division: P–SMBP; Cambridge, Nebraska: Amend the repayment contract for equalization of the construction obligation payments over the remaining years of the water supply repayment obligation period, and to delay the increase in the reserve fund payments pursuant to Public Law 109–386, which was enacted on December 12, 2006. Contract was executed June 8, 2007.

36. Kansas-Bostwick ID No. 2; Courtland Unit, Bostwick Division, P–SMBP; Courtland, Kansas: Amend the repayment contract for equalization of the construction obligation payments over the remaining years of the water supply repayment obligation period, and to delay the increase in the reserve fund payments pursuant to Public Law 109–386, which was enacted on December 12, 2006. Contract was executed June 8, 2007.

37. Bostwick ID in Nebraska; Superior-Courtland and Franklin Units, Bostwick Division, P–SMBP; Red Cloud, Nebraska: Amend the repayment contract for equalization of the construction obligation payments over the remaining years of the water supply repayment obligation period, and to delay the increase in the reserve fund payments pursuant to Public Law 109–386, which was enacted on December 12, 2006. Contract was executed June 8, 2007.

38. Webster ID; Webster Unit, Solomon Division, P–SMBP; Gaylord Kansas: Amend the repayment contract for equalization of the construction obligation payments over the remaining years of the water supply repayment obligation period, and to delay the increase in the reserve fund payments pursuant to Public Law 109–386, which was enacted on December 12, 2006. Contract was executed June 8, 2007.

Dated: July 5, 2007.

Roseann Gonzales,

Director, Office of Program and Policy Services.

BILLING CODE 4310–MN–M

INTERNATIONAL TRADE COMMISSION

[Investigation No. 337–TA–594]

In the Matter of Certain Lighting Products, Components Thereof, and Products Containing the Same; Notice of a Commission Determination Not To Review an Initial Determination Terminating the Investigation on the Basis of a Settlement Agreement

AGENCY: U.S. International Trade Commission.

ACTION: Notice.

SUMMARY: Notice is hereby given that the U.S. International Trade Commission has determined not to review an initial determination (''ID'') of the presiding administrative law judge (''ALJ'') in the above-captioned investigation terminating the investigation in its entirety on the basis of a settlement agreement.

FOR FURTHER INFORMATION CONTACT: Michael K. Haldenstein, Office of the General Counsel, U.S. International Trade Commission, 500 E Street, SW., Washington, DC 20436, telephone (202) 708–2301. Copies of non-confidential documents filed in connection with this investigation are or will be available for inspection during official business hours (8:45 a.m. to 5:15 p.m.) in the Office of the Secretary, U.S. International Trade Commission, 500 E Street, SW., Washington, DC 20436, telephone (202) 205–2000. General information concerning the Commission may also be obtained by accessing its Internet server at *http://www.usitc.gov.* The public record for this investigation may be viewed on the Commission's electronic docket (EDIS) at *http://edis.usitc.gov.* Hearing-impaired persons are advised that information on this matter can be obtained by contacting the Commission's TDD terminal on (202) 205–1810.

SUPPLEMENTARY INFORMATION: The Commission instituted this investigation on February 27, 2007, based on a complaint filed by Cooper Lighting, Inc. of Peachtree City, Georgia. 72 FR 8790 (February 27, 2007). The complaint, as supplemented, alleged violations of section 337 of the Tariff Act of 1930, 19 U.S.C. 1337 (''section 337'') in the importation into the United States, the sale for importation, and the sale within the United States after importation of certain lighting products, components thereof, and products containing the same by reason of infringement of claims 23, 26, and 27 of U.S. Patent No. 6,082,878 and claims 1 and 7 of U.S. Patent No. 5,662,413. The complaint further alleged that an industry in the United States exists as required by subsection (a)(2) of section 337. The complaint requested that the Commission issue an exclusion order and cease and desist orders. The Commission named two companies as respondents, Cordelia Lighting, Inc. and Jimway, Inc. Both companies are located in Rancho Dominguez, California.

On July 12, 2007, Cooper and the two respondents filed a joint motion to terminate the investigation based upon a settlement agreement. The Commission investigative attorney filed a response in support of the motion and no party opposed the motion. On July 25, 2007, the ALJ issued the subject ID (Order No. 6) that grants the parties' joint motion and terminates the investigation on the basis of a settlement agreement. No petitions for review were filed and the Commission has determined not to review the ID. No respondents remain in the investigation and the investigation is therefore terminated in its entirety.

This action is taken under the authority of section 337 of the Tariff Act of 1930, as amended, 19 U.S.C. 1337, and Commission rules 210.21, 210.42, 19 CFR 210.21, 210.42.

By order of the Commission.

Issued: August 17, 2007.

Marilyn R. Abbott,

Secretary to the Commission.

BILLING CODE 7020–02–P

INTERNATIONAL TRADE COMMISSION

[Inv. No. 337–TA–612]

In the Matter of Certain Nitrile Rubber Gloves; Notice of Investigation

AGENCY: U.S. International Trade Commission.

ACTION: Institution of investigation pursuant to 19 U.S.C. 1337.

SUMMARY: Notice is hereby given that a complaint was filed with the U.S. International Trade Commission on July 19, 2007, under section 337 of the Tariff Act of 1930, as amended, 19 U.S.C. 1337, on behalf of Tillotson Corporation d/b/a Best Manufacturing Company of Menlo, Georgia. Tillotson filed a

supplement to the complaint on August 8, 2007. The complaint, as supplemented, alleges violations of § 337 in the importation into the United States, the sale for importation, and the sale within the United States after importation of certain nitrile rubber gloves by reason of infringement of U.S. Patent No. Re. 35,616. The complaint further alleges that an industry in the United States exists as required by subsection (a)(2) of § 337.

The complainant requests that the Commission institute an investigation and, after the investigation, issue a permanent exclusion order and a permanent cease and desist order.

ADDRESSES: The complaint, except for any confidential information contained therein, is available for inspection during official business hours (8:45 a.m. to 5:15 p.m.) in the Office of the Secretary, U.S. International Trade Commission, 500 E Street, SW., Room 112, Washington, DC 20436, telephone 202–205–2000. Hearing impaired individuals are advised that information on this matter can be obtained by contacting the Commission's TDD terminal on 202–205–1810. Persons with mobility impairments who will need special assistance in gaining access to the Commission should contact the Office of the Secretary at 202–205–2000. General information concerning the Commission may also be obtained by accessing its internet server at *http://www.usitc.gov.* The public record for this investigation may be viewed on the Commission's electronic docket (EDIS) at *http://www.usitc.gov/secretary/edis.htm.*

FOR FURTHER INFORMATION CONTACT: Vu Q. Bui, Esq., Office of Unfair Import Investigations, U.S. International Trade Commission, telephone (202) 205–2582.

Authority: The authority for institution of this investigation is contained in section 337 of the Tariff Act of 1930, as amended, and in section 210.10 of the Commission's Rules of Practice and Procedure, 19 CFR 210.10 (2006).

Scope of Investigation: Having considered the complaint, the U.S. International Trade Commission, on August 15, 2007, ordered that—

(1) Pursuant to subsection (b) of section 337 of the Tariff Act of 1930, as amended, an investigation be instituted to determine whether there is a violation of subsection (a)(1)(B) of § 337 in the importation into the United States, the sale for importation, or the sale within the United States after importation of certain nitrile rubber gloves by reason of infringement of one or more of claims 1 and 17–19 of U.S. Patent No. Re. 35,616, and whether an industry in the United States exists as required by subsection (a)(2) of § 337;

(2) For the purpose of the investigation so instituted, the following are hereby named as parties upon which this notice of investigation shall be served:

(a) The complainant is—

Tillotson Corporation, d/b/a, Best Manufacturing Company, 579 Edison Street, Menlo, Georgia 30731.

(b) The respondents are the following entities alleged to be in violation of section 337, and are the parties upon which the complaint is to be served:

Cardinal Health, Inc., 7000 Cardinal Place, Dublin, Ohio 43017.

Cardinal Health 200, Inc., 1430 Waukegan Road (MP KB–1A), McGaw Park, Illinois 60085.

Cardinal Health Malaysia 211 Sdn. Bhd., Plot 87, Kampung Jawa 11900, Bayan Lepas, Malaysia.

Henry Schein, Inc., 135 Duryea Road, Melville, New York 11747.

HSI Gloves Inc., 135 Duryea Road, Melville, New York 11747.

Latexx Partners Berhad, Pt5054, Jalan Perusahaan 3, Kamunting, Industrial Estate, 34600 Kamunting, Perak, Darul Ridzuan, Malaysia.

Medtexx Partners Inc., 102 Engle St. FL2, Englewood, New Jersey 07631.

(c) The Commission investigative attorney, party to this investigation, is Vu Q. Bui, Esq., Office of Unfair Import Investigations, U.S. International Trade Commission, 500 E Street, SW., Suite 401, Washington, DC 20436; and

(3) For the investigation so instituted, the Honorable Charles E. Bullock is designated as the presiding administrative law judge.

(4) The Commission has determined to assign this investigation to Judge Bullock, who is the presiding administrative law judge in *Certain Nitrile Gloves*, Inv. No. 337–TA–608, in view of the overlapping subject matter in the two investigations. The presiding administrative law judge is authorized to consolidate Inv. No. 337–TA–608 and this investigation if he deems it appropriate.

Responses to the complaint and the notice of investigation must be submitted by the named respondents in accordance with section 210.13 of the Commission's Rules of Practice and Procedure, 19 CFR 210.13. Pursuant to 19 CFR 201.16(d) and 210.13(a), such responses will be considered by the Commission if received not later than 20 days after the date of service by the Commission of the complaint and the notice of investigation. Extensions of time for submitting responses to the complaint and the notice of investigation will not be granted unless good cause therefor is shown.

Failure of a respondent to file a timely response to each allegation in the complaint and in this notice may be deemed to constitute a waiver of the right to appear and contest the allegations of the complaint and this notice, and to authorize the administrative law judge and the Commission, without further notice to the respondent, to find the facts to be as alleged in the complaint and this notice and to enter an initial determination and a final determination containing such findings, and may result in the issuance of a limited exclusion order or cease and desist order or both directed against the respondents.

Issued: August 16, 2007.

By order of the Commission.

Marilyn R. Abbott,

Secretary.

BILLING CODE 7020–02–P

DEPARTMENT OF JUSTICE

Federal Bureau of Investigation

[AAG/A Order No. 028–2007]

Privacy Act of 1974; System of Records

AGENCY: Federal Bureau of Investigation, DOJ.

ACTION: Notice to amend system of records.

SUMMARY: The Federal Bureau of Investigation proposes to amend its Terrorist Screening Records System, Justice/FBI–019, maintained by the Terrorist Screening Center, to make several changes to its existing notice. Public comments are invited.

DATES: The Privacy Act requires that the public be given 30 days in which to comment on any new or amended uses of information in a system of records. In addition, the Office of Management and Budget (OMB), which has oversight responsibilities under the Act, and the Congress must be given 40 days in which to review major changes to Privacy Act systems. Therefore, the public, OMB, and the Congress are invited to submit written comments on this revised Privacy Act system of records. Please submit any comments by October 1, 2007.

ADDRESSES: Address all comments to Kenneth P. Mortensen, Deputy Privacy and Civil Liberties Officer, U.S. Department of Justice, 950 Pennsylvania Ave., NW., Washington, DC 20530, facsimile number (202) 616–9627.

FOR FURTHER INFORMATION CONTACT: Kenneth P. Mortensen, (202) 514–3853.

SUPPLEMENTARY INFORMATION: On July 28, 2005, the Department of Justice, Federal Bureau of Investigation (FBI) published a new Privacy Act System of Records notice, the Terrorist Screening Records System (TSRS), Justice/FBI–019, to cover records maintained by the Terrorist Screening Center (TSC), the system owner. See 70 FR 43715. Records in the TSRS include the Terrorist Screening Database (TSDB), records in the Encounter Management Application (EMA) that document the operational support TSC provides to agencies that screen for terrorists (''screening agencies''), and records related to the TSC's internal quality assurance process to ensure the terrorist data is thorough, accurate and current. The TSC also maintains records related to the resolution of terrorist watchlist-related redress complaints.

The TSC now proposes modifications to the system to expand the scope of the system, and to increase the clarity of the notice. The following explains the proposed modifications:

General Changes

The previous system notice used the terms ''terrorist screening'' and ''terrorism screening'' interchangeably to describe the same process. This notice is being modified so that only the term ''terrorism screening'' is used, making it consistent with the language in Homeland Security Presidential Directive 6 (HSPD 6). This system notice also makes use of the term Terrorism Information as defined in section 1016 of the Intelligence Reform and Prevention Act of 2004 (Pub. L. 108–458).

System Location

The current system of records notice for Justice/FBI–019 states that the records are located at the TSC, Federal Bureau of Investigation, Washington, DC. The notice has been amended to reflect that records in Justice/FBI–019 may also be located in secondary locations for system back-up and continuity-of-operations purposes.

Categories of Individuals

The TSC is expanding the categories of individuals covered by this system to cover individuals who are authorized users of the underlying information systems described by this system of records, such as the TSDB and EMA, since audit logs documenting their use will be maintained in connection with the system.

Currently, only TSC personnel can perform queries directly against the TSDB, EMA, and other internal TSC databases. In the future, the TSC plans to operate a query function permitting authorized individuals from screening agencies or entities to access TSC systems directly from an external location and submit search queries. Collection and maintenance of information through audit logs about authorized users will allow the TSC to monitor who uses TSC information systems for what purpose, in order to ensure compliance with applicable laws and policy. Therefore, the TSC is modifying this system of records notice to account for this fact.

Additionally, the TSC is clarifying that this system of records covers all individuals whose names or identifying information is collected to perform a query against TSC information systems, such as TSDB, but who are not necessarily individuals whose information is generally maintained as terrorist information in the TSDB. For example, in certain instances, individuals' names are queried directly against the TSDB or EMA to see if there is a possible record match and, if there is not, their names may be retained in an audit trail that records the activity of authorized users of TSC information systems. The system notice is being modified to make clear that these individuals' information is also included in this system of records.

The TSC is adding a new category to cover individuals who accompany or travel with a person when that person is an actual match to a known or suspected terrorist identity in the TSDB and when the TSC or screening agency or entity identifies that person as such during a terrorism screening process. The TSC collects this information in the course of encounters with known or suspected terrorists. For example, an encounter can include times when an individual was in the car along with a person matching an identity in the TSDB during a traffic stop by state or local law enforcement officers. TSC maintains this information about such individuals in EMA and not in the TSDB, and shares it as appropriate with other agencies for law enforcement and intelligence purposes consistent with the routine uses of this system of records.

Categories of Records

The TSC is adding new categories of records to cover audit logs for TSC systems, and archived records and record histories for the TSDB and other TSC systems.

As discussed above, audit log records allow the TSC to monitor who uses TSC systems for what purpose in order to ensure compliance with applicable laws and policy. A TSDB record history is a log of any previous changes to the current version of a TSDB record.

Archived TSDB records are TSDB records that pertain to individuals who are no longer eligible for inclusion in the TSDB, because those individuals no longer meet the criteria for inclusion in the TSDB as a known or suspected terrorist. The TSC retains these records in an archive that is logically separate from other TSDB data and may be accessed only by a limited number of TSC personnel who have undergone specialized training on the sensitivity of these records and the permissible reasons for access.

Pursuant to TSC policy, archived TSDB records may only be accessed for the following purposes: (1) Redress, (2) litigation, (3) quality assurance (e.g., to determine if a record correction is required to an existing record in a TSC or other agency system), (4) to respond to requests from oversight bodies and auditors, and to perform internal audits, (5) to evaluate TSC performance and data in the event of another terrorist attack or attempted attack, and to support any related investigation, and (6) when access is otherwise required by law (e.g., Freedom of Information Act (FOIA) request). Archived TSDB records are not used or made available for any watchlisting purposes. The search function for the TSDB archive requires that prior to accessing the TSDB archive authorized TSC personnel must identify an approved purpose with information supporting the need for access. This information is maintained in a detailed audit log, which is routinely reviewed by TSC compliance personnel.

Additionally, the TSC is modifying other descriptions of categories of records to clarify the types of information held in the TSC systems.

The TSC is adding language to clarify that records of encounters may include information about individuals who accompany or travel with a person when that person is an actual match to a known or suspected terrorist identity in the TSDB and the TSC or screening agency or entity identifies that person as such during a terrorism screening process.

The TSC is also modifying Item (a) To add ''photograph'' as a specific type of identifying data that may be contained in the TSRS. While a photograph may be considered a biometric, which is already listed in Item (a), TSC is listing photographs as a separate item to ensure clarity.

The TSC is modifying Item (b) By changing the term ''agency'' to ''entity'' to reflect that entities other than a

federal government agency may engage in terrorism screening. Item (b) is also being modified by removing the language ''terrorist encounters'' and replacing it with ''encounters with known or suspected terrorists,'' which is a more precise characterization, because Item (a) in the Categories of Individuals defines the phrase ''known or suspected terrorists.''

The TSC is also modifying Item (c) to make clear that TSRS may also include references to or information from other relevant databases that contain terrorism information, in the event such databases are not considered law enforcement or intelligence databases.

Authority for Maintenance of the System

The TSC is adding the following legal authorities: the National Security Act of 1947, as amended; the Intelligence Reform and Terrorism Prevention Act of 2004, Pub. L. 108–458, 18 Stat. 3638 (December 17, 2004); and Executive Order 13388, ''Further Strengthening the Sharing of Terrorism Information to Protect Americans,'' (October 25, 2005). TSC is removing the reference to Executive Order 13356, which has been superseded by Executive Order 13388.

Also, the TSC is adding language to provide notice that in the event that the TSC's continuity-of-operations plans are invoked, the agency that assumes TSC operational functions will have the authority to administer the Terrorist Screening Records System as necessary to carry out those functions and will act consistent with the obligations required by the Privacy Act of 1974 in the maintenance of TSRS as a Privacy Act System of Records.

Purpose Statement

Consistent with the changes discussed above regarding auditing of TSC data systems, the TSC is expanding the purpose of the system of records to clarify that one purpose is to conduct appropriate oversight of the proper use of TSC data systems.

The language in Item (e) Is being modified to add the quoted language below to more accurately reflect TSC's mission, as set forth in HSPD 6, to provide support for private sector screening processes ''that have a substantial bearing on homeland security.''

The language in Item (f) is being modified to remove the word ''agency's'' and insert the word ''authorized'' preceding the term ''screening process'' to more accurately describe the type of screening TSC may perform. The word ''agency'' was removed because not all terrorism screening is necessarily performed by a federal government agency. The word ''authorized'' was added because all terrorism screening processes using TSC data must be authorized by the TSC pursuant to the standard articulated in HSPD 6.

The language in Item (g) Is being changed to add the word ''organizations'' to the list of entities and individuals that may receive information about encounters with known or suspected terrorists. This change is intended to better reflect the ongoing efforts by the federal government to increase sharing of intelligence, law enforcement and terrorism information with the State and local governments, fusion centers, and critical infrastructure owners and operators, consistent with the privacy protections required by the Privacy Act and as articulated in this notice.

The language in Item (h) is being changed by removing the word ''repeatedly'' from the phrase ''to assist persons repeatedly misidentified during a terrorism screening process.'' This change is intended to clarify that an individual does not have to be misidentified more than once for the TSC to act to provide assistance through a redress process or other means. Conforming changes are being made to the notice to remove the word ''repeatedly'' from Routine Uses B, F, and G, and the categories of individuals (Item (d)).

Routine Uses

Routine Use B listed for Justice/FBI–019 permits disclosure of information to various entities in order to, among other things ''provide appropriate notifications of a positive terrorist encounter or a threat related to the encounter.'' The TSC is modifying this language to clarify that the TSC may notify an entity of not only a positive match to the terrorist watchlist, but also a negative or inconclusive match. Also, the TSC is modifying this Routine Use to include ''private sector entities with a substantial bearing on homeland security'' as described in HSPD–6 as potential recipients of information. Finally, the TSC is modifying the language in purpose (2) of this Routine Use to make clear that a positive encounter means an encounter with an individual who is identified in the TSDB, and to clarify purpose (3) of this Routine Use by adding the modifiers ''known or suspected'' to the terms ''terrorist'' and ''threat related to the encounter.''

Routine Use D permits disclosure of information for the development, testing, or modification of information technology systems used or intended to be used during or in support of the screening process, but indicates TSC will use de-identified data whenever possible. The TSC is modifying the language of this Routine Use to clarify that ''de-identified data'' means data that cannot be used to derive an individual's identity and to note that de-identified data will be used to the extent practicable and possible.

Routine Use E permits disclosure of information to various agencies or entities to assist in the coordination of terrorist threat awareness, assessment, analysis, or response. The TSC is modifying this language to include private sector entities in the list of entities that may receive information from TSRS for these purposes. This change is intended to better reflect the ongoing efforts by the federal government to increase sharing of intelligence, law enforcement, terrorism and threat information with State fusion centers and the private sector, such as critical infrastructure and key resource owners and operators, consistent with the privacy protections required by the Privacy Act.

Routine Use H permits disclosure of information in support of authorized audit or oversight operations of the DOJ, including FBI and TSC, or any agency engaged in or providing information used for terrorism screening supported by the TSC. The TSC is modifying this Routine Use to include authorized security operations as a permissible purpose for sharing information, thereby allowing the TSC to disclose information to the investigating entity in the context of a security-related investigation or inquiry, such as a personnel investigation or inquiry into a breach of data security. Additionally, the TSC is expanding the scope of this Routine Use by adding language that would allow disclosure if the subject of the security, audit, or oversight operation was not a Federal agency but an organization or individual that was engaged in or providing information used for terrorism screening that is supported by the TSC. These changes will allow the TSC to disclose information to support any oversight efforts into TSC-related activities.

Routine Use K permits disclosure of information to a governmental entity lawfully engaged in collecting law enforcement, law enforcement intelligence, or national security intelligence information for law enforcement or intelligence purposes. TSC is modifying this Routine Use by changing ''national security intelligence information'' to ''national security information'' and ''national intelligence,'' which are terms defined

by Executive Order 12958, as amended, and the Intelligence Reform and Terrorism Prevention Act amendments to the National Security Act of 1947, respectively. Also, the TSC is specifying counterterrorism as one of the purposes for which information may be disclosed under this Routine Use, which is consistent with TSC's counterterrorism mission.

The Department of Justice previously published a notice modifying all of the Department's systems of records, including TSRS, to include a routine use to permit the disclosure of information to appropriate persons and entities for purposes of response and remedial efforts in the event that there has been a breach of the data contained in the Department's systems of records. See 72 FR 3410 (Jan. 25, 2007). The TSC is adding new Routine Use L to this notice to reflect this change.

Retention and Disposal

Although TSC is a multi-agency organization, the FBI administers TSC. Recently, the FBI obtained approval from the National Archives and Records Administration for its request for records disposition authority for records created and maintained by the TSC. The TSC is modifying this language to provide information on the approved retention periods for TSC records described in Justice/FBI–019. For records maintained in the Terrorist Screening Database (TSDB), active records are maintained for 99 years and inactive (archived) records are maintained for 50 years. Encounter Management Application (EMA) records, which document positive, negative, and inconclusive screening encounters with individuals in the TSDB, are maintained for 99 years. TSC maintains EMA records on negative encounters, i.e., a person who is initially identified as a possible match to a TSDB identity but ultimately determined not to be a match, in order to expedite future screening of those individuals and to support the redress process. Records of redress inquiries and quality assurance matters are maintained for at least six years. Audit logs are maintained for 25 years and records of user audits are maintained for ten years.

Contesting Record Procedures

The TSC is adding language to this section to refer individuals to the TSC's public Web site for additional information on the redress process and the procedures for filing a complaint related to terrorism screening.

Record Source Categories

The TSC is modifying this section to include ''private sector entities engaged in terrorism screening'' as a record source category. This change is being made to reflect that the TSC may receive information for screening from the private sector in support of the TSC's mission, as set forth in HSPD 6, to support ''private sector screening processes that have a substantial bearing on homeland security.''

Public Comments Invited

Public comments are invited on all aspects of the revised system notice, including the retention periods for records and the new categories of individuals and records. See **ADDRESSES** section above for information on how to submit comments.

In accordance with 5 U.S.C. 552a(r), the Department of Justice has provided a report of this amended system of records to the Office of Management and Budget and to Congress.

Dated: August 14, 2007.

Lee J. Lofthus,

Assistant Attorney General for Administration.

JUSTICE/FBI–019

SYSTEM NAME:

Terrorist Screening Records System (TSRS).

SECURITY CLASSIFICATION:

Classified, unclassified (law enforcement sensitive).

SYSTEM LOCATION:

Records described in this notice are maintained at the Terrorist Screening Center, Federal Bureau of Investigation, Washington, D.C., and at facilities operated by other government entities for terrorism screening, system back-up, and continuity of operations purposes.

CATEGORIES OF INDIVIDUALS COVERED BY THE SYSTEM:

a. Individuals known or appropriately suspected to be or have been engaged in conduct constituting, in preparation for, in aid of, or related to terrorism (''known or suspected terrorists'');

b. Individuals who are the subject of queries against TSC information systems;

c. Individuals identified during a terrorism screening process as a possible identity match to a known or suspected terrorist and other individuals who accompany or travel with such individuals;

d. Individuals who are misidentified as a possible identity match to a known or suspected terrorist (''misidentified persons'');

e. Individuals about whom a terrorist watchlist-related redress inquiry has been made; and

f. Individuals whose information is collected and maintained for information system user auditing and security purposes, such as individuals who are authorized users of TSC information systems.

CATEGORIES OF RECORDS IN THE SYSTEM:

a. Identifying information, such as name, date of birth, place of birth, biometrics, photographs, passport and/or drivers license information, and other available identifying particulars used to compare the identity of an individual being screened with a known or suspected terrorist, including audit records containing this information;

b. Information about encounters with individuals covered by this system, such as date, location, screening entity, analysis, associated individuals, and results (positive or negative identity match), and, for encounters with known or suspected terrorists only, other entities notified and details of any law enforcement, intelligence, or other operational response;

c. For known or suspected terrorists, in addition to the categories of records listed above, references to and/or information from other government law enforcement and intelligence databases, or other relevant databases that may contain terrorism information;

d. For misidentified persons, in addition to the categories of records listed above, additional identifying information that will be used during screening only for the purpose of distinguishing them from a known or suspected terrorist who has similar identifying characteristics (such as name and date of birth);

e. For redress matters, in addition to the categories of records listed above, information provided by individuals or their representatives, information provided by the screening agency, and internal work papers and other documents related to researching and resolving the matter;

f. Information collected and compiled to maintain an audit trail of the activity of authorized users of TSC information systems, such as user name/ID, date/time, search query and results data, user activity information (e.g., record retrieval, modification, or deletion data), and record numbers; and,

g. Archived records and record histories from the Terrorist Screening Database, Encounter Management Application, and other TSC data systems that are part of the TSRS.

AUTHORITY FOR MAINTENANCE OF THE SYSTEM:

Homeland Security Presidential Directive-6, ''Integration and Use of Screening Information to Protect Against Terrorism'' (Sept. 16, 2003); Executive Order 13388, Further Strengthening the Sharing of Terrorism Information to Protect Americans,'' (October 25, 2005); the Intelligence Reform and Terrorism Prevention Act of 2004, Pub. L. 108–458; the National Security Act of 1947, as amended; and 28 U.S.C. 533. In the event that the TSC's continuity-of-operations plans are invoked, the agency that assumes TSC operational functions will have the authority to administer the Terrorist Screening Records System as necessary to carry out those functions.

PURPOSE(S):

a. To implement the U.S. Government's National Strategy for Homeland Security and Homeland Security Presidential Directive-6, to identify potential terrorist threats, to uphold and enforce the law, and to ensure public safety.

b. To consolidate the government's approach to terrorism screening and provide for the appropriate and lawful use of terrorist information in screening processes.

c. To maintain current, accurate and thorough terrorist information in a consolidated terrorist screening database and determine which terrorism screening processes will use each entry in the database.

d. To ensure that appropriate information possessed by State, local, territorial, and tribal governments, which is lawfully available to the Federal Government, is considered in determinations made by the TSC as to whether a person is a match to a known or suspected terrorist.

e. To host mechanisms and make terrorism information available to support appropriate domestic, and foreign terrorism screening processes, and private-sector screening processes that have a substantial bearing on homeland security.

f. To provide continual operational support to assist in the identification of persons screened and to facilitate an appropriate and lawful response when a known or suspected terrorist is identified in an authorized screening process.

g. To provide appropriate government officials, agencies, or organizations with information about encounters with known or suspected terrorists.

h. To assist persons misidentified during a terrorism screening process and to assist screening agencies or entities in responding to individual complaints about the screening process (redress).

i. To oversee the proper use, maintenance, and security of TSC data systems and TSC personnel.

ROUTINE USES OF RECORDS MAINTAINED IN THE SYSTEM, INCLUDING CATEGORIES OF USERS AND THE PURPOSES OF SUCH USES:

In addition to those disclosures generally permitted under 5 U.S.C. 552a(b) of the Privacy Act, the records or information in this system may be disclosed as a routine use, under 5 U.S.C. 552a(b)(3), in accordance with blanket routine uses established for FBI record systems. See Blanket Routine Uses (BRU) Applicable to More Than One FBI Privacy Act System of Records, Justice/FBI–BRU, published on June 22, 2001 at 66 FR 33558 and amended on February 14, 2005 at 70 FR 7513. In addition, as routine uses specific to this system, the TSC may disclose relevant system records to the following persons or entities and under the circumstances or for the purposes described below, to the extent such disclosures are compatible with the purpose for which the information was collected. (Routine uses are not meant to be mutually exclusive and may overlap in some cases.)

A. To those federal agencies that have agreed to provide support to TSC for purposes of ensuring the continuity of TSC operations.

B. To federal, state, local, tribal, territorial, foreign, multinational or other public agencies or entities, to entities regulated by any such agency or entity, and to owners/operators of critical infrastructure or private sector entities with a substantial bearing on homeland security and their agents, contractors or representatives, for the following purposes: (1) For use in and in support of terrorism screening authorized by the U.S. Government, (2) to provide appropriate notifications of the results of terrorism screening using information from the Terrorist Screening Database or a threat related to a positive encounter with an individual identified in the Terrorist Screening Database, (3) to facilitate any appropriate law enforcement or other response (e.g., medical and containment response to a biological hazard) to a known or suspected terrorist or a threat related to the encounter, and (4) to assist persons misidentified during a screening process.

C. To any person, organization, or governmental entity in order to notify them of a serious terrorist threat for the purpose of guarding against or responding to such a threat.

D. To federal, state, local, tribal, territorial, foreign, or multinational agencies or entities, or other organizations that are engaged in, or are planning to engage in terrorism screening authorized by the U.S. Government, for the purpose of the development, testing, or modification of information technology systems used or intended to be used during or in support of the screening process; whenever practicable, however, TSC, to the extent possible, will substitute anonymized or de-identified data, such that the identity of the individual cannot be derived from the data.

E. To federal, state, local, tribal, territorial, foreign, multinational agencies or entities, or private sector entities to assist in coordination of terrorist threat awareness, assessment, analysis or response.

F. To any person or entity in either the public or private sector, domestic or foreign, where reasonably necessary to elicit information or cooperation from the recipient for use by the TSC in the performance of an authorized function, such as obtaining information from data sources as to the thoroughness, accuracy, currency, or reliability of the data provided so that the TSC may review the quality and integrity of its records for quality assurance or redress purposes, and may also assist persons misidentified during a screening process.

G. To any federal, state, local, tribal, territorial, foreign or multinational agency, task force, or other entity or person that receives information from the U.S. Government for terrorism screening purposes, in order to facilitate TSC's or the recipient's review, maintenance, and correction of TSC data for quality assurance or redress purposes, and to assist persons misidentified during a screening process.

H. To any agency, organization or person for the purposes of (1) performing authorized security, audit, or oversight operations of the DOJ, FBI, TSC, or any agency, organization, or person engaged in or providing information used for terrorism screening that is supported by the TSC, and (2) meeting related reporting requirements.

I. To a former employee of the TSC or a former contractor supporting the TSC for purposes of: Responding to an official inquiry by a federal, state, or local government entity or professional licensing authority, in accordance with any applicable government regulations; or facilitating communications with a former employee/contractor that may be necessary for personnel-related or other official purposes where the TSC

requires information and/or consultation assistance from the former employee/contractor regarding a matter within that person's former area of responsibility.

J. To any criminal, civil, or regulatory law enforcement authority (whether federal, state, local, territorial, tribal, multinational or foreign) where the information is relevant to the recipient entity's law enforcement responsibilities.

K. To a governmental entity lawfully engaged in collecting law enforcement, law enforcement intelligence, national security information, national intelligence, or terrorism information for law enforcement, intelligence, or counterterrorism purposes.

L. To appropriate agencies, entities, and persons when (1) the Department of Justice suspects or has confirmed that the security or confidentiality of information in the system of records has been compromised; (2) the Department of Justice has determined that as a result of the suspected or confirmed compromise there is a risk of harm to economic or property interests, identity theft or fraud, or harm to the security or integrity of this system or other systems or programs (whether maintained by the Department or another agency or entity) that rely upon the compromised information; and (3) the disclosure made to such agencies, entities, and persons is reasonably necessary to assist in connection with the Department of Justice's efforts to respond to the suspected or confirmed compromise and prevent, minimize, or remedy such harm.

DISCLOSURE TO CONSUMER REPORTING AGENCIES:

None.

POLICIES AND PRACTICES FOR STORING, RETRIEVING, ACCESSING, RETAINING, AND DISPOSING OF RECORDS IN THE SYSTEM:

STORAGE:

Records in this system are stored in paper and/or electronic format. Electronic storage is on servers, CD–ROMs, DVD–ROMs, and magnetic tapes.

RETRIEVABILITY:

Records in this system are typically retrieved by individual name, date of birth, passport number, and other identifying data, including unique identifying numbers assigned by the TSC or other government agencies.

SAFEGUARDS:

All records are maintained in a secure government facility with access limited to only authorized personnel or authorized and escorted visitors. Physical security protections include guards and locked facilities requiring badges and passwords for access. Records are accessed only by authorized government personnel and contractors and are protected by appropriate physical and technological safeguards to prevent unauthorized access. All Federal employees and contractors assigned to the TSC must hold an appropriate security clearance, sign a non-disclosure agreement, and undergo privacy and security training.

RETENTION AND DISPOSAL:

Records in this system will be retained and disposed of in accordance with the records schedule approved by the National Archives and Records Administration. For records maintained in the Terrorist Screening Database, active records are maintained for 99 years and inactive (archived) records are maintained for 50 years. Records of possible encounters with individuals on the Terrorist Screening Database are maintained for 99 years. Records of redress inquiries and quality assurance matters are maintained for at least six years. Audit logs are maintained for 25 years and records of user audits are maintained for ten years.

SYSTEM MANAGER(S) AND ADDRESS:

Director, Terrorist Screening Center, Federal Bureau of Investigation, FBI Headquarters, 935 Pennsylvania Avenue, NW., Washington, DC 20535–0001.

NOTIFICATION PROCEDURE:

Because this system contains classified intelligence and law enforcement information related to the government's counterterrorism, law enforcement, and intelligence programs, records in this system have been exempted from notification, access, and amendment to the extent permitted by subsections (j) and (k) of the Privacy Act.

Requests for notification should be addressed to the FBI at the address and according to the requirements set forth below under the heading ''Record Access Procedures.''

RECORD ACCESS PROCEDURES:

Because this system contains classified intelligence and law enforcement information related to the government's counterterrorism, law enforcement and intelligence programs, records in this system have been exempted from notification, access, and amendment to the extent permitted by subsections (j) and (k) of the Privacy Act. A request for access to a non-exempt record shall be made in writing with the envelope and the letter clearly marked ''Privacy Act Request.'' Include in the request your full name and complete address. The requester must sign the request; and, to verify it, the signature must be notarized or submitted under 28 U.S.C. 1746, a law that permits statements to be made under penalty of perjury as a substitute for notarization. You may submit any other identifying data you wish to furnish to assist in making a proper search of the system. Requests for access to information must be addressed to the Record Information Dissemination Section, Federal Bureau of Investigation, 935 Pennsylvania Avenue, NW., Washington, DC 20535–0001.

CONTESTING RECORD PROCEDURES:

Because this system contains classified intelligence and law enforcement information related to the government's counterterrorism, law enforcement and intelligence programs, records in this system are exempt from notification, access, and amendment to the extent permitted by subsections (j) and (k) of the Privacy Act (5 U.S.C. 552a). Requests for amendment should be addressed to the FBI at the address and according to the requirements set forth above under the heading ''Record Access Procedures.''

If, however, individuals are experiencing repeated delays or difficulties during a government screening process and believe that this might be related to terrorist watch list information, they may contact the Federal agency that is conducting the screening process in question (''screening agency''). The screening agency is in the best position to determine if a particular problem relates to a terrorist watch list entry or is due to some other cause, such as a criminal history, an immigration violation or random screening. Some individuals also experience repeated delays during screening because their names and/or other identifying data, such as dates of birth, are similar to those of known or suspected terrorists. These individuals, referred to as ''misidentified persons,'' often believe that they themselves are on a terrorist watch list, when in fact they only bear a similarity in name or other identifier to an individual on the list. Most screening agencies have or are developing procedures to expedite the clearance of misidentified persons during screening.

By contacting the screening agency with a complaint, individuals will be able to take advantage of the procedures available to help misidentified persons and others experiencing screening problems. Check the agency's

requirements for submitting complaints but, at a minimum, individuals should describe in as much detail as possible the problem they are having, including dates and locations of screening, and provide sufficient information to identify themselves, such as full name, citizenship status, and date and place of birth. The TSC assists the screening agency in resolving any screening complaints that may relate to terrorist watch list information, but does not receive or respond to individual complaints directly. However, if TSC receives any such complaints, TSC will forward them to the appropriate screening agency.

Additional information about the redress process and how to file a complaint with a screening agency is available on TSC's Web site at *http://www.fbi.gov/terrorinfo/counterrorism/redress.htm.*

RECORD SOURCE CATEGORIES

Information in this system is obtained from individuals covered by the system, public sources, agencies and private sector entities conducting terrorism screening, law enforcement and intelligence agency record systems, government databases, and foreign governments.

EXEMPTIONS CLAIMED FOR THE SYSTEM

The Attorney General has exempted this system from subsections (c)(3) and (4), (d)(1), (2), (3) and (4), (e)(1), (2), (3), (5) and (8), and (g) of the Privacy Act pursuant to 5 U.S.C. 552a(j) and (k). These exemptions apply only to the extent that information in the system is subject to exemption pursuant to 5 U.S.C. 552a(j) and (k). Rules have been promulgated in accordance with the requirements of 5 U.S.C. 553(b), (c) and (e).

BILLING CODE 4410–02–P

DEPARTMENT OF LABOR

Employment Standards Administration

Proposed Collection; Comment Request

ACTION: Notice.

SUMMARY: The Department of Labor, as part of its continuing effort to reduce paperwork and respondent burden, conducts a preclearance consultation program to provide the general public and Federal agencies with an opportunity to comment on proposed and/or continuing collections of information in accordance with the Paperwork Reduction Act of 1995 (PRA95) [44 U.S.C. 3506(c)(2)(A)]. This program helps to ensure that requested data can be provided in the desired format, reporting burden (time and financial resources) is minimized, collection instruments are clearly understood, and the impact of collection requirements on respondents can be properly assessed. Currently, the Employment Standards Administration is soliciting comments concerning the proposed collection: Application for Continuation of Death Benefit for Student (LS–266). A copy of the proposed information collection request can be obtained by contacting the office listed below in the addresses section of this Notice.

DATES: Written comments must be submitted to the office listed in the addresses section below on or before October 22, 2007.

ADDRESSES: Ms. Hazel M. Bell, U.S. Department of Labor, 200 Constitution Ave., NW., Room S–3201, Washington, DC 20210, telephone (202) 693–0418, fax (202) 693–1451, E-mail *bell.hazel@dol.gov*. Please use only one method of transmission for comments (mail, fax, or E-mail).

SUPPLEMENTARY INFORMATION:

I. Background

The Office of Workers' Compensation Programs (OWCP) administers the Longshore and Harbor Workers' Compensation Act. The Act provides for continuation of death benefits for a child or certain other surviving dependents after the age of 18 (to age 23) if the dependent qualifies as a student as defined in Section 2 (18) of the Act. Regulation 20 CFR 702.121 addresses the use of forms for the reporting of required information. The LS–266 is submitted by the parent or guardian of the dependent for whom continuation of benefits is sought. The statements contained on the form must be verified by an official of the educational institution. The information is used by the Department of Labor to determine whether a continuation of the benefits is justified. This information collection is currently approved for use through December 31, 2007.

II. Review Focus

The Department of Labor is particularly interested in comments which:

- Evaluate whether the proposed collection of information is necessary for the proper performance of the functions of the agency, including whether the information will have practical utility;
- Evaluate the accuracy of the agency's estimate of the burden of the proposed collection of information, including the validity of the methodology and assumptions used;
- Enhance the quality, utility and clarity of the information to be collected; and
- Minimize the burden of the collection of information on those who are to respond, including through the use of appropriate automated, electronic, mechanical, or other technological collection techniques or other forms of information technology, e.g., permitting electronic submissions of responses.

III. Current Actions

The Department of Labor seeks the approval of the extension of this information collection in order to ensure that eligible dependents may continue to receive benefits to which they are entitled.

Type of Review: Extension.

Agency: Employment Standards Administration.

Title: Application for Continuation of Death Benefits for Student.

OMB Number: 1215–0073.

Agency Number: LS–266.

Affected Public: Individuals or households; Business or other for-profit.

Total Respondents: 43.

Total Annual responses: 43.

Time per Response: 30 minutes.

Estimated Total Burden Hours: 22.

Frequency: On occasion.

Total Burden Cost (capital/startup): $0.

Total Burden Cost (operating/maintenance): $0.

Comments submitted in response to this notice will be summarized and/or included in the request for Office of Management and Budget approval of the information collection request; they will also become a matter of public record.

Dated: August 16, 2007.

Hazel M. Bell,

Acting Chief, Branch of Management Review and Internal Control, Division of Financial Management, Office of Management, Administration and Planning, Employment Standards Administration.

[FR Doc. E7–16533 Filed 8–21–07; 8:45 am]

BILLING CODE 4510–CF–P

DEPARTMENT OF LABOR

Mine Safety and Health Administration

Proposed Information Collection Request Submitted for Public Comment and Recommendations; Record of Individual Exposure to Radon Daughters

ACTION: Notice.

SUMMARY: The Department of Labor, as part of its continuing effort to reduce paperwork and respondent burden conducts a preclearance consultation program to provide the general public and Federal agencies with an opportunity to comment on proposed and/or continuing collections of information in accordance with the Paperwork Reduction Act of 1995 (PRA95) [44 U.S.C. 3506(c)(2)(A)]. This program helps to ensure that requested data can be provided in the desired format, reporting burden (time and financial resources) is minimized, collection instruments are clearly understood, and the impact of collection requirements on respondents can be properly assessed.

DATES: Submit comments on or before October 22, 2007.

ADDRESSES: Send comments to, Debbie Ferraro, Management Services Division, 1100 Wilson Boulevard, Room 2171, Arlington, VA 22209–3939. Commenters are encouraged to send their comments on computer disk, or via E-mail to *Ferraro.Debbie@DOL.GOV.* Ms. Ferraro can be reached at (202) 693–9821 (voice), or (202) 693–9801 (facsimile).

FOR FURTHER INFORMATION CONTACT: Contact the employee listed in the **ADDRESSES** section of this notice.

SUPPLEMENTARY INFORMATION:

I. Background

MSHA's primary goal is the protection of America's most precious mining resource, the miner. To achieve this goal, this agency has to keep information regarding the hazards faced and the progress made within the industry to develop and maintain a safe and healthy work environment. Records concerning the health and welfare of miners are especially important, given that the nature of the exposure could result in medical complications later in the miner's life. To this end, the record keeping of Radon Daughters is essential information. Each year the industry records and reports the exposure levels that its workforce has faced during the past 12 months. This information is archived and stored for retrieval by the exposed party, or legal representative, should a medical release be deemed necessary. This reporting of the exposure numbers also serves to inform MSHA of the industry expansion or decrease as well as health threats incurred.

Concurrently, the United States economy is calling for production rates that are lower than those in recent years. Regardless of the number of miners exposed, MSHA needs to keep the recording requirements for Radon Daughters to ensure that the records regarding the miners' level of exposure today is available to them tomorrow and throughout their lifetimes.

II. Desired Focus

Currently, the Mine Safety and Health Administration (MSHA) is soliciting comments concerning the proposed extension of the information collection related to the Record of Individual Exposure to Radon Daughters. MSHA is particularly interested in comments which:

- Evaluate whether the proposed collection of information is necessary for the proper performance of the functions of the agency, including whether the information will have practical utility;
- Evaluate the accuracy of the agency's estimate of the burden of the proposed collection of information, including the validity of the methodology and assumptions used;
- Enhance the quality, utility, and clarity of the information to be collected; and
- Minimize the burden of the collection of information on those who are to respond, including through the use of appropriate automated, electronic, mechanical, or other technological collection techniques or other forms of information technology, e.g., permitting electronic submissions of responses.

A copy of the proposed information collection request may be viewed on the internet by accessing the MSHA home page (*http://www.msha.gov/*) and choosing ''Rules and Regs'', then choosing ''Fed Reg Docs.''

III. Current Actions

Currently, the Mine Safety and Health Administration (MSHA) is soliciting comments concerning the proposed extension of the information collection related to provide miners protection from radon daughter exposure.

Type of Review: Extension.

Agency: Mine Safety and Health Administration.

Title: Record of Individual Exposure to Radon Daughters.

OMB Number: 1219–0003.

Agency Form Number: MSHA 4000–9.

Frequency: Weekly.

Affected Public: Business or other for-profit.

Total Burden Respondents: 2.

Total Number of Responses: 100.

Total Burden Hours: 300.

Total Burden Cost (operating/maintaining): $0.

Comments submitted in response to this notice will be summarized and/or included in the request for Office of Management and Budget approval of the information collection request; they will also become a matter of public record.

Dated at Arlington, Virginia, this 16th day of August, 2007.

David L. Meyer,

Director, Office of Administration and Management.

[FR Doc. E7–16453 Filed 8–21–07; 8:45 am]

BILLING CODE 4510–43–P

DEPARTMENT OF LABOR

Mine Safety and Health Administration

Proposed Information Collection Request Submitted for Public Comment and Recommendations; Training Plans and Certificate of Training

ACTION: Notice.

SUMMARY: The Department of Labor, as part of its continuing effort to reduce paperwork and respondent burden, conducts a preclearance consultation program to provide the general public and Federal agencies with an opportunity to comment on proposed and/or continuing collections of information in accordance with the Paperwork Reduction Act of 1995 (PRA95) [44 U.S.C. 3506(c)(2)(A)]. This program helps to ensure that requested data can be provided in the desired format, reporting burden (time and financial resources) is minimized, collection instruments are clearly understood, and the impact of collection requirements on respondents can be properly assessed.

DATES: Submit comments on or before October 22, 2007.

ADDRESSES: Send comments to Debbie Ferraro, Management Services Division, 1100 Wilson Boulevard, Room 2171, Arlington, VA 22209–3939. Commenters are encouraged to send their comments on computer disk, or via Internet e-mail to *Ferraro.Debbie@DOL.GOV*. Ms. Ferraro can be reached at (202) 693–9821 (voice), or (202) 693–9801 (facsimile).

FOR FURTHER INFORMATION CONTACT: Contact the employee listed in the **ADDRESSES** section of this notice.

SUPPLEMENTARY INFORMATION:

I. Background

The Federal Mine Safety and Health Act of 1977 (Mine Act) recognizes that the role of education and training in the improvement of miner health and safety is an important element of federal efforts to make the nation's mines safer places in which to work. Section 115(a) of the Mine Act states that ''each operator of a coal or other mine shall have a health and safety program which shall be approved by the Secretary.'' Title 30, CFR 48.3 and 48.23 specifically address the requirements for training plans. Section 115(a) of the Mine Act requires that each mine operator have a program approved by the Secretary for training miners in the health and safety aspects of mining. Section 115(c) requires (a) That the mine operator certify on a form approved by the Secretary that the miner has received the specified training in each subject area of the approved health and safety training plan; (b) that the certificates be maintained by the operator and be available for inspection at the mine site; and (c) that the miner is entitled to a copy of the certificate upon completion of the training and when he leaves the operator's employ. Title 30, CFR Part 48 implements Section 115 of the Act by setting forth the requirements for obtaining approval of training programs and specifying the kinds of training, including refresher and hazard training, which must be provided to the miners. The standards are intended to ensure that miners will be effectively trained and certified in matters affecting their health and safety, with the ultimate goal being the reduction of frequency and severity of the injuries in the nation's mines.

II. Desired Focus of Comments

Currently, the Mine Safety and Health Administration (MSHA) is soliciting comments concerning the proposed extension of the information collection related to Training Plans. MSHA is particularly interested in comments which:

- Evaluate whether the proposed collection of information is necessary for the proper performance of the functions of the agency, including whether the information will have practical utility;
- Evaluate the accuracy of the agency's estimate of the burden of the proposed collection of information, including the validity of the methodology and assumptions used;
- Enhance the quality, utility, and clarity of the information to be collected; and
- Minimize the burden of the collection of information on those who are to respond, including through the use of appropriate automated, electronic, mechanical, or other technological collection techniques or other forms of information technology, e.g., permitting electronic submissions of responses.

A copy of the proposed information collection request can be obtained by contacting the employee listed in the **ADDRESSES** section of this notice or viewed on the internet by accessing the MSHA home page (*http://www.msha.gov/*) and selecting ''Rules and Regs'', then selecting ''Fed Reg Docs.''

III. Current Actions

Approved training plans are used to implement training programs for training new miners, training experienced miners, training miners for new tasks, annual refresher training, and hazard training. The plans are also used by MSHA to ensure that all miners are receiving the training necessary to perform their jobs in a safe manner. MSHA Form 5000–23, Certificate of Training, is used by mine operators to record mandatory training received by miners. Each form provides the mine operator with a recordkeeping document, the miner with a certificate of training, and MSHA a monitoring tool for determining compliance requirements. Currently the Mine Safety and Health Administration (MSHA) is soliciting comments concerning the proposed extension of the information collection related to Training Plans and Certificates of Training.

Type of Review: Extension of Currently Approved Collection.

Agency: Mine Safety and Health Administration.

Title: Training Plans and Certificate of Training.

OMB Number: 1219–0009 Extension.

Affected Public: Business or other for-profit.

Frequency: Annually and On Occasion.

Number of Respondents: 3,216.

Number of Annual Responses: 115,395.

Total Burden Hours: 13,287.

Total Annual Cost: $245,144.

Comments submitted in response to this notice will be summarized and/or included in the request for Office of Management and Budget approval of the information collection request; they will also become a matter of public record.

Dated at Arlington, Virginia, this 16th day of August, 2007.

David L. Meyer,

Director, Office of Administration and Management.

BILLING CODE 4510–43–P

DEPARTMENT OF LABOR

Occupational Safety and Health Administration

[Docket No. OSHA–2007–0018]

Logging Operations; Extension of the Office of Management and Budget's (OMB) Approval of Information Collection (Paperwork) Requirements

AGENCY: Occupational Safety and Health Administration (OSHA), Labor.

ACTION: Request for public comment.

SUMMARY: OSHA solicits public comment concerning its proposal to extend OMB approval of the information collection requirements specified in its Standard on Logging Operations (29 CFR 1910.266).

DATES: Comments must be submitted (postmarked, sent, or received) by October 22, 2007.

ADDRESSES:

Electronically: You may submit comments and attachments electronically at *http://www.regulations.gov,* which is the Federal eRulemaking Portal. Follow the instructions online for submitting comments.

Facsimile: If your comments, including attachments, are not longer than 10 pages, you may fax them to the OSHA Docket Office at (202) 693–1648.

Mail, hand delivery, express mail, messenger, or courier service: When using this method, you must submit three copies of your comments and attachments to the OSHA Docket Office, OSHA Docket No. OSHA–2007–0018, U.S. Department of Labor, Occupational Safety and Health Administration, Room N–2625, 200 Constitution Avenue, NW., Washington, DC 20210. Deliveries (hand, express mail, messenger, and courier service) are accepted during the Department of Labor's and Docket Office's normal business hours, 8:15 a.m. to 4:45 p.m., EST.

Instructions: All submissions must include the Agency name and OSHA docket number for the ICR (OSHA–2007–0018). All comments, including any personal information you provide, are placed in the public docket without change, and may be made available online at *http://www.regulations.gov.*

For further information on submitting comments see the ''Public Participation'' heading in the section of this notice titled **SUPPLEMENTARY INFORMATION**.

Docket: To read or download comments or other material in the docket, go to *http://www.regulations.gov* or the OSHA Docket Office at the address above. All documents in the docket (including this **Federal Register** notice) are listed in the *http://www.regulations.gov* index; however, some information (e.g., copyrighted material) is not publicly available to read or download through the Web site. All submissions, including copyrighted material, are available for inspection and copying at the OSHA Docket Office. You may also contact Theda Kenney at the address below to obtain a copy of the ICR.

FOR FURTHER INFORMATION CONTACT: Theda Kenney or Todd Owen, Directorate of Standards and Guidance, OSHA, U.S. Department of Labor, Room N–3609, 200 Constitution Avenue, NW., Washington, DC 20210; telephone (202) 693–2222.

SUPPLEMENTARY INFORMATION:

I. Background

The Department of Labor, as part of its continuing effort to reduce paperwork and respondent (i.e., employer) burden, conducts a preclearance consultation program to provide the public with an opportunity to comment on proposed and continuing information collection requirements in accordance with the Paperwork Reduction Act of 1995 (44 U.S.C. 3506(c)(2)(A)). This program ensures that information is in the desired format, reporting burden (time and costs) is minimal, collection instruments are clearly understood, and OSHA's estimate of the information collection burden is accurate. The Occupational Safety and Health Act of 1970 (the OSH Act) (29 U.S.C. 651 *et seq.*) authorizes information collection by employers as necessary or appropriate for enforcement of the OSH Act or for developing information regarding the causes and prevention of occupational injuries, illnesses, and accidents (29 U.S.C. 657). The OSH Act also requires that OSHA obtain such information with minimum burden upon employers, especially those operating small businesses, and to reduce to the maximum extent feasible unnecessary duplication of efforts in obtaining information (29 U.S.C. 657).

Paragraph (f)(1)(iii) of the Standard requires the employer to assure that operating and maintenance instructions are available on machines or in the area where the machine is being operated. Paragraph (g)(3) requires the employer to assure that operating and maintenance instructions are available in each vehicle.

Paragraph (i)(1) of the Standard requires employers to provide training for each employee, including supervisors. To meet this requirement, employers must conduct the training at the frequencies specified by paragraph (i)(2). Paragraph (i)(3) specifies that an employee's/supervisor's training must consist of the following elements: Safe work practices, including the use, operation, and maintenance of tools, machines, and vehicles the employee/supervisor uses or operates, as well as procedures, practices, and requirements of the employer's worksite; recognition and control of health and safety hazards associated with the employee's/supervisor's specific work tasks and logging operations in general; and the requirements of the Standard.

Paragraph (i)(10)(i) specifies that employers must verify that they are in compliance with the training requirements in paragraph (i). This certification must be in writing and provide the following information: The name/identifier of the employee/supervisor; the date(s) of the training; and either the signature of the employer or the individual who conducted the training. Paragraph (i)(10)(ii) requires employers to maintain the most recent certification for training completed by an employee/supervisor.

Training employees/supervisors in safe work practices and to recognize and control the safety and health hazards associated with their work tasks and overall logging operations enables them to prevent serious accidents by using specific procedures and equipment in a safe manner to avoid or to control dangerous exposures to these hazards.

Establishing and maintaining written certification of the training that each employee/supervisor has received (i.e., job and first aid) assures the employer that the training specified by the Standard has been conducted, and at the required frequencies. With regard to first-aid training, the certification assures that the employee's/supervisor's training certificate is currently valid. In addition, these records provide the most efficient means for an OSHA compliance officer to determine whether an employer performed the required training at the necessary and appropriate frequencies.

II. Special Issues for Comment

OSHA has a particular interest in comments on the following issues:

- Whether the proposed information collection requirements are necessary for the proper performance of the Agency's functions, including whether the information is useful;
- The accuracy of OSHA's estimate of the burden (time and costs) of the information collection requirements, including the validity of the methodology and assumptions used;
- The quality, utility, and clarity of the information collected; and
- Ways to minimize the burden on employers who must comply; for example, by using automated or other technological information collection and transmission techniques.

III. Proposed Actions

OSHA is requesting that OMB extend its approval of the information collection requirements contained in the Standard on Logging Operations (29 CFR 1910.266). The Agency is requesting to increase its existing burden hours from 30,751 hours to 31,286 hours for a total increase of 535 hours. The Agency will summarize the comments submitted in response to this notice and will include this summary in the request to OMB.

Type of Review: Extension of a currently approved collection.

Title: Logging Operations (29 CFR 1910.266).

OMB Number: 1218–0198.

Affected Public: Business or other for-profit.

Number of Respondents: 11,447.

Frequency of Recordkeeping: Initially; on occasion.

Average Time per Response: Varies from 1 minute (.02 hour) to maintain training certification records to 3 hours to conduct initial training.

Total Annual Hours Requested: 31,286.

Estimated Cost (Operation and Maintenance): $0.

IV. Public Participation—Submission of Comments on This Notice and Internet Access to Comments and Submissions

You may submit comments in response to this document as follows: (1) Electronically at *http://www.regulations.gov,* which is the Federal eRulemaking Portal; (2) by facsimile (FAX); or (3) by hard copy. All comments, attachments, and other material must identify the Agency name and the OSHA docket number for the ICR (Docket No. OSHA–2007–0018). You may supplement electronic submissions by uploading document files electronically. If you wish to mail additional materials in reference to an electronic or facsimile submission, you must submit them to the OSHA Docket

Office (see the section of this notice titled **ADDRESSES**). The additional materials must clearly identify your electronic comments by your name, date, and the docket number so the Agency can attach them to your comments.

Because of security procedures, the use of regular mail may cause a significant delay in the receipt of comments. For information about security procedures concerning the delivery of materials by hand, express delivery, messenger, or courier service, please contact the OSHA Docket Office at (202) 693–2350 (TTY (877) 889–5627).

Comments and submissions are posted without change at *http://www.regulations.gov.* Therefore, OSHA cautions commenters about submitting personal information such as social security numbers and date of birth. Although all submissions are listed in the *http://www.regulations.gov* index, some information (e.g., copyrighted material) is not publicly available to read or download through this Web site. All submissions, including copyrighted material, are available for inspection and copying at the OSHA Docket Office. Information on using the *http://www.regulations.gov* Web site to submit comments and access the docket is available at the Web site's ''User Tips'' link. Contact the OSHA Docket Office for information about materials not available through the Web site, and for assistance in using the Internet to locate docket submissions.

V. Authority and Signature

Edwin G. Foulke, Jr., Assistant Secretary of Labor for Occupational Safety and Health, directed the preparation of this notice. The authority for this notice is the Paperwork Reduction Act of 1995 (44 U.S.C. 3506 *et seq.*) and Secretary of Labor's Order No. 5–2002 (67 FR 65008).

Signed at Washington, DC, on August 15, 2007.

Edwin G. Foulke, Jr.,

Assistant Secretary of Labor for Occupational Safety and Health.

BILLING CODE 4510–26–P

NATIONAL SCIENCE FOUNDATION

Astronomy and Astrophysics Advisory Committee #13883; Notice of Meeting

In accordance with the Federal Advisory Committee Act (Pub. L. 92–463, as amended), the National Science Foundation announces the following Astronomy and Astrophysics Advisory Committee (#13883) meeting:

Date and Time: October 11–12, 2007, 8:30 a.m–5 p.m.

Place: National Science Foundation, Room 1235, Stafford I Building, 4201 Wilson Blvd., Arlington, VA 22230.

Type of Meeting: Open.

Contact Person: Dr. G. Wayne Van Citters, Director, Division of Astronomical Sciences, Suite 1045, National Science Foundation, 4201 Wilson Blvd., Arlington, VA 22230. Telephone: 703–292–4908.

Purpose of Meeting: To provide advice and recommendations to the National Science Foundation (NSF), the National Aeronautics and Space Administration (NASA) and the U.S. Department of Energy (DOE) on issues within the field of astronomy and astrophysics that are of mutual interest and concern to the agencies.

Agenda: To hear presentations of current programming by representatives from NSF, NASA, DOE and other agencies relevant to astronomy and astrophysics; to discuss current and potential areas of cooperation between the agencies; to formulate recommendations for continued and new areas of cooperation and mechanisms for achieving them.

Dated: August 16, 2007.

Susanne E. Bolton,

Committee Management Officer.

BILLING CODE 7555–01–P

NUCLEAR REGULATORY COMMISSION

Agency Information Collection Activities: Submission for the Office of Management and Budget (OMB) Review; Comment Request

AGENCY: U.S. Nuclear Regulatory Commission (NRC).

ACTION: Notice of the OMB review of information collection and solicitation of public comment.

SUMMARY: The NRC has recently submitted to OMB for review the following proposal for the collection of information under the provisions of the Paperwork Reduction Act of 1995 (44 U.S.C. Chapter 35). The NRC hereby informs potential respondents that an agency may not conduct or sponsor, and that a person is not required to respond to, a collection of information unless it displays a currently valid OMB control number.

1. Type of submission, new, revision, or extension: Revision.

2. The title of the information collection: NRC Form 327, Special Nuclear Material (SNM) and Source Material (SM) Physical Inventory Summary Report, and NUREG/BR–0096, Instructions and Guidance for Completing Physical Inventory Summary Reports.

3. The form number if applicable: NRC Form 327.

4. How often the collection is required: The frequency of reporting corresponds to the frequency of required inventories, which depends essentially on the strategic significance of the SNM covered by the particular license. Certain licensees possessing strategic SNM are required to report inventories every 6 months. Licensees possessing SNM of moderate strategic significance must report every 9 months in accordance with the revised regulation in 10 CFR part 74.43. Licensees possessing SNM of low strategic significance must report annually, except two licensees must report their dynamic inventories every 2 months and a static inventory on an annual basis.

5. Who will be required or asked to report: Fuel facility licensees possessing special nuclear material.

6. An estimate of the number of annual responses: 25 responses.

7. The estimated number of annual respondents: 9 respondents.

8. An estimate of the total number of hours needed annually to complete the requirement or request: 100 hours (an average of approximately 4 hours per response for 25 responses).

9. An indication of whether section 3507(d), Public Law 104–13 applies: N/A.

10. Abstract: NRC Form 327 is submitted by fuel facility licensees to account for special nuclear material. The data is used by NRC to assess licensee material control and accounting programs and to confirm the absence of (or detect the occurrence of) special nuclear material theft or diversion. NUREG/BR–0096 provides specific guidance and instructions for completing the form in accordance with the requirements appropriate for a particular licensee.

A copy of the final supporting statement may be viewed free of charge at the NRC Public Document Room, One White Flint North, 11555 Rockville Pike, Room O–1 F21, Rockville, MD 20852. OMB clearance requests are available at the NRC worldwide Web site: *http://www.nrc.gov/public-involve/doc-comment/omb/index.html.* The document will be available on the NRC home page site for 60 days after the signature date of this notice.

Comments and questions should be directed to the OMB reviewer listed below by September 21, 2007. Comments received after this date will be considered if it is practical to do so, but assurance of consideration cannot

be given to comments received after this date. Desk Officer, Office of Information and Regulatory Affairs (3150–0139), NEOB–10202, Office of Management and Budget, Washington, DC 20503.

Comments can also be e-mailed to *Nathan.Frey@omb.eop.gov* or submitted by telephone at (202) 395–4650.

The NRC Clearance Officer is Margaret A. Janney, 301–415–7245.

Dated at Rockville, Maryland, this 15th day of August, 2007.

For the Nuclear Regulatory Commission.

Margaret A. Janney,

NRC Clearance Officer, Office of Information Services.

[FR Doc. E7–16547 Filed 8–21–07; 8:45 am]

BILLING CODE 7590–01–P

NUCLEAR REGULATORY COMMISSION

Public Meeting Notice of Nuclear Energy Institute/U.S. Nuclear Regulatory Commission Working Groups

AGENCY: Nuclear Regulatory Commission.

ACTION: Solicitation of interest in working group participation.

DATES: August 23, 2007.

Time: 8 a.m.

Location: U.S. Nuclear Regulatory Commission, Executive Boulevard Building, 6003 Executive Boulevard, Rooms, EBB–1–B13 and EBB–1–B15, Rockville, MD 20852.

FOR FURTHER INFORMATION CONTACT: James Smith, Project Manager, Technical Support Branch, Special Projects and Technical Support Directorate, Division of Fuel Cycle Safety and Safeguards, Office of Nuclear Material Safety and Safeguards, U.S. Nuclear Regulatory Commission, MS EBB2–C40M, Washington, DC 20555–0001. Telephone: (301) 492–3234; fax number: (301) 492–6521; e-mail: *jas4@nrc.gov*.

SUPPLEMENTARY INFORMATION:

I. Introduction

The Nuclear Regulatory Commission (NRC) held a public workshop with the Nuclear Energy Institute and other stakeholders on June 14, 2007, to discuss certain implementation issues related to the implementation of subpart H of 10 CFR part 70: (1) Part 70, Appendix A Reporting, (2) refinement of the definition of Uranium Solubility under part 70, (3) the use of Digital Instrumentation and Control in safety and process settings, (4) the § 70.72 Facility Change Process, and (5) the possible Enforcement Policy Revisions.

Of the path forward for each of these five issues, four included a short term resolution to address the problem via small working groups comprised of industry and NRC representatives producing a product (white paper) which would ultimately be reviewed/approved by management representatives from both NRC and NEI and/or Industry representative management with an opportunity for members of the public to participate if desired. The exception to this small working group approach was the resolution of the issues associated with the use of Digital Instrumentation and Control in safety and process settings. Since this issue was far reaching, that could impact other nuclear arenas, some already addressing this area already pursuing research in this area, it was proposed that industry participate in the current steering committees involved in addressing these issues and NRC will facilitate interested industry members admission/seating on these committees so that their interests can be heard.

In addition to the small working group approach, for Enforcement Policy Revisions, a multiple day public workshop in Region II with participation by the NRC's Offices of Enforcement and General Counsel should be held to establish the limits to what can be changed in the Enforcement Policy by the small working group.

II. Summary

The purpose of this notice is to provide notice of the date and location of the first kickoff meeting of these small working groups as these white papers are developed. The number of persons participating in these groups will be limited to one or two; therefore, the first one or two person expressing interest in a particular group will have priority for participation in the working group; however, all meetings of these groups will be noticed and open to the public. Please contact the staff contact listed above to express your interest in participating in one or more of these working groups.

Dated at Rockville, Maryland, this 14th day of August 2007.

For the Nuclear Regulatory Commission.

Deborah A. Jackson,

Chief, Technical Support Branch, Special Projects and Technical Support Directorate, Division of Fuel Cycle Safety and Safeguards, Office of Nuclear Material Safety and Safeguards.

OVERSEAS PRIVATE INVESTMENT CORPORATION

Submission of OMB Review; Comments Request

AGENCY: Overseas Private Investment Corporation (OPIC).

ACTION: Request for comments.

SUMMARY: Under the provisions of the Paperwork Reduction Act (44 U.S.C. Chapter 35), agencies are required to publish a Notice in the **Federal Register** notifying the public that the Agency has prepared an information collection request for OMB review and approval and has requested public review and comment on the submission. Comments are being solicited on the need for the information; the accuracy of the Agency's burden estimate; the quality, practical utility and clarity of the information to be collected; and on ways to minimize the reporting burden, including automated collection techniques and uses of other forms of technology. The proposed form under review, OMB control number 3420–0015, is summarized below.

DATES: Comments must be received within 30 calendar-days of publication of this Notice. (The 60-day notice was posted on June 19, 2007, Vol. 72, No. 117.)

ADDRESSES: Copies of the subject form and the request for review prepared for submission to OMB may be obtained from the Agency Submitting Officer. Comments on the form should be submitted to the Agency Submitting Officer.

FOR FURTHER INFORMATION CONTACT: *Agency Submitting Officer:* Essie Bryant, Records Management Officer, Overseas Private Investment Corporation, 1100 New York Avenue, NW., Washington, DC 20527; (202) 336–8563.

Summary of Form Under Review

Type of Request: Revised Form.

Title: Application for Financing.

Form Number: OPIC–115.

Frequency of Use: One per investor, per project.

Type of Respondents: Business or other institution (except farms); individuals.

Description of Affected Public: U.S. companies or citizens investing overseas.

Reporting Hours: 3.15 hours per project.

Number of Responses: 150 per year.

Federal Cost: $21,975.

Authority for Information Collection: Section 231 and 234(b) and (c) of the Foreign Assistance Act of 1961, as amended.

Abstract (Needs and Uses): The OPIC 115 form is the principal document used by OPIC to determine the investor's and the project's eligibility for debt financing, assess the environmental impact and developmental effects of the project, measure the economic effects for the United States and the host country economy, and collect information for underwriting and worker rights analysis.

Dated: August 15, 2007.

John Crowley, III,

Senior Administrative Counsel, Department of Legal Affairs.

RAILROAD RETIREMENT BOARD

Proposed Collection; Comment Request

Summary: In accordance with the requirement of Section 3506(c)(2)(A) of the Paperwork Reduction Act of 1995 which provides opportunity for public comment on new or revised data collections, the Railroad Retirement Board (RRB) will publish periodic summaries of proposed data collections.

Comments are invited on: (a) Whether the proposed information collection is necessary for the proper performance of the functions of the agency, including whether the information has practical utility; (b) the accuracy of the RRB's estimate of the burden of the collection of the information; (c) ways to enhance the quality, utility, and clarity of the information to be collected; and (d) ways to minimize the burden related to the collection of information on respondents, including the use of automated collection techniques or other forms of information technology.

Title and Purpose of Information Collection

Application and Claim for Unemployment Benefits and Employment Service, OMB 3220–0022. Section 2 of the Railroad Unemployment Insurance Act (RUIA), provides unemployment benefits for qualified railroad employees. These benefits are generally payable for each day of unemployment in excess of four during a registration period (normally a period of 14 days).

Section 12 of the RUIA provides that the RRB establish, maintain and operate free employment facilities directed toward the reemployment of railroad employees. The procedures for applying for the unemployment benefits and employment service and for registering and claiming the benefits are prescribed in 20 CFR part 325.

The RRB utilizes the following forms to collect the information necessary to pay unemployment benefits: Form UI–1 (or its Internet equivalent, Form UI–1 (Internet), *Application for Unemployment Benefits and Employment Service*, is completed by a claimant for unemployment benefits once in a benefit year, at the time of first registration. Completion of Form UI–1 or UI–1 (Internet) also registers an unemployment claimant for the RRB's employment service. The RRB proposes no changes to Form UI–1 or UI–1 (Internet).

The RRB also utilizes Form UI–3, (or its Internet equivalent Form UI–3 (Internet) *Claim for Unemployment Benefits* for use in claiming unemployment benefits for days of unemployment in a particular registration period, normally a period of 14 days. The RRB proposes no changes to Form UI–3 or UI–3 (Internet).

Completion of Forms UI–1, UI–1 (Internet), UI–3 and UI–3 (Internet) is required to obtain or retain benefits. The number of responses required of each claimant varies, depending on their period of unemployment. The RRB estimates that approximately 9,977 Form UI–1's (9257 paper and 720 Internet) will be filed annually. Completion time for Form UI–1 and UI–1 (Internet) is estimated at 10 minutes. The RRB estimates that approximately 74,326 Form UI–3's (65,035 manual and 9,291 Internet) will be filed annually. Completion time for Form UI–3 and the UI–3 (Internet) is estimated at 6 minutes.

Additional Information or Comments: To request more information or to obtain a copy of the information collection justification, forms, and/or supporting material, please call the RRB Clearance Officer at (312) 751–3363 or send an e-mail request to *Charles.Mierzwa@RRB.GOV.* Comments regarding the information collection should be addressed to Ronald J. Hodapp, Railroad Retirement Board, 844 North Rush Street, Chicago, Illinois

60611–2092 or send an e-mail to *Ronald.Hodapp@RRB.GOV*. Written comments should be received within 60 days of this notice.

Charles Mierzwa,

Clearance Officer.

BILLING CODE 7905–01–P

RAILROAD RETIREMENT BOARD

Agency Forms Submitted for OMB Review, Request for Comments

Summary: In accordance with the Paperwork Reduction Act of 1995 (44 U.S.C. Chapter 35), the Railroad Retirement Board (RRB) is forwarding an Information Collection Request (ICR) to the Office of Information and Regulatory Affairs (OIRA), Office of Management and Budget (OMB) to request an extension of a currently approved collection of information: 3220–0097, consisting of Form UI–1e, Pay Rate Report. Our ICR describes the information we seek to collect from the public. Review and approval by OIRA ensures that we impose appropriate paperwork burdens.

The RRB invites comments on the proposed collection of information to determine (1) the practical utility of the collection; (2) the accuracy of the estimated burden of the collection; (3) ways to enhance the quality, utility and clarity of the information that is the subject of collection; and (4) ways to minimize the burden of collections on respondents, including the use of automated collection techniques or other forms of information technology. Comments to RRB or OIRA must contain the OMB control number of the ICR. For proper consideration of your comments, it is best if RRB and OIRA receive them within 30 days of publication date.

Under Section 2(a) of the Railroad Unemployment Insurance Act, the daily benefit rate for unemployment and sickness benefits depends on the claimant's last daily rate of pay in the base year. The procedures pertaining to the use of a claimant's daily pay rate in determining the daily benefit rate are prescribed in 20 CFR part 330.

The RRB utilizes Form UI–1e, Request for Pay Rate Information, to obtain information from a claimant about their last railroad employer and pay rate, when it is not available from other RRB records. Form UI–1e also explains the possibility of receiving a higher daily benefit rate if claimants report their daily rate of pay for railroad work in the base year. Completion is required to obtain or retain benefits. One response is requested of each respondent.

Previous Requests for Comments: The RRB has already published the initial 60-day notice (72 FR 9594 on March 2, 2007) required by 44 U.S.C. 3506(c)(2). That request elicited no comments.

Information Collection Request (ICR)

Title: Pay Rate Report.

OMB Control Number: 3220–0097.

Form(s) submitted: UI–1e.

Type of request: Extension of a currently approved collection.

Affected public: Individuals or households.

Abstract: Under the Railroad Unemployment Insurance Act, the daily benefit rate for unemployment and sickness benefits depends on the employee's last daily rate of pay. The report obtains the claimed rate of pay from the employee that is used to determine whether an increase in the daily benefit rate is due.

Changes Proposed: The RRB proposes no changes to Form UI–45.

The burden estimate for the ICR is as follows:

Estimated Completion Time for Form UI–1e: 5 minutes.

Estimated annual number of respondents: 350.

Total annual responses: 350.

Total annual reporting hours: 29.

Additional Information or Comments: Copies of the forms and supporting documents can be obtained from Charles Mierzwa, the agency clearance officer (312–751–3363) or *Charles.Mierzwa@rrb.gov.*

Comments regarding the information collection should be sent to Ronald J. Hodapp, Railroad Retirement Board, 844 North Rush Street, Chicago, Illinois 60611–2092 or *Ronald.Hodapp@RRB.GOV,* and to the Office of Management Budget at ATTN: Desk Officer for RRB, Fax: (202) 395–6974 or via e-mail to *OIRA_Submission@omb.eop.gov*.

Charles Mierzwa,

Clearance Officer.

[Release No. 34–56269; File No. SR–Amex–2007–75]

Self-Regulatory Organizations; American Stock Exchange LLC; Notice of Filing and Order Granting Accelerated Approval to a Proposed Rule Change, as Modified by Amendments No. 1 and 2, To Establish a Directed Order Program

August 15, 2007.

Pursuant to section 19(b)(1) of the Securities Exchange Act of 1934 (''Act''),[1] and Rule 19b–4 thereunder,[2] notice is hereby given that on July 24, 2007, the American Stock Exchange LLC (''Amex'' or ''Exchange'') filed with the Securities and Exchange Commission (''Commission'') the proposed rule change as described in Items I and II below, which Items have been substantially prepared by the Exchange. On July 30, 2007, the Exchange filed Amendment No. 1 to the proposed rule change. On August 15, 2007, the Exchange filed Amendment No. 2 to the proposed rule change. The Commission is publishing this notice to solicit comments on the proposed rule change from interested persons and is approving the proposed rule change, as amended, on an accelerated basis.

I. Self-Regulatory Organization's Statement of the Terms of Substance of the Proposed Rule Change

The Exchange proposes to adopt Amex Rule 996–ANTE and amend Amex rule 935–ANTE establishing the Exchange's Directed Order Program (the ''Program''). The text of the proposed rule change is available on Exchange's Web site (*http://www.amex.com*), at Amex's principal office, and at the Commission's Public Reference Room.

II. Self-Regulatory Organization's Statement of the Purpose of, and Statutory Basis for, the Proposed Rule Change

In its filing with the Commission, Amex included statements concerning the purpose of and basis for the proposed rule change and discussed any comments it received on the proposed rule change. The text of these statements may be examined at the places specified in Item III below. Amex has prepared summaries, set forth in sections A, B, and C below, of the most significant aspects of such statements.

[1] 15 U.S.C. 78s(b)(1).

[2] 17 CFR 240.19b–4.

A. Self-Regulatory Organization's Statement of the Purpose of, and the Statutory Basis for, the Proposed Rule Change

1. Purpose

The Exchange proposes to adopt rules establishing the Exchange's Directed Order Program (the ''Program''). Proposed Rule 996–ANTE provides that specialists, Registered Options Traders (''ROTs''), Supplemental Registered Options Traders (''SROTs''), and Remote Registered Options Traders (''RROTs'') (collectively, the ''Directed Order Participants'') [3] may choose to enter into arrangements with an Order Flow Provider,[4] whereby a Directed Order Participant would be directed orders upon meeting certain eligibility requirements.

Eligibility

The Exchange will allow for the receipt of marketable orders, through the Exchange's order routing system when the Exchange's disseminated quote is the NBBO, where the order flow providing firm (''Order Flow Provider'') [5] transmitting that order has specified a specialist, ROT, SROT or RROT in that class as the Directed Order Participant for its orders that class. To be eligible for the Program the Directed Order Participant: (i) Must submit quotes electronically through the Exchange's ANTE system, in options classes in which it is assigned; (ii) must comply with its quoting obligations under Exchange rules and provide continuous two-sided quotations in not less than 100% of the series of each class for which it receives directed orders; and (iii) must also be quoting at the best bid or offer on the Exchange (the ''ABBO'').[6]

Enhanced Participation and Allocation

An eligible Directed Order Participant who is directed orders will receive an enhanced participation equal to the greater of 40% of the remaining directed orders, when more than one market participant is quoting at the ABBO, or the amount the Directed Order Participant would be entitled to receive pursuant to the allocation algorithm set forth in Rule 935–ANTE(a)(4).

The enhanced participation rate is based on the number of contracts remaining after all non-broker-dealer customer orders in the book at the best price have been satisfied. If an eligible Directed Order Participant receives enhanced participation under the rule, then no other participation entitlement set forth in Amex Rules shall apply to such order. The eligible Directed Order Participant must also be quoting at the ABBO to receive the guaranteed percentage, and can never be allocated more contracts than his quote size.[7] Any contracts remaining after the eligible Directed Order Participant has received his allocation shall be allocated among the remaining participants according to the allocation algorithm set forth in Rule 935–ANTE(a)(4). No participant will be allocated contracts in excess of the size of his disseminated quote.

Finally, the Exchange notes that an eligible Directed Order Participant may not step up and match the ABBO after it receives an order, but must be publicly quoting at the ABBO when the order is received.[8] An Order Flow Provider is prohibited from notifying a Directed Order Participant of its intention to submit a directed order, so that the Directed Order Participant may not change its quotation to match the ABBO immediately prior to the submission of the directed order, and then fade his quote. Specifically, the Exchange currently has rules in place to prevent such conduct as being inconsistent with just and equitable principles of trade and to prevent the misuse of material non-public information.[9]

The Exchange proposes that the effective date of the Program shall be August 20, 2007.[10]

2. Statutory Basis

The proposed rule change is consistent with section 6(b) of the Act [11] in general and furthers the objectives of Section 6(b)(5) of the Act [12] in particular in that it is designed to prevent fraudulent and manipulative acts and practices, to promote just and equitable principles of change, to foster cooperation and coordination with persons engaged in facilitating transactions in securities, and to remove impediments to and perfect the mechanism of a free and open market and a national market system.

B. Self-Regulatory Organization's Statement on Burden on Competition

The proposed rule change does not impose any burden on competition that is not necessary or appropriate in furtherance of the purposes of the Act.

C. Self-Regulatory Organization's Statement on Comments on the Proposed Rule Change Received From Members, Participants or Others

No written comments were solicited or received with respect to the proposed rule change.

III. Solicitation of Comments

Interested persons are invited to submit written data, views, and arguments concerning the foregoing, including whether the proposed rule change is consistent with the Act. Comments may be submitted by any of the following methods:

Electronic Comments

- Use the Commission's Internet comment form (*http://www.sec.gov/rules/sro.shtml*); or
- Send an e-mail to *rule-comments@sec.gov*. Please include File Number SR–Amex–2007–75 on the subject line.

Paper Comments

- Send paper comments in triplicate to Nancy M. Morris, Secretary, Securities and Exchange Commission, 100 F Street, NE., Washington, DC 20549–1090.

All submissions should refer to File Number SR–Amex–2007–75. This file

[3] The Exchange's SROT and RROT programs were recently approved by the Commission on April 12, 2006 and April 13, 2006, respectively. *See* Securities Exchange Act Release Nos. 53635 (April 12, 2006), 71 FR 20144 (April 12, 2006) (order approving the SROT program) and 53652 (April 13, 2006), 71 FR 20422 (April 20, 2006) (order approving the RROT program).

[4] Order Flow Providers are defined in proposed Rule 996–ANTE as any member or member organization that submits, as agent, customer orders to the Exchange.

[5] An ''Order Flow Provider'' is any member or member organization that submits, as agent, customer orders to the Exchange. *See* proposed Rule 996–ANTE(d).

[6] Pursuant to Exchange Rule 958–ANTE(h)(iii)(A), ROTs are responsible for quoting continuous two-sided markets in a certain percentage of series based on the volume of contracts executed electronically on the Exchange during the previous quarter. Pursuant to Exchange Rules 993–ANTE (c)(ii) and 994–ANTE (c)(iv), SROTs and RROTs are responsible for quoting continuous two-sided markets in 60% of the series of their assigned classes.

[7] The allocation algorithm in Rule 935–ANTE (a)(4) is comprised of a Component A and a Component B. Component A is the parity component of the algorithm. In this component all market participants (except for non-broker-dealer customers) who were either quoting or had orders at the ABBO will be treated equally. Accordingly, the percentage used for Component A is an equal percentage derived by dividing 100 by the number of market participants at the ABBO. Component B is the size pro rata component and is designed to reward market participants who quote in size. The percentage used for Component B is the percentage that the size of each market participant's quote or order at the ABBO represents relative to the total number of contracts in the disseminated bid (for sell orders) and offer (for buy orders). The weight each component will have in the final percentage used to allocate executed contracts will initially be equal.

[8] The Exchange's disseminated quote must be at the NBBO at the time of receipt of the Directed Order. *See* proposed Rule 996–ANTE(a).

[9] *See* Amex Rules 3(j) and 16.

[10] *See* Amendment No. 2.

number should be included on the subject line if e-mail is used. To help the Commission process and review your comments more efficiently, please use only one method. The Commission will post all comments on the Commission's Internet Web site (*http://www.sec.gov/rules/sro.shtml*). Copies of the submission, all subsequent amendments, all written statements with respect to the proposed rule change that are filed with the Commission, and all written communications relating to the proposed rule change between the Commission and any person, other than those that may be withheld from the public in accordance with the provisions of 5 U.S.C. 552, will be available for inspection and copying in the Commission's Public Reference Room, 100 F Street, NE., Washington, DC 20549, on official business days between the hours of 10 a.m. and 3 p.m. Copies of such filing also will be available for inspection and copying at the principal office of Amex. All comments received will be posted without change; the Commission does not edit personal identifying information from submissions. You should submit only information that you wish to make available publicly. All submissions should refer to File Number SR–Amex–2007–75 and should be submitted on or before September 12, 2007.

IV. Commission's Findings and Order Granting Accelerated Approval of the Proposed Rule Change

After careful consideration, the Commission finds that the proposed rule change is consistent with the requirements of section 6 of the Act [13] and the rules and regulations thereunder applicable to a national securities exchange [14], and, in particular, the requirements of section 6(b)(5) of the Act.[15] Section 6(b)(5) requires, among other things, that the rules of a national securities exchange be designed to prevent fraudulent and manipulative acts and practices, to promote just and equitable principles of trade, to remove impediments to and perfect the mechanism of a free and open market and a national market system, and, in general, to protect investors and the public interest.

Pursuant to section 19(b)(2) of the Act,[16] the Commission may not approve any proposed rule change, or amendment thereto, prior to the 30th day after the date of publication of notice of the filing thereof, unless the Commission finds good cause for so doing and publishes its reasons for so finding. The Commission notes that the proposed rule change is substantially similar to rule changes by CBOE and ISE that were recently approved by the Commission on a permanent basis.[17] The Commission believes that the proposed rule changes to establish a Directed Order Program on the Amex do not raise additional significant regulatory issues that have not been previously considered by the Commission. Accordingly, the Commission hereby finds good cause for approving the proposed rule change, as amended, prior to the 30th day after publishing notice thereof in the **Federal Register**.

The Commission has previously approved a rule that guarantees a specialist a portion of each order when the specialists quote is equal to the ABBO.[18] The Commission has closely scrutinized exchange rule proposals to adopt or amend a participation guarantee where the percentage of participation would rise to a level that could have a material adverse impact on quote competition within a particular exchange.[19] Because the proposal would not increase the overall percentage of an order that is guaranteed beyond the currently acceptable threshold, but instead would allow any specialist, ROT, SROT or RROT appointed to an options class to be designated as a Directed Order Participant and be eligible to receive an enhanced participation guarantee instead of the specialist, the Commission does not believe that the proposal will negatively impact quote competition on the Exchange. Under the proposal, the remaining portion of each order will still be allocated based on the competitive bidding of market participants.

Under the proposal, in order to be eligible to receive an participation guarantee in any options series, the Exchange proposes to require that a specialist, ROT, SROT, or RROT maintain continuous quotes in not less than 100% of the series of any options class it for which it receives Directed Orders.[20] In addition, a Directed Order Participant will have to be quoting at the NBBO at the time the Directed Order is received to capitalize on the enhanced participation guarantee.[21] The Commission believes it is critical that the Directed Order Participate cannot step up and match the NBBO after it receives an order, but must be publicly quoting at that price when the order is received. In this regard, the Exchange's proposal prohibits an Order Flow Provider from notifying a Directed Order Participant of its intention to submit a Directed Order, so that the Directed Order Participant may not change its quotation to match the ABBO prior to the submission of the Directed Order, and then fade his quote. The Exchange represented that it has rules in place to prevent such conduct as being inconsistent with just and equitable principles of trade and to prevent the misuse of material non-public information.[22] Furthermore, the Exchange represented that it will proactively conduct surveillance for compliance with the applicable rules in conjunction with the Exchange's Directed Order Flow Program and enforce these rules.

The Commission emphasizes that approval of this proposal does not affect a broker-dealer's duty of best execution. A broker-dealer has a legal duty to seek to obtain best execution of customer orders, and any decision to preference a particular specialist, ROT, SROT, or RROT must be consistent with this duty.[23] A broker-dealer's duty of best execution derives from common law agency principles and fiduciary

[13] 15 U.S.C. 78f.

[14] In approving this proposal, the Commission has considered the proposed rule's impact on efficiency, competition, and capital formation. 15 U.S.C. 78c(f).

[15] 15 U.S.C. 78f(b)(5).

[18] *See, e.g.*, Securities Exchange Act Release No. 49747 (May 20, 2004), 69 FR 30344 (May 27, 2004) (SR–Amex–2003–89).

[19] *See, e.g.*, Securities Exchange Act Release No. 43100 (July 31, 2000), 65 FR 48788 (August 9, 2000).

[20] *See* Amex Rule 996–ANTE. The specialist, ROT, SROT, or RROT also must have an appointment/allocation in such options class. *Id.*

[21] Specifically, Rule 996–ANTE requires a Directed Order Participant to be quoting at the ABBO while the Exchange's disseminated quote is the NBBO in order to be eligible to receive an enhanced participation for the order.

[22] *See* Amex Rules 3(j) and 16.

[23] *See, e.g., Newton* v. *Merrill, Lynch, Pierce, Fenner & Smith, Inc.*, 135 F.3d 266, 269–70, 274 (3d Cir.), *cert. denied*, 525 U.S. 811 (1998); *Certain Market Making Activities on Nasdaq*, Securities Exchange Act Release No. 40900 (January 11, 1999) (settled case) (citing *Sinclair* v. *SEC*, 444 F.2d 399 (2d Cir. 1971); *Arleen Hughes*, 27 SEC 629, 636 (1948), *aff'd sub nom. Hughes* v. *SEC*, 174 F.2d 969 (D.C. Cir. 1949)). *See also* Order Execution Obligations, Securities Exchange Act Release No. 37619A (September 6, 1996), 61 FR 48290 (September 12, 1996) (''Order Handling Rules Release'').

obligations, and is incorporated in rules of self-regulatory organization and, through judicial and Commission decisions, the antifraud provisions of the federal securities laws.[24]

The duty of best execution requires broker-dealers to execute customers' trades at the most favorable terms reasonably available under the circumstances, *i.e.*, at the best reasonably available price.[25] The duty of best execution requires broker-dealers to periodically assess the quality of competing markets to assure that order flow is directed to the markets providing the most beneficial terms for their customer orders.[26] Broker-dealers must examine their procedures for seeking to obtain best execution in light of market and technology changes and modify those practices if necessary to enable their customers to obtain the best reasonably available prices.[27] In doing so, broker-dealers must take into account price improvement opportunities, and whether different markets may be more suitable for different types of orders or particular securities.[28]

For these reasons, the Commission believes that the proposal is consistent with the requirements of Section 6(b)(5) of the Act,[29] and will not jeopardize market integrity or the incentive for market participants to post competitive quotes.[30]

V. Conclusion

It is therefore ordered, pursuant to Section 19(b)(2) of the Act,[31] that the proposed rule change (SR–Amex–2007–75), as modified by Amendments No. 1 and 2, be, and hereby is, approved on an accelerated basis.

For the Commission, by the Division of Market Regulation, pursuant to delegated authority.[32]

Florence E. Harmon,

Deputy Secretary.

SECURITIES AND EXCHANGE COMMISSION

[Release No. 34–56262; File No. SR–Amex–2007–86]

Self-Regulatory Organizations; American Stock Exchange LLC; Notice of Filing and Immediate Effectiveness of Proposed Rule Change To Extend a Pilot Program That Increases Position and Exercise Limits for Equity Options and Options on the Nasdaq-100 Tracking Stock

August 15, 2007.

Pursuant to Section 19(b)(1) of the Securities Exchange Act of 1934 (''Act'')[1] and Rule 19b–4 thereunder,[2] notice is hereby given that on August 8, 2007, the American Stock Exchange LLC (''Amex'' or ''Exchange'') filed with the Securities and Exchange Commission (''Commission'') the proposed rule change as described in Items I and II below, which Items have been substantially prepared by Amex. The Exchange has filed the proposal as a ''non-controversial'' rule change pursuant to Section 19(b)(3)(A) of the Act[3] and Rule 19b–4(f)(6) thereunder,[4] which renders it effective upon filing with the Commission. The Commission is publishing this notice to solicit comments on the proposed rule change from interested persons.

I. Self-Regulatory Organization's Statement of the Terms of Substance of the Proposed Rule Change

The Exchange seeks a six-month extension of its pilot program increasing the standard position and exercise limits for options on the QQQQ and equity option classes traded on the Exchange (''Pilot Program''). The text of the proposed rule change is available at Amex, the Commission's Public Reference Room, and *http://www.amex.com.*

II. Self-Regulatory Organization's Statement of the Purpose of, and Statutory Basis for, the Proposed Rule Change

In its filing with the Commission, Amex included statements concerning the purpose of and basis for the proposed rule change and discussed any comments it received on the proposed rule change. The text of these statements may be examined at the places specified in Item IV below. The Exchange has prepared summaries, set forth in Sections A, B, and C below, of the most significant aspects of such statements.

A. Self-Regulatory Organization's Statement of the Purpose of, and Statutory Basis for, the Proposed Rule Change

1. Purpose

The Exchange is requesting to extend its current Pilot Program increasing the standard position and exercise limits for options on the QQQQ and equity option classes traded on the Exchange for a time period of six months from September 1, 2007, through and including March 1, 2008.

In March 2005, the Exchange established the Pilot Program for a six-

[1] 15 U.S.C. 78s(b)(1).

[2] 17 CFR 240.19b–4.

[3] 15 U.S.C. 78s(b)(3)(A).

[4] 17 CFR 240.19b–4(f)(6).

month period.[5] Under the Pilot Program, position and exercise limits for options on the QQQQ and equity options classes traded on the Exchange were increased to the following levels:

Current equity option contract limit [6]	Pilot program equity option contract limit
13,500	25,000
22,500	50,000
31,500	75,000
60,000	200,000
75,000	250,000
Current QQQQ option contract limit	**Pilot program QQQQ option contract limit**
300,000	900,000

The standard position limits were last increased on December 31, 1998.[7] Since that time there has been a steady increase in the number of accounts that: (a) Approach the position limit; (b) exceed the position limit; and (c) are granted an exemption to the standard limit. Several member firms have petitioned the options exchanges to either eliminate position limits, or in lieu of total elimination, increase the current levels and expand the available hedge exemptions. In addition, a significant number of accounts that maintain sizable positions are utilizing the Pilot Program's increased equity option contract limits. Furthermore, overall volume in the options market has continually increased over the past five years. The Exchange believes that the increase in options volume and lack of evidence of market manipulation occurrences over the past twenty years justifies the proposed increases in the position and exercise limits.

The Exchange has not encountered any problems or difficulties relating to the Pilot Program since its inception. The instant proposed rule change makes no substantive change to the Pilot Program other than to extend it for six months through and including March 1, 2008.

2. Statutory Basis

The Exchange believes that its proposal is consistent with Section 6(b) of the Act [8] in general and furthers the objective of Section 6(b)(5) of the Act [9] in particular, in that it is designed to prevent fraudulent and manipulative acts and practices, to promote just and equitable principles of trade, to foster cooperation and coordination with persons engaged in facilitating transactions in securities, and to remove impediments to and perfect the mechanism of a free and open market and a national market system.

B. Self-Regulatory Organization's Statement on Burden on Competition

The Exchange believes that the proposed rule change would impose no burden on competition that is not necessary or appropriate in furtherance of the purposes of the Act.

C. Self-Regulatory Organization's Statement on Comments on the Proposed Rule Change Received From Members, Participants, or Others

No written comments were solicited or received by the Exchange on this proposal.

III. Date of Effectiveness of the Proposed Rule Change and Timing for Commission Action

Because the foregoing rule change does not: (1) Significantly affect the protection of investors or the public interest; (2) impose any significant burden on competition; and (3) become operative for 30 days from the date of this filing, or such shorter time as the Commission may designate, it has become effective pursuant to Section 19(b)(3)(A) of the Act [10] and Rule 19b–4(f)(6) thereunder.[11]

A proposed rule change filed under Rule 19b–4(f)(6) normally may not become operative prior to 30 days after the date of filing.[12] However, Rule 19b–4(f)(6)(iii) [13] permits the Commission to designate a shorter time if such action is consistent with the protection of investors and the public interest. The Exchange has requested that the Commission waive the 30-day operative delay. The Commission believes that waiving the 30-day operative delay is consistent with the protection of investors and in the public interest because it will allow the Pilot Program to continue uninterrupted. For this reason, the Commission designates that the proposed rule change become operative immediately.[14]

At any time within 60 days of the filing of the proposed rule change, the Commission may summarily abrogate such rule change if it appears to the Commission that such action is necessary or appropriate in the public interest, for the protection of investors, or otherwise in furtherance of the Act.

IV. Solicitation of Comments

Interested persons are invited to submit written data, views, and arguments concerning the foregoing, including whether the proposed rule change is consistent with the Act. Comments may be submitted by any of the following methods:

Electronic Comments

[12] 17 CFR 240.19b–4(f)(6)(iii). In addition, Rule 19b–4(f)(6)(iii) requires that a self-regulatory organization submit to the Commission written notice of its intent to file the proposed rule change, along with a brief description and text of the proposed rule change, at least five business days prior to the date of filing of the proposed rule change, or such shorter time as designated by the Commission. Amex has satisfied the five-day pre-filing requirement.

[13] *Id.*

[14] For purposes only of waiving the operative delay, the Commission has considered the proposed rule's impact on efficiency, competition, and capital formation. *See* 15 U.S.C. 78c(f).

Paper Comments

• Send paper comments in triplicate to Nancy M. Morris, Secretary, Securities and Exchange Commission, Station Place, 100 F Street, NE., Washington, DC 20549–1090.

All submissions should refer to File No. SR–Amex–2007–86. This file number should be included on the subject line if e-mail is used. To help the Commission process and review your comments more efficiently, please use only one method. The Commission will post all comments on the Commission's Internet Web site (*http://www.sec.gov/rules/sro.shtml*). Copies of the submission, all subsequent amendments, all written statements with respect to the proposed rule change that are filed with the Commission, and all written communications relating to the proposed rule change between the Commission and any person, other than those that may be withheld from the public in accordance with the provisions of 5 U.S.C. 552, will be available for inspection and copying in the Commission's Public Reference Room, 100 F Street, NE., Washington, DC 20549, on official business days between the hours of 10 a.m. and 3 p.m. Copies of such filing will also be available for inspection and copying at the principal office of Amex. All comments received will be posted without change; the Commission does not edit personal identifying information from submissions. You should submit only information that you wish to make available publicly. All submissions should refer to File No. SR–Amex–2007–86 and should be submitted on or before September 12, 2007.

For the Commission, by the Division of Market Regulation, pursuant to delegated authority.[15]

Florence E. Harmon,

Deputy Secretary.

SECURITIES AND EXCHANGE COMMISSION

[Release No. 34–56273; File No. SR–Amex–2007–91]

Self-Regulatory Organizations; American Stock Exchange LLC; Notice of Filing and Immediate Effectiveness of Proposed Rule Change to Add an Additional Exemption to Rule 24–AEMI Relating to Intermarket Sweep Orders

August 16, 2007.

Pursuant to Section 19(b)(1) of the Securities Exchange Act of 1934 (''Act'')[1] and Rule 19b–4 thereunder,[2] notice is hereby given that on August 16, 2007, the American Stock Exchange LLC (''Amex'' or ''Exchange''), filed with the Securities and Exchange Commission (''Commission'') the proposed rule change as described in Items I and II below, which Items have been substantially prepared by Amex. Amex filed the proposal as a ''non-controversial'' rule change pursuant to Section 19(b)(3)(A) of the Act[3] and Rule 19b–4(f)(6) thereunder,[4] which renders the proposal effective upon filing with the Commission. The Commission is publishing this notice to solicit comments on the proposed rule change from interested persons.

I. Self-Regulatory Organization's Statement of the Terms of Substance of the Proposed Rule Change

Amex proposes to amend Rule 24–AEMI to add an additional exemption to its general rule against a member executing a proprietary order while in possession of a customer order which could trade at the same price. The exemption would permit a member organization to send an intermarket sweep order (''ISOs'') as principal under Regulation NMS, provided that the member organization yields its principal execution to any open customer order that is required to be protected by Rule 24–AEMI and is capable of being filled. In addition, if the member organization executed the ISO to facilitate a customer order at a price inferior to one or more protected quotations, that customer must consent to not receiving the better prices obtained by the ISO or the firm must yield its principal execution to that customer. The Exchange proposes this change to better harmonize Rule 24–AEMI with recent changes to the corresponding Rule 92 of the New York Stock Exchange (''NYSE'').

The text of the proposed rule change is available on Exchange's Web site (*http://www.amex.com*), at Amex's principal office, and at the Commission's Public Reference Room.

II. Self-Regulatory Organization's Statement of the Purpose of, and Statutory Basis for, the Proposed Rule Change

In its filing with the Commission, Amex included statements concerning the purpose of and basis for the proposed rule change and discussed any comments it received on the proposed rule change. The text of these statements may be examined at the places specified in Item IV below. Amex has prepared summaries, set forth in Sections A, B, and C below, of the most significant aspects of such statements.

A. Self-Regulatory Organization's Statement of the Purpose of, and Statutory Basis for, the Proposed Rule Change

1. Purpose

The Exchange proposes to amend Rule 24–AEMI to add an exemption so that a member organization can comply with its Regulation NMS obligation without also violating Rule 24–AEMI when facilitating a customer order that would otherwise require the firm to either violate Rule 24–AEMI or trade through protected quotations. Under the current rule, if a member organization is required to route an ISO as principal to execute against the full displayed size of any protected quotation in a security, for example, when facilitating a customer order at a price inferior to the national best bid or offer or other protected quotations and in compliance with Rules 600(b)(30)(ii) and 611(b)(6) of Regulation NMS,[5] the ISO could violate Rule 24–AEMI by trading ahead of or along with an open customer order.

The proposed exemption provides that, when routing an ISO, the member organization must yield its principal execution to any open customer order that is required to be protected by Rule 24–AEMI and is capable of accepting the fill. As defined in Rule 24–AEMI(a), a customer order that is required to be protected is an open customer order that is known to the member organization before entry of the ISO. In addition, the proposed exemption would require that, if a firm executes an ISO to facilitate a customer order at a price inferior to one or more protected quotations, that customer must consent to not receiving the better price obtained by the ISO or

[1] 15 U.S.C. 78s(b)(1).

[2] 17 CFR 240.19b–4.

[3] 15 U.S.C. 78s(b)(3)(A).

[4] 17 CFR 240.19b–4(f)(6).

[5] 17 CFR 242.600(b)(30)(ii) and 17 CFR 242.611(b)(6).

the firm must yield its principal execution to that customer. For purposes of this amendment, the Exchange further proposes adopting the definitions of Regulation NMS in connection with the terms ''protected quotation'' and ''intermarket sweep order.'' [6]

2. Statutory Basis

The proposed rule change is designed to be consistent with Regulation NMS and with Section 6(b) of the Act [7] in general, and furthers the objectives of Section 6(b)(5) of the Act [8] in particular in that the Exchange's proposed rules are designed to prevent fraudulent and manipulative acts and practices, to promote just and equitable principles of trade, to remove impediments to and perfect the mechanism of a free and open market and a national market system and, in general, to protect investors and the public interest.

B. Self-Regulatory Organization's Statement on Burden on Competition

The proposed rule change does not impose any burden on competition that is not necessary or appropriate in furtherance of the purposes of the Act.

C. Self-Regulatory Organization's Statement on Comments on the Proposed Rule Change Received From Members, Participants, or Others

No written comments were solicited or received with respect to the proposed rule change.

III. Date of Effectiveness of the Proposed Rule Change and Timing for Commission Action

The foregoing proposed rule change is subject to Section 19(b)(3)(A)(iii) of the Act [9] and Rule 19b–4(f)(6) thereunder [10] because the proposal: (i) Does not significantly affect the protection of investors or the public interest; (ii) does not impose any significant burden on competition; and (iii) does not become operative prior to 30 days after the date of filing or such shorter time as the Commission may designate if consistent with the protection of investors and the public interest; provided that the self-regulatory organization has given the Commission notice of its intent to file the proposed rule change, along with a brief description and text of the proposed rule change, at least five business days prior to the date of filing of the proposed rule change, or such shorter time as designated by the Commission.

Amex has requested that the Commission waive the five-day pre-filing requirement and the 30-day operative delay in order to enable the Exchange to implement this rule change on an expeditious basis, noting, in particular, the commencement of full industry compliance with Rules 610 and 611 of Regulation NMS during the ''All Stocks Phase'' that begins on August 20, 2007. The Commission believes that waiving the 30-day operative delay is consistent with the protection of investors and the public interest because the proposed rule change adds an exemption to Rule 24–AEMI that is identical to that approved as part of recent amendments to corresponding Rule 92 of the NYSE and does not raise any new issues of regulatory concern.[11] For these reasons, the Commission waives the 30-day operative delay.[12] The Commission also waives the five-day pre-filing requirement.

At any time within 60 days of the filing of the proposed rule change, the Commission may summarily abrogate such rule change if it appears to the Commission that such action is necessary or appropriate in the public interest, for the protection of investors, or otherwise in furtherance of the purposes of the Act.[13]

IV. Solicitation of Comments

Interested persons are invited to submit written data, views, and arguments concerning the foregoing, including whether the proposed rule change is consistent with the Act. Comments may be submitted by any of the following methods:

Electronic Comments

- Use the Commission's Internet comment form (*http://www.sec.gov/rules/sro.shtml*); or
- Send an e-mail to *rule-comments@sec.gov.* Please include File Number SR–Amex–2007–91 on the subject line.

Paper Comments

- Send paper comments in triplicate to Nancy M. Morris, Secretary, Securities and Exchange Commission, Station Place, 100 F Street, NE., Washington, DC 20549–1090.

All submissions should refer to File Number SR–Amex–2007–91. This file number should be included on the subject line if e-mail is used. To help the Commission process and review your comments more efficiently, please use only one method. The Commission will post all comments on the Commission's Internet Web site (*http://www.sec.gov/rules/sro.shtml*). Copies of the submission, all subsequent amendments, all written statements with respect to the proposed rule change that are filed with the Commission, and all written communications relating to the proposed rule change between the Commission and any person, other than those that may be withheld from the public in accordance with the provisions of 5 U.S.C. 552, will be available for inspection and copying in the Commission's Public Reference Room, 100 F Street, NE., Washington, DC 20549, on official business days between the hours of 10 a.m. and 3 p.m. Copies of such filing also will be available for inspection and copying at the principal office of Amex. All comments received will be posted without change; the Commission does not edit personal identifying information from submissions. You should submit only information that you wish to make available publicly. All submissions should refer to File Number SR–Amex–2007–91 and should be submitted on or before September 12, 2007.

For the Commission, by the Division of Market Regulation, pursuant to delegated authority.[14]

SECURITIES AND EXCHANGE COMMISSION

[Release No. 34–56268; File No. SR–BSE–2007–41]

Self-Regulatory Organizations; Boston Stock Exchange, Inc.; Notice of Filing and Immediate Effectiveness of Proposed Rule Change To Extend the Time Period for the Position Limits Pilot Program

August 15, 2007.

Pursuant to Section 19(b)(1) of the Securities Exchange Act of 1934 (''Act'') [1] and Rule 19b–4 thereunder,[2] notice is hereby given that on August

[1] 15 U.S.C. 78s(b)(1).

[2] 17 CFR 240.19b–4.

15, 2007, the Boston Stock Exchange, Inc. (''BSE'' or ''Exchange'') filed with the Securities and Exchange Commission (''Commission'') the proposed rule change as described in Items I and II below, which Items have been substantially prepared by BSE. The Exchange has filed the proposal as a ''non-controversial'' rule change pursuant to Section 19(b)(3)(A) of the Act[3] and Rule 19b–4(f)(6) thereunder,[4] which renders it effective upon filing with the Commission. The Commission is publishing this notice to solicit comments on the proposed rule change from interested persons.

I. Self-Regulatory Organization's Statement of the Terms of Substance of the Proposed Rule Change

BSE proposes to amend Chapter III, Section 7 (Position Limits) of the Rules of the Boston Options Exchange (''BOX''), an options trading facility of BSE, to extend its current pilot program to increase the standard position and exercise limits for equity option contracts and options on the Nasdaq-100 Index Tracking Stock (''QQQQ'') (''Pilot Program''). The text of the proposed rule change is available at BSE, the Commission's Public Reference Room, and *http://www.bostonstock.com*.

II. Self-Regulatory Organization's Statement of the Purpose of, and Statutory Basis for, the Proposed Rule Change

In its filing with the Commission, BSE included statements concerning the purpose of and basis for the proposed rule change and discussed any comments it received on the proposed rule change. The text of these statements may be examined at the places specified in Item IV below. The Exchange has prepared summaries, set forth in Sections A, B, and C below, of the most significant aspects of such statements.

A. Self-Regulatory Organization's Statement of the Purpose of, and Statutory Basis for, the Proposed Rule Change

1. Purpose

The Pilot Program provides for an increase to the standard position and exercise limits for equity option contracts and for options on QQQQs for a six-month period.[5] Specifically, the Pilot Program increased the applicable position and exercise limits for equity options and options on the QQQQ to the following levels:

Current equity option contract limit[6]	Pilot program equity option contract limit
13,500	25,000
22,500	50,000
31,500	75,000
60,000	200,000
75,000	250,000
Current QQQQ Option Contract Limit	**Pilot Program QQQQ Option Contract Limit**
300,000	900,000

The Exchange believes that extending the Pilot Program for six months is warranted due to positive feedback from members and for the reasons cited in the original rule filing that proposed the adoption of the Pilot Program.[7] In addition, BOX has not encountered any problems or difficulties relating to the Pilot Program since its inception. For these reasons, the BSE requests that the Commission extend the Pilot Program for an additional six months, through and including March 1, 2008.

2. Statutory Basis

The Exchange believes that its proposal is consistent with Section 6(b) of the Act,[8] in general, and furthers the objective of Section 6(b)(5) of the Act,[9] in particular, in that it is designed to promote just and equitable principles of trade and to protect investors and the public interest.

B. Self-Regulatory Organization's Statement on Burden on Competition

The Exchange does not believe that the proposed rule change will impose any burden on competition that is not necessary or appropriate in furtherance of the purposes of the Act.

C. Self-Regulatory Organization's Statement on Comments on the Proposed Rule Change Received From Members, Participants, or Others

The Exchange has neither solicited nor received comments on the proposed rule change.

III. Date of Effectiveness of the Proposed Rule Change and Timing for Commission Action

Because the foregoing rule change does not: (1) Significantly affect the protection of investors or the public interest; (2) impose any significant burden on competition; and (3) become operative for 30 days from the date of this filing, or such shorter time as the Commission may designate, it has become effective pursuant to Section 19(b)(3)(A) of the Act[10] and Rule 19b–4(f)(6) thereunder.[11]

A proposed rule change filed under Rule 19b–4(f)(6) normally may not become operative prior to 30 days after the date of filing.[12] However, Rule 19b–4(f)(6)(iii)[13] permits the Commission to designate a shorter time if such action is consistent with the protection of investors and the public interest. The Exchange has requested that the Commission waive the 30-day operative delay. The Commission believes that waiving the 30-day operative delay is consistent with the protection of investors and in the public interest because it will allow the Pilot Program to continue uninterrupted. For this

[9] 15 U.S.C. 78f(b)(5).

[10] 15 U.S.C. 78s(b)(3)(A).

[11] 17 CFR 240.19b–4(f)(6).

[12] 17 CFR 240.19b–4(f)(6)(iii). In addition, Rule 19b–4(f)(6)(iii) requires that a self-regulatory organization submit to the Commission written notice of its intent to file the proposed rule change, along with a brief description and text of the proposed rule change, at least five business days prior to the date of filing of the proposed rule change, or such shorter time as designated by the Commission. BSE has satisfied the five-day pre-filing requirement.

[13] *Id.*

reason, the Commission designates that the proposed rule change become operative immediately.[14]

At any time within 60 days of the filing of the proposed rule change, the Commission may summarily abrogate such rule change if it appears to the Commission that such action is necessary or appropriate in the public interest, for the protection of investors, or otherwise in furtherance of the Act.

IV. Solicitation of Comments

Interested persons are invited to submit written data, views, and arguments concerning the foregoing, including whether the proposed rule change is consistent with the Act. Comments may be submitted by any of the following methods:

Electronic Comments

- Use the Commission's Internet comment form (*http://www.sec.gov/rules/sro.shtml*); or
- Send an e-mail to *rule-comments@sec.gov*. Please include File No. SR–BSE–2007–41 on the subject line.

Paper Comments

- Send paper comments in triplicate to Nancy M. Morris, Secretary, Securities and Exchange Commission, Station Place, 100 F Street, NE., Washington, DC 20549–1090.

All submissions should refer to File No. SR–BSE–2007–41. This file number should be included on the subject line if e-mail is used. To help the Commission process and review your comments more efficiently, please use only one method. The Commission will post all comments on the Commission's Internet Web site (*http://www.sec.gov/rules/sro.shtml*). Copies of the submission, all subsequent amendments, all written statements with respect to the proposed rule change that are filed with the Commission, and all written communications relating to the proposed rule change between the Commission and any person, other than those that may be withheld from the public in accordance with the provisions of 5 U.S.C. 552, will be available for inspection and copying in the Commission's Public Reference Room, 100 F Street, NE., Washington, DC 20549, on official business days between the hours of 10 a.m. and 3 p.m. Copies of such filing will also be available for inspection and copying at the principal office of BSE. All comments received will be posted without change; the Commission does not edit personal identifying information from submissions. You should submit only information that you wish to make available publicly. All submissions should refer to File No. SR–BSE–2007–41 and should be submitted on or before September 12, 2007.

For the Commission, by the Division of Market Regulation, pursuant to delegated authority.[15]

SECURITIES AND EXCHANGE COMMISSION

[Release No. 34–56266; File No. SR–CBOE–2007–97]

Self-Regulatory Organizations; Chicago Board Options Exchange, Incorporated; Notice of Filing and Immediate Effectiveness of Proposed Rule Change Relating to the Extension of a Pilot Program That Increases the Standard Position and Exercise Limits for Certain Options Traded on the Exchange

August 15, 2007.

Pursuant to section 19(b)(1) of the Securities Exchange Act of 1934 (''Act'')[1] and Rule 19b–4 thereunder,[2] notice is hereby given that on August 7, 2007, the Chicago Board Options Exchange, Incorporated (''CBOE'' or ''Exchange'') filed with the Securities and Exchange Commission (''Commission'') the proposed rule change as described in Items I and II below, which Items have been prepared by CBOE. The Exchange has filed the proposal as a ''non-controversial'' rule change pursuant to section 19(b)(3)(A) of the Act[3] and Rule 19b–4(f)(6) thereunder,[4] which renders it effective upon filing with the Commission. The Commission is publishing this notice to solicit comments on the proposed rule change from interested persons.

[1] 15 U.S.C. 78s(b)(1).

[2] 17 CFR 240.19b–4.

[3] 15 U.S.C. 78s(b)(3)(A).

[4] 17 CFR 240.19b–4(f)(6).

I. Self-Regulatory Organization's Statement of the Terms of Substance of the Proposed Rule Change

CBOE proposes to extend an existing pilot program that increases the standard position and exercise limits for certain options traded on the Exchange (''Pilot Program''). The text of the proposed rule change is available at CBOE, the Commission's Public Reference Room, and *http://www.cboe.com.*

II. Self-Regulatory Organization's Statement of the Purpose of, and Statutory Basis for, the Proposed Rule Change

In its filing with the Commission, CBOE included statements concerning the purpose of and basis for the proposed rule change and discussed any comments it received on the proposed rule change. The text of these statements may be examined at the places specified in Item IV below. The Exchange has prepared summaries, set forth in sections A, B, and C below, of the most significant aspects of such statements.

A. Self-Regulatory Organization's Statement of the Purpose of, and Statutory Basis for, the Proposed Rule Change

1. Purpose

The Pilot Program, as previously approved by the Commission, provides for an increase to the standard position and exercise limits for equity option contracts and for options on QQQQs for a six-month period.[5] Specifically, the Pilot Program increased the applicable position and exercise limits for equity options and options on the QQQQ in accordance with the following levels:

[5] The Pilot Program was approved by the Commission on February 23, 2005. *See* Securities Exchange Act Release No. 51244 (February 23, 2005), 70 FR 10010 (March 1, 2005) (SR–CBOE–2003–30) (''Pilot Program Order''). The Pilot Program has been extended four times and is due to expire on September 1, 2007. *See* Securities Exchange Act Release Nos. 52262 (August 15, 2005), 70 FR 48995 (August 22, 2005) (SR–CBOE–2005–61); 53348 (February 22, 2006), 71 FR 10574 (March 1, 2006) (SR–CBOE–2006–11); 54336 (August 18, 2006), 71 FR 50952 (August 28, 2006) (SR–CBOE–2006–69); and 55266 (February 9, 2007), 72 FR 7698 (February 16, 2007) (SR–CBOE–2007–12).

Current equity option contract limit [6]	Pilot program equity option contract limit
13,500	25,000
22,500	50,000
31,500	75,000
60,000	200,000
75,000	250,000
Current QQQQ Option Contract Limit	**Pilot Program QQQQ Option Contract Limit**
300,000	900,000

The purpose of the proposed rule change is to extend the Pilot Program for an additional six-month period, through March 1, 2008. The Exchange believes that extending the Pilot Program for six months is warranted due to the positive feedback from members and for the reasons cited in the original rule filing that proposed the adoption of the Pilot Program.[7] Also, the Exchange has not encountered any problems or difficulties relating to the Pilot Program since its inception. For these reasons, the Exchange requests that the Commission extend the Pilot Program for the aforementioned additional period.

2. Statutory Basis

The Exchange believes that the proposed rule change is consistent with the requirements provided under Section 6(b)(5)[8] of the Act that the rules of an exchange be designed to promote just and equitable principles of trade, to prevent fraudulent and manipulative acts and, in general, to protect investors and the public interest.

B. Self-Regulatory Organization's Statement on Burden on Competition

CBOE does not believe that the proposed rule change will impose any burden on competition that is not necessary or appropriate in furtherance of the purposes of the Act.

C. Self-Regulatory Organization's Statement on Comments on the Proposed Rule Change Received From Members, Participants, or Others

No written comments were solicited or received with respect to the proposed rule change.

III. Date of Effectiveness of the Proposed Rule Change and Timing for Commission Action

Because the forgoing rule change does not: (1) Significantly affect the protection of investors or the public interest; (2) impose any significant burden on competition; and (3) become operative for 30 days after the date of this filing, or such shorter time as the Commission may designate, it has become effective pursuant to section 19(b)(3)(A) of the Act[9] and Rule 19b–4(f)(6) thereunder.[10]

A proposed rule change filed under 19b–4(f)(6) normally may not become operative prior to 30 days after the date of filing.[11] However, Rule 19b–4(f)(6)(iii)[12] permits the Commission to designate a shorter time if such action is consistent with the protection of investors and the public interest. The Exchange has requested that the Commission waive the 30-day operative delay. The Commission believes that waiving the 30-day operative delay is consistent with the protection of investors and in the public interest because it will allow the Pilot Program to continue uninterrupted. For this reason, the Commission designates that the proposed rule change become operative immediately.[13]

At any time within 60 days of the filing of the proposed rule change, the Commission may summarily abrogate such rule change if it appears to the Commission that such action is necessary or appropriate in the public interest, for the protection of investors, or otherwise in furtherance of the Act.

IV. Solicitation of Comments

Interested persons are invited to submit written data, views, and arguments concerning the foregoing, including whether the proposed rule change is consistent with the Act.

Comments may be submitted by any of the following methods:

Electronic Comments

- Use the Commission's Internet comment form (*http://www.sec.gov/rules/sro.shtml*); or
- Send an e-mail to *rule-comments@sec.gov*. Please include File No. SR–CBOE–2007–97 on the subject line.

Paper Comments

- Send paper comments in triplicate to Nancy M. Morris, Secretary, Securities and Exchange Commission, Station Place, 100 F Street, NE., Washington, DC 20549–1090.

All submissions should refer to File No. SR–CBOE–2007–97. This file number should be included on the subject line if e-mail is used. To help the Commission process and review your comments more efficiently, please use only one method. The Commission will post all comments on the Commission's Internet Web site (*http://www.sec.gov/rules/sro.shtml*). Copies of the submission, all subsequent amendments, all written statements with respect to the proposed rule change that are filed with the Commission, and all written communications relating to the proposed rule change between the Commission and any person, other than those that may be withheld from the public in accordance with the provisions of 5 U.S.C. 552, will be available for inspection and copying in the Commission's Public Reference Room, 100 F Street, NE., Washington, DC 20549, on official business days between the hours of 10 a.m. and 3 p.m. Copies of such filing will also be available for inspection and copying at the principal office of CBOE. All comments received will be posted without change; the Commission does not edit personal identifying information from submissions. You should submit only information that you wish to make available publicly. All submissions should refer to File No. SR–CBOE–2007–97 and should be

SECURITIES AND EXCHANGE COMMISSION

[Release No. 34–56276; File No. SR–CBOE–2007–98]

Self-Regulatory Organizations; Chicago Board Options Exchange, Incorporated; Notice of Filing of Proposed Rule Change Regarding Expansion of the Penny Pilot Program

August 17, 2007.

Pursuant to Section 19(b)(1) of the Securities Exchange Act of 1934 (''Act''),[1] and Rule 19b–4 thereunder,[2] notice is hereby given that on August 14, 2007 the Chicago Board Options Exchange, Incorporated (''CBOE'' or ''Exchange'') filed with the Securities and Exchange Commission (''Commission'') the proposed rule change as described in Items I, II, and III below, which items have been substantially prepared by the CBOE. The Commission is publishing this notice to solicit comments on the proposed rule change from interested persons.

I. Self-Regulatory Organization's Statement of the Terms of Substance of the Proposed Rule Change

CBOE proposes to amend its rules relating to an expansion of the Penny Pilot Program. The text of the proposed rule change is available on the Exchange's Web site at (*http://www.cboe.com*), at the offices of the Exchange, and at the Commission's Public Reference Room.

II. Self-Regulatory Organization's Statement of the Purpose of, and Statutory Basis for, the Proposed Rule Change

In its filing with the Commission, the Exchange included statements concerning the purpose of, and basis for, the proposed rule change and discussed any comments it received on the proposed rule change. The text of these statements may be examined at the places specified in Item IV below. The Exchange has prepared summaries, set forth in Sections A, B, and C below, of the most significant aspects of such statements.

A. Self-Regulatory Organization's Statement of the Purpose of, and Statutory Basis for, the Proposed Rule Change

1. Purpose

CBOE proposes to amend its rules in connection with an expansion of the industry-wide Penny Pilot Program, which commenced on January 26, 2007.[3] CBOE believes expanding the Penny Pilot Program as proposed in this rule filing will allow further analysis over a longer period of time as to the impact of quoting and trading in these reduced increments on market participants, transparency, liquidity, market structure, and quote traffic. Currently, thirteen option classes participate in the Penny Pilot Program.[4] CBOE intends to expand the Penny Pilot Program in two phases. Phase I of the expansion would begin on September 28, 2007, last for six months, and add the following twenty-two option classes to the Penny Pilot Program.[5]

SPDR S&P 500 (SPY/SPY)
NYSE Euronext (NYX/NYX)
Apple Inc. (AAPL/AAQ)
Cisco Systems (CSCO/CYQ)
Altria Group, Inc. (MO/MO)
Financial Select Sector SPDR (XLF/XLF)
Dendreon Corp. (DNDN/UKO)
AT&T, Inc. (T/T)
Amgen Inc. (AMGN/AMQ)
Citigroup, Inc. (C/C)
Yahoo! Inc. (YHOO/YHQ)
Amazon.com Inc. (AMZN/ZQN)
Qualcomm Inc. (QCOM/QAQ)
Motorola Inc. (MOT/MOT)
General Motors (GM/GM)
Research in Motion Ltd. (RIMM/RUL)
Energy Select Sector SPDR (XLE/XLE)
Freeport-McMoRan Copper & Gold, Inc. (FCX/DPJ)
Diamonds Trust (DIA/DIA)
ConocoPhillips (COP/COP)
Oil Services HLDRS (OIH/OIH)
Bristol-Myers Squibb Co. (BMY/BMY)

These twenty-two option classes are among the most actively traded multiply-listed option classes based on national average daily volume, and together with the existing thirteen Pilot classes, represent approximately 35% of the total industry volume.

Phase II of the expansion would begin on March 28, 2008 and last for one year until March 27, 2009. It is currently anticipated that an additional twenty-eight option classes would be added to the Penny Pilot Program on March 28, 2008, bringing the total number of classes in the Pilot Program to 63. These twenty-eight new classes would be among the most active, multiply-listed option classes. CBOE intends to submit a proposed rule change pursuant to Section (b)(3)(A) of the Exchange Act announcing the names of these twenty-eight option classes prior to the beginning of Phase II.

The minimum increments for all classes in the Penny Pilot, except for the QQQQs, would continue to be $0.01 for all option series below $3 (including LEAPS), and $0.05 for all option series $3 and above (including LEAPS). For QQQQs, the minimum increment would remain $0.01 for all option series. In connection with the expansion of the Penny Pilot Program, CBOE proposes to amend Rule 6.42(3) to specify in the rule text the minimum increments for the Pilot classes.

Additionally, because SPDR options (SPY) and options on Diamonds (DIA) will participate in the Penny Pilot Program beginning on September 28, 2007, CBOE proposes to quote and trade two index option classes—Mini-SPX Index Options (XSP) and options on the Dow Jones Industrial Average (DJX), respectively, in the same minimum increments as SPY options and DIA options (*i.e.*, $0.01 for all option series below $3, and $0.05 for all option series $3 and above). SPY options are options on the SPDR exchange-traded fund (ETF) which is designed to track the performance of the S&P 500® Index. XSP options are options based on the S&P 500 ® Index. DIA options are options on an ETF that is designed to track the performance of the Dow Jones Industrial Average. DJX options are options based on the Dow Jones Industrial Average. CBOE believes it is important that these products, DIA and DJX, and SPY and XSP, have the same minimum increments for consistency and competitive reasons. Proposed new Interpretation .03 to Rule 6.42 addresses the minimum increments for the XSP and DJX option classes when SPY and DIA, respectively, participate in the Penny Pilot Program.

CBOE intends to submit to the SEC reports analyzing the Penny Pilot Program for the following time periods:

- May 1, 2007–September 27, 2007
- September 28, 2007–January 31, 2008
- February 1, 2008–July 31, 2008
- August 1, 2008–January 31, 2009

[14] 17 CFR 200.30–3(a)(12).

[1] 15 U.S.C. 78s(b)(1).

[2] 17 CFR 240.19b–4.

[3] *See* Securities Exchange Act Release No. 55154 (January 23, 2007), 72 FR 4743 (February 1, 2007) (SR–CBOE–2006–92).

[4] CBOE recently extended the Penny Pilot Program in the thirteen classes until September 27, 2007. *See* Securities Exchange Act Release No. 56139 (July 26, 2007), 72 FR 42159 (August 1, 2007) (SR–CBOE–2007–86).

[5] CBOE also intends to issue a Regulatory Circular, which will be published on its Web site, identifying these twenty-two option classes.

CBOE anticipates that its reports will assess the impact of the changes to the minimum increments during the specific time period being analyzed, including, among other things, effects on (i) Market participants and customers; (ii) market performance and quality, such as quoted spreads, effective spreads, and the displayed size in the Pilot classes; and (iii) OPRA, vendor and exchange capacity. CBOE's reports should be submitted within one month following the end of the period being analyzed.

2. Statutory Basis

The Exchange believes that the proposed rule change is consistent with Section 6(b) of the Act,[6] in general, and furthers the objectives of Section 6(b)(5) of the Act,[7] in particular, in that the proposed rule change is designed to promote just and equitable principles of trade, serve to remove impediments to and perfect the mechanism of a free and open market and a national market system, and, in general, to protect investors and the public interest.

B. Self-Regulatory Organization's Statement on Burden on Competition

The Exchange does not believe that the proposed rule change will result in any burden on competition that is not necessary or appropriate in furtherance of the purposes of the Act.

C. Self-Regulatory Organization's Statement on Comments on the Proposed Rule Change Received From Members, Participants, or Others

Written comments on the proposed rule change were neither solicited nor received.

III. Date of Effectiveness of the Proposed Rule Change and Timing for Commission Action

Within 35 days of the date of publication of this notice in the **Federal Register** or within such longer period (i) As the Commission may designate up to 90 days of such date if it finds such longer period to be appropriate and publishes its reasons for so finding or (ii) as to which the Exchange consents, the Commission will:

(A) By order approve such proposed rule change, or

(B) Institute proceedings to determine whether the proposed rule change should be disapproved.

IV. Solicitation of Comments

Interested persons are invited to submit written data, views and arguments concerning the foregoing, including whether the proposed rule change is consistent with the Act. The Commission also requests and encourages interested persons to submit comments on the following specific questions:

- Whether there are circumstances under which options classes included in the Penny Pilot should be removed from the Pilot?
- If so, what factors should be considered in making the determination to remove an option class from the Penny Pilot?
  - Should an objective standard be used? For instance, should an option class come out of the Penny Pilot if its trading volume drops below a threshold amount? If so, what should that threshold be? Or, should an option class come out of the Penny Pilot if it is no longer among the most actively-traded options? If so, what should be considered the most-actively traded options? What statistics or analysis should be used to support a determination to remove an options class?
  - Should a more subjective analysis be allowed? If so, what factors should be taken into account?
- What concerns might arise by removing an option from the Penny Pilot? How could such concerns be ameliorated?
- How frequently should the analysis be undertaken (*e.g.*, annually, bi-annually, quarterly), or should the evaluation be an automated process?
- If a determination is made that an option should be removed from the Penny Pilot, how much notice should be given to market participants that the quoting increment will change?

Comments may be submitted by any of the following methods:

Electronic Comments

- Use the Commission's Internet comment form (*http://www.sec.gov/rules/sro.shtml*); or
- Send an e-mail to *rule-comments@sec.gov*. Please include File Number SR–CBOE–2007–98 on the subject line.

Paper Comments

- Send paper comments in triplicate to Nancy M. Morris, Secretary, Securities and Exchange Commission, 100 F Street, NE., Washington, DC 20549–1090.

All submissions should refer to File Number SR–CBOE–2007–98. This file number should be included on the subject line if e-mail is used. To help the Commission process and review your comments more efficiently, please use only one method. The Commission will post all comments on the Commission's Internet Web site (*http://www.sec.gov/rules/sro.shtml*). Copies of the submission, all subsequent amendments, all written statements with respect to the proposed rule change that are filed with the Commission, and all written communications relating to the proposed rule change between the Commission and any person, other than those that may be withheld from the public in accordance with the provisions of 5 U.S.C. 552, will be available for inspection and copying in the Commission's Public Reference Room, 100 F Street, NE., Washington, DC 20549, on official business days between the hours of 10 a.m. and 3 p.m. Copies of such filing also will be available for inspection and copying at the principal office of the CBOE. All comments received will be posted without change; the Commission does not edit personal identifying information from submissions. You should submit only information that you wish to make available publicly. All submissions should refer to File Number SR–CBOE–2007–98 and should be submitted on or before September 12, 2007.

For the Commission, by the Division of Market Regulation, pursuant to delegated authority.[8]

SECURITIES AND EXCHANGE COMMISSION

[Release No. 34–56275; File No. SR–CBOE–2007–26]

Self-Regulatory Organizations; Chicago Board Options Exchange, Incorporated; Order Granting Approval of a Proposed Rule Change To List and Trade Credit Default Basket Options, as Modified by Amendment No. 3, and Designating Credit Default Basket Options as Standardized Options Under Rule 9b–1 of the Securities Exchange Act of 1934

August 17, 2007.

I. Introduction

On April 5, 2007, the Chicago Board Options Exchange, Incorporated (''CBOE'' or ''Exchange'') filed with the Securities and Exchange Commission (''Commission'') a proposed rule change, pursuant to section 19(b)(1) of

the Securities Exchange Act of 1934 (''Act'')[1] and Rule 19b–4 thereunder,[2] to permit CBOE to list and trade cash-settled, binary options[3] based on the occurrence of credit events in the debt securities of one or more issuers, referred to as credit default basket options. On June 15, 2007, CBOE filed Amendment No. 1 to the proposed rule change; on June 19, 2007, CBOE withdrew Amendment No. 1 and filed Amendment No. 2 to the proposed rule change; and on June 21, 2007, CBOE withdrew Amendment No. 2 and filed Amendment No. 3 to the proposed rule change.[4] The proposed rule change, as modified by Amendment No. 3, was published for comment in the **Federal Register** on June 28, 2007 for a 15-day comment period.[5] The Commission received no comments on the proposal. This order approves the proposed rule change, as modified by Amendment No. 3, and designates credit default basket options as ''standardized options'' pursuant to Rule 9b–1 under the Act.[6]

II. Description of the CBOE Proposal

A. Generally

On June 6, 2007, the Commission approved a proposal by CBOE to list and trade credit default options, which are cash-settled binary options that are automatically exercised upon the occurrence of specified credit events or expire worthless.[7] CBOE now proposes to list and trade credit default basket options, which are cash-settled binary options based on a basket of at least two Reference Entities (described below). This proposal would add new rules applicable to credit default basket options and amend certain existing rules applicable to credit default options to make them applicable to credit default basket options.

Credit default options are referenced to debt securities issued by a specified public company (''Reference Entity'')[8] and either have a fixed payout or expire worthless, depending upon whether a credit event occurs during the life of the option. Upon confirmation of a credit event prior to the last day of trading of a credit default option series,[9] the options positions existing as of that time are automatically exercised and the holders of long options positions receive a fixed cash payment of $100,000 per contract.[10] If no credit event is confirmed during the life of the option, the final settlement price is $0.

Credit default basket options are like credit default options, but instead of being based on the debt securities of one Reference Entity, they are based on the debt securities of two or more Reference Entities, or Basket Components. There would be two types of credit default basket options: (i) Multiple payout credit default basket options that automatically pay holders a cash settlement amount each time a credit event is confirmed in a Basket Component during the life of the option, after which the applicable Basket Component would be removed from the basket, or expire worthless if no credit events are confirmed during the life of the option; and (ii) single payout credit default basket options that automatically pay holders a single cash settlement amount when the first credit event is confirmed in any Basket Component, or expire worthless if no credit event for any Basket Component is confirmed during the life of the option.[11] Unlike a multiple payout credit default basket option, a single payout credit default basket option ceases trading after confirmation of the first credit event.

The cash payout for credit default basket options is calculated differently than for credit default options. For both types of credit default basket options, each time a credit event is confirmed during the life of the option, the holder of the option would receive a cash payment per contract that is equal to one minus the Basket Component recovery rate specified by the Exchange at listing, multiplied by the notional face value of the applicable Basket Component.[12] For example, if there is a credit event in a Basket Component with notional face value of $10,000 and a recovery rate of 40%, the cash payment per contract would be $6,000.[13] As with credit default options, if no credit event is confirmed during the life of the option, the final settlement price would be $0.

B. Listing Standards

Like credit default options, credit default basket options must conform to the initial and continued listing standards under proposed CBOE Chapter XXIX.[14] CBOE is proposing to list and trade only credit default basket options overlying debt securities of multiple Reference Entities each having at least one class of securities that is registered under the Act and is an ''NMS stock''[15] as defined in Rule 600 of Regulation NMS under the Act.[16] Any registered equity security issued by the Reference Entity also would have to satisfy the requirements of CBOE Rule

---

[1] 15 U.S.C. 78s(b)(1).

[2] 17 CFR 240.19b–4.

[3] A binary option is a style of option having only two possible payoff outcomes: either a fixed amount or nothing at all.

[4] Amendment No. 3 replaced the original filing in its entirety.

[5] *See* Securities Exchange Act Release No. 55938 (June 21, 2007), 72 FR 35523 (''CBOE Proposal'').

[6] *See* 17 CFR 240.9b–1. Pursuant to Rule 9b–1(a)(4) under the Act, the Commission may, by order, designate as ''standardized options'' securities that do not otherwise meet the definition of ''standardized options.'' Standardized options are defined in Rule 9b–1(a)(4) as: ''[O]ptions contracts trading on a national securities exchange, an automated quotations system of a registered securities association, or a foreign securities exchange which relate to options classes the terms of which are limited to specific expiration dates and exercise prices, or such other securities as the Commission may, by order, designate.'' 17 CFR 240.9b–1(a)(4).

[7] *See* Securities Exchange Act Release No. 55871, 72 FR 32372 (June 12, 2007) (SR–CBOE–2006–84) (approving CBOE's proposal to list and trade credit default options) (''Credit Default Option Approval Order''). *See also* Securities Exchange Act Release No. 55919 (June 18, 2007), 72 FR 34498 (June 22, 2007) (SR–CBOE–2007–62) (making various technical changes to CBOE's credit default option rules).

[8] Proposed CBOE Rule 29.1(f) also includes as a ''Reference Entity'' the guarantor of the debt security underlying the credit default option. For purposes of credit default basket options, Reference Entities are referred to as ''Basket Components.'' *See* proposed CBOE Rule 29.1(h).

[9] CBOE Rule 29.9(c) (to be relettered CBOE Rule 29.9(d)) requires that CBOE confirm the occurrence of a credit event through at least two sources, which may include announcements published via newswire services or information service companies, the names of which would be announced to the membership via a CBOE regulatory circular, or information contained in any order, decree, or notice of filing, however described, of or filed with the courts, the Commission, an exchange, an association, the Options Clearing Corporation (''OCC''), or another regulatory agency or similar authority.

[10] However, the settlement amount could be adjusted pursuant to proposed CBOE Rule 29.4.

[11] Credit events that trigger an automatic pay out include a failure to make payment pursuant to the terms of an underlying debt security and any other event of default specified by CBOE at the time it initially lists a particular class of credit default basket options. For each Basket Component, the events of default that CBOE may specify must be defined in accordance with the terms of the specific debt security underlying the Basket Component (each a ''Reference Obligation'') or any other debt securities of the Basket Component other than non-recourse indebtedness (collectively with the Reference Obligation, ''Relevant Obligations''). *See* proposed CBOE Rules 29.1(c) and 29.2A.

[12] At the time of listing, the Exchange will designate the notional face value and recovery rate of each Basket Component. *See* proposed CBOE Rule 29.2A (setting forth the requirements for the designation and terms of credit default basket options); and proposed CBOE Rules 29.1(a)(ii) and (j) (setting forth the definitions for ''cash settlement amount'' for credit default basket options and ''Notional Face Value of Basket Component,'' respectively).

[13] $10,000 × (1 − 0.40) = $6,000.

[14] CBOE is amending Chapter XXIX to make it applicable to all ''Credit Options,'' which would include credit default options and credit default basket options.

[15] ''NMS stock'' means any security, or class of securities, other than an option for which transaction reports are collected, processed, and made available pursuant to an effective transaction reporting plan. *See* 17 CFR 242.600(b)(46) and (47).

[16] *See* proposed CBOE Rule 5.3.11.

5.4, which requires, among other things, that an equity security underlying an option be itself widely held and actively traded.[17] This requirement is designed to ensure that the issuer's securities enjoy widespread investor interest. The requirement that each Reference Entity be an issuer or guarantor of registered NMS stock will help ensure that investors have access to comprehensive public information about the Reference Entity, including the registration statement filed under the Securities Act of 1933 (''Securities Act'') and other periodic reports.[18]

Also, as with credit default options, a credit default basket option could not be exercised at the discretion of the investor, but instead would have an automatic payout only upon the occurrence of a credit event. The expiration date would be the fourth business day after the last day of trading of the series, which would be the third Friday of the expiration month.[19] The Exchange usually would open one to four series for each year up to 10.25 years from the current expiration.[20]

C. Trading

The trading rules for credit default basket options would be consistent with those applicable to credit default options. Specifically, credit default basket options would trade on CBOE's Hybrid Trading System from 8:30 a.m. to 3 p.m. (Central Time)[21] in a manner similar to the trading of equity options. With limited distinctions, as described more fully in the proposal, CBOE's equity option trading rules would apply to credit default options.[22] Also, credit default basket options would be eligible for trading as Flexible Exchange Options (''FLEX Options''). A FLEX Option that is a credit default basket option would be cash-settled and the exercise-by-exception provisions of OCC Rule 805[23] would not apply. Market-makers would be appointed to credit default options pursuant to CBOE's existing requirements,[24] as supplemented by proposed CBOE Rule 29.17. Additionally, CBOE represents that it, and the Options Price Reporting Authority (''OPRA''), have the necessary systems capacity to handle the additional quote volume anticipated to be associated with credit default basket options.

Once a particular credit default basket option class has been approved for listing and trading, the Exchange would, from time to time, open for trading a series of that class. If a credit default option class initially approved for trading no longer meets the Exchange's requirements for continued approval, the Exchange would not open for trading any additional series of options and, as provided in CBOE Rule 5.4, could prohibit any opening purchase transactions in such class. The proposed trading rules for credit default basket options are designed to create an environment that takes into account the small number of transactions likely to occur, while providing price improvement and the transparency benefits of competitive floor bidding, as compared to the over-the-counter (''OTC'') market.

Upon the confirmation of the first credit event (in the case of a single payout credit default basket option), a credit event in every Basket Component (in the case of a multiple payout credit default basket option), or the redemption of all Relevant Obligations (in the case of either type of credit default basket option), the applicable credit default basket option class would cease trading. In addition, CBOE's trading halt procedures applicable to equity options would apply to credit default basket options.[25] When determining whether to institute a trading halt in credit default basket options, CBOE floor officials would consider whether current quotations for a Relevant Obligation or other securities of a Reference Entity are unavailable or have become unreliable.[26] The Exchange's board of directors would also have the power to impose restrictions on transactions or exercises in one or more series of credit default basket options as the board, in its judgment, determines advisable in the interests of maintaining a fair and orderly market or otherwise deems advisable in the public interest or for the protection of investors.[27]

D. Clearance and Settlement

Like credit default options, credit default basket options do not have an exercise price, and thus by their terms, do not meet the definition of ''standardized options'' for purposes of Rule 9b–1 under the Act.[28] However, as discussed herein, the Commission today is using its authority pursuant to Rule 9b–1 to designate credit default basket options as ''standardized options'' under Rule 9b–1. Consequently, credit default basket option transactions will be eligible for clearance and settlement by the OCC in accordance with procedures that are substantially similar to existing systems and procedures for the clearance and settlement of exchange-traded options.[29]

E. Adjustments

Like credit default options, both types of credit default basket options would be subject to adjustments in two circumstances.[30] First, if a Basket Component is succeeded by another entity in accordance with the terms of the underlying debt securities, the Exchange will specify a new recovery

[17] CBOE Rule 5.4 provides that, absent exceptional circumstances, an underlying security will not be deemed to meet the Exchange's requirements for continued approval when: (i) There are fewer than 6,300,000 shares of the underlying security held by persons other than those who are required to report their security holdings under Section 16(a) of the Act (15 U.S.C. 78p); (ii) there are fewer than 1,600 holders of the underlying security; (iii) the trading volume (in all markets in which the underlying security is traded) was less than 1,800,000 shares in the preceding 12 months; (iv) the market price per share of the underlying security closed below $3 on the previous trading day, as measured by the closing price reported in the primary market in which the underlying security traded; or (v) the underlying security ceases to be an NMS stock.

[18] Section 13 of the Act, 15 U.S.C. 78m, provides that any issuer of a security registered pursuant to Section 12 of the Act, 15 U.S.C. 78*l*, must file with the Commission annual reports and information and documents necessary to keep reasonably current the information in its Section 12 registration statement.

[19] For a single payout credit default basket option, if a credit event is confirmed, the expiration date would be the second business day after the confirmation of the first credit event. For a multiple payout credit default basket option, if a credit event is confirmed in every Basket Component, the expiration date would be the second business day after the confirmation of the last credit event. For either type of credit default basket options, if a Redemption Event is confirmed in all Basket Components, the expiration date would be the second business day after the last confirmation date. *See* proposed CBOE Rules 29.1(d)(ii) and (e)(ii). *See also* proposed CBOE Rule 29.4.

[20] *See* proposed CBOE Rule 29.2A(b)(1) and (2).

[28] 17 CFR 240.9b–1.

[29] On April 20, 2007, the OCC filed with the Commission, a proposed rule change to enable it to clear and settle credit default basket options proposed to be listed by CBOE. On June 14, 2007, the OCC filed Amendment No. 1 to the proposal. The proposed rule change, as amended, was published for comment in the **Federal Register** on June 27, 2007. Securities Exchange Act Release No. 55939 (June 21, 2007), 72 FR 35291 (SR–OCC–2007–06) (the ''OCC Proposal''). The Commission has not yet taken action on the OCC proposal. The Commission also notes that the Options Disclosure Document (''ODD'') was recently amended to incorporate disclosure related to both credit default options and credit default basket options. *See* Securities Exchange Act Release No. 55921 (June 18, 2007), 72 FR 34495 (June 22, 2007) (SR–ODD–2007–03).

[30] *See* CBOE proposed Rule 29.4.

rate and basket weight for each successor Basket Component. The newly specified weights would equal the weight of the original Basket Component. To the extent necessary and appropriate for the protection of investors and the public interest, all other terms and conditions of the options would be the same as the original credit default basket options.

Second, if the Reference Obligation of a Basket Component is redeemed or matures during the life of the credit default basket option, the Exchange would specify another debt security of the Reference Entity as the new Reference Obligation for that Basket Component. If all debt securities of a Basket Component (*i.e.*, all Relevant Obligations) are redeemed during the life of the credit default basket option, that Basket Component would be removed from the basket.

F. Position Limits

Pursuant to proposed CBOE Rule 29.5, credit default basket options would be subject to a position limit equal to 50,000 contracts on the same side of the market. Credit default basket options would not be aggregated with option contracts on the same underlying security and would not be subject to the hedge exemption to CBOE's standard position limits. Instead, the following hedge strategies and positions would be exempt from CBOE's position limits: (i) A credit default basket option position ''hedged'' or ''covered'' by an appropriate amount of cash to meet the cash settlement amount obligation; and (ii) a credit default basket option position ''hedged'' or ''covered'' by an amount of any of the Basket Component's debt securities, instruments, or interests sufficient to meet: (A) In the case of a single payout credit default option, the cash settlement amount obligation that would be the greatest if any of the Basket Components of that option were to experience a credit event; or (B) in the case of a multiple payout credit default option, the sum of the sum of each Basket Component's cash settlement amount.[31] Also, CBOE's market-maker and firm facilitation exemptions to position limits would apply.[32]

G. Margin

The margin (both initial and maintenance) required for writing short and long positions in credit default basket options would be as follows:

- For a qualified customer carrying a long position in a credit default basket option, the margin requirement would be 15% of the current market value of the credit default basket option.
- For a non-qualified customer carrying a long position in a credit default basket option, the margin requirement would be 100% of the current market value of the credit default basket option.
- For a qualified customer carrying a short position in a multiple payout credit default basket option, the margin requirement would be the lesser of the current market value of the credit default basket option plus 15% of the sum of each Basket Component's cash settlement amount, or the sum of each Basket Component's cash settlement amount.
- For a non-qualified customer carrying a short position in a multiple payout credit default basket option, the margin requirement would be the sum of each Basket Component's cash settlement amount.
- For a qualified customer carrying a short position in a single payout credit default basket option, the margin requirement would be the lesser of the current market value of the credit default basket option plus 15% of the cash settlement amount of the Basket Component that would be the greatest if any of the Basket Components were to experience a credit event, or the cash settlement amount of the Basket Component that would be the greatest if any of the Basket Components were to experience a credit event.
- For a non-qualified customer carrying a short position in a single payout credit default basket option, the margin requirement would be the cash settlement amount of the Basket Component that would be the greatest if any of the Basket Components were to experience a credit event.

These requirements may be satisfied by a deposit of cash or marginable securities.

A credit default option carried short in a customer's account would be deemed a covered position, and eligible for the cash account, provided any one of the following is held in the account at the time the option is written or is received into the account promptly thereafter: (i) For multiple payout credit default basket options, cash or cash equivalents equal to 100% of the sum of each Basket Component's cash settlement amount; (ii) for single payout credit default basket options, cash or cash equivalents equal to 100% of the cash settlement amount of the Basket Component that would be the greatest if any of the Basket Components were to experience a credit event; or (iii) an escrow agreement. The Exchange believes that these requirements strike the appropriate balance and adequately address concerns that a member or its customer may try to maintain an inordinately large unhedged position in credit default options. The Exchange represents that, in accordance with proposed CBOE Rule 12.3(a)(4), an escrow agreement must be issued in a form acceptable to the Exchange, and that it has traditionally recognized as acceptable the escrow agreement forms of the OCC and the New York Stock Exchange.

Lastly, pursuant to proposed CBOE Rule 12.5, a credit default basket option that is carried for the account of a qualified customer may be deemed to have market value for the purposes of CBOE Rule 12.3(c).

H. Surveillance

The Exchange has represented that it will have in place adequate surveillance procedures to monitor trading in credit default basket options prior to listing and trading such options.

III. Discussion

The Commission finds that the proposed rule change is consistent with the requirements of the Act and the rules and regulations thereunder applicable to a national securities exchange.[33] In particular, the Commission finds that the proposal is consistent with section 6(b)(5) of the Act,[34] which requires, among other things, that the rules of an exchange be designed to prevent fraudulent and manipulative acts and practices; to promote just and equitable principles of trade; to foster cooperation and coordination with persons engaged in regulating, clearing, processing information with respect to, and facilitating transactions in securities; to remove impediments to and perfect the mechanism of a free and open market and a national market system; and, in general to protect investors and the public interest. CBOE's proposal, by enabling it to list and trade securities heretofore existing only in the OTC market, would extend to investors the benefits of a listed exchange market,

[31] *See* proposed CBOE Rule 29.5.

[32] Proposed CBOE Rule 29.5 would require that for purposes of its market-maker hedge exemption (CBOE Rule 4.11.05) the position must be within 20% of the applicable limit before an exemption would be granted. With respect to CBOE's firm facilitation exemption (CBOE Rule 4.11.06), proposed CBOE Rule 29.5 would provide that the aggregate exemption position could not exceed three times the standard limit of 50,000 contracts.

[33] In approving this proposed rule change, the Commission notes that it has considered the proposed rule's impact on efficiency, competition, and capital formation. *See* 15 U.S.C. 78c(f).

[34] 15 U.S.C. 78f(b)(5).

which include: a centralized market center; an auction market with posted, transparent market quotations and transaction reporting; standardized contract specifications; and the guarantee of the OCC.

In connection with its earlier approval of credit default options, the Commission found that the credit default options proposed by CBOE are securities because they are options based on the value of a security or securities and because they are options on an interest in, or based on the value of an interest in, a security or securities.[35] Under an analysis similar to that applied to credit default options, and after careful consideration of the terms of the two types of credit default basket options, the Commission finds that the credit default basket options proposed by CBOE are securities. Specifically, the Commission finds that credit default basket options are options based on the value of securities or a group or index of securities and are options on an interest in or based on the value of an interest in, securities or a group or index of securities and, therefore, are securities under section 3(a)(10) of the Act.[36]

As a threshold matter, the Commission finds that credit default basket options are options, not futures contracts. Generally speaking an option grants the holder the right, but not the obligation, to buy or sell a specific quantity, at a specific price, on or before a specified future date.[37] Courts have highlighted three characteristics in particular that distinguish options from futures contracts: (i) An options-buyer pays to the seller a nonrefundable premium; (ii) an options-buyer has rights but no further obligations under the contract; and (iii) an options-seller bears all the risk exposure.[38] Examining credit default basket options in light of these characteristics, it is clear that credit default basket options are options. First, the buyer of a credit default basket option pays to the seller a nonrefundable premium. Second, the buyer of a credit default basket option has rights but no further obligations under the contract. Third, the buyer of a credit default basket option has no further risk exposure under the contract and the seller bears all the risk of the credit event occurring.

Although credit default basket options differ from classic options in certain respects, these differences do not affect the economic substance of the contract. First, credit default basket options are cash-settled and do not allow for physical delivery. It is well established, however, that cash-settled options based on prices of securities are options ''on'' such securities.[39] Second, credit default basket options are automatically exercised, unlike a classic option that generally gives the option-holder the right but not the obligation to exercise if the option is in the money. In the case of cash-settled options, such as credit default basket options, however, giving the option-holder the right to decline to accept the cash upon the occurrence of an event of default would be economically meaningless.[40] For this reason, under OCC rules, index option contracts are automatically exercised if they are in-the-money at expiration, and equity options contracts are automatically exercised if they are in-the-money by specified amounts. Third, the payout for a credit default basket option is fixed in advance and binary in nature, while in a classic option the payout can increase or decrease continuously in direct correlation with the price movement of the underlying instrument. The same is true, of course, of the payout of a futures contract. Thus, the fixed payout of credit default basket options does not weigh in favor of classifying them as either futures or options.

In short, even though the potential payout of a credit default basket option is cash-settled, automatically exercised, and fixed in advance, the buyer of a credit default basket option still pays a fixed premium for the possibility of receiving a greater amount—which is the essence of optionality.[41]

Furthermore, the Commission finds that credit default basket options are securities under section 3(a)(10) of the Act.[42] Specifically, credit default basket options are options based on the value of securities or a group or index of securities and are options on an interest in, or based on the value of an interest in, securities or a group or index of securities. In coming to these conclusions, the Commission carefully considered the terms of the credit default basket options, using an analytical approach similar to that which the Commission applied to credit default options.

The Commission also believes that the listing and trading rules proposed by CBOE for credit default basket options are substantially similar to the listing and trading rules for credit default options, and are likewise reasonable and consistent with the Act. As with a credit default option, a credit default basket option must be based on Reference Obligations issued by entities that issue or guarantee registered equity securities that are NMS stocks and that meet the Exchange's standards for listing an equity option. These requirements are reasonably designed to facilitate investors' access to information about the Reference Entities that may be necessary to price a credit default basket option appropriately.

The Commission believes that the proposed position limits and margin rules for credit default basket options are reasonable and consistent with the Act. The proposed position limit of 50,000 contracts in any credit default basket option class appears to reasonably balance the promotion of a free and open market for these securities with minimization of incentives for market manipulation and insider trading. The proposed margin rules

---

[41] *See* Brief of Amicus Curiae The Securities and Exchange Commission, at 24, *Caiola* v. *Citibank, N.A., New York,* 295 F.3d 312 (2d Cir. 2002) (01–7545) (''Simply put, Caiola paid a little for the chance to get a lot'').

[42] The Commission wishes to make clear that because credit default basket options will be exchange-traded and not individually negotiated (and not necessarily between eligible contract participants), they are not qualifying swap agreements under Section 206A of the Gramm-Leach-Bliley Act (''GLBA''), 15 U.S.C. 78c note, and, therefore, not excluded from the definition of security by Section 3A of the Act, 15 U.S.C. 78c–1. Also, certain OTC credit default swaps (whether single-name or basket) are not securities. The finding that credit default basket options are securities because they are options based on the value of securities or a group or index of securities might suggest that single-name or basket OTC credit default swaps are also options based on the value of a security or group or index of securities and, therefore, excluded from the definition of swap agreement because Section 206A(b)(1) of the GLBA, 15 U.S.C. 78c note, excludes from the definition of swap agreement ''any put, call, straddle, option, or privilege on any security, certificate of deposit, or group or index of securities, including any interest therein or based on the value thereof.'' However, Congress specifically enumerated ''credit default swaps'' (without defining the term) as one example of a qualifying swap agreement. *See* Section 206A(a)(3) of the GLBA, 15 U.S.C. 78c note. The Commission views the specific enumeration of ''credit default swaps'' as reflecting the intention of Congress to exclude certain OTC credit default swaps from the definition of security pursuant to Sections 206B & C of the GLBA, 15 U.S.C. 78c note. Of course, OTC credit default swaps that involve terms similar to credit default basket options, but that are otherwise excluded from the definition of security because they are qualifying swap agreements, remain subject to the Commission's antifraud jurisdiction (including authority over insider trading) as ''security-based swap agreements'' under Section 206B of the GLBA, 15 U.S.C. 78c note.

appear reasonably designed to deter a member or its customer from assuming an imprudent position in credit default options.

In support of this proposal, the Exchange made the following representations:

• The Exchange will have in place adequate surveillance procedures to monitor trading in credit default basket options prior to listing and trading such options, thereby helping to ensure the maintenance of a fair and orderly market for trading in credit default options.

• The Exchange and the OPRA will have the necessary systems capacity to accommodate the additional volume associated with credit default basket options as proposed.

This approval order is based on CBOE's representations.

For the foregoing reasons, the Commission finds that the proposed rule is consistent with the Act.

IV. Designation of Credit Default Basket Options Pursuant to Rule 9b–1

Rule 9b–1 establishes a disclosure framework for standardized options that are traded on a national securities exchange and cleared through a registered clearing agency. Under this framework, the exchange on which a standardized option is listed and traded must prepare an ODD that, among other things, identifies the issuer and describes the uses, mechanics, and risks of options trading, in language that can be easily understood by the general investing public. The ODD is treated as a substitute for the traditional prospectus. A broker-dealer must provide a copy of the ODD to each customer at or before approving of the customer's account for trading any standardized option.[43] Any amendment to the ODD must be distributed to each customer whose account is approved for trading the options class for which the ODD relates.[44]

Under Rule 9b–1, use of the ODD is limited to ''standardized options'' for which there is an effective registration statement on Form S–20 under the Securities Act or that are exempt from registration.[45] The Commission specifically reserved in Rule 9b–1 the ability to designate as standardized options other securities ''that the Commission believes should be included within the options disclosure framework.'' [46]

The Commission hereby designates credit default basket options, as defined in the OCC Proposal,[47] as standardized options for purposes of Rule 9b–1 under the Act. Like credit default options, credit default basket options do not meet the definition of ''standardized options,'' because they do not have an exercise price.[48] However, they resemble standardized options in other significant respects. Credit default basket options have underlying securities and an expiration date. Like other standardized options, credit default basket options have standardized terms relating to exercise procedures, contract adjustments, time of issuance, effect of closing transactions, restrictions, and other matters pertaining to the rights and obligations of holders and writers. Further, credit default basket options are designed to provide market participants with the ability to hedge their exposure to underlying securities. The fact that credit default basket options lack a specified exercise price does not detract from this option-like benefit. The Commission believes that the fact that the OCC, the clearing agency for all standardized options, is willing to serve as issuer of credit default basket options supports the view that adding credit default basket options to the standardized option disclosure framework is reasonable.

Therefore, the Commission hereby designates credit default basket options, such as those proposed by CBOE, as standardized options for purposes of Rule 9b–1 under the Act.

V. Conclusion

It is therefore ordered, pursuant to section 19(b)(2) of the Act,[49] that the proposed rule change (SR–CBOE–2007–26), as modified by Amendment No. 3, be and hereby is approved.

It is further ordered, pursuant to Rule 9b–1(a)(4) under the Act, that credit default basket options, as defined in proposed rule change SR–OCC–2007–06, are designated as standardized options.

By the Commission.

Florence E. Harmon,

Deputy Secretary.

[FR Doc. E7–16587 Filed 8–21–07; 8:45 am]

BILLING CODE 8010–01–P

[43] *See* 17 CFR 240.9b–1(d)(1).

[44] *See* 17 CFR 240.9b–1(d)(2).

[45] *See* 17 CFR 240.9b–1(b)(1) and (c)(8). *See also* 17 CFR 230.238. Rule 238 under the Securities Act provides an exemption from the Securities Act for any standardized option, as defined by Rule 9b–1(a)(4) under the Act, with limited exceptions. Rule 238 does not exempt standardized options from the antifraud provisions of Section 17 of the Securities Act, 15 U.S.C. 77q. Also, offers and sales of standardized options by or on behalf of the issuer of the underlying security or securities, an affiliate of the issuer, or an underwriter, will constitute an offer or sale of the underlying security or securities as defined in Section 2(a)(3) of the Securities Act, 15 U.S.C. 77b(a)(3). *See also* Securities Act Release No. 8171 (December 23, 2002), 68 FR 188 (January 2, 2003) (Exemption for Standardized Options From Provisions of the Securities Act of 1933 and From Registration Requirements of the Exchange Act of 1934).

[46] *See* Securities Exchange Act Release No. 19055 and Securities Act Release No. 6426 (September 16, 1982), 47 FR 41950, 41954 (September 23, 1982).

[47] For purposes of its proposal, OCC would define the term ''credit default basket option'' as an option that is based on a basket comprised of at least two reference entities and that is either a ''multiple payout credit default basket option'' or a ''single payout credit default basket option.'' A ''multiple payout credit default basket option'' would mean a credit default basket option that automatically pays an exercise settlement amount each time a credit event is confirmed with respect to any one of the reference entities prior to expiration of the option. A ''single payout credit default basket option'' would be automatically exercised and pay a single exercise settlement amount only when the first credit event is confirmed with respect to a reference entity prior to expiration of the option. *See* proposed Section 1.C.(2) of Article XIV of the OCC By-Laws.

''Credit event'' would be as defined in the rules of the exchange on which the credit default basket options are listed, with respect to a reference obligation for such option. *See* proposed Section 1.C.(3) of Article XIV of the OCC By-Laws.

''Reference entity'' would mean any one of the issuers or guarantors of the reference obligation(s) that underlie a credit default basket option. *See* proposed Section 1.R.(1) of Article XIV of the OCC By-Laws.

''Reference obligation'' would mean any debt security the terms of which are used to define the occurrence of a credit event with respect to the reference entity that is its issuer or guarantor for a class of credit default basket options, as provided in the rules of the listing exchange. *See id.*

[48] *See* Credit Default Options Approval Order at Section VI (designating credit default options as standardized options for purposes of Rule 9b–1 under the Act).

SECURITIES AND EXCHANGE COMMISSION

[Release No. 34–56265; File No. SR–FINRA–2007–002]

Self-Regulatory Organizations; Financial Industry Regulatory Authority, Inc.; Notice of Filing and Immediate Effectiveness of Proposed Rule Change To Extend a Pilot Program That Increases Position and Exercise Limits for Certain Equity Options

August 15, 2007.

Pursuant to Section 19(b)(1) of the Securities Exchange Act of 1934 (''Act'') [1] and Rule 19b–4 thereunder,[2] notice is hereby given that on July 31, 2007, the Financial Industry Regulatory Authority, Inc. (''FINRA'') (f/k/a the National Association of Securities Dealers, Inc. (''NASD'')) filed with the Securities and Exchange Commission (''Commission'') the proposed rule change as described in Items I, II, and

[1] 15 U.S.C. 78s(b)(1).

[2] 17 CFR 240.19b–4.

III below, which Items have been substantially prepared by FINRA. FINRA has filed the proposal as a ''non-controversial'' rule change pursuant to Section 19(b)(3)(A) of the Act [3] and Rule 19b–4(f)(6) thereunder,[4] which renders it effective upon filing with the Commission. The Commission is publishing this notice to solicit comments on the proposed rule change from interested persons.

I. Self-Regulatory Organization's Statement of the Terms of Substance of the Proposed Rule Change

FINRA proposes to amend Rule 2860 to extend a pilot program increasing certain options position and exercise limits. The text of the proposed rule change is available at FINRA, the Commission's Public Reference Room, and *http://www.finra.org.*

II. Self-Regulatory Organization's Statement of the Purpose of, and Statutory Basis for, the Proposed Rule Change

In its filing with the Commission, FINRA included statements concerning the purpose of and basis for the proposed rule change and discussed any comments it received on the proposed rule change. The text of these statements may be examined at the places specified in Item IV below. FINRA has prepared summaries, set forth in Sections A, B, and C below, of the most significant aspects of such statements.

A. Self-Regulatory Organization's Statement of the Purpose of, and Statutory Basis for, the Proposed Rule Change

1. Purpose

FINRA proposes to amend Rule 2860 to extend a pilot program until March 1, 2008 (unless extended) increasing position and exercise limits for both standardized and conventional options (''Pilot Program'').[5] Unless extended, the Pilot Program will expire on September 1, 2007.[6] FINRA believes that the Pilot Program should be extended so that it may continue without interruption for the same reasons that are discussed in the Pilot Program Notice.

2. Statutory Basis

FINRA believes that the proposed rule change is consistent with the provisions of Section 15A(b)(6) of the Act,[7] which requires, among other things, that FINRA's rules must be designed to prevent fraudulent and manipulative acts and practices, to promote just and equitable principles of trade, and, in general, to protect investors and the public interest. The proposed rule change is being made so that the Pilot Program, which achieves these goals as discussed in the Pilot Program Notice, may continue without interruption.

B. Self-Regulatory Organization's Statement on Burden on Competition

FINRA does not believe that the proposed rule change will result in any burden on competition that is not necessary or appropriate in furtherance of the purposes of the Act.

C. Self-Regulatory Organization's Statement on Comments on the Proposed Rule Change Received From Members, Participants, or Others

Written comments were neither solicited nor received.

III. Date of Effectiveness of the Proposed Rule Change and Timing for Commission Action

Because the foregoing rule change does not: (1) Significantly affect the protection of investors or the public interest; (2) impose any significant burden on competition; and (3) become operative for 30 days after the date of this filing, or such shorter time as the Commission may designate, it has become effective pursuant to Section 19(b)(3)(A) of the Act [8] and Rule 19b–4(f)(6) thereunder.[9]

At any time within 60 days of the filing of the proposed rule change, the Commission may summarily abrogate such rule change if it appears to the Commission that such action is necessary or appropriate in the public interest, for the protection of investors, or otherwise in furtherance of the Act.

IV. Solicitation of Comments

Interested persons are invited to submit written data, views, and arguments concerning the foregoing, including whether the proposed rule change is consistent with the Act. Comments may be submitted by any of the following methods:

Electronic Comments

- Use the Commission's Internet comment form (*http://www.sec.gov/rules/sro.shtml*); or
- Send an e-mail to *rule-comments@sec.gov.* Please include File No. SR–FINRA–2007–002 on the subject line.

Paper Comments

- Send paper comments in triplicate to Nancy M. Morris, Secretary, Securities and Exchange Commission, Station Place, 100 F Street, NE., Washington, DC 20549–1090.

All submissions should refer to File No. SR–FINRA–2007–002. This file number should be included on the subject line if e-mail is used. To help the Commission process and review your comments more efficiently, please use only one method. The Commission will post all comments on the Commission's Internet Web site (*http://www.sec.gov/rules/sro.shtml*). Copies of the submission, all subsequent amendments, all written statements with respect to the proposed rule change that are filed with the Commission, and all written communications relating to the proposed rule change between the Commission and any person, other than those that may be withheld from the public in accordance with the provisions of 5 U.S.C. 552, will be available for inspection and copying in the Commission's Public Reference Room, 100 F Street, NE., Washington, DC 20549, on official business days between the hours of 10 a.m. and 3 p.m. Copies of such filing will also be available for inspection and copying at the principal office of FINRA. All comments received will be posted without change; the Commission does not edit personal identifying information from submissions. You should submit only information that you wish to make available publicly. All submissions should refer to File No. SR–FINRA–2007–002 and should be submitted on or before September 12, 2007.

For the Commission, by the Division of Market Regulation, pursuant to delegated authority.[10]

Florence E. Harmon,

Deputy Secretary.

SECURITIES AND EXCHANGE COMMISSION

[Release No. 34–56254; File No. SR–ISE–2007–70]

Self-Regulatory Organizations; International Securities Exchange, LLC; Notice of Filing and Immediate Effectiveness of Proposed Rule Change Relating to ISE Open/Close Trade Profile Fees

August 15, 2007.

Pursuant to Section 19(b)(1) of the Securities Exchange Act of 1934 (''Act'')[1] and Rule 19b–4 thereunder,[2] notice is hereby given that on August 13, 2007, the International Securities Exchange, LLC (''ISE'' or ''Exchange'') filed with the Securities and Exchange Commission (''Commission'') the proposed rule change as described in Items I and II below, which Items have been substantially prepared by the ISE. The ISE has designated the proposed rule change as ''non-controversial'' under Section 19(b)(3)(A)(iii)[3] of the Act and Rule 19b–4(f)(6) thereunder,[4] which renders the proposal effective upon filing with the Commission. The Commission is publishing this notice to solicit comments on the proposed rule change from interested persons.

I. Self-Regulatory Organization's Statement of the Terms of Substance of the Proposed Rule Change

The ISE is proposing to amend its Schedule of Fees to adopt a subscription fee for the sale of open and close volume data on ISE listed options. As more fully described in Section II(A)(2), this proposal is similar to a product offered by the Chicago Board Options Exchange, Incorporated (''CBOE''). The text of the proposed rule change is available at the ISE, the Commission's Public Reference Room, and *http://www.ise.com.*

II. Self-Regulatory Organization's Statement of the Purpose of, and Statutory Basis for, the Proposed Rule Change

In its filing with the Commission, the ISE included statements concerning the purpose of, and basis for, the proposed rule change and discussed any comments it received on the proposed rule change. The text of these statements may be examined at the places specified in Item IV below. The ISE has prepared summaries, set forth in Sections A, B, and C below, of the most significant aspects of such statements.

A. Self-Regulatory Organization's Statement of the Purpose of, and Statutory Basis for, the Proposed Rule Change

1. Purpose

The ISE currently creates volume data for each ISE listed option that consists of opening buys and opening sells and closing buys and closing sells.[5] The ISE currently uses a subset of this data, the customer ''opening only'' trade data, for its calculation of investor sentiment, the ISE Sentiment Index® (ISEE®), and for ISEE Select®. The ISE now proposes a broader market data offering comprised of the entire opening and closing trade data of both customers and firms for each ISE listed option. This collective market data offering is referred to by the Exchange as the ISE Open/Close Trade Profile. This new market data offering will be subdivided by origin code (*i.e.*, customer or firm) and the customer data is then further subdivided by order size. The volume data will be summarized by day and series (*i.e.*, symbol, expiration date, strike price, call or put). The ISE Open/Close Trade Profile will be a subscription service, available to both members and non-members, and will enable subscribers to create their own proprietary put/call calculations. The data will be compiled and formatted by the ISE as an end of day file. The Exchange proposes to charge both members and non-members $600 per month on a subscription basis for this new market data offering.

2. Statutory Basis

The basis under the Act for this proposed rule change is the requirement under Section 6(b)(4)[6] that an exchange provide for the equitable allocation of reasonable dues, fees and other charges among its members and issuers and other persons using its facilities. In particular, the proposed rule filing will provide members and non-members with valuable market data. The Exchange has expended considerable resources, *i.e.*, internal development costs, purchase of servers, etc., to bring this offering to market. The Exchange took these costs into account when setting the fees proposed for the ISE Open/Close Trade Profile. The ISE Open/Close Trade Profile offering is similar to one that the CBOE recently introduced to the marketplace called Open/Close Data.[7] Further, the ISE's proposed fees for this new offering are identical to the fees that CBOE currently charges for its Open/Close Data offering.[8] Finally, the Exchange notes that the fees proposed by the ISE for this market data offering are not discriminatory in that the Exchange proposes to charge both members and non-members an identical fee to subscribe to this offering.

B. Self-Regulatory Organization's Statement on Burden on Competition

The proposed rule change does not impose any burden on competition that is not necessary or appropriate in furtherance of the purposes of the Act.

C. Self-Regulatory Organization's Statement on Comments on the Proposed Rule Change Received From Members, Participants, or Others

The Exchange has not solicited, and does not intend to solicit, comments on this proposed rule change. The Exchange has not received any unsolicited written comments from members or other interested persons.

III. Date of Effectiveness of the Proposed Rule Change and Timing for Commission Action

Because the proposed rule change does not: (i) Significantly affect the protection of investors or the public interest; (ii) impose any significant burden on competition; and (iii) become operative for 30 days after the date of filing, or such shorter time as the Commission may designate if consistent with the protection of investors and the public interest, the proposed rule change has become effective pursuant to Section 19(b)(3)(A) of the Act[9] and subparagraph (f)(6) of Rule 19b–4 thereunder.[10] As required under Rule 19b–4(f)(6)(iii),[11] the ISE provided the Commission with written notice of its intent to file the proposed rule change, along with a brief description and text of the proposed rule change, at least five business days prior to the date of the filing of the proposed rule change.[12]

[7] *See* Securities Exchange Act Release No. 55062 (January 8, 2007), 72 FR 2048 (January 17, 2007) (SR–CBOE–2006–88) (order granting approval to proposed rule change to codify a fee schedule for the sale of open and close volume data on CBOE listed options by Market Data Express, LLC).

[8] *Id.*

[9] 15 U.S.C. 78s(b)(3)(A).

[10] 17 CFR 240.19b–4(f)(6).

[11] 17 CFR 240.19b–4(f)(6)(iii).

[12] The Exchange initially filed this proposal in SR–ISE–2007–63. The Exchange withdrew that proposal and subsequently filed the present proposal pursuant to Rule 19b–4(f)(6).

A proposed rule change filed under 19b–4(f)(6) normally may not become operative prior to 30 days after the date of filing.[13] However, Rule 19b–4(f)(6)(iii) [14] permits the Commission to designate a shorter time if such action is consistent with the protection of investors and the public interest. The ISE requests that the Commission waive the 30-day operative delay, as specified in Rule 19b–4(f)(6)(iii),[15] which would make the rule change effective and operative upon filing. The Commission believes that waiving the 30-day operative delay is consistent with the protection of investors and the public interest. The Commission notes that this proposal is substantially similar to SR–CBOE–2006–88 [16] previously approved by the Commission for the CBOE. The Commission further notes that the CBOE proposal was noticed for comment and no comments were received. Accordingly, the Commission designates the proposed rule change operative upon filing with the Commission.[17]

At any time within 60 days of the filing of the proposed rule change, the Commission may summarily abrogate such rule change if it appears to the Commission that such action is necessary or appropriate in the public interest, for the protection of investors, or otherwise in the furtherance of the purposes of the Act.

IV. Solicitation of Comments

Interested persons are invited to submit written data, views, and arguments concerning the foregoing, including whether the proposed rule change is consistent with the Act. Comments may be submitted by any of the following methods:

Electronic Comments

- Use the Commission's Internet comment form (*http://www.sec.gov/rules/sro.shtml*); or
- Send an e-mail to *rule-comments@sec.gov.* Please include File Number SR–ISE–2007–70 on the subject line.

Paper Comments

- Send paper comments in triplicate to Nancy M. Morris, Secretary, Securities and Exchange Commission, 100 F Street, NE., Washington, DC 20549–1090.

All submissions should refer to File Number SR–ISE–2007–70. This file number should be included on the subject line if e-mail is used. To help the Commission process and review your comments more efficiently, please use only one method. The Commission will post all comments on the Commission's Internet Web site (*http://www.sec.gov/rules/sro.shtml*). Copies of the submission, all subsequent amendments, all written statements with respect to the proposed rule change that are filed with the Commission, and all written communications relating to the proposed rule change between the Commission and any person, other than those that may be withheld from the public in accordance with the provisions of 5 U.S.C. 552, will be available for inspection and copying in the Commission's Public Reference Room, 100 F Street, NE., Washington, DC 20549, on official business days between the hours of 10 a.m. and 3 p.m. Copies of such filing also will be available for inspection and copying at the principal office of the ISE. All comments received will be posted without change; the Commission does not edit personal identifying information from submissions. You should submit only information that you wish to make available publicly. All submissions should refer to File Number SR–ISE–2007–70 and should be submitted on or before September 12, 2007.

For the Commission, by the Division of Market Regulation, pursuant to delegated authority.[18]

Florence E. Harmon,

Deputy Secretary.

SECURITIES AND EXCHANGE COMMISSION

[Release No. 34–56263; File No. SR–ISE–2007–69]

Self-Regulatory Organizations; International Securities Exchange, LLC; Notice of Filing and Immediate Effectiveness of Proposed Rule Change Relating to the Extension of a Pilot Period To Increase Position Limits and Exercise Limits for Equity Options and Options on the Nasdaq-100 Tracking Stock

August 15, 2007.

Pursuant to Section 19(b)(1) of the Securities Exchange Act of 1934 (''Act'') [1] and Rule 19b–4 thereunder,[2] notice is hereby given that on August 13, 2007, the International Securities Exchange, LLC (''ISE'' or ''Exchange'') filed with the Securities and Exchange Commission (''Commission'') the proposed rule change as described in Items I and II below, which Items have been substantially prepared by ISE. The Exchange has filed the proposal as a ''non-controversial'' rule change pursuant to Section 19(b)(3)(A) of the Act [3] and Rule 19b–4(f)(6) thereunder,[4] which renders it effective upon filing with the Commission. The Commission is publishing this notice to solicit comments on the proposed rule change from interested persons.

I. Self-Regulatory Organization's Statement of the Terms of Substance of the Proposed Rule Change

ISE proposes to extend the time period for Exchange Rule 412 and Rule 414 position and exercise limits pilot program for equity option contracts and options on the Nasdaq-100 Index Tracking Stock (''QQQQ'') (''Pilot Program''). The text of the proposed rule change is available at ISE, the Commission's Public Reference Room, and *http://www.ise.com.*

[1] 15 U.S.C. 78s(b)(1).

[2] 17 CFR 240.19b–4.

[3] 15 U.S.C. 78s(b)(3)(A).

[4] 17 CFR 240.19b–4(f)(6).

II. Self-Regulatory Organization's Statement of the Purpose of, and Statutory Basis for, the Proposed Rule Change

In its filing with the Commission, ISE included statements concerning the purpose of and basis for the proposed rule change and discussed any comments it received on the proposed rule change. The text of these statements may be examined at the places specified in Item IV below. The Exchange has prepared summaries, set forth in Sections A, B, and C below, of the most significant aspects of such statements.

A. Self-Regulatory Organization's Statement of the Purpose of, and Statutory Basis for, the Proposed Rule Change

1. Purpose

The Pilot Program provides for an increase to the standard position and exercise limits for equity option contracts and for options on QQQQs.[5] The Pilot Program, after being extended on prior occasions,[6] is set to expire on September 1, 2007.[7] Specifically, the Pilot Program increased the applicable position and exercise limits for equity options and options on the QQQQ to the following levels:

Current equity option contract limit[8]	Pilot program equity option contract limit
13,500	25,000
22,500	50,000
31,500	75,000
60,000	200,000
75,000	250,000
Current QQQQ option contract limit	**Pilot program QQQQ option contract limit**
300,000	900,000

The purpose of the proposed rule change is to extend the Pilot Program for an additional six-month period, until March 1, 2008. The Exchange believes that extending the Pilot Program for this additional period is warranted due to the positive feedback from members and for the reasons cited in the original rule filing that proposed the adoption of the Pilot Program.[9] Additionally, the Exchange represents that it has not experienced any problems or difficulties relating to the Pilot Program since its inception. For these reasons, the Exchange requests that the Commission extend the Pilot Program until March 1, 2008.

2. Statutory Basis

The Exchange believes that its proposal is consistent with Section 6(b) of the Act[10] in general, and furthers the objective of Section 6(b)(5) of the Act[11] in particular, in that it is designed to promote just and equitable principles of trade and to protect investors and the public interest.

B. Self-Regulatory Organization's Statement on Burden on Competition

The proposed rule change does not impose any burden on competition.

C. Self-Regulatory Organization's Statement on Comments on the Proposed Rule Change Received From Members, Participants, or Others

The Exchange has not solicited, and does not intend to solicit, comments on this proposed rule change. The Exchange has not received any unsolicited written comments from members or other interested parties.

III. Date of Effectiveness of the Proposed Rule Change and Timing for Commission Action

Because the forgoing rule change does not: (1) Significantly affect the protection of investors or the public interest; (2) impose any significant burden on competition; and (3) become operative for 30 days after the date of this filing, or such shorter time as the Commission may designate, it has become effective pursuant to Section 19(b)(3)(A) of the Act[12] and Rule 19b–4(f)(6) thereunder.[13]

A proposed rule change filed under 19b–4(f)(6) normally may not become operative prior to 30 days after the date of filing.[14] However, Rule 19b–4(f)(6)(iii)[15] permits the Commission to designate a shorter time if such action is consistent with the protection of investors and the public interest. The Exchange has requested that the Commission waive the 30-day operative delay. The Commission believes that waiving the 30-day operative delay is consistent with the protection of investors and in the public interest because it will allow the Pilot Program to continue uninterrupted. For this reason, the Commission designates that the proposed rule change become operative immediately.[16]

At any time within 60 days of the filing of the proposed rule change, the Commission may summarily abrogate such rule change if it appears to the Commission that such action is necessary or appropriate in the public interest, for the protection of investors, or otherwise in furtherance of the Act.

IV. Solicitation of Comments

Interested persons are invited to submit written data, views, and arguments concerning the foregoing, including whether the proposed rule change is consistent with the Act. Comments may be submitted by any of the following methods:

[5] *See* Securities Exchange Act Release No. 51295 (March 2, 2005), 70 FR 11292 (March 8, 2005) (SR–ISE–2005–14) (''Pilot Program Notice'').

[6] *See* Securities Exchange Act Release Nos. 54335 (August 18, 2006), 71 FR 50954 (August 28, 2006) (SR–ISE–2006–47); 53345 (February 22, 2006), 71 FR 10579 (March 1, 2006) (SR–ISE–2006–10); and 52265 (August 15, 2005), 70 FR 48996 (August 22, 2005) (SR–ISE–2005–39).

[7] *See* Securities Exchange Act Release No. 55311 (February 16, 2007), 72 FR 8408 (February 26, 2007) (SR–ISE–2007–15).

SECURITIES AND EXCHANGE COMMISSION

[Release No. 34–56271; File No. SR–NYSE–2007–74]

Self-Regulatory Organizations; New York Stock Exchange LLC; Notice of Filing and Order Granting Accelerated Approval of Proposed Rule Change To Amend Sections 703.22 and 802.01D of the Exchange's Listed Company Manual Regarding the Listing and Trading of Index-Linked Securities

August 16, 2007.

Pursuant to Section 19(b)(1) [1] of the Securities Exchange Act of 1934 (''Act''),[2] and Rule 19b–4 thereunder,[3] notice is hereby given that on August 3, 2007, New York Stock Exchange LLC (''NYSE'' or ''Exchange'') filed with the Securities and Exchange Commission (''Commission'') the proposed rule changes as described in Items I and II below, which items have been prepared by the Exchange. The Commission is publishing this notice to solicit comments on the proposed rule changes from interested persons.

I. Self-Regulatory Organization's Statement of the Terms of Substance of the Proposed Rule Change

The Exchange proposes to amend Section 703.22 of its Listed Company Manual (''Manual'') to permit the listing of securities that do not meet the one million unit initial distribution requirement but are redeemable on at least a weekly basis at the option of the holders. The filing also amends Section 802.01D of the Manual to apply the continued listing standards under the heading ''Specialized Securities'' to securities listed under Section 703.22.

The text of the proposed rule change is available at the Exchange, the Commission's Public Reference Room, and *http://www.nyse.com.*

II. Self-Regulatory Organization's Statement of the Purpose of, and Statutory Basis for, the Proposed Rule Change

In its filing with the Commission, the Exchange included statements concerning the purpose of and basis for the proposed rule change and discussed any comments it received on the proposed rule change. The text of these statements may be examined at the places specified in Item III below. The NYSE has prepared summaries, set forth in Sections A, B and C below, of the most significant aspects of such statements.

A. Self-Regulatory Organization's Statement of the Purpose of, and Statutory Basis for, the Proposed Rule Change

1. Purpose

The Exchange proposes to amend Section 703.22 of the Manual to permit the listing of securities that do not meet the one million unit initial distribution requirement but are redeemable on at least a weekly basis at the option of the holders. Section 703.22 is the Exchange's generic listing standards for equity index-linked securities (''Equity Index-Linked Securities''), commodity-linked securities (''Commodity-Linked Securities''), and currency-linked securities (''Currency-Linked Securities'' and, together with Equity Index-Linked Securities and Commodity-Linked Securities, ''Index-Linked Securities'').

Section 703.22 of the Manual currently exempts a new listing of Index-Linked Securities from the otherwise applicable requirement that the issue have 400 holders upon listing, but only if the issue provides for the redemption of securities at the option of the holders on at least a weekly basis. The Exchange believes that, where there is such a weekly redemption right, the same justification exists for an exemption from the requirement to have one million units issued at the time of listing as applies to the 400 holder requirement. The Exchange believes that a weekly redemption right will ensure a strong correlation between the market price of the Index-Linked Securities and the performance of the underlying index, as holders will be unlikely to sell their securities for less than their redemption value if they have a weekly right to be redeemed for their full value. In addition, in the case of those Index-Linked Securities with a weekly redemption feature that are currently listed, as well as all of those that are currently proposed to be listed, the issuer has the ability to issue new Index-Linked Securities from time to time at the indicative value at the time of such sale. This provides a ready supply of new Index-Linked Securities, thereby lessening the possibility that the market price of such securities will be affected by a scarcity of available Index-Linked Securities for sale. The Exchange believes that it also assists in maintaining a strong correlation between the market price and the indicative value, as investors will be unlikely to pay more than the indicative value in the open market if they can

[1] 15 U.S.C. 78s(b)(1).

[2] 15 U.S.C. 78a.

[3] 17 CFR 240.19b–4.

acquire Index-Linked Securities from the issuer at that price.

The Exchange states that the ability to list Index-Linked Securities with these characteristics without any minimum number of holders is important to the successful listing of such securities. Issuers issuing these types of Index-Linked Securities generally do not intend to do so by way of an underwritten offering. Rather, the distribution arrangement is analogous to that of an exchange traded fund issuance, in that the issue is launched without any significant distribution event and the float increases over time as investors purchase additional securities from the issuer at the then indicative value. Investors will generally seek to purchase the securities at a point when the underlying index is at a level that they perceive as providing an attractive growth opportunity. In the context of such a distribution arrangement, it is difficult for an issuer to guarantee its ability to sell a specific number of units on the listing date. However, the Exchange believes that this difficulty in ensuring the sale of one million units on the listing date is not indicative of a likely long-term lack of liquidity in the securities or, for the reasons set forth in the prior paragraph, of a difficulty in establishing a pricing equilibrium in the securities or a successful two-sided market.

The Exchange also proposes to amend Section 802.01D of the Manual to apply the continued listing standards under the heading ''Specialized Securities'' to securities listed under Section 703.22. These continued listing standards require that the securities be delisted when:

- The number of publicly-held securities is less than 100,000.
- The number of holders is less than 100.
- The aggregate market value of securities outstanding is less than $1,000,000.
- For specialized securities that are debt, the issuer is not able to meet its obligations on such debt.

The Exchange proposes to exempt from the 100 holders requirement Index-Linked Securities that are redeemable at the option of the holder on at least a weekly basis. The Exchange believes this exemption is appropriate because the securities in question are not subject to any minimum holder requirement at the time of initial listing.

2. Statutory Basis

The Exchange believes that the proposed rule change is consistent with Section 6(b) of the Act,[4] in general, and furthers the objectives of Section 6(b)(5) of the Act,[5] in particular in that it is designed to promote just and equitable principles of trade, to foster cooperation and coordination with persons engaged in regulating, clearing, settling, processing information with respect to, and facilitating transactions in securities, to remove impediments to and perfect the mechanism of a free and open market and a national market system, and, in general, to protect investors and the public interest.

B. Self-Regulatory Organization's Statement on Burden on Competition

The Exchange does not believe that the proposed rule change will impose any burden on competition that is not necessary or appropriate in furtherance of the purposes of the Act.

C. Self-Regulatory Organization's Statement on Comments on the Proposed Rule Change Received From Members, Participants or Others

Written comments were neither solicited nor received.

III. Solicitation of Comments

Interested persons are invited to submit written data, views and arguments concerning the foregoing, including whether the proposed rule change is consistent with the Act. Comments may be submitted by any of the following methods:

Electronic Comments

- Use the Commission's Internet comment form (*http://www.sec.gov/rules/sro.shtml*); or
- Send e-mail to *rule-comments@sec.gov.* Please include File Number SR–NYSE–2007–74 on the subject line.

Paper Comments

- Send paper comments in triplicate to Nancy M. Morris, Secretary, Securities and Exchange Commission, 100 F Street, NE., Washington, DC 20549–1090.

All submissions should refer to File Number SR–NYSE–2007–74. This file number should be included on the subject line if e-mail is used. To help the Commission process and review your comments more efficiently, please use only one method. The Commission will post all comments on the Commission's Internet Web site (*http://www.sec.gov/rules/sro.shtml*). Copies of the submission, all subsequent amendments, all written statements with respect to the proposed rule change that are filed with the Commission, and all written communications relating to the proposed rule change between the Commission and any person, other than those that may be withheld from the public in accordance with the provisions of 5 U.S.C. 552, will be available for inspection and copying in the Commission's Public Reference Room, 100 F Street, NE., Washington, DC 20549, on official business days between the hours of 10 a.m. and 3 p.m. Copies of such filing also will be available for inspection and copying at the principal office of the Exchange. All comments received will be posted without change; the Commission does not edit personal identifying information from submissions. You should submit only information that you wish to make available publicly. All submissions should refer to File number SR–NYSE–2007–74 and should be submitted by September 12, 2007.

IV. Commission's Findings and Order Granting Accelerated Approval of the Proposed Rule Change

After careful consideration, the Commission finds that the proposed rule change is consistent with the requirements of the Act and the rules and regulations thereunder applicable to a national securities exchange[6] and, in particular, the requirements of Section 6 of the Act.[7] Specifically, the Commission finds that the proposed rule change is consistent with Section 6(b)(5) of the Act,[8] which requires, among other things, that the rules of a national securities exchange be designed to promote just and equitable principles of trade, to foster cooperation and coordination with persons engaged in regulating, clearing, settling, processing information with respect to, and facilitating transactions in securities, to remove impediments to and perfect the mechanism of a free and open market and a national market system, and, in general, to protect investors and the public interest.

The Commission believes that this proposal should benefit investors by providing an exception to the minimum public distribution requirements for Index-Linked Securities with a weekly redemption right. The Commission believes that the market price of Index-Linked Securities with a weekly redemption right should exhibit a strong

[4] 15 U.S.C. 78f(b).

[5] 15 U.S.C. 78f(b)(5).

[6] In approving this proposed rule change, the Commission has considered the proposed rule's impact on efficiency, competition, and capital formation. 15 U.S.C. 78c(f).

[7] 15 U.S.C. 78f.

[8] 15 U.S.C. 78f(b)(5).

correlation to the performance of the relevant underlying index, since holders of such securities will be unlikely to sell them for less than their redemption value if they have a weekly right to be redeemed for their full value. The Commission believes that this exception is reasonable and should allow for the listing and trading of certain Index-Linked Securities that would otherwise not be able to be listed and traded on the Exchange.

The Commission further finds that the Exchange's proposal to amend Section 802.01D of the Manual to apply the continued listing standards under the heading ''Specialized Securities'' to securities listed under Section 703.22 will clarify the applicable continued listing criteria for Index-Linked Securities. Moreover, the Commission believes that the proposed exemption for Index-Linked Securities that are redeemable at the option of the holder on at least a weekly basis from an ongoing distribution requirement is consistent with the rationale underlying the exemption from the initial listing standards in Section 703.22 of the Manual.

The Commission finds good cause for approving the proposed rule change prior to the 30th day after the date of publication of the notice of filing thereof in the **Federal Register**. The Commission does not believe that NYSE's proposal raises any novel regulatory issues and, therefore, that good cause exists for approving the filing on an expedited basis. Therefore, accelerating approval of this proposal should benefit investors by creating, without undue delay, additional competition in the market for such securities.

Therefore, the Commission finds good cause, consistent with Section 19(b)(2) of the Act,[9] to approve the proposed rule change on an accelerated basis.

V. Conclusion

It is therefore ordered, pursuant to Section 19(b)(2) of the Act,[10] that the proposed rule change (SR–NYSE–2007–74) be, and it hereby is, approved on an accelerated basis.

For the Commission, by the Division of Market Regulation, pursuant to delegated authority.[11]

Florence E. Harmon,

Deputy Secretary.

SECURITIES AND EXCHANGE COMMISSION

[Release No. 34–56270; File No. SR–NYSEArca–2007–74]

Self-Regulatory Organizations; NYSEArca, Inc.; Notice of Filing and Immediate Effectiveness of Proposed Rule Change Amending Rule 7.34(e) and Clarifying Certain Customer Disclosures Relating to ETF Trading

August 15, 2007.

Pursuant to Section 19(b)(1) of the Securities Exchange Act of 1934 (the ''Act'')[1] and Rule 19b–4 thereunder,[2] notice is hereby given that on August 13, 2007, NYSE Arca, Inc. (the ''NYSEArca'' or the ''Exchange'') filed with the Securities and Exchange Commission (''Commission'') the proposed rule change as described in Items I, II and III below, which Items have been substantially prepared by NYSEArca. The Exchange has filed the proposed rule change as one constituting a stated policy, practice, or interpretation with respect to the meaning, administration, or enforcement of an existing rule under Section 19(b)(3)(A)(ii) of the Act[3] and Rule 19b–4(f)(1) thereunder,[4] which renders the proposal effective upon filing with the Commission. The Commission is publishing this notice to solicit comments on the proposed rule change from interested persons.

I. Self-Regulatory Organization's Statement of the Terms of Substance of the Proposed Rule Change

The Exchange, through its wholly owned subsidiary, NYSE Arca Equities, Inc. (''NYSE Arca Equities'' or ''Corporation''), proposes to amend NYSE Arca Equities Rule 7.34(e) (the ''Rule''). The changes described in this rule proposal clarify the customer disclosures ETP Holders must make to non-ETP Holders. The text of the proposed rule change is available at the Exchange, the Commission's Public Reference Room, and *http://www.nysearca.com.*

II. Self-Regulatory Organization's Statement of the Purpose of, and Statutory Basis for, the Proposed Rule Change

In its filing with the Commission, the Exchange included statements concerning the purpose of, and basis for, the proposed rule change and discussed any comments it received on the proposed rule change. The text of these statements may be examined at the places specified in Item IV below. The Exchange has prepared summaries, set forth in Sections A, B, and C below, of the most significant aspects of such statements.

A. Self-Regulatory Organization's Statement of the Purpose of, and Statutory Basis for, the Proposed Rule Change

1. Purpose

Pursuant to the Rule, ETP Holders may not accept orders from Non-ETP Holders for execution in the Opening or Late Trading Sessions without first disclosing certain risks. To facilitate extended hours trading and enhance customer disclosures, the Exchange proposes to require ETP Holders to disclose to their Non-ETP Holder customers an additional risk associated with extended trading hours in exchange-traded funds (''ETFs'').[5]

Specifically, the Exchange proposes to amend NYSE Arca Equities Rule 7.34(e)(3) and 7.34(e)(3)(7) by addressing the risk associated with the lack of calculation or dissemination of the underlying index value or Intraday Indicative Value (''IIV''). For ETFs, an updated underlying index value or IIV may not be calculated or publicly disseminated in extended trading hours. Since the underlying index value and IIV are not calculated or widely disseminated during the Opening and Late Trading Sessions, an investor who is unable to calculate implied values for certain derivative securities products in those sessions may be at a disadvantage to market professionals. The Exchange believes that requiring ETP Holders to disclose this risk to Non-ETP Holders will facilitate informed participation in extended hours trading.

2. Statutory Basis

The Exchange believes that the proposed rule change is consistent with Section 6(b) of the Act[6] in general, and furthers the objectives of Section 6(b)(5) of the Act[7] in particular, because it is designed to prevent fraudulent and manipulative acts and practices, to promote just and equitable principles of trade, to foster cooperation and

[7] 15 U.S.C. 78f(b)(5).

coordination with persons engaged in facilitating transactions in securities, and to remove impediments to and perfect the mechanism of a free and open market and a national market system.

B. Self-Regulatory Organization's Statement on Burden on Competition

The Exchange does not believe that the proposed rule change will impose any burden on competition that is not necessary or appropriate in furtherance of the purposes of the Act.

C. Self-Regulatory Organization's Statement on Comments on the Proposed Rule Change Received From Members, Participants, or Others

The Exchange has neither solicited nor received written comments on the proposed rule change.

III. Date of Effectiveness of the Proposed Rule Change and Timing for Commission Action

Because the foregoing proposed rule change constitutes a stated policy, practice, or interpretation with respect to the meaning, administration, or enforcement of an existing rule of the Exchange, it has become effective pursuant to Section 19(b)(3)(A)(i) of the Act[8] and Rule 19b–4(f)(1) thereunder.[9] At any time within 60 days of the filing of the proposed rule change, the Commission may summarily abrogate such proposed rule change if it appears to the Commission that such action is necessary or appropriate in the public interest, for the protection of investors, or otherwise in furtherance of the purposes of the Act.

IV. Solicitation of Comments

Interested persons are invited to submit written data, views, and arguments concerning the foregoing, including whether the proposed rule change is consistent with the Act. Comments may be submitted by any of the following methods:

Electronic Comments

• Use the Commission's Internet comment form (*http://www.sec.gov/rules/sro.shtml*); or

• Send an e-mail to *rule-comments@sec.gov*. Please include File Number SR–NYSEArca–2007–74 on the subject line.

Paper Comments

• Send paper comments in triplicate to Nancy M. Morris, Secretary, Securities and Exchange Commission, 100 F Street, NE., Washington, DC 20549–1090.

All submissions should refer to File Number SR–NYSEArca–2007–74. This file number should be included on the subject line if e-mail is used. To help the Commission process and review your comments more efficiently, please use only one method. The Commission will post all comments on the Commission's Internet Web site (*http://www.sec.gov/rules/sro.shtml*). Copies of the submission, all subsequent amendments, all written statements with respect to the proposed rule change that are filed with the Commission, and all written communications relating to the proposed rule change between the Commission and any person, other than those that may be withheld from the public in accordance with the provisions of 5 U.S.C. 552, will be available for inspection and copying in the Commission's Public Reference Room, 100 F Street, NE., Washington, DC 20549, on official business days between the hours of 10 a.m. and 3 p.m. Copies of such filing also will be available for inspection and copying at the principal office of the Exchange. All comments received will be posted without change; the Commission does not edit personal identifying information from submissions. You should submit only information that you wish to make available publicly.

All submissions should refer to File Number SR–NYSEArca–2007–74 and should be submitted on or before September 12, 2007.

For the Commission, by the Division of Market Regulation, pursuant to delegated authority.[10]

Florence E. Harmon,

Deputy Secretary.

SECURITIES AND EXCHANGE COMMISSION

[Release No. 34–56264; File No. SR–NYSEArca–2007–84]

Self-Regulatory Organizations; NYSE Arca, Inc.; Notice of Filing and Immediate Effectiveness of Proposed Rule Change To Extend the Position and Exercise Limit Pilot Program

August 15, 2007.

Pursuant to Section 19(b)(1) of the Securities Exchange Act of 1934 (''Act'')[1] and Rule 19b–4 thereunder,[2] notice is hereby given that on August 3, 2007, NYSE Arca, Inc. (''NYSE Arca'' or ''Exchange'') filed with the Securities and Exchange Commission (''Commission'') the proposed rule change as described in Items I and II below, which Items have been substantially prepared by the Exchange. The Exchange has filed the proposal as a ''non-controversial'' rule change pursuant to Section 19(b)(3)(A) of the Act[3] and Rule 19b–4(f)(6) thereunder,[4] which renders it effective upon filing with the Commission. The Commission is publishing this notice to solicit comments on the proposed rule change from interested persons.

I. Self-Regulatory Organization's Statement of the Terms of Substance of the Proposed Rule Change

NYSE Arca proposes to extend the position and exercise limits pilot program for equity option contracts and options on the Nasdaq-100 Tracking Stock (''QQQQ'') (''Pilot Program'') through March 1, 2008. The text of the proposed rule change is available at NYSE Arca, the Commission's Public Reference Room, and *http://www.nysearca.com.*

II. Self-Regulatory Organization's Statement of the Purpose of, and Statutory Basis for, the Proposed Rule Change

In its filing with the Commission, NYSE Arca included statements concerning the purpose of and basis for the proposed rule change and discussed any comments it received on the proposed rule change. The text of these statements may be examined at the places specified in Item IV below. NYSE Arca has prepared summaries, set forth in Sections A, B, and C below, of the most significant aspects of such statements.

A. Self-Regulatory Organization's Statement of the Purpose of, and Statutory Basis for, the Proposed Rule Change

1. Purpose

The purpose of this proposal is to extend the period for the Exchange's Pilot Program relating to standard position and exercise limits for equity option contracts and for options on QQQQs until March 1, 2008.[5]

[1] 15 U.S.C. 78s(b)(1).

[2] 17 CFR 240.19b–4.

[3] 15 U.S.C. 78s(b)(3)(A).

[4] 17 CFR 240.19b–4(f)(6).

[5] The Pilot Program, which was effective upon filing on February 25, 2005 and subsequently extended, is due to expire on September 1, 2007. *See* Securities Exchange Act Release No. 51286 (March 1, 2005), 70 FR 11297 (March 8, 2005) (SR–PCX–2003–55) (''Pilot Program Notice''). *See also* Securities Exchange Act Release Nos. 55374 (February 26, 2007), 72 FR 9823 (March 5, 2007) (SR–NYSEArca–19); 54385 (August 30, 2006), 71 FR

Specifically, the Pilot Program increased the applicable position and exercise limits for equity options and options on the QQQQ in accordance with the following levels:

Current equity option contract limit [6]	Pilot program equity option contract limit
13,500	25,000
22,500	50,000
31,500	75,000
60,000	200,000
75,000	250,000
Current QQQQ option contract limit	**Pilot Program QQQQ Option Contract Limit**
300,000	900,000

The Exchange believes that extending the Pilot Program until March 1, 2008 is warranted due to the positive feedback from OTP Holders and for the reasons cited in the original rule filing that proposed the Pilot Program.[7] The Exchange has not encountered any problems or difficulties relating to the Pilot Program since its inception. For these reasons, the Exchange requests that the Commission extend the Pilot Program until March 1, 2008.

2. Statutory Basis

The Exchange believes the proposed rule change is consistent with the Act and the rules and regulations thereunder and, in particular, the requirements of Section 6(b) of the Act.[8] Specifically, the Exchange believes the proposed rule change is consistent with Section 6(b)(5) of the Act [9] that requires that the rules of an exchange be designed to promote just and equitable principles of trade, to prevent fraudulent and manipulative acts, to remove impediments to and perfect the mechanism for a free and open market and a national market system, and, in general, to protect investors and the public interest.

B. Self-Regulatory Organization's Statement on Burden on Competition

The Exchange does not believe that the proposed rule change will impose any burden on competition that is not necessary or appropriate in furtherance of the purposes of the Act.

C. Self-Regulatory Organization's Statement on Comments on the Proposed Rule Change Received From Members, Participants, or Others

Written comments on the proposed rule change were neither solicited nor received.

III. Date of Effectiveness of the Proposed Rule Change and Timing for Commission Action

Because the foregoing rule change does not: (1) Significantly affect the protection of investors or the public interest; (2) impose any significant burden on competition; and (3) become operative for 30 days from the date of this filing, or such shorter time as the Commission may designate, it has become effective pursuant to Section 19(b)(3)(A) of the Act [10] and Rule 19b–4(f)(6) thereunder.[11]

A proposed rule change filed under Rule 19b–4(f)(6) normally may not become operative prior to 30 days after the date of filing.[12] However, Rule 19b–4(f)(6)(iii) [13] permits the Commission to designate a shorter time if such action is consistent with the protection of investors and the public interest. The Exchange has requested that the Commission waive the 30-day operative delay. The Commission believes that waiving the 30-day operative delay is consistent with the protection of investors and in the public interest because it will allow the Pilot Program to continue uninterrupted. For this reason, the Commission designates that the proposed rule change become operative immediately.[14]

At any time within 60 days of the filing of the proposed rule change, the Commission may summarily abrogate such rule change if it appears to the Commission that such action is necessary or appropriate in the public interest, for the protection of investors, or otherwise in furtherance of the Act.

IV. Solicitation of Comments

Interested persons are invited to submit written data, views, and arguments concerning the foregoing, including whether the proposed rule change is consistent with the Act. Comments may be submitted by any of the following methods:

Electronic Comments

- Use the Commission's Internet comment form (*http://www.sec.gov/rules/sro.shtml*); or
- Send an e-mail to *rule-comments@sec.gov.* Please include File No. SR–NYSEArca–2007–84 on the subject line.

Paper Comments

- Send paper comments in triplicate to Nancy M. Morris, Secretary, Securities and Exchange Commission, Station Place, 100 F Street, NE., Washington, DC 20549–1090.

All submissions should refer to File No. SR–NYSEArca–2007–84. This file number should be included on the subject line if e-mail is used. To help the Commission process and review your comments more efficiently, please use only one method. The Commission will post all comments on the Commission's Internet Web site (*http://www.sec.gov/rules/sro.shtml*). Copies of the submission, all subsequent amendments, all written statements with respect to the proposed rule change that are filed with the

53150 (September 8, 2006) (SR–NYSEArca–49); 53350 (February 22, 2006), 71 FR 10582 (March 1, 2006) (SR–PCX–2006–08); and 52263 (August 15, 2005), 70 FR 49003 (August 22, 2005) (SR–PCX–2005–95).

BILLING CODE 8010–01–P

SECURITIES AND EXCHANGE COMMISSION

[Release No. 34–56261; File No. SR–Phlx–2007–51]

Self-Regulatory Organizations; Philadelphia Stock Exchange, Inc.; Notice of Filing and Immediate Effectiveness of Proposed Rule Change Relating to an Increase in the Maximum Number of Quoters Permitted in an Option

August 15, 2007.

Pursuant to section 19(b)(1) of the Securities Exchange Act of 1934 (''Act''),[1] and Rule 19b–4 thereunder,[2] notice is hereby given that on August 13, 2007, the Philadelphia Stock Exchange, Inc. (''Phlx'' or ''Exchange'') filed with the Securities and Exchange Commission (''Commission'') the proposed rule change as described in Items I, II, and III, below, which Items have been prepared by the Phlx. The Exchange filed the proposal as a ''non-controversial'' proposed rule change pursuant to section 19(b)(3)(A) of the Act,[3] and Rule 19b–4(f)(6) thereunder,[4] which renders the proposal effective upon filing with the Commission. The Commission is publishing this notice to solicit comments on the proposed rule change from interested persons.

I. Self-Regulatory Organization's Statement of the Terms of Substance of the Proposed Rule Change

The Phlx proposes to amend Commentary .02 of Rule 507, Application for Approval as an SQT[5] or RSQT[6] and Assignment in Options, to increase the maximum number of participants that may be assigned in a particular equity option at any one time.

The Exchange also proposes a technical amendment to Rule 507, Commentary .01, to re-insert language concerning assignment in options by ''root symbol'' that was inadvertently deleted in the original proposal relating to the Maximum Number of Quoters (''MNQ'') in Equity Options, as described more fully below. The text of the proposed rule change is available at *http://www.phlx.com,* at the Phlx, and at the Commission's Public Reference Room.

II. Self-Regulatory Organization's Statement of the Purpose of, and Statutory Basis for, the Proposed Rule Change

In its filing with the Commission, the Phlx included statements concerning the purpose of and basis for the proposed rule change and discussed any comments it received on the proposed rule change. The text of these statements may be examined at the places specified in Item IV below. The Phlx has prepared summaries, set forth in sections A, B, and C below, of the most significant aspects of such statements.

A. Self-Regulatory Organization's Statement of the Purpose of, and Statutory Basis for, the Proposed Rule Change

1. Purpose

The purpose of the proposed rule change is to permit additional participants to quote electronically in equity options listed for trading on the Exchange by increasing the MNQ in equity options trading on the Exchange.

In January 2007, as one part of a larger overall program established to mitigate electronic option quote traffic on the Exchange, the Exchange adopted Commentary .02 to Rule 507, Maximum Number of Quoters in Equity Options.[7] This rule limits the number of participants that may be assigned to a particular equity option at any one time based upon each option's monthly national volume.

Commentary .02 to Rule 507 currently sets forth tiered MNQ levels providing for 20 participants for the top 5% most actively traded options; 15 participants for next 10% most actively traded options, and 10 market participants for all other options. The ranking is based upon the preceding month's national volumes.

The proposal would increase the MNQ levels by two (2) participants in each tier. Specifically, the new MNQ levels would provide for increases from 20 to 22 participants per option for the top 5% most actively traded options; from 15 to 17 participants per option for the next 10% most actively traded options, and from 10 to 12 participants per option for all other options.

Currently, the Exchange's Options Allocation, Evaluation and Securities Committee (''OAESC'')[8] may increase the MNQ when exceptional circumstances warrant. Proposed Commentary .04 to Rule 507 describes the events that may be considered ''exceptional,'' including substantial trading volume (whether actual or expected), a major news event or corporate event. The Exchange may reduce the MNQ following the cessation of the exceptional circumstances, but the Exchange must follow the procedures for decreases to the MNQ outlined in Commentary .03 of the rule. When relying on this provision, as in the instant proposal, the Exchange must submit a rule filing to the Commission pursuant to section 19(b)(3)(A) of the Act.

Initially, the Exchange set the MNQ at a very conservative level to ensure there was ample capacity to support multiple participants quoting the same equity option. Since that time, the Exchange

[15] 17 CFR 200.30–3(a)(12).

[1] 15 U.S.C. 78s(b)(1).

[2] 17 CFR 240.19b–4.

[3] 15 U.S.C. 78s(b)(3)(A).

[4] 17 CFR 240.19b–4(f)(6).

[5] An SQT is an Exchange Registered Options Trader (''ROT'') who has received permission from the Exchange to generate and submit options quotations electronically through AUTOM in eligible options to which such SQT is assigned. An SQT may only submit such quotations while such SQT is physically present on the floor of the Exchange. *See* Exchange Rule 1014(b)(ii)(A).

[6] An RSQT is a ROT that is a member or member organization with no physical trading floor presence who has received permission from the Exchange to generate and submit option quotations electronically through AUTOM in eligible options to which such RSQT has been assigned. An RSQT may only submit such quotations electronically from off the floor of the Exchange. *See* Exchange Rule 1014(b)(ii)(B).

[7] *See* Securities Exchange Act Release No. 55114 (January 17, 2007), 72 FR 3185 (January 24, 2007) (SR–Phlx–2006–81).

[8] The OAESC has jurisdiction over, among other things: The appointment of specialists on the options and foreign currency options trading floors; allocation, retention and transfer of privileges to deal in options on the trading floors; and administration of the 500 series of Phlx rules. *See* Phlx By-Law Article X, Section 10–7.

has experienced an increase in volume, particularly in options included in the top two MNQ levels. The Exchange believes that adding two additional positions to the top tier (*i.e.*, options that represent the top 5% in national volume) should attract quality liquidity providers and should enable the Exchange to be flexible in assigning top tier options to such liquidity providers. The Exchange also believes that adding two new positions to the second and third tier should add to the Exchange's liquidity by providing opportunities for additional ROTs to trade in such issues.[9]

After careful analysis, the Exchange believes it has the capacity to increase the MNQ as proposed. The Exchange believes that the effect of an increase in the MNQ fosters competition in that it increases the number of market participants that may quote electronically in a product. The Exchange will inform market participants of changes to the MNQ via Exchange circular.

Assignment by ''Root Symbol''

In late December, 2006, the Commission approved the Exchange's proposal to adopt Commentary .01 to Rule 507 to permit the Exchange to assign trading privileges to SQTs and RSQTs, upon their request, only in specific series of a particular option based on the ''root symbol'' of the series, instead of assigning trading privileges in all series of such option.[10] Thereafter, the Exchange filed its MNQ proposal, reserving the numerical position for Commentary .01 and adding the MNQ language in the subsequent Commentaries. Because the MNQ proposal was approved after the ''root symbol'' proposal, the effect of marking commentary .01 ''RESERVED'' was to delete the ''root symbol'' language. The Exchange proposes herein to correct this inadvertent deletion by re-inserting the ''root symbol'' language into Commentary .01.

2. Statutory Basis

The Exchange believes that its proposal is consistent with section 6(b) of the Act[11] in general, and furthers the objectives of section 6(b)(5) of the Act[12] in particular, in that it is designed to promote just and equitable principles of trade, to remove impediments to and perfect the mechanism of a free and open market and a national market system, and, in general to protect investors and the public interest, by permitting more participants to quote electronically on the Exchange, fostering competition, and adding liquidity to the Exchange's markets, which should benefit customers.

B. Self-Regulatory Organization's Statement on Burden on Competition

The Exchange does not believe that the proposed rule change will impose any burden on competition that is not necessary or appropriate in furtherance of the purposes of the Act.

C. Self-Regulatory Organization's Statement on Comments on the Proposed Rule Change Received From Members, Participants, or Others

No written comments were either solicited or received.

III. Date of Effectiveness of the Proposed Rule Change and Timing for Commission Action

The proposed rule change is designated by the Exchange as a ''non-controversial'' rule pursuant to section 19(b)(3)(A)[13] of the Act and subparagraph (f)(6) of Rule 19b–4 thereunder,[14] because the proposed rule change: (1) Does not significantly affect the protection of investors or the public interest; (2) does not impose any significant burden on competition; and (3) does not become operative for 30 days from the date on which it was filed, or such shorter time as the Commission may designate if consistent with the protection of investors and the public interest, provided that the Exchange has given the Commission written notice of its intent to file the proposed rule change at least five business days prior to the filing of the proposed rule change.[15] Consequently, the proposed rule change has become effective upon filing.

IV. Solicitation of Comments

Interested persons are invited to submit written data, views, and arguments concerning the foregoing, including whether the proposed rule change is consistent with the Act. Comments may be submitted by any of the following methods:

Electronic Comments

- Use the Commission's Internet comment form (*http://www.sec.gov/rules/sro.shtml*); or
- Send an e-mail to *rule-comments@sec.gov.* Please include File Number SR–Phlx–2007–51 on the subject line.

Paper Comments

- Send paper comments in triplicate to Nancy M. Morris, Secretary, Securities and Exchange Commission, 100 F Street, NE., Washington, DC 20549–1090.

All submissions should refer to File Number SR–Phlx–2007–51. This file number should be included on the subject line if e-mail is used. To help the Commission process and review your comments more efficiently, please use only one method. The Commission will post all comments on the Commission's Internet Web site (*http://www.sec.gov/rules/sro.shtml*). Copies of the submission, all subsequent amendments, all written statements with respect to the proposed rule change that are filed with the Commission, and all written communications relating to the proposed rule change between the Commission and any person, other than those that may be withheld from the public in accordance with the provisions of 5 U.S.C. 552, will be available for inspection and copying in the Commission's Public Reference Room, 100 F Street, NE., Washington, DC 20549, on official business days between the hours of 10 a.m. and 3 p.m. Copies of the filing also will be available for inspection and copying at the principal office of the Phlx. All comments received will be posted without change; the Commission does not edit personal identifying information from submissions. You should submit only information that you wish to make available publicly. All submissions should refer to File Number SR–Phlx–2007–51 and should be submitted on or before September 12, 2007.

Self-Regulatory Organizations; Philadelphia Stock Exchange, Inc.; Notice of Filing and Immediate Effectiveness of Proposed Rule Change Relating to the Extension of the Position Limits Pilot Program

August 15, 2007.

Pursuant to Section 19(b)(1) of the Securities Exchange Act of 1934 (''Act'')[1] and Rule 19b–4 thereunder,[2] notice is hereby given that on August 13, 2007, the Philadelphia Stock Exchange, Inc. (''Phlx'' or ''Exchange'') filed with the Securities and Exchange Commission (''Commission'') the proposed rule change as described in Items I and II below, which Items have been substantially prepared by Phlx. The Exchange has filed the proposal as a ''non-controversial'' rule change pursuant to Section 19(b)(3)(A) of the Act[3] and Rule 19b–4(f)(6) thereunder,[4] which renders it effective upon filing with the Commission. The Commission is publishing this notice to solicit comments on the proposed rule change from interested persons.

I. Self-Regulatory Organization's Statement of the Terms of Substance of the Proposed Rule Change

Phlx proposes to extend an existing pilot program applicable to Exchange Rule 1001, Position Limits, which increases the standard position and exercise limits for equity option contracts, including options on the Nasdaq–100 Index Tracking Stock[5] (''QQQQ'') (''Pilot Program''). The Exchange proposes to extend the Pilot Program through March 1, 2008. The text of the proposed rule change is available at Phlx, the Commission's Public Reference Room, and *http://www.phlx.com.*

II. Self-Regulatory Organization's Statement of the Purpose of, and Statutory Basis for, the Proposed Rule Change

In its filing with the Commission, Phlx included statements concerning the purpose of and basis for the proposed rule change and discussed any comments it received on the proposed rule change. The text of these statements may be examined at the places specified in Item IV below. The Exchange has prepared summaries, set forth in Sections A, B, and C below, of the most significant aspects of such statements.

A. Self-Regulatory Organization's Statement of the Purpose of, and Statutory Basis for, the Proposed Rule Change

1. Purpose

The purpose of the proposed rule change is to extend the existing Pilot Program, which is scheduled to expire September 1, 2007,[6] for an additional six-month period, through March 1, 2008.

Position limits impose a ceiling on the number of option contracts in each class on the same side of the market relating to the same underlying security that can be held or written by an investor or group of investors acting in concert. Exchange Rule 1002 (not proposed to be amended herein) establishes corresponding exercise limits. Exercise limits prohibit an investor or group of investors acting in concert from exercising more than a specified number of puts or calls in a particular class within five consecutive business days.

Rule 1001 subjects equity options to one of five different position limits depending on the trading volume and outstanding shares of the underlying security. Rule 1002 establishes exercise limits for the corresponding options at the same levels as the corresponding security's position limits.[7]

Standard Position and Exercise Limit

The Pilot Program increases the standard position and exercise limits for equity options traded on the Exchange and for options overlying QQQQ to the following levels:

Standard equity option contract limit[8]	Pilot program equity option contract limit
13,500	25,000
22,500	50,000
31,500	75,000
60,000	200,000
75,000	250,000
Standard QQQQ option contract limit	**Pilot program QQQQ option contract limit**
300,000	900,000

To date, the Exchange believes that there have been no adverse affects on the market as a result of these increases in the limits for equity option contracts and options overlying QQQQ.

Nasdaq has complete control and sole discretion in determining, comprising, or calculating the Index or in modifying in any way its method for determining, comprising, or calculating the Index in the future.

[6] *See* Securities Exchange Act Release Nos. 51322 (March 4, 2005), 70 FR 12260 (March 11, 2005) (SR Phlx–2005–17); 52261 (August 15, 2005), 70 FR 49004 (August 22, 2005) (SR–Phlx–2005–51); 53388 (February 28, 2006), 71 FR 11458 (March 7, 2006) (SR–Phlx–2006–13); 54387 (August 30, 2006), 71 FR 52842 (September 7, 2006) (SR–Phlx–2006–48); and 55285 (February 13, 2007), 72 FR 8053 (February 22, 2007) (SR–Phlx–2007–10).

[7] Rule 1002 states, in relevant part, ''* * * no member or member organization shall exercise, for any account in which such member or member organization has an interest or for the account of any partner, officer, director or employee thereof or for the account of any customer, a long position in any option contract of a class of options dealt in on the Exchange (or, respecting an option not dealt in on the Exchange, another exchange if the member or member organization is not a member of that exchange) if as a result thereof such member or member organization, or partner, officer, director or employee thereof or customer, acting alone or in concert with others, directly or indirectly, has or will have exercised within any five (5) consecutive business days aggregate long positions in that class (put or call) as set forth as the position limit in Rule 1001, in the case of options on a stock or on an Exchange-Traded Fund Share. * * *''

[8] Except when the Pilot Program is in effect.

2. Statutory Basis

The Exchange believes that its proposal is consistent with Section 6(b) of the Act [9] in general, and furthers the objective of Section 6(b)(5) of the Act [10] in particular, in that it is designed to promote just and equitable principles of trade, to remove impediments to and perfect the mechanisms of a free and open market and the national market system, and, in general to protect investors and the public interest, by extending the Pilot Program for an additional six months.

B. Self-Regulatory Organization's Statement on Burden on Competition

The Exchange does not believe that the proposed rule change will impose any burden on competition that is not necessary or appropriate in furtherance of the purposes of the Act.

C. Self-Regulatory Organization's Statement on Comments on the Proposed Rule Change Received From Members, Participants, or Others

No written comments were either solicited or received.

III. Date of Effectiveness of the Proposed Rule Change and Timing for Commission Action

Because the foregoing rule change does not: (1) Significantly affect the protection of investors or the public interest; (2) impose any significant burden on competition; and (3) become operative for 30 days from the date of this filing, or such shorter time as the Commission may designate, it has become effective pursuant to Section 19(b)(3)(A) of the Act [11] and Rule 19b–4(f)(6) thereunder.[12]

A proposed rule change filed under 19b–4(f)(6) normally may not become operative prior to 30 days after the date of filing.[13] However, Rule 19b–4(f)(6)(iii) [14] permits the Commission to designate a shorter time if such action is consistent with the protection of investors and the public interest. The Exchange has requested that the Commission waive the 30-day operative delay. The Commission believes that waiving the 30-day operative delay is consistent with the protection of investors and in the public interest because it will allow the Pilot Program to continue uninterrupted. For this reason, the Commission designates that the proposed rule change become operative immediately.[15]

At any time within 60 days of the filing of the proposed rule change, the Commission may summarily abrogate such rule change if it appears to the Commission that such action is necessary or appropriate in the public interest, for the protection of investors, or otherwise in furtherance of the Act.

IV. Solicitation of Comments

Interested persons are invited to submit written data, views, and arguments concerning the foregoing, including whether the proposed rule change is consistent with the Act. Comments may be submitted by any of the following methods:

Electronic Comments

- Use the Commission's Internet comment form (*http://www.sec.gov/rules/sro.shtml*); or
- Send an e-mail to *rule-comments@sec.gov.* Please include File No. SR–Phlx–2007–58 on the subject line.

Paper Comments

- Send paper comments in triplicate to Nancy M. Morris, Secretary, Securities and Exchange Commission, Station Place, 100 F Street, NE., Washington, DC 20549–1090.

All submissions should refer to File No. SR–Phlx–2007–58. This file number should be included on the subject line if e-mail is used. To help the Commission process and review your comments more efficiently, please use only one method. The Commission will post all comments on the Commission's Internet Web site (*http://www.sec.gov/rules/sro.shtml*). Copies of the submission, all subsequent amendments, all written statements with respect to the proposed rule change that are filed with the Commission, and all written communications relating to the proposed rule change between the Commission and any person, other than those that may be withheld from the public in accordance with the provisions of 5 U.S.C. 552, will be available for inspection and copying in the Commission's Public Reference Room, 100 F Street, NE., Washington, DC 20549, on official business days between the hours of 10 a.m. and 3 p.m. Copies of such filing will also be available for inspection and copying at the principal office of Phlx. All comments received will be posted without change; the Commission does not edit personal identifying information from submissions. You should submit only information that you wish to make available publicly. All submissions should refer to File No. SR–Phlx–2007–58 and should be submitted on or before September 12, 2007.

For the Commission, by the Division of Market Regulation, pursuant to delegated authority.[16]

Florence E. Harmon,

Deputy Secretary.

DEPARTMENT OF STATE

[Public Notice 5901]

Culturally Significant Objects Imported for Exhibition Determinations: ''Artisans and Kings: Selected Treasures From the Louvre''

SUMMARY: Notice is hereby given of the following determinations: Pursuant to the authority vested in me by the Act of October 19, 1965 (79 Stat. 985; 22 U.S.C. 2459), Executive Order 12047 of March 27, 1978, the Foreign Affairs Reform and Restructuring Act of 1998 (112 Stat. 2681, *et seq.*; 22 U.S.C. 6501 note, *et seq.*), Delegation of Authority No. 234 of October 1, 1999, Delegation of Authority No. 236 of October 19, 1999, as amended, and Delegation of Authority No. 257 of April 15, 2003 [68 FR 19875], I hereby determine that the three additional objects to be included in the exhibition ''Artisans and Kings: Selected Treasures from the Louvre,'' imported from abroad for temporary exhibition within the United States, are of cultural significance. The objects are imported pursuant to a loan agreement with the foreign owner or custodian. I also determine that the exhibition or display of the three additional exhibit objects at the Denver Art Museum, Denver, Colorado, from on or about October 6, 2007, until on or about January 6, 2008, and at possible additional exhibitions or venues yet to be determined, is in the national interest. Public Notice of these Determinations is ordered to be published in the **Federal Register**.

FOR FURTHER INFORMATION CONTACT: For further information, including a list of the three additional objects, contact Paul W. Manning, Attorney-Adviser, Office of the Legal Adviser, U.S. Department of State (telephone: 202/453–8052). The address is U.S. Department of State, SA–44, 301 4th Street, SW., Room 700, Washington, DC 20547–0001.

Dated: August 15, 2007.

C. Miller Crouch,

Principal Deputy Assistant Secretary for Educational and Cultural Affairs, Department of State.

DEPARTMENT OF STATE

[Public Notice 5899]

United States Proposals for 2008 Universal Postal Union (UPU) Congress

AGENCY: Department of State.

ACTION: Notice.

SUMMARY: The Department of State solicits ideas and suggestions for proposals that the U.S. Government could submit to the plenipotentiary Congress of the Universal Postal Union (UPU) to be held in Nairobi, Kenya from August 13 to September 3, 2008. The deadline for submission of proposals by an individual UPU member country is February 12, 2008.

DATES: Written suggestions for draft proposals for the Nairobi UPU Congress should reach the Department of State by September 30, 2007.

ADDRESSES: Your suggestions may be sent to the Department of State by one of the following methods:

- *E-mail: DelehantyDM@state.gov* or *WoodCS@state.gov.*
- *Fax:* (202) 647–8902.
- *Mail:* Mr. Dennis Delehanty, Foreign Affairs Officer, Office of Technical Specialized Agencies (IO/T), Bureau of International Organization Affairs, Department of State, 2201 C Street, NW., Room 5333, Washington, DC 20520.

FOR FURTHER INFORMATION CONTACT: Mr. Dennis Delehanty, Foreign Affairs Officer, Office of Technical Specialized Agencies (IO/T), Bureau of International Organization Affairs, Department of State, (202) 647–4197.

SUPPLEMENTARY INFORMATION: Under Article 122 of the UPU General Regulations, proposals that are submitted to the International Bureau at least six months before the start of Congress will be accepted. A proposal submitted between six and four months before the start of Congress will be accepted only if it is supported by at least two member countries. A proposal submitted between four and two months before the Congress will be accepted only if it supported by at least eight

member countries; proposals submitted after that date will not be accepted.

From October through December of this year, the State Department will lead a consultation process among U.S. stakeholders to review the suggestions received. This process will culminate in the drafting of proposals that the U.S. Government will submit to the Nairobi Congress.

For reference, the 32 proposals that the United States submitted to the 2004 Bucharest UPU Congress, either independently or together with other member countries, are available on the State Department Web site at the following link: *http://www.state.gov/p/io/ipp/usgdoc/puc/43124.htm.*

Dated: August 14, 2007.

Dennis M. Delehanty,

Foreign Affairs Officer, Department of State.

[Docket No. OST–2007–27407]

National Surface Transportation Infrastructure Financing Commission

AGENCY: Department of Transportation (DOT).

ACTION: Notice of meeting location and time.

SUMMARY: This notice lists the location and time of the fourth, fifth and sixth meetings of the National Surface Transportation Infrastructure Financing Commission.

FOR FURTHER INFORMATION CONTACT: John V. Wells, Chief Economist, U.S. Department of Transportation, (202) 366–9224, *jack.wells@dot.gov.*

SUPPLEMENTARY INFORMATION: By **Federal Register** Notice dated March 12, 2007, and in accordance with the requirements of the Federal Advisory Committee Act (''FACA'') (5 U.S.C. App. 2) and the Safe, Accountable, Flexible, Efficient Transportation Equity Act: A Legacy for Users (''SAFETEA–LU'') (Pub. L. 109–59, 119 Stat. 1144), the U.S. Department of Transportation (the ''Department'') issued a notice of intent to form the National Surface Transportation Infrastructure Financing Commission (the ''Financing Commission''). Section 11142(a) of SAFETEA–LU established the National Surface Transportation Infrastructure Financing Commission and charged it with analyzing the future highway and transit needs and the finances of the Highway Trust Fund and with making recommendations regarding alternative approaches to financing transportation infrastructure.

Notice of Meeting Location and Time

The Commissioners have agreed to hold their fourth, fifth and sixth meetings from 8:30 a.m. to 4 p.m. on Wednesday, September 05, 2007; Thursday, October 18, 2007; and Thursday, November 15, 2007, respectively. All meetings will be open to the public and are scheduled to take place at the Department's headquarters building, located at 1200 New Jersey Avenue, SE., Washington, DC, 20590.

If you need accommodations because of a disability or require additional information to attend these meetings, please contact Robert Mariner in the office of the Assistant Secretary for Transportation Policy via e-mail at *robert.mariner@dot.gov,* or by phone at (202) 493–0064.

Issued on this 15th day of August, 2007.

John V. Wells,

Chief Economist, U.S. Department of Transportation, Designated Federal Official.

Noise Compatibility Program Notice; Austin-Bergstrom International Airport, Austin, TX

AGENCY: Federal Aviation Administration.

ACTION: Notice.

SUMMARY: The Federal Aviation Administration (FAA) announces that it is reviewing a proposed noise compatibility program that was submitted for Austin-Bergstrom International Airport under the provisions of 49 U.S.C. 47501 et seq. (the Aviation Safety and Noise Abatement Act, hereinafter referred to as ''the Act'') and 14 CFR part 150 by the City of Austin, Texas. This program was submitted subsequent to a determination by FAA that associated noise exposure maps submitted under 14 CFR part 150 for Austin-Bergstrom International Airport were in compliance with applicable requirements, effective February 15, 2007, and published in the **Federal Register** February 23, 2007 (Volume 72, Number 36). The proposed noise compatibility program will be approved or disapproved on or before February 10, 2008.

DATES: *Effective Date:* The effective date of the start of FAA's review of the noise compatibility program is August 14, 2007. The public comment periods ends October 13, 2007.

FOR FURTHER INFORMATION CONTACT: Paul Blackford, Federal Aviation Administration, 2601 Meacham Blvd., Fort Worth, Texas 76137, (817) 222–5607. Comments on the proposed noise compatibility program should also be submitted to the above office.

SUPPLEMENTARY INFORMATION: This notice announces that the FAA is reviewign a proposed noise compatibility program for Austin-Bergstrom International Airport which will be approved or disapproved on or before February 10, 2008. This notice

also announces the availability of this program for public review and comment.

An airport operator who has submitted noise exposure maps that are found by FAA to be in compliance with the requirements of Federal Aviation Regulations (FAR) part 150, promulgated pursuant to the Act, may submit a noise compatibilty program for FAA approval which sets forth the measures the operator has taken or proposes to reduce existing non-compatible uses and prevent the introduction of additional non-compatible uses.

The FAA has formally received the noise compatibility program for Austin-Bergstrom International Airport, effective on August 14, 2007. The airport operator has requested that the FAA review this material and that the noise mitigation measures, to be implemented jointly by the airport and surrounding communities, be approved as a noise compatibility program under section 47504 of the Act. Preliminary review of the submitted material indicates that it conforms to FAR part 150 requirements for the submittal of noise compatibility programs, but that further review will be necessary prior to approval or disapproval of the program. The formal review period, limited by law to a maximum of 180 days, will e completed on or before February 10, 2008.

The FAA's detailed evaluation will be conducted under the provisions of 14 CFR part 150, section 150.33. The primary considerations in the evaluation process are whether the proposed measures may reduce the level of aviation safety or create an undue burden on interstate or foreign commerce, and whether they are reasonably consistent with obtaining the goal of reducing existing non-compatible land uses and preventing the introduction of additional non-compatible land uses.

Interested persons are invited to comment on the proposed program with specific reference to these factors. All comments relating to these factors, other than those properly addressed to local land use authorities, will be considered by the FAA to the extent practicable. Copies of the noise exposure maps and the proposed noise compatibility program are available for examination at the following locations:

Federal Aviation Administration, 2601 Meacham Boulevard, Fort Worth, Texas; Mr. Jim Smith, 3600 Presidential Blvd., Suite 411, Austin, Texas 76719.

Questions may be directed to the individual named above under the heading, **FOR FURTHER INFORMATION CONTACT.**

Issued in Forth Worth, Texas, August 14, 2007.

Kelvin L. Solco,

Manager, Airports Division.

BILLING CODE 4910–13–M

DEPARTMENT OF TRANSPORTATION

Federal Highway Administration

Environmental Impact Statement: New London County, CT

AGENCY: Federal Highway Administration (FHWA), Department of Transportation (DOT).

ACTION: Notice of Intent.

SUMMARY: The FHWA is issuing this notice to advise the public that an environmental impact statement will be prepared for proposed transpiration improvements to 12.3 miles (21 km) of Interstate 95 (I–95) in New London County, Connecticut.

FOR FURTHER INFORMATION CONTACT: Bradley D. Keazer, Division Administrator, Federal Highway Administration, 628–2 Hebron Avenue, Suite 303, Glastonbury, Connecticut 06033, telephone (860) 659–6703, ext. 3009; or Edgar T. Hurle, Transportation Planning Director, Bureau of Policy and Planning, Connecticut Department of Transportation, 2800 Berlin Turnpike, P.O. Box 317546, Newington, CT 06131–7546, telephone: (860) 594–2005.

SUPPLEMENTARY INFORMATION: The FHWA, in cooperation with the Connecticut Department of Transportation (ConnDOT), will prepare an environmental impact statement (EIS) on a proposal for transportation improvements to I–95 between interchanges 70 and 84 in the towns of Old Lyme, East Lyme, Waterford and New London, Connecticut for a distance of approximately 12.3 miles (21 km).

Improvements to the I–95 corridor are considered necessary to improve safety and to provide for increases in projected traffic volumes. Alternatives under consideration include, but are not limited to: (1) Taking no action; and (2) addition of a third travel lane in each direction. The EIS will use data and findings from two major deficiency and needs studies entitles ''Southeastern Connecticut Corridor Study'' dated January 1999 and ''I–95 Corridor Feasibility Study, Branford to Rhode Island'' dated December 2004. Copies of these studies are available from ConnDOT's Office of Environmental Planning at the address shown above.

Letters describing the proposed action and soliciting comments will be sent to appropriate Federal, State, and local agencies and elected officials, and to private organizations and citizens who have previously expressed or are known to have an interest in this proposal. Public scoping meetings, public hearings and public information meetings will be held. Public notice will be given of the date, time and place of these meetings and hearings. The draft EIS will be available for public and agency review and comment prior to the public hearings. An Internet Web site will be established to provide information on the project which may be accessed at *http://www.ct.gov/dotinfo/.*

To ensure that the full range of issues related to this proposed action are addressed and all significant issues identified, comments and suggestions are invited from all interested parties. Comments or questions concerning this proposed action and the EIS should be directed to either the FHWA or ConnDOT at the addresses provided above.

(Catalog of Federal Domestic Assistance Program Number 20.205, Highway Planning and Construction. The regulations implementing Executive Order 12372 regarding intergovernmental consultation on Federal programs and activities apply to this program.)

Authority: 23 CFR part 771.

Issued on: August 15, 2007.

Bradley D. Keazer,

Division Administrator, Hartford, Connecticut.

BILLING CODE 4910–22–M

DEPARTMENT OF TRANSPORTATION

Federal Aviation Administration

Notice Before Waiver With Respect to Land at Lonesome Pine Airport, Wise, VA

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Notice of intent of waiver with respect to land.

SUMMARY: The FAA is publishing notice of proposed release of 0.81 acres of land at the Lonesome Pine Airport, Wise, Virginia to the town of Wise or Wise county Industrial Development Authority (Property Map Parcel 35). The release of land will transfer the responsibility (and potential liability) for maintenance and security of the water tank site to the appropriate governmental entity. Releasing the land

does not adversely impact theAirport and the land is not needed for airport development as shown on the Airport Layout Plan. Fair Market Value of the land has been assessed and will be provided to The Cumberlands Airport Commission for Airport and commission operational expenses.

DATES: Comments must be received on or before September 21, 2007.

ADDRESSES: Comments on this application may be mailed or delivered in triplicate to the FAA at the following address: Terry J. Page, Manager, FAA Washington Airports District Office, 23723 Air Freight Lane, Suite 210, Dulles, VA 20166.

In addition, one copy of any comments submitted to the FAA must be mailed or delivered to Walter H. Witt, Cumberlands Airport Commission, at the following address: Walter H. Witt, Chairman, Cumberlands Airport Commission, PO Box 1752, Wise, Virginia 24293.

FOR FURTHER INFORMATION CONTACT: Mr. Terry Page, Manager, Washington Airports District Office, 23723 Air Freight Lane, Suite 210, Dulles, VA 20166; telephone (703) 661–1354, fax (703) 661–1370, e-mail *Terry.Page@faa.gov.*

SUPPLEMENTARY INFORMATION: On April 5, 2000, new authorizing legislation became effective. That bill, the Wendell H. Ford Aviation investment and Reform Act for the 21st Century, Public Law 10–181 (Apr. 5, 2000; 114 Stat. 61) (AIR 21) requires that a 30-day public notice must be provided before the Secretary may waive any condition imposed on an interest in surplus property.

Issued in Chantilly, Virginia on June 20, 2007.

Terry J. Page,

Manager, Washington Airports District Office Eastern Region.

DEPARTMENT OF TRANSPORTATION

Federal Aviation Administration

Notice of Meeting of the Grand Canyon Working Group

ACTION: Notice of meeting.

SUMMARY: The Federal Aviation Administration (FAA) and the National Park Service (NPS) are announcing the next meeting of the Grand Canyon Working Group (GCWG). The GCWG is a self-contained group within the National Parks Overflights Advisory Group (NPOAG) that was established pursuant to the National Parks Air Tour Management Act of 2000. This notification provides the date, location, and agenda for the meeting.

DATE AND LOCATION: The GCWG will be meeting on September 20, 2007. The meeting will take place in the Mojave Room at the Chaparral Suites Resort, 5001 N. Scottsdale Road, Scottsdale, Arizona 85250, phone number (480) 949–1414. The meeting will be conducted from 8:30 a.m.–5 p.m. The public can attend the open session meeting on Thursday, September 20, 2007. The GCWG will also be meeting in closed session on the preceding day, September 19, 2007. The September 19, 2007 closed session meeting is not open to the general public.

FOR FURTHER INFORMATION CONTACT: Lucy Moore, 5 Seton Place, Santa Fe, NM 87508, telephone: (505) 820–2166, e-mail: *lucymoore@nets.com.*

SUPPLEMENTARY INFORMATION:

Background

The FAA and NPS established the GCWG within the NPOAG to provide advice and recommendations regarding the implementation of the National Parks Overflights Act of 1987 with respect to the Grand Canyon. The GCWG is comprised of 20 members to assure a representative and balanced group of agency, tribal, environmental, recreation, and aviation interests. The Working Group is co-chaired by a representative of the NPS and a representative of the FAA, and is facilitated by Lucy Moore Associates, a third-party neutral contracted through the U.S. Institute for Environmental Conflict Resolution. The Working Group has specific responsibilities for Grand Canyon overflight matters, including but not limited to: Review of the overflights noise analysis; and recommendations for a final overflights plan that provides for the substantial restoration of natural quiet and experience of the Grand Canyon National Park, including routes or corridors for commercial air tour operations that employ quiet aircraft technology.

Agenda for the September 20, 2007 Grand Canyon Working Group Meeting

An agenda will be distributed to Working Group members and posted on the FAA Grand Canyon Overflights Web site (*http://overflights.faa.gov*).

Attendance at the September 20, 2007 Meeting

Interested persons may attend the open session meeting on September 20, 2007. Because seating is limited, if you plan to attend please contact the person listed under **FOR FURTHER INFORMATION CONTACT** so that meeting space may be made to accommodate all attendees.

Record of the Meeting

A meeting summary for the GCWG open session meeting will be posted under the related documents section of the FAA Grand Canyon Overflights Web site at *http://overflights.faa.gov.*

Issued in Hawthorne, CA on August 13, 2007.

Barry Brayer,

Manager, Special Programs Staff, Western-Pacific Region.

BILLING CODE 4910–13–M

DEPARTMENT OF TRANSPORTATION

Federal Highway Administration

[Docket No. FHWA–2007–29025]

Agency Information Collection Activities: Notice of Request for Extension of Currently Approved Information Collection

AGENCY: Federal Highway Administration (FHWA), DOT.

ACTION: Notice and request for comments.

SUMMARY: The FHWA has forwarded the information collection request described in this notice to the Office of Management and Budget (OMB) to renew an information collection. We published a **Federal Register** Notice with a 60-day public comment period on this information collection on June 1, 2007. We are required to publish this notice in the **Federal Register** by the Paperwork Reduction Act of 1995.

DATES: Please submit comments by September 21, 2007.

ADDRESSES: You may send comments within 30 days to the Office of Information and Regulatory Affairs, Office of Management and Budget, 725 17th Street, NW., Washington, DC 20503, Attention DOT Desk Officer. You are asked to comment on any aspect of this information collection, including: (1) Whether the proposed collection is necessary for the FHWA's performance; (2) the accuracy of the estimated burden; (3) ways for the FHWA to enhance the quality, usefulness, and clarity of the collected information; and (4) ways that the burden could be minimized, including the use of electronic technology, without reducing the quality of the collected information. All comments should include the Docket number FHWA–2007–29025.

FOR FURTHER INFORMATION CONTACT: Mr. Kenneth Petty, (202) 366–6654, Office of Planning, Environment, and Realty, Federal Highway Administration, Department of Transportation, 1200 New Jersey Avenue, SE., Washington, DC 20590. Office hours are from 8 a.m. to 4:30 p.m., Monday through Friday, except Federal holidays.

SUPPLEMENTARY INFORMATION:

Title: Planning and Research Program Administration.

OMB Control #: 2125–0039.

Background: Under the provisions of Title 23, United States Code, section 505, 2 percent of Federal-aid highway funds in certain categories that are apportioned to the States are set aside to be used only for State Planning and Research (SPR). At least 25 percent of the SPR funds apportioned annually must be used for research, development, and technology transfer activities. In accordance with government-wide grant management procedures, a grant application must be submitted for these funds. In addition, recipients must submit periodic progress and financial reports. In lieu of Standard Form 424, Application for Federal Assistance, the FHWA uses a work program as the grant application. This includes a scope of work and budget for activities to be undertaken with FHWA planning and research funds during the next 1 or 2 year period. The information contained in the work program includes task descriptions, assignments of responsibility for conducting the work effort, and estimated costs for the tasks. This information is necessary to determine how FHWA planning and research funds will be utilized by the State Transportation Departments and if the proposed work is eligible for Federal participation. The content and frequency of submission of progress and financial reports specified in 23 CFR Part 420 are specified in OMB Circular A–102 and the companion common grant management regulations.

Respondents: 52 State Transportation Departments, including the District of Columbia and Puerto Rico.

Frequency: Annual.

Estimated Average Annual Burden per Response: 560 hours per respondent.

Estimated Total Annual Burden Hours: 29,120 hours.

Electronic Access: Internet users may access all comments received by the U.S. DOT Dockets, by using the universal resource locator (URL): *http://dms.dot.gov,* 24 hours each day, 365 days each year. Please follow the instructions online for more information and help.

Authority: The Paperwork Reduction Act of 1995; 44 U.S.C. Chapter 35, as amended; and 49 CFR 1.48.

Issued on: August 15, 2007.

James R. Kabel,

Chief, Management Programs and Analysis Division.

[FR Doc. E7–16478 Filed 8–21–07; 8:45 am]

BILLING CODE 4910–22–P

DEPARTMENT OF TRANSPORTATION

Federal Highway Administration

Federal Railroad Administration

Environmental Impact Statement: High-Speed Ground Transportation from Atlanta, GA to Chattanooga, TN

AGENCIES: Federal Highway Administration (FHWA), Federal Railroad Administration (FRA), Department of Transportation (DOT).

ACTION: Notice of Intent to Prepare an Environmental Impact Statement.

SUMMARY: FRA and FHWA are issuing this notice to advise the public that they will jointly prepare a Tier I Environmental Impact Statement (EIS) with the Georgia Department of Transportation (GDOT) and the Tennessee Department of Transportation (TDOT) to evaluate the environmental and related impacts of constructing and operating high-speed ground transportation (HSGT) service between Atlanta, Georgia and Chattanooga, Tennessee. FRA and FHWA are also issuing this notice to solicit public and agency input into the development of the scope of the EIS and to advise the public that outreach activities conducted by GDOT and its representatives will be considered in the preparation of the EIS.

DATES: Written comments on the scope of the EIS should be provided to GDOT by October 4, 2007. Comments may also be provided orally or in writing at the scoping meetings scheduled at the following locations:

Agency Scoping Meetings—Both From 10:30 a.m. to 12 p.m. Eastern Daylight Time

1. Tuesday, September 18, 2007, Georgia Department of Transportation, Office of Environment/Location, 3993 Aviation Circle, Atlanta, Georgia.

2. Thursday, September 20, 2007, Chattanooga Hamilton County Bicentennial Library, 1001 Broad Street, Chattanooga, Tennessee.

Public Scoping Meetings—All Three From 5 p.m. to 7:30 p.m. Eastern Daylight Time

1. Tuesday, September 18, 2007, McEachern High School, 2400 New Macland Road, Powder Springs, Georgia.

2. Wednesday, September 19, 2007, Rome Civic Center, 400 Civic Center Drive, Rome, Georgia.

3. Thursday, September 20, 2007, Chattanooga Hamilton County Bicentennial Library, 1001 Broad Street, Chattanooga, Tennessee.

ADDRESSES: Written comments on the scope should be sent to Mr. Glenn Bowman, P.E., State Environmental/Location Engineer, Georgia Department of Transportation, 3993 Aviation Circle, Atlanta, GA 30336, telephone (404) 699–4401.

FOR FURTHER INFORMATION CONTACT: Mr. David Valenstein, Environmental Program Manager, Federal Railroad Administration, 1120 Vermont Avenue, NW., Mail Stop 20, Washington, DC 20590, telephone (202) 493–6368; Mr. Wayne Fedora, P.E., Major Projects Engineer, Federal Highway Administration, Georgia Division, 61 Forsyth Street, Suite 17T100, Atlanta, GA 30303, telephone (404) 562–3651; Mr. George Coleman, Transportation Specialist, Tennessee Department of Transportation, 505 Deadrick Street, Suite 1800, Nashville, TN 37243, telephone (615) 741–1341; or Mr. Bowman of GDOT at the above address.

SUPPLEMENTARY INFORMATION: FRA and FHWA, in cooperation with the GDOT and the TDOT, will prepare a Tier I EIS for a HSGT system in the 110-mile corridor between Hartsfield International Airport and Atlanta, in Georgia, and Chattanooga, Tennessee. The EIS will evaluate environmental impacts of a HSGT system in the Atlanta to Chattanooga corridor.

This corridor has seen significant growth, both in population and employment, during the past few decades. It continues to be one of the fastest growing areas in the country. Future growth is projected to result in increased travel demand for both goods and people. The existing highway, transit, and aviation transportation infrastructure that would serve this demand are all projected to be at or above capacity. GDOT and TDOT believe that HSGT could provide a transportation alternative, thereby reducing congestion and travel time within the corridor, and could provide safe and reliable transportation for passengers between Hartsfield International Airport, Chattanooga

airport and metropolitan area, and points in between.

The Tier I EIS will be carried out in accordance with Council on Environmental Quality (CEQ) regulations (40 CFR part 1500 et seq.) implementing the National Environmental Policy Act (NEPA), FRA's Procedures for Considering Environmental Impacts (64 FR 28545; May 26, 1999), and FHWA regulations (23 CFR part 771 et seq.).

In addition to NEPA, the Tier I EIS will address other applicable statutes, regulations, and executive orders, including the 1990 Clean Air Act Amendments, Section 404 of the Clean Water Act, the National Historic Preservation Act of 1966, Section 4(f) of the Department of Transportation Act, the Endangered Species Act, and Executive Order 12898 on Environmental Justice.

The goals of the EIS are to: (1) Examine the regional transportation implications of the project concept; (2) evaluate the modal and technology alternatives available to provide HSGT between the two cities; (3) develop and evaluate location alternatives; and (4) determine the logical segments to be carried forward for detailed evaluation in subsequent (Tier II) environmental documents.

In a Tier I EIS, alternatives will be evaluated at a broad level of analysis. Proposed alternatives include a No-Build Alternative (used as a baseline for comparison of all alternatives), HSGT in a corridor that roughly parallels Interstate-75, one or more corridors utilizing a portion of an existing CSX transportation rail line, and a corridor that roughly parallels U.S. Route 411. Other possible corridor locations are expected to be identified during the alternatives development phase of the study.

GDOT will contact appropriate federal, state, and local agencies, as well as other organizations and individuals who have previously expressed interest, or are known to be interested, in this proposal to describe the proposed scope and solicit comments. Formal scoping meetings have been scheduled as indicated above.

Additional public information meetings and public hearings will be held during the development of the Tier I EIS. Public notice will be given of the times and locations of scoping meetings, public information meetings, and public hearings. The Draft Tier I EIS will be made available for review and comment prior to the public hearings.

To ensure that the full range of issues related to this proposed action are addressed and all significant issues are identified, comments and suggestions are invited from all interested parties. Comments or questions concerning this proposed action and the Tier I EIS should be directed to GDOT at the addresses provided above.

Issued in Washington, DC on August 16, 2007.

Rodney Barry, P.E.,

Division Administrator, Federal Highway Administration, Atlanta, GA.

Mark E. Yachmetz,

Associate Administrator for Railroad Development, Federal Railroad Administration, Washington, DC.

BILLING CODE 4910–06–P

DEPARTMENT OF TRANSPORTATION

Federal Highway Administration

Environmental Impact Statement: New London County, CO

AGENCY: Federal Highway Administration (FHWA), Department of Transportation (DOT).

ACTION: Notice of intent.

SUMMARY: The FHWA is issuing this notice to advise the public that an environmental impact statement will be prepared for proposed transportation improvements to 12.3 miles (21 km) of Interstate 95 (I–95) in New London County, Connecticut.

FOR FURTHER INFORMATION CONTACT: Bradley D. Keazer, Division Administrator, Federal Highway Administration, 628–2 Hebron Avenue, Suite 303, Glastonbury, Connecticut 06033, telephone (860) 659–6703, ext. 3009; or Edgar T. Hurle, Transportation Planning Director, Bureau of Policy and Planning, Connecticut Department of Transportation, 2800 Berlin Turnpike, P.O. Box 317546, Newington, CT 06131–7546, telephone: (860) 594–2005.

SUPPLEMENTARY INFORMATION: The FHWA, in cooperation with the Connecticut Department of Transportation (ConnDOT), will prepare an environmental impact statement (EIS) on a proposal for transportation improvements to I–95 between interchanges 70 and 84 in the towns of Old Lyme, East Lyme, Waterford and New London, Connecticut for a distance of approximately 12.3 miles (21 km).

Improvements to the I–95 corridor are considered necessary to improve safety and to provide for increases in projected traffic volumes. Alternatives under consideration include, but are not limited to: (1) Taking no action; and (2) addition of a third travel lane in each direction. The EIS will use data and findings from two major deficiency and needs studies entitled ''Southeastern Connecticut Corridor Study'' dated January 1999 and ''I–95 Corridor Feasibility Study, Branford to Rhode Island'' dated December 2004. Copies of these studies are available from ConnDOT's Office of Environmental Planning at the address shown above.

Letters describing the proposed action and soliciting comments will be sent to appropriate Federal, State, and local agencies and elected officials, and to private organizations and citizens who have previously expressed or are known to have an interest in this proposal. Public scoping meetings, public hearings and public informational meetings will be held. Public notice will be given of the date, time and place of these meetings and hearings. The draft EIS will be available for public and agency review and comment prior to the public hearings. An Internet Web site will be established to provide information on the project which may be accessed at *http://www.et.gov/dotinfo/.*

To ensure that the full range of issues related to this proposed action are addressed and all significant issues identified, comments and suggestions are invited from all interested parties. Comments or questions concerning this proposed action and the EIS should be directed to either the FHWA or ConnDOT at the addresses provided above.

(Catalog of Federal Domestic Assistance Program Number 20.205, Highway Planning and Construction. The regulations implementing Executive Order 12372 regarding intergovernmental consultation on Federal programs and activities apply to this program.)

Authority: 23 CFR 771

Dated: Issued on August 15, 2007.

Bradley D. Keazer,

Division Administrator, Hartford, Connecticut.

BILLING CODE 4910–EX–P

DEPARTMENT OF TRANSPORTATION

Federal Transit Administration

Announcement of Project Selections for FY 2007 Discretionary Programs

AGENCY: Federal Transit Administration, DOT.

ACTION: Notice.

SUMMARY: The U.S. Department of Transportation (DOT) Federal Transit Administration (FTA) announces the discretionary selection of projects to be funded under Fiscal Year (FY) 2007 appropriations for the Bus and Bus Facilities Program and Alternatives Analysis program, in response to Notices of Funding Availability published March 23, 2007, and additional FY 2007 New Starts allocations.

FOR FURTHER INFORMATION CONTACT: The appropriate FTA Regional Administrator for grant-specific issues; or Mary Martha Churchman or Maria Wright, Office of Program Management, 202–366–2053, for general information about the Bus and Bus Facilities Program; Steve Lewis-Workman, 202–366–1868, for general information about the Alternatives Analysis Program; or Sean Libberton, 202–366–5112, for general information about the New Starts program.

SUPPLEMENTARY INFORMATION: A total of $438 million was made available for discretionary allocation by FTA under the Bus and Bus Facilities program in FY 2007 (including $25 million in unallocated funds from FY 2006). FTA published two notices of funding availability on March 23, 2007, inviting applications for funding. One notice solicited proposals from the 36 most congested cities in the nation, to support transit projects under Urban Partnership Agreements to be negotiated by the Department of Transportation (DOT). To be selected as an Urban Partner, a city had to propose a comprehensive plan to address congestion, including four ''T's'': Tolling (congestion pricing), Transit, Technology, and Telecommuting. The second notice invited proposals addressing a number of FTA priorities for the Bus and Bus Facilities program, including replacement of over-aged buses, fleet expansion to improve service, and bus related facilities. In response to the two notices, FTA received proposals totaling over $4 billion.

FTA carefully reviewed all proposals submitted, and rated them based on criteria specified in the notices of funding availability. DOT recently announced the selection of five cities as Urban Partners, and committed to providing $433 million in discretionary bus program funds to support the transit elements of those Urban Partnership Agreements, and one additional promising project proposed by another Urban Partner candidate. In addition, this announcement includes $5 million for Minneapolis to meet transit needs as provided in Public Law 110–56. See Table 1 for the allocations. FTA believes that the strategic investment of the bus resources in these projects will demonstrate the important role of transit in addressing congestion and ultimately lead to more support for transit in all areas.

FTA appreciates the time and effort our grantees spent in preparing the many thoughtful proposals we received and regrets that the funding available was not sufficient to fund any of the other meritorious projects submitted for consideration. FTA recognizes that there is an on-going need for critical investment in fleet replacement and facilities, and encourages grantees to consider use of flexible funds available for either transit or highway use, among other resources.

FTA also solicited applications for Alternatives Analysis projects in a notice published March 23, 2007, with $12 million available for discretionary allocation. FTA received 36 proposals seeking $26 million and has selected 26 projects for funding. Two of these projects are associated with Urban Partnership Agreements. See Table 2 in this notice for the allocations.

Finally, in the FY 2007 Notice of FTA FY 2007 Apportionments and Allocations and Program Information, also published March 23, 2007, FTA allocated FY 2007 discretionary New Starts funds to projects with existing Full Funding Grant Agreements and other projects included in the President's Budget Request for FY 2007. Since that time, FTA has allocated an additional $118.8 million in available FY 2007 New Starts funds to additional New Start and Small Start projects, including one project in the Public-Private Partnership Pilot Program. Funds have also been provisionally allocated to one Urban Partner. These allocations are included in this Notice for your information. See Table 3.

Tables of projects selected under all three programs follow. Grantees selected for competitive discretionary funding should work with their FTA regional office to finalize the application in FTA's electronic award and management system, TEAM, so that funds can be obligated expeditiously. Funds must be used for the purposes specified in the competitive application. No funding allocated for Urban Partnership Agreements may be drawn down by the Urban Partner except in accordance with terms and conditions set forth in a grant agreement contemplated by the ''term sheet'' executed by Department and the Urban Partner. A discretionary project identification number has been assigned to each project for tracking purposes. Pre-award costs may be incurred as of the date of this notice, unless otherwise restricted by the terms of an Urban Partnership Agreement.

Issued in Washington, DC, this 17th day of August 2007.

James S. Simpson,

Administrator.

BILLING CODE 4910–57–P

Table 1

FY 2007 Discretionary Bus and Bus Facilities Projects

BILLING CODE 4910–57–C

DEPARTMENT OF TRANSPORTATION

Surface Transportation Board

[STB Docket No. AB–341 (Sub-No. 1X)]

Southwestern Railroad Company, Inc.—Abandonment Exemption—in Ellis County, OK, and Lipscomb, Ochiltree, and Hansford Counties, TX

On August 2, 2007, Southwestern Railroad Company, Inc. (SWRR), filed with the Surface Transportation Board a petition under 49 U.S.C. 10502 for exemption from the provisions of 49 U.S.C. 10903 to permit the abandonment of an 85.3-mile rail line extending from milepost 0.10 at Shattuck, OK, to milepost 85.4 at Spearman, TX, in Ellis County, OK, and Lipscomb, Ochiltree and Hansford Counties, TX. The line traverses U.S. Postal Service Zip Codes 73858, 79034, 79024, 79005, 79070, 79033, 79093 and 79081, and includes no stations.

The line does not contain federally granted rights-of-way. Any documentation in SWRR's possession will be made available promptly to those requesting it.

The interest of railroad employees will be protected by the conditions set forth in *Oregon Short Line R. Co.—Abandonment—Goshen,* 360 I.C.C. 91 (1979).

By issuance of this notice, the Board is instituting an exemption proceeding pursuant to 49 U.S.C. 10502(b). A final decision will be issued by November 20, 2007.

Any offer of financial assistance (OFA) under 49 CFR 1152.27(b)(2) will be due no later than 10 days after service of a decision granting the petition for exemption. Each OFA must be accompanied by a $1,300 filing fee. *See* 49 CFR 1002.2(f)(25).

All interested persons should be aware that, following abandonment of rail service and salvage of the line, the line may be suitable for other public use, including interim trail use. Any request for a public use condition under 49 CFR 1152.28 or for trail use/rail banking under 49 CFR 1152.29 will be due no later than September 11, 2007. Each trail use request must be accompanied by a $200 filing fee. *See* 49 CFR 1002.2(f)(27).

All filings in response to this notice must refer to STB Docket No. AB–341 (Sub-No. 1X) and must be sent to: (1) Surface Transportation Board, 395 E. Street, SW., Washington, DC 20423–0001; and (2) Karl Morrell, Ball Janik LLP, 1455 F Street, NW., Suite 225, Washington, DC 20005. Replies to the petition are due on or before September 11, 2007.

Persons seeking further information concerning abandonment procedures may contact the Board's Office of Public Services at (202) 245–0230 or refer to the full abandonment or discontinuance regulations at 49 CFR part 1152. Questions concerning environmental issues may be directed to the Board's Section of Environmental Analysis (SEA) at (202) 245–0305. [Assistance for the hearing impaired is available through the Federal Information Relay Service (FIRS) at 1–800–877–8339.]

An environmental assessment (EA) (or environmental impact statement (EIS), if necessary) prepared by SEA will be served upon all parties of record and upon any agencies or other persons who commented during its preparation. Other interested persons may contact SEA to obtain a copy of the EA (or EIS). EAs in these abandonment proceedings normally will be made available within 60 days of the filing of the petition. The deadline for submission of comments on the EA will generally be within 30 days of its service.

Board decisions and notices are available on our Web site at: *http://www.stb.dot.gov*.

Decided: August 13, 2007.

By the Board, David M. Konschnik, Director, Office of Proceedings.

Vernon A. Williams,

Secretary.

BILLING CODE 4915–01–P

DEPARTMENT OF THE TREASURY

Submission for OMB Review; Comment Request

August 14, 2007.

The Department of the Treasury has submitted the following public information collection requirement(s) to OMB for review and clearance under the Paperwork Reduction Act of 1995, Public Law 104–13. Copies of the submission(s) may be obtained by calling the Treasury Bureau Clearance Officer listed. Comments regarding this information collection should be addressed to the OMB reviewer listed and to the Treasury Department Clearance Officer, Department of the Treasury, Room 11000, 1750 Pennsylvania Avenue, NW., Washington, DC 20220.

Dates: Written comments should be received on or before September 21, 2007 to be assured of consideration.

Internal Revenue Service (IRS)

OMB Number: 1545–0051.

Type of Review: Extension.

Title: Farmers' Cooperative Association Income Tax Return.

Form: 990–C.

Description: Form 990–C is used by farmers' cooperatives to report the tax imposed by Internal Revenue Code section 1381. The IRS uses the information on the form to determine whether the cooperative has correctly computed and reported its income tax liability.

Respondents: Businesses and other for-profits.

Estimated Total Burden Hours: 856,912 hours.

OMB Number: 1545–1141.

Type of Review: Extension.

Title: Notice 89–102, Treatment of Acquisition of Certain Financial Institutions; Tax Consequences of Federal Financial Assistance.

Description: Section 597 of the Internal Revenue Code provides that the Secretary provide guidance concerning the tax consequences of Federal financial assistance received by qualifying institutions. These institutions may defer payment of Federal income tax attributable to the assistance. Required information identifies deferred tax liabilities.

Respondents: Businesses and other for-profits.

Estimated Total Burden Hours: 125 hours.

OMB Number: 1545–1355.

Type of Review: Extension.

Title: REG–208985–89 (formerly INTL–848–89) (NPRM) Taxable Year of Certain Foreign Corporations Beginning After July 10, 1989.

Description: Proposed regulations set forth the ''required year'' for ''specified foreign corporations'' for taxable years beginning after July 10, 1989, and give guidance on which foreign corporations must change their taxable year and how to effect the change in taxable year. Specified foreign corporations must conform to the required year and must state so on Form 5471.

Respondents: Businesses and other for-profits.

Estimated Total Burden Hours: 700 hours.

OMB Number: 1545–1621.

Type of Review: Extension.

Title: W–8BEN, Certificate of Foreign Status of Beneficial Owner for United States Tax Withholding, W–8ECI, Certificate of Foreign Person's Claim for Exemption From Withholding on Income.

Form: W–8BEN, W–8ECI, W–8EXP, W–8IMY.

Description: Form W–8BEN is used for certain types of income to establish that the person is a foreign person, is the

beneficial owner of the income for which Form W–8BEN is being provided and, if applicable, to claim a reduced rate of, or exemption from, withholding as a resident of a foreign country with which the United States has an income tax treaty. Form W–8ECI is used to establish that the person is a foreign person, is the beneficial owner of the income for which Form W–8ECI is being provided, and to claim that the income is effectively connected with the conduct of a trade or business within the United States.

Respondents: Businesses and other for-profits.

Estimated Total Burden Hours: 43,280,135 hours.

OMB Number: 1545–1142.

Type of Review: Extension.

Title: INTL–939–86 (NPRM) Insurance Income of a Controlled Foreign Corporation for Taxable Years Beginning After December 31, 1986.

Description: The information is required to determine the location of moveable property; allocate income and deductions to the proper category of insurance income, determine those amounts for computing taxable income that are derived from an insurance company annual statement, and permit a CFC to elect to treat related person insurance income as income effectively connected with the conduct of a U.S. trade or business. The respondents will be businesses or other for-profit institutions.

Respondents: Businesses and other for-profits.

Estimated Total Burden Hours: 14,100 hours.

OMB Number: 1545–1886.

Type of Review: Extension.

Title: Revenue procedure 2004–35, Late Spousal S Corp Consents in Community Property States.

Description: This revenue procedure requires the collection of certain information in order for the taxpayer to gain relief for late shareholder consents for Subchapter S elections. The information is designed to make sure that applications for relief meet the requirements set out in the revenue procedure.

Respondents: Businesses and other for-profits.

Estimated Total Burden Hours: 500 hours.

OMB Number: 1545–1243.

Type of Review: Revision.

Title: PS–163–84 (Final) Treatment of Transactions between Partners and Partnerships.

Description: Section 707(a)(2) provides that if there is a transfer of money or property by a partner to a partnership, the transfer will be treated, in certain situations, as a disguised sale between the partner and the partnership. The regulations provide that the partner or the partnership should disclose the transfers and certain attendant facts in some situations.

Respondents: Businesses and other for-profits.

Estimated Total Burden Hours: 2,500 hours.

OMB Number: 1545–1051.

Type of Review: Extension.

Title: INTL–29–91 (Final) Computation and Characterization of Income and Earnings and Profits under the Dollar Approximate Separate Transactions Method of Accounting (DASTM).

Description: For taxable years after the final regulations are effective, taxpayers operating in hyperinflationary currencies must use the U.S. dollar as their functional currency and compute income using the dollar approximate separate transactions method (DASTM). Small taxpayers may elect an alternate method by which to compute income or loss. For prior taxable years in which income was computed using the profit and loss method, taxpayers may elect to re-compute their income using DASTM.

Respondents: Businesses or other for-profits.

Estimated Total Burden Hours: 1,000 hours.

OMB Number: 1545–0245.

Type of Review: Extension.

Title: Environmental Taxes.

Form: 6627.

Description: Form 6627 is used to figure the environmental tax on ozone-depleting chemicals (ODCS), imported products that used ODCs as materials in the manufacture or production of the product, and the floor stocks tax ODCs. Sections 4681 and 4682 impose a tax on ODCs and imported products containing ODCs.

Respondents: Businesses and other for-profits.

Estimated Total Burden Hours: 8,006 hours.

Clearance Officer, Glenn P. Kirkland, (202) 622–3428, Internal Revenue Service, Room 6516, 1111 Constitution Avenue, NW., Washington, DC 20224.

OMB Reviewer: Alexander T. Hunt, (202) 395–7316, Office of Management and Budget, Room 10235, New Executive Office Building, Washington, DC 20503.

Robert Dahl,

Treasury PRA Clearance Officer.

BILLING CODE 4830–01–M

DEPARTMENT OF VETERANS AFFAIRS

[OMB Control No. 2900–New (EVHAMHS)]

Proposed Information Collection Activity: Proposed Collection; Comment Request

AGENCY: Office of Policy, Planning and Preparedness, Department of Veterans Affairs.

ACTION: Notice.

SUMMARY: The Office of Policy, Planning and Preparedness (OPP&P), Department of Veterans Affairs (VA), is announcing an opportunity for public comment on the proposed collection of certain information by the agency. Under the Paperwork Reduction Act (PRA) of 1995, Federal agencies are required to publish notice in the **Federal Register** concerning each proposed collection of information, including each proposed new collection of information, and allow 60 days for public comment in response to the notice. This notice solicits comments on information needed by the VA to assess the achievement of Veterans Health Administration program outcomes in the area of mental health services.

DATES: Written comments and recommendations on the proposed collection of information should be received on or before October 22, 2007.

ADDRESSES: Submit written comments on the collection of information through *http://www.Regulations.gov;* or to Barbara Stephens, Office of Policy and Planning, Department of Veterans Affairs, 810 Vermont Ave., NW., Washington, DC 20420 or e-mail *barbara.stephens@va.gov.* Please refer to ''OMB Control No. 2900–NEW (EVHAMHS)'' in any correspondence. During the comment period, comments may be viewed online through the Federal Docket Management System (FDMS) at *http://www.Regulations.gov.*

FOR FURTHER INFORMATION CONTACT: Barbara Stephens at (202) 461–5776 or FAX (202) 273–5993.

SUPPLEMENTARY INFORMATION: Under the PRA of 1995 (Pub. L. 104–13; 44 U.S.C. 3501—3521), Federal agencies must obtain approval from the Office of Management and Budget (OMB) for each collection of information they conduct or sponsor. This request for comment is being made pursuant to section 3506(c)(2)(A) of the PRA.

With respect to the following collection of information, the Office of Policy, Planning and Preparedness invites comments on: (1) Whether the proposed collection of information is necessary for the proper performance of

VA's functions, including whether the information will have practical utility; (2) the accuracy of VA's estimate of the burden of the proposed collection of information; (3) ways to enhance the quality, utility, and clarity of the information to be collected; and (4) ways to minimize the burden of the collection of information on respondents, including through the use of automated collection techniques or the use of other forms of information technology.

Title: Evaluation of Veterans Health Administration Mental Health Services.

OMB Control Number: 2900–New (EVHAMHS).

Type of Review: New collection.

Abstract: VA will use the data collected to assess the achievement of Veterans Health Administration program outcomes in the area of mental health services for schizophrenia, bipolar disorder, post-traumatic stress disorder, major depression, and substance use disorders, as well as the implementation and impact of the Mental Health Strategic Plan. The data will assist the VA in determining the type, level, and quality of care provided, and the degree of satisfaction for the five mental health diagnoses across the continuum of care, and, when performance falls short, to develop recommendations for improvements.

Affected Public: Individuals or households.

Estimated Total Annual Burden: 4,109 hours.

Estimated Average Burden Per Respondent: 30 minutes.

Frequency of Response: One-time.

Estimated Number of Respondents: 8,218.

Dated: August 7, 2007.

By direction of the Secretary.

Denise McLamb,

Program Analyst, Records Management Service.

DEPARTMENT OF VETERANS AFFAIRS

[OMB Control No. 2900–0095]

Proposed Information Collection Activity: Proposed Collection; Comment Request

AGENCY: Veterans Benefits Administration, Department of Veterans Affairs.

ACTION: Notice.

SUMMARY: The Veterans Benefits Administration (VBA), Department of Veterans Affairs (VA), is announcing an opportunity for public comment on the proposed collection of certain information by the agency. Under the Paperwork Reduction Act (PRA) of 1995, Federal agencies are required to publish notice in the **Federal Register** concerning each proposed collection of information, including each proposed extension of a currently approved collection and allow 60 days for public comment in response to the notice. This notice solicits comments on information needed to determine net income derived from farming.

DATES: Written comments and recommendations on the proposed collection of information should be received on or before October 22, 2007.

ADDRESSES: Submit written comments on the collection of information through *www.Regulations.gov* or to Nancy J. Kessinger, Veterans Benefits Administration (20M35), Department of Veterans Affairs, 810 Vermont Avenue, NW., Washington, DC 20420 or e-mail to *nancy.kessinger@va.gov.* Please refer to ''OMB Control No. 2900–0095'' in any correspondence. During the comment period, comments may be viewed online through the Federal Docket Management System (FDMS) at *www.Regulations.gov.*

FOR FURTHER INFORMATION CONTACT: Nancy J. Kessinger at (202) 461–9769 or FAX (202) 275–5947.

SUPPLEMENTARY INFORMATION: Under the PRA of 1995 (Pub. L. 104–13; 44 U.S.C. 3501–3521), Federal agencies must obtain approval from the Office of Management and Budget (OMB) for each collection of information they conduct or sponsor. This request for comment is being made pursuant to Section 3506(c)(2)(A) of the PRA.

With respect to the following collection of information, VBA invites comments on: (1) Whether the proposed collection of information is necessary for the proper performance of VBA's functions, including whether the information will have practical utility; (2) the accuracy of VBA's estimate of the burden of the proposed collection of information; (3) ways to enhance the quality, utility, and clarity of the information to be collected; and (4) ways to minimize the burden of the collection of information on respondents, including through the use of automated collection techniques or the use of other forms of information technology.

Title: Pension Claim Questionnaire for Farm Income, VA Form 21–4165.

OMB Control Number: 2900–0095.

Type of Review: Extension of a currently approved collection.

Abstract: VA Form 21–4165 is used to gather information necessary to determine a claimant's countable annual income and available assets due to farm operations. Farm income is not necessarily received on a weekly or monthly basis, and farm operating expenses must be considered in determining a claimant's eligibility to income-based benefits.

Affected Public: Individuals or households, and Farms.

Estimated Annual Burden: 1,038 hours.

Estimated Average Burden Per Respondent: 30 minutes.

Frequency of Response: Annually.

Estimated Number of Respondents: 2,075.

Dated: July 24, 2007.

[CMS–1533–FC]

RIN 0938–AO70

Medicare Program; Changes to the Hospital Inpatient Prospective Payment Systems and Fiscal Year 2008 Rates

AGENCY: Centers for Medicare and Medicaid Services (CMS), HHS.

ACTION: Final rule with comment period.

SUMMARY: We are revising the Medicare hospital inpatient prospective payment systems (IPPS) for operating and capital-related costs to implement changes arising from our continuing experience with these systems, and to implement certain provisions made by the Deficit Reduction Act of 2005 (Pub. L. 109–171), the Medicare Improvements and Extension Act under Division B, Title I of the Tax Relief and Health Care Act of 2006 (Pub. L. 109–432), and the Pandemic and All Hazards Preparedness Act (Pub. L. 109–417). In addition, in the Addendum to this final rule with comment period, we describe the changes to the amounts and factors used to determine the rates for Medicare hospital inpatient services for operating costs and capital-related costs. We also are setting forth the rate of increase limits for certain hospitals and hospital units excluded from the IPPS that are paid on a reasonable cost basis subject to these limits, or that have a portion of a prospective payment system payment based on reasonable cost principles. These changes are applicable to discharges occurring on or after October 1, 2007.

In this final rule with comment period, as part of our efforts to further refine the diagnosis related group (DRG) system under the IPPS to better recognize severity of illness among patients, for FY 2008, we are adopting a Medicare Severity DRG (MS DRG) classification system for the IPPS. We are also adopting the structure of the MS–DRG system for the LTCH prospective payment system (referred to as MS–LTC–DRGs) for FY 2008.

Among the other policy decisions and changes that we are making, we are making changes related to: limited revisions of the reclassification of cases to MS–DRGs, the relative weights for the MS–LTC–DRGs; applications for new technologies and medical services add-on payments; the wage data, including the occupational mix data, used to compute the FY 2008 wage indices; payments to hospitals for the indirect costs of graduate medical education; submission of hospital quality data; provisions governing the application of sanctions relating to the Emergency Medical Treatment and Labor Act of 1986 (EMTALA); provisions governing the disclosure of physician ownership in hospitals and patient safety measures; and provisions relating to services furnished to beneficiaries in custody of penal authorities.

DATES: *Effective Date:* This final rule with comment period is effective October 1, 2007 and applies to discharges occurring on or after that date.

Comment Date: We will consider public comments only on the provisions of section V., Changes to the IPPS for Capital Related Costs, of the preamble of this final rule with comment period, if we receive them at one of the addresses provided below, no later than 5 p.m. on November 20, 2007.

ADDRESSES: In commenting on the provisions of section V. of the preamble of this final rule with comment period, please refer to file code CMS–1533–FC.

Because of staff and resource limitations, we cannot accept comments by facsimile (FAX) transmission.

You may submit comments in one of three ways (no duplicates, please):

1. *Electronically.* You may submit electronic comments on specific issues in this regulation to *http://www.cms.hhs.gov/eRulemaking.* Click on the link ''Submit electronic comments on CMS regulations with an open comment period''. (Attachments should be in Microsoft Word, WordPerfect, or Excel; however, we prefer Microsoft Word.)

2. *By regular mail.* You may mail written comments (one original and two copies) to the following address ONLY: Centers for Medicare & Medicaid Services, Department of Health and Human Services, Attention: CMS–1533–FC, P.O. Box 8011, Baltimore, MD 21244–1850.

Please allow sufficient time for mailed comments to be received before the close of the comment period.

3. *By express or overnight mail.* You may send written comments (one original and two copies) to the following address ONLY: Centers for Medicare & Medicaid Services, Department of Health and Human Services, Attention: CMS–1533–FC, Mail Stop C4–26–05, 7500 Security Boulevard, Baltimore, MD 21244–1850.

4. *By hand or courier.* If you prefer, you may deliver (by hand or courier) your written comments (one original and two copies) before the close of the comment period to one of the following addresses. If you intend to deliver your comments to the Baltimore address, please call telephone number (410) 786–7195 in advance to schedule your arrival with one of our staff members. Room 445–G, Hubert H. Humphrey Building, 200 Independence Avenue, SW., Washington, DC 20201, or 7500 Security Boulevard, Baltimore, MD 21244–1850.

(Because access to the interior of the Hubert H. Humphrey Building is not readily available to persons without Federal Government identification, commenters are encouraged to leave their comments in the CMS drop slots located in the main lobby of the building. A stamp-in clock is available for persons wishing to retain proof of filing by stamping in and retaining an extra copy of the comments being filed.)

Comments mailed to the addresses indicated as appropriately for hand or courier delivery may be delayed and received after the comment period.

Submitting Comments: You can assist us by referencing the file code CMS–1533–FC and the specific ''issue identifier'' that precedes section V., Changes to the IPPS for Capital Related Costs.

Inspection of Public Comments: All comments received before the close of the comment period are available for viewing by the public, including any personally identifiable or confidential business information that is included in a comment. We post all comments received before the close of the comment period on the following Web site as soon as possible after they have been received: *http://www.cms.hhs.gov/eRulemaking.* Click on the link ''Electronic Comments on CMS Regulations'' on that Web site to view public comments.

Comments received timely will also be available for public inspection, generally beginning approximately 3 weeks after publication of a document, at the headquarters of the Centers for Medicare & Medicaid Services, 7500 Security Boulevard, Baltimore, Maryland 21244, Monday through Friday of each week from 8:30 a.m. to 4:00 p.m. To schedule an appointment to view public comments, phone 1–800–743–3951.

FOR FURTHER INFORMATION CONTACT: Marc Hartstein, (410) 786–4548, Operating Prospective Payment, Diagnosis Related Groups (DRGs), Wage Index, New Medical Services and Technology Add-On Payments, and Hospital Geographic Reclassifications Issues.

Tzvi Hefter, (410) 786–4487, Capital Prospective Payment, Excluded Hospitals, Graduate Medical Education, Critical Access Hospitals, and Long-Term Care (LTC)-DRG Issues.

Siddhartha Mazumdar, (410) 786–6673, Rural Community Hospital Demonstration Issues.

Regulation Text

Addendum—Schedule of Standardized Amounts, Update Factors, and Rate-of-Increase Percentages Effective With Cost Reporting Periods Beginning On or After October 1, 2007

I. Background

A. Summary

1. Acute Care Hospital Inpatient Prospective Payment System (IPPS)

Section 1886(d) of the Social Security Act (the Act) sets forth a system of payment for the operating costs of acute care hospital inpatient stays under Medicare Part A (Hospital Insurance) based on prospectively set rates. Section 1886(g) of the Act requires the Secretary to pay for the capital-related costs of hospital inpatient stays under a prospective payment system (PPS). Under these PPSs, Medicare payment for hospital inpatient operating and capital-related costs is made at predetermined, specific rates for each hospital discharge. Discharges are classified according to a list of diagnosis-related groups (DRGs).

The base payment rate is comprised of a standardized amount that is divided into a labor-related share and a nonlabor-related share. The labor-related share is adjusted by the wage index applicable to the area where the hospital is located; and if the hospital is located in Alaska or Hawaii, the nonlabor-related share is adjusted by a cost-of-living adjustment factor. This base payment rate is multiplied by the DRG relative weight.

If the hospital treats a high percentage of low-income patients, it receives a percentage add-on payment applied to the DRG-adjusted base payment rate. This add-on payment, known as the disproportionate share hospital (DSH) adjustment, provides for a percentage increase in Medicare payments to hospitals that qualify under either of two statutory formulas designed to identify hospitals that serve a disproportionate share of low-income patients. For qualifying hospitals, the amount of this adjustment may vary based on the outcome of the statutory calculations.

If the hospital is an approved teaching hospital, it receives a percentage add-on payment for each case paid under the IPPS, known as the indirect medical education (IME) adjustment. This percentage varies, depending on the ratio of residents to beds.

Additional payments may be made for cases that involve new technologies or medical services that have been approved for special add-on payments. To qualify, a new technology or medical service must demonstrate that it is a substantial clinical improvement over technologies or services otherwise available, and that, absent an add-on payment, it would be inadequately paid under the regular DRG payment.

The costs incurred by the hospital for a case are evaluated to determine whether the hospital is eligible for an additional payment as an outlier case. This additional payment is designed to protect the hospital from large financial losses due to unusually expensive cases. Any outlier payment due is added to the DRG-adjusted base payment rate, plus any DSH, IME, and new technology or medical service add-on adjustments.

Although payments to most hospitals under the IPPS are made on the basis of the standardized amounts, some categories of hospitals are paid the higher of a hospital-specific rate based on their costs in a base year (the higher of FY 1982, FY 1987, FY 1996, or FY 2002) or the IPPS rate based on the standardized amount. For example, sole community hospitals (SCHs) are the sole source of care in their areas, and Medicare-dependent, small rural hospitals (MDHs) are a major source of care for Medicare beneficiaries in their areas. Both of these categories of hospitals are afforded this special payment protection in order to maintain access to services for beneficiaries. (Until FY 2007, an MDH has received the IPPS rate plus 50 percent of the difference between the IPPS rate and its hospital-specific rate if the hospital-specific rate is higher than the IPPS rate. In addition, an MDH does not have the option of using FY 1996 as the base year for its hospital-specific rate. As discussed below, for discharges occurring on or after October 1, 2007, but before October 1, 2011, an MDH will receive the IPPS rate plus 75 percent of the difference between the IPPS rate and its hospital-specific rate, if the hospital-specific rate is higher than the IPPS rate.)

Section 1886(g) of the Act requires the Secretary to pay for the capital-related costs of inpatient hospital services ''in accordance with a prospective payment system established by the Secretary.'' The basic methodology for determining capital prospective payments is set forth in our regulations at 42 CFR 412.308 and 412.312. Under the capital IPPS, payments are adjusted by the same DRG for the case as they are under the operating IPPS. Capital IPPS payments are also adjusted for IME and DSH, similar to the adjustments made under the operating IPPS. In addition, hospitals may receive outlier payments for those cases that have unusually high costs.

The existing regulations governing payments to hospitals under the IPPS are located in 42 CFR Part 412, Subparts A through M.

2. Hospitals and Hospital Units Excluded from the IPPS

Under section 1886(d)(1)(B) of the Act, as amended, certain specialty hospitals and hospital units are excluded from the IPPS. These hospitals and units are: rehabilitation hospitals and units; long-term care hospitals (LTCHs); psychiatric hospitals and units; children's hospitals; and cancer hospitals. Religious nonmedical health care institutions (RNHCIs) are also excluded from the IPPS. Various sections of the Balanced Budget Act of 1997 (Pub. L. 105–33), the Medicare, Medicaid and SCHIP [State Children's Health Insurance Program] Balanced Budget Refinement Act of 1999 (Pub. L. 106–113), and the Medicare, Medicaid, and SCHIP Benefits Improvement and Protection Act of 2000 (Pub. L. 106–554) provide for the implementation of PPSs for rehabilitation hospitals and units (referred to as inpatient rehabilitation facilities (IRFs)), LTCHs, and psychiatric hospitals and units (referred to as inpatient psychiatric facilities (IPFs)), as discussed below. Children's hospitals, cancer hospitals, and RNHCIs continue to be paid solely under a reasonable cost-based system.

The existing regulations governing payments to excluded hospitals and hospital units are located in 42 CFR Parts 412 and 413.

a. Inpatient Rehabilitation Facilities (IRFs)

Under section 1886(j) of the Act, as amended, rehabilitation hospitals and units (IRFs) have been transitioned from payment based on a blend of reasonable cost reimbursement subject to a hospital-specific annual limit under section 1886(b) of the Act and the adjusted facility Federal prospective payment rate for cost reporting periods beginning on or after January 1, 2002 through September 30, 2002, to payment at 100 percent of the Federal rate effective for cost reporting periods beginning on or after October 1, 2002. IRFs subject to the blend were also permitted to elect payment based on 100 percent of the Federal rate. The existing regulations governing payments under the IRF PPS are located in 42 CFR Part 412, Subpart P.

b. Long-Term Care Hospitals (LTCHs)

Under the authority of sections 123(a) and (c) of Pub. L. 106–113 and section 307(b)(1) of Pub. L. 106–554, the LTCH PPS was effective for a LTCH's first cost reporting period beginning on or after October 1, 2002. LTCHs that do not meet the definition of ''new'' under § 412.23(e)(4) are paid, during a 5-year

transition period, a LTCH prospective payment that is comprised of an increasing proportion of the LTCH Federal rate and a decreasing proportion based on reasonable cost principles. Those LTCHs that did not meet the definition of ''new'' under § 412.23(e)(4) could elect to be paid based on 100 percent of the Federal prospective payment rate instead of a blended payment in any year during the 5-year transition. For cost reporting periods beginning on or after October 1, 2006, all LTCHs are paid 100 percent of the Federal rate. The existing regulations governing payment under the LTCH PPS are located in 42 CFR Part 412, Subpart O.

c. Inpatient Psychiatric Facilities (IPFs)

Under the authority of sections 124(a) and (c) of Pub. L. 106–113, inpatient psychiatric facilities (IPFs) (formerly psychiatric hospitals and psychiatric units of acute care hospitals) are paid under the IPF PPS. Under the IPF PPS, some IPFs are transitioning from being paid for inpatient hospital services based on a blend of reasonable cost-based payment and a Federal per diem payment rate, effective for cost reporting periods beginning on or after January 1, 2005. For cost reporting periods beginning on or after January 1, 2008, all IPFs will be paid 100 percent of the Federal per diem payment amount. The existing regulations governing payment under the IPF PPS are located in 42 CFR 412, Subpart N.

3. Critical Access Hospitals (CAHs)

Under sections 1814, 1820, and 1834(g) of the Act, payments are made to critical access hospitals (CAHs) (that is, rural hospitals or facilities that meet certain statutory requirements) for inpatient and outpatient services based on 101 percent of reasonable cost. Reasonable cost is determined under the provisions of section 1861(v)(1)(A) of the Act and existing regulations under 42 CFR Parts 413 and 415.

4. Payments for Graduate Medical Education (GME)

Under section 1886(a)(4) of the Act, costs of approved educational activities are excluded from the operating costs of inpatient hospital services. Hospitals with approved graduate medical education (GME) programs are paid for the direct costs of GME in accordance with section 1886(h) of the Act; the amount of payment for direct GME costs for a cost reporting period is based on the hospital's number of residents in that period and the hospital's costs per resident in a base year. The existing regulations governing payments to the various types of hospitals are located in 42 CFR Part 413.

B. Provisions of the Deficit Reduction Act of 2005 (DRA)

The Deficit Reduction Act of 2005 (DRA), Pub. L. 109–171, made a number of changes to the Act relating to prospective payments to hospitals and other providers for inpatient services. The final rule implements amendments made by (1) section 5001(a), which, effective for FY 2007 and subsequent years, expands the requirements for hospital quality data reporting; and (2) section 5001(c), which requires the Secretary to select, by October 1, 2007, at least two hospital-acquired conditions that meet certain specified criteria that will be subject to a quality adjustment in DRG payments during FY 2008.

In this final rule with comment period, we also discuss our development of a plan to implement, beginning with FY 2009, a value-based purchasing plan for section 1886(d) hospitals, in accordance with the requirements of section 5001(b) of Pub. L. 109–171.

C. Provisions of the Medicare Improvements and Extension Act under Division B, Title I of the Tax Relief and Health Care Act of 2006

In this final rule with comment period, we discuss the provisions of section 106(b)(1) of the Medicare Improvements and Extensions Act under Division B, Title I of the Tax Relief and Health Care Act of 2006 (MIEA–TRHCA), Pub. L. 109–432, which requires MedPAC to submit to Congress, not later than June 30, 2007, a report on the Medicare wage index classification system applied under the Medicare Prospective Payment System. Section 106(b) of the MIEA–TRHCA requires the report to include any alternatives that MedPAC recommends to the method to compute the wage index under section 1886(d)(3)(E) of the Act.

In addition, we discuss the provisions of section 106(b)(2) of the MIEA–TRHCA, which instructs the Secretary of Health and Human Services, taking into account MedPAC's recommendations on the Medicare wage index classification system, to include in the FY 2009 IPPS proposed rule one or more proposals to revise the wage index adjustment applied under section 1886(d)(3)(E) of the Act for purposes of the IPPS.

We note that we published a notice in the **Federal Register** on March 23, 2007 (72 FR 13799) that addressed the provisions of section 106(a) of the MIEA–TRHCA relating to the extension of geographic reclassifications of hospitals under section 508 of Pub. L. 108–173 (that expired on March 31, 2007) through September 30, 2007.

D. Provisions of the Pandemic and All-Hazards Preparedness Act

On December 19, 2006, Congress enacted the Pandemic and All-Hazards Preparedness Act, Pub. L. 109–417. Section 302(b) of Pub. L. 109–417 makes two specific changes that affect EMTALA implementation in emergency areas during an emergency period. Specifically section 302(b)(1)(A) of Pub. L. 109–417 amended section 1135(b)(3)(B) of the Act to state that sanctions may be waived for the direction or relocation of an individual for screening where, in the case of a public health emergency that involves a pandemic infectious disease, that direction or relocation occurs pursuant to a State pandemic preparedness plan. In addition, sections 302(b)(1)(B) and (b)(1)(C) of Pub. L. 109–417 amended section 1135(b)(3)(B) of the Act to state that, if a public health emergency involves a pandemic infectious disease (such as pandemic influenza) the duration of a waiver or modification under section 1135(b)(3) of the Act (relating to EMTALA) shall be determined in accordance with section 1135(e) of the Act as that subsection applies to public health emergencies.

In this final rule with comment period, we are making changes to the EMTALA regulations to conform them to the sanction waiver provisions of section 302(b) of Pub. L. 109–417.

E. Issuance of a Notice of Proposed Rulemaking

On May 3, 2007, we issued in the **Federal Register** (72 FR 24680) a notice of proposed rulemaking that set forth proposed changes to the Medicare IPPS for operating costs and for capital-related costs in FY 2008. We also set forth proposed changes relating to payments for GME and IME costs and payments to certain hospitals and units that continue to be excluded from the IPPS and paid on a reasonable cost basis that would be effective for discharges occurring on or after October 1, 2007. Below is a summary of the major changes that we proposed to make:

1. DRG Reclassifications and Recalibrations of Relative Weights

We proposed to adopt a Medicare Severity DRG (MS–DRG) classification system for the IPPS to better recognize severity of illness. We presented the methodology we used to establish the MS–DRGs and discussed our efforts to

further analyze alternative severity-adjusted DRG systems and to refine the relative weight calculations for DRGs.

We presented a proposed listing and discussion of hospital-acquired conditions, including infections, which were evaluated and proposed to be subject to the statutorily required quality adjustment in DRG payments for FY 2008.

We proposed limited annual revisions to the DRG classification system in the following areas: Intestinal transplants, neurostimulators, intracranial stents, cochlear implants, knee and hip replacements, spinal fusions and spinal disc devices, and endoscopic procedures.

We presented our reevaluation of certain FY 2007 applicants for add-on payments for high-cost new medical services and technologies, and our analysis of the FY 2008 applicant (including public input, as directed by Pub. L. 108–173, obtained in a town hall meeting).

We proposed the annual update of the long-term care diagnosis-related group (LTC–DRG) classifications and relative weights for use under the LTCH PPS for FY 2008. We proposed that the LTC–DRGs would be revised to mirror the proposed MS–DRGs for the IPPS.

2. Proposed Changes to the Hospital Wage Index

In section III. of the preamble to the proposed rule, we proposed revisions to the wage index and the annual update of the wage data. Specific issues addressed included the following:

- The FY 2008 wage index update, using wage data from cost reporting periods that began during FY 2004.
- Analysis and implementation of the proposed FY 2008 occupational mix adjustment to the wage index.
- Proposed changes relating to expiration of the imputed rural floor for the wage index and application of budget neutrality for the rural floor.
- Proposed changes in the determination of the wage index for multicampus hospitals.
- The proposed revisions to the wage index based on hospital redesignations and reclassifications, including reclassifications for multicampus hospitals.
- The proposed adjustment to the wage index for FY 2008 based on commuting patterns of hospital employees who reside in a county and work in a different area with a higher wage index.
- The timetable for reviewing and verifying the wage data that were in effect for the FY 2008 wage index.
- The labor-related share for the FY 2008 wage index, including the labor-related share for Puerto Rico.

3. Other Decisions and Proposed Changes to the IPPS for Operating Costs and GME Costs

In section IV. of the preamble to the proposed rule, we discussed a number of the provisions of the regulations in 42 CFR Parts 412, 413, and 489, including the following:

- The reporting of hospital quality data as a condition for receiving the full annual payment update increase.
- Development of the Medicare value-based purchasing plan and reports on the ''listening sessions'' held.
- The proposed updated national and regional case-mix values and discharges for purposes of determining RRC status and a proposed policy change relating to the acquired rural status of RRCs.
- The statutorily-required IME adjustment factor for FY 2008 and a proposed policy change relating to determining counts of residents on vacation or sick leave and in orientation for IME and direct GME purposes.
- Proposed changes relating to the waiver of sanctions for requirements for emergency services for hospitals under EMTALA during national emergencies.
- Proposed policy changes relating to the disclosure to patients of physician ownership of hospitals and patient safety measures.
- Discussion of the fourth year of implementation of the Rural Community Hospital Demonstration Program.

4. Proposed Changes to the IPPS for Capital-Related Costs

In section V. of the preamble to the proposed rule, we discussed the payment policy requirements for capital-related costs and capital payments to hospitals and proposed changes relating to adjustments to the Federal capital rate to address continuous large positive margins.

5. Proposed Changes to the Payment Rates for Excluded Hospitals and Hospital Units: Rate-of-Increase Percentages

In section VI. of the preamble to the proposed rule, we discussed payments to excluded hospitals and hospital units, and proposed changes for determining LTCH CCRs under the LTCH PPS.

6. Services Furnished to Beneficiaries in Custody of Penal Authorities

In section VII. of the preamble to the proposed rule, we clarified when individuals are considered to be in ''custody'' for purposes of Medicare payment for services furnished to beneficiaries who are under penal authorities.

7. Determining Proposed Prospective Payment Operating and Capital Rates and Rate-of-Increase Limits

In the Addendum to the proposed rule, we set forth proposed changes to the amounts and factors for determining the FY 2008 prospective payment rates for operating costs and capital-related costs. We also established the proposed threshold amounts for outlier cases. In addition, we addressed the proposed update factors for determining the rate-of-increase limits for cost reporting periods beginning in FY 2008 for hospitals and hospital units excluded from the PPS.

8. Impact Analysis

In Appendix A of the proposed rule, we set forth an analysis of the impact that the proposed changes would have on affected hospitals.

9. Recommendation of Update Factors for Operating Cost Rates of Payment for Inpatient Hospital Services

In Appendix B of the proposed rule, as required by sections 1886(e)(4) and (e)(5) of the Act, we provided our recommendations of the appropriate percentage changes for FY 2008 for the following:

- A single average standardized amount for all areas for hospital inpatient services paid under the IPPS for operating costs (and hospital-specific rates applicable to SCHs and MDHs).
- Target rate-of-increase limits to the allowable operating costs of hospital inpatient services furnished by hospitals and hospital units excluded from the IPPS.

10. Discussion of Medicare Payment Advisory Commission Recommendations

Under section 1805(b) of the Act, MedPAC is required to submit a report to Congress, no later than March 1 of each year, in which MedPAC reviews and makes recommendations on Medicare payment policies. MedPAC's March 2007 recommendations concerning hospital inpatient payment policies addressed the update factor for inpatient hospital operating costs and capital-related costs under the IPPS and for hospitals and distinct part hospital units excluded from the IPPS. We addressed these recommendations in Appendix B of the proposed rule. For further information relating specifically to the MedPAC March 2007 reports or to obtain a copy of the reports, contact

MedPAC at (202) 220–3700 or visit MedPAC's Web site at: *www.medpac.gov.*

F. Public Comments Received on the Proposed Rule

We received approximately 900 timely pieces of correspondence in response to the FY 2008 IPPS proposed rule issued in the **Federal Register** on May 3, 2007. These public comments addressed issues on multiple topics in the proposed rule. We present a summary of the public comments and our responses to them in the applicable subject matter sections of this final rule with comment period.

II. Changes to DRG Classifications and Relative Weights

A. Background

Section 1886(d) of the Act specifies that the Secretary shall establish a classification system (referred to as DRGs) for inpatient discharges and adjust payments under the IPPS based on appropriate weighting factors assigned to each DRG. Therefore, under the IPPS, we pay for inpatient hospital services on a rate per discharge basis that varies according to the DRG to which a beneficiary's stay is assigned. The formula used to calculate payment for a specific case multiplies an individual hospital's payment rate per case by the weight of the DRG to which the case is assigned. Each DRG weight represents the average resources required to care for cases in that particular DRG, relative to the average resources used to treat cases in all DRGs.

Congress recognized that it would be necessary to recalculate the DRG relative weights periodically to account for changes in resource consumption. Accordingly, section 1886(d)(4)(C) of the Act requires that the Secretary adjust the DRG classifications and relative weights at least annually. These adjustments are made to reflect changes in treatment patterns, technology, and any other factors that may change the relative use of hospital resources.

B. DRG Reclassifications

1. General

As discussed in the preamble to the FY 2007 IPPS final rule (71 FR 47881 through 47971), we are focusing our efforts in FY 2008 on making significant reforms to the IPPS consistent with the recommendations made by MedPAC in its ''Report to the Congress, Physician-Owned Specialty Hospitals'' in March 2005. MedPAC recommended that the Secretary refine the entire DRG system by taking into account severity of illness and applying hospital-specific relative value (HSRV) weights to DRGs.[1] We began this reform process by adopting cost-based weights over a 3-year transition period beginning in FY 2007 and making interim changes to the DRG system for FY 2007 by creating 20 new CMS DRGs and modifying 32 others across 13 different clinical areas involving nearly 1.7 million cases. As described below in more detail, these refinements were intermediate steps towards comprehensive reform of both the relative weights and the DRG system that is occurring as we undertook further study.

Currently, cases are classified into CMS DRGs for payment under the IPPS based on the principal diagnosis, up to eight additional diagnoses, and up to six procedures performed during the stay. In a small number of DRGs, classification is also based on the age, sex, and discharge status of the patient. The diagnosis and procedure information is reported by the hospital using codes from the International Classification of Diseases, Ninth Revision, Clinical Modification (ICD–9–CM).

The process of forming the DRGs was begun by dividing all possible principal diagnoses into mutually exclusive principal diagnosis areas, referred to as Major Diagnostic Categories (MDCs). The MDCs were formed by physician panels to ensure that the DRGs would be clinically coherent. The diagnoses in each MDC correspond to a single organ system or etiology and, in general, are associated with a particular medical specialty. Thus, in order to maintain the requirement of clinical coherence, no final DRG could contain patients in different MDCs. Most MDCs are based on a particular organ system of the body. For example, MDC 6 is Diseases and Disorders of the Digestive System. This approach is used because clinical care is generally organized in accordance with the organ system affected. However, some MDCs are not constructed on this basis because they involve multiple organ systems (for example, MDC 22 (Burns)). For FY 2007, cases are assigned to one of 538 DRGs in 25 MDCs. The table below lists the 25 MDCs.

MAJOR DIAGNOSTIC CATEGORIES

[MDCs]

1	Diseases and Disorders of the Nervous System.
2	Diseases and Disorders of the Eye.
3	Diseases and Disorders of the Ear, Nose, Mouth, and Throat.
4	Diseases and Disorders of the Respiratory System.
5	Diseases and Disorders of the Circulatory System.
6	Diseases and Disorders of the Digestive System.
7	Diseases and Disorders of the Hepatobiliary System and Pancreas.
8	Diseases and Disorders of the Musculoskeletal System and Connective Tissue.
9	Diseases and Disorders of the Skin, Subcutaneous Tissue and Breast.
10	Endocrine, Nutritional and Metabolic Diseases and Disorders.
11	Diseases and Disorders of the Kidney and Urinary Tract.
12	Diseases and Disorders of the Male Reproductive System.
13	Diseases and Disorders of the Female Reproductive System.
14	Pregnancy, Childbirth, and the Puerperium.
15	Newborns and Other Neonates with Conditions Originating in the Perinatal Period.
16	Diseases and Disorders of the Blood and Blood Forming Organs and Immunological Disorders.
17	Myeloproliferative Diseases and Disorders and Poorly Differentiated Neoplasms.
18	Infectious and Parasitic Diseases (Systemic or Unspecified Sites).
19	Mental Diseases and Disorders.
20	Alcohol/Drug Use and Alcohol/Drug Induced Organic Mental Disorders.

[1] Medicare Payment Advisory Commission: *Report to the Congress, Physician-Owned Specialty Hospitals*, March 2005, page viii.

MAJOR DIAGNOSTIC CATEGORIES—Continued
[MDCs]

21	Injuries, Poisonings, and Toxic Effects of Drugs.
22	Burns.
23	Factors Influencing Health Status and Other Contacts with Health Services.
24	Multiple Significant Trauma.
25	Human Immunodeficiency Virus Infections.

In general, cases are assigned to an MDC based on the patient's principal diagnosis before assignment to a DRG. However, under the most recent version of the CMS GROUPER (Version 24.0), there are 9 DRGs to which cases are directly assigned on the basis of ICD–9–CM procedure codes. These DRGs are for heart transplant or implant of heart assist systems, liver and/or intestinal transplants, bone marrow transplants, lung transplants, simultaneous pancreas/kidney transplants, pancreas transplants, and for tracheostomies. Cases are assigned to these DRGs before they are classified to an MDC. The table below lists the nine current pre-MDCs.

PRE-MAJOR DIAGNOSTIC CATEGORIES
[Pre-MDCs]

DRG 103	Heart Transplant or Implant of Heart Assist System.
DRG 480	Liver Transplant and/or Intestinal Transplant.
DRG 481	Bone Marrow Transplant.
DRG 482	Tracheostomy for Face, Mouth, and Neck Diagnoses.
DRG 495	Lung Transplant.
DRG 512	Simultaneous Pancreas/Kidney Transplant.
DRG 513	Pancreas Transplant.
DRG 541	ECMO or Tracheostomy with Mechanical Ventilation 96+ Hours or Principal Diagnosis Except for Face, Mouth, and Neck Diagnosis with Major O.R.
DRG 542	Tracheostomy with Mechanical Ventilation 96+ Hours or Principal Diagnosis Except for Face, Mouth, and Neck Diagnosis without Major O.R.

Once the MDCs were defined, each MDC was evaluated to identify those additional patient characteristics that would have a consistent effect on the consumption of hospital resources. Because the presence of a surgical procedure that required the use of the operating room would have a significant effect on the type of hospital resources used by a patient, most MDCs were initially divided into surgical DRGs and medical DRGs. Surgical DRGs are based on a hierarchy that orders operating room (O.R.) procedures or groups of O.R. procedures by resource intensity. Medical DRGs generally are differentiated on the basis of diagnosis and age (0 to 17 years of age or greater than 17 years of age). Some surgical and medical DRGs are further differentiated based on the presence or absence of a complication or comorbidity (CC).

Generally, nonsurgical procedures and minor surgical procedures that are not usually performed in an operating room are not treated as O.R. procedures. However, there are a few non-O.R. procedures that do affect DRG assignment for certain principal diagnoses. An example is extracorporeal shock wave lithotripsy for patients with a principal diagnosis of urinary stones.

Once the medical and surgical classes for an MDC were formed, each diagnosis class was evaluated to determine if complications, comorbidities, or the patient's age would consistently affect the consumption of hospital resources. Physician panels classified each diagnosis code based on whether the diagnosis, when present as a secondary condition, would be considered a substantial CC. A substantial CC was defined as a condition which, because of its presence with a specific principal diagnosis, would cause an increase in the length of stay by at least one day in at least 75 percent of the patients. Each medical and surgical class within an MDC was tested to determine if the presence of any substantial CC would consistently affect the consumption of hospital resources.

A patient's diagnosis, procedure, discharge status, and demographic information is entered into the Medicare claims processing systems and subjected to a series of automated screens called the Medicare Code Editor (MCE). The MCE screens are designed to identify cases that require further review before classification into a DRG.

After patient information is screened through the MCE and any further development of the claim is conducted, the cases are classified into the appropriate DRG by the Medicare GROUPER software program. The GROUPER program was developed as a means of classifying each case into a DRG on the basis of the diagnosis and procedure codes and, for a limited number of DRGs, demographic information (that is, sex, age, and discharge status).

After cases are screened through the MCE and assigned to a DRG by the GROUPER, the PRICER software calculates a base DRG payment. The PRICER calculates the payment for each case covered by the IPPS based on the DRG relative weight and additional factors associated with each hospital, such as IME and DSH payment adjustments. These additional factors increase the payment amount to hospitals above the base DRG payment.

The records for all Medicare hospital inpatient discharges are maintained in the Medicare Provider Analysis and Review (MedPAR) file. The data in this file are used to evaluate possible DRG classification changes and to recalibrate the DRG weights. However, in the FY 2000 IPPS final rule (64 FR 41500), we discussed a process for considering non-MedPAR data in the recalibration process. In order for us to consider using particular non-MedPAR data, we must have sufficient time to evaluate and test the data. The time necessary to do so depends upon the nature and quality of the non-MedPAR data submitted. Generally, however, a significant sample of the non-MedPAR data should be submitted by mid-october for consideration in conjunction with the next year's proposed rule. This

date allows us time to test the data and make a preliminary assessment as to the feasibility of using the data. Subsequently, a complete database should be submitted by early December for consideration in conjunction with the next year's proposed rule.

As we proposed in the FY 2008 IPPS proposed rule, for FY 2008, we are adopting significant changes to the current DRGs. As described in detail below, we proposed significant improvement in the DRG system to recognize severity of illness and resource usage by proposing to adopt Medicare Severity DRGs (MS–DRGs). The changes we proposed (and are adopting in this final rule with comment period) will be reflected in the FY 2008 GROUPER, Version 25.0, and will be effective for discharges occurring on or after October 1, 2007. As noted in the proposed rule, our DRG analysis was based on data from the December 2006 update of the FY 2006 MedPAR file, which contained hospital bills received through December 31, 2006, for discharges occurring in FY 2006. For this final rule with comment period, our analysis is based on more recent data from the March 2007 update of the FY 2006 MedPAR file, which contains hospital bills received through March 31, 2007, for discharges occurring in FY 2006.

2. Yearly Review for Making DRG Changes

Many of the changes to the DRG classifications we make annually are the result of specific issues brought to our attention by interested parties. As we indicated in the proposed rule, we encourage individuals with concerns about DRG classifications to bring those concerns to our attention in a timely manner so they can be carefully considered for possible inclusion in the annual proposed rule and, if included, may be subjected to public review and comment. Therefore, similar to the timetable for interested parties to submit non MedPAR data for consideration in the DRG recalibration process, concerns about DRG classification issues should be brought to our attention no later than early December in order to be considered and possibly included in the next annual proposed rule updating the IPPS.

The actual process of forming the DRGs was, and will likely continue to be, highly iterative, involving a combination of statistical results from test data combined with clinical judgment. We describe in detail below the process we used to develop the MS–DRGs that we proposed and are adopting in this final rule with comment period. In addition, in deciding whether to make further modification to the MS–DRGs for particular circumstances brought to our attention, we considered whether the resource consumption and clinical characteristics of the patients with a given set of conditions are significantly different than the remaining patients in the MS–DRG. We evaluated patient care costs using average charges and lengths of stay as proxies for costs and relied on the judgment of our medical advisors to decide whether patients are clinically distinct or similar to other patients in the MS–DRG. In evaluating resource costs, we considered both the absolute and percentage differences in average charges between the cases we selected for review and the remainder of cases in the MS–DRG. We also considered variation in charges within these groups; that is, whether observed average differences were consistent across patients or attributable to cases that were extreme in terms of charges or length of stay, or both. Further, we considered the number of patients who will have a given set of characteristics and generally preferred not to create a new DRG unless it would include a substantial number of cases.

C. MedPAC Recommendations for Revisions to the IPPS DRG System

In the FY 2006 and FY 2007 IPPS final rules, we discussed a number of recommendations made by MedPAC regarding revisions to the DRG system used under the IPPS (70 FR 47473 through 47482 and 71 FR 47881 through 47939).

In Recommendations 1–3 in the 2005 Report to Congress on Physician Owned Specialty Hospitals, MedPAC recommended that CMS:

- Refine the current DRGs to more fully capture differences in severity of illness among patients.
- Base the DRG relative weights on the estimated cost of providing care.
- Base the weights on the national average of the hospital-specific relative values (HSRVs) for each DRG (using hospital-specific costs to derive the HSRVs).
- Adjust the DRG relative weights to account for differences in the prevalence of high-cost outlier cases.
- Implement the case-mix measurement and outlier policies over a transitional period.

As we noted in the FY 2006 IPPS final rule, we had insufficient time to complete a thorough evaluation of these recommendations for full implementation in FY 2006. However, we did adopt severity-weighted cardiac DRGs in FY 2006 to address public comments on this issue and the specific concerns of MedPAC regarding cardiac surgery DRGs. We also indicated that we planned to further consider all of MedPAC's recommendations and thoroughly analyze options and their impacts on the various types of hospitals in the FY 2007 IPPS proposed rule.

For FY 2007, we began this process. In the FY 2007 IPPS proposed rule, we proposed to adopt Consolidated Severity DRGs (CS DRGs) for FY 2008 (if not earlier). However, based on public comments received on the FY 2007 IPPS proposed rule, we decided not to adopt the CS DRGs. Rather, we decided to make interim changes to the existing DRGs for FY 2007 by creating 20 new DRGs involving 13 different clinical areas that would significantly improve the CMS DRG system's recognition of severity of illness. We also modified 32 DRGs to better capture differences in severity. The new and revised DRGs were selected from 40 existing CMS DRGs that contained 1,666,476 cases and represent a number of body systems. In creating these 20 new DRGs, we deleted 8 and modified 32 existing DRGs. We indicated that these interim steps for FY 2007 were being taken as a prelude to more comprehensive changes to better account for severity in the DRG system by FY 2008. In the FY 2007 IPPS final rule, we indicated our intent to pursue further DRG reform through two initiatives. First, we announced that we were in the process of engaging a contractor to assist us with evaluating alternative DRG systems that were raised as potential alternatives to the CS DRGs in the public comments. Second, we indicated our intent to review over 13,000 ICD–9–CM diagnosis codes as part of making further refinements to the current CMS DRGs to better recognize severity of illness based on the work that CMS (then HCFA) did in the mid-1990's to adopt severity DRGs. We describe in detail below the progress we have made on these two initiatives, our actions for FY 2008, and our plans for continued analysis of reform of the DRG system for FY 2009. We note that revising the DRGs to better recognize severity of illness has implications for the outlier threshold, the application of the postacute care transfer policy, the measurement of real case-mix versus apparent case-mix, and the IME and DSH payment adjustments. We discuss these implications in more detail in the following sections.

In the FY 2007 IPPS proposed rule, we discussed MedPAC's recommendations to move to a cost-based HSRV weighting methodology beginning with the FY 2007 IPPS

proposed rule. Although we proposed to adopt HSRV weights for FY 2007, we decided not to adopt the proposed methodology in the final rule after considering the public comments we received on the proposal. Instead, in the FY 2007 IPPS final rule, we adopted a cost-based weighting methodology without the hospital-specific portion of the methodology. The cost-based weights are being adopted over a 3-year transition period in ⅓ increments between FY 2007 and FY 2009. In addition, in the FY 2007 IPPS final rule, we indicated our intent to further study the hospital-specific methodology as well as other issues brought to our attention with respect to the cost-based weights. There was significant concern in the public comments that we account for charge compression—the practice of applying a higher charge markup over costs to lower cost than higher cost items and services—if we are to develop relative weights based on cost. Further, public commenters expressed concern about potential inconsistencies between how costs and charges are reported on the Medicare cost reports and charges on the Medicare claims. In the FY 2007 IPPS final rule, we used costs and charges from the cost report to determine departmental level cost-to-charge ratios (CCRs) to apply to charges on the Medicare claims to determine the cost-based weights. The commenters were concerned about potential distortions to the cost-based weights that would result from inconsistent reporting between the cost reports and the Medicare claims. After publication of the FY 2007 IPPS final rule, we entered into a contract with RTI International to study both charge compression and to what extent our methodology for calculating DRG relative weights is affected by inconsistencies between how hospitals report costs and charges on the cost report and how hospitals report charges on individual claims. Further, as part of its study of alternative DRG systems, the RAND Corporation is analyzing the HSRV cost-weighting methodology.

As we present below, we believe that revisions to the DRG system to better recognize severity of illness and changes to the relative weights based on costs rather than charges are improving the accuracy of the payment rates in the IPPS. We agree with MedPAC that these refinements should be pursued. Although we continue to caution that any system that groups cases will always present some opportunities for providers to specialize in cases they believe to have higher margins, we believe that the changes we have adopted and the continuing reforms we proposed, and are adopting in this final rule with comment period, for FY 2008 will improve payment accuracy and reduce financial incentives to create specialty hospitals.

D. Refinement of DRGs Based on Severity of Illness

For purposes of the following discussions, the term ''CMS DRGs'' means the DRG system we currently use under the IPPS; the term ''Medicare-Severity DRGs (MS–DRGs)'' means the revisions that we proposed to make (and are adopting in this final rule with comment period) to the current CMS DRGs to better recognize severity of illness and resource use based on case complexity. Although we have found the terms ''CMS DRGs'' and ''MS–DRGs'' useful to distinguish the current DRG system from the DRGs that we proposed to adopt for FY 2008, we invited public comments on how to best refer to both the current DRGs and the proposed DRGs to avoid confusion and improve clarity.

Comment: One commenter responded to our request for name suggestions for the new DRG system. The commenter agreed that the name should differentiate which DRG scheme is being referenced. The commenter did not provide an alternative suggestion.

Response: We agree with the importance of being able to differentiate between the current and the revised DRG system. We believe the name ''Medicare Severity DRGs (MS–DRGs)'' is an appropriate name for this revised system. Therefore, we are adopting as final our reference to the revised DRG system as the ''Medicare Severity DRGs (MS DRGs).''

1. Evaluation of Alternative Severity-Adjusted DRG Systems

In the FY 2007 IPPS final rule, we stated our intent to engage a contractor to assist us with an evaluation of alternative DRG systems that may better recognize severity than the current CMS DRGs. We noted it was possible that some of the alternative systems would better recognize severity of illness and are based on the current CMS DRGs. We further stated that if we were to develop a clinical severity concept using the current CMS DRGs as the starting point, it was possible that several of the issues raised by commenters (in response to the CS DRGs, which, in the FY 2007 IPPS proposed rule, we proposed to adopt for FY 2008 or earlier) would no longer be a concern. We noted that if we were to propose adoption of severity DRGs for FY 2008, we would consider the issues raised by commenters on last year's proposed rule as we continued to make further refinements to account for complexity as well as severity to better reflect relative resource use. We stated that we believed it was likely that at least one of several alternative severity-adjusted DRG systems suggested for review (or potentially a system we would develop ourselves) would be suitable to achieve our goal of improving payment accuracy beginning in FY 2008.

On September 1, 2006, we awarded a contract to the RAND Corporation to perform an evaluation of alternative severity-adjusted DRG classification systems. RAND is evaluating several alternative DRG systems based on how well they are suited to classifying and making payments for hospital inpatient services provided to Medicare patients. Each system is being assessed on its ability to differentiate among severity of illness. A final report is due on or before September 1, 2007.

RAND's draft interim report focused on the following criteria:

- Severity-adjusted DRG classification systems.
- How well does each classification system explain variation in resource use?
- How would the classification system affect a hospital's patient mix?
- Are the groupings manageable, administratively feasible and understandable?
- Payment accuracy—What are the payment implications of selected models?

In response to our request, several vendors of DRG systems submitted their products for evaluation. The following products were evaluated by RAND:

3M/Health Information Systems (HIS)

- CMS DRGs modified for AP–DRG Logic (CMS+AP–DRGs)
- Consolidated Severity-Adjusted DRGs (CS DRGs)

Health Systems Consultants (HSC)

- Refined DRGs (HSC–DRGs)

HSS/Ingenix

- All-Payer Severity DRGs with Medicare modifications (MM–APS–DRGs)

Solucient

- Solucient Refined DRGs (Sol–DRGs)

Vendors submitted their commercial (off-the-shelf) software to RAND in late September 2006. The five systems were compared to the CMS DRGs that were in effect as of October 1, 2006 (FY 2007). RAND assigned FY 2004 and FY 2005 Medicare discharges from acute care hospitals to the FY 2007 CMS DRGs and

to each of the alternative severity-adjusted DRG systems. RAND's initial analysis provided an overview of each alternative DRG classification system, their comparative performance in explaining variation in resource use, differences in DRG grouping logic, and case mix change.

A Technical Expert Panel comprised of individuals representing academic institutions, hospital associations, and MedPAC was formed in October 2006. The members received the preliminary draft report of RAND's alternative severity-adjusted DRG systems evaluation in early January 2007. The panel met with RAND and CMS on January 18, 2007, to discuss the preliminary draft report and to provide additional comments. RAND incorporated items raised by the panel into its preliminary draft report and submitted a revised interim report to CMS in mid-March 2007. CMS posted RAND's interim report on the CMS Web site in late March 2007. Interested individuals can view RAND's interim report on the CMS Web site at: *http://www.cms.hhs.gov/Reports/Reports/itemdetail.asp?itemID=CMS1197292.* The report may also be viewed on RAND's Web site at *http://www.rand.org/pubs/online/health.*

At this time, RAND has completed its evaluation of the alternative severity adjusted DRG systems. RAND's interim report reflects its evaluation of five alternative DRG systems using the criteria described above. Since the proposed rule, RAND evaluated the Medicare Severity DRG (MS–DRG) system using the same criteria applied to the other DRG systems. We are continuing to work with RAND to evaluate alternate methodologies for establishing relative weights using the MS–DRGs. Once RAND completes its work on the alternate methodologies for establishing relative weights, we will be in a better position to evaluate the issue of charge compression and potential improvements to our methodology to determine cost-based relative weights. We plan to review RAND's analysis of these issues and determine if it will be appropriate to propose additional adjustments to the MS–DRGs or the relative weight methodology in the FY 2009 IPPS proposed rule.

We instructed RAND to evaluate the MS–DRGs using the same criteria that it applied to the other DRG systems. Consistent with conclusions we made in the IPPS proposed rule, RAND's findings demonstrate that MS–DRGs explain 43 percent of the cost variation; a 9.1 percent improvement over the CMS DRGs. RAND reports that the explanatory power of the MS–DRGs is higher than the CMS+AP–DRGs, but lower than the other systems analyzed. The MS–DRGs have the lowest adjusted R^2 values among the severity-adjusted systems in seven MDCs. In three of these MDCs, the R^2 values are actually lower than under the CMS DRGs: MDC 19 (Mental Diseases and Disorders), MDC 20 (Alcohol/Drug Use and Alcohol/Drug Induced Organic Mental Disorders) and MDC 22 (Burns). RAND attributes the reduction in R^2 values to how the CMS DRGs were collapsed to form the base DRGs and recommends future examination. We agree that RAND's findings provide us with potential issues to examine to further improve the MS–DRGs for FY 2009.

Although RAND's findings related to R^2 in certain MDCs are of concern, we believe the MS–DRGs remain an improvement over the current CMS DRGs and have significant advantages over the other DRG systems being evaluated. Specifically, they are more up-to-date because of our review of secondary diagnoses and classification into MCCs and CCs. Further, they are understandable, available in the public domain, and will have fewer transition issues than the other systems. As MS–DRGs are a modification of the current CMS DRGs, they allow for updates and maintenance to continue using the same process as under the current CMS DRGs.

Depending on the criteria being evaluated, the relative merits of each system being evaluated by RAND are different. For instance, the CS DRGs performed well in explaining resource variation but have the highest potential for case-mix growth. Other than the MS–DRGs, the CMS+AP–DRGs did the poorest among the systems evaluated in explaining variation in resource usage but did the best on producing reliable and stable results. The remaining systems generally performed somewhere in between on most of the measures that RAND used in its comparative analysis. The MS–DRGs are the result of modifications to the CMS DRGs to better account for severity. Unlike the other systems, the MS–DRGs are available in the public domain, and as a result, systems implementation and other costs are likely to be at a minimum. As suggested above, RAND found that the MS–DRGs are an improvement over the CMS DRGs and compare favorably to the alternative DRG systems being evaluated on some criteria and not as well on others.

As RAND has completed its evaluation of the alternative DRG systems, including the MS–DRGs, consistent with RAND's findings, we believe it is appropriate at this time to adopt the MS–DRG system for the Medicare IPPS in FY 2008. While there will be an opportunity for the public to comment on RAND's findings, we expect to permanently adopt the MS–DRGs for the IPPS. We do not think it is likely that there will be persuasive public comments suggesting that one of the alternative DRG systems being evaluated by RAND is clearly superior. In our view, none of the systems appears to be clearly superior or inferior to the other systems based on the criteria RAND used for the evaluation. Given the strong support in the public comments for the MS–DRGs and the fact they compare well overall to the alternative DRG systems being evaluated by RAND, we believe it is likely that the MS–DRGs will be the system that Medicare uses permanently for the IPPS. However, because we are interested in public input on this issue, we are making RAND's final report available on the CMS Web Site at: *http://www.cms.hhs.gov/Reports/Reports/itemdetail.asp?itemID=CMS1197292.* The report may also be viewed on RAND's Web site at *http://www.rand.org/pubs/online/health.*

Interested members of the public can write to the following address to make their views known to us about the RAND Report:

Division of Acute Care, Center for Medicaid Management, 7500 Security Boulevard, C4–08–06, Baltimore, MD 21244, Attn: Mady Hue.

In the FY 2008 IPPS proposed rule, we proposed to adopt the MS–DRGs for FY 2008. We are providing the following update on RAND's progress in evaluating the MS–DRGs against the alternative DRG systems. In the proposed rule, we also invited public comment regarding RAND's preliminary analysis of each vendor-supplied alternative severity-adjusted DRG system described below. A summary of any public comments that we received and our responses to those comments are presented under each subject area.

a. Overview of Alternative DRG Classification Systems

Analysis of how each of the six severity adjusted DRG systems performs began by using the current CMS DRGs as a baseline. Two of the six systems (CS DRGs and MM–APS–DRGs) are derivatives of all-patient severity-adjusted DRG systems that have been modified by their developers for the Medicare population and two of the systems (HSC–DRGs and Sol–DRGs) are all-patient systems that incorporate severity levels into the CMS DRGs. The CMS+AP–DRGs are a combination of CMS DRGs and a modification for the Medicare population of the major CC

(MCC) severity groupings used in the AP–DRG system. (The AP–DRG system was developed by 3M/HIS specifically for the State of New York to capture the non-Medicare population.) The MS–DRG system modifies the current CMS DRGs by collapsing any paired DRGs (DRGs distinguished by the presence or absence of CCs and/or age) into base DRGs and then splits the base DRGs into MCC/CC-severity levels.

Table A below shows how each of the six alternative severity-adjusted systems classifies patients into base DRGs and their corresponding severity levels.

TABLE A.—LOGIC OF CMS AND ALTERNATIVE DRG SYSTEMS

	CMS–DRG	CMS+AP–DRG	HSC–DRG	Sol–DRG	MM–APS–DRG	CS DRG	MS–DRG
Number of MDCs	25	25	25	25	25	25	25
Number of base DRGs	379	379	391	393	328	270	335
Total number of DRGs	538	602	1,293	1,261	915	863	745
Number of DRGs <500 discharges.	97 (18%)	97 (16%)	374 (29%)	474 (38%)	115 (13%)	113 (13%)	38 (5.2%)
Number of CC (severity) subclasses.	2	3	3 (med) or 4 (surg)	3 (med) or 4 (surg)	3	4	3
CC subclasses	With CC, without CC for selected base DRGs	Without CC, With CC for selected base DRGs and Major CC across DRGs within MDC	No CC, Class C CC, Class B CC, Class A CC (Surgical only)	Minor/no substantial CCs, Moderate CCs, Major CCs, Catastrophic CCs (Surgical only)	Without CC, With CC, With Major CC with some collapsing at base DRG level	Minor, Moderate, Major, Severe with some collapsing at DRG level	Without CC, With CC, With Major CC with collapsing between severity levels for same base DRG.
Multiple CCs recognized	No	No	No	No	Yes (in computation of weight)	Yes	No.
CC assignment logic	Presence/absence	Presence/absence	Presence/absence	Presence/absence	Presence/absence	18-step process	Presence/absence.
MDC assignment	Principal diagnosis	Principal diagnosis	Principal diagnosis	Principal diagnosis	Principal diagnosis	Principal diagnosis with rerouting	Principal diagnosis.
Death used in DRG assignment.	Yes (in selected DRGs)	Yes (in selected DRGs)	Yes (“early death” DRGs)	Yes (“early death” DRGs)	Yes (in selected DRGs)	No	Yes (in selected DRGs and CC assignments).

RAND’s evaluation of the logic for each system demonstrated the following:

• Four systems add severity levels to the base CMS DRGs; the CS DRGs add severity levels to the base APR DRGs, which are comparable but not identical to the base CMS DRGs. Both the CS DRGs and MM–APS–DRGs collapse some base DRGs with low Medicare volume. The MS–DRGs collapse the current CMS DRG splits and either leave the base DRG undivided or divide it into two or three severity levels.

• The HSC–DRGs and the Sol–DRGs use uniform severity levels for each base DRG (three for medical and four for surgical). The general structure of the MS–DRG logic establishes three severity levels for each base DRG: With MCC, with CC, and without CC. However, CMS consolidated severity levels for the same base DRG if they do not meet specific statistical criteria. The general structure of the MM–APS–DRG logic includes three severity levels for each base DRG, but some severity levels for the same base DRG are consolidated to address Medicare low-volume DRGs and nonmonotonicity issues. Monotonicity is when the average costs for a severity group consistently rise as the severity level of the group increases. For example, in a monotonic system, if within a base DRG there are three severity groups and level 1 severity is less than level 2 severity and level 2 severity is less than level 3 severity, the average costs for a level 3 case would be greater than the average costs for a level 2 case, which would be greater than the average costs for a level 1 case. When a DRG is nonmonotonic, the mean cost in the higher severity level is less than the mean cost in the lower severity level. The general structure of the CS DRGs includes four severity levels for each base DRG. However, severity level consolidations occur to address Medicare low-volume DRGs and nonmonotonicity. The CS DRGs consolidate both adjacent severity levels for the same base DRG and the same severity level across multiple base DRGs (especially for severity level 4).

• Under the CMS+AP–DRGs and MM–APS–DRGs, each diagnosis is assigned a uniform CC-severity level across all base DRGs (other than CCs on the exclusion list for specific principal diagnoses). The remaining systems assign diagnoses to CC-severity level classifications by groups of DRGs.

• Under the grouping logic used by all systems other than the CS DRGs, each discharge is assigned to the highest severity level of any secondary diagnosis. The MS–DRGs assign discharges with no CC but certain high cost devices to a higher severity level. The CS DRGs adjust the initial severity level assignment based on other factors, including the presence of additional CCs. None of the other systems adjusts the severity level classification for additional factors or CCs. However, the MM–APS–DRG system handles additional CCs through an enhanced relative weight.

• The HSC–DRGs and the Sol–DRGs have a medical ''early death'' DRG within each MDC. The CS DRGs do not use death in the grouping logic. In addition, most complications of care do not affect the DRG assignment. The MS–DRGs use death in making an assignment in selected DRGs and do not count certain conditions as MCCs and CCs (such as cardiac arrest) in patients who die during the inpatient stay.

b. Comparative Performance in Explaining Variation in Resource Use

In evaluating the comparative performance of each alternative DRG system, RAND used MedPAR data from FY 2004 and FY 2005. RAND excluded data from CAHs, Indian Health Service hospitals, and hospitals that have all-inclusive rate charging practices. Consistent with CMS practice, RAND did not exclude data from Maryland hospitals, which operate under an IPPS waiver. Records that failed edits for data consistency or that had missing variables that were needed to determine standardized costs were also excluded.

RAND reported that evaluation of each alternative severity-adjusted DRG system is a complex process due to differences in how each of the severity levels are applied, the number of severity-adjusted DRGs in each system, and the average number of discharges assigned to each DRG. In addition, the manner in which the DRGs for patients 0 to 17 years of age are assigned in the severity-adjusted systems affects the number of low volume DRGs using Medicare discharges. Low-volume, severity-adjusted DRGs can affect the relative performance of a classification system. However, the percentage of Medicare discharges assigned to these DRGs is small—approximately 0.7 percent in the HSC–DRG and Sol–DRG systems compared to 0.1 percent in the CMS DRGs.

To facilitate compatrisons across the severity-adjusted DRG system, RAND assigned a severity level to each MS–DRG consistent with the method used for the other DRG systems. The severity level is based on the lowest severity level. If a base MS–DRG divided into two DRGs, one for both discharges with no CC and discharges with CCs and the other for discharges with MCCs, RAND assigned Level 0 to the DRG for discharges with no MCC and Level 2 to the DRG for discharges with MCCs. RAND also assigned Severity Level 0 to base DRGs that do not split by CC level. Table B summarizes the distribution of DRGs and discharges across severity levels by classification system, exclusive of MDC 15, ungroupable discharges, and statistical outliers. In comparison to the other severity-adjusted systems, the MS–DRGs have a much higher percentage of discharges assigned to the lowest severity level. This includes base DRGs that are not divided into severity subgroups, the no CC severity level, and the no MCC severity level in those base DRGs that are split based on the presence of a MCC only. Sixty percent of discharges are assigned to Severity Level 0 DRGs compared to only 20 percent in the CS DRG system. There are several reasons for the higher percentage, including the reassessment of CC assignments, the collapsing of the no CC and CC severity levels in 43 base MS–DRGs, and no severity subgroups in 53 base MS–DRGs.

Table B: Distribution of DRGs and Discharges by Severity-Level Assignments

Distribution of DRGs and Discharges by Severity of Illness Levels

Severity-adjusted DRGs are designed to reduce the amount of cost variation within DRGs. To compare how much within-DRG variation occurs in each DRG system, RAND computed the mean standardized cost, standard deviation, and coefficient of variation (CV) for each DRG across the various systems. Each severity-adjusted system has a smaller proportion of DRGs with a CV >100 percent than the CMS DRGs. Seventeen percent of the 511 CMS DRGs to which Medicare patients were assigned in 2005 had a CV >100 percent. In contrast, 8 percent of the 736 MS–DRGs have a CV >100 percent. This is a slightly lower percentage than in the CMS+AP DRGs but slightly higher percentage than the other four severity-adjusted DRG systems. Only 1.7 percent of discharges are assigned to MS–DRGs with a CV >100 percent, which is comparable to the percentage of discharges assigned to DRGs with a CV >100 percent in the CS DRGs and the CMS+AP DRGs. The MM–APS DRGs and CMS+AP DRGs have slightly lower and higher percentages, respectively, of discharges assigned to DRGs with a CV >100 percent.

RAND utilized a general linear regression model to evaluate how well each severity-adjusted DRG system explains variation in costs per case. The initial results demonstrate that all six severity-adjusted DRG systems predict cost better than the CMS DRGs. The CS DRGs have higher adjusted R^2 values (explanatory power) than the other severity-adjusted systems in nearly every MDC. In general, the adjusted R^2 value for the CS DRGs is 0.4458, a 13-percent improvement over the adjusted R^2 value for the CMS DRGs. The HSC–DRGs demonstrate an 11-percent improvement, while the adjusted R^2 values for the MM–APS–DRGs and Sol–DRGs are 10.0 percent and 9.7 percent higher, respectively, than the CMS DRG R^2 value. The adjusted R^2 value for the MS–DRGs is 0.4300, a 9.1 percent improvement over the CMS DRGs. The CMS+AP–DRGs show the smallest improvement, nearly 8 percent.

Another aspect of RAND's evaluation was to identify the validity of each alternative DRG system as a measurement for resource costs. For a base DRG, the severity levels should be monotonic; that is, the mean cost per discharge should increase simultaneously with an increase in the severity level. A distinction between patient groups and varying treatment costs should be accomplished by the severity levels. When a DRG is nonmonotonic, the mean cost in the higher severity level is less than the mean cost in the lower severity level. RAND studied the percentage differences and absolute differences in cost between the severity levels within the base DRGs for each system under evaluation. For the analysis, RAND assigned the severity levels for discharges assigned to the CMS+AP–

DRGs and CS DRGs that include several base DRGs to the base DRG to which they would have been assigned at a lower severity level.

Table C shows the percentage difference between the mean standardized cost for discharges with severity levels 1 through 3 as applicable to the adjacent lower severity level within the base DRG (for example, Base DRG 1 Severity Level 1 compared with Base DRG 1 Severity Level 0). The first column of the table shows the number of DRGs with severity level 0 and the proportion of discharges assigned to those DRGs. The ''Other DRGs'' column, which is not applicable to the MS–DRGs, includes DRGs for age 0 to 17 years and any DRGs for which there was no base DRG with severity level 0 that could be used in the comparison, for example, no Medicare discharges were assigned to the base DRG severity level 0. For severity level 1 and higher, RAND computed the ratio of the mean cost for that level to the mean cost for the adjacent lower level (for example, mean $cost_{DRG\ Level\ 2}$/mean $cost_{DRG\ Level\ 1}$) and reported the results by the magnitude of the ratio. RAND used the number of discharges assigned to the higher severity level to calculate the percentage of discharges assigned to each ratio category.

For the two systems (CMS+AP–DRGs and CS DRGs) that include several base DRGs, RAND assigned those discharges to the lower severity level base DRG. Following that methodology, RAND was able to calculate how much more costly the discharges assigned to the consolidated or lower severity levels were than the discharges in the base DRG assigned to the next higher severity level. Results demonstrate that, overall, nonmonotonicity is not a factor across the alternative DRG systems. There are only a small percentage of discharges that are assigned to nonmonotonic DRGs. Unlike the other systems, all severity level 1 or level 2 MS–DRGs were monotonic.

Using the data from severity of illness levels 1 through 3 (except for the MM–APS–DRGs, which do not have a severity of illness level 3), RAND calculated the discharge-weighted mean cost difference between severity levels and the mean ratio of the cost per discharge for the higher severity level to the adjacent lower severity level. The greatest cost discrimination was present in the higher severity levels versus the lower severity levels across all the systems. Unlike the other systems, each MS–DRG was at least 20 percent more costly than the adjacent lower severity DRG. The remaining systems demonstrated equivalent percentage cost differences between the severity levels as shown in Table C below.

Table C.--Ratio of the Mean Standardized Cost of a Higher Severity Level to That of the Adjacent Lower Severity Level Within the Same Base DRG

In examining whether each of the alternative DRG systems provided stability in the relative weights from year to year, RAND compared the relative weights derived from the MedPAR data in FY 2004 to the relative weights data from FY 2005. RAND's results demonstrate that generally, across all the systems, only a small percentage of DRGs had greater than a 5-percent change in relative weights. RAND did not repeat this analysis for the MS–DRGs. However, RAND had no reason to expect that the results would be substantially different for this system. For further details and discussion, we encourage readers to view RAND's full interim report on the CMS Web site at: *http://www.cms.hhs.gov/Reports/Reports/itemdetail.asp?itemID=CMS1197292.* The report may also be viewed on RAND's Web site at *http://www.rand.org/pubs/online/health.*

c. Payment Accuracy and Case-Mix Impact

Similar to how CMS established the relative weights in the FY 2007 IPPS final rule, RAND used standardized costs as determined by the national CCR and the FY 2005 MedPAR data to construct relative weights for each of the DRG systems being evaluated. RAND analyzed the effect of variations in the explanatory power on the distribution of Medicare payments for each system under evaluation. The preliminary findings indicate payment accuracy is improved by each severity-adjusted system by redistributing payment from lower-cost discharges to higher-cost discharges. However, the total payment redistribution across systems differs and reflects the payment impact of improved explanatory power. Although these findings are estimates, the percent of total payment redistributed was the least under the CMS+AP–DRGs (7.1 percent) and the most under the CS DRGs (11.9 percent). The total payment redistribution under the MS–DRGs is 8.4 percent of the total payment. The redistribution is less than the CS DRG system, the same as the HSC–DRG system, and more than in the other systems, even though some of these systems have higher explanatory power.

Table D shows changes in case-mix index (CMI) by hospital category across alternative severity-adjusted DRG

systems. Results demonstrate that, under the severity-adjusted systems, urban hospitals have a higher average CMI than under the CMS DRGs, and rural hospitals have a lower CMI. The analysis suggests that any system adopted to better recognize severity of illness with a budget neutrality constraint will result in payment redistribution that can be expected to benefit urban hospitals at the expense of rural hospitals. This impact occurs because patients treated in urban hospitals are generally more severely ill than patients in rural hospitals and the CMS DRGs are not currently recognizing the full extent of these differences. For purposes of the study, RAND assumed no behavioral changes in coding practice or the types of patients treated.

On average, the CMI for urban hospitals increases under the severity-adjusted systems, and that for rural hospitals decreases. The change is greatest in the CS DRGs, where the CMI for rural hospitals is 2.4 percent lower than that under the CMS DRGs. The CMI for large urban hospitals (those located in metropolitan areas with more than 1 million population) and other urban hospitals is 0.6 and 0.1 percent higher, respectively, under the CS DRGs. Under the MS-DRGs, there is a slightly larger increase in the average CMI for large urban hospitals, a reduction in the CMI for other urban hospitals, and a smaller reduction for rural hospitals.

The CMI for larger hospitals increases, while that for smaller hospitals decreases across the systems. This result is consistent with a severity-adjusted DRG system shifting payment from less expensive cases to more expensive cases. Larger hospitals tend to have relatively more complex cases and severely ill patients than smaller hospitals do. Teaching hospitals also tend to treat more complex cases, but the impact on these facilities differs by severity-adjusted DRG system. Across all the severity-adjusted systems, nonteaching hospitals have a lower CMI, ranging from a 0.2 percent reduction under the HSC-DRGs and Sol-DRGs to a 0.5 percent reduction under the CS DRGs. In three of the systems (CMS+AP-DRG, HSC-DRG, and MM-APS-DRG), hospitals with large teaching programs (100 or more residents) would experience a larger increase than hospitals with smaller teaching programs. Under the Sol-DRG system, hospitals with large teaching programs would have a 0.1 percent increase, compared with a 0.2 percent increase for hospitals with smaller teaching programs. Under the CS DRG system, the CMI for hospitals with large teaching programs would be about the same, but that for hospitals with smaller teaching programs would increase 0.7 percent relative to the CMS DRGs.

TABLE D.—CMI CHANGE IN ALTERNATIVE DRG SYSTEMS RELATIVE TO THE CMS DRG CMI

	Number of hospitals	Number of discharges	CMS-DRG CMI	Percentage change from CMS-DRG CMI

RAND also noted that changes in documentation and coding that increase case mix will occur with each severity adjusted DRG system they evaluated. Increases in CMI after adopting the system could be the result of improved coding rather than increases in actual patient severity. RAND observed that the experience of Maryland hospitals using the APR DRG system provides some indication of the likely impact on case-mix of introducing a severity-adjusted system. RAND also noted that coding behaviors are expected to vary under alternative systems according to RAND. Therefore, the risk of case-mix growth due to improved documentation and coding exists with any system. However, RAND advises that the amount of risk can be assessed based on the logic of the DRG system and result in anticipated changes in coding behavior. For the analysis we presented in the proposed rule, RAND found that the CMS+AP–DRG system may have the lowest risk of case-mix increase, while the CS DRGs present the greatest risk. The remaining systems under evaluation demonstrated equivalent risk, based on the DRG logic and other features specific to each system.

RAND did not repeat the analysis of the potential for documentation and coding improvements to increase case-mix using the MS–DRGs because it only worked with FY 2005 data to evaluate them. Further, CMS did a detailed analysis of the likely impact of documentation and coding improvements on case-mix using the MS–DRGs. Section II.D.6. of the preamble of this rule describes in detail the CMI impact under the MS–DRGs using the State of Maryland's experience and data.

d. Other Issues for Consideration

RAND was asked to examine whether each of the alternative severity-adjusted DRG systems under evaluation appears to contain logic that is manageable, administratively feasible, and understandable. RAND's results describe the extent to which those features are present in the grouping logic of each system. A brief summary of these findings and other discussion points follow. For more complete details of the grouping logic for each system evaluated, we encourage readers to review RAND's interim report at the following CMS Web site: *http://www.cms.hhs.gov/Reports/Reports/itemdetail.asp?itemID=CMS1197292.* The report may also be viewed on RAND's Web site at *http://www.rand.org/pubs/online/health.*

To increase and promote understanding of a DRG classification system, the grouping logic should include a uniform structure. With the exception of the CS DRGs, RAND found that there is uniformity in the hierarchical structure for assigning discharges to MDCs, DRGs, and severity levels for each system evaluated. The CS DRGs utilize a complex rerouting logic and severity of illness level assignment. However, the result is a higher explanatory power that accounts for limitations in the current system. Therefore, due to the complexities associated with that system, it may not easily be understood. However, if the results yield clinically coherent groups of patients with comparable costs, RAND concluded that the system may be worth exploring further. The HSC–DRG and Sol-DRG grouping logic uses a standard number of severity levels for each base DRG, although the result is an increase in the number of low-volume DRGs. The standard severity level structure provides increased understanding, although as mentioned

previously, low-volume, severity-adjusted DRGs can affect the relative performance of a classification system. The MM–APS–DRGs and CS DRGs use standard DRG severity levels. However, the method of collapsing DRGs varies due to the modifications made for Medicare use. The underlying logic of the MS–DRG system uses standard severity levels, but the criteria for establishing severity subgroups result in severity levels that vary by base DRG. Because the severity levels are often collapsed and the resulting subgroups depend on the particular DRG, it is a more complicated system to understand than those systems that uniformly define subgroups according to RAND. By only collapsing DRGs to determine relative weights, RAND notes it is possible to preserve the underlying DRG structure, which perhaps would lead to a more understandable system.

As stated earlier, there are also several transition issues that require attention when evaluating alternative severity-adjusted DRG systems. In determining how manageable, administratively feasible, and understandable the systems being evaluated are, consideration should be given to how they crosswalk or map to the current CMS DRGs. Because four of the systems under evaluation are based on the underlying CMS DRG grouping logic to establish their base DRGs (CMS+AP–DRGs, HSC–DRGs, Sol-DRGs, and MM–APS–DRGs), the CMS DRGs are able to crosswalk smoothly to these severity-adjusted DRGs. Conversely, crosswalking in reverse or backward mapping from the CMS+AP DRGs to the CMS DRGs is problematic due to the discharges in one severity level of the CMS+AP–DRG system compared to several base CMS DRGs. As expected, the CS DRGs do not crosswalk easily to the CMS DRGs due to the complex grouping logic. The MM–APS–DRGs pose unique complications as well due to the large number (over 1,000) of DRGs. Although the MS–DRGs are based on the CMS DRGs, there are challenges in crosswalking discharges between the two systems because of the revisions in the CC list and the sequential renumbering of the DRGs.

System updates are another important factor that may have serious implications. All of the DRG systems RAND evaluated were reported to make annual updates to reflect ICD–9–CM coding changes. However, the CC severity level assignments for each system have not routinely been reviewed and revised. The CC exclusion list and severity level assignments should be reviewed where appropriate to reflect current patterns of care, according to RAND. RAND found that the MS–DRGs are the most updated of the severity-adjusted DRG systems. CMS reviewed the CC list and severity-level assignments in developing the MS–DRGs. Further, the MS–DRGs incorporate recent refinements in the CMS DRGs to account for complexity as well as severity. According to RAND, the other CMS-based systems use CC lists and severity level assignments that are based on outdated analyses of the effect of a condition on treatment costs from either the 1988 Yale study or the 1994 CMS refinement study. The APR DRGs have not been reviewed for several years and are not as current as the severity-based systems according to RAND.

Accessibility to each of the severity-adjusted DRG system's logic and software is also a concern. Each system RAND analyzed is currently maintained as a proprietary product. In general, all of the vendors indicated a willingness to place their product in the public domain, under certain terms. As such, CMS believes it is likely there would need to be discussion as to whether there would be any limitations (such as the source code as well as the DRG logic) on the availability of the DRG systems to hospitals or competing vendors. None of these concerns would be an issue with the MS–DRGs. RAND further noted that because the MS–DRGs are in the public domain, there should be less disruption to existing arrangements for acquiring and installing the GROUPER software and integrating that software with other hospital systems. The intent of each vendor to provide public access to its GROUPER logic and software is described in further detail in RAND's interim report.

Comment: One commenter supported the efforts of CMS to evaluate several alternatives to the existing DRG system. The commenter expressed appreciation that CMS had incorporated comments submitted by the provider community in setting the criteria for evaluating the various DRG products. This commenter also stated it looked forward to reviewing the final recommendations when the RAND report is released.

Response: We appreciate the commenter's support of our efforts. As we indicated in the proposed rule, we have focused our efforts in response to public comments regarding the refinement of the current DRG system. With the assistance of RAND in the evaluation of alternative severity-adjusted DRG systems, our objective has been to select a classification system that will better recognize severity of illness, utilization of resources, and complexity of services. The ultimate goal of these combined objectives is to greatly improve the payment accuracy of the IPPS.

Comment: Several commenters supported the implementation of a severity-based system. However, they urged CMS to wait until RAND completes the final report before moving forward with a specific system. One commenter articulated its appreciation of the thorough analysis conducted on the other alternative severity-adjusted systems. However, the commenter remains concerned that CMS would consider moving forward with the MS–DRGs in the absence of completing an analysis of them using the same criteria applied to the other systems under review. Other commenters expressed concern that CMS may implement the proposed MS–DRGs for FY 2008 and then switch to a completely different severity-based system in FY 2009, or phase in a different system in subsequent years. One commenter stated that, given the potential for heightened administrative burdens as well as financial consequences, it would seem prudent that CMS invest the needed time and energy to confirm whether its belief in the proposed MS–DRG system can be validated. This same commenter added that by stating it is not precluded from adopting another system for FY 2009, CMS is tacitly acknowledging that the MS–DRG system may not be the best system. Another commenter stated that CMS' request for RAND to evaluate the proposed MS–DRGs indicates it is not satisfied that the MS DRGs are ready for long-term use in the IPPS.

Response: In the proposed rule, we indicated that we asked RAND to evaluate the proposed MS–DRG system using the same criteria it is applying to the other alternative severity-adjusted DRG systems. Our intent in not committing permanently to the MS–DRGs was not to suggest that we were not satisfied with the long-term application of the MS–DRG system or that we had concerns about it being the best system. Rather, we were interested in an objective evaluation of the MS–DRGs by RAND using the same criteria applied to the other alternative severity-adjusted systems. That is, before making a permanent commitment to the MS–DRGs, we were interested in knowing how well it demonstrates the ability to meet the objectives described previously—better recognition of severity of illness, utilization of resources, complexity of services and improved payment accuracy over the current CMS DRG system. While we proposed the MS–DRGs for

implementation in FY 2008, we were further interested in the public's response to the MS–DRGs and RAND's evaluation of them before making a final decision on a permanent DRG system to use for Medicare payment. Specifically, public comments on the FY 2007 IPPS proposed rule asked that CMS show evidence that the alternative system proposed results in an improved payment system compared to the current system, test the degree to which the variation in costs within cases at the DRG level is reduced, maintain the improvements made over the years to account for complexity of service and new technologies, and avoid a proprietary system that lacks transparency. We considered all these factors in the development of the MS–DRGs and had we not provided the proposed MS–DRG system to RAND for evaluation, we would not be able to make a fair comparison and final determination for the best course of action for Medicare long term. At the time of the proposed rule, we were unsure whether RAND would be able to complete its evaluation of the MS–DRGs by the time of this final rule with comment period. However, as summarized above, RAND has completed its analysis of the MS–DRG system and found that it compares favorably to the other DRG systems being evaluated on a number of criteria.

As RAND has completed its evaluation of alternative DRG systems, including the MS–DRGs, consistent with RAND's findings, we believe it is appropriate at this time to adopt the MS–DRG system for Medicare in FY 2008. We believe the MS–DRGs represent an improvement over the current CMS DRGs. While there will be an opportunity for the public to comment on RAND's findings, we expect to permanently adopt the MS–DRGs for the IPPS. We do not believe it is likely that there will be persuasive public comments suggesting that one of the alternative DRG systems being evaluated by RAND is clearly superior. We plan on using RAND's report to continue to examine ways to improve and refine the Medicare inpatient payment system and expect that any future refinements will be based on the MS–DRGs. Therefore, as final policy for FY 2008, we are adopting the MS–DRGs as the new classification system for the IPPS.

Comment: One commenter agreed that CMS should adopt a transparent and publicly available DRG system and applauded the proposed MS–DRGs. The commenter stated that the transparency of the current system has been a critical aspect of its success over the years, and this will be even more important to ensure the successful adoption of the new severity-adjusted system chosen.

Response: We appreciate the commenter's support for the proposal to use MS DRGs. We agree that transparency is an important factor in the selection of a new severity-adjusted DRG system. We refer readers to sections II.D.2. and 3. of the preamble of this final rule with comment period for a complete discussion of the MS–DRGs.

Comment: One commenter stated CMS should consider adopting a more robust severity-based DRG system than the proposed MS–DRGs. The commenter admitted that it regards the APR DRG system highly and indicated it should not be abandoned because it is more complicated to implement and because of the controversy surrounding its suggested implementation. The commenter also noted that, as RAND stated in its preliminary report, it is a more robust, accurate, and precise system, and it was reluctant to see CMS abandon this superior system entirely before receiving RAND's final report and recommendations. Further, the commenter stated that, while the MS–DRGs would unquestionably represent a major improvement over the current CMS DRGs, it believed CMS has the ability and should proceed with introducing a better and more robust system and continue exploring further options while waiting for RAND's final report.

Response: In the FY 2007 proposed rule (71 FR 24015), we proposed to adopt the CS DRGs which were based on a consolidated version of the APR DRGs. We received a significant number of public comments strongly urging us not to move forward with the CS DRGs. These comments are described in detail in the FY 2007 final rule (71 FR 47906 through 47912). Among other concerns, the public comments suggested that the system was overly complex and difficult to understand. Further, there was concern that the logic and source code would not be available in the public domain like the current CMS DRGs and that many of the improvements and refinements made to the CMS DRGs over the years would be abandoned. For these and other reasons, we decided not to adopt the CS DRGs for FY 2007. Our proposed adoption of MS–DRGs did not raise these same concerns in the public comments. Given that the MS–DRGs are a substantial improvement over the current CMS DRGs in their ability to recognize severity of illness and meet other objectives that we set for IPPS payment reform, we believe it is a better system to select for use by Medicare than the CS DRGs or APR DRGs.

Comment: One commenter, a vendor, submitted its DRG product to RAND for evaluation. The commenter expressed its concern that CMS developed a completely new and untested severity system while there are several alternate systems currently under evaluation by RAND. The commenter noted that its product has been in continuous use for 18 years and is based on the original Yale University methodology and developed under contract with the Health Care Financing Administration, now CMS, between 1986 and 1989.

The commenter urged CMS to continue with the current CMS DRGs for one more year. According to the commenter, introducing a new temporary severity system, the MS–DRGs, with the expectation that hospitals move to another system for FY 2009, will create unnecessary havoc for the hospital industry. The commenter noted that it is pleased with the work CMS has done in reviewing 13,549 secondary diagnosis codes to refine the CC list and believed the use of this new list will result in a greatly improved DRG GROUPER. However, the commenter stated it is not fair to compare the FY 2008 MS–DRGs (with the new CC list and new codes) with FY 2006 and FY 2007 alternative severity systems using the unrevised CC list. The commenter recommended that CMS create Version 25.0 CMS DRGs with the new CC list and new codes to allow the vendors of the alternative systems until November or December to incorporate the information into updated versions of their systems. The commenter also suggested that the RAND report deadline could be extended beyond September 1, 2007, to allow the comparison of alternative DRG systems to occur with the revised CC list.

In addition, the commenter believed the MS–DRGs have the following shortcomings:

- Although CMS' chief concern is Medicare patients, it is shortsighted to ignore non-Medicare patients in the proposed MS–DRG system, as the health care industry often focuses its attention on the Medicare relative value system for all of its hospital patients.
- The DRG system has always been comprehensive, including all possible ICD–9–CM diagnoses and procedures. Consolidating low-volume procedures and procedures now performed primarily in an outpatient setting creates confusion in the MS–DRG classification system. Procedures such as tonsillectomies, carpal tunnel release, and cataract extractions are different MDCs and are treated by different medical specialists. They are similar

only with respect to historical cost data and only for the time being.

• Eliminating newborns, maternity, and congenital anomalies from the usual MS–DRG severity level approach does not provide a comprehensive severity system.

Lastly, the commenter indicated that whatever software system is chosen for the public, it should be provided in a modern and accessible software language and format. The commenter recommended a ''C'' version, on CDs or DVDs, and suggested that continuing to place CMS software into the public domain written in IBM assembler and distributed through the National Technical Information Service (NTIS) on 9-track tapes or 3480 cartridges seems difficult to imagine, as this technology is over 40 years old.

Response: We disagree that we are implementing a ''completely new and untested severity system.'' While the MS–DRGs constitute a major reform to better recognize severity of illness, they are a refinement of the current CMS DRGs that have been in use for Medicare payment for over 20 years. Further, our proposed rule analysis—subsequently validated by RAND—suggested that they are major improvement over the current CMS DRGs. Most of the other systems represent less updated refinements of the CMS DRGs. While these systems have been in use for other purposes, we note that (other than the APR DRGs that are used for payment in Maryland and the AP DRGs that were used in New York's all payer ratesetting system in the 1990s), the other systems being evaluated have never been used for Medicare payment.

We stated in the FY 2008 IPPS proposed rule that we developed the MS–DRG system in response to public comments received as a result of the FY 2007 proposed rule (in response to the proposed CS DRGs). We also stated we submitted the MS–DRG system to RAND for evaluation and the final report was expected on or before September 1, 2007. At this time RAND has completed the evaluation of alternative severity-adjusted DRG systems, including the MS–DRGs. In the near future, we will post RAND's analysis of the MS–DRG system to the following CMS Web site: *http://www.cms.hhs.gov/Reports/Reports/itemdetail.asp?itemID=CMS1197292.* The report may also be viewed on RAND's Web site at *http://www.rand.org/pubs/online/health.* This report is referred to as an Addendum to RAND's interim report that was released in March 2007. A completed final report incorporating the evaluation of all six severity adjusted DRG systems into one document will be posted to the CMS Web site after September 1, 2007.

As noted above, we share the commenter's concern about adopting one DRG system this year and potentially another one next year. We believe the MS–DRGs should be the system that is adopted for long-term use by Medicare for IPPS payment. However, we are interested in obtaining further public input on RAND's findings. We do not believe it is likely that there will be persuasive public comments suggesting that one of the alternative DRG systems evaluated by RAND is clearly superior to the MS–DRGs.

We appreciate the commenter's support of our efforts in the review of 13,549 secondary diagnosis codes. We agree that a new, updated CC list greatly improves the ability of a DRG GROUPER to reflect severity of illness and distribute payments more accurately. The intent of RAND's evaluation was to compare each of the alternative DRG systems in its current form. The fact that delays would be necessary to allow the other systems to adopt the improvements that CMS made to the CC list for the MS–DRGs suggests that the other systems would not be ready for implementation as soon. As noted elsewhere, we are interested in adopting comprehensive improvements to the DRG system for severity of illness at the earliest possible date. We do not believe it is in the public interest to delay adopting these improvements to wait for the alternative DRG systems to incorporate refinements to the CC list. Further, we note that CMS first discussed performing a comprehensive review of the CC list over 2 years ago. Each vendor could have undertaken a similar review of the CC list to improve its DRG product at any time.

We disagree with the commenter's assertion that our decision should turn on how the MS–DRGs can be used for non-Medicare payers. As we have stated many times in the past, we encourage private insurers and other non-Medicare payers to make refinements to Medicare's DRG system to better suit the needs of the patients they serve. With respect to the maternity and newborn DRGs, we cannot adopt the same approach to refine these DRGs that we did with the rest of the MS–DRGs because of the extremely low volume of Medicare patients there are in these DRGs. Medicare simply does not have enough cases in these DRGs to apply the same approach we did in the other MDCs. Whether we made revisions to these DRGs or not, private insurers and other private payers would have to develop their own DRGs or relative weights to address the needs of these patients that are not well-represented in the Medicare population. With respect to other pediatric patients, in our view, a significant advantage of the MS–DRGs over the prior CMS DRGs is the fewer number of low volume DRGs. By eliminating pediatric (ages 0 to 17 years) splits, the MS–DRGs will have fewer low-volume DRGs and less instability in the DRG relative weights for the cases paid using these DRGs.

With regards to the software, undere CMS' agreement with its contractor, the software provided by NTIS is the same public domain software that is provided to CMS for use by our system maintainers, regional offices, and fiscal intermediaries.MAC. We will consider this comment as we make updates to our information systems and related contracts.

As stated elsewhere in this final rule with comment period, we are adopting the MS–DRGs for implementation on October 1, 2007 (FY 2008). A detailed discussion summarizing the public comments received in response to the MS–DRG proposal is described in section II.D.2. of the preamble of this final rule with comment period.

2. Development of the Medicare Severity DRGs (MS–DRGs)

As discussed previously, we are committed to continuing our efforts of making refinements to the current CMS DRGs to better recognize severity of illness. In the FY 2007 IPPS final rule, we stated that we had begun a comprehensive review of over 13,000 diagnosis codes to determine which codes should be classified as CCs when present as a secondary diagnosis. We stated that we would also build on the severity DRG work we performed in the mid-1990's. We received a number of public comments on last year's proposed rule that supported the refinement of the current CMS DRGs so that they better recognize severity of illness for FY 2007.

We also committed to performing a more thorough reform of the entire DRG system to better recognize severity of illness for FY 2008. As a result of this broad based analysis, we developed the MS–DRGs that we proposed and are adopting in this final rule with comment period. The MS–DRGs represent a comprehensive approach to applying a severity of illness stratification for Medicare patients throughout the DRGs. As discussed in proposed rule and in section II.D.5. of the preamble of this final rule with comment period, the MS–DRGs maintain the significant advancements in identifying medical technology made

to the DRGs in past years. At the same time, they greatly improve our ability to identify groups of patients with varying levels of severity using secondary diagnoses. Further, they improve our ability to assign patients to different DRG severity levels based on resource use that is independent of the patient's secondary diagnosis—referred to in this discussion as ''complexity.'' We proposed to adopt the MS–DRGs for FY 2008 and also submitted the system to RAND to be considered as part of its evaluation of alternative DRG systems. In the proposed rule, we encouraged comments on our proposed methodology to establish a severity DRG system and the resulting DRGs.

a. Comprehensive Review of the CC List

Our efforts to better recognize severity of illness began with a comprehensive review of the CC list. Currently, 115 DRGs are split based on the presence or absence of a CC. For these DRGs, the presence of a CC assigns the discharge to a higher weighted DRG. The list of diagnoses designated as a CC was initially created at Yale University in 1980–1981 as part of the project to develop an ICD–9–CM version of the DRGs. The researchers at Yale University developed the ICD–9–CM DRGs using national hospital data with diagnoses and procedures coded in ICD–9–CM from the second half of 1979. Because hospitals only began reporting ICD–9–CM codes in 1979, discharge abstracts at that time were much less likely to fully report all secondary diagnoses. As a result, the Yale University researchers developed a liberal definition of a CC as any secondary diagnosis that ''would cause an increase in length of stay by at least 1 day in at least 75 percent of the patients.'' Because of the likely underreporting of secondary diagnoses in the 1979 data, the Yale University researchers also used age as a surrogate for identifying patients with a CC. The original version of the ICD–9–CM DRGs assigned patients to a CC DRG if they had a secondary diagnosis on the CC list or if the patient was 70 years or older.

With the implementation of the IPPS in FY 1984, the coding of secondary diagnoses by hospitals dramatically improved. During the first 4 years of the IPPS, the CC definition included the age 70 criterion. With the improved coding and reporting of diagnoses associated with the implementation of the IPPS, the use of age as a surrogate for CCs was no longer necessary. Thus, beginning in FY 1988, the age 70 criterion was removed from the CC definition and a CC DRG was defined exclusively by the presence of a secondary diagnosis on the CC list.

Except for new diagnosis codes that were added to ICD–9–CM after FY 1984 (for example, HIV), the CC list of diagnoses currently used in the CMS DRGs is virtually identical to the CC list created at Yale University. However, there have been dramatic changes not only in the accuracy and completeness of the coding of secondary diagnoses but also in the characteristics of patients admitted to hospitals and the practice patterns within hospitals as well.

Since the implementation of the IPPS, Medicare average length of stay has dropped dramatically from 9.8 days in 1983 to 5.7 days in 2005. The economic incentives inherent in DRGs motivated a change in practice patterns to discharge patients earlier from the hospital. These changes were facilitated by the increased availability of postacute care services, such as nursing homes and home health services, which allowed problems previously requiring continued hospitalization to be effectively treated outside the acute care hospital. Furthermore, there has also been a dramatic shift to outpatient surgery that avoids costly inpatient stays. Many surgical procedures formerly performed in the hospital are now routinely performed on an outpatient basis. As a result, patients admitted to the hospital today are on average more likely to have a CC than when the IPPS was implemented. The net effect of better coding of secondary diagnoses, reductions in hospital length of stay, increased availability of postacute care services, and the shift to outpatient care is that most patients (nearly 80 percent) admitted to a hospital now have a CC. As a result of the changes that have occurred during the 22 years since the implementation of the IPPS, the CC list as currently defined has lost much of its capacity to discriminate hospital resource use.

Currently, 115 CMS DRGs have a CC subdivision. Up until FY 2002, the number of DRGs with a CC subdivision remained essentially unchanged from the original FY 1984 version of the DRGs. As a means of improving the payment accuracy of the DRGs, beginning with the FY 2002 DRG update, each base CMS DRG without a CC subdivision was evaluated to determine if a CC subdivision was warranted. Over the past five DRG updates, only seven base CMS DRGs have had a CC subdivision added. The primary constraint preventing a significant increase in the number of base CMS DRGs with a CC subdivision is the low number of patients who would be assigned to the non-CC group. Thus, the expansion of the number of CMS DRGs subdivided based on a CC is constrained because the vast majority of patients would be assigned to the CC group and few patients would be assigned to the non CC group. To remedy these problems, we reviewed each of the 13,549 secondary diagnosis codes to evaluate their assignment as a CC or non-CC using statistical information from the Medicare claims data and applying medical judgment based on current clinical practice. We refer to this list in this section as the ''revised CC list.''

The need for a revised CC list prompted a reexamination of the secondary diagnoses that qualify as a CC. Our intent was to better distinguish cases that are likely to result in increased hospital resource use based on secondary diagnoses. Using a combination of mathematical data and the judgment of our medical advisors, we included the condition on the CC list if it could demonstrate that its presence would lead to substantially increased hospital resource use.

Diagnoses may require increased hospital resource use because of a need for such services as:

- Intensive monitoring (for example, an intensive care unit (ICU) stay).
- Expensive and technically complex services (for example, heart transplant).
- Extensive care requiring a greater number of caregivers (for example, nursing care for a quadriplegic).

There are 3,326 diagnosis codes on the current CC list. Our 2006 review of the CC list reduced the number of diagnosis codes on the CC list to 2,583. Based on the current CC list, 77.66 percent of patients have at least one CC present. Based on the revised CC list from our 2006 review, the percent of patients having at least one CC present would be reduced to 40.34 percent.

b. Chronic Diagnosis Codes

The 1979 data used in the original formation of the CC list often did not have the manifestations of a chronic disease fully coded. As a result, the CC list included many chronic diseases with a broad range of manifestations. Such chronic illness diagnoses usually do not cause a significant increase in hospital resource use unless there is an acute exacerbation present or there is a significant deterioration in the underlying chronic condition. Therefore, in the revised CC list, we removed chronic diseases without a significant acute manifestation. Recognition of the impact of the chronic disease is accomplished by separately coding the acute manifestation. For example, the mitral valve disease codes

(codes 396.0 through 396.9) are assigned to the current CC list. However, unless the mitral valve abnormalities are associated with other diagnoses indicating acute deterioration, such as acute congestive heart failure, acute pulmonary edema, or respiratory failure, they would not be expected to significantly increase hospital resource use. Therefore, the revised CC list did not include the mitral valve codes. Recognition of the contribution of mitral valve disease to the complexity of hospital care would be accomplished by separately coding those diseases on the CC list that are associated with an acute exacerbation or deterioration of the mitral valve disease.

The revised CC list applied the criterion that chronic diagnoses having a broad range of manifestations are not assigned to the CC list as long as there are codes available that allow the acute manifestations of the disease to be coded separately. For some diseases, there are ICD–9–CM codes that explicitly include a specification of the acute exacerbation of the underlying disease. For example, for congestive heart failure, the following codes specify an acute exacerbation of the congestive heart failure:

- 428.21, Acute systolic heart failure
- 428.41, Acute systolic and diastolic heart failure
- 428.43, Acute on chronic systolic heart failure
- 428.31, Acute diastolic heart failure
- 428.33, Acute on chronic diastolic heart failure

These congestive heart failure codes are included on the revised CC list. However, the following congestive heart failure codes do not indicate an acute exacerbation and are not included in the revised CC list:

- 428.0, Congestive heart failure not otherwise specified
- 428.1, Left heart failure
- 428.20, Systolic heart failure not otherwise specified
- 428.22, Chronic systolic heart failure
- 428.32, Chronic diastolic heart failure
- 428.40, Systolic and diastolic heart failure
- 428.9, Heart failure not otherwise specified

As a result of this approach, most chronic diseases were not assigned to the revised CC list. In general, a significant acute manifestation of the chronic disease must be present and coded for the patient to be assigned a CC. We made exceptions for diagnosis codes that indicate a chronic disease in which the underlying illness has reached an advanced stage or is associated with systemic physiologic decompensation and debility. The presence of such advanced chronic diseases, even in the absence of a separately coded acute manifestation, significantly adds to the treatment complexity of the patient. Thus, the presence of the advanced chronic disease inherently makes the reason for admission more difficult to treat. For example, under the revised CC list, stage IV, V, or end-stage chronic renal failure (codes 585.4 through 585.6) are designated as a CC, but stage I through III chronic renal failure (codes 585.1 through 585.3) are not. For obesity, a body mass index over 35 (codes V85.35 through V85.4) is a CC, but a body mass index between 19 and 35 is not. End-stage renal failure and extreme obesity are examples of chronic diseases for which the advanced stage of the disease is clearly specified.

However, for most major chronic diseases, the stage of the disease is not clearly specified in the code. These codes were evaluated based on the consistency and intensity of the physiologic decompensation and debility associated with the chronic disease. For example, quadriplegia (codes 344.00 through 344.09) requires extensive care with a substantial increase in nursing services and more intensive monitoring. Therefore, quadriplegia is considered a CC in the revised CC list.

c. Acute Diagnosis Codes

Examples of acute diseases included on the revised CC list included acute myocardial infarction (AMI), cerebrovascular accident (CVA) or stroke, acute respiratory failure, acute renal failure, pneumonia, and septicemia. These six diseases are representative of the types of illnesses we included on the revised CC list. Other acute diseases were designated as a CC if their impact on hospital resource use would be expected to be comparable to these representative acute diseases. For example, acute endocarditis was included on the CC list but urinary tract infection was not.

The revised CC list is essentially comprised of significant acute disease, acute exacerbations of significant chronic diseases, advanced or end stage chronic diseases and chronic diseases associated with extensive debility. Compared to the existing CC list, the revised CC list requires a secondary diagnosis to have a consistently greater impact on hospital resource use.

The following Table E compares the current CC list and the revised CC list. There are 3,326 diagnosis codes on the current CC list. The CC revisions reduce the number of diagnosis codes on the CC list to 2,583. Based on the current CC list, 77.66 percent of patients have at least one CC present, using FY 2006 MedPAR data. Based on the revised CC list, the percent of patients having at least one CC present is reduced to 40.34 percent. The revised CC list increases the difference in average charges between patients with and without a CC by 56 percent ($15,236 versus $9,743).

TABLE E.—COMPARISON OF CURRENT CC LIST AND REVISED CC LIST

	Current CC list	Revised CC list
Codes designated as a CC	3,326	2,583
Percent of patients with one or more CCs	77.66	40.34
Percent of patients with no CC	22.34	59.66
Average charge of patients with one or more CCs	$24,538	$31,451
Average charge of patients with no CCs	$14,795	$16,215

The analysis above suggests that merely reviewing and updating the CC list can lead to significant improvements in the ability of the CMS DRGs to recognize severity of illness. Although we could potentially adopt this one change to better recognize severity of illness in the CMS DRGs, we have undertaken additional analyses that further refine secondary diagnoses into MCCs, CCs and non-CCs as described below.

d. Prior Research on Subdivision of CCs into Multiple Categories

(1) Refined DRGs

During the mid-1980s, CMS (then HCFA) funded a project at Yale University to revise the use of CCs in the CMS DRGs. The Yale University project mapped all secondary diagnoses that were considered a CC in the CMS DRGs into 136 secondary diagnosis groups, each of which was assigned a CC complexity level. For surgical patients, each of the 136 secondary diagnosis groups was assigned to 1 of 4 CC complexity levels (non-CC, moderate CC, MCC, and catastrophic CC). For medical patients, each of the 136 secondary diagnosis groups was assigned to 1 of 3 CC complexity levels (non-CC, moderate/MCC, and catastrophic CC). All age subdivisions and CC subdivisions in the DRGs were

eliminated and replaced by the four CC subgroups for surgical patients, or the three CC subgroups for medical patients. The Yale University project did not reevaluate the categorization of secondary diagnosis as a CC versus a non-CC. Only the diagnoses on the standard CC list were used to create the moderate, major, and catastrophic subgroups. All secondary diagnoses in a secondary diagnosis group were assigned the same level, and a patient was assigned to the subgroup corresponding to the highest level secondary diagnosis. The number of secondary diagnoses had no effect on the subgroup assigned to the patient (that is, multiple secondary diagnoses at one level did not cause a patient to be assigned to a higher subgroup). The DRG system developed by the Yale University project demonstrated that a subdivision of the CCs into multiple subclasses would improve the predictability of hospital costs.

(2) 1994 Severity DRGs

We also examined the work we performed in the mid-1990's to revise the CMS DRGs to better recognize severity. In 1993, we reevaluated the use of CCs within the CMS DRGs. The reevaluation excluded the CMS DRGs associated with pregnancy, newborn, and pediatric patients (MDCs 14 and 15 and DRGs defined based on age 0–17). The major CC list from the AP-DRGs that are used for Medicaid payment by New York and other States was used to identify an initial list of MCCs. Using Medicare data, we reevaluated the categorization of each secondary diagnosis as a non-CC, CC, or an MCC. The end result was that 111 diagnoses that were non-CCs in the standard CMS DRGs were made a CC, 220 diagnoses that were a CC were made a non-CC, and 395 CCs were considered an MCC.

All CC splits in the CMS DRGs were eliminated, and an additional 24 DRGs were merged together. The resulting base CMS DRGs were then subdivided into three, two, or no subgroups based on an analysis of Medicare data. The result was 84 DRGs with no subgroups, 124 DRGs with two subgroups, and 85 DRGs with three subgroups. An additional 63 pregnancy, newborn, and pediatric DRGs not evaluated resulted in a total of 652 DRGs.

A patient was assigned to the CC subgroup corresponding to the highest level secondary diagnosis. Multiple secondary diagnoses at one level did not cause a patient to be assigned to a higher subgroup. The categorization of a diagnosis as non-CC, CC, or MCC was uniform across the CMS DRGs, and there were no modifications for specific DRGs. As part of the FY 1995 IPPS proposed rule, we made a complete file of the revised DRG descriptions available to the public. However, we never adopted the revised DRGs (55 FR 27756).

e. Medicare Severity DRGs (MS–DRGs)

We had several options in developing a refinement to the current CMS DRGs to better recognize increased resource use due to severity of illness. One option would involve simply taking the work performed in 1994 and then updating it with all the code changes that have taken place since then. We were reluctant to do this because of changes in medical practices as well as the substantial changes in ICD–9–CM codes since that time. Another option would have been to build on current CMS DRGs which include a number of advancements that better identify medical practices and technologies. Many commenters on the FY 2007 IPPS proposed rule urged us to take the latter approach because they believed the current base CMS DRGs clearly differentiate between the complexities of varying surgical procedures and medical devices. Therefore, we chose the option of developing a new severity DRG system based on the current CMS DRGs.

The development of the 1994 Severity DRGs involved three steps:

- Consolidation of existing DRGs into base DRGs.
- Categorization of each diagnosis as an MCC, CC, or non-CC.
- Subdivision of each base DRG into subclasses based on CCs.

We reviewed and revised each of the three steps and applied them to our current CMS DRGs to develop DRGs that better identify severity of illness among Medicare patients. We refer to this system that we proposed (and are adopting in this final rule with comment period) as the Medicare Severity DRGs (MS–DRGs). The purpose of the MS–DRGs is to more accurately stratify groups of Medicare patients with varying levels of severity.

(1) Consolidation of Existing CMS DRGs into Base MS–DRGs

The first step in our process was the consolidation of existing CMS DRGs into new proposed base MS–DRGs. We combined together the 115 pairs of CMS DRGs that are subdivided based on the presence of a CC. We further consolidated the CMS DRGs that are split on the basis of a major cardiovascular condition, AMI with and without major complication (CMS DRGs 121 and 122), and cardiac catheterization with and without complex diagnoses (CMS DRGs 124 and 125). We also consolidated the three pairs of burn CMS DRGs that were defined based on the presence of a CC or a significant trauma (CMS DRGs 506 and 507; 508 and 509; and 510 and 511). Next, we consolidated the 43 pediatric CMS DRGs that are defined based on age less than or equal to 17. These pediatric CMS DRGs contain a very low volume of Medicare patients. As shown in Table 10 of the FY 2007 IPPS final rule (71 FR 48318), only two of these pediatric CMS DRGs contained more than 100 patients (CMS DRGs 298 and 333). Seventeen of these pediatric DRGs had no patients (CMS DRGs 30, 33, 41, 48, 54, 58, 137, 252, 255, 282, 330, 340, 343, 393, 405, 446, and 448). As we have stated frequently, our primary focus in maintaining the CMS DRGs is to serve the Medicare population. We do not have the data or the expertise to maintain the DRGs in clinical areas that are not relevant to the Medicare population. We continue to encourage users of the CMS DRGs (or MS–DRGs that are being adopted) to make relevant adaptations if they are being used for a non-Medicare patient population.

In addition to the pediatric CMS DRGs defined by the age of the patient, there are a number of CMS DRGs that relate primarily to the pediatric or adult population that have very low volume in the Medicare population, such as male sterilization, tubal interruptions, circumcisions, tonsillectomies, and myringotomies. These CMS DRGs were consolidated into the most clinically similar MS–DRG.

Over the past two decades, the site of service for some elective procedures such as carpal tunnel release, cataract extraction, and laparoscopy has shifted from the inpatient to the outpatient setting, resulting in the CMS DRGs associated with these procedures having very low volume. These CMS DRGs were also consolidated into the most clinically similar MS–DRG. In addition, there were some clinically related CMS DRGs that had significant Medicare patient volume but had no significant difference in resource use. For example, thyroid (CMS DRG 290) and parathyroid (CMS DRG 289) procedures were virtually identical in terms of hospital resource use and were, therefore, consolidated. In total, 34 of these CMS DRGs were consolidated. The DRG consolidations are summarized in Table F below.

Four pairs of MS–DRGs (223 and 224; 228 and 229; 323 and 324; and 551 and 552) were defined based on the presence of a CC or some other condition. For example, MS–DRG 323 is defined based on the presence of a CC or the performance of extracorporeal shock

wave lithotripsy. For these MS–DRGs, the CC condition was removed and the pair of DRGs remains separate but defined based only on the other condition (that is, MS–DRG 323 became urinary stones with extracorporeal shock wave lithotripsy). As was done in the 1994 severity DRG work, we did not consolidate any of the CMS DRGs for maternity or newborn cases.

Before proceeding further, we made one additional change to a base DRG assignment after completing these consolidations. We assigned cranial-facial bone procedures to a new base DRG (Cranial/Facial Bone Procedures). These cases were previously assigned to DRGs 52 and 55 through 63. We also created a new base DRG, MS–DRG 245 (Automatic Implantable Cardiac Defibrillator (ACID) Lead and Generator Procedures). This DRG was created by removing automatic implantable cardiac defibrillator leads and generator procedures from the pacemaker DRG (CMS DRG 551; now new MS–DRGs 242 through 244).

Table F below shows how DRGs in the CMS DRGs (Version 24.0) were consolidated into new base MS DRGs. We refer readers to section II.D.2. of the preamble of the proposed rule and this final rule with comment period for a detailed discussion of CCs and MCCs under the MS–DRG system.

TABLE F.—DRG CONSOLIDATION

CMS–DRG version 24.0	DRG description	MS–DRGs version 25.0	New base MS–DRG description
6	Carpal Tunnel Release	40 41 42	Peripheral & Cranial Nerve & Other Nervous System Procedure with MCC, with CC, and without CC/MCC.
7, 8	Peripheral & Cranial Nerve & Other Nervous System Procedure.		
36	Retinal Procedures	116 117	Intraocular Procedures with and without CC/MCC.
38	Primary Iris Procedures.		
39	Lens Procedures with or without Vitrectomy.		
42	Intraocular Procedures Except Retina, Iris & Lens.		
43	Hyphema	124 125	Other Disorders of the Eye with and without MCC.
46, 47, 48	Other Disorders of the Eye.		
50	Sialoadenectomy	139	Salivary Gland Procedures.
51	Salivary Gland Procedures Except Sialoadenectomy.		
52	Cleft Lip & Palate Repair	133	Other Ear, Nose, Mouth & Throat O.R. Procedures with and without CC/MCC.
55	Miscellaneous Ear, Nose, Mouth & Throat Procedures.		
56	Rhinoplasty	131 132	New DRG—Cranial/Facial Bone Procedures with and without CC/MCC.
57, 58	Tonsillectomy & Adenoidectomy Procedure, Except Tonsillectomy &/or Adenoidectomy Only.		
59, 60	Tonsillectomy &/or Adenoidectomy Only.		
61, 62	Myringotomy with Tube Insertion.		
63	Other Ear, Nose, Mouth & Throat O.R. Procedures.		
67	Epiglottitis	152 153	Otitis Media & Upper Respiratory Infection with and without MCC.
68, 69, 70	Otitis Media & Upper Respiratory Infection.		
71	Laryngotracheitis.		
72	Nasal, Trauma & Deformity	154 155 156	Other Ear, Nose, Mouth & Throat Diagnoses with MCC, with CC, without CC/MCC.
73, 74	Other Ear, Nose, Mouth & Throat Diagnoses.		
185, 186	Dental & Oral Diseases Except Extractions & Restorations.	157 158 159	Dental & Oral Diseases with MCC, with CC, without CC/MCC.
187	Dental Extractions & Restorations.		
199	Hepatobiliary Diagnostic Procedure for Malignancy.	420 421 422	Hepatobiliary Diagnostic Procedures with MCC, with CC, without CC/MCC.
200	Hepatobiliary Diagnostic Procedure for Non-Malignancy.		

TABLE F.—DRG CONSOLIDATION—Continued

CMS–DRG version 24.0	DRG description	MS–DRGs version 25.0	New base MS–DRG description
244, 245	Bone diseases & Specific Arthropathies	553 554	Bone Diseases & Arthropathies with and without MCC.
246	Non-Specific Arthropathies.		
259, 260	Subtotal Mastectomy for Malignancy*	584 585	Breast Biopsy, Local Excision & Other Breast Procedures with and without CC/MCC.
261	Breast Procedures for Non-Malignancy Except Biopsy & Local Excision.		
262	Breast Biopsy & Local Excision for Non-Malignancy.		
267	Perianal & Pilonidal Procedures	579 580 581	Other Skin, Subcutaneous Tissue & Breast Procedures with MCC, with CC, without CC/MCC.
268	Skin, Subcutaneous Tissue & Breast Plastic Procedures.		
269, 270	Other Skin, Subcutaneous Tissue & Breast Procedure.		
289	Parathyroid Procedures	625 626 627	Thyroid, Parathyroid & Thyroglossal Procedures with MCC, with CC, without CC/MCC.
290	Thyroid Procedures.		
291	Thyroglossal Procedures.		
294	Diabetes > 35	637	Diabetes with MCC, with CC, without CC/MCC.
295	Diabetes < 35.		
338	Testes Procedures for Malignancy	711 712	Testes Procedures with and without CC/MCC.
339, 340	Testes Procedures, Non-Malignancy.		
342, 343	Circumcision	.....	Procedure 64.0 changed to non-O.R. Cases with only this procedure will go to medical DRGs.
351	Sterilization, Male	729 730	Other Male Reproductive System Diagnoses with and without CC/MCC
352	Other Male Reproductive System Diagnoses.		
361	Laparoscopy & Incisional Tubal Interruption	744 745	D&C, Conization, Laparascopy & Tubal Interruption with and without CC/MCC.
362	Endoscopic Tubal Interruption.		
363	D&C, Conization & Radio-Implant, for Malignancy.		
364	D&C, Conization Except for Malignancy.		
411	History of Malignancy without Endoscopy	843 844 845	Other Myeloproliferative Disease or Poorly Differentiated Neoplasm Diagnosis with MCC, with CC, without CC/MCC.
412	History of Malignancy with Endoscopy.		
413, 414	Other Myeloproliferative Disease or Poorly Differentiated Neoplasm Diagnosis.		
465	Aftercare with History of Malignancy as Secondary Diagnosis.	949	Aftercare with and without.
466	Aftercare without History of Malignancy as Secondary Diagnosis.	950	CC/MCC.

*Codes 85.22 and 85.23 in CMS DRGs 259 and 260 were moved to MS–DRG 582 and 583.

As summarized in Table G, the consolidation resulted in the formation of 335 base MS–DRGs.

TABLE G.—CONSOLIDATION OF CURRENT CMS DRGS INTO MS DRGS

	Number
Current CMS DRGs	538
Elimination of CC subgroups	−114
Elimination of MCC subgroups	−7

TABLE G.—CONSOLIDATION OF CURRENT CMS DRGS INTO MS DRGS—Continued

	Number
Elimination of CC complexity subgroups	−5

TABLE G.—CONSOLIDATION OF CURRENT CMS DRGS INTO MS DRGS—Continued

	Number
Elimination of age 0–17 subgroups	−43
Consolidation due to volume or resource similarity	−34
New DRG	+1
Revised Base DRGs	311
Newborn, maternity and error DRGs	+24
Base DRGs for severity subdivision	335

The end result of the consolidation of the CMS DRGs in the MS–DRGs was similar to the consolidation performed in the 1994 severity DRGs. The 1994 DRG consolidations resulted in 356 base DRGs plus 2 error DRGs. The number of the 1994 base DRGs is different because new CMS DRGs have been added since 1994, the 43 age 0–17 pediatric CMS DRGs were not consolidated, and some of the volume shifts to outpatient care had not yet occurred in 1994. In the 1994 severity DRGs, 24 DRGs were consolidated due to volume or resource similarity. Sixteen of these 1994 DRG consolidations are included in the 34 consolidations done in the 2007 consolidations. However, due to concerns expressed by our physician consultants, 8 of the DRG consolidations from 1994 were not done. For example, interstitial lung disease (DRGs 92 and 93) was not consolidated with simple pneumonia and pleurisy (DRGs 89, 90, 91) as was done in the 1994 consolidations.

Comment: One commenter expressed concern that the focus of MS–DRGs was on the Medicare population. As a result of this focus, many of the DRGs reflect severity and resource use only for the Medicare population. The commenter stated that certain diagnoses present differently at different ages or actually represent a different disease process. For instance, the commenter stated that hypertension in a child represents a very different disease than for adults. The commenter also stated that CMS DRGs 569 and 570 (Major Small and Large Bowel Procedures with CC and with or without Major Gastrointestinal Diagnosis, respectively) have different costs for a Medicare patient than a child. The commenter also indicated that CMS did not perform updates to MDC 14 (Obstetrics) and MDC 14 (Newborns and Other Neonates with Problems Arising in the Perinatal Period). The commenter stated that the MS-DRGs will not work well for other populations.

Response: The MS–DRGs were specifically designed for purposes of Medicare hospital inpatient services payment. As we stated above, we generally use MedPAR data to evaluate possible DRG classification changes and recalibrate the DRG weights. The MedPAR data only represent hospital inpatient utilization by Medicare beneficiaries. We do not have comprehensive data from non-Medicare payers to use for this purpose. The Medicare program only provides health insurance benefits for people over the age of 65 or who are disabled or suffering from end-stage renal disease. Therefore, newborns, maternity, and pediatric patients are not well-represented in the MedPAR data that we used in the design of the MS–DRGs. We simply do not have enough data to establish stable and reliable DRGs and relative weights to address the needs of non-Medicare payers for pediatric, newborn, and maternity patients. For this reason, we encourage those who want to use MS–DRGs for patient populations other than Medicare make the relevant refinements to our system so it better serves the needs of those patients.

(2) Categorization of Diagnoses

We decided to establish three different levels of CC severity into which we would subdivide the diagnosis codes. The proposed three levels are MCC, CC, and non-CC. Diagnosis codes classified as MCCs reflect the highest level of severity. The next level of severity includes diagnosis codes classified as CCs. The lowest level is for non-CCs. Non-CCs are diagnosis codes that do not significantly affect severity of illness and resource use. Therefore, secondary diagnoses that are non-CCs do not affect the DRG assignment under either the CMS DRGs or the MS–DRGs.

The categorization of diagnoses as an MCC, CC, or non-CC was accomplished using an iterative approach in which each diagnosis was evaluated to determine the extent to which its presence as a secondary diagnosis resulted in increased hospital resource use. In order to begin this iterative process, we started with an initial categorization of each diagnosis as an MCC, CC, or non-CC. As noted previously, the 1994 CC revision began by separating CCs into MCC and CC based on the AP–DRG major CCs. One way to begin this iterative process would have been to use the 1994 CC categorization. However, the 1994 CC categorization was based on FY 1992 data and ICD–9–CM diagnosis codes, which now are 15 years old. Since 1992, 1,897 new diagnosis codes have been added, and 346 diagnosis codes have been deleted. Because the revised CC list (explained in section II.C.2.a. of this preamble) was based on current ICD–9–CM codes and used recent data, we decided to utilize the revised CC list rather than the 1994 categorization as our starting point for determining whether each secondary diagnosis should be an MCC, a CC, or a non-CC.

The revised CC list categorizes each diagnosis as a CC or a non-CC. We decided to use this list in combination with the categorization under the AP–DRGs and the APR DRGs. The AP–DRGs and the APR DRGs are updated annually with current codes and provide a good comparison source to use with the revised CC list. We designated as an MCC any diagnosis that was a CC in the revised CC list and was an AP–DRG major CC and was an APR DRG default severity level 3 (major) or 4 (extensive). We designated as a non-CC any diagnosis that was a non-CC in the revised CC list and was an AP–DRG non-CC and was an APR DRG default severity level of 1 (minor). Any diagnoses that did not meet either of the above two criteria was designated as a CC.

The only exception to our approach was for diagnoses related to newborns, maternity, and congenital anomalies. These diagnoses are very low volume in the Medicare population and were not reviewed for purposes of creating the revised CC list. We used the APR DRGs to categorize these diagnoses. For newborn, obstetric, and congenital anomaly diagnoses, we designated the APR DRG default severity level 3 (major) and 4 (extreme) diagnoses as an MCC, the APR DRG default severity level 2 (moderate) diagnoses as a CC, and the APR DRG default severity 1 (minor) diagnoses as a non-CC. Table H summarizes the number of codes in each CC category.

TABLE H.—INITIAL CATEGORIZATION OF CC CODES

	Number of codes
MCC	1,096
CC	4,221
Non CC	8,232
Total	13,549

This initial CC categorization of diagnosis codes was used to begin the iterative process of determining the proposed final CC categorization for each diagnosis code.

(3) Additional CC Exclusions

For some CMS DRGs, the presence of specific secondary diagnoses affects the base DRG assignment. For example, in MDC 5 (Diseases and Disorders of the Circulatory System), the presence of an AMI code as the principal diagnosis or as a secondary diagnosis will cause the patient to be assigned to the AMI DRGs (CMS DRGs 121 through 123). Therefore, if the AMI code is present as a secondary diagnosis, it should not be used to assign the CC category for a patient because it is redundant within the definition of the base DRG. Similarly, for MDC 24 (Multiple Significant Trauma), specific combinations of significant trauma as principal or secondary diagnosis cause the assignment to the multiple trauma DRGs (CMS DRGs 484 through 487). Therefore, any secondary diagnosis of trauma is redundant with the definition of the multiple trauma DRGs and should not be used to determine the CC category for a patient. Any secondary diagnoses that are used to assign a specific proposed base MS–DRG were excluded from the determination of the CC category for patients assigned to that base MS–DRG.

Comment: Several commenters asked that we make changes to the CC and exclusion list for codes associated with sepsis. The commenters stated that two Systemic Inflammatory Response Syndrome (SIRS) codes, 995.91 (Sepsis) and 995.92 (Severe sepsis) are CCs under MS–DRGs. The commenters believed that if a patient has SIRS and pneumonia, both conditions should be coded, and that this coding would result in a patient admitted with SIRS being assigned to MS–DRG 871 (Septicemia without Mechanical Ventilation with MCC). The commenters stated that the pneumonia would count as a MCC in this case. The commenters requested that CMS exclude pneumonia from being a MCC when it occurs with sepsis. The commenters believed pneumonia should be excluded as an MCC for a patient with sepsis because it is an underlying and related condition, and that these patients should not be assigned to MS–DRG 871. The commenters stated that the other SIRS codes, 995.93 (Systemic Inflammatory Response Syndrome due to noninfectious process without acute organ dysfunction) and 995.94 (Systemic Inflammatory Response Syndrome due to noninfectious process with acute organ dysfunction) are excluded from acting as a CC for pancreatitis (code 577.0). The commenters asked that CMS not exclude codes 995.93 and 995.94 with code 577.0.

Response: The commenters are mistaken about codes 995.91 and 995.92. While these two codes are not CCs, they are on the MCC list. Our data and the judgment of our medical advisors support the assignment of these codes to the MCC list. Furthermore, we do not believe it is appropriate to exclude pneumonia as an MCC for sepsis and severe sepsis. These patients would be at an extremely high level of severity. SIRS is not always associated with pneumonia but when it is, the patient is at a higher severity level. Therefore, we are not making this change to the CC exclusion list by excluding pneumonia codes from acting as a MCC with code 995.91 and 995.92. On the second issue the commenters raised, they are incorrect that codes 995.91 and 995.92 are excluded from acting as a CC for code 577.0. These codes are not on the CC exclusion list for code 577.0. Therefore, both would act as a MCC for code 577.0. We are not making any changes to the CC exclusion list as a result of these comments.

(4) Analysis of Secondary Diagnoses

The 311 base MS–DRGs (335 total base DRGs minus the MDC 14, MDC 5, and error DRGs) were subdivided into three CC subgroups. Patients were assigned to the subgroup corresponding to the most extreme CC present. All but four of the base MS–DRGs had strictly monotonically increasing average charges across the three CC subgroups (that is, average charges progressively increased from the non-CC to the CC to the MCC subgroups). The four MS–DRGs that failed to have monotonically increasing charges all had at least one CC subgroup with very low volume. For example, the non CC subgroup for the pancreas transplant DRG (CMS DRG 513) had only 2 cases. The overall statistics by CC subgroup for the 311 base MS–DRG are contained in Table I. Patients in the MCC subgroup have average charges that are nearly double the average charges for patients in the CC subgroup. The CC subgroup with the largest number of patients is the non-CC subgroup with 41.1 percent of the patients.

TABLE I.—OVERALL STATISTICS FOR MS–DRGS EXCLUDING THOSE IN MDCS 14 AND 15

CC subgroup	Number of cases	Percent	Average charges
Major	2,604,696	22.2	$44,246
CC	4,293,744	36.6	24,131
Non-CC	4,818,411	41.1	18,435

In order to evaluate the initial assignment of secondary diagnoses to the three CC subclasses, we devised a system that determined the impact on resource use of each secondary diagnosis. For each secondary diagnosis, we measured the impact in resource use for the following three subsets of patients:

(a) Patients with no other secondary diagnosis or with all other secondary diagnoses that are non-CCs.

(b) Patients with at least one other secondary diagnosis that is a CC but none that is an MCC.

(c) Patients with at least one other secondary diagnosis that is an MCC.

Numerical resource impact values were assigned for each diagnosis as follows:

Value	Meaning
0	Significantly below expected value for the non-CC subgroup.
1	Approximately equal to expected value for the non-CC subgroup.
2	Approximately equal to expected value for the CC subgroup.
3	Approximately equal to expected value for the MCC subgroup.
4	Significantly above the expected value for the MCC subgroup.

Each diagnosis for which Medicare data were available was evaluated to determine its impact on resource use and to determine the most appropriate CC subclass (non-CC, CC, or MCC) assignment. In order to make this determination, the average charge for each subset of cases was compared to the expected charge for cases in that

subset. The following format was used to evaluate each diagnosis:

Code	Diagnosis	Cnt1	C1	Cnt2	C2	Cnt3	C3

Count (Cnt) is the number of patients in each subset and C1, C2, and C3 are a measure of the impact on resource use of patients in each of the subsets. The C1, C2, and C3 values are a measure of the ratio of average charges for patients with these conditions to the expected average charge across all cases. The C1 value reflects a patient with no other secondary diagnosis or with all other secondary diagnoses that are non-CCs. The C2 value reflects a patient with at least one other secondary diagnosis that is a CC but none that is a major CC. The C3 value reflects a patient with at least one other secondary diagnosis that is a major CC. A value close to 1.0 in the C1 field would suggest that the code produces the same expected value as a non-CC diagnosis. That is, average charges for the case are similar to the expected average charges for that subset and the diagnosis is not expected to increase resource usage. A higher value in the C1 (or C2 and C3) field suggests more resource usage is associated with the diagnosis and an increased likelihood that it is more like a CC or major CC than a non-CC. Thus, a value close to 2.0 suggests the condition is more like a CC than a non-CC but not as significant in resource usage as an MCC. A value close to 3.0 suggests the condition is expected to consume resources more similar to an MCC than a CC or non-CC. For example, a C1 value of 1.8 for a secondary diagnosis means that for the subset of patients who have the secondary diagnosis and have either no other secondary diagnosis present, or all the other secondary diagnoses present are non-CCs, the impact on resource use of the secondary diagnoses is greater than the expected value for a non-CC by an amount equal to 80 percent of the difference between the expected value of a CC and a non-CC (that is, the impact on resource use of the secondary diagnosis is closer to a CC than a non-CC).

Table J below shows examples of the results.

TABLE J.—EXAMPLES OF IMPACT ON RESOURCE USE OF SECONDARY DIAGNOSES

Code	Cnt1	C1	CntC2	C2	Cnt3	C3	CC subclass
401.1, Benign essential hypertension	12,308	0.955	40,113	1.715	5,297	2.384	Non CC.
530.81, Esophageal reflux	294,673	0.986	917,058	1.639	122,076	2.302	Non CC.
560.1, Paralytic Ileus	10,651	1.466	87,788	2.320	51,303	3.226	CC.
491.20, Obstructive chronic bronchitis	7,003	1.416	32,276	2.193	13,355	3.035	CC.
410.71, Subendocardial infarction initial episode	1,657	2.245	30,226	2.778	42,862	3.232	MCC.
518.81, Acute respiratory failure	5,332	2.096	118,937	2.936	223,054	3.337	MCC.

The resource use impact reports were produced for all diagnoses except obstetric, newborn, and congenital anomalies (10,690 diagnoses). These mathematical constructs were used as guides in conjunction with the judgment of our clinical staff to classify each secondary diagnosis reviewed as an MCC, CC or non-CC. Our clinical panel reviewed the resource use impact reports and modified 14.9 percent of the initial CC subclass assignments as summarized in Table K below. The rows in the table are the initial CC subclass categories and the columns are the final CC subclass categories.

Comment: Several commenters acknowledged the detailed description of the methodology used in categorizing secondary diagnoses as MCCs, CCs, or non-CCs. While they were appreciative of the detailed iterative process outlined in the proposed rule (72 FR 24702), the commenters requested that CMS provide the numerical values (the C1 to C3 values) that were assigned to classify each diagnosis as an MCC, CC or non-CC.

Response: We agree that it would be helpful to share the data we developed and used for each individual code as part of our CC evaluation process. We will post this data on the CMS Web site at: *http://www.cms.hhs.gov/AcuteInpatientPPS/* under the Downloads section.

TABLE K.—CC SUBCLASS MODIFICATIONS

Initial CC subclass	Final CC subclass				
	MCC	CC	Non-CC	Total	Percent
MCC	847	62	0	909	8.5
CC	542	2,579	737	3,858	36.1
Non-CC	0	272	5,651	5,923	55.4
Total	1,389	2,913	6,388	10,690	.....
Percent	13.0	27.2	59.8	.....	.....

Of the diagnoses initially designated as an MCC, 6.8 percent were made a CC (62/909), and of the diagnoses initially designated as non-CC, 4.6 percent were made a CC (272/5,923). The major shift occurred in the diagnoses initially assigned to the CC subclass. Fourteen percent of the diagnoses initially designated as a CC were made an MCC (542/3858), and 19.1 percent of the diagnoses initially designated a CC were made a non-CC (737/3,858). In determining the CC subclass assigned to a diagnosis, imprecise codes were, in general, not assigned to the MCC or CC

subclass. For example, the congestive heart failure codes have the following CC subclass assignments:

Code	CC subclass assignment
428.21, Acute systolic heart failure	MCC.
428.41, Acute systolic & diastolic heart failure	MCC.
428.43, Acute on chronic systolic heart failure	MCC.
428.31, Acute diastolic heart failure	MCC.
428.33, Acute on chronic diastolic heart failure	MCC.
428.1, Left heart failure	CC.
428.20, Systolic heart failure NOS	CC.
428.22, Chronic systolic heart failure	CC.
428.32, Chronic diastolic heart failure	CC.
428.40, Systolic & diastolic heart failure	CC.
428.0, Congestive heart failure NOS	Non-CC.
428.9, Heart failure NOS	Non-CC.

The acute heart failure codes are MCCs, and the chronic heart failure codes are CCs. However, Not Otherwise Specified (NOS) heart failure codes are non-CCs. Thus, the precise type of heart failure must be specified in order for an MCC or CC to be assigned.

There are currently 13,549 ICD–9–CM diagnosis codes. The external cause of injury and poisoning codes (E800 through E999) and congenital abnormality codes were not included in our current CC review for the MS–DRGs. We excluded the external cause of injury and poisoning codes from consideration as an MCC or a CC because they describe how an injury occurred, and not the exact nature of the injury. For instance, if a patient fell on the deck of a boat and fractured his or her skull, one would assign an E code to describe the fall on the boat. A separate diagnosis code would be assigned to describe the exact nature of any resulting injury such as a contusion, fractured bone, or skull fracture and concussion. A patient would be assigned to a severity level based on the exact nature of the injury and not the manner in which the injury occurred. Therefore, we decided not to classify any of the E codes as either an MCC or a CC. The congenital abnormality codes describe abnormalities when a baby is born. At times, a beneficiary may live with these congenital abnormalities for years without a problem. The congenital abnormalities may later lead to complications that require hospital admissions. Should these congenital abnormalities lead to medical problems that result in a hospital admission for a Medicare beneficiary, the exact nature of the condition being treated would also be assigned a code. This more precise code would be evaluated to determine whether or not it was an MCC or a CC. Therefore, we decided not to classify congenital abnormality codes as an MCC or a CC, but to instead use the other reported diagnosis codes that better describe the reason for the admission. Excluding the external cause of injury codes, we reviewed 10,690 diagnosis codes.

As was done in our 1994 severity proposal, diagnoses that were closely associated with patient mortality were assigned different CC subclasses, depending on whether the patient lived or died. These diagnoses are:

- 427.41, Ventricular fibrillation
- 427.5, Cardiac arrest
- 785.51, Cardiogenic shock
- 785.59, Other shock without mention of trauma
- 799.1, Respiratory arrest

Resource use for patients with these diagnoses who were discharged alive was consistent with an MCC. Resource use for patients with these diagnoses who died was consistent with a non-CC. Further, most patients who died could legitimately have one of these diagnoses coded. As a result, these diagnoses are assigned an MCC subclass for patients who lived and a non-CC subclass for patients who died.

For some secondary diagnoses assigned to the CC subclass, our medical advisors identified specific clinical situations in which the diagnosis should not be considered a CC. In such clinical situations, the CC exclusion list was used to exclude the secondary diagnosis from consideration in determining the CC subgroup, essentially making the secondary diagnosis a non-CC. For example, primary cardiomyopathy (code 425.4) is designated as a CC. However, for patients admitted for congestive heart failure, our medical advisors believed that primary cardiomyopathy should be treated as a non-CC. In order to accomplish that, the congestive heart failure principal diagnoses were added to the CC exclusion list for primary cardiomyopathy as a secondary diagnosis.

The list of diagnosis codes that we proposed to classify as an MCC (which we are adopting in this final rule with comment period) was included in Table 6J in the Addendum to FY 2008 IPPS proposed rule. The diagnosis codes that we proposed to classify as a CC (which are adopting in this final rule with comment period) were included in Table 6K in the Addendum to the proposed rule. The E-codes, which are diagnosis codes used to classify external causes of injury and poisoning, are not included in this list. All E codes are designated as non-CCs under the current CMS DRG system and our evaluation supports this non-CC designation as appropriate. We are including a list of changes to the MCC and CC lists as a result of public comments on the proposed rule later in section II.G.13. of the preamble of this final rule with comment period. We will post a complete final list of the MCC and CC codes on the CMS Web site at: *http://www/cms/hhs/gov/AcuteInpatientPPS/* under the Files for Download section.

Comment: One commenter supported the basic methodology used to identify MCCs and CCs. The commenter's analysis of discharge data generally confirms the notion that the presence of chronic disease does not usually have material impact on the expected cost of care. The commenter agreed that the emphasis on acute manifestations of chronic diseases is both clinically and financially appropriate. The commenter stated that the current CC list is nearly 25 years old and does not reflect the extent to which clinical practice has changed during that period, with concomitant changes in expected resource use. The commenter further stated that the current CC list also does not reflect the nature of changes in coding practices during that period, changes that have undermined the value of the current CC list. The commenter stated that the elimination of common secondary diagnoses such as code 428.0 (Congestive heart failure, unspecified)

and code 427.31 (Atrial fibrillation) from the CC list will help to restore CC status as a meaningful indicator of differential expected resource use. The commenter also believed that elimination of these diagnosis codes will address the current situation in which nearly 80 percent of Medicare discharges contain one or more CCs.

Response: We agree that it was important to perform a careful review of the CC list to develop lists that more accurately identify patients with significantly different severity levels. We believe that by using both statistical data as well as input from our medical advisors, we were able to develop the MCCs and CCs that do a much better job of classifying Medicare patients with varying levels of severity. We also agree that is important to remove chronic diagnoses from the CC list that do not have a significant impact on severity. We also believe that nonspecific codes such as code 428.0 should not be included on the CC list. The ICD–9–CM coding system has more specific codes to identify the specific type of heart failure. These more specific codes have data supporting their inclusion on the MCC and CC list. Our medical advisors also supported the inclusion of the more specific heart failure codes on the MCC and CC list. We also agree that patients with atrial fibrillation (code 427.31) do not necessarily have a higher level of severity. The Medicare data suggest that when this condition appears on the claim and the patient has no other secondary diagnosis that is a CC, the charge data suggest the condition produces an expected value for a non-CC rather than a CC case. Further in the judgment of our medical advisors, the condition should not be on the CC list. When the atrial fibrillation leads to additional cardiac problems, the additional problems may be represented by codes that are on the MCC or CC list. We agree that by removing codes from the CC list that do not contribute to significantly higher levels of severity, we can better recognize severity of illness and more accurately reimburse hospitals.

We spent extensive time carefully reviewing the ICD–9–CM diagnosis codes to develop the MCC and CC list. Our current CC list for Version 24.0 of the CMS DRGs contains 3,326 codes. The MS–DRGs have 3,342 codes on the MCC list and 4,922 codes on CC list. While we did remove codes from the CC list and add others to the list, we believe that the end result is a better classification of conditions for identifying differences in severity of illness. We appreciate the commenter's support for our efforts.

Comment: Several commenters supported the MCC and CC lists as a better means of identifying severity. The commenters recommended that CMS consider adopting the revised CC list in FY 2008 as an interim step toward IPPS reform. The commenters recommended that CMS delay implementation of the new severity system until FY 2009 but adopt the revised CC list in FY 2008. The commenters stated that by implementing the revised CC list in FY 2008, CMS could move forward in its goal of utilizing a system that more accurately recognizes the severity of illness of patients. The commenters believed this option would allow a more accurate DRG system to be in place while CMS is evaluating the final RAND report to determine which severity-based DRG system to propose for implementation in FY 2009.

Another commenter who supported the move to MS–DRGS and CMS' efforts in creating the MCC and CC lists stated that it had been working with CMS for years to develop a mechanism to appropriately account for the resources involved in the care of patients with severe sepsis. The commenter believed that the MS–DRGs in which severe sepsis is recognized as a major complication, along with acute respiratory distress syndrome, organ failure, and other conditions where resource use is more intense, will go a long way towards better recognition of severity of illness.

One commenter applauded CMS for the work it has put into developing a system that will consider complexity of care as well as severity of illness in determining Medicare payment for hospital inpatient services. The commenter particularly supported the recognition of hemophilia and end-stage renal disease as MCCs. The commenter stated that these conditions clearly meet the criteria for treatment as MCCs because they often require ''expensive and technologically complex'' services that lead to substantially increased resource use and reflect the highest level of severity. The commenter encouraged CMS to add other diagnoses as the evidence warrants.

Response: Comments and responses on whether to implement MS–DRGs in FY 2008 or at a later date are discussed in detail in section II.D. of the preamble of this final rule with comment period. We appreciate the support for our efforts in creating the MCC and CC lists and agree that it is important to examine data using the system and continue to refine the MCC and CC lists.

Comment: One commenter commended CMS on the systematic way it reviewed 13,549 secondary diagnosis codes to evaluate their assignment as a CC or non-CC using a combination of mathematical data and the judgment of its medical advisors. The commenter stated that, as part of the effort to better recognize severity of illness, CMS conducted the most comprehensive review of the CC list since the creation of the DRG classification. However, the commenter disagreed with the classification of many common secondary diagnoses as non-CCs. Specifically, the commenter questioned threshold levels that were used and at what point in the analysis CMS decided that a code was not a CC. For example, the commenter asked what was considered ''intensive monitoring,'' inquiring whether intensive monitoring refers to additional nursing care on a daily basis, additional testing, intensive care unit care, extended length of stay, all of these factors, or some other factor. In some instances, the commenter noted that similar or comparable codes within the same group have remained a CC/MCC, while other clinically similar codes or codes requiring similar resources may have been omitted. Without greater transparency, and a code-by-code explanation, the commenter was unable to determine why significant secondary diagnoses requiring additional resources have been removed from the CC list. For the most part, the commenter's analysis concentrated on reviewing current CCs that have been omitted from the revised CC list.

The commenter made the following overall recommendations with regard to the CC list:

- CMS should make the final revised CC list publicly available as quickly as possible so that hospitals may focus on understanding the impact of the revised CC list, training and educating their coders, and working with physicians for any documentation improvements required to allow the reporting of more specific codes where applicable.
- CMS should consider additional refinements to the revised CC list and, in particular, address issues where the ICD–9–CM codes may need to be modified to provide the distinction between different levels of severity.
- In situations where a new code is required, CMS should default to leaving the codes as CCs until new codes can be created.

Response: The process of evaluating both claims data and clinical issues is a challenging one. Our medical advisors performed an extensive evaluation of codes for the MCC and CC lists, combining their medical judgment and claims data. We have reviewed a number of specific codes raised by

commenters and considered whether or not the codes should be a MCC or CC. These numerous code requests are discussed below. Also, as mentioned earlier, we plan to post the data we used to evaluate each code on the CMS Web site. These data may assist the public in making recommendations for additional changes to the MCC and CC lists. Any revisions made to the MS–DRGs or the MCC and CC lists are being made available with this final rule with comment period. As suggested by the commenter, we plan to evaluate further refinements to the MCC and CC lists each year as we obtain additional recommendations and data under the MS–DRG system.

Comment: One commenter acknowledged the significant effort and consideration CMS has given to developing both the mathematical and clinical judgment criteria in determining severity classifications. However, the commenter did not believe it was possible to fully assess the assignment of diagnosis codes in the severity classification because there was an incomplete description of the process in the proposed rule.

Response: As stated earlier, we plan to post on the CMS Web site the data used in analyzing how to classify each ICD–9–CM code as an MCC, CC, or non-CC. Our process for making CC/MCC decisions was an iterative one involving data review and clinical analysis. In the FY 2008 IPPS proposed rule (72 FR 24702 through 24705), we explained in detail our methodology for determining whether a secondary diagnosis qualified as an MCC, CC, or non-CC. Although posting these data results on the CMS Web site may be helpful in illustrating for commenters the data we used in classifying conditions as MCCs, CCs or non-CCs, we note that these data were combined with clinical judgment to make the final determinations. That is, the data were used as an adjunct to the judgment of our medical advisors. Clinical judgment may differ by individual physician. Thus, the data alone may be helpful but not definitive in helping commenters understand the reasons for some of our decisions. Nevertheless, we welcome further public input on potential revisions to the MCC and CC lists for FY 2009. We anticipate making updates to the MCC and CC lists each year as we receive additional recommendations and data. Again, below we respond to comments about specific codes.

Comment: One commenter commended CMS for undertaking a long-overdue comprehensive review and revision of the CC list. However, the commenter stated that more industry input is needed regarding the revised CC and MCC designations in the MS–DRG system. The commenter stated that the brevity of the public comment period, in combination with insufficient detail associated with the process and rationale for categorization of diagnoses as MCCs, CCs, and non-CCs, made it very difficult to conduct a thorough analysis of all of the codes on the MCC and CC lists. Another commenter stated that its members have only had an opportunity to do a cursory comparison of the current CMS CC list to the MS–DRG MCC and CC lists. The commenter stated that it should have the ability to do a complete analysis prior to implementation. The commenter believed such a review would be time intensive and likely to take a number of months of information exchange before it could be completed. Although the commenter acknowledged that the MCC and CC lists were included in the **Federal Register** notice and posted on the CMS Web site, the commenter believed the review was hampered by a lack of GROUPER software and a GROUPER Definitions Manual from being able to complete their review. The commenter also expressed concern that the analysis of secondary diagnoses was based on charges instead of costs. The commenter stated that if CMS' intent is to convert to a cost-based structure, a determination of the impact of secondary diagnoses should not be based on charges. The commenter added that this analysis appeared to be inconsistent with the evolution to a cost-based DRG weight system.

Response: We recognize the extensive time that is required by the public in order to perform a review of the MCC and CC lists. However, we note that a DRG Definitions Manual and GROUPER have never been made available until after completion of the final rule in past years and public commenters never before suggested that we need to delay implementation of proposed changes to the IPPS. While we acknowledge that the changes proposed for FY 2008 are significantly more comprehensive than the changes we propose in a typical year, the base DRG assignments under the MS–DRGs are largely unchanged from the prior CMS DRGs. The major changes result from assignment of a case to a DRG severity level using the new classification of secondary diagnoses as MCCs, CCs or non-CCs. For this reason, we made extensive information available to allow public commenters to perform a variety of analyses. The proposed rule included comprehensive lists of the codes that we classified as MCCs and CCs, and we made this information available electronically on the CMS Web site. The FY 2006 MedPAR data that were used to simulate proposed rule policies were made available simultaneous with public display of the FY 2008 proposed rule. This data file included both the CMS DRG assigned to the case using the Version 24.0 GROUPER and the proposed MS–DRG assignment. Further, we provided—at no extra cost to the purchaser—an FY 2005 version of the MedPAR that also included the CMS and MS–DRG assignment at the case level. For these reasons, we do not believe the lack of availability of a GROUPER or a DRG Definitions Manual should have precluded commenters from being able to analyze the revised MCC and CC lists. In fact, we note that a number of public commenters did provide suggestions for further revisions to these lists, suggesting there was ample time to be able to do these analyses.

We have considered the suggestion that we analyze changes to the MCC and CC lists using average costs instead of charges. We adopted a cost-based weighting methodology because of our concern that differential markups among routine and ancillary services made charges a poor proxy for costs when setting relative weights for dissimilar types of cases. That is, different types of cases would use very different mixes of routine and ancillary services with variable markups and could create distortions in relative weights that are based on charges. However, we are less concerned about using charges when comparing cases that share the same primary diagnosis, which are likely to use similar mixes of services when deciding whether to make a DRG change. In these cases, we believe charges may provide a reasonable proxy for costs because the cases use similar services with similar markups.

The methodology that we use to develop cost-based weights is very complex and works well to give us a measure of relative average resource use when combining a high number of cases together in a single DRG. We would need to analyze whether a methodology that tries to determine average costs at the case or code level would provide reliable results for making decisions about MCCs and CCs or DRG changes. Nevertheless, we appreciate this comment and will continue to give it further consideration as we evaluate alternative approaches to updating the MCC and CC lists and the MS–DRGs in the future.

Comment: One commenter stated that CMS should address the inconsistencies

within the CC list identified by its physician and hospital reviewers. The commenter also recommended that, where necessary, CMS should obtain additional input from physicians in the appropriate specialties to determine the standard of care and consequent increased hospital resource use of some of the conditions. The commenter provided a list of conditions that were removed from the revised CC list and urged CMS to maintain them on the CC list.

Response: We agree that the review of codes for the MCC and CC list was a daunting task requiring careful review by our panel of medical advisors. We used a number of physicians in this process, including internists and surgeons, to evaluate the effect of specific codes on a patient's severity levels. When necessary, our panel contacted other medical specialists, such as orthopedists and oncologists, to obtain additional input. We appreciate the CC issues brought to our attention. We reexamined specific codes brought to our attention below. We expect that we will continue to revise and update both the CC list and MCC list as we gain experience and data under the MS–DRG system. We anticipate making additional changes in the future with this added information.

Comment: One commenter stated that, in some cases, the current ICD–9–CM classification system does not adequately distinguish between acute and chronic forms of a condition. In the MS–DRG system, this distinction appears to be critical in predicting resources utilized at the patient level. The commenter recommended that CMS work with the NCHS to make ICD–9–CM code modifications to improve this acute and chronic distinction. Additionally, the commenter suggested that CMS and HHS should take immediate steps for the adoption of ICD–10–CM, as this system is much better than ICD–9–CM at distinguishing clinical severity, which is a key aspect of any severity-adjusted DRG system. The commenter believed that continued use of ICD–9–CM severely limits the ability of a severity-adjusted DRG system to recognize severity of illness.

Response: We encourage anyone with specific recommendations for revisions to the ICD–9–CM diagnosis codes to contact Donna Pickett, National Center for Health Statistics, Centers for Disease Control and Prevention at: (301) 458–4434. Information on requesting changes to the ICD–9–CM diagnosis codes can be found on the Web site at: *http://www.cdc.gov/nchs/icd9.htm.* The Department is continuing to evaluate whether to move to ICD–10.

Comment: One comment disagreed with CMS' elimination of many chronic conditions from the CC list. The commenter stated that patient care resources are utilized to prevent acute exacerbation of a chronic condition. The commenter believed that to not include these conditions on a CC list is a major flaw in the logic. The commenter supported inclusion of chronic conditions on the CC list as means to recognize the resources utilized to manage these conditions effectively, whether they are currently in an acute phase. The commenter did not mention specific chronic conditions that should be added to the MCC and CC lists.

Response: We address comments on specific conditions below. However, as a general matter, we found the Medicare data do not generally support that chronic or ''unspecified'' conditions are more resource intensive than conditions with an acute manifestation of a chronic disease that are described by specific codes. After carefully considering this issue, our medical advisors agreed that unspecified or chronic conditions generally are not suggestive of a higher level of severity of illness in and of themselves when there are more specific codes available to further describe the patient's specific condition or an acute manifestation of a chronic disease. We note that unspecified and chronic conditions are very commonly found in the Medicare patient population. The purpose of the MS–DRGs is to identify those conditions that lead to higher severity of illness and resource use relative to the average Medicare patient. These conditions suggest average or less than average resource use across the entire Medicare population. If we were to classify chronic and unspecified conditions as MCCs and CCs, the MS–DRGs ability to better recognize severity of illness would be significantly diminished.

Condition-Specific Comments

We received a number of recommendations of codes to be added to the CC list and the MCC list. We have divided these recommendations into three general categories and will address them accordingly. The three categories are:

- Nonspecific codes
- Symptoms, chronic conditions, and low severity conditions
- High severity codes that were erroneously left off of the CC or MCC list.

The first category of recommendations includes a number of codes that are nonspecific. For instance, one frequent recommendation for addition to the CC list is the nonspecific code 428.0 (Congestive heart failure, unspecified). This code is one of several codes that identify patients who have heart failure. Depending on the degree of certainty by the physician of the exact nature of the heart failure, a code can be assigned to indicate a very specific and acute form of heart failure, or a more general, nonspecific code can be assigned to represent a patient with heart failure, but the exact nature of the heart failure is unknown. Other nonspecific conditions include disorders of a heart valve. If the exact nature of the disorder of a heart valve is known, a specific code can be assigned. If the exact nature or degree of the disorder of the valve is not known, a more general, nonspecific code can be assigned. As discussed earlier in this final rule with comment period, our claims data and the clinical analysis of our medical advisors indicate that patients described by the more general, nonspecific codes are not at a higher severity level. If a patient's condition worsens and develops additional diagnoses or complications, these more specific conditions may be on the CC list or MCC list. The most frequently mentioned, nonspecific code by commenters was code 428.0. Therefore, we will provide a detailed summary of these comments and our response. There were a number of other nonspecific conditions suggested for additions to the CC list. We will address these conditions after summarizing the comments on congestive heart failure.

The second category includes a variety of codes representing symptoms, chronic conditions, and other conditions that do not describe a high level of severity. These conditions do not themselves indicate a high severity level using our mathematical analysis of the claims data combined with the clinical analysis by our medical advisors. As stated earlier, we did not include most chronic conditions on the CC list or the MCC list unless the code also indicates an acute exacerbation that would raise the severity level. If a patient has a chronic condition that deteriorates or develops into an acute complication, the more acute condition or complication may be on the CC list or the MCC list.

The third category of codes includes codes that commenters suggested should have been included on the CC list or the MCC list because they clearly describe a high level of severity. Upon further review, we agree that this third group of codes meet the criteria for being included on the CC list or MCC list. The claims data and our medical advisors' clinical analysis clearly support the addition of these codes to the CC list or the MCC list.

(a) Codes Representing Nonspecific Conditions

• Congestive Heart Failure—Code 428.0

Comment: One commenter endorsed the implementation of the revised CC list. The commenter stated that CMS used new criteria for refining the CC and MCC lists, which led to the removal of codes currently on the CC list. The commenter compared the old and revised CC lists and found that the revision added 2,002 codes and dropped 425 codes, for a net increase of 1,577 codes. The commenter stated that, even though the number of added codes far exceeds the number of dropped codes, in the last three MedPAR files, the dropped codes were used an average of 40,864 times, while the added codes were used an average of only 887 times. The commenter stated that many of the dropped codes pertain to unspecified conditions for which more specific codes are available and included on the revised CC list. The highest volume code, code 428.0, was applied to an average of 2.3 million Medicare fee-for-service cases a year during the past 3 years. This code is the most widely used secondary diagnosis code, despite the fact that 12 more specific codes were added in FY 2003. The additional codes are shown in the Table L below.

TABLE L.—INCIDENCE OF SECONDARY DIAGNOSIS CODING FOR HEART FAILURE FY 2004–FY 2006

ICD–9–CM code	Description	New in FY 2003
428.0	Congestive heart failure, unspecified.	
428.1	Left heart failure.	
428.20	Systolic heart failure; unspecified	x
428.21	Systolic heart failure; acute	x
428.22	Systolic heart failure; chronic	x
428.23	Systolic heart failure; acute on chronic	x
428.30	Diastolic heart failure; unspecified	x
428.31	Diastolic heart failure; acute	x
428.32	Diastolic heart failure; chronic	x
428.33	Diastolic heart failure; acute on chronic	x
428.40	Combined systolic and diastolic heart failure; unspecified	x
428.41	Combined systolic and diastolic heart failure; acute	x
428.42	Combined systolic and diastolic heart failure; chronic	x
428.43	Combined systolic and diastolic heart failure; acute on chronic	x
428.9	Heart failure, unspecified.	

The commenter stated that, by making code 428.0 a non-CC, hospitals will react by coding more precisely using the more definitive heart failure codes, raising the CMI, which results in documentation and coding-related overpayments. The commenter argued that, if the revised CC list were implemented before hospitals had a chance to improve their coding to accommodate the revisions, ''case-mix creep and IPPS overpayments would ensure.''

Response: This commenter suggests reasons why Medicare should adopt the MS–DRGs over a transition period and does not appear to be opposed to our decision not to classify congestive heart failure as either an MCC or a CC. The commenter also suggests how hospitals will respond to the coding incentives that will be presented by revisions to the MCC and CC lists as well as the MS–DRGs. The issue of adopting the MS–DRGs over a transition is addressed in detail in section II.E. of the preamble of this final rule with comment period. We further address the implications of the coding incentives raised in this public comment in section II.D.6. of the preamble of this final rule with comment period that discusses an adjustment to IPPS rates for improvements in documentation and coding.

Comment: A number of other commenters urged CMS to classify the condition under code 428.0 as a CC. The commenters indicated that code 428.0 identifies an acute condition, not a benign or a chronic condition. Some commenters stated that any inpatient with congestive heart failure requires increased nursing care to closely monitor and assess physical symptoms and vital signs for indications of increased congestion. Patients often need to undergo repeated laboratory studies.

Another commenter stated that the proposed rule incorrectly characterized the diastolic and systolic heart failure codes as congestive heart failure. The commenter pointed out that according to the Fourth Quarter 2002 issue of Coding Clinic for ICD–9–CM, congestive heart failure is not an inherent component of the codes in category 428 for systolic and diastolic heart failure. Therefore, according to Coding Clinic, the commenter stated that code 428.0 should be assigned as an additional code when the patient has systolic or diastolic congestive heart failure. The commenter added that code 428.0 may appropriately be assigned by itself when congestive heart failure is documented, but there is no documentation of systolic or diastolic heart failure. The commenter stated that, in ICD–9–CM, there is no distinction between an acute exacerbation of congestive heart failure and chronic congestive heart failure. Code 428.0 is assigned for both. The commenter added that codes 402.11 (Benign hypertensive heart disease with congestive heart failure) and 402.91 (Unspecified hypertensive heart disease with congestive heart failure) are on the CC list. The commenter suggested that code 428.0 be included on the revised CC list as well.

Another commenter who objected to the removal of code 428.0 from the CC list stated that, currently, ICD–9–CM codes do not distinguish between acute, chronic, or acute exacerbation of chronic congestive heart failure. All forms of this condition are assigned to code 428.0. The commenter indicated that medical record documentation may not typically include information on whether the congestive heart failure is systolic or diastolic (acute versions of heart failure with this specificity are considered MCCs). The commenter requested that code 428.0 be added as an MCC until a new code can be created to identify acute exacerbation of congestive heart failure. The commenter stated that the fact that there is ''congestion'' is medically more problematic and more resource intensive and may necessitate care in the intensive care unit and a prolonged

hospital stay. The commenter stated that coding guidelines necessitate that acute pulmonary edema of cardiac origin be assigned code 428.0.

Response: Given the number of public comments on this one condition, our medical advisors reviewed the data and clinical issues surrounding code 428.0 again. They strongly recommend that we not change this code to a CC. There are three reasons for this recommendation. First, as stated earlier, we developed a policy of classifying nonspecific codes as non-CCs when a more specific code was available that identified the more specific nature of the patient's illness. Second, data for this and other nonspecific codes do not support assigning it to a higher severity level. Third, in the clinical judgment of our medical advisors, the use of a nonspecific code means that the physician had not identified a medical condition that indicates the patient is at a higher severity level or requires greater resources. This code is vague and does not provide any description of the exact nature of the heart failure. Data for this very commonly reported code clearly indicate that these patients are at a low severity level. However, claims data and our general policy of assigning nonspecific codes to a lower severity level were not the only factors that we used to classify a code as an MCC, CC, or non-CC. As stated above, the data were only used as an adjunct to the judgment of our medical advisors. In the judgment of our medical advisors, the condition described by code 428.0 does not suggest an increase in patient severity of illness. In this case, 12 more specific codes are available to indicate the more severe forms of heart failure. If the physician includes more precise information in the medical record that would allow the coder to identify a more specific code to describe the type of heart failure, the documentation will reflect that the hospital treated a more severely ill patient and the case will be assigned to a higher severity level.

While we decided to classify code 428.0 as a non-CC based on our policy concerning nonspecific codes, the data, and the judgment of our medical advisors, we note that heart failure is an important national health issue. We believe it is very important for hospitals and physicians to use the most specific codes that describe the incidence of heart failure in their patients. In order to accurately and completely evaluate health care outcomes for the treatment of heart failure, detailed and accurate information is needed on patients with this condition. Physicians and hospitals will undermine efforts to obtain more information on patients with this disease when they use a nonspecific code when there is a more detailed code to describe their patient. We highly encourage physicians and hospitals to work together to use the most specific codes that describe their patients'' conditions. Such an effort will not only result in more accurate payment by Medicare but will provide better information on the incidence of this disease in the Medicare patient population.

Comment: As stated earlier, a number of commenters requested CMS to add additional nonspecific codes to the CC list. These codes represent a variety of nonspecific conditions affecting multiple body systems. The commenters stated that the following nonspecific codes may increase the severity level for a patient, and should, therefore, be added to the CC list.

- 070.70, Unspecified viral hepatitis C
- 287.30, Primary thrombocytopenia, unspecified
- 287.5, Thrombocytopenia, unspecified
- 303.00, Acute alcohol intoxication, unspecified
- 345.90, Epilepsy, unspecified, without intractable epilepsy
- 403.90, Hypertensive chronic kidney disease, unspecified, with chronic kidney disease stage I through stage IV, or unspecified
- 424.0, Mitral valve disorders
- 424.1, Aortic valve disorders
- 426.13, Other second degree atrioventricular block
- 426.6, Other heart block
- 426.9, Conduction disorder, unspecified
- 447.6, Arteritis, unspecified
- 458.9, Hypotension, unspecified
- 451.2, Thrombophlebitis of lower extremities, unspecified
- 459.0, Hemorrhage, unspecified
- 585.5, Chronic kidney disease, unspecified
- 707.0, Decubitus ulcer, unspecified
- 780.39, Other convulsions

Response: As previously stated, we did not classify nonspecific codes to the MCC list or the CC list when more specific codes were available to identify the condition of the patient. In general, we found that the data did not support classifying unspecified codes as either MCCs or CCs. Further, after detailed discussions of potential clinical scenarios among our medical advisors, there was a consensus that a specified condition for the patient generally signals higher degree of severity of illness. If the physician was to diagnose additional information about the patient's condition or should the patient's condition worsen, a more precise code would be assigned that may be a CC or an MCC. As a result of these comments, our medical advisors again reviewed these codes and determined that their original decisions were correct. That is, they do not believe that these nonspecific codes should be classified as MCCs or CCs when more specific codes are available that provide more information about patient severity of illness. For these reasons, we are not adding the codes listed above to the CC list.

(b) Symptoms, Chronic Conditions, and Low Severity Conditions

Comment: Commenters requested that we add a number of codes to the CC list that describe symptoms, chronic conditions, and low severity conditions. These conditions include the following codes:

- 070.54, Chronic viral hepatitis C
- 250.4x, Diabetes mellitus with renal manifestations
- 250.5x, Diabetes mellitus with ophthalmic manifestations
- 250.6*x*, Diabetes mellitus with neurological manifestations
- 250.7x, Diabetes mellitus with peripheral circulatory disorders
- 250.8x, Diabetes mellitus with other specified manifestations
- 263.0, Moderate Malnutrition
- 263.1, Mild malnutrition
- 276.51, Dehydration
- 276.52, Hypovolemia
- 276.6, Fluid overload
- 276.7, Hyperpotassemia
- 276.9, Electrolyte and fluid disorders
- 280.0, Iron deficiency anemias, secondary to blood loss (chronic)
- 284.8, Aplastic anemias, not elsewhere classified
- 287.39 Other primary thrombocytopenia
- 287.4 Secondary thrombocytopenia
- 303.01 Acute alcohol intoxication, continuous
- 303.02 Acute alcohol intoxication, episodic
- 306.00, Blindness
- 389.9, Deafness
- 413.9, Angina pectoris
- 427.31, Atrial fibrillation
- 428.1, Left heart failure (change from CC to MCC)
- 451.0, Thrombophlebitis of superficial vessels of lower extremities;
- 492.8, Other emphysema
- 496, Chronic airway obstruction, not elsewhere classified
- 585.3, Chronic kidney disease, stage III (moderate)
- 599.7, Hematuria
- 710.0, Systemic lupus erythematosus
- 731.3, Major osseous defects

- 786.03, Apnea
- 788.20, Urinary retention
- 799.02, Hypoxemia
- V45.1, Renal dialysis status

Response: As discussed earlier, we did not assign chronic conditions to the CC list or the MCC list. These conditions do not themselves indicate a high severity level using our mathematical analysis of the claims data combined with the clinical judgment by our medical advisors. As stated earlier, we did not include most chronic conditions on the CC list or the MCC list unless the code also indicates an acute exacerbation that would raise the severity level. If the chronic condition worsens and the patient develops an acute complication, the more specific code for the acute exacerbation would identify the increased level of severity of illness and, if warranted, would be on the CC or the MCC list. We also did not include general symptoms on the CC list because, alone, they do not suggest a high level of severity of illness. Codes identifying symptoms such as hematuria, apnea, or hypoxemia that are found in many patients may indicate a wide range of patient severity and describe a transient finding. Should the physician diagnose a more specific condition that led to the symptoms, more information about the patient and their severity of illness would be known. The specific diagnosis may indicate higher severity of illness and the code that describes it may be included on the CC list or the MCC list. We also did not include conditions on the CC list or the MCC list that do not generally raise the severity level of a patient. If the code describes patients who range from mild to severe, we believe it is best to use additional secondary diagnosis codes that would be reported to better describe the true nature of the patient's condition. These more precise codes may be on the CC list or the MCC list.

Our clinical advisors reviewed claims data and the clinical issues surrounding patients who had the symptoms, chronic diagnoses, and less severe conditions listed above. They recommend that we not add the codes listed above to the CC list because these conditions do not significantly increase a patient's severity of illness. Therefore, we are not adding the codes listed above to the CC list.

(c) High Severity Codes That Were Erroneously Left Off of the CC List or the MCC List

As stated earlier, a number of commenters recommended the addition of codes to the CC list or the MCC list for conditions that the commenters stated clearly represented a high severity level. The commenters provided information on the degree to which these conditions are life threatening and require extensive amounts of resources. The commenters questioned why these conditions were left off of the CC and MCC lists. Commenters recommended the removal of two codes from the CC list because the commenters believed they do not increase the patient's severity level or lead to more resource use. We discuss these conditions below.

Comment: Commenters requested that we add the following five codes to the CC list. The commenters stated that these conditions clearly increase the severity level and lead to more resource use.

- 285.1, Acute posthemorrhagic anemia
- 403.91, Hypertensive chronic kidney disease, unspecified, with chronic kidney disease stage V or end stage renal disease
- 426.53, Other bilateral bundle branch block
- 426.54, Trifascicular block
- 451.11, Phlebitis and thrombophlebitis, femoral vein (deep) (superficial)

Response: We agree with the commenters that the five codes listed above should have been included on the CC list. Upon further review of our data and discussions among our medical advisors, there was consensus that these codes describe patients with a higher severity level. Therefore, we are adding them to the CC list.

Comment: Commenters requested that we remove the following two codes from the CC list and make them non-CCs. The commenters indicated that there are more specific heart failure codes that would be assigned along with these codes that would indicate whether or not the patient had a severe form of heart failure. The commenters stated that these two codes do not indicate the exact nature of the heart failure and therefore should not be on the CC list.

- 402.11, Hypertensive heart disease, benign, with heart failure
- 402.91, Hypertensive heart disease, unspecified, with heart failure

Response: We agree with the commenters. Upon further review, we do not believe the codes meet the criteria to be considered CCs. The codes do not describe the exact nature of the heart failure. The more specific heart failure codes that would be reported along with these codes would be used to justify the assignment to a high severity level. Therefore, we are removing the two codes from the CC list.

Comment: Commenters requested that we add the following four codes to the MCC list. The commenters indicated that these four codes describe patients at the highest level of severity. Patients with these conditions would use an extensive amount of resources. Furthermore, the commenters added, codes that describe similar conditions are currently on the MCC list. The commenters believed these codes were erroneously excluded from the MCC list.

- 282.69, Other sickle-cell disease with crisis
- 345.2, Petit mal status
- 345.71, Epilepsia partialis continua, with intractable epilepsy
- 780.01, Coma

Response: We agree that we made an error in excluding these four codes from the MCC list. Therefore, we are adding the four codes to the MCC list. We provide a summary of all the additions and deletions to the CC list and the MCC list at the end of this section.

Additional Comments on CC List

We received several additional comments concerning the CC and MCC lists which we summarize below. Some of the comments involved the commenter's confusion about our proposed CC and MCC lists. Others involved a disagreement with our proposal of not making significant changes to the DRGs to better distinguish severity of illness in pregnancies and newborns, even though they are not a significant part of the Medicare population. We also received recommendations for alternative ways to classify conditions as CCs that do not meet our current criteria. In addition, we received comments on our proposal of not classifying specific conditions as a CC/MCC when the patient dies. We discuss these issues below.

- Other Myelopathy—Code 336.8

Comment: One commenter requested that we add code 336.8 (Other myelopathy) to the CC list.

Response: Code 336.8 is already on the CC list. Therefore, we are not making any further change for code 336.8.

- Ascites—Code 789.5

Comment: One commenter requested that we add the code 789.5 (Ascites) to the CC list

Response: We note that code 789.5 is being deleted as of October 1, 2007, when two new codes are being created, code 789.51 (Malignant ascites) and code 789.59 (Other ascites). Both of these new codes are on the CC list. Therefore no additional change is required for ascites.

- Aplastic Anemias, Not Elsewhere Classified—Code 284.8

Comment: One commenter objected to the removal of code 284.8 (Aplastic anemias, not elsewhere classified (NEC)) from the CC list.

Response: Code 284.8 was placed on the MCC list. Thus, while it is not classified as a CC as the comment suggested, it is an MCC. We are maintaining code 284.8 on the MCC list, as we agree that this is a condition that places a patient at a high severity level.

• Complications of Pregnancy, Childbirth and Puerperium—Codes 630 through 677

Comment: One commenter objected to the removal of codes from category 630 through 677 (Complications of pregnancy, childbirth and puerperium) of the CC list. The commenter was concerned about the number and wide breadth of codes from Chapter 11 of the ICD–9–CM, Complications of pregnancy, childbirth and puerperium (categories 630–677), that are being removed from the CC list . The commenter acknowledged CMS'' position that, due to the low volume in the Medicare population, diagnoses related to newborns, maternity and congenital anomalies codes in this section were not reviewed. Of special concern to the commenter were conditions such as infections, acute renal failure, air and pulmonary embolism, cardiac arrest, shock, among others, that are MCCs or CCs and would be coded as such if not for the fact that the ICD–9–CM classification considers problems associated with pregnancy, childbirth and the puerperium to be so clinically significant that they require special combination codes. The combination codes are intended to identify that the presence of the pregnancy complicates the condition. For example, code 415.19 (Other pulmonary embolism and infarction) is an MCC, while code 673.20 (Obstetrical blood-clot embolism, unspecified) is not even a CC.

The commenter recommended that codes in Chapter 11 be carefully evaluated and validated with clinical experts, similar to the process to which the codes in other chapters were submitted. The commenter believed that combination codes should be treated consistently. If the condition is considered a CC or MCC in a nonpregnant patient, the corresponding pregnancy-related combination code also should be a CC or MCC.

Response: As we stated in our proposed rule and elsewhere in this final rule with comment period, we focused our attention in developing the MS–DRGs for the Medicare population. We did not conduct a detailed review of Chapter 11 codes. We encourage other payers who want to use MS–DRG to update the system for their own population. Diagnoses related to newborns, maternity, and congenital anomalies are very low volume in the Medicare population and were not reviewed for purposes of creating the MCC and CC lists. We used the APR DRGs to categorize these diagnoses. This DRG system is used for the all payer ratesetting system in Maryland and will be based on data that better reflects the newborn and maternity population than Medicare. For newborn, obstetric, and congenital anomaly diagnosis, we classified severity level 3 (major) and 4 (extreme) diagnoses as an MCC. We designated default severity level 2 (moderate) diagnoses as a CC and all other diagnoses as a non-CC. We encourage the commenter to review the MCC and CC lists in on the CMS Web site. Many codes in the 630 to 677 range appear on the MCC list.

• Extreme Immaturity—Code 765.0

Comment: One commenter objected to codes in category 765.0 (Extreme immaturity) not being classified as CCs. The commenter stated that codes in category 765.0 represent infants with a birth weight of less than 1000 gm. The commenter indicated that common problems with very low birthweight babies are low oxygen levels at birth; inability to maintain body temperature; difficulty feeding and gaining weight; infection; breathing problems, such as respiratory distress syndrome; neurological problems, such as intraventricular hemorrhage; gastrointestinal problems, such as necrotizing enterocolitis; and sudden infant death syndrome (SIDS). The commenter stated that while some of these problems have unique ICD–9–CM codes that could be reported, not all of them do (for example, inability to maintain body temperature).

Response: While we appreciate the commenter's concern about the CC classifications for newborns, we state again that we did not examine these newborn codes as part of our development of the MS–DRGs. We focused our efforts on the Medicare population and used the APR DRG classification for newborn diagnoses for Medicare. If the APR DRG classification of this condition were to change, we would also adopt the same designation for Medicare.

• Exclusion of MCCs and CC When a Patient Dies

Comment: Several commenters addressed codes that represent diagnoses associated with patient mortality. The commenter indicated that, in the proposed rule, CMS noted that diagnoses that were closely associated with patient mortality were assigned different CC subclasses, depending on whether the patient lived or died.

These diagnoses are:

• 427.41, Ventricular fibrillation;
• 427.5, Cardiac arrest;
• 785.51, Cardiogenic shock;
• 785.59, Other shock without mention of trauma; and
• 799.1, Respiratory arrest.

The commenters agreed that these diagnoses should be considered MCCs for patients who are discharged alive. However, the commenters disagree with CMS'' proposal to make these diagnoses non-CCs when a patient dies. The commenters urged CMS to consider the patient's length of stay or other factors when these codes are reported and count them as an MCC when a patient dies during the admission. The commenters agreed that a patient who expires soon after admission may not have significant resources associated with these conditions. However, the commenters believed that this is not true when a patient has been hospitalized longer, such as for a week.

Response: Our medical advisors examined this issue again and continue to believe it is not appropriate to classify a case as an MCC based on one of the codes above if the patient dies. While we understand the concern of the commenters, we do not believe that a long length of stay patient will necessarily lead to the conclusion that it is appropriate to code these conditions in a patient that dies in the hospital. It is a possible that a terminally ill patient with a long length of stay required no special resuscitation efforts that would suggest higher resource use associated with coding of these conditions. We are concerned that changing our policy to allow use of these codes for a patient that died in the hospital could lead to accurate and widespread coding of the conditions when they are not indicative of a higher patient resource costs. Therefore, we are continuing our policy of classifying the diagnoses listed above as MCCs only if the patient is discharged alive. We will evaluate alternative approaches such as looking at the length of stay and other factors for these patients and make future DRG revisions, as needed.

• Selected Conditions in Joint Replacement Patients

Comment: One commenter asked that we classify certain codes as MCCs or CCs for patients having a joint replacement. The commenter specifically requested that the following codes be made either MCCs or CCs when occurring in a joint replacement patient:

- 731.3, Major osseous defect
- 278.0, Obesity
- 278.01, Morbid obesity
- V85.35, Body mass index 35.0–35.9, adult
- V85.37, Body mass index 37.0–37.9, adult

Response: We do not believe that we should make further changes to the MS–DRG assignments based on combinations of selected diagnoses. These types of analyses could be done with virtually any MS–DRG and would add significant complexity to the DRG system that we do not believe is warranted at this time. Our medical advisors reviewed both the data and clinical issues surrounding these codes and determined that they would not significantly increase the severity level for Medicare patients on average across all patients. Therefore, they are not CCs. We are not changing these codes to CCs. They will remain non-CC for all cases.

The following table summarizes changes to the proposed MCC (Table 6J) and CC (Table 6K) lists published in the proposed rule. These changes are a result of review of comments and were discussed in detail above. A complete, updated CC and MCC list will be posted on the CMS Web site at: *http://www.cms.hhs.gov/AcuteInpatientPPS/* under Downloads. We will continue to evaluate our criteria for the development of the CC and MCC list to determine if refinements to these criteria are needed. As we gain data and experience under MS–DRGs, we believe that there may be refinements to these criteria.

CHANGES TO MCC AND CC LIST AS A RESULT OF COMMENTS

Add to CC list:	
285.1	Acute posthemorrhagic anemia.
403.91	Hypertensive chronic kidney disease, unspecified, with chronic kidney disease stage V or end stage renal disease.
426.53	Other bilateral bundle branch block.
426.54	Trifascicular block.
451.11	Phlebitis and thrombophlebitis, femoral vein (deep) (superficial).
Remove from CC list:	
345.2	Petit mal status.
345.71	Epilepsia partialis continua, with intractable epilepsy.
402.11	Hypertensive heart disease, benign, with heart failure.
402.91	Hypertensive heart disease, unspecified, with heart failure.
780.01	Coma.

CHANGES TO MCC AND CC LIST AS A RESULT OF COMMENTS—Continued

Add to MCC list:	
282.69	Other sickle-cell disease with crisis.
345.2	Petit mal status.
345.71	Epilepsia partialis continua, with intractable epilepsy.
780.01	Coma.
Remove from MCC list:	
None.	

3. Dividing MS–DRGs on the Basis of the CCs and MCCs

In developing the MS–DRGs, two of our major goals were to create DRGs that would more accurately reflect the severity of the cases assigned to them and to create groups that would have sufficient volume so that meaningful and stable payment weights could be developed. As noted above, we excluded the CMS DRGs in MDCs 14 and 15 from consideration because these DRGs are low volume. As stated previously, we do not have the expertise or data to maintain the CMS DRGs for newborns, pediatric, and maternity patients. We continue to maintain MDCs 14 and 15 without modification in order to have MS–DRGs available for these patients in the rare instance where there is a Medicare beneficiary admitted for maternity or newborn care.

In designating an MS–DRG as one that will be subdivided into subgroups based on the presence of a CC or MCC, we developed a set of criteria to facilitate our decision-making process. In order to warrant creation of a CC or major CC subgroup within a base MS–DRG, the subgroup had to meet all of the following five criteria:

- A reduction in variance of charges of at least 3 percent.
- At least 5 percent of the patients in the MS-DRG fall within the CC or MCC subgroup.
- At least 500 cases are in the CC or MCC subgroup.
- There is at least a 20-percent difference in average charges between subgroups.
- There is a $4,000 difference in average charges between subgroups.

Our objective in developing these criteria was to create homogeneous subgroups that are significantly different from one another in terms of resource use, that have enough volume to be meaningful, and that improve our ability to explain variance in resource use. These criteria are essentially the same criteria we used in our 1994 severity analysis. In developing the MS–DRGs, we continued to apply our longstanding policy that each DRG should contain patients who are similar from a clinical perspective.

To begin our analysis, we subdivided each of the base MS–DRGs into three subgroups: non-CC, CC, and MCC. Each subgroup was then analyzed in relation to the other two subgroups using the volume, charge, and reduction in variance criteria. The criteria were applied in the following hierarchical manner:

- If a three-way subdivision met the criteria, we subdivided the base MS–DRG into three CC subgroups.
- If only one type of two-way subdivisions met the criteria, we subdivided the base MS–DRG into two CC subgroups based on the type of two-way subdivision that met the criteria.
- If both types of two-way subdivisions met the criteria, we subdivided the base MS– DRG into two CC subgroups based on the type of two-way subdivision with the highest R^2 (most explanatory power to explain the difference in average charges).
- Otherwise, we did not subdivide the base MS–DRG into CC subgroups.

For any given base MS–DRG, our evaluation in some cases showed that a subdivision between a non-CC and a combined CC/MCC subgroup was all that was warranted (that is, there was not a great enough difference between the CC and MCC subgroups to justify separate CC and MCC subgroups). Conversely, in some cases, even though an MCC subgroup was warranted, there was not a sufficient difference between the non-CC and CC subgroups to justify separate non-CC and CC subgroups.

Based on this methodology, a base MS–DRG may be subdivided according to the following three alternatives, rather than the current ''with CC'' and ''without CC'' division.

- DRGs with three subgroups (MCC, CC, and non-CC).
- DRGs with two subgroups consisting of an MCC subgroup but with the CC and non-CC subgroups combined. We refer to these groups as ''with MCC'' and ''without MCC.''
- DRGs with two subgroups consisting of a non-CC subgroup but with the CC and MCC subgroups combined. We refer to these two groups as ''with CC/MCC'' and ''without CC/MCC.''

As a result of the application of these criteria, 745 MS–DRGs were created as shown in the following table.

TABLE M.—NUMBER OF CC SUBGROUPS

Subgroups	Number of base MS–DRGs	Number of MS–DRGs
No subgroups ...	53	53
Three subgroups	152	456
Two subgroups: CC and major CC; non-CC ..	43	86
Two subgroups: non-CC and CC; major CC	63	126
Subtotal	311	721
MDC 14	22	22
Error DRGs	2	2
Total ...	335	745

The 745 MS–DRGs represent an increase over the 652 DRGs we proposed in our 1994 CC revision analysis. The increase in the number of DRGs is primarily the result of an increase in the number of proposed base MS–DRGs that are subdivided into three CC subgroups. The distribution of patients across the different types of CC subdivisions is contained in Table N below. The table shows that 51.7 percent of the patients are assigned to base MS–DRGs with three CC subgroups, and only 11.8 percent of the patients are assigned to base MS–DRGs with no CC subgroups.

TABLE N.—DISTRIBUTION OF PATIENTS BY TYPE OF CC SUBDIVISION

CC subdivision	Count	Percent
None	1,382,810	11.8
(MCC and CC), Non-CC	629,639	5.4
MCC, (CC and Non-CC)	3,650,321	31.2
MCC, CC, and Non-CC	6,054,081	51.7

Using Medicare charge data (without applying any criteria to remove statistical outlier cases), the reduction in variance (R^2) was computed for current CMS DRGs, the MS–DRGs with all 311 base MS–DRGs subdivided into 3 CC subgroups, and the MS–DRGs collapsed into 745 DRGs. Table O below shows that the R^2 for the MS–DRGs with all 311 base MS–DRGs subdivided into 3 CC subgroups (957 DRGs composed of 311 base MS–DRGs subdivided into 3 CC subgroups plus an additional 22 MDC 14 and MDC 15 DRGs as well as 2 error DRGs) is 10.62 percent higher than the current CMS DRGs. Collapsing the 957 MS–DRGs down to 745 MS–DRGs lowers this increase in R^2 slightly to 9.41 percent. Although adopting a 3-way split for each base MS–DRG would produce a DRG system with higher explanatory power, the 957 MS–DRGs would not meet the criteria we specified above for subdividing each base DRG. The criteria we specified above would create a monotonic DRG system. We believe that the value of having a monotonic DRG system outweighs the slight decrease in explanatory power. For this reason, we proposed to adopt the 745 MS–DRGs.

TABLE O.—EXPLANATORY POWER (R^2) FOR MS–DRGS

	R^2	Percent change
Current CMS DRG	36.19	.....
2007 CMS Severity DRGs with 3 CC Subgroups	40.03	10.62
2007 CMS Severity DRGs Collapsed to 714 DRGs	39.59	9.41

Comment: One commenter supported our five criteria for establishing severity subgroups. The commenter believed the use of specific quantitative criteria to determine how specific base DRGs are divided into terminal categories that reflect severity levels is logical and designed to ensure that only substantively important differences in resource requirements are recognized by the MS–DRG system. The commenter did note that CMS had not explicitly included statistical significance in these criteria and urged CMS to consider CC or MCC splits only when they meet minimal standards of both size and statistical significance.

Response: We appreciate the commenter's support for our five criteria for establishing severity subgroups. We will consider the commenter's other suggestion as we make further refinements to the MS–DRGs.

Comment: One commenter disagreed with our five criteria for establishing severity subgroups. The commenter stated that these criteria are too restrictive, lack face validity, and create perverse admission selection incentives for hospitals by significantly overpaying for cases without a CC and underpaying for cases with a CC. The commenter recommended that the existing five criteria be modified for low-volume subgroups to assure materiality. For higher volume MS–DRG subgroups, they recommended that two other criteria be considered, particularly for nonemergency, elective admissions. These two criteria are:

- Is the per-case underpayment amount significant enough to affect admission vs. referral decisions on a case-by-case basis?
- Is the total level of underpayments sufficient to encourage systematic admission vs. referral policies, procedures, and marketing strategies?

The commenters also recommended refining the five existing criteria for MCC/CC/without subgroups as follows:

- Create subgroups if they meet the five existing criteria, with cost difference between subgroups ($1,350) substituted for charge difference between subgroups ($4,000).
- If a proposed subgroup meets criteria # 2 and # 3 (at least 5 percent of discharges in the subgroup and at least 500 cases) but fails one of the others, create the subgroup if either of the following criteria is met:
  - —At least $1,000 cost difference per case between subgroups; or
  - —At least $1,000,000 overall cost should be shifted to cases with a CC (or MCC) within the base DRG for payment weight calculations.

The commenter stated that this approach would affect DRGs where the total dollars under consideration may be quite high (for example, in the hundreds of millions), due to large numbers of procedures, but the percentage difference in average charges falls short of the 20 percent difference in average charges between subgroups.

Response: We disagree that the five criteria for establishing severity subgroups are too restrictive and will lead to overpayments for cases without a CC and underpay for cases with a CC. Relative to the current CMS DRGs, the statistical data above suggest that the construction of the MS–DRGs using these criteria will improve payment accuracy. The explanatory of the MS–DRGs to predict resource use is more than 9 percent greater than under the current CMS DRGs. Further, under the current CMS DRGs, nearly 78 percent of patients are in the highest severity level, while only 22.2 percent are in the

highest severity level under the MS–DRGs. In addition to having a better distribution of cases among severity levels, the MS–DRGs have more significant difference in average charges over the different severity levels compared to the current CMS DRGs (72 FR 24706).

The commenter does not appear to disagree with these statistics suggesting that improvements will result from the MS–DRGs. Rather, the commenter is suggesting that we should create more subgroups with smaller differences in average charges (or costs). We do not believe the first two alternative criteria are practical or necessary to apply. They would require us to make subjective judgments about whether a hospital would treat patients or refer them elsewhere solely based on payment incentives. We do not believe it is possible or appropriate for us to make judgments about whether a hospital would decide to treat or not treat a patient based on how much they are paid. Further, with the exception of cardiac specialty hospitals, we have no evidence hospitals are selectively treating or avoiding particular types of patients because of incentives present in Medicare's IPPS payments. The reforms we are making are intended to pay hospitals more accurately for the patients they are already treating and avoid incentives for more specialty hospitals to form. Therefore, we do not believe it is practical or necessary to use the first two criteria suggested by the commenter.

With respect to the last criteria, we note that the MS–DRGs represent a significant expansion in the number of DRGs from 538 in FY 2007 to 745 in FY 2008. The commenter is suggesting that we create additional subgroups with less variation between the subgroups. Payments under a prospective payment system are predicated on averages. Thus, most individual cases within any DRG system will have costs that are either higher or lower than the average for that group. While creating groups that have lower differences in average charges or costs between the groups may lessen variation around the average and improve explanatory power, it will also create more low-volume groups and increase the likelihood that the relative weights will be nonmonotonic and have instability in their values from year to year. We believe the value of a lower number of DRGs outweighs the benefit we would obtain from a slight increase in R^2 and the risk of having nonmonotonic DRGs that would come from adopting the commenter's suggestions.

4. Conclusion

We believe the MS–DRGs represent a substantial improvement over the current CMS DRGs in their ability to differentiate cases based on severity of illness and resource consumption. As developed, the MS–DRGs increase the number of DRGs by 207, while maintaining a reasonable patient volume in each DRG. The MS–DRGs increase the explanation of variance in hospital resource use relative to the current CMS DRGs by 9.41 percent. Further, the data shown below in Table P and Table Q illustrate how assignment of cases to different severity of illness subclasses improves in the MS–DRGs relative to the CMS DRGs.

TABLE P.—OVERALL STATISTICS FOR CMS DRGS

CC subclass—current CMS DRG	Percent	Average charges
One or more CCs	77.66	$24,538
Non-CC	22.34	14,795

TABLE Q.—OVERALL STATISTICS FOR MS–DRGS

CC subgroup	Number of cases	Percent	Average charges
MCC	2,607,351	22.2	$44,219
CC	4,298,362	36.6	24,115
Non-CC	4,826,980	41.1	18,416

Under the current CMS DRGs, 78 percent of cases are assigned to the highest severity levels (CC) and the remaining 22 percent are assigned to the lowest severity level (non-CC). Applying the three severity subclasses to FY 2006 data would result in approximately 22 percent of patients being assigned to the severity subgroup with the highest level of severity (MCC), 41 percent being assigned to the lowest severity subclass (non-CC), and the remaining 37 percent being assigned to the middle severity subclass (CC). Adding the new MCC subgroup greatly enhances our ability to identify and pay hospitals for treating patients with high levels of severity. As Table Q above shows, the new subgroups also have significantly different resource requirements. The MCC subgroup contains patients with average charges almost twice as large as for those in the CC group ($44,219 compared to $24,115).

In addition to resulting in improvements in the DRG system's recognition of severity of illness, we believe the MS–DRGs are responsive to the public comments that were made on last year's IPPS proposed rule with respect to how we should undertake further DRG reform. In the FY 2007 IPPS final rule, we identified three major concerns in the public comments about our proposed adoption of CS DRGs:

We received comments after the FY 2007 IPPS final rule suggesting that further adjustments were needed to the proposed DRG system. The commenters believed that the CS DRGs did not incorporate many of the changes to the DRG assignments that have been made over the years to the CMS DRGs. There was significant interest in the public comments in either revising the CS DRGs to reflect these changes or using the CMS DRGs as the starting point to better recognize severity.

We believe that the MS–DRGs are responsive to these suggestions. The MS–DRGs use the CMS DRGs as the starting point for revising the DRGs to better recognize resource complexity and severity of illness. We are generally retaining all of the refinements and improvements that have been made to the base DRGs over the years that recognize the significant advancements in medical technology and changes to medical practice. At the same time, the MS–DRGs greatly improve our ability to identify groups of patients with varying levels of severity. They retain all of the improvements made to the DRGs over the years, while providing a more equitable basis for hospital payment.

We received many comments on the FY 2007 IPPS rule about the potential use of a proprietary DRG system. The comments about the CS DRGs raised compelling issues about the potential government use of a proprietary system, including concerns about the availability, price, and transparency of the source code, logic and documentation of the DRG system. The commenters noted that CMS makes available these resources in the public

domain for purchase through the National Technical Information Service at nominal fees to cover costs. The commenters urged CMS not to adopt a proprietary DRG system that would not be available on the same terms as the current CMS DRGs.

There are no proprietary issues associated with the MS–DRGs. The MS–DRGs will be available on the same terms as the current CMS DRGs through the National Technical Information Service.

We also received other comments on the FY 2007 IPPS rule concerning the use of CS DRGs. The commenters stated that no alternatives to CS DRGs had been evaluated. The commenters suggested that alternative DRG systems can better recognize severity than the CS DRGs and should be evaluated before CMS decides which system to adopt. In response to these concerns, we contracted with RAND Corporation to evaluate several alternative DRG systems, including the MS–DRGs that we proposed and are finalizing in this final rule with comment period for FY 2008.

As indicated above, we believe the MS–DRGs offer significant improvements to the DRG system without many of the liabilities the public commenters on the FY 2007 IPPS rule identified with the CS DRGs. Thus, we believe the MS–DRGs offer significant improvements in recognition of severity of illness and complexity of resources and are adopting them for FY 2008.

Comment: Many commenters supported the MS–DRGs. One commenter stated that ''your proposal showcases the best of CMS, evidenced, for example, by an elegant and reasonable framework for severity-adjusted DRGs.'' Another commenter stated that it was ''about time that Medicare adopted a DRG system that allows for more equitable reimbursement for cases of severe illness with high risk of death or significant morbidity.'' Other commenters stated that it was very apparent that CMS dedicated an extensive amount of thought, planning, and resources toward the development of the MS DRGs, and that the system appears to be a very reasonable approach toward stratifying the patient grouping system more distinctly based on the severity of the patient's illness.

Many commenters found the MS–DRGs to represent a reasonable approach to DRG refinement, stating they are, in principle, a positive advancement and will create a more equitable and accurate payment system. Other commenters stated that the MS DRGs are an effective method for incorporating greater refinements to reflect variations in patient severity. Other commenters stated that hospitals providing services to more complex patients should be paid in a manner that reflects the nature of that care. These commenters stated that they do not want to see a payment system that rewards hospital inefficiency and it is reasonable that Medicare reimbursement policy assures that services are appropriately compensated. Other commenters stated that, over time, some DRGs have become more profitable than others. The commenters stated that making adjustments in rates helps to restore balance to the entire hospital inpatient payment system. These commenters endorsed CMS' efforts to achieve these goals through the adoption of the MS–DRGs.

Other commenters expressed their appreciation for CMS' recognition and consideration of issues raised in the public comments on last year's proposal to adopt CS DRGs. The commenters indicated that CMS took account of the public comments in crafting this year's MS–DRG proposal. The commenter applauded CMS for addressing many concerns that were expressed regarding CS DRGs. One of these commenters stated that MS–DRGs are significantly superior to the CS DRGs that were proposed last year. One commenter indicated that it had asked CMS to do the following when considering adoption of a new DRG system:

- Show evidence that the alternative resulted in an improved hospital payment system compared to the existing DRG system;
- Test the degree to which the variation in costs within cases at the DRG level is reduced;
- Consider whether there were easier ways to adjust for severity similar to the differentiation of patients in FY 2006 based on the absence or existence of a major cardiovascular diagnosis;
- Maintain the improvements made to differentiate cases based on complexity in the existing system; and
- Avoid creating a system that is proprietary and lacks transparency.

The commenter indicated that CMS made a concerted effort to develop a system that incorporates all of these goals and indicated their support for these meaningful improvements to the IPPS. Like this commenter, several other commenters were also in agreement that the proposed DRG system should not be proprietary to avoid limiting public access to the system. Another commenter who expressed appreciation for CMS' responsiveness to issues raised in last year's IPPS rule indicated that the MS–DRGs are logical, transparent, and nonproprietary, which well suits the needs of the health care community. Other commenters also expressed support for CMS' decision to make the MS–DRGs nonproprietary, open, and accessible, and available on the same terms as the current DRGs.

Another commenter stated that it had decades of experience doing work with DRG systems and believe that there has been a need for a severity adjustment mechanism in the CMS DRGs to facilitate more accurate payment under the IPPS. In its view, the MS–DRG methodology is an appropriate mechanism to add severity adjustments to IPPS for FY 2008. According to the commenter, the MS–DRGs' advantages include:

- They are based on the current CMS DRGs, whose technical features, data structures, and program algorithms have been fine-tuned over the years to accommodate the insertion and deletion of DRGs, changes in code/criteria lists, changes to CC and CC exclusion lists, changes in hierarchy, addition or deletion of DRG criteria, among others.
- Additional severity adjustments will not require substantial modifications to this basic, extensible, and highly efficient architecture. The architecture will facilitate the addition of new categories necessitated by the introduction of new technologies or the application of the methodology to non-Medicare populations.

The commenter recommended that CMS plan for a more flexible, four-character nomenclature in the severity DRG system as soon as reasonably possible. The commenter noted that all commercially available severity-adjusted DRG systems have adopted a nomenclature that employs an initial 3-digit base DRG designation followed by a 1-digit severity score. This approach is far more flexible and transparent. More importantly, the approach lends itself more readily to the addition of new base DRGs and the evolution of more granular severity-adjustment.

Many commenters were supportive of the MS–DRGs because they were derived from the existing system and, therefore, preserve the numerous policy decisions made over the years and embodied in the CMS DRGs. These commenters appreciated that severity stratifications were created from the existing base DRGs with the result of redistribution within, rather than across, the DRGs. Commenters also stated that the MS–DRGs provide CMS with the flexibility of making DRG reassignments within a base MS–DRG by moving more complex services up a severity level. Other commenters stated that the MS–

DRG system does a better job than last year's proposed CS DRGs or the current CMS DRGs of reflecting advancements in medical technology and other improvements in medical care.

Some commenters stated that, with the development and proposal of MS–DRGs, they saw little reason for CMS to continue assessing and considering alternative patient classification systems in the foreseeable future. These commenters stated that the MS–DRG system is more transparent, accessible, and understandable than the alternative systems being evaluated by RAND.

Some commenters stated that the MS–DRGs provide more accurate grouping for severity of illness while retaining the CMS–DRG refinements to account for more accurate payment of resource utilization. However, these commenters recommended that the implementation of MS–DRGs be delayed for one year to wait for the final RAND report and the availability of a GROUPER. One commenter stated that the MS–DRGs are an excellent attempt to define severity of illness based on DRGs for the Medicare population but urged us not to implement them in FY 2008 unless it is deemed to be the final system adopted from the ones being studied by RAND. Several commenters stated that hospitals will undergo enormous costs to ''educationally gear up'' for the MS–DRGs. The commenter stated that the hospital community must expend educational dollars in its attempt to improve coding to optimize each case's DRG assignment. These comments were concerned about the burden and expense that would be imposed on hospitals from adopting one significant DRG reform this year and another one next year. A number of other similar comments urged CMS not to move to MS–DRGs if it plans to implement another new severity system in FY 2009.

Response: We appreciate the support for MS–DRGs. We agree that, building on the current DRG system, we have maintained the best aspects of our past efforts while adding additional refinements to better identify severity. We also agree that it is beneficial to consider moving to a four-character nomenclature for MS–DRGs. We have already developed an internal version with four characters, with the fourth character indicating the severity levels. Systems restrictions prevent us from using this four-character numbering system in Medicare's data systems at this time. However, we will continue to evaluate the possibility of moving to such a numbering system.

With respect to the comments about the RAND project and the concern about adopting two different DRG reforms in succeeding years, we note that RAND has completed its evaluation of alternative DRG systems, including the MS–DRGs. Consistent with RAND's findings, we believe it is appropriate at this time to adopt the MS–DRG system for Medicare in FY 2008. While there will be an opportunity for the public to comment on RAND's findings, we expect to permanently adopt the MS–DRGs for the IPPS. We do not believe it is likely that there will be persuasive public comments suggesting that one of the alternative DRG systems being evaluated by RAND is clearly superior.

Comment: One commenter fully endorsed the move to MS–DRGs, but stressed the need of maintaining the current level of transparency in the DRG system, regardless of the chosen methodology. The commenter stated that many companies offer software that hospitals and health plans utilize in managing the billing, coding, and payment for hospital inpatient services under the DRGs. The development of this software is possible only because the current DRG methodology is a transparent system. By that, they mean that members of the public can obtain full access to the details underlying the system by purchasing information and software from the National Technical Information Service (NTIS) at a nominal charge in a timely manner (well in advance of the implementation of changes). The commenter appreciated the agency's commitment in the FY 2007 final rule to ''continue to strive to promote transparency in our decision making as well as in future payment and classification systems, as we have done in the past.'' The commenter commended CMS for its continued attention to the transparency issue and appreciates CMS' proposal to make the MS–DRGs available on the same terms as they currently do CMS DRGs through NTIS.

Response: We agree that it is important to provide updates and modifications to the DRG system in a transparent manner. We intend to continue our efforts to do so by providing the necessary information through our regulations, Web sites, and through NTIS. The MS–DRGs will be available to the public on the same terms as the CMS DRGs.

Comment: MedPAC reviewed the MS–DRGs and commended CMS for its commitment to improve the accuracy of Medicare payments for hospital acute inpatient services. MedPAC stated that CMS staff had made significant progress toward achieving this goal with the development of MS–DRGs coupled with cost-based weights. MedPAC's analysis showed that MS–DRGs will result in a substantial improvement in payment accuracy. MedPAC took several steps to evaluate the proposed MS–DRGs. First, they examined their face validity. An effective patient classification system, in the context of a payment system, should group together clinically similar cases that have similar costs. In addition, MedPAC stated that relative weights calculated for the classification groups (MS–DRGs) generally should exhibit a consistent hierarchy of values across levels of severity of illness for different conditions. Therefore, one issue is how much costs vary around the mean cost per case for cases grouped within MS–DRGs. Another issue is whether relative weights for different severity levels show the expected hierarchy across most clinical conditions. For comparison, MedPAC also looked at the cost variation and relationships among relative weights for cases grouped in the current DRGs and in the severity categories of the APR DRGs. MedPAC also examined how the MS–DRGs would affect payment accuracy in the IPPS, measured by how closely payments would track costs for different types of cases. MedPAC compared payment accuracy under the MS–DRGs with the results under the current CMS DRGs and the severity categories of the APR DRGs.

MedPAC found that MS–DRGs did a better job of grouping cases with similar costs into the same category. This was expected because the MS–DRGs break out high severity (and high cost) cases with MCCs into separate DRGs. For comparison, MedPAC also calculated the amount of variation in costs among cases within the severity classes of APR DRGs (Version 23). The average absolute difference for the APR DRGs, in turn, was 7.4 percent lower than the value for DRGs. MedPAC stated that this suggests that at least some opportunities are available for further refinement of the MS–DRGs. Although MedPAC found the MS–DRGs were not perfect, and may need to be further refined over time, it believed they represent a significant improvement over the current CMS DRGs. MedPAC's analysis showed that payment accuracy increased substantially when moving from the current DRGs to one based on the MS–DRGs.

Response: We agree with MedPAC that the MS–DRGs represent a significant improvement over the current CMS DRGs. As suggested above, we intend to use RAND's evaluation of the MS–DRGs to make further improvements to it. We appreciate MedPAC's suggestion to use the APR DRGs to also help us identify potential

areas where further improvements can be made to the MS–DRGs.

Comment: One comment stated that the ''Crosswalk from CMS DRGs to MS–DRGs'' was somewhat misleading. The commenter was concerned that some entities are interpreting it as a one-to-one mapping. The commenter suggested that it be clarified that an individual DRG code cannot be mapped directly to a MS–DRG. The commenter recommended that MS–DRG implementation be delayed so that CMS can release the MS–DRG GROUPER and allow hospitals time to analyze the impact prior to implementation.

Response: After public display of the proposed rule, we were asked to provide additional information on the CMS Web site showing how the current CMS DRGs map to the new MS–DRGs. Although we provided this information, we were concerned about its usefulness because of the very issue raised in this public comment. That is, there is not a one-to-one crosswalk between the 538 DRGs that exist under the CMS DRGs and the 745 MS–DRGs. While this information may not have been as useful as originally anticipated by members of the public that requested it, we believe the fact that there is not a one-to-one crosswalk between the CMS DRGs and the MS–DRGs was well understood by the public based on the description of each system in the proposed rule. In addition, we made other information available to the public that would allow for a detailed analysis of the MS–DRG proposal as well as the continuing transition to cost-based weights. We made available two MedPAR files (FY 2005 and FY 2006) that included the CMS DRG and MS–DRG assignment for each case. In addition, we made available charge-based, cost-based, and blended weights under the CMS DRGs and the blended weights under the MS–DRGs. With this information, we believe the public had detailed information to be able to do a comprehensive analysis of our proposal to adopt MS–DRGs. We do not believe that there should have been any confusion associated with the publicly requested CMS DRG to MS–DRG crosswalk on the CMS Web site, and we do not see this comment as a reason to delay implementation of the MS–DRGs.

Comment: A number of commenters urged CMS to process more than nine diagnosis and six procedure codes. The commenters stated that this particular concern is more acute with MS–DRGs where a hospital needs to make sure that CMS processes codes that are MCCs and CCs because they determine DRG assignment. The commenters also stated that vendors and health care groups make decisions about quality of care based upon the CMS claim file. The commenters asked CMS to commit to a timeframe when it will revise its systems to accept all 25 diagnosis and procedure codes provided via electronic transmissions.

Response: We recognize the importance of using and analyzing as much clinical data from claims as possible. Unfortunately, current system limitations preclude CMS from processing more than nine diagnoses and six procedures at this time. We will continue to review this matter in conjunction with our other information systems priorities.

Comment: Several commenters stated that ICD–10–CM and ICD–10–PCS would provide a much better foundation for a severity-adjusted DRG system than ICD–9–CM. The value of MS–DRGs or any other severity-adjusted DRG system that relies on claims data will be limited by the continued use of an obsolete, non-specific classification system. ICD–10–CM and ICD–10–PCS would provide greater clinical detail, and up-to-date clinical information for capturing information on disease severity, including complications, comorbidities and risk factors, as well as more detailed information on the use of medical technology and its impact on resource utilization and outcomes. The longer adoptions of contemporary classifications are delayed, the more CMS must develop alternatives that become costly to administer and for providers costly to continually implement.

One commenter stated that, in previous years, the commenter's recognition of the industry's need for consistency in medical coding, improved data integrity, and more precise and contemporary data reflecting 21st century medicine has led it to advocate for adoption and coordinated implementation of ICD–10–CM and ICD–10–PCS in their previous comments on the IPPS. The commenter stated that it is unfortunate that, as new initiatives that rely heavily on coded data gain momentum (such as present on admission reporting, pay-for-performance, and DRG refinements to better recognize severity of illness), ICD–10–CM and ICD–10–PCS still have not been implemented as replacements for ICD–9–CM.

One commenter stated that if the obsolete ICD–9–CM coding system had been replaced earlier, claims data that would significantly add to the knowledge needed to measure severity, quality, and other factors under consideration would now be available. The commenter stated that the proposed MS–DRG system and other proposals in this year's proposed rule are excellent examples of how ICD–10–CM and ICD–10–PCS could improve the ability to refine reimbursement systems in order to better reflect severity of illness. The commenter urged CMS and HHS to take immediate action to secure the adoption and implementation of these two classification systems, and supporting transaction standards as early as possible.

Response: We are continuing to carefully analyze issues associated with implementing ICD–10.

Comment: Several commenters opposed the reuse of the current CMS DRG numbers in the MS–DRG system. Although one commenter acknowledged the advantages of maintaining the current 3-digit numerical scheme, it believed the use of the same DRG numbers in both the CMS DRG and MS–DRG systems will create confusion when analyzing longitudinal data, given the same DRG number will have a different meaning in the two systems. The commenter suggested that delaying implementation of a severity-adjusted DRG system until FY 2009 would allow additional time for making more extensive systems modifications, such as adopting an alphanumeric or 4-digit numerical structure for the new DRG system. Another commenter suggested that CMS begin numbering with a 4-digit number so that there will not be confusion about which system is being used.

Response: We agree that it is beneficial to consider moving to a 4-character nomenclature for MS–DRGs. We have already developed an internal version with four characters, with the fourth character indicating the severity levels. Systems restrictions prevent us from using this 4-character numbering system in Medicare's data systems at this time. However, we will continue to evaluate the possibility of moving to such a numbering system in the future. We do not expect the changes to our data systems that would be necessary to adopt a 4-digit DRG numbering system will occur with a year's delay of the MS–DRGs. Therefore, we do not believe that we should delay the improvements in recognition of severity of illness in our payment system for this reason. If there is public interest, we will make our internal 4-digit numbering system available on the CMS Web site to assist the public in understanding the future numbering system we would be likely to adopt. Such information may also be useful to the public to engage in the types of analysis suggested by this public comment.

Comment: One commenter stated that the Medicare CMS DRG GROUPER is used by some payers for their commercial, non-Medicare business. The commenter understands that CMS may want to move to MS–DRGs for Medicare patients, but is concerned about its continued access to the current GROUPER program, should Medicare decide to replace CMS DRGs with MS–DRGs. The commenter requested that the existing CMS GROUPER remain intact for commercial insurers to utilize for their non-Medicare contracts. The commenter suggested this could be done by keeping the GROUPER in the CMS database with the title ''CMS GROUPER.'' The commenter stated CMS would not need to update the weights of the CMS GROUPER or make any other adjustments.

Response: The focus of CMS' efforts is in developing and maintaining a DRG system that is appropriate for its Medicare population. We have, and will continue to, encourage other payers to make any necessary modifications to this program to meet their needs. The current versions of the CMS DRGs will remain in the public domain. However, we do not intend to make any updates to them once we move to the MS–DRGs or another severity DRG system. We do not believe that Medicare should undertake the effort and expense to maintain and update a DRG system that will have no application for Medicare beneficiaries. We encourage other payers to avail themselves of any DRG logic in our nonproprietary system from past years and use this information as appropriate to develop updates and refinements annually to suit the needs of their own patient populations.

5. Impact of the MS–DRGs

Unlike the CS DRGs we proposed last year for FY 2008, the payment impacts from the MS–DRGs we proposed to adopt (and are finalizing in this final rule with comment period) for FY 2008 would largely be redistributive within each base MS–DRG. Such a result occurs because we collapse the current CC/non-CC, age and other distinctions that exist in the CMS DRGs and redivide them based on MCCs, CCs, and non-CCs. Thus, within each base MS–DRG, some cases will be paid more and some less, but the base MS–DRGs are retained so there is no redistribution between types of cases as would have occurred under the proposed CS DRGs. In the proposed rule, we encouraged readers to review Table 5 in the Addendum to the proposed rule for a list of the proposed MS–DRGs and the proposed respective relative weight from the revisions we proposed to better recognize severity of illness to better understand how payment for cases within each base MS–DRG will be affected.

As indicated above, all of the severity DRG systems being evaluated by RAND can be expected to result in similar redistributions in case-mix among hospitals. The payment models used by RAND and CMS (and RTI as well) all assume static utilization. That is, payment impact models simulate the effects of a change in policy, assuming no change to Medicare utilization. Any system adopted to better recognize severity of illness with a budget neutrality constraint will result in case-mix changes that can be expected to benefit urban hospitals at the expense of rural hospitals. This impact occurs because patients treated in urban hospitals are generally more severely ill than patients in rural hospitals and the CMS DRGs are not currently recognizing the full extent of these differences. Similarly, there will be differential impacts among other categories of hospitals (for example, teaching, disproportionate share, large urban, and other urban hospitals) depending on the mix of cases that each hospital treats. The impact of the MS–DRGs can be expected to have similar effects on case-mix as the DRG systems being analyzed by RAND. These conclusions are confirmed by RAND's analysis earlier in this final rule with comment period as well as the payment impacts we illustrated in the proposed rule and again in this final rule with comment period.

Comment: One commenter believed that a ''stop loss'' provision should be instituted as part of the transition. Similar to that under the IPF PPS, no hospital can receive less than 70 percent of what they would otherwise have been paid under the old system. Another commenter asked that CMS investigate mechanisms for dampening large payment rate fluctuations.

Response: Changes in payments from MS–DRGs will be mitigated in any single year by adopting them over a 2-year transition period. We believe a 2-year transition period for implementation of the MS–DRGs addresses the concern of these commenters. Further information is provided in section II.E. of the preamble of this final rule with comment period about how MS–DRG relative weights are being determined to reflect implementation over a 2-year period.

6. Changes to Case-Mix Index (CMI) From the MS–DRGs

After the 1983 implementation of the IPPS DRG classification system, CMS observed unanticipated growth in inpatient hospital case-mix (the average relative weight of all inpatient hospital cases), which we use as a proxy measurement for severity of illness. We had projected the rate of growth in case-mix for the period 1981 to 1984 to be 3.4 percent. The realized rate of growth during this period, which included the introduction of the IPPS, was 8.4 percent, a variance in excess of 1.6 percent per year. The unexpected growth in payments was due to increases in the hospital case-mix index (CMI) beyond the previously projected trend. Hospitals' CMI values measure the expected treatment cost of the mix of patients treated by a particular hospital. There are three factors that determine changes in a hospital's CMI:

(a) Admitting and treating a more resource intensive patient-mix (due, for example, to technical changes that allow treatment of previously untreatable conditions and/or an aging population);

(b) Providing services (such as higher cost surgical treatments, medical devices, and imaging services) on an inpatient basis that previously were more commonly furnished in an outpatient setting; and

(c) Changes in documentation (more complete medical records) and coding practice (more accurate and complete coding of the information contained in the medical record).

We note that changes in patient-mix and medical practice signal *real* changes in underlying resource utilization and cost of treatment. While these changes may have occurred in response to incentives from IPPS policies, they represent real changes in resource needs. In contrast, changes in CMI as a result of improved documentation and coding do not represent real increases in underlying resource demands. For the implementation of the IPPS in 1983, improved documentation and coding were found to be the primary cause in the underprojection of CMI increases, accounting for as much as 2 percent in the annual rate of CMI growth observed post-PPS.[2]

The Medicare Trustees Technical Review Panel [3] has previously determined the annual measured change in CMI for inpatient hospital services to oscillate around an underlying real trend of 1 percent annual growth. In 1991 the Medicare-specific trend in real CMI growth was found in a then-HCFA

[2] Carter, Grace M. and Ginsburg, Paul: The Medicare Case Mix Index Increase, Medical Practice Changes, Aging and DRG Creep, Rand, 1985.

[3] Review of Assumptions and Methods of The Medicare Trustees' Financial Projections; Technical Review Panel on the Medicare Trustees Reports, December 2000.

funded study [4] to be within a range of 1 to 1.4 percent. In the annual study conducted by CMS, there has been no evidence to support a real case-mix increase in excess of the annually projected 1 percent upper bound in the period. MedPAC findings have echoed this with its recent study of real case-mix change finding growth rates for years 2002, 2003, and 2004 of 1 percent, 0.6 percent, and 0.4 percent, respectively.[5]

In the proposed rule, we indicated that we believe that adoption of the proposed MS–DRGs would create a risk of increased aggregate levels of payment as a result of increased documentation and coding. MedPAC notes that ''refinements in DRG definitions have sometimes led to substantial unwarranted increase in payments to hospitals, reflecting more complete reporting of patients' diagnoses and procedures.'' MedPAC further notes that ''refinements to the DRG definitions and weights would substantially strengthen providers' incentives to accurately report patients' comorbidities and complications.'' To address this issue, MedPAC recommended that the Secretary ''project the likely effect of reporting improvements on total payments and make an offsetting adjustment to the national average base payment amounts.'' [6]

The Secretary has broad discretion under section 1886(d)(3)(A)(vi) of the Act to adjust the standardized amount so as to eliminate the effect of changes in coding or classification of discharges that do not reflect real changes in case-mix. While we modeled the changes to the DRG system and relative weights to ensure budget neutrality, we are concerned that the large increase in the number of DRGs will provide opportunities for hospitals to do more accurate documentation and coding of information contained in the medical record. Coding that has no effect on payment under the current CMS–DRGs may result in a case being assigned to a higher paid DRG under the proposed MS–DRGs. Thus, more accurate and complete documentation and coding may occur because it will result in higher payments under the MS–DRG system. For the proposed rule, we stated that the potential for more accurate and complete documentation and coding will apply equally under the acute IPPS as well as under the LTCH PPS because the same DRGs are used for both payment systems. However, for reasons explained elsewhere in this final rule with comment period, we are limiting this analysis to the IPPS.

CMS in the past has adjusted standardized amounts under the IRF PPS to account for case-mix increases due to improvements in documentation and coding. In 2004, RAND [7] published a technical report as part of the follow-up to the implementation of the IRF PPS. The initial weights used within the IRF PPS were based on a mix of CY 1999 and CY 1998 data. The study reviewed the changes between this base data set and the IRF PPS implementation year of 2002. The report found that the weight per discharge for IRFs had grown by 3.4 percent between the CY 1999 data set and the CY 2002 data set. In a detailed analysis of both statistical patterns in acute stay records and directly measured coding practices, RAND found that the level of case-mix increase associated with documentation and coding-induced changes in the transition year ranged between 1.9 and 5.8 percent, with the upper end of the estimate associated with real declines in resource use. (We note that RAND revised its report in late 2005 to reflect an upper bound of 5.9 percent, instead of the 5.8 percent that we reported in the FY 2006 IRF PPS proposed and final rules.)

We used the results of this analysis to justify a 1.9 percent adjustment to payment rates for IRFs in FY 2006 (70 FR 47904) and a 2.6 percent adjustment to payment rates for IRFs in FY 2007 (71 FR 48370), for a combined total adjustment of 4.5 percent. The implementation year was marked by the transitioning of hospitals to the IRF PPS payment based on cost reports beginning January 1, 2002, and staggered to October 1, 2002. A combination of increased familiarity with the system by providers and the staggered transition could mean that documentation and coding-induced case-mix change continued as hospitals experienced ongoing changes in the early years of the IRF PPS and as the incentives within the system were more widely recognized. We also recognize that significant changes in IRF patient populations may be occurring as a result of recent regulatory changes, such as the phase-in of the 75-percent rule compliance percentage. We intend to continue analyzing changes in coding and case-mix closely, using the most current available data, as part of our ongoing monitoring of the IRF PPS and, based on this analysis, we intend to propose additional payment refinements for IRFs in the future as the analysis indicates such adjustments are warranted.

Furthermore, as part of our analysis of this issue, we considered the recent experience of the State of Maryland with adopting the APR DRG system. Maryland introduced APR DRGs for payment for three teaching hospitals in 2000. Between State fiscal years (SFYs) 2001 and 2005,[8] the remaining hospitals continued to be paid using modified CMS DRGs. In June 2004, the remaining hospitals were notified that Maryland would expand the use of APR DRGs throughout its all payer charge-per-case system beginning in July 2005. Hospitals in Maryland improved coding and documentation in response to the adoption of APR DRGs. As a result of this improved documentation and coding, reported CMI increased at a greater rate than real CMI. Given the similarity between coding incentives using the APR DRGs in Maryland and the MS–DRGs that are being proposed for Medicare, we analyzed Maryland data to develop an adjustment for improved documentation and coding.

For the Maryland analysis, we assume that, in SFY 2005, those hospitals not already being paid under the APR DRG system began acting as if the transition to the new DRG logic had already taken place. This assumption is supported by the following facts: (a) Maryland hospitals were reporting to the Health Services and Cost Review Commission (HSCRC), Maryland's governing body of its all-payer ratesetting system using the APR DRG GROUPER in 2005; (b) hospitals were provided training in coding under the APR DRG GROUPER; (c) hospitals had access to reports based on APR DRG logic; and (d) hospitals were given large amounts of feedback as to their performance under the GROUPER by the HSCRC relative to peer hospitals.

The incentives for Maryland hospitals are to code as completely and accurately as possible because, beginning in July 2005, all Maryland hospitals were paid using APR DRGs. SFY 2005 was an

[8] Maryland uses a July 1 to June 30 State fiscal year. Prior to FY 2003, Maryland had a 6-month lag in the data used to calculate the hospital base case-mix index and case-mix change. Maryland used 12 months data ending December even though the hospitals' rate year was July 1 to June 30. In FY 2003, Maryland moved to what it calls ''Real Time Case-Mix'' and started using 12 months data ending June 30 to calculate case-mix index and case-mix change for a rate year beginning July 1.

important year in Maryland, as it marked the beginning of the 2-year period of transition after which a hospital's revenues were reduced if coding was not as complete as a peer hospital. Under the current CMS DRGs, each secondary diagnosis code is recognized as either a CC or non-CC. Hospitals in Maryland and nationally for Medicare only needed to code one secondary diagnosis as a CC when paid using CMS DRGs for the patient to be assigned to a higher-weighted DRG split based on the presence or absence of a CC. Under the APR DRGs, each secondary diagnosis is designated as minor, moderate, major, or extreme. Under the MS–DRGs, each secondary diagnosis is designated as a non-CC, CC, or MCC. Hospitals in Maryland have incentives under the APR DRGs to code until a case is assigned to the highest of the four severity levels within a base DRG. Under the MS–DRGs, hospitals will have incentives to code until a case is assigned to one of up to three severity levels within a base DRG. Although the APR DRGs and the MS–DRGs may be different, we believe that hospitals have the same incentive under both systems to code as completely as possible. For this reason, we believe that the Maryland experience is a reasonable basis for projecting changes in coding practices for the wider national hospital population for the first 2 years of the MS–DRGs.

We believe the analysis presented below provides a reasonable analysis of the potential growth in CMI due to improved documentation and coding. In addition to the similarity between coding incentives under the proposed MS–DRGs and the APR DRGs, we note that Maryland is an all-payer State; therefore, hospitals are paid by all third party payers—not just the State's Medicaid program—using the APR DRGs. Coding has been very important for each hospital's overall revenue for many years, and the incentives are uniform across all third party payers. The transition to APR DRGs was known well in advance of the actual date and, as stated above, hospitals were provided training in coding under the APR DRGs. It is reasonable to expect that hospitals' experience with improved documentation and coding will occur over a period of at least 2 years. Thus, the experience in Maryland may be similar to expectations for case-mix growth for the nation as a whole. Finally, in reviewing the results from Maryland, we note that three large teaching hospitals began using APR DRGs prior to SFY 2005. These facilities generally treat a wider variety of patients with higher acuity that gives them a greater potential for increasing coding under the APR DRG system than other hospitals throughout Maryland. Because these hospitals were paid using the APR DRGs earlier than other Maryland hospitals, we believe data for these hospitals need to be analyzed from an earlier time period. However, based on the consultations with the HSCRC, we believe there were special issues with one of these hospitals that may have made its case-mix growth during the early years of the transition to the APR DRGs atypical of the other teaching hospitals.[9] Therefore, we did not separately analyze the data for this hospital from the earlier time period and, as stated below, included its data with the rest of the Maryland hospitals.

As part of its contract with CMS, 3M Health Information Systems reviewed the Maryland data in the context of our proposed changes to adopt MS–DRGs. 3M grouped Medicare cases in Maryland through both the CMS DRGs Version 24.0 and the proposed MS–DRGs for FY 2008. At our request, 3M deleted two of the three early transition hospitals from the data. It compared the results of the observed growth in case-mix from these data to the same process applied to Medicare data, excluding Maryland hospitals.

The MedPAR data file for Federal fiscal year (FFY) 2006 (October 2005 through September 2006) was used to create relative weights for both CMS DRG Version 24.0 and the MS–DRGs. The MedPAR data file contained 12,794,280 records. In constructing the weights, the following edits were used:

- Cases with zero covered charges or length of stay were excluded.
- Cases with length of stay greater than 2 years were excluded.
- Only hospitals contained in the impact file for the FY 2007 IPPS final rule were included.

The latter criterion excluded providers reimbursed outside of the IPPS, including Maryland hospitals, from the weight calculation. 3M employed standardized charge-based relative weights developed in accordance with the CMS methodology. Cost-based weights were not used and no adjustment to the charge weights was made for application of CMS transfer and postacute care transfer payment policy.

3M further grouped 2 years of MedPAR data from FY 2004 and FY 2005, using CMS DRG Version 24.0 and the MS–DRGs for hospitals nationally. Using 2 years of MedPAR data with one version of each DRG system further required 3M to make adjustments to the data to reflect revisions to ICD–9–CM codes that are made each year. MedPAR data for Maryland IPPS acute care providers within the IPPS data set were similarly assigned to the MS–DRGs and CMS DRGs for FYs 2004 through 2006.

Each Maryland record, exclusive of the two early transition teaching hospitals for the 3 observed years (SFY 2004 to SFY 2006), was assigned to a proposed MS–DRG based on the ICD–9–CM codes the hospital submitted. The same results were obtained from data at the national level using the MS–DRGs. Further, we obtained data from the HSCRC showing the weighted average increase in case-mix for calendar years 2001 to 2003 for the two large academic medical centers that began an early transition to the APR DRGs. In addition, we also obtained case-mix increases under the CMS DRGs for FYs 2004 through 2006. The Medicare Actuary examined the data below:

[9] The HSCRC informed us that it began using APR DRGs for this hospital to calculate the CMI and case-mix change to set the hospital's charge per case target (CPC) that is used in Maryland's all-payer ratesetting system for payment. However the HSCRC also compared the reasonableness of hospital rates and costs for this hospital relative to peer institutions using modified CMS DRGs to calculate CMI and case-mix change. This use of dual systems to calculate CMI and case-mix change made it difficult for the hospital to code aggressively in the first few years of using APR DRGs.

TABLE R.—MARYLAND AND NATIONAL DATA USED FOR CASE-MIX ADJUSTMENT ANALYSIS

	FY 2004 to 2005 (percent)	FY 2005 to 2006 (percent)	FY 2004 to 2006 (percent)
Rest of Maryland MS–DRG CMI Δ	2.30	2.57	4.93
			CY 2000 to FY 2003
Early Transition Hospitals	4.4	6.7	11.4
National MS–DRG CMI Δ	0.47	2.65	3.13
National CMS DRG CMI Δ	−0.04	1.20	1.16
Blend of MS–DRG & CMS DRG Δ using 0.47 Percent for 2005 and 1.2 Percent for 2006			1.68
Difference between Maryland Early Transition Hospitals and National Data			9.58
Difference between Rest of Maryland and National Data			3.20
Medicare Actuary Estimate (75%/25%) Δ between Early Transition and Rest of Maryland			4.8

The data above show that case-mix for hospitals increased by 4.93 percent from SFYs 2004 to 2006, during which Maryland adopted the APR DRGs for most hospitals. Case-mix for the two large teaching hospitals that were paid using the APR DRGs earlier than other hospitals in the State increased by 11.4 percent from SFYs 2001 to 2003. The weighted average increase in Maryland from these two categories of hospitals is 5.58 percent. Case-mix using the MS–DRGs would have increased 0.47 percent in FY 2005 and 2.65 percent in FY 2006. Nationally, Medicare case-mix using the CMS DRGs decreased by 0.04 percent in FY 2005 and increased by 1.2 percent in FY 2006. The Actuary calculated a Medicare case-mix increase nationally over 2 years using a blend of these data from the MS–DRGs for FY 2005 and national Medicare data for FY 2006 from the CMS DRGs. The Actuary did not use either the −0.04 percent for the CMS DRGs or the 2.65 percent for the MS–DRGs to create this blended case-mix because these figures appeared atypical to national trends. Therefore, the Actuary dropped one atypically high and low number from each of the 2 years of data and calculated an average increase of 1.68 percent from FY 2004 to FY 2006. These data demonstrate that the measure of average CMI for Medicare cases is growing more rapidly within Maryland than nationally. Case-mix for the Maryland teaching hospitals and the rest of Maryland increased 9.58 percent and 3.20 percent more, respectively, than the national average over 2 years, suggesting that improved documentation and coding lead to perceived, but not real, changes in case-mix.

The Actuary noted that the case-mix increase in Maryland for two large teaching hospitals over a 2-year period was much higher in the early years of the APR DRGs than other Maryland hospitals (11.4 percent compared to 4.93 percent for the rest of Maryland). Further, teaching hospitals generally treat cases with higher acuity than other hospitals and have more opportunity to improve coding and documentation to increase case-mix than other hospitals. Teaching hospitals also represent a higher proportion of national Medicare data than they do of the data in Maryland. The two early transition teaching hospitals in Maryland account for approximately 10 percent of the Medicare discharges in Maryland. Nationally, teaching hospitals account for approximately 50 percent of Medicare discharges. Therefore, the Actuary believes that the teaching hospitals should be given a higher weight in the national data than they represent in Maryland. However, like other hospitals, teaching hospitals vary in size and patient mix and not all have the same opportunity to improve documentation and coding. Therefore, we believe the weight given to teaching hospitals should be higher than the 10 percent for the two early transition hospitals in Maryland but lower than the 50 percent of discharges that they account for in Maryland. The Actuary gave a weight of 25 percent for teaching hospitals and 75 percent for the rest of Maryland to the excess growth in case-mix over the national average and estimates that an adjustment of 4.8 percent will be necessary to maintain budget neutrality for the transition to the MS–DRGs. This analysis reflects our current estimate of the necessary adjustment needed to maintain budget neutrality for improvements in documentation and coding that lead to increases in case-mix. Consistent with the statute, we will compare the actual increase in case-mix due to documentation and coding to our projection once we have actual data to revise the Actuary's estimate and the adjustment we make to the standardized amounts.

Based on the Actuary's analysis, using the Secretary's authority under section 1886(d)(3)(A)(vi) of the Act to adjust the standardized amount to eliminate the effect of changes in coding or classification of discharges that do not reflect real changes in case mix, we proposed to reduce the IPPS standardized amounts by 2.4 percent each year for FY 2008 and FY 2009. We indicated that we were considering proposing a 4.8 percent adjustment for FY 2008. However, we believed it would be appropriate to provide a transition because we would be making a significant adjustment to the standardized amounts. In the proposed rule, we expressed interest in receiving public comments on whether we should apply the proposed adjustment in a single year, over 2 years, or in different increments than ½ of the adjustment each year. Section 1886(d)(3)(A)(vi) of the Act further gives the Secretary authority to revisit adjustments to the standardized amounts for changes in coding or classification of discharges that were based on estimates in a future year. Consistent with the statute, we will compare the actual increase in case mix due to documentation and coding to our projection once we have actual data for FY 2008 and FY 2009 for the FY 2010 and FY 2011 IPPS rules. At that time, if necessary, we may make a further adjustment to the standardized amounts to account for the difference between our projection and actual data.

Comment: Many commenters opposed the documentation and coding adjustment, which they believed would reduce payments to hospitals by $24 billion over the next 5 years. The commenters did not believe this reduction is warranted. They suggested the adjustment for documentation and coding is a ''backdoor attempt'' to reduce Medicare's inpatient hospital payments. One commenter stated that the documentation and coding

adjustment would result in a total estimated reduction in payment for Pennsylvania hospitals of $67.5 million in FY 2008, and an estimated $1.6 billion over the next 5 years. The commenter stated that such reductions and attempts at backdoor budget cuts would only further erode scarce resources and challenge hospitals in their ability to care for patients. The commenter stated that until MS–DRGs are fully implemented, and CMS can document and demonstrate that any increase in case-mix results from changes in coding practices rather than real changes in patient severity, there should be no documentation and coding adjustment.

Response: We stress that there are no savings attached to this adjustment. This adjustment is not a ''backdoor'' attempt to reduce Medicare inpatient hospital payments. Without a documentation and coding adjustment, the changes to MS–DRGs would not be budget neutral. Substantial evidence supports our conclusion that the CMI will increase as a result of adoption of MS–DRGs without corresponding growth in patient severity. We have provided evidence from studies going back over 20 years that show that hospitals respond to incentives when payment classifications are changed to improve documentation and coding to receive higher payments. Maryland provides a recent example demonstrating the validity of the finding that hospitals respond to changes in payment classification groups by changing documentation and coding practices. Furthermore, we are not aware of a situation in which a new or revised payment system provided a payment incentive to improve documentation and coding, yet hospitals did not improve documentation and coding.

Comment: Many commenters stated that the documentation and coding adjustment is based on assumptions made with little to no data or experience about how medical record documentation and coding practices will change as a result of the implementation of MS–DRGs. One commenter stated that the proposed adjustment has no basis in actual data or research pertaining to inpatient hospital coding practices. One commenter objected to the −2.4 percent adjustment for documentation and coding stating it could not understand the proposal and noted that the hospitals are utilizing the coding system that the Department of Health and Human Services has created. The commenter stated that if, in fact, the new severity DRGs were designed to better recognize the resources needed to treat the various DRG conditions, the argument can be made that CMS has been underpaying institutions for over 20 years. Other commenters objecting to the documentation and coding adjustment further indicated that hospitals have operated under the current DRG system for 23 years and hospitals are already expert in their ability to maximize coding for payment. These commenters stated that not even in the initial years of the IPPS was coding change found to be in the magnitude of CMS' proposed FY 2008 and FY 2009 cuts. The commenters stated that the proposed MS–DRGs would be a refinement of the existing system; the underlying classification of patients and ''rules of thumb'' for coding would be the same. They stated that there is no evidence that an adjustment of 4.8 percent over 2 years is warranted when studies by RAND, cited in the preamble, are looking at claims between 1986 and 1987 at the beginning of the IPPS that showed only a 0.8 percent growth in case-mix due to coding. The commenters stated that even moving from the original reasonable cost-based system to a new patient classification-based PPS did not generate the type of coding changes CMS contends will occur under the MS–DRGs.

Many commenters disagreed with the applicability of generalizing from the experience in Maryland to Medicare. One commenter indicated that MS–DRGs and APR DRGs are two completely different ways to classify patients, and generalizing from one system to the other cannot be done. The existing classification rules will change only marginally with the introduction of MS–DRGs, whereas they are very different under the APR DRG system. Differences include:

- APR DRGs consider multiple CCs in determining the placement of the patient and, ultimately, the payment. In fact, to be placed in the highest severity level, more than one high-severity secondary diagnosis is required.
- APR DRGs consider interactions among primary and secondary diagnoses. Thus, factors that increase the severity level for a case under the APR DRGs will not occur under the MS–DRGs.
- APR DRGs consider interactions among procedures and diagnoses as well. MS–DRGs do not.
- APR DRGs have four severity subclasses for each base DRG, while MS–DRGs have three tiers, and this is only for 152 base DRGs—106 base DRGs only have two tiers and 77 base DRGs are not split at all.
- Less than half the number of patient classifications in the MS–DRG system are dependent on the presence or absence of a CC—410 for MS–DRGs versus 863 for APR DRGs.

The commenters believed that all of these differences make the Maryland experience an invalid comparison. They suggested there is significantly less possibility for changes in coding to affect payment under the MS–DRGs.

Another commenter indicated that the CMS analysis is not applicable to Medicare because Maryland hospitals were not paid using a DRG system prior to APR DRG implementation. DRG data were collected for statistical purposes, but DRGs were not used for reimbursement. The commenter added that coding practices under APR DRGs are not necessarily comparable to MS–DRGs because they were not designed for reimbursement purposes. Further, the commenter found that the system logic is not always consistent with nationally recognized coding rules and guidelines, resulting in possible changes in coding practices that do not necessarily represent improved coding. The commenter stated that hospitals have little ability to change their classification and coding practices. Another commenter stated that Maryland's hospitals were paid prior to the APR DRGs under a State ratesetting system where an incentive to code accurately did not significantly affect what a hospital was paid. The commenter stated that APR DRGs are also much more complicated than MS–DRGs. The commenter stated that generalizing the Maryland experience to the rest of the nation's hospitals is an ''apples to oranges'' comparison.

One commenter also disagreed with CMS' use of the example of the IRF PPS to justify the coding adjustment. The commenter believed that the IRF experience is an inappropriate comparison. The commenter stated that coding changes seen under the IRF PPS were the result of moving from a cost-based system to a PPS, not the marginal difference of moving from the existing CMS DRGs to the refined MS–DRGs. In addition, coding under the IRF PPS is driven by the Inpatient Rehabilitation Patient Assessment Instrument (IRF–PAI). This tool provides an incentive for IRFs to code in a way that differs from the IPPS, which does not utilize a patient assessment instrument. The commenter believed that coding for the IRF–PAI differs significantly from the longstanding coding rules that inpatient PPS hospitals have followed for the following reasons:

- The IRF–PAI introduced a new data item into coding—namely, ''etiological

diagnosis.'' The definition of this new diagnosis and the applicable coding rules are significantly different than the ''principal diagnosis'' used to determine the DRG. More importantly, the Official Coding Guidelines that apply to all other diagnostic coding do not apply to the selection of the ICD–9–CM etiologic diagnoses codes.

• The Official Coding Guidelines do not consistently apply to the coding of secondary diagnoses on the IRF–PAI. Several different exceptions to the guidelines have been developed by CMS for the completion of the IRF–PAI.

• The definition of what secondary diagnoses may be appropriately reported differs under the IRF–PAI from the definition used by other inpatient coders.

• Most hospitals are already coding as carefully and accurately as possible because of other incentives in the system to do so, such as risk adjustment in various quality reporting systems. Analysis of Medicare claims from 2001 to 2005 suggests that hospitals have been coding CCs at high rates for many years. More than 70 percent of claims already include CCs, and more than 50 percent of claims have at least eight secondary diagnoses (the maximum number accepted in Medicare's DRG GROUPER). Hospitals'' assumed ability to use even more CCs under MS–DRGs is very low.

The commenter also indicated that according to an article in the magazine Healthcare Financial Management, the level of coding on claims suggests that the presence of a CC on a bill is not strongly influenced by financial gain. The proportion of surgical cases with a CC code is higher for cases where there is no CC split and, thus, no financial benefit, than on those cases where there is a CC split and a corresponding higher payment. Thus, coding is driven primarily by coding guidelines and what is in the medical record rather than by financial incentives according to this commenter. In addition, the commenter believed that many cases simply do not have additional CCs to be coded. For many claims, additional codes are simply not warranted and not supported by the medical record. Therefore, there is no opportunity for a coding change to increase payment.

The commenter analyzed the all-payer health care claims databases from California, Connecticut, Florida, and Michigan because, unlike the MedPAR files, these databases include all 25 diagnoses reported on the claims. This analysis showed that only 0.25 percent of claims had an MCC or CC appear for the first time in positions 10 through 25. The commenter believed this strongly suggests that hospitals will not be able to ''re-order'' their secondary diagnoses to appear higher on the claim so that Medicare will pay a higher rate. The commenter's coding experts note that most hospitals use software that automatically re-sorts the secondary diagnoses to ensure that those pertinent to payment are included in positions two through nine.

The commenter also examined secondary diagnosis codes and found that there were relatively few non-specific codes listed among the common secondary diagnoses of discharges without a MCC/CC. The commenter believed that this means hospitals cannot shift large numbers of discharges to MCCs or CCs based on coding a more specific code to replace a nonspecific code.

The commenter further indicated that there is no opportunity for increased payment due to a change in coding for 77 base DRGs under the MS–DRG system, as there is only one severity class and no differentiation in payment. Additionally, there are MS–DRGs that are now split between ''with MCC'' and ''without MCC'' (a combined non-CC and CC MS–DRG) that have historically contained a single CC/non-CC split. These DRGs already required secondary diagnosis coding; thus, the codes to qualify the case as an MCC already would have been present. In these cases, it is very unlikely that the medical record would justify an MCC that is not already present in the medical record. Coders must code strictly based on what the physician notes in the chart. Therefore, the commenter believed it is highly unlikely that a coder will be able to select an MCC that was not previously present in the medical record.

One commenter stated that case-mix will and should increase from adoption of the MS–DRGs. According to the comment, changes in case-mix due to improved accuracy in documentation and coding have been observed since the introduction of DRG payments in 1983. These changes have occurred in every refinement of every classification system across every care setting. The commenter stated that changes are driven primarily by the fact that documentation and numbers of diagnoses coded is inevitably incomplete due to time pressures for completion of paperwork and limitations of computer systems to identify this information. If an item is not used and/or not important, it is less well documented. Refinements in patient classification make certain paperwork more important, encouraging providers to improve their documentation and reporting accuracy. This, in turn, increases apparent case mix that depends on these codes according to this commenter. The commenter stated that coding changes that affect CMI are desirable in the long run, since they represent more accurate data and evidence-based care, payments, quality measurement, management decisions, and policy are all enhanced. This increase in accuracy is not only desired, it is necessary to truly reform health care (severity adjusted payments, quality measurement and reporting, value based-purchasing, among others), where ''bad data'' is frequently cited as an excuse to defer reform efforts. This commenter stated that it is impossible to accurately predict the total magnitude and timing of case-mix changes. Every hospital will have their own documentation and coding accuracy baseline, and their own real CMI based on accurate data for their patient mix. Each will have a different commitment to increasing their accuracy, resources to do so, and learning curve for implementation. The commenter believed that, like any prediction of the future, it will inevitably be wrong, particularly due to its complexity.

Response: Many of the commenters ascribed the term ''behavioral offset'' to our proposed rule and believed that CMS was pejoratively describing hospital motives. We note that we did not use the term ''behavioral offset'' to describe the proposed −2.4 percent adjustment to IPPS rates for FYs 2008 and 2009 for changes in documentation and coding. We regret that the term ''behavioral offset'' has been attributed to us. The proposed rule uses the phrase ''documentation and coding adjustment'' to refer to the proposed −4.8 percent (−2.4 percent each year for FYs 2008 and 2009) adjustment to the IPPS standardized amounts to maintain budget neutrality for the MS–DRGs consistent with the statute. Further, we believe it is important to address the notion in some of the public comments that CMS believes changes in how services are documented or coded that is consistent with the medical record is inappropriate or otherwise unethical. We do not believe there is anything inappropriate, unethical or otherwise wrong with hospitals taking full advantage of coding opportunities to maximize Medicare payment that is supported by documentation in the medical record. In its public comments, MedPAC recommended an adjustment for improvements in documentation and coding and also noted that hospitals' efforts to improve the specificity and

accuracy of documentation and coding are perfectly legitimate.[10]

We encourage hospitals to engage in complete and accurate coding. Section 1886(d)(3)(A)(vi) of the Act authorizes the Secretary to adjust the standardized amount so as to eliminate the effect of changes in coding or classification of discharges that do not reflect real changes in case-mix. In its public comments, MedPAC indicated that the increases in payments that result from improvements in documentation and coding are not warranted because the increase in measured case-mix does not reflect any real change in illness severity or the cost of care for the patients being treated. Therefore, offsetting adjustments to the PPS payment rates are needed to protect the Medicare program and those who support it through taxes and premiums from unwarranted increases in spending.[11]

In response to the comment that stated, ''moving from the original reasonable cost-based system to a new patient classification-based PPS did not generate the type of coding changes CMS contends will occur under the MS–DRGs,'' we believe the estimates for improvements in documentation and coding are within the range of those projected under the original IPPS. As stated above, for the implementation of the IPPS in 1983, RAND found that improved documentation and coding were found to be the primary cause in the underprojection of CMI increases, accounting for as much as 2 percent in the annual rate of CMI growth observed post-PPS.[12] This study found a 2 percent annual change in case-mix from improvements in documentation and coding during the original adoption of the IPPS, while we are forecasting a 4.8 percent *total* increase due to the MS–DRGs. MedPAC's public comments citing a study in *Health Affairs* found that the original adjustment for anticipated increases in case mix due to documentation and coding ''were substantially smaller than the actual change in case mix which increased more than 7 percent from the pre-PPS period to the first full year of the PPS system.'' [13] MedPAC further noted that CMI increases due to improvements in documentation can be expected to occur over many years. It stated that the Prospective Payment Assessment Commission (a predecessor of MedPAC) considered case-mix change in developing its annual update recommendations to the Congress and made offsetting adjustments for continuing coding improvements for 10 consecutive years from 1986 to 1995. [14] For these reasons, we disagree with the comment that our forecast of changes in case-mix from improvements in documentation and coding are not within the range of those projected when the original IPPS was implemented.

With respect to comments about the use of the APR DRG system in Maryland to forecast an adjustment for improvements in documentation and coding for Medicare, we agree that there are differences between the APR DRGs being used in Maryland and the MS–DRGs being proposed for use by Medicare. We believe that coding incentives in Maryland under the APR DRGs and nationally under the MS–DRGs are similar, not identical. The Maryland experience provides a useful example to forecast the potential increase in case mix from improvements in documentation because it is a recent and similar change to what we plan to adopt for Medicare. Although the APR DRGs and the MS DRGs may be different, we believe that hospitals have the same incentive under both systems to code as completely as possible. Moreover, as explained above, we estimated CMI growth using the MS DRG and CMS DRG GROUPERs, not APR DRG GROUPER. We used Medicare claims from Maryland hospitals for our analysis, but we grouped the claims under the CMS DRG GROUPER and proposed MS DRG GROUPER.

For these reasons, we continue to believe that the Maryland experience is a reasonable basis for projecting increased case mix in the wider national hospital population for the first 2 years of the MS–DRGs. MedPAC supported using the Maryland experience to forecast potential increases in case mix by stating: ''The case-mix reporting changes that occurred in Maryland-when that state adopted APR DRGs in its all payer rate-setting system—provide one of the few recent benchmarks for comparison outside of Medicare's historical experience.'' [15]

The reference to the IRF PPS was not intended to suggest that we used the experience with that system to forecast a potential adjustment under the IPPS. Rather, we were merely noting that the adoption of a PPS system for IRFs also produced an increase in case-mix as a result of the new incentives presented by going to a different payment system. The example suggests that there is strong evidence that hospitals—whether they are IRFs, acute care IPPS hospitals, or LTCHs—respond to coding incentives presented by their respective payment systems and will react accordingly. MedPAC's public comments also supported this point. In its public comments on the FY 2008 IPPS proposed rule, MedPAC stated that there were increases in case mix with the introduction of prospective payment systems for IRFs and LTCHs.[16]

The comments about reordering of codes and substituting specific codes for nonspecific codes suggests that hospitals are already maximizing coding opportunities and there is no further changes they can make that would result in an increase in Medicare payment. With respect to reordering of codes, the commenter argues that MCCs and CCs will already be found in the first 9 fields on the Medicare claim and the codes that are stored or processed from fields 10 to 25 cannot be moved up higher on the claim to increase payment. While this public comment suggests that there will be no opportunity to increase case mix by moving secondary diagnoses higher on a claim, another public comment provided a specific estimate of how much this practice could increase case-mix. The commenter examined data from New York State discharges and indicated that if MCC and CC codes that are currently provided beyond the original 9 diagnoses on the claim that are used by Medicare are moved to the first 9 positions, case mix would increase by 0.5 percent. This reaffirms CMS' views that hospitals focus their documentation and coding efforts to maximize reimbursement. Again, we believe these examples provide evidence from the public comments supporting the necessity for us to apply an adjustment for documentation and coding to meet the requirements of the law.

[16] Medicare Payment Advisory Commission: Letter to Acting Administrator Leslie Norwalk, June 11, 2007, page 11.

We believe increases in case-mix do not only have to come from moving codes higher on the claim. A hospital can merely change the order of a principal and secondary diagnosis for closely related conditions to affect payment. The selection of a principal diagnosis that was previously coded as secondary can increase hospital payment. Again, we found a public comment suggesting that reordering of principal and secondary diagnoses can increase case mix. The commenter stated some DRG groups only count a code in ''the primary position while others only count a code in a secondary position.'' The commenter is noting that many DRGs are split based on the presence or absence of an MCC or CC as a secondary diagnosis. According to the commenter, many Medicare patients have multiple conditions occasioning their admission, suggesting that reordering the principal and secondary diagnosis codes can result in an increase in case-mix.

We also disagree with the comments suggesting that hospitals do not have the opportunity to substitute a specified for an unspecified code to increase case mix. In fact, we believe these incentives will be very strong under the MS–DRGs with the reclassification of many unspecified codes as non-CCs. Again, we found statements in the public comments that support the notion that hospitals will have opportunities to substitute a specified for an unspecified condition to increase case-mix under the MS DRGs. One commenter indicated that the CC list revisions encourage coding of more detailed codes and estimates that switching from ''not otherwise specified'' codes to detailed codes could increase case mix by 0.5 percent. Another commenter states: ''The most dramatic example is ICD–9–CM code 428.0, Congestive heart failure, unspecified, which was applied to an average of 2.3 million Medicare fee-for-service cases a year during the past three years. This was the most widely used secondary diagnosis code, despite the fact that 12 more specific codes were added in FY 2003 * * * if the revised CC list were implemented before hospitals had a chance to improve their coding to accommodate the revisions, then case-mix creep and inpatient prospective payment system (IPPS) overpayments would ensue.''

We further note that many of the public comments arguing against the documentation and coding adjustment also request a year's delay in implementation of the MS–DRGs so ''hospitals may focus on understanding the impact of the revised CC list, training and educating their coders, and working with their physicians for any documentation improvements required to allow the reporting of more specific codes where applicable.'' We believe this comment provides a strong indication that, even though many public commenters themselves argue against the need for the documentation and coding adjustment, the same commenters would like a year's delay to take the very actions that they say make an adjustment unnecessary. The MS–DRGs are not making any changes to ICD–9–CM codes. While the MS–DRGs do include some consolidations of base DRGs, the major changes from the current DRGs simply involve adding severity levels to many of the new MS–DRGs. The move to MS–DRGs will not necessitate additional data elements or changes in reporting practices. Therefore, hospitals may continue to document and code as they do currently to be paid by Medicare under the MS–DRGs. The only reason hospitals would need a delay in the MS–DRGs is to have more time to understand how their revenues are affected by coding under the new DRG system. In our view, there is a clear indication in these comments that hospitals will change their documentation and coding practices and increase case mix consistent with the payment incentives that are provided by the MS–DRG system.

As further evidence that documentation and coding practices are affected by payment, we note a recent article in the Journal of AHIMA (American Health Information Management Association) which discusses methods for improving clinical documentation in order to increase reimbursement. The article describes a program at a hospital utilizing clinical documentation specialists that work on the hospital treatment floors to encourage improvements in clinical documentation. The article states that one year after implementing the program, the hospital gained an additional $1.5 million in reimbursement. In the second year, the hospital gained $900,000. The article reports a similar program at another hospital where the ''the academic hospital was overly conservative in its coding practices and ''leaving money on the table.' '' [17] These examples provide strong support for concluding that there were opportunities under the current CMS DRGs to improve coding and increase payment. With incentives changing under the MS–DRGs, we believe there will be additional opportunities to improve documentation and coding. We believe this article supports our contention that hospital coders and physicians will respond to incentives available under MS–DRGs by improving documentation and coding to increase case-mix.

Comment: One commenter stated that the ICD–9–CM Official Guidelines for Coding and Reporting and the American Hospital Association's Coding Clinic for ICD 9–CM provide official industry guidance on complete, accurate ICD–9–CM coding, without regard to the impact of code assignment on reimbursement. AHIMA's Standards of Ethical Coding stipulate that ''coding professionals are expected to support the importance of accurate, complete, and consistent coding practices for the production of quality healthcare data.'' The commenter believed that all diagnoses and procedures should be coded and reported in accordance with the official coding rules and guidelines and does not advocate the practice of only coding enough diagnoses and procedures for correct DRG assignment. The commenter stated that increased attention to the quality of coding and documentation as a result of the role coding plays in DRG assignment has led to much-improved coding practices since the adoption of the IPPS in 1983. The commenter further noted that hospitals code more completely so CMS has more complete data to make DRG modifications that would recognize the resource-intensiveness of a diagnosis or procedure.

Response: We believe the commenter's assertion supports our point that improvements in documentation and coding occurred as a result of the payment incentives provided by the IPPS. That is, the commenter is saying that the adoption of the original IPPS in 1983 led hospitals to improve documentation and coding practices because ''of the role coding plays in DRG assignment.'' The commenter believed that MS–DRGs will not lead to changes in documentation and coding practices and cites—among other sources—AHIMA's Standards of Ethical Coding. AHIMA is a professional association representing more than 51,000 health information professionals who work throughout the healthcare industry whose work is closely engaged with the diagnosis and procedure classification systems that serve to create the DRGs. The article cited above from the July–August issue of the Journal of AHIMA provided documented examples of how hospitals can change coding practices to maximize payments. Thus, there is an

[17] Dimick, Chris ''Clinical Documentation Specialists,'' Journal of AHIMA, July–August 2007, pages 44–50.

assertion in this comment that official coding rules and guidelines require all diagnoses and procedures to be reported on the claim minimizing opportunities for changes in documentation and coding to increase case mix. However, AHIMA's own professional journal provides strong evidence of opportunities that exist for improvements in coding to increase payment. As we stated previously and suggested by the article in the Journal of AHIMA, we believe that payment incentives lead hospital staff to carefully examine documentation and coding practices, work with physicians to improve the precision of clinical documentation in order to make subsequent changes in coding.

Comment: A number of commenters requested that CMS not make the documentation and coding adjustment until hospitals have had experience with the MS–DRGs. Once the MS–DRGs are fully implemented, the commenters indicated that CMS can investigate whether payments have increased due to coding rather than the severity of patients and determine if an adjustment is necessary. Several commenters stated that CMS is not required to make a prospective adjustment to IPPS rates to account for improvements in documentation and coding and should not do so without an understanding of whether there will even be coding changes in the first few years of the refined system. Another commenter stated that CMS should retrospectively determine the national rate reduction to offset increases in case-mix from improvements in documentation and coding even though the reduction would be made to future rates and would not account for potential increases in payment that would occur until the adjustment is made. The commenter indicated that section 1886(d)(3)(A)(vi) of the Act authorizes just such an adjustment and it is the only way to ensure that the level of the reduction is accurate. All of these commenters argued that CMS can always correct for additional payments made as a result of coding changes in a later year when there is sufficient evidence and an understanding of the magnitude.

One commenter suggested that CMS defer (but not eliminate) adjustments for improvements in documentation and coding. This commenter suggested that CMS make the adjustment at a later time when there is actual data suggesting how much improvements in documentation have increased case mix but that we consider a ''stop loss'' if initial coding changes appear to far exceed the current 4.8 percent estimate. The commenter indicated that CMS should encourage facilities to improve their documentation and coding accuracy sooner (that is, prior to adjusting for documentation and coding), and not do any MCC/CC consolidations until after coding improvements have occurred (that is, have 3 severity levels for all DRGs).

Another commenter noted that RAND's evaluation of alternative severity DRG systems included an assessment of how coding behaviors are expected to vary under each system. However, RAND did not evaluate the MS–DRGs and further noted that it was not able to empirically assess the relative risk the alternative severity-adjusted systems pose for case mix increases attributable to coding improvement without having the opportunity to observe actual changes in coding behavior when a DRG system is used for payment. The commenter did not believe any payment adjustment to account for case mix increases, which are attributable to coding improvements, should be made until CMS has conducted appropriate research to determine the extent to which improvements in coding becomes an issue under the proposed MS–DRG system. While the design of the MS–DRG system may encourage an increased level of coding specificity, the commenter stated that it is unknown what effect, if any, this might have on the CMI.

Response: RAND did not repeat the analysis of the potential for documentation and coding improvements to increase case mix using the MS–DRGs because it only worked with FY 2005 data to evaluate them. The RAND report refers readers to the analysis CMS did of the likely impact of documentation and coding improvements on case mix using the MS–DRGs.[18]

With respect to delaying making any adjustments for documentation and coding, the commenters are correct that section 1886(d)(3)(A)(vi) of the Act gives the Secretary authority to revisit adjustments to the standardized amounts for changes in coding or classification of discharges that were based on estimates in a future year. We also note that section 1886(d)(4)(C) of the Act requires that ''changes in classifications or weighting factors'' not increase or decrease aggregate inpatient hospital payments. We believe that Congress has expressed its clear preference that all changes to DRG reclassifications be budget neutral. Substantial evidence indicates that, unless we make an adjustment to account for improvements in documentation and coding, aggregate payments under the IPPS will increase when we adopt MS–DRGs as a result of these improvements in documentation and coding. Further, as discussed above, the independent Office of the Actuary validated the −1.2 percent adjustment to the standardized amount to ensure that improvements in documentation and coding do not increase case-mix and IPPS payments.

In addition, by revisiting the adjustment at a later date when we have actual data, we can ensure that the standardized amounts are permanently set at the level they otherwise would have been had the increase in case mix due to improvements in documentation and coding been known. That is, any overestimate or underestimate of the adjustment for improvements in documentation would not be permanently embedded in the IPPS standardized amount for subsequent years. While any differences between projected and actual data could result in higher or lower payments to hospitals for the intervening years, MedPAC believes that CMS should provide an adjustment that lies somewhere in the middle of its own estimate of 2.0 percent and CMS' estimate of 4.8 percent. In its comments, MedPAC recommended that CMS should adopt an adjustment for improvements in documentation and coding between 1.6 and 1.8 percent per year that would ''put both Medicare and the hospital industry at some risk that the actual value will turn out to be higher or lower than the adjustment that is applied.'' [19]

Comment: Several commenters agreed with RAND's assertion that the magnitude of coding improvement is likely to vary across hospitals, depending on how strong their current coding practices are and the resources they are able to devote to improving them. One commenter stated that the hospitals that already use the more specific codes and those with a low proportion of cases in split DRGs would receive fewer, if any, overpayments because their case mix indices would not increase as much, or at all. The commenter stated that New York hospitals, in particular, would have less opportunity for coding improvement than other hospitals because the union of the Medicare CC list and the New

[18] Wynn, Barbara O., Beckett, Megan, et al., ''Evaluation of Severity Adjusted DRG System: Draft Interim Report,'' RAND HEALTH, August, 2007, Addendum, page 27.

[19] Medicare Payment Advisory Commission: Letter to Acting Administrator Leslie Norwalk, June 11, 2007, page 13.

York State CC list has 279 more codes than the Medicare CC list alone. Thus, moving from the union of the CC list to the revised CC list would add only 1,298 codes, 279 fewer codes than in the rest of the country. Furthermore, New York hospitals are well-practiced in using specific codes because the New York State AP–DRG grouper differentiates between CCs and major CCs, as the MS–DRG grouper would do. This commenter and others that cited the RAND study agree that CMS' practice of making an across-the-board adjustment to PPS payments to address case mix increases attributable to coding improvements raises an equity issue that CMS needs to consider. The adjustment to the standardized amount for documentation and coding for hospitals that have already improved coding would result in significant payment losses according to the commenter rather than offsetting higher case mix indices. The commenter stated that these changes are not uniform, creating unintended distributional impacts. The commenter stated that the process to make adjustments for documentation and coding is an across the board adjustment to the standardized amount, while actual changes will vary widely. This will create unintended distributional impacts across patient types, providers, and states that will in turn, according to the commenter, create push-back in providers, states, Congress, and potentially the courts.

One of these commenters acknowledged that CMS may not have the option to recoup overpayments on a hospital-specific basis, as is done in New York. The commenter suspected that the proposed documentation and coding adjustment is too high because hospitals in other states—particularly New York—have more experience with secondary diagnosis coding than the Maryland hospitals had before their change to APR DRGs. Therefore, hospitals in other states probably have less opportunity to generate documentation and coding improvements that increase case mix.

Response: We agree that completeness of hospital coding practices may well vary across hospitals. Although we recognize this variability, we believe there will be potential for coding improvements to increase case mix for all hospitals. For instance, as noted above, a hospital can change the order of a principal and secondary diagnosis for closely related conditions to affect payment. The selection of a principal diagnosis that was previously coded as secondary can increase hospital payment. This type of potential coding change to increase case mix could be available to all hospitals irrespective of whether or not they maximized coding in the past. As noted above, a commenter examined data from New York State discharges and indicated that if MCC and CC codes that are currently provided beyond the original 9 diagnoses on the claim that are used by Medicare are moved to the first 9 positions, case mix would increase by 0.5 percent. Thus, this comment indicates that there will be at least some opportunity to increase case mix through improvements in documentation and coding in States like New York that have used sophisticated DRG systems in the past for payment. Similarly, there are public comments suggesting hospitals can select a specified condition in place of an unspecified one to increase payment under the MS–DRGs but that this change in documentation and coding practice will not be applicable in areas of the country where a DRG system is in use that distinguishes between MCCs and CCs. As noted above, congestive heart failure, unspecified appears on an average of 2.3 million cases per year from FY 2004 to FY 2006 or on over 20 percent of the Medicare claims. In our view, billing of an unspecified code on this magnitude of claims suggests potential improvements in coding from substituting a specified for an unspecified code are widespread. While improvements in documentation and coding that increase case mix may be variable, section 1886(d)(3)(A)(vi) of the Act only allows us to apply the adjustments that are a result of changes in the coding or classification of discharges that do not reflect real changes in case mix to the standardized amounts.

Comment: Several commenters indicated that there should be a transition to the MS–DRGs. A number of commenters supported a 4-year transition period for implementing the MS–DRGs. The commenters stated that such a transition would allow hospitals the opportunity to educate their employees and physicians to assure proper, accurate coding, along with allocation of required resources through their budgetary process. The commenters recommended that FY 2008 be used to prepare for and test the MS–DRGs. In FY 2009 through 2011, the DRG weights would be computed as a blend of the MS–DRGs and the current DRGs. These commenters believed a 1-year delay would provide hospitals adequate time to implement and test the new system and adjust operations and staffing for predicted revenues. They also suggested that the 1-year delay would provide CMS adequate time to finalize data and a CC list, introduce and test software for case classification and payment, and train its fiscal agents. It would also allow vendors and State agencies time to incorporate such changes into their respective software and information systems. Other commenters were concerned that CMS would implement the MS–DRGs in FY 2008 and then, as a result of the final RAND report, move to another new system for FY 2009. These commenters urged CMS to delay the implementation of the MS–DRGs if there was a possibility for another completely new system in FY 2009. These commenters stated that hospitals will expend a large number of hours educating their coding staff about the MS–DRGs so that they can attempt to legitimately optimize their payment. Some commenters recommended that CMS implement the MS–DRGs effective October 1, 2007, with a 3-year phase-in approach of the relative weights.

One commenter indicated that CMS should phase in the revised CC list and MS–DRGs to reduce the amount of documentation and coding related overpayments that would be made ''in the first place.'' The commenter recommended that the MS–DRGs not be implemented in FY 2008. Instead, they recommend that the revised CC list be used with a Version 25.0 of the current CMS DRGs and allow vendors of the alternative severity systems being evaluated by RAND to incorporate this information into an updated version of their systems. The commenter stated that the updated version of the CMS DRGs using the revised CC list would produce a greatly improved DRG GROUPER. The commenter recommended a 5-year phase-in during which the old CC list/CMS–DRG weights and the new CC list/MS–DRG weights would be blended in the following proportions: 80/20 percent in FY 2008, 60/40 percent in FY 2009, 40/60 percent in FY 2010, 20/80 percent in FY 2011, and 0/100 percent in FY 2012. The commenter stated that CMS should release the MS–DRG grouper software as soon as possible and should also encourage vendors to release products as soon as possible that ensure that both old and new CCs are listed among the first eight secondary diagnoses, as these are the only ones that can be used for payment purposes. With respect to the phase-in, the commenter believed it is prudent to begin to use the new CC list/MS–DRGs in FY 2008 so that hospitals are compelled as soon as possible (1) to improve their coding, and (2) to educate

their physicians about complete documentation. However, the commenter would not want the new DRG weights to represent a majority of the blend until they can be based on the first year of corrected data. The FY 2010 weights would be based on the FY 2008 cases, so they would reflect the first year's coding corrections and would presumably be more accurate. Because it can take several years for hospitals and physicians to adjust to new documentation and coding requirements, continuing blended payments in FY 2011 would be important to minimize documentation and coding related overpayments, according to the commenter.

The commenter stated that the goal is to minimize the aggregate level of documentation and coding related overpayments so that hospitals not generating increases in case mix are not unfairly penalized by an across-the-board reduction. If overpayments could be recouped on a hospital-specific basis, the commenter stated that an attenuated phase-in would not be necessary. The commenter stated that they realized that their recommended phase in would be cumbersome because each case would have to be grouped twice to determine the DRG assignment under the CMS DRG and MS–DRG GROUPERS. However, the commenter believed this is the better policy option since the alternative for good-coding hospitals and those with relatively few patients in split DRGs would be to effectively eliminate the IPPS update for 2 years.

Response: We received many comments in support of the MS–DRGs, particularly because they are so structurally similar to the current DRGs, and therefore, we believe that a full year's delay is unwarranted. While the MS–DRGs include some consolidations of base DRGs, the major changes from the current DRGs simply involve adding severity levels to many of the new MS–DRGs. The move to MS–DRGs will not necessitate additional data elements or changes in reporting practices. Providers will be submitting the same clinical information on their claims. In our view, the issues in the comments concerning the need to examine the new system in detail do not justify delaying the move to this new system. We have provided detailed information in both the proposed and final rule as well as on our Web site on the formation of the MS–DRGs. We believe the significant benefits of the new system outweigh concerns by the provider community that they have not had time to analyze the details of the new system. We are confident that once they start working with the new system, they will find it simple to understand and far better at identifying and paying for more costly and severely ill patients. Accordingly, we do not believe that extensive preparation for implementation of the MS DRGs is necessary, and therefore, we are not delaying adoption of the MS–DRGs until FY 2009.

MedPAC also carefully evaluated the options of implementing MS–DRGs in FY 2008 versus deferring the implementation until FY 2009 and agrees with our assessment that there is not sufficient cause to delay the proposed adoption of MS–DRGs beyond FY 2008. While MedPAC agreed that MS–DRGs should be implemented in FY 2008, it also stated that the transition should coincide with the transition to cost-based weights—that is, implement the MS–DRGs over a 2-year period beginning in FY 2008.[20] We agree with MedPAC that the MS–DRGs should be implemented over a 2-year transition period that coincides with the phase-in of cost-based weights. Therefore, we will implement MS–DRGs beginning in FY 2008 over a 2-year transition period where the DRG relative weights will be a blend of 50 percent each of the CMS DRG and MS DRG weights. We have provided more detail in section II.D.2. of the preamble of this final rule with comment period about the DRG relative weight calculations over this 2-year transition period.

There appears to be a suggestion in many of the public comments both here and above that delaying implementation of MS–DRGs will allow the improvements in documentation and coding to occur before they have any financial impact on the Medicare program because hospitals would know and be encouraged to code using the incentives provided under the MS–DRGs, while Medicare would continue to be using the current CMS DRGs for payment. As discussed, one comment suggested that we could lessen the need for the documentation and coding adjustment by minimizing the financial impact of improvements in documentation and coding through a long transition period (5 years). We believe hospitals will not improve documentation and coding consistent with the incentives provided under the MS–DRGs unless they have a financial incentive to do so. As indicated in one public comment, ''Documentation and numbers of diagnosis codes is inevitably incomplete due to time pressures for completion of 'paperwork' and limitation of computer systems to capture this information. If an item is not used and/or not important, it is less well documented.''

If there is a delay in MS–DRGs, the coding incentives that would come with its adoption would not be present and, therefore, likely would not occur. While we appreciate the suggestion for adopting a long transition period to provide an incentive to improve coding but minimize its financial impact on Medicare, such an idea may well just extend the period of time that documentation and coding improvements occur while delaying the improvements in recognition of severity of illness that would result from adopting MS DRGs. Again, we do not believe that either delaying or adopting MS–DRGs over a long period of time will reduce the need to apply a documentation and coding adjustment of the magnitude we estimated. We believe that adopting either of the ideas would only result in us needing to delay or extend the period of time over which the documentation and coding adjustment is applied.

Comment: MedPAC indicated that case-mix might increase more or less than the 4.8 percent we estimated from Maryland's experience. MedPAC recommended an adjustment between 1.6 and 1.8 percent a year for 2 years. This adjustment is based on a comparison between the MS–DRGs in Maryland and nationally (2.0 percent over 2 years) increased:

- To reflect their view that many hospitals do not respond quickly to improve reporting after major changes in the DRG definitions; and
- The estimated change in case-mix for hospitals in the rest of the nation may reflect some improvements in documentation and coding in response to changes in the DRG definitions that were adopted in 2006 (such as the refinements to the cardiac care DRGs among others).

MedPAC recommended that we apply an adjustment that is somewhere in the middle between their estimate of 2.0 and the CMS figure of 4.8 percent. According to MedPAC, a middle point in the range of 1.6 to 1.8 percent per year would put both Medicare and the hospital industry at some risk that the actual value will turn out to be higher or lower than the adjustment that is applied. If the actual increase due to improvements in case-mix reporting turns out to be higher, the Medicare program will have paid more than it should have. If the actual increase is lower, the hospitals will have been paid less than they should have. MedPAC noted that we have already stated a willingness to correct for any difference

[20] Medicare Payment Advisory Commission: Letter to Acting Administrator Leslie Norwalk, June 11, 2007, page 10.

between our forecast and the actual increase in case mix due to improved coding when data become available in 2009 when we prepare the proposed rule for fiscal year 2010. MedPAC further suggested that CMS plan on taking coding adjustments for longer than two years. CMS may want to adopt a series of adjustments that takes somewhat higher adjustments in the first few years of the MS–DRG changes, on the assumption that history has shown that previous coding adjustments have underestimated the impact of the changes.

Response: We proposed to adjust the IPPS standardized amounts by −2.4 percent each year for FYs 2008 and 2009 for improvements in documentation and coding that will increase case-mix. As we are adopting the MS–DRGs over a 2-year transition period, we do not believe that the incentives to improve documentation and coding will be as strong in the first year as we previously estimated. Further, as suggested above by the evidence when the IPPS was first implemented, MedPAC, and other public comments, it can take several years for hospitals and physicians to adjust their documentation and coding practices in response to payment incentives. For these reasons, we believe the documentation and coding adjustment should be applied over a period of 3 rather than 2 years. We do not agree with MedPAC that a larger adjustment ''should be taken in the first few years of the MS–DRGs on the assumption that history has shown that previous coding adjustments have underestimated the impact of changes.'' Rather, as stated above, we believe that the coding incentives during the first year of MS–DRGs will be lessened because we are adopting them over a 2-year transition period. Therefore, we believe a smaller adjustment should be applied in the initial year. We continue to believe that our analysis justifies a −4.8 percent adjustment for improvements in documentation and coding at this time. Therefore, we are applying an adjustment of −1.2 percent in this final rule with comment period to the IPPS standardized amounts for FY 2008 and based on current projections will apply adjustments of −1.8 percent each year to the IPPS standardized amounts for FYs 2009 and 2010.

Consistent with the statute, we will compare the actual increase in case-mix due to documentation and coding to our projection once we have actual data to revise the Actuary's estimate and the adjustment we make to the standardized amounts. With these adjustments occurring over 3 rather than 2 years, we will have information in 2009 as we prepare the IPPS rule for FY 2010 to reevaluate how the actual increase in case mix compares to our estimate. We may also have partial year information in 2008 to inform any proposal for FY 2009. Therefore, we will consider revising the planned adjustments for FY 2009 and FY 2010 if information in the Medicare billing data suggests that our projections are either too high or low compared to actual experience.

Based on the Actuary's analysis, using the Secretary's authority under section 1886(d)(3)(A)(vi) of the Act to adjust the standardized amount to eliminate the effect of changes in coding or classification of discharges that do not reflect real changes in case-mix, we are reducing the IPPS standardized amount by −1.2 percent for FY 2008. Section 1886(d)(3)(A)(vi) of the Act further gives the Secretary authority to revisit adjustments to the standardized amounts for changes in coding or classification of discharges that were based on estimates in a future year. Consistent with the statute, we will compare the actual increase in case-mix due to documentation and coding to our projection once we have actual data for FY 2008. At that time, if necessary, we may make a further adjustment to the standardized amounts to account for the difference between our projection and actual data.

7. Effect of the MS–DRGs on the Outlier Threshold

To qualify for outlier payments, a case must have costs greater than Medicare's payment rate for the case plus a ''fixed loss'' or cost threshold. The statute requires that the Secretary set the cost threshold so that outlier payments for any year are projected to be not less than 5 percent or more than 6 percent of total operating DRG payments plus outlier payments. The Secretary is required by statute to reduce the average standardized amount by a factor to account for the estimated proportion of total DRG payments made to outlier cases. Historically, the Secretary has set the cost threshold so that 5.1 percent of estimated IPPS payments are paid as outliers. The FY 2007 cost outlier threshold is $24,485. Therefore, for any given case, a hospital's charge adjusted to cost by its hospital-specific CCR must exceed Medicare's DRG payment by $24,485 for the case to receive cost outlier payments.

Adoption of the MS–DRGs will have an effect on calculation of the outlier threshold. For the proposed rule and this final rule with comment period, we analyzed how the outlier threshold would be affected by adopting the MS–DRGs. Using FY 2005 MedPAR data, we have simulated the effect of the MS–DRGs on the outlier threshold. By increasing the number of DRGs from 538 to 745 to better recognize severity of illness, the MS–DRGs would be providing increased payment that better recognizes complexity and severity of illness for cases that are currently paid as outliers. That is, many cases that are high-cost outlier cases under the current CMS DRG system would be paid using an MCC DRG under the MS–DRGs and could potentially be paid as nonoutlier cases. For this reason, we expected the FY 2008 outlier threshold to decline from its FY 2007 level of $24,485. We proposed an FY 2008 outlier threshold of $23,015. In this final rule with comment period, we are establishing an FY 2008 outlier threshold of $22,650. In section II.A.4. of the Addendum to this final rule with comment period, we provide a more detailed explanation of how we determined the final FY 2008 cost outlier threshold. We address any comments received on the FY 2008 proposed outlier threshold in section II.A.4. of the Addendum to this final rule with comment period.

8. Effect of the MS–DRGs on the Postacute Care Transfer Policy

Existing regulations at § 412.4(a) define discharges under the IPPS as situations in which a patient is formally released from an acute care hospital or dies in the hospital. Section 412.4(b) defines transfers from one acute care hospital to another. Section 412.4(c) establishes the conditions under which we consider a discharge to be a transfer for purposes of our postacute care transfer policy. In transfer situations, each transferring hospital is paid a per diem rate for each day of the stay, not to exceed the full DRG payment that would have been made if the patient had been discharged without being transferred.

The per diem rate paid to a transferring hospital is calculated by dividing the full DRG payment by the geometric mean length of stay for the DRG. Based on an analysis that showed that the first day of hospitalization is the most expensive (60 FR 45804), our policy provides for payment that is double the per diem amount for the first day (§ 412.4(f)(1)). Transfer cases are also eligible for outlier payments. The outlier threshold for transfer cases is equal to the fixed-loss outlier threshold for nontransfer cases, divided by the geometric mean length of stay for the DRG, multiplied by the length of stay for the case, plus one day. The purpose of the IPPS postacute care transfer payment policy is to avoid providing an incentive for a hospital to transfer

patients to another hospital early in the patients' stay in order to minimize costs while still receiving the full DRG payment. The transfer policy adjusts the payments to approximate the reduced costs of transfer cases.

Beginning with the FY 2006 IPPS, the regulations at § 412.4 specified that, effective October 1, 2005, we make a DRG subject to the postacute care transfer policy if, based on Version 23.0 of the DRG Definitions Manual (FY 2006), using data from the March 2005 update of FY 2004 MedPAR file, the DRG meets the following criteria:

- The DRG had a geometric mean length of stay of at least 3 days;
- The DRG had at least 2,050 postacute care transfer cases; and
- At least 5.5 percent of the cases in the DRG were discharged to postacute care prior to the geometric mean length of stay for the DRG.

In addition, if the DRG was one of a paired set of DRGs based on the presence or absence of a CC or major cardiovascular condition (MCV), both paired DRGs would be included if either one met the three criteria above.

If a DRG met the above criteria based on the Version 23.0 DRG Definitions Manual and FY 2004 MedPAR data, we made the DRG subject to the postacute care transfer policy. We noted in the FY 2006 final rule that we would not revise the list of DRGs subject to the postacute care transfer policy annually unless we make a change to a specific CMS DRG. We established this policy to promote certainty and stability in the postacute care transfer payment policy. Annual reviews of the list of CMS DRGs subject to the policy would likely lead to great volatility in the payment methodology with certain DRGs qualifying for the policy in one year, deleted the next year, only to be reinstated the following year. However, we noted that, over time, as treatment practices change, it was possible that some CMS DRGs that qualified for the policy will no longer be discharged with great frequency to postacute care. Similarly, we explained that there may be other CMS DRGs that at that time had a low rate of discharges to postacute care, but which might have very high rates in the future.

The regulations at § 412.4 further specify that if a DRG did not exist in Version 23.0 of the DRG Definitions Manual or a DRG included in Version 23.0 of the DRG Definitions Manual is revised, the DRG will be a qualifying DRG if it meets the following criteria based on the version of the DRG Definitions Manual in use when the new or revised DRG first became effective, using the most recent complete year of MedPAR data:

- The total number of discharges to postacute care in the DRG must equal or exceed the 55th percentile for all DRGs; and
- The proportion of short-stay discharges to postacute care to total discharges in the DRG exceeds the 55th percentile for all DRGs. A short-stay discharge is a discharge before the geometric mean length of stay for the DRG.

A DRG also is a qualifying DRG if it is paired with another DRG based on the presence or absence of a CC or MCV that meets either of the above two criteria.

The MS–DRGs that we proposed to adopt (and are finalizing in this final rule with comment period) for FY 2008 are a significant revision to the current CMS DRG system. Because the new MS–DRGs are not reflected in Version 23.0 of the DRG Definitions Manual, consistent with § 412.4, we proposed to recalculate the 55th percentile thresholds in order to determine which MS–DRGs would be subject to the postacute care transfer policy. Further, under the MS–DRGs, the subdivisions within the base DRGs will be different than those under the current CMS DRGs. Unlike the current CMS DRGs, the MS–DRGs are not divided based on the presence or absence of a CC or MCV. Rather, the MS–DRGs have up to three subdivisions based on: (1) The presence of a MCC; (2) the presence of a CC; or (3) the absence of either an MCC or CC. Consistent with our existing policy under which both DRGs in a CC/non-CC pair are qualifying DRGs if one of the pair qualifies, we proposed that each MS–DRG that shared a base MS–DRG would be a qualifying DRG if one of the MS–DRGs that shared the base DRG qualified. We proposed to revise § 412.4(d)(3)(ii) to codify this policy.

Similarly, we believe that the changes to adopt MS–DRGs also necessitate a revision to one of the criteria used in § 412.4(f)(5) of the regulations to determine whether a DRG meets the criteria for payment under the ''special payment methodology.'' Under the special payment methodology, a case subject to the special payment methodology that is transferred early to a postacute care setting will be paid 50 percent of the total IPPS payment plus the average per diem for the first day of the stay. Fifty percent of the per diem amount will be paid for each subsequent day of the stay, up to the full MS–DRG payment amount. A CMS DRG is currently subject to the special payment methodology if it meets the criteria of § 412.4(f)(5). Section 412.4(f)(5)(iv) specifies that if a DRG meets the criteria specified under § 412.4(f)(5)(i) through (f)(5)(iii), any DRG that is paired with it based on the presence or absence of a CC or MCV is also subject to the special payment methodology. Given that this criterion would no longer be applicable under the MS–DRGs, we proposed to add a new § 412.4(f)(6) that includes a DRG in the special payment methodology if it is part of a CC/non-CC or MCV/non-MCV pair. We proposed to update this criterion so that it conforms to the proposed changes to adopt MS–DRGs for FY 2008. The revision would make an MS–DRG subject to the special payment methodology if it shares a base MS–DRG with an MS–DRG that meets the criteria for receiving the special payment methodology.

Comment: One commenter urged CMS to ''suspend application of the postacute care transfer policy for one year, until sufficient data is available, and then apply the criteria anew to the MS–DRGs.'' As an alternative to ceasing the application of the postacute care transfer policy for one year, the commenter recommended that CMS limit the application of the postacute care transfer policy as much as possible until better data are available and not to increase the average length of stay for less complicated DRGs over their current levels.

Response: Under both the CMS DRGs and MS–DRGs, there were two criteria for making a DRG subject to the postacute care transfer policy. These criteria are:

- The total number of discharges to postacute care in the DRG must equal or exceed the 55th percentile for all DRGs; and
- The proportion of short-stay discharges to postacute care to total discharges in the DRG must equal or exceed the 55th percentile for all DRGs.

While these criteria are identical under the CMS DRGs and the MS–DRGs, we needed to recalculate the 55th percentile thresholds in order to determine which MS–DRGs would be subject to the postacute care transfer policy to conform the existing policy to the new DRG system. Further, we also needed to make a conforming change to our policy that a DRG is subject to the postacute care transfer policy if it is one of a paired set of DRGs based on the presence or absence of a CC or MCV where one of the DRGs in the set meets the numerical criteria specified above. As the MS–DRGs have subdivisions based on MCC, CCs and non-CCs rather than MCVs, CCs and non-CCs, we needed to amend the regulatory text to reflect the nomenclature of the MS–DRG system. Therefore, our policy for making a DRG subject to the postacute care transfer policy under the MS–DRGs is unchanged other than to make it

conform to the new DRG system. As our policy is unchanged, we do not believe that either suspending or limiting application of the postacute care transfer policy under the MS–DRGs is warranted.

Comment: One commenter opposed CMS' ''proposal to significantly expand the list of the DRGs subject to the postacute care transfer policy.'' The commenter, a hospital, noted that ''manual processes'' would have to take place in order to identify patients meeting the home health criteria. Specifically, the commenter stated that, ''hospitals [would] either have to contact patients to determine if they have received home health services within 3 days after discharge or wait for the fiscal intermediary to let the hospital know that a patient received home care that was not planned at the time of discharge which requires coders to review and correct the disposition and for the Business Office to resubmit the claim.''

Response: We note that we did not propose to change or expand the postacute care transfer policy provision in this year's proposed rule. Rather, we applied existing post-acute transfer policy to the new MS–DRG system. Thus, the criteria that would have made a CMS–DRG subject to the postacute care transfer policy last year were the same as those applied to the MS–DRGs for FY 2008. We note that in FY 2007, 190 CMS DRGs of 538 CMS DRGs were subject to the postacute care transfer policy, or about 35 percent. For FY 2008, 273 out of 745 MS–DRGs are subject to the postacute care transfer policy or about 36 percent. Therefore, the proportion of postacute care transfer MS–DRGs subject to the policy is very similar to what it was last year under the CMS DRGs. Thus, we disagree there has been a ''significant expansion'' of DRGs subject to the postacute care transfer policy. Rather, we are simply conforming the existing postacute care transfer policy to the new MS–DRGs.

In response to the commenter's concern about it being administratively burdensome to identify patients who received home health care services subsequent to discharge from the acute care hospital, we note that, under section 1886(d)(5)(J)(ii)(III) of the Act, the term ''qualified discharge'' includes a discharge from an IPPS hospital upon which the patient is provided home health services from a home health agency if such services relate to the condition or diagnosis for which the patient received hospital inpatient services. The proposed rule did not make any change to application of the postacute care transfer policy in this circumstance. We note that, in most instances, patients are discharged from the acute hospital with a written plan of care for the provision of home health services, so hospitals would usually know if a patient was going to receive home health care services at the time of discharge. Additionally, we do not expect that the administrative burden of identifying patients discharged to home for the provision of home health services within 3 days will be any greater under the MS–DRG system than it was under the CMS DRG system because the proportion of DRGs subject to the postacute care transfer policy is very similar under both systems.

Comment: One commenter stated that it is unreasonable to categorize all three MS–DRGs in the same base DRG as subject to the postacute care transfer policy if only one of the three meets the criteria. The commenter suggested that, for base MS–DRGs where there are three base-DRGs, two of the three base-DRGs should meet the postacute care transfer criteria (on their own) for all of them to be subject to the postacute care transfer policy and that if only one meets the criteria, none should be subject to the postacute care transfer policy.

Response: Under the CMS DRG system, some DRGs were paired with others (with CC or without CC). Under that system, if one DRG qualified for the postacute care transfer policy, we included its paired DRG so as not to create an incentive for hospitals not to include any code that would identify a complicating or comorbid condition. The same logic applies under the MS–DRG system: If one DRG in a set meets the postacute care transfer criteria, we believe that it is appropriate to include the paired or grouped DRGs so as not to create any coding incentives to bypass the postacute care transfer payment. Therefore, we disagree with the commenter that it is ''unreasonable'' to include a group of MS–DRGs where only one MS–DRG in the group meets the postacute care transfer criteria on its own. We also note that we apply the same logic to the special-pay MS–DRGs. That is, if an MS–DRG qualifies to receive the special payment methodology, any other MS–DRGs that share the same base MS–DRG also qualify to receive the special payment methodology.

In this final rule with comment period, we are adopting the proposed postacute care transfer policy conforming changes as final.

In addition, § 412.4(f)(3) states that the postacute care transfer policy does not apply to CMS DRG 385 for newborns who die or are transferred. We proposed to make a conforming change to this paragraph to reflect that this CMS DRG would become MS–DRG 789 (Neonates, Died or Transferred to Another Acute Care Facility) under our proposed DRG changes for FY 2008. We did not receive any comments on this proposal and, therefore, are finalizing this conforming change as proposed.

These revisions do not constitute a change to the application of the postacute care transfer policy. Therefore, any savings attributed to the postacute care transfer policy will be unchanged as a result of adopting the MS–DRGs. Consistent with section 1886(d)(4)(C)(iii) of the Act, aggregate payments from adoption of the MS–DRGs cannot be greater or less than those that would have been made had we not made any DRG changes.

We also proposed and are adopting as final technical changes to §§ 412.4(f)(5)(i) and (f)(5)(iv) to correct a cross-reference and a typographical error, respectively.

E. Refinement of the Relative Weight Calculation

In the FY 2007 IPPS final rule (71 FR 47882), effective for FY 2007, we began to implement significant revisions to Medicare's inpatient hospital rates by basing the relative weights on hospitals' estimated costs rather than on charges. This reform was one of several measured steps to improve the accuracy of Medicare's payment for inpatient stays that include using costs rather than charges to set the relative weights and making refinements to the current CMS–DRGs so they better account for the severity of the patient's condition. Prior to FY 2007, we used hospital charges as a proxy for hospital resource use in setting the relative weights. Both MedPAC and CMS have found that the limitations of charges as a measure of resource use include the fact that hospitals cross-subsidize departmental services in many different ways that bear little relation to cost, frequently applying a lower charge markup to routine and special care services than to ancillary services. In MedPAC's 2005 Report to the Congress on Physician-Owned Specialty Hospitals, MedPAC found that hospitals charge much more than their costs for some types of services (such as operating room time, imaging services and supplies) than others (such as room and board and routine nursing care).[21] Our analysis of the MedPAC report in the FY 2007 IPPS

[21] Medicare Payment Advisory Commission:*Report to the Congress: Physician-Owned Specialty Hospitals,* March 2005, p. 26.

proposed rule (71 FR 24006) produced consistent findings.

In the FY 2007 IPPS proposed rule, we proposed to implement cost-based weights incorporating aspects of a methodology recommended by MedPAC, which we called the hospital-specific relative value cost center (HSRVcc) methodology. MedPAC indicated that an HSRVcc methodology would reduce the effect of cost differences among hospitals that may be present in the national relative weights due to differences in case mix adjusted costs. After studying Medicare cost report data, we proposed to establish 10 national cost center categories from which to compute 10 national CCRs based upon broad hospital accounting definitions. We made several important changes to the HSRVcc methodology that MedPAC recommended using in its March 2005 Report to the Congress on Physician-Owned Specialty Hospitals. We refer readers to the FY 2007 IPPS proposed rule (71 FR 24007 through 24011) for an explanation and our reasons for the modification to MedPAC's methodology. In its public comments on the FY 2007 IPPS proposed rule, MedPAC generally agreed with the adaptations we made to its methodology. MedPAC further recommended that we expand the number of distinct hospital department CCRs being used from 10 to 13, which we subsequently adopted in the FY 2007 IPPS final rule.

We did not finalize the HSRVcc methodology for FY 2007 because of concerns raised in the public comments on the FY 2007 IPPS proposed rule (71 FR 47882 through 47898). Rather, we adopted a cost-based weighting methodology without the hospital-specific relative weight feature. In response to a comment from MedPAC, we also expanded the number of distinct hospital departments with CCRs from 10 to 13. We indicated our intent to study whether to adopt the HSRVcc methodology after we had the opportunity to further consider some of the issues raised in the public comments. In the interim, we adopted a cost-based weighting methodology over a 3-year transition period, substantially mitigating the redistributive payment impacts illustrated in the proposed rule, while we engaged a contractor to assist us with evaluating the HSRVcc methodology.

Some commenters raised concerns about potential bias in cost-based weights due to ''charge compression,'' which is the practice of applying a lower percentage markup to higher cost services and a higher percentage markup to lower cost services. These commenters were concerned that our proposed weighting methodology may undervalue high cost items and overvalue low cost items if a single CCR is applied to items of widely varying costs in the same cost center. The commenters suggested that the HSRVcc methodology would exacerbate the effect of charge compression on the final relative weights. One of the commenters suggested an analytic technique of using regression analysis to identify adjustments that could be made to the CCRs to better account for charge compression. We indicated our interest in researching whether a rigorous model should allow an adjustment for charge compression to the extent that it exists. We engaged a contractor, RTI International (RTI), to study several issues with respect to the cost-based weights, including charge compression, and to review the statistical model provided to us by the commenter for adjusting the weights to account for it. We discuss RTI's findings in detail below.

Commenters also suggested that the cost report data used in the cost methodology are outdated, not consistent across hospitals, and do not account for the costs of newer technologies such as medical devices. However, the relationship between costs and charges (not costs alone) is the important variable in setting the relative weights under this new system. Older cost reports also do not include the hospital's higher charges for these same medical devices. Therefore, it cannot be known whether the CCR for the more recent technologies will differ from those we are using to set the relative weights. The use of national average cost center CCRs rather than hospital-specific CCRs may mitigate potential inconsistencies in hospital cost reporting. Nevertheless, in the FY 2007 IPPS final rule, we agreed that it was important to review how hospitals report costs and charges on the cost reports and on the Medicare claims and asked RTI to further study this issue as well.

In summary, we proposed to adopt HSRVcc relative weights for FY 2007 using national average CCRs for 10 hospital departments. Based on public comments concerned about charge compression and the accuracy of cost reporting, we decided not to finalize the HSRVcc methodology, but adopted cost-based weights without the hospital specific feature. In response to comments from MedPAC, we expanded the number of hospital cost centers used in calculating the national CCRs from 10 to 13. Finally, we decided to implement the cost-based weighting methodology gradually, by blending the cost-based and charge-based weights over a 3-year transition period beginning with FY 2007, while we further studied many of the issues raised in the public comments. We refer readers to the FY 2007 IPPS final rule (71 FR 47882) for more details on our final policy for calculating the cost-based DRG relative weights.

1. Summary of RTI's Report on Charge Compression

In August 2006, we awarded a contract to RTI to study the effects of charge compression in calculating DRG relative weights. The purpose of the study was to develop more accurate estimates of the costs of Medicare inpatient hospital stays that can be used in calculating the relative weights per DRG. RTI was asked to assess the potential for bias in relative weights due to CCR differences within the 13 CCR groups used in calculating the cost-based DRG relative weights and to develop an analysis plan that explored alternative methods of estimating costs with the objective of better aligning the charges and costs used in those calculations. RTI was asked to consider methods of reducing the variation in CCRs across services within cost centers by:

- Modifying existing cost centers and/or creating new centers.
- Using statistical methods, such as the regression adjustment for charge compression. Some commenters on the FY 2007 IPPS proposed rule suggested that we use a regression adjustment to account for charge compression.

As part of its contract, RTI convened a Technical Expert Panel composed of individuals representing academic institutions, hospital associations, medical device manufacturers, and MedPAC. The members of the panel met on October 27, 2006, to evaluate RTI's analytic plan, to identify other areas that are likely to be affected by compression or aggregation problems, and to propose suggestions for adjustments for charge compression. We posted RTI's draft interim report on the CMS Web site in March 2007. For more information, interested individuals can view RTI's report at the following Web site: *http://www.cms.hhs.gov/Reports/Reports/itemdetail.asp?itemID=CMS1197292.* The report may also be viewed on RAND's Web site at *http://www.rand.org/pubs/online/health.*

As the first step in its analysis, RTI compared the reported Medicare program charge amounts from the cost reports to the total Medicare charges summed across all claims filed by providers. Using cost and charge data

from the most recent available Medicare cost reports and inpatient claims from IPPS hospitals, RTI was charged with performing an analysis to determine how well the MedPAR charges matched the cost report charges used to compute CCRs. The accuracy of the DRG cost estimates is directly affected by this match because MedPAR charges are multiplied by CCRs to estimate cost. RTI found consistent matching of charges from the Medicare cost report to charges grouped in the MedPAR claims for some cost centers but there appeared to be problems with others. For example, RTI found that the data between the cost report and the claims matched well for total discharges, days, covered charges, nursing unit charges, pharmacy, and laboratory. However, there appeared to be inconsistent reporting between the cost reports and the claims data for charges in several ancillary departments (medical supplies, operating room, cardiology, and radiology). For example, the data suggested that hospitals often include costs and charges for devices and other medical supplies within the Medicare cost report cost centers for Operating Room, Radiology or Cardiology, while other hospitals include them in the Medical Supplies cost center.

RTI found that some charge mismatching results from the way in which charges are grouped in the MedPAR file. Examples include the intermediate care nursing charges being grouped with intensive care nursing charges and electroencephalography (EEG) charges being grouped with laboratory charges. RTI suggested that reclassifying intermediate care charges from the intensive care unit to the routine cost center could address the former problem.

As the second step in its analysis, RTI reviewed the existing cost centers that are combined into the 13 groups used in calculating the national average CCRs. RTI identified CCRs with potential aggregation problems and considered whether separating the charge groups could result in more accurate cost conversion at the DRG level. The analysis led RTI to calculate separate CCRs for Emergency Room and Blood and Blood Administration, both of which had been included in ''Other Services'' in FY 2007.

During this second step, RTI noted that a variation of charge compression is also present in inpatient nursing services because most patients are charged a single type of accommodation rate per day that is linked to the type of nursing unit (routine, intermediate, or intensive), but not to the hours of nursing services given to individual patients. Unlike the situation with charge compression in ancillary service areas, there are virtually no detailed charge codes that can distinguish patient nursing care use. Therefore, any potential bias cannot be empirically evaluated or adjustments made without additional data.

Next, RTI examined individual revenue codes within the cost centers and used regression analysis to determine whether certain revenue codes in the same cost center had significantly different markup rates. Those revenue codes include devices, prosthetics, implants within the Medical Supplies cost center, IV Solutions within the Drugs cost center, CT scanning and MRI within the Radiology cost center, Cardiac Catheterization within the Cardiology cost center, and Intermediate Care Units within the Routine Nursing Care cost center. Devices, prosthetics, and implants within the Medical Supplies cost center have a lower markup and, as a result, a higher CCR than the remainder of the medical supplies group according to RTI's analysis. Within the Drugs CCR, IV Solutions have a much higher markup and much lower CCR than the other drugs included in the category. Within the Radiology CCR, CT scanning and MRI have higher markups and lower CCRs than the remaining radiology services. RTI's results for Cardiac Catheterization and Intermediate Care Units were ambiguous due to data problems.

RTI's analysis also determined the impact of the disaggregated CCRs on the relative weights. Differences in CCRs alone do not necessarily alter the DRG relative weights. The impact on the relative weights is the result of the interaction of CCR differences and DRG differences in the proportions of the services with different CCRs. In FY 2007, we calculated relative weights using CCRs for 13 hospital departments. The RTI analysis suggests expanding the number of distinct hospital department CCRs from 13 to 19. Of the additional six CCRs, two would result from separating the Emergency Department and Blood (Products and Administration) from the residual ''Other Services'' category. Four additional CCRs would result from applying a regression method similar to a method suggested in last year's public comments to three existing categories: supplies, radiology, and drugs. This method, as adapted by RTI, used detailed coding of charges to disaggregate hospital cost centers and derive separate, predicted alternative CCRs for the disaggregated services. RTI's analysis suggests splitting Medical Supplies into one CCR for Devices, Implants, and Prosthetics and one CCR for Other Supplies; splitting Radiology into one CCR for MRIs, one CCR for CT scans, and one CCR for Other Radiology; and splitting Drugs into one CCR for IV Solutions and one CCR for Other Drugs.

RTI's draft report provides the potential impacts of adopting these changes to the CCRs. We note that RTI's analysis was based on Version 24.0 of the CMS DRGs. Because the proposed MS–DRGs were under development for the FY 2008 IPPS proposed rule, they were unavailable to RTI for their analysis. The results of RTI's analysis may be different if applied to the MS–DRGs. However, it seems reasonable to believe that the impact of RTI's suggestions will be consistent using Version 24.0 of the CMS DRGs and the MS–DRGs, as both systems generally use the same base DRGs while applying different subdivisions to recognize severity of illness. Of all the adjusted CCRs, the largest impact on weights came from accounting for charge compression in medical supplies for devices and implants. The impact on weights from accounting for CCR differences among drugs was modest. The impact of splitting MRI and CT scanning from the radiology CCR was greater than the impact of modifying the Drugs CCRs, but less than the impact of splitting the Medical supplies group. Separating Emergency Department and Blood Products and Administration from the ''Other Services'' category would raise the CCR for other services in the group.

RTI found that disaggregating cost centers may have a mitigating effect on the impact of transitioning from charge-based weights to cost-based weights. That is, the changes being suggested by RTI will generally offset (fully or more than fully in some cases or in part in other cases) the impacts of fully implemented cost-based weights that we are adopting over the FY 2007–FY 2009 transition period. Thus, RTI's analysis suggests that expanding the number of distinct hospital department CCRs used to calculate cost-based weights from 13 to 19 will generally increase the relative weights for surgical DRGs and decrease them for the medical DRGs compared to the fully implemented cost-based weights to which we began transitioning in FY 2007.

2. RTI Recommendations

In its report, RTI provides recommendations for the short term, medium term, and long term, to mitigate aggregation bias in the calculation of relative weights. We summarize RTI's

recommendations below and respond to each of them.

a. Short-Term Recommendations

Most of RTI's short-term recommendations have already been described above. The most immediate changes that RTI recommends implementing include expanding from 13 distinct hospital department CCRs to 19 by:

- Disaggregating ''Emergency Room'' and ''Blood and Blood Products'' from the ''Other Services'' cost center;
- Establishing regression-based estimates as a temporary or permanent method for disaggregating the Medical Supplies, Drugs, and Radiology cost centers; and
- Reclassifying intermediate care charges from the intensive care unit cost center to the routine cost center.

We believe these recommendations have significant potential to address issues of charge compression and potential mismatches between how costs and charges are reported in the cost reports and on the Medicare claims.

RTI's recommendations show significant promise in the short term for addressing issues raised in the public comments on the cost-based weights in the FY 2007 IPPS proposed rule. However, in the time available for the development of the proposed rule, we were unable to investigate how RTI's recommended changes may interact with other potential changes to the DRGs and to the method of calculating the DRG relative weights. As we noted above, RTI's analysis was done on the Version 24.0 of the CMS DRGs and not the MS–DRGs we proposed for FY 2008. For the proposed rule and this final rule with comment period, we were not able to examine the combined impacts of the MS–DRGs and RTI's recommendations. In addition, we believe it is also important to consider that, in the FY 2007 IPPS final rule (71 FR 47897), we anticipated undertaking further analysis of the HSRVcc methodology over the next year in conjunction with the research we were to do on charge compression. Analysis of the HSRVcc methodology will be part of the second phase of the RAND study of alternative DRG systems to be completed by September 1, 2007, that has not been completed in time for this final rule with comment period. As a result, we have also been unable to consider the effects of the HSRVcc methodology together with the MS–DRGs and RTI's recommendations. Finally, we note that in order to complete the analysis in time for the proposed rule or this final rule with comment period, RTI's study used only hospital inpatient claims. However, hospital ancillary departments typically include both inpatient and outpatient services within the same department and only a single CCR covering both inpatient and outpatient services can be calculated from Medicare cost reports. Although we believe that applying the regression method used by RTI to only inpatient services is unlikely to have had much impact for the adjustments recommended by RTI, the preferred approach would be to apply the regression method to the combined inpatient and outpatient services. The latter approach would ensure that any potential CCR adjustments in the IPPS would be consistent with potential CCR adjustments in the OPPS. We hope to expand their analysis to incorporate outpatient services during the coming year.

Although we did not propose to adopt RTI's recommendations for FY 2008, we solicited public comments on expanding from 13 CCRs to 19 CCRs. Again, we noted that RTI's analysis suggests significant improvements that could result in the cost-based weights from adopting its recommendations to adjust for charge compression. Therefore, we also expressed interest in public comments on whether we should proceed to adopt the RTI recommended changes for FY 2008 in the absence of a detailed analysis of how the relative weights would change if we were to address charge compression while simultaneously adopting an HSRVcc methodology together with the MS–DRGs. Given the change in the impacts that were illustrated in last year's FY 2007 IPPS final rule (71 FR 47915–47916), going from a hospital-specific to a nonhospital-specific cost-weighting methodology, we believe that sequentially adjusting for charge compression and later adopting an HSRVcc methodology could create the potential for instability in IPPS payments over the next 2 years (that is, payments for surgical DRGs would increase and payment for medical DRGs would decrease if we were to adopt the RTI recommended changes for FY 2008, but could potentially reverse direction if we were to adopt an HSRVcc methodology for FY 2009). Again, we solicited public comments on all of these issues before making a final decision as to whether to proceed with the RTI's short-term recommendations in the final rule for FY 2008.

Comment: Many commenters commented on whether we should proceed in adopting the recommendations made by RTI in its January 2007 report, particularly concerning changes in cost reporting practices and the additional, regression-based CCRs. Several commenters focused on problems highlighted by RTI with the inconsistent and varying methods in which hospitals group their charges in MedPAR and report costs and charges on the Medicare cost report, which can result in distortions in the DRG weights. Some commenters asserted that mismatching is not caused by the failure of hospitals to prepare their cost reports correctly, as appeared to be suggested by the RTI study. Other commenters noted that RTI recommends the incorporation of edits to reject cost reports or require more intensive review by auditors to resolve the lack of uniformity in cost reporting. However, the commenters believed that such edits or audits will not solve the mismatch problem because hospitals' reporting is consistent with the cost reporting instructions. The commenters described that, currently, cost report instructions included with the CMS Form-339 allow for three methods of reporting Medicare charges. The method selected by each hospital is specific to its information systems and based on the method that most accurately aligns Medicare program charges on Cost Report Worksheet D–4 (inpatient) and/or Worksheet D, Part IV (outpatient) with the overall cost and charges reported on Worksheets A and C. Many hospitals elect to allocate some or all of the Medicare program charges from the Medicare Provider Statistical and Reimbursement (PS&R) data to various lines in the cost report based on hospital-specific financial system needs. Under this scenario, total hospital CCRs are aligned with the hospital's program charges, but would not match the charge groupings used in MedPAR.

Instead of increased edits or cost report rejections, the commenters believed that hospitals must be educated to report costs and charges, particularly for supplies, in a way that is consistent with how MedPAR groups charges. The commenters are launching such an educational campaign, which would encourage consistent reporting that they believe would, in turn, produce consistent groupings of departments within the 13 cost center groups that are currently used to create the cost-based weights, or any future expansion of the categories that may occur. The commenters stated that their educational efforts will take time and CMS should recognize that some hospitals will be in a better position to adopt certain cost report changes more rapidly because the changes may be more expensive and time-consuming for some hospitals to adopt relative to

others. The commenters requested that CMS communicate with its fiscal intermediaries/MAC that such action is appropriate and encouraged for improvements in Medicare's cost-based weights. The commenters were concerned that, without direction from CMS, the fiscal intermediaries/MAC may not allow hospitals to change how they report costs.

Although one commenter supported the education of hospitals in better cost reporting, this commenter opposed mandating hospitals to make these cost reporting changes. One commenter stated that ''it is important to note that charge compression results from hospitals' markup practices,'' and that the problem would be eliminated if hospitals would use a single markup for all items and services included within all revenue centers. Another commenter asserted that hospitals are not consistent in their cost reporting and the first step should be to issue cost report instructions. The next step would be to allocate audit resources to the fiscal intermediary/MAC in order to determine whether these instructions are properly implemented because reporting of costs and charges does have an indirect effect on payments to hospitals. Another commenter stated that CMS needs to place more emphasis and audit resources toward ensuring that hospitals properly complete their cost reports. However, while another commenter supported scrutiny and auditing for extreme CCRs, the commenter also appreciated that CMS has limited audit resources. One commenter stated that adjustments to revenue codes reported on the standard UB–04 claims forms may also be appropriate to better match charges on claims forms with the charges (and costs) reported on the Medicare cost report. Other commenters stated that the costing of the weights should be done at the UB revenue code level. Given the variety of ways in which hospitals report their costs and charges, it is impossible to make assumptions related to revenue codes across all hospitals without the assistance of the PS&R crosswalk, which is submitted with the filed cost report as an attachment to the CMS–339 form. The commenters noted that if CMS is going to continue a transition to cost-based weights, hospitals will need time to align their mapping of cost centers into departments or cost categories for purposes of cost reporting and claims reporting. The accurate costing of claims would be in line with the original MedPAC recommendations.

In light of the cost reporting and MedPAR mismatch problems, the commenters did not believe that a temporary, regression-based adjustment that does not fix the underlying concerns with cost reporting is appropriate. The commenters are concerned that, for the sake of expediency, the use of estimates (a regression analysis approach), as opposed to efforts to collect accurate data at the appropriate cost center level, would be insufficient. In addition, the commenters expressed doubt that a regression model can be easily validated, as the DRG weights are modified on an annual basis. One commenter argued that CMS did not include details of the regression-based adjustment in the proposed rule and, consequently, the commenter could not assess the impact of implementing the adjustment. The commenter agreed with CMS' assessment that RTI's adjustments might change if they are implemented jointly with MS–DRGs, and if estimated using both inpatient and outpatient costs and charges. This commenter, along with others, believed that, at the very least, implementation of the regression-based CCRs should be delayed, and once short-term educational efforts and CMS' long-term cost report evaluation are underway, it would be more appropriate to have an informed discussion on which cost report changes are needed to alleviate the issue of charge compression.

Response: In the FY 2008 IPPS proposed rule (72 FR 24715), we stated that because we did not have sufficient time to investigate how RTI's recommended changes might interact with other possible changes to the DRGs and the DRG relative weights, and because RTI's regression method was only applied to inpatient services and not also outpatient services, we decided not to propose implementing RTI's recommendations for FY 2008. However, we also stated that, despite these concerns, we believe RTI's recommendations have the potential to significantly address the issues of charge compression and potential mismatches between how costs and charges are reported in the cost reports and on the Medicare claims. Therefore, we solicited comments on whether we should expand the 13 CCRs to 19 CCRs for FY 2008.

We have carefully considered all comments, ranging from those urging us to adopt all 19 CCRs in FY 2008, to those believing that the regression-based CCRs should be delayed for at least a year, if used at all. Because of concerns that we and some commenters continue to have about premature adoption of the regression-based CCRs without the benefit of knowing how they will interact with other DRG changes, and the arguments in the comments summarized above concerning cost and claims reporting, we have decided to finalize our proposal to not implement the four regression-based CCRs for medical supplies and devices, IV drugs, and radiology (MRI and CT scans) for FY 2008. However, as we explain in more detail in response to comments below, we are adopting the two cost report-based CCRs for ''Emergency Room'' and ''Blood and Blood Products'' for a total of 15 national average CCRs for FY 2008. We believe these changes to the relative weight methodology do not have the disadvantages that are of concern to the commenters. That is, recognizing these additional departments will allow us to use information that is already being reported by hospitals in their cost reports and adopt some of the changes being recommended by RTI without going to a regression-based model at this time.

Many of the concerns in the comments summarized above related to how hospitals' report costs and charges on the cost report and how hospitals include charges on their bills for inpatient services or the way the charges are grouped in the MedPAR. RTI indicated that more precise cost reporting is the best solution to address the issue of charge compression in the long term. Many commenters believed that rather than rely on increased edits and audits to resolve the lack of uniformity in cost reporting, hospitals must be educated to report costs and charges in a manner that is consistent with the way in which MedPAR groups charge, and the commenters were launching an educational campaign accordingly. We agree with the educational initiative of these commenters. Participation in these educational initiatives by hospitals is voluntary. Hospitals are not required to change how they report costs and charges if their current cost reporting practices are consistent with rules and regulations and applicable instructions. However, to the extent allowed under current regulations and cost report instructions, we encourage hospitals to report costs and charges consistently with how the data are used to determine relative weights. We believe achieving this goal is of mutual benefit to both Medicare and hospitals.

The commenters also suggested that CMS should inform the fiscal intermediary/MAC that hospitals may be changing their cost reporting and allocation methodologies in response to the educational initiative, that such action is encouraged, and that more

audit resources should be allocated to fiscal intermediaries/MAC to ensure that any new cost reporting instructions are being implemented properly. First, we intend to notify the fiscal intermediaries/MAC of this cost reporting educational initiative subsequent to the issuance of this final rule with comment period, and provide both fiscal intermediaries/MAC and hospitals with guidance on how to address requests for changes in cost reporting practices from hospitals. Second, each hospital that wishes to change its cost reporting practices must follow the directives at § 413.53(a)(1) of our regulations and PRM–1, section 2203, regarding matching the charges to the costs reported in each cost center. We recommend that the hospital also disclose the changes made in a cover letter with the submission of the cost report.

Commenters submitted suggestions about how MedPAR could be modified to further distinguish categories of charges. As we stated in the proposed rule, we will consider suggestions for adding additional revenue codes to MedPAR in conjunction with other competing priorities for our information systems. We cannot create additional revenue codes. Requests for new revenue codes on hospital bills have to be made to and approved by the National Uniform Billing Committee (NUBC).

Comment: Some commenters were uncertain whether RTI's recommendations to expand certain cost categories through regression analysis is the appropriate solution to address the issue of charge compression and potential inconsistencies in how hospitals report costs and charges. The commenters supported the expansion of categories to include CCRs based on cost centers that already exist on the cost report, such as emergency department and blood products, and possibly others after further examination. Another commenter stated that creating a CCR for blood and blood products will reflect more accurately the cost of blood and will help ensure future IPPS updates will account more adequately for these products. Although one commenter understood that CMS has not been able to analyze the effect of implementing the regression adjustments with the proposed MS–DRGs, the commenter believed that CMS should adopt RTI's adjustment to the CCRs for drugs and IV solutions for FY 2008, and subsequently analyze and report on the effects of this adjustment on MS–DRGs. Another commenter noted that while the RTI regression estimates provide a practical short-term approach to address charge compression for drugs, supplies, and radiology revenue cost centers, this method does not identify all of the charge compression that occurs at each hospital in these revenue centers, nor does it address charge compression that may be occurring in other revenue centers such as cardiology, or the routine and intensive care revenue cost centers where nursing costs per day are currently treated as if they were uniform across patient categories.

Another commenter also asked that CMS remember that the primary use of the cost report is to determine a hospital's costs of treating Medicare patients. The commenter noted that the cost report is still used for cost-based payment for many hospitals, such as CAHs, SCHs, and MDHs, and many State Medicaid plans and other payers also rely on data from the cost report to determine payment rates. Because of these uses, the commenters asked CMS to proceed cautiously with changing the cost report to avoid unintended consequences for hospitals where the cost report determines a significant portion of current payment. The commenter offered its services in reviewing and discussing cost report changes that Medicare may propose. Another commenter recommended that CMS work with hospital finance experts so the most appropriate and accurate instructions are issued, with very specific instructions as to where services are to be classified on the cost report and that subcategories should be eliminated.

Another commenter did not support RTI's recommendations for revising the cost reports to reduce cost and charge misalignment and to create new cost centers because of ''the enormous amount of work hospitals would have to perform'' to change internal operations and data collection to accommodate the revisions. The commenter expressed concern that this would lead to ''rising inefficiency and administrative costs.'' This commenter, and others, believed that ''clear, detailed instructions from CMS'' would be needed to differentiate between a ''device,'' ''implant,'' or ''IV solution,'' and other ''new nomenclature that distinguishes and separates tens of thousands of items and drugs, for instance, implantable spinal screws, bandages and bone cement, into specific cost centers'' would be necessary.

Response: As we noted in the proposed rule and in response to comments above, we believe that RTI's regression-based CCRs may be a promising means for addressing charge compression in the short term. However, because we do not yet know how the additional regression-based CCRs would interact with the MS–DRGs or with the HSRV methodology, and the significant concerns raised by a number of commenters about adopting regression-based CCRs, we are not adopting the adjustments to address charge compression in the FY 2008 IPPS final rule. We note RTI's long-term recommendations suggest addressing charge compression through adding new cost centers to the cost report and undertaking additional activities such as improvements in how hospitals report costs and charges. Thus, we believe that RTI and many of the public comments conclude that ultimately improved and more precise cost reporting is the best way to minimize charge compression. While we are not adopting the regression-based adjustments to address charge compression, we believe that the FY 2008 IPPS final rule relative weights should take advantage of additional information that is already reported on the cost report. Because the cost report currently allows for the creation of specific CCRs for Emergency Room and Blood and Blood Products, and some commenters expressed explicit support for expanding the number of CCRs based on cost centers that already exist on the cost report, we have decided to separate Emergency Room costs and charges and Blood and Blood Products costs and charges from the current ''Other Services'' CCR for the purposes of calculating the cost-based portion of the FY 2008 relative weights. That is, in accordance with RTI's short-term recommendation, for FY 2008, we are adding two additional CCRs to the current list of 13 CCRs, for a total of 15 CCRs. We are using line 61 on Worksheets C, Part I and D–4 to create the Emergency Room CCR and lines 46 and 47 on Worksheets C, Part I and D–4 to create a CCR for Blood and Blood Products. We are modifying the table listing the 15 cost center groupings in section II.H. of the preamble of this final rule with comment period accordingly.

With respect to the commenters that asked CMS to remember that the primary use of the cost report is to determine a hospital's costs of treating Medicare patients, we intend to proceed cautiously as the commenters suggest. To the extent that the cost report changes that we make improve consistency and accuracy of cost reporting, these benefits will extend to providers whose payments are based on reasonable costs (CAHs) or otherwise use the cost report to determine hospital-specific rates (SCHs and MDHs). As we stated above, we intend to work with finance and cost report experts in the hospital community if we

decide to modify the cost report or its instructions to address issues with the DRG relative weights. We also understand that hospitals may be concerned about the resources that may be required to adapt to potential cost report changes. Any changes that would be made to the Medicare cost report would be done under the Paperwork Reduction Act and, by law, could not be undertaken without considering the burden that would be imposed on all hospitals.

Comment: Some commenters supported making adjustments to address charge compression. These commenters noted that charge compression was first identified in 2000 and MedPAC and other researchers have also recognized this issue. The commenters recommended implementation of a regression-based adjustment in the FY 2007 final rule and stated that this methodology has been evaluated and validated through RTI's study. Many commenters believe that RTI's results provide ample evidence of charge compression that justifies the implementation of their recommendations for the FY 2008 final rule. Furthermore, commenters stated that RTI's regression-based adjustment is appropriate and can be implemented immediately without any administrative burdens to the hospital. Several commenters emphasized that CMS should make it a priority to apply the regression methodology to the Medical supplies CCR. These commenters noted that in the proposed rule, CMS stated: ''of all the adjusted CCRs, the largest impact on weights came from accounting for charge compression in medical supplies for devices and implants,'' which demonstrates that a regression approach should be applied at least to disaggregate the medical supplies category into one CCR for ''Devices and Implants'' and a separate CCR for ''Other Supplies.''

One commenter disagreed with the reasons CMS expressed in the proposed rule for delaying implementation of RTI's recommendations, and found them to be ''rather insubstantial.'' The commenter did not believe that the combined impact of RTI's recommendations and the proposed MS–DRGs need to be studied before CMS could proceed with implementing the regression-based CCRs. The commenter noted that the relative independence of RTI's recommendations from the proposed MS–DRG changes was confirmed by a study commissioned by AdvaMed. The commenter also stated that the fact that RTI's analysis only included inpatient claims is relatively insignificant. The commenter believed that if further adjustments need to be made to incorporate outpatient claims into the regression estimate next year, they can be done with a fairly minor impact. This commenter, and others, urged CMS to implement a regression that uses both inpatient and outpatient claims when making an adjustment for charge compression for the CY 2008 OPPS, and use the same regression in subsequent years for both the IPPS and OPPS.

Another commenter stated that, although it understood that CMS wishes to understand the various interactions of regression-based CCRs with other aspects of the IPPS, the effect of charge compression is ''demonstrable and measurable'' and should be implemented in FY 2008 for the ''sake of payment accuracy.'' Another commenter stated that CMS' concern about the interaction between addressing charge compression and other proposed changes appeared ''disingenuous, as CMS is proposing so many changes that the interaction of the various components cannot be estimated.'' The commenter also questioned CMS' hesitation to make changes to the cost report to accommodate RTI's recommendation due to limited information system resources, time constraints, and inconvenience. The commenter asserted that ''hospitals find the defense of scarce resources, compressed implementation lead times and cost justification vis-a-vis outcomes an interesting option for CMS given the fact that it is manifestly unavailable to hospitals who have similar issues.''

Response: We disagree with the notion of the commenter that found us to be ''disingenuous'' because the ''interaction of various components [of the IPPS] cannot be estimated.'' We refer the commenter to the payment impact section of the IPPS proposed rule (72 FR 25119) and this final rule with comment period as well as the FY 2007 IPPS proposed rule (71 FR 24025) where we simulate the interaction of a number of different payment reforms including the adoption of cost-based weights, severity DRGs, and other changes. We note that for some categories of hospitals, the impact of adopting MS–DRGs is significant. The RTI work suggests that further changes to the relative weights will also be significant and potentially result in additional redistributions of Medicare payment. In our view, the ''interactions of various components'' can be determined and before we adopt potential policy options in a final rule, the public should be fully informed on the potential impacts. As we discussed in the FY 2008 proposed rule, we have concerns about implementing regression-based CCRs in the final rule without specifically proposing them because of concerns about how these changes would interact with the transition to MS–DRGs, the calculation of cost-based relative weights, and possibly the HSRV method.

Despite the commenters' support for the regression-based CCRs, we are still concerned about the accuracy of using regression-based estimates to determine relative weights rather than the Medicare cost report. Many public commenters, including several national hospital associations, shared these same concerns. However, we believe that more specific CCRs will improve payment accuracy for several DRGs. Therefore, as we stated above, we are implementing RTI's recommendation to expand the current 13 CCRs to 15 CCRs without the use of a regression-based adjustment.

In the proposed rule, we indicated there was insufficient time to assess how RTI's recommendations may interact with other potential changes to the DRGs and to the method of calculating the DRG relative weights. We noted that RTI's study examined charge compression within Version 24.0 of the CMS DRGs, and we could not examine their interactive effects with the MS–DRGs and be able to timely publish the FY 2008 proposed rule. For this reason, we requested public comment on whether to adopt these changes in the final rule without having fully analyzed them for the proposed rule. While there was strong support for adopting the regression-based charge adjustments in these comments, many other commenters believed that we should provide the public with modeled payment impacts and an opportunity to comment before implementing regression-based CCRs.

We are also continuing to consider whether to adopt an HSRV payment methodology for FY 2009. We anticipate undertaking further analysis of the HSRV methodology and would like to incorporate RTI's recommendations into that analysis. Although its evaluation of alternative severity DRG systems is complete, we are currently working with RAND to study the HSRV methodology. Furthermore, we continue to believe that adjusting for charge compression and later adopting the HSRV methodology could create payment instability over the next 2 years and it would be preferable to consider simultaneously adopting these changes.

Finally, if we were to adopt adjustments for charge compression, the preferred approach would be to apply

the regression method to the combined inpatient and outpatient services. The RTI report discussed the notion that separating services that are generally delivered in outpatient settings might improve the accuracy of CCRs for inpatient services, and these areas include therapeutic radiology, nuclear medicine, chemotherapy, electroconvulsive therapy and outpatient surgery. RTI noted that while these charges are not significant under the IPPS, aggregation bias may be present in these outpatient services which would affect the overall department CCR. Therefore, we will consider expanding our analysis to include outpatient services.

Comment: One commenter urged CMS to separately distinguish intermediate (step-down) level nursing care costs. Another commenter argued that it is illogical that nursing costs are reflected in the relative weights only through flat room and board charges, given that nursing care is a variable, rather than a fixed cost. The commenter asserted that, as a result, a significant amount of money is being misallocated across hospitals for required nursing care. The commenter urged CMS to give serious consideration to the RTI report's recommendation to establish study groups and research options for improving patient-level charging within nursing units, as the outcomes could improve precision in relative resource weights without adding substantial administrative costs to either Medicare or to hospitals. Specifically, the commenter strongly supported the creation of a separate direct and indirect cost center at each hospital and the inclusion of these data in the annual Medicare cost report, the reporting and collection of nursing intensity data, and adjustment of the Medicare payment for severity of illness by modifying the proposed APR DRG severity adjustment formula to incorporate nursing intensity and cost within each diagnosis and severity category. The commenter also mentioned the New York State Medicaid model, which was the first prospective payment system to recognize and reimburse for relative nursing resource consumption levels among DRGs through the use of Nursing Intensity Weights (NIWs). The NIWs, which were developed by an expert panel, have been reevaluated and updated periodically to maintain consistency with changes in the DRG definitions. The commenter recommended that, because this program has been successfully implemented in a large state for a number of years, a Medicare demonstration project based on this model should be launched.

Response: The commenters' raise interesting concerns related to nursing costs that are variable but are reflected in the DRG weights only as fixed costs through flat room and board charges. There are currently no detailed charge codes that can be used to distinguish the intensity in nursing services provided by type of patient. In its report, RTI noted ''because intensity of nursing is likely correlated with DRG assignment, this could be a significant source of bias in DRG weights.'' Particularly because nursing comprises such a significant portion of hospital costs and charges, we agree that this issue should be further studied. We are interested in knowing whether the public has any ideas for how the relative weight methodology can systematically recognize and reimburse for differences in nursing resource consumption provided across hospital inpatients. We will consider whether we should study the possibility of using NIWs to recognize nursing intensity in the DRG relative weights.

Comment: Commenters supported adopting the regression CCRs to alleviate charge compression, but some commenters were concerned that the application of this adjustment methodology to capital intensive radiology services is premature and requires additional analysis. The commenters noted that the RTI report found that within the Radiology CCR, CT scanning and MRI have higher markups and lower CCRs than the remaining radiology services. Implementing RTI's recommendation to apply a regression method to split Radiology into one CCR each for MRIs, CT scans and Other Radiology could potentially result in lower CCRs for the CT and MRI categories. One commenter cited an analysis conducted by Direct Research, LLC, that found that the majority of hospitals do not allocate the capital costs of MRI and CT scan machines to the radiology cost center. Rather, the capital costs could be allocated more broadly across hospital services on a square footage basis. However, the commenter noted that RTI's analysis for radiology services assumes a detailed capital allocation for these services that results in differential CCRs found in MRIs and CT scans, which the commenter suggested is actually not found in the data. Therefore, the commenters requested that the regression-based CCRs for radiology not be adopted at this time.

Response: We appreciate the comment on the limitations of the regression-based CCR on radiology. This is another example of how changes to cost reporting can potentially improve the accuracy of CCRs for radiology and other departments. In our view, the commenter raises another issue that requires additional analysis before we adopt regression-based adjustments to address charge compression.

Comment: One comment addressed our proposal to move cost report line 54 for EEG out of the Cardiology cost center group into the Laboratory cost center group. The commenter noted that where providers elect to report EEG separately on line 54, this seems appropriate. However, some providers combine EEG with EKG on line 53 (usually because the EEG services are purchased as outside services and not a separate cost center for the hospital). In those instances, moving only the EEG costs would be impossible. The commenter noted that CMS did not indicate what portion of providers separately report EEG services on line 54, but the commenter was concerned that there will be continued mismatching under either grouping. The commenter encouraged CMS to consider expanding the MedPAR database to include separate fields for all revenue codes so that detailed analyses and accurate matching of costs and charges can be performed. The commenter also concurred with CMS' recommendation to move radioisotope costs to the radiology services grouping and out of ''other services.''

Response: We responded earlier that suggestions for adding additional revenue codes to MedPAR will be considered in conjunction with other competing priorities for our information systems. In the FY 2008 proposed rule, we decided to move the costs for cases involving EEG from the Cardiology cost center group to the Laboratory Cost center group to maintain consistency with their corresponding EEG MedPAR claims, which are categorized under Laboratory charges. Although the commenter indicated that hospitals may be combining EEG costs with EKG costs on line 53 instead of reporting it as a separate cost on line 54, we believe the MedPAR is clear in categorizing EEG claims under revenue codes 0740 and 0749, and therefore, costs for EEG should be reported on line 54 of the cost report as well. For this reason, we are finalizing our proposal to move the costs for cases involving EEG from the Cardiology cost center group to the Laboratory Cost center for purposes of calculating the DRG relative weights. As described in the FY 2008 IPPS proposed rule, we will also calculate the DRG relative weights for FY 2008 by moving radioisotype costs from the Other

Services CCR to the Radiology Services CCR.

Comment: One commenter was concerned that hospitals do not have consistent charging and billing practices on an inpatient and outpatient basis for the administration of medications by injection and/or infusion at the bedside.

Response: We did not propose any changes on this issue. However, we will consider this issue as we research potential improvements that can be made to how hospitals report costs and charges.

Comment: One commenter stated that it believed it is important for CMS to explicitly recognize the ''limitations'' of the cost-based weighting methodology and its applicability to non-Medicare patients because this is a ''major precedent setting change for the entire hospital field.'' The commenter stated that in studies that it conducted, it found that the use of departmental CCRs presents a bias in that the higher unit costs of services provided to children that are labor intensive in terms of nursing and respiratory therapy are not reflected in the department-wide CCRs. The commenter requested that, at a minimum, CMS recognize in the final rule that there are cost issues in the Medicare CCR methodology that have implications for non-Medicare patient populations.

Response: The cost-based relative weights were developed solely using Medicare data. We do not have non-Medicare data that can be used to set DRG relative weights. For this reason, we are concerned that non-Medicare payers may be using our payment systems and rates without making refinements to address the needs of their own populations. As stated earlier, we encourage non-Medicare payers to adapt the MS–DRGs and the relative weight methodology to better serve their needs.

Among its other short-term recommendations, RTI also suggested that we incorporate edits to reject or require more intensive review of cost reports from hospitals with extreme CCRs. This action would reduce the number of hospitals with excluded data in the national CCR computations, and would also improve the accuracy of all departmental CCRs within problem cost reports by forcing hospitals to review and correct the assignment of costs and charges before the cost report is filed. Although we do not have a substantive disagreement with the recommendation, we generally focus our audit resources on areas in which cost report information directly affects payments to individual providers.

RTI further suggested revising cost report instructions to reduce cost and charge mismatching and program charge misalignment in its short-term recommendations. Although RTI suggests such an action could be immediately effective for correcting the reporting of costs and charges for medical supply items that are now distributed across multiple cost centers, we note that changes to improve cost reporting now will not become part of the relative weights for several years because of lags between the submission of hospital reports and our ability to use them in setting the relative weights. Currently, we expect there will continue to be a 3-year lag between a hospital's cost report fiscal year and the year it is used to set the relative weights. Thus, even if it were possible to issue instructions immediately beginning for FY 2008, revised reporting would not affect the relative weights until at least FY 2011. Nevertheless, we agree with this recommendation, and in the proposed rule, we welcomed public input on potential changes to cost reporting instructions to improve consistency between how charges are reported on cost reports and in the Medicare claims. We indicated that we would consider these changes to the cost reporting instructions as we consider further changes to the cost report below.

In the summary of the comments above, we stated that some commenters believed that RTI's recommendation to incoporate edits to reject cost reports or require more intensive audits will not solve the mismatch problem because hospitals' reporting is consistent with cost reporting instructions. The commenters instead recommended that hospitals be educated to report costs and charges in a manner that is consistent with how MedPAR groups charges. However, other commenters supported more intensive auditiing of cost reports. In response to these comments, we stated above that we agree with the initiative to educate hospitals to improve cost reporting and that we intend to inform the fiscal intermediaries/MAC of this educational initiative. We also stated that we intend to provide the fiscal intermediaries/MAC of this educational initiative. We also stated that we intend to provide fiscal intermediaries/MAC and hospitals with guidance on how to address requests for changes in cost reporting practices from hospitals.

Comment: Some commenters supported the use of the Standard Analytic File (SAF) to calculate CCRs, as used by RTI in its study, as the SAF provides more detailed charge data on supplies, drugs and radiology services, which would improve the payment accuracy for those revenue centers with significant charges.

Response: We appreciate the comment on the use of the SAF to calculate national CCRs. The RTI study used the SAF to extract detailed charge information for selected revenue codes with potential aggregation bias and used this information in the creation of the synthetic CCRs. However, because we are not expanding the CCRs using regression adjustments for FY 2008, it is not necessary to use the SAF to compute the relative weights in this final rule with comment period. Rather, we are using the FY 2006 MedPAR file and FY 2005 hospital cost reports to calculate the national CCRs.

Comment: Many commenters noted that, while the proposed rule seems to suggest that methods of addressing charge compression should be considered together with implementation of an HSRV methodology, these two issues (charge compression and HSRV) need not and should not be linked. The commenters reiterated their opposition to implementation of the HSRV methodology, as previously expressed in comments on the FY 2007 proposed rule, arguing that the method is flawed and may even introduce more bias into the relative weight calculations. Another commenter (who also opposed implementation of the HSRV methodology) stated that should the HSRV method be implemented, many DRG weights could move in one direction if the charge compression adjustments were implemented in FY 2008, and then move in the other direction if the HSRV method were to be implemented in FY 2009. This commenter requested that CMS delay both changes for at least one year, and implement the HSRV method and the regression-based CCRs only after issuing a formal proposal with a thorough analysis that is made available to the public for review and comment. One commenter stated that the RTI revisions should be reviewed in combination with the severity-based system recommended by RAND and should not be adopted in FY 2008. The commenter stated that CMS and the provider community should evaluate these recommendations and implement them together in FY 2009. One commenter stated that the combined use of hospital-specific charges and a national CCR will result in a distortion of the DRG weights and a shifting of Medicare payments among hospitals, *not* based on resource utilization, but rather on a mathematical calculation. This commenter recommended that CMS review the impact of using hospital-specific

charges and costs to determine whether the national CCR has created inaccurate DRG weights.

MedPAC commented that adopting cost-based HSRV weights would result in substantial additional improvements in payment accuracy. MedPAC believed that the HSRV methodology removes all of the differences in the level of costs across hospitals, and is preferable to CMS' current method used for standardization, which is incomplete and introduces avoidable errors into the computation of payment weights. Two other commenters supported the adoption of the HSRV methodology and strongly opposed the current methodology and believed it is flawed for the following reasons: (1) The proposed formula derives a national average charge based on all hospitals being weighted equally, which disadvantages hospitals located in historically ''low charge'' States, and results in small, rural hospitals carrying the same weight as large, urban hospitals; (2) The data being used are outdated and do not reflect the cost of new technology; (3) Costs in excess of 25 percent are omitted by CMS from ''high cost'' hospitals in the cost base, while leaving in all of the charges from those same ''high cost'' hospitals and assigning a relative value on reduced costs. Since the costs are being excluded, but not the charges, there is a corresponding mismatching of revenues and costs; (4) The data contain only audited data, and hospitals that have not been audited would not be included in the data.

These two commenters stated that CMS should test the sensitivity of weights using various methodological assumptions and share the resulting data with the public. The commenters requested that CMS should ''strive'' to create a system that improves payments and does not include the ''obvious flaws'' listed above.

Response: Many commenters expressed their concerns and opposition to the HSRV methodology last year. As we explained in response to those comments in the FY 2007 IPPS final rule, we decided not to adopt the HSRV methodology to standardize charges for FY 2007 but stated that we would undertake further analysis of the method. As we indicated in the FY 2008 IPPS proposed rule, we engaged RAND as the contractor to study alternative DRG systems. The second phase of the RAND study will include evaluating the HSRV methodology; the evaluation report will not be available until after the issuance of this final rule with comment period. Therefore, we will consider those results as we plan changes as part of the FY 2009 IPPS rulemaking process. We intend to carefully analyze how the relative weights would change if we were to adopt regression-based CCRs to address charge compression while simultaneously adopting an HSRV methodology using fully phased-in MS–DRGs. Although many commenters do not believe that the HSRV methodology and addressing charge compression should be linked, we believe, as did one commenter, that sequentially adjusting for charge compression and later adopting the HSRV methodology could create instability in IPPS payments over the next 2 years. Accordingly, we intend to include a detailed description and discussion of RAND's and any other analyses that we may undertake on these issues in the FY 2009 IPPS proposed rule.

In response to the commenters who supported adopting the HSRV methodology and believed it superior to the method used by CMS currently, in the FY 2007 IPPS final rule (71 FR 47883), we stated that there are certain administrative difficulties with adjusting charges to costs using hospital-specific CCRs. Therefore, at least until we have the opportunity to analyze the results of RAND's analysis, we are utilizing national average CCRs to determine cost. We also do not believe that the use of hospital-specific charges together with national average CCRs redistributes Medicare payments among hospitals merely based on a mathematical calculation, as one commenter indicated. On the contrary, a system that improves payment accuracy and moderates the influence of individual hospital reporting practices on a national payment system is not one which haphazardly redistributes payments. We note that, in a report issued in July 2006, the GAO found that CMS's system of national CCRs shows promise to improve payment accuracy because it reduces the impact that individual hospital-reporting practices has on the DRG relative weights (GAO–06–880, ''CMS's Proposed Approach to Set Hospital Inpatient Payments Appears Promising''). With respect to the commenters' concerns regarding inappropriate ''equal weighting'' of hospitals, under CMS' current methodology for computing national CCRs, these concerns were addressed in last year's IPPS final rule. The national CCRs are the sum of all costs divided by the sum of all charges. Thus, all hospitals are not weighted equally. Larger hospitals will have more weight than smaller hospitals in the final CCR calculation.

In response to the commenters' concerns that the data are outdated and do not reflect the costs of new technology, there is an inevitable lag between the availability of information from hospital claims or cost reports and the time it can be used to determine relative weights. We always use the most recent data available to set relative weights. Furthermore, as we noted in the FY 2007 IPPS final rule, CMS' current method of using national average CCRs eliminates the need to match claims (for FY 2008, the 2006 MedPAR) to the time period of the CCRs (for FY 2008, FY 2005 HCRIS), which would be necessary under an HSRV method that uses hospital-specific CCRs. Thus, we can use claims data from one year later under our cost-based weighting methodology. We also note that add-on payments made for the latest advancements in medical technologies may not be included in the 2-year-old hospital claims data that are used to set the relative weights.

Regarding the comments stating that CMS mismatches revenues and costs by omitting excessive costs from ''high cost'' hospitals in the cost base, while leaving in the charges from those same ''high cost'' hospitals, we note that this is not actually the case. If a hospital's costs are dropped from the national average CCR calculations, the hospital's charges are also dropped from the national average CCR calculations. Lastly, the commenters' assertion that the cost report data used for CCRs include only audited data is incorrect. If the commenters are referring to the cost report data that CMS uses to calculate the national average CCRs, we note that in accessing data for IPPS hospitals from HCRIS, we select all IPPS hospitals, and do not only select hospitals whose cost reports are audited.

Comment: MedPAC submited comments on the method we use to calculate the national CCRs for the cost-based relative weights. The methodology to calculate the national CCRs is described in section II.H. of the preamble of this final rule with comment period. MedPAC suggested that we standardize the Medicare charges and costs used to calculate the national CCRs from the Medicare cost reports to adjust for differences in local wage levels, IME, and DSH. The standardization would be consistent with the use of national standardized charges by revenue center also used in the calculation of cost-based relative weights from the MedPAR.

Response: While we did not propose any changes to the cost-based relative weights methodology, we appreciate the comment on maintaining consistency

among our data sources. Although we currently standardize charges from the MedPAR file when calculating relative weights, we do not standardize costs and charges from hospital cost reports, as MedPAC recommended. We may consider this recommendation as we continue to refine our methodology for calculating relative weights. However, we note that there would be no need to standarize costs and charges from hospital cost reports under an HSRV methodology.

b. Medium-Term Recommendations

RTI recommended that we expand the MedPAR file to include separate fields that disaggregate several existing charge departments. For compatibility with prior years' data, the new fields should partition the existing ones rather than recombine charges. RTI recommended including additional fields in the MedPAR file for the hospital departments that it statistically disaggregated in its report, as well as intermediate care, observation beds, other special nursing codes, therapeutic radiation and EEG, and possibly others. As with some of RTI's earlier recommendations with respect to cost reports, we will examine this suggestion in conjunction with other competing priorities CMS has been given for our information systems. We have limited information systems resources, and we will need to consider whether the time constraints we have to develop the IPPS final rule, in conjunction with the inconvenience of using the SAF and accounting for charge compression through regression, will justify the infrastructure cost to our information systems of incorporating these variables into the MedPAR.

Finally, RTI's medium-term recommendations include encouraging providers to use existing standard cost centers, particularly those for Blood and Blood Administration and for Therapeutic Radiology, in the current Medicare cost report. We believe this is closely related to the recommendation for improved cost reporting instructions. Therefore, we will consider this recommendation as part of any further effort we may undertake to revise cost reporting instructions or change the cost report.

Comment: Some commenters supported expanding the MedPAR file to include separate fields to disaggregate additional cost centers. One commenter supported this recommendation and suggested that the assignment of revenue codes and charges to revenue centers in MedPAR should be reviewed and changed to better reflect hospital accounting practices as reflected on the Medicare cost report.

Response: We will consider suggestions for modifying MedPAR in conjunction with other competing priorities we have for our information systems. Further, while we support the efforts of the national hospital associations to streamline hospital's reporting practices, we note that CMS does not instruct hospitals in the appropriate revenue codes to use because hospitals have discretion as to where and how they allocate charges based on their own financial system needs.

c. Long-Term Recommendations

RTI's long-term recommendations include adding new cost centers to the Medicare cost report and/or undertaking the following activities:

- Add ''Devices, Implants and Prosthetics'' under the line for ''Medical Supplies Charged to Patients.'' Consider also adding a similar line for IV Solutions as a subscripted line under the line for ''Drugs Charged to Patients.''
- Add CT Scanning and MRI as subscripted lines under the line for ''Radiology-Diagnostic.'' About one-third of hospitals that offer CT Scanning and/or MRI services are already reporting these services on nonstandard line numbers. More consistent reporting for both cost centers would eliminate the need for statistical estimation on the radiology CCRs.
- In consultation with hospital industry representatives, determine the best way to separate cardiology cost centers and add a new standard cost center for cardiac catheterization and/or for all other cardiac diagnostic laboratory services. About 20 percent of hospitals already include a nonstandard line on their cost reports for catheterization. Creating a new standard cost center could improve consistency in reporting and substantially improve the program charge mismatching that now occurs.
- In consultation with hospital industry representatives, consider establishing a new cost center to capture intermediate care units as distinct from routine or intensive care.
- Establish expert study groups or other research vehicles to study options for improving patient-level charging within nursing units. Nursing accounts for one-fourth of IPPS charges and 41 percent of the computed costs from our claims analysis file. Historically, nursing charges and costs have been assigned to patients without relying on individual measures of service use. Consideration should be given to finding ways to improve precision in nursing cost finding that will improve relative resource weights without adding substantial administrative costs to either the Medicare program or to hospitals.

We agree with RTI that attention should be paid to these issues as we consider changes to the Medicare cost report. The cost report has not been revised in nearly 10 years. During this time, there have been significant changes to the Medicare statute and regulations that have affected the Medicare payment policies. Necessary incremental changes have been made to the Medicare cost report over the years to accommodate the Medicare wage index, disproportionate share payments, indirect and direct graduate medical education payments, reporting of uncompensated care costs, among others. The adoption of cost-based weights for the IPPS beginning in FY 2007 has brought further attention to the importance of the Medicare cost report and how hospitals report costs and charges. We recently began doing a comprehensive review of the Medicare cost report and plan to make updates that will consider its many uses. As we update the cost report, we will give strong consideration to RTI's recommendations and potential long-term improvements that could be made to the IPPS cost-based relative weighting methodology.

Comment: Several commenters made recommendations for how the relative weights would be calculated under a 3-year transition from the current DRGs to the new MS–DRGs. Some commenters suggested three options as follows:

(1) Use two GROUPERs (CMS DRGs and MS–DRGs) and then blend the weights for each individual case.

(2) Blending current DRG weights with MS–DRG weights: To calculate a blended cost-based weight, CMS could first calculate cost-based weights using the current DRGs. CMS could then calculate cost-based weights using the MS–DRGs. The blended weight for each MS–DRG would be based on the weighted average relative weights (based on the current DRGs from which cases group into the new MS–DRGs) and the MS–DRG weight. Under this approach, CMS would continue to calculate cost-based weights for the current DRGs during the first 2 years of the transition period. This approach recognizes that a case has different relative weights in the new system versus the current DRG system.

(3) Blending MS–DRG base and severity level weights: CMS would blend the actual MS–DRG weight with the weight of the base MS–DRG. The base MS–DRG weight is determined by

using expected case mix volume among severity levels. For example, if an MS–DRG was subdivided into two subgroups: with the non-CC DRG accounting for 90 percent of the cases and the other 10 percent in the CC DRG, these ratios would be used to blend the base and the DRG-specific weight. Under this approach, CMS would not have to calculate weights using two different DRG systems. On the other hand, this approach does not use the current system when calculating the blended rates.

The commenters noted that while option 1 would provide the most accurate blended weights, it is the most burdensome to implement because it would require use of two GROUPERs, whereas under options 2 and 3, CMS would only use the blended relative weights, allowing hospitals and Medicare contractors to use only one grouping software.

MedPAC suggested that CMS adopt a 2-year transition period for MS–DRGs to coincide with the remainder of the current transition period for implementing cost-based weights, so as to ''balance the payment impacts of implementing severity refinements and cost-based weights.'' MedPAC suggested that a 2-year transition might work as follows: CMS could group cases using the MS–DRG grouper beginning in FY 2008, but then use a blended weight for each category. The blended weight for an MS–DRG would reflect partly the weight that would have been assigned under an MS–DRG system with fully implemented cost-based weights. The weight for each MS–DRG in FY 2008 would be a blend of two parts:

- 50 percent of the average DRG weight that would have been attached to cases in the MS–DRG from the 2006 MedPAR file under a policy of ⅓ charge-based weights and ⅔ cost-based weights. These DRG weights are the ones that would have applied to the same cases under the FY 2008 policy if CMS simply continued the transition to cost-based weights without changing the DRG definitions.
- 50 percent of the CMS refined weights for the MS–DRG for FY 2008. In FY 2009, cases would be grouped in the MS–DRGs and the weight for each MS–DRG would be a 100 percent cost-based weight.

Response: We have carefully considered each comment in determining whether there should be a transition period for the relative weights computed using MS–DRGs, the length of the transition and how to compute weights during the transition. We also considered how to accommodate a transition to MS–DRG relative weights with the continuing transition to cost-based weights. Although we received strong general support for adopting the MS–DRGs, we do believe that some transition is warranted to mitigate the magnitude of potential changes in payment to hospitals that could occur in one year. Furthermore, we agree with MedPAC that a two-year transition period that coincides with the remainder of the transition period for implementing cost-based weights is appropriate. By having these changes occur simultaneously over the same transition period, we can avoid having large changes in payment that would occur with sequential implementation. Further, we can also accomplish all of the payment reforms according to the same schedule. Accordingly, we are implementing a 2-year transition to MS–DRGs. For FY 2008, the first year of the transition, 50 percent of the relative weight for each MS–DRG will be based on the CMS DRG relative weight and 50 percent will be based on the MS–DRG relative weight. In FY 2009, the relative weights will be based entirely on the MS–DRG relative weight. The blended relative weights for FY 2008 are computed as follows:

First, using the Version 24.0 GROUPER, relative weights are calculated based on 100 percent costs and 100 percent charges, respectively (see section II.H. of the preamble of this final rule with comment period for a description of the cost- and charge-based calculations). Then these weights are blended using two-thirds of the cost-based weights and one-third charge-based weights to establish the CMS DRG portion of the transition weights.

Second, using the Version 25.0 GROUPER, relative weights are calculated based on 100 percent costs and 100 percent charges, respectively (see section II.H. of the preamble of this final rule with comment period for a description of how we compute cost-based and charge-based weights). These weights are then blended using two-thirds of the cost-based weights and one-third charge-based weights to establish the MS–DRG portion of the transition weights.

Under the transition blend we are adopting in this final rule with comment period, we group cases to MS–DRGs (using the Version 25.0 GROUPER), but the payment weight for each DRG is a 50/50 blend of the MS–DRG weight and the CMS DRG weight. Thus, we had to determine a blended weight for each DRG. Using the claims in the FY 2006 MedPAR database that we used to compute cost-based weights under the Version 24.0 GROUPER, we grouped each case to a CMS DRG (using the Version 24.0 GROUPER) and an MS–DRG (using the Version 25.0 GROUPER). Commonly, a set of cases that grouped to a single MS–DRG grouped to two or more CMS DRGs. Therefore, we determined an average CMS DRG weight for all cases that grouped to each MS–DRG. Specifically, we summed the CMS DRG weights of all the cases that grouped to each MS–DRG and then divided that number by the transfer-adjusted case count. To establish the final blended weight for each DRG, we added 50 percent of the MS–DRG weight to 50 percent of the average CMS DRG weight for that MS–DRG. These final blended relative weights are listed in Table 5 of this final rule with comment period.

Comment: Some commenters expressed concern about the continued transition from charge-based weights to cost-based weights, in light of RTI's recommendations to alleviate charge compression on the relative weights and the proposal to introduce MS–DRGs. For FY 2008, we proposed that the relative weights would be based on one-third charges and two-third costs. Some commenters suggested that this transition should be delayed until the public comments associated with cost reporting and charge compression can be addressed. We have also received comments expressing concern on the potential fluctuations in hospital payment if we were to implement both RTI's recommendations on charge compression along with the MS–DRG system. In both cases, commenters suggested delaying the transition from charge-based to cost-based weights by maintaining the relative weights at two-third charges and one-third costs. MedPAC also expressed concern about continuing the transition to cost-based weights. However, unlike the commenter above, MedPAC suggested that CMS discontinue the transition period to cost-based weights and implement 100 percent cost-based weights in FY 2008. MedPAC's recommendation to discontinue the transition to cost-based weights presumed full introduction of the MS–DRGs in FY 2008. The commenters believed the payment fluctuations that will occur with full implementation of MS–DRGs can be mitigated by fully adopting cost weights. However, as suggested above, MedPAC also suggested as an alternative adopting MS–DRG weights according to the same schedule as the cost-based weights.

Response: We appreciate the commenters' expressing concerns about the continued transition to cost-based relative weights and the potential changes in payment from the

application of this methodology. In the FY 2007 IPPS final rule, we discussed our rationale for implementing cost-based weights over a 3-year transition period. We stated that the 3-year transition would mitigate the annual payment effects from the changes to the relative weights while we further study whether to make adjustments to account for charge compression. We believe that the cost-based methodology reduces bias in the relative weights and makes Medicare's payments more accurate for both medical and surgical DRGs. Therefore, any delays in the transition would not further our goal of payment accuracy. We believe that current efforts to improve cost reporting and our decision not to implement regression-based CCRs will alleviate concerns about additional fluctuations in hospital payments from further changes to the relative weight methodology. Furthermore, we believe that, for some types of hospitals (such as rural hospitals), the payment changes from MS–DRGs are the opposite of those that will occur from the transition to cost-based weights. For this reason, we believe a 2-year transition of the MS–DRG system that coincides with the remaining two years of the transition to cost-based weights will reduce the magnitude of annual payment changes and achieve our long-term goal of improvements in payment accuracy. Therefore, we are continuing with the 3-year transition to cost-based weights. For FY 2008, the DRG relative weights will be a blend of 33 percent of charge-based weights and 67 percent of cost-based weights. For the first year of the MS–DRG transition, the relative weights will be a blend of 50 percent of the CMS–DRG weight and 50 percent of the MS–DRG weight.

F. Hospital-Acquired Conditions, Including Infections

1. General

Medicare's IPPS encourages hospitals to treat patients efficiently. Hospitals receive the same DRG payment for stays that vary in length. In many cases, complications acquired in the hospital do not generate higher payments than the hospital would otherwise receive for other cases in the same DRG. To this extent, the IPPS does encourage hospitals to manage their patients well and to avoid complications, when possible. However, complications, such as infections, acquired in the hospital can lead to higher Medicare payments in two ways. First, the treatment of complications can increase the cost of hospital stays enough to generate outlier payments. However, the outlier payment methodology requires that hospitals experience large losses on outlier cases (for example, in FY 2007, the fixed-loss amount was $24,485 before a case qualified for outlier payments, and the hospital then only received 80 percent of its estimated costs above the fixed-loss cost threshold). Second, under the MS–DRGs we are adopting in this final rule with comment period, there are 258 sets of DRGs that are split into 2 or 3 subgroups based on the presence or absence of a major CC (MCC) or CC. If a condition acquired during the beneficiary's hospital stay is one of the conditions on the MCC or CC list, the result may be a higher payment to the hospital under the MS–DRGs. (We refer readers to section II.D. of this final rule with comment period for a detailed discussion of DRG reforms.)

2. Legislative Requirement

Section 5001(c) of Pub. L. 109–171 requires the Secretary to select, by October 1, 2007, at least two conditions that are (a) high cost or high volume or both, (b) result in the assignment of a case to a DRG that has a higher payment when present as a secondary diagnosis, and (c) could reasonably have been prevented through the application of evidence-based guidelines. For discharges occurring on or after October 1, 2008, hospitals will not receive additional payment for cases in which one of the selected conditions was not present on admission. That is, the case will be paid as though the secondary diagnosis was not present. Section 5001(c) provides that we can revise the list of conditions from time to time, as long as the list contains at least two conditions. Section 5001(c) also requires hospitals to submit the secondary diagnoses that are present at admission when reporting payment information for discharges on or after October 1, 2007.

3. Public Input

In the FY 2007 IPPS proposed rule (71 FR 24100), we sought input from the public regarding conditions with evidence-based guidelines that should be selected in order to implement section 5001(c) of Pub. L. 109–171. The comments that we received were summarized in the FY 2007 IPPS final rule (71 FR 48051 through 48053). In the FY 2008 IPPS proposed rule (72 FR 24716), we again sought formal public comment on conditions that we proposed to select under section 5001(c). As discussed below, in this final rule with comment period, we first summarize the comments we received on the FY 2007 IPPS proposed rule. We then explain our detailed proposals included in the FY 2008 proposed rule, followed by a summary of the public comments on each condition proposed and our responses to those public comments.

In summary, the majority of the comments that we received in response on the FY 2007 IPPS proposed rule addressed conceptual issues concerning the selection, measurement, and prevention of hospital-acquired infections. Many commenters encouraged CMS to engage in a collaborative discussion with relevant experts in designing, evaluating, and implementing this section. The commenters urged CMS to include individuals with expertise in infection control and prevention, as well as representatives from the provider community, in the discussions.

Many commenters supported the statutory requirement for hospitals to submit information regarding secondary diagnoses present on admission beginning in FY 2008, and suggested that it would better enable CMS and health care providers to more accurately differentiate between comorbidities and hospital-acquired complications. MedPAC, in particular, noted that this requirement was recommended in its March 2005 Report to Congress and indicated that this information is important to Medicare's value-based purchasing efforts. Other commenters cautioned us about potential problems with relying on secondary diagnosis codes to identify hospital-acquired complications, and indicated that secondary diagnosis codes may be an inaccurate method for identifying true hospital-acquired complications.

A number of commenters expressed concerns about the data coding requirement for this payment change and asked for detailed guidance from CMS to help them identify and document hospital-acquired complications. Other commenters expressed concern that not all hospital-acquired infections are preventable and noted that sicker and more complex patients are at greater risk for hospital-acquired infections and complications. Commenters suggested that CMS include standardized infection-prevention process measures, in addition to outcome measures of hospital-acquired infections.

Some commenters proposed that CMS expand the scope of the payment changes beyond the statutory minimum of two conditions. They noted that the death, injury, and cost of hospital-acquired infections are too high to limit this provision to only two conditions. Commenters also recommended that CMS annually select additional hospital

acquired complications for the payment change. Conversely, a number of commenters proposed that CMS initially begin with limited demonstrations to test CMS' methodology before nationwide implementation. One commenter recommended that CMS include appropriate consumer protections to prevent providers from billing patients for the nonreimbursed costs of the hospital-acquired complications and to prevent hospitals from selectively avoiding patients perceived at risk of complications.

In addition to the broad conceptual suggestions, some commenters recommended specific conditions for possible inclusion in the payment changes, which we discussed in detail in the preamble of the proposed rule and in section II.D.4. of this final rule with comment period. We also discuss throughout section II.D. of the preamble of this final rule with comment period other comments that we have considered in developing hospital-acquired conditions that would be subject to reporting.

As it is not addressed elsewhere, we are responding here to the comment about hospitals billing patients for costs of hospital-acquired complications that are not counted as MCCs and CCs. Section 5001(c) does not make the additional cost of a hospital acquired complication a noncovered cost. The additional costs that a hospital would incur as a result of a hospital-acquired complication remains a covered Medicare cost that is included in the hospital's IPPS payment. Medicare's payment to the hospital is for all inpatient hospital services provided during the stay. The hospital cannot bill the beneficiary for any charges associated with the hospital-acquired complication. With respect to the concern about a hospital avoiding patients that are at high risk of complications, we note that the policy is selecting only those conditions that are ''reasonably preventable.'' Thus, we are only selecting those conditions where, if hospital personnel are engaging in good medical practice, the additional costs of the hospital-acquired condition will, in most cases, be avoided and the risk of selectively avoiding patients at high risk of complications will be minimized. We further note that Medicare's high cost outlier policy is unaffected by section 5001(c). The hospital's total charges for all inpatient services provided during the stay will continue to be used to determine whether the case qualifies for an outlier payment. Thus, there will continue to be limitations on a hospital's financial risk of treating high cost cases even if, despite the hospital maintaining good medical practice to avoid complications, a reasonably preventable condition occurs after admission. Finally, as stated further below, we are continuing to work to identify exclusions for situations where the policy should not apply for the selected condition.

4. Collaborative Effort

CMS worked with public health and infectious disease experts from the Centers for Disease Control and Prevention (CDC) to identify a list of hospital-acquired conditions, including infections, as required by section 5001(c) of Pub. L. 109–171. As previously stated, the selected conditions must meet the following three criteria: (a) high cost or high volume or both; (b) result in the assignment of the case to a DRG that has a higher payment when present as a secondary diagnosis; and (c) could reasonably have been prevented through the application of evidence-based guidelines. CMS and CDC staff also collaborated on developing a process for hospitals to submit a Present on Admission (POA) indicator with each secondary condition. The statute requires the Secretary to begin collecting this information as of October 1, 2007. The POA indicator is required in order for us to determine which of the selected conditions developed during a hospital stay. The current electronic format used by hospitals to obtain this information (ASC X12N 837, Version 4010) does not provide a field to obtain the POA information. We issued instructions requiring acute care IPPS hospitals to submit the POA indicator for all diagnosis codes, effective October 1, 2007, through Change Request No. 5499, with a release date of May 11, 2007. The instructions specify how hospitals under the IPPS submit this information in segment K3 in the 2300 loop, data element K301 on the ASC X12N 837, Version 4010 claim. Specific instructions on how to select the correct POA indicator for a diagnosis code are included in the ICD–9–CM Official Guidelines for Coding and Reporting. These guidelines can be found at the following Web site: *http://www.cdc.gov/nchs/datawh/ftpserv/ftpicd9/ftpicd9.htm.*

CMS and CDC staff also received input from a number of groups and organizations on hospital-acquired conditions, including infections. Many of these groups and organizations recommended the selection of conditions mentioned in the FY 2007 IPPS final rule, including the following because of the high cost or high volume (frequency) of the condition, or both, and because in some cases preventable guidelines already exist:

- Surgical site infections. The groups and organizations stated that there were evidence-based measures to prevent the occurrence of these infections which are currently measured and reported as part of the Surgical Care Improvement Program (SCIP).
- Ventilator-associated pneumonias. The groups and organizations indicated that these conditions are currently measured and reported through SCIP. However, other organizations counseled against selecting these conditions because they believed it was difficult to obtain good definitions and that it was not always clear which ones are hospital acquired.
- Catheter associated bloodstream infections.
- Pressure ulcers.
- Hospital falls. The injury prevention groups included this condition among a group referred to as ''serious preventable events,'' also commonly referred to as ''never events'' or ''serious reportable events.'' A serious preventable event is defined as a condition which should not occur during an inpatient stay.
- Bloodstream infections/septicemia. Some commenters suggested that we focus on one specific organism, such as staph aureus septicemia.
- Pneumonia. Some commenters recommended the inclusion of a broader group of pneumonia patients, instead of restricting cases to ventilator-associated pneumonias. Some commenters mentioned that while prevention guidelines exist for pneumonia, it is not clear how effective these guidelines may be in preventing pneumonia.
- Vascular catheter associated infections. Commenters indicated that there are CDC guidelines for these infections. Other commenters stated that while this condition certainly deserves focused attention by health care providers, there is not a unique ICD 9 CM code that identifies vascular catheter-associated infections. Therefore, these commenters suggested that there would be difficulty separately identifying these conditions.
- Clostridium difficile-associated disease (CDAD). Several commenters identified this condition as a significant public health issue. Other commenters indicated that, while prevalence of this condition is emerging as a public health problem, there is not currently a strategy for reasonably preventing these infections.
- Methicillin-resistant staphylococcus aureus (MRSA). Several commenters indicated that MRSA has

become a very common bacteria occurring both in and outside the hospital environment. However, other organizations stated that the code for MRSA (V09.0, Infection with microorganism resistant to penicillins Methicillin-resistant staphylococcus aureus) is not currently classified as a CC. Therefore, the commenters stated that MRSA does not lead to a higher reimbursement when the code is reported.

• Serious preventable events. As stated earlier, some commenters representing injury prevention groups suggested including a broader group of conditions than hospital falls which should not be expected to occur during a hospital admission. They noted that these conditions are referred to as ''serious preventable events,'' and include events such as the following: (a) leaving an object in during surgery; (b) operating on the wrong body part or patient, or performing the wrong surgery; (c) air embolism as a result of surgery; and (d) providing incompatible blood or blood products. Other commenters indicated serious preventable events are so rare that they should not be selected as a hospital condition that cannot result in a case being assigned to a higher paying DRG.

5. Criteria for Selection of the Hospital-Acquired Conditions

CMS and CDC staff greatly appreciate the many comments and suggestions offered by organizations and groups that were interested in providing input into the selection of the initial hospital-acquired conditions.

CMS and CDC staff evaluated each recommended condition under the three criteria established by section 1886(d)(4)(D)(iv) of the Act. In order to meet the higher payment criterion, the condition selected must have an ICD–9–CM diagnosis code that clearly identifies the condition and is classified as a CC, or as an MCC (as proposed for the MS DRGs in the proposed rule). Some conditions recommended for inclusion among the initial hospital-acquired conditions did not have codes that clearly identified the conditions. Because there has not been national reporting of a POA indicator for each diagnosis, there are no Medicare data to determine the incidence of the reported secondary diagnoses occurring after admission. To the extent possible, we used information from the CDC on the incidence of these conditions. CDC's data reflect the incidence of hospital-acquired conditions in 2002. We also examined FY 2006 Medicare data on the frequency that these conditions were reported as secondary diagnoses. We developed the following criteria to assist in our analysis of the conditions. The conditions described were those recommended for inclusion in the initial hospital-acquired infection provision.

• Coding—Under section 1886(d)(4)(D)(ii)(I) of the Act, a discharge is subject to the payment adjustment if ''the discharge includes a condition identified by a diagnosis code'' selected by the Secretary under section 1886(d)(4)(D)(iv) of the Act. We only selected conditions that have (or could have) a unique ICD–9–CM code that clearly describes the condition. Some conditions recommended by the commenters would require the use of two or more ICD-9-CM codes to clearly identify the conditions. Although we did not exclude these conditions from further consideration, the need to utilize multiple ICD-9-CM codes to identify them may present operational issues. For instance, the complexities associated with selecting septicemia as a hospital-acquired condition subject to section 5001(c) of the DRA may present operational issues in identifying whether or not the condition was present upon admission. The vast number of clinical scenarios that we would have to account for could complicate implementation of the provision.

• Burden (High Cost/High Volume)—Under section 1886(d)(4)(D)(iv)(I) of the Act, we must select cases that have conditions that are high cost or high volume, or both.

• Prevention guidelines—Under section 1886(d)(4)(D)(iv)(II) of the Act, we must select codes that describe conditions that could reasonably have been prevented through application of evidence-based guidelines. We evaluated whether there is information available for hospitals to follow to prevent the condition from occurring.

• MCC or CC—Under section 1886(d)(4)(D)(iv)(III) of the Act, we must select codes that result in assignment of the case to a DRG that has a higher payment when the code is present as a secondary diagnosis. The condition must be an MCC or a CC that would, in the absence of this provision, result in assignment to a higher paying DRG.

• Considerations—We evaluated each condition above according to how it meets the statutory criteria in light of the potential difficulties that we would face if the condition were selected.

6. Selection of Hospital-Acquired Conditions

We discuss below our analysis of each of the conditions that were raised as possible candidates for selection under section 5001(c) of Pub. L. 109–171 according to the criteria described above in section II.D.5. of the preamble of this final rule with comment period. We also discuss any considerations, which would include any administrative issues surrounding the selection of a proposed condition. For example, the condition may only be able to be identified by multiple codes, thereby requiring the development of special GROUPER logic to also exclude similar or related ICD–9–CM codes from being classified as a CC. Similarly, a condition acquired during a hospital stay may arise from another condition that the patient had prior to admission, making it difficult to determine whether the condition was reasonably preventable. Following a discussion of each condition, we provide a summary that describes how each condition was considered for the proposed rule, whether we are selecting it to be subject to the provision in this FY 2008 IPPS final rule or if it will continue to be considered for the future. In the proposed rule, we presented 13 conditions. The summary discussion and table reflect changes to the order of the conditions. The summary presents the conditions that best meet the statutory criteria and which conditions we are selecting to be subject to the payment adjustment for hospital-acquired conditions beginning in FY 2009. In the proposed rule, we encouraged comments on these conditions. We asked commenters to recommend how many and which conditions should be selected in the FY 2008 IPPS final rule along with justifications for these selections. We also encouraged additional comments on clinical, coding, and prevention issues that may affect the conditions selected. While, in this final rule with comment period, we present these 13 conditions in the order they were proposed, we have re-ranked these conditions based on how well they meet the statutory criteria according to compelling public health reasons in addition to public comment and internal analysis.

We received approximately 127 timely public comments on this section from hospitals and health care systems, provider associations, consumer groups, purchasers, medical device manufacturers, pharmaceutical companies, information technology companies, and health care research organizations.

Comment: Some commenters urged CMS to use discretion in selecting hospital-acquired conditions that will be subject to the statutory provision and suggested that CMS limit the number of conditions selected. A large majority of

commenters strongly supported the inclusion of three of the serious preventable events (object left in surgery, air embolism and blood incompatibility) and generally commented that the remaining conditions are not always preventable or may not have unique codes established.

A number of commenters both supported and opposed the conditions other than the three serious preventable events mentioned above. The commenters were generally optimistic about considering proposed conditions for the future upon resolution of suggested issues. A few commenters proposed that CMS initially begin with limited demonstrations to test CMS' methodology before nationwide implementation. These commenters specifically mentioned the Michigan Hospital Association Keystone Center.

The commenters who suggested not including conditions other than the three serious preventable events mentioned above noted that sicker and more complex patients are at greater risk for hospital-acquired infections and complications. In particular, the commenters believed some of the conditions proposed are a biological inevitability at a certain predictable rate regardless of safe practice. In addition, the commenters expressed concern about the difficulty of distinguishing between hospital-acquired and community-acquired infections. The commenters also believed that CMS should use incentives to allow hospitals to adopt innovative infection prevention technologies and provide necessary treatments for infections. Finally, a few commenters submitted additional conditions that were not included in the 13 conditions we considered in the proposed rule.

Response: In general, we discuss our responses to each of these comments below in the context of the specific conditions they reference. With respect to the general comment that we should only select the three serious preventable events, we believe there is a significant public health interest in selecting more than just these conditions. According to the commenters, many of the other conditions we considered are not always preventable and, therefore, should not be selected. The statute indicates that the provision should apply to conditions that ''could reasonably have been prevented through the application of evidence-based guidelines.'' Therefore, for this reason, we are selecting other conditions in addition to the serious preventable events to be subject to this provision in this final rule with comment period. We discuss the application of the statutory criteria to each of the conditions we considered below and why we believe the condition is ''reasonably preventable.''

(a) Catheter-Associated Urinary Tract Infections

Coding—ICD–9–CM code 996.64 (Infection and inflammatory reaction due to indwelling urinary catheter) clearly identifies this condition. The hospital would also report the code for the specific type of urinary infection. For instance, when a patient develops a catheter associated urinary tract infection during the inpatient stay, the hospital would report code 996.64 and 599.0 (Urinary tract infection, site not specified) to clearly identify the condition. There are also a number of other more specific urinary tract infection codes that could also be coded with code 996.64. These codes are classified as CCs. If we were to select catheter-associated urinary tract infections, we would implement the decision by not counting code 996.64 and any of the urinary tract infection codes listed below when both codes are present and the condition was acquired after admission. If only code 966.64 were coded on the claim as a secondary diagnosis, we would not count it as a CC.

Burden (High Cost/High Volume)—CDC reports that there are 561,667 catheter-associated urinary tract infections per year. For FY 2006, there were 11,780 reported cases of Medicare patients who had a catheter associated urinary tract infection as a secondary diagnosis. The cases had average charges of $40,347 for the entire hospital stay. According to a study in the *American Journal of Medicine,* catheter-associated urinary tract infection is the most common nosocomial infection, accounting for more than 1 million cases in hospitals and nursing homes nationwide.[22] Approximately 11.3 million women in the United States had at least one presumed acute community-acquired urinary tract infection resulting in antimicrobial therapy in 1995, with direct costs estimated at $659 million and indirect costs totaling $936 million. Nosocomial urinary tract infection necessitates one extra hospital day per patient, or nearly 1 million extra hospital days per year. It is estimated that each episode of symptomatic urinary tract infection adds $676 to a hospital bill. In total, according to the study, the estimated annual cost of nosocomial urinary tract infection in the United States ranges between $424 and $451 million.

Prevention guidelines—There are widely recognized guidelines for the prevention of catheter-associated urinary tract infections. Guidelines can be found at the following Web site: *http://www.cdc.gov/ncidod/dhqp/gl_catheter_assoc.html.*

CC—Codes 996.64 and 599.0 are classified as CCs in the CMS DRGs as well as in the MS–DRGs.

Considerations—The primary prevention intervention would be not using catheters or removing catheters as soon as possible, both of which are worthy goals because once catheters are in place for 3 to 4 days, most clinicians and infectious disease/infection control experts do not believe urinary tract infections are preventable. While there may be some concern about the selection of catheter associated urinary tract infections, it is an important public health goal to encourage practices that will reduce urinary tract infections. Approximately 40 percent of Medicare beneficiaries have a urinary catheter during hospitalization based on Medicare Patient Safety Monitoring System (MPSMS) data.

As stated above in the Coding section, this condition is clearly identified through ICD–9–CM code 996.64. Code 996.64 is classified as a CC. The hospital would also report the code for the specific type of urinary infection. For instance, when a patient develops a catheter associated urinary tract infection during the inpatient stay, the hospital would report codes 996.64 and 599.0 or another more specific code that clearly identifies the condition. These codes are classified as CCs under the CMS DRGs as well as the MS–DRGs. To select catheter-associated urinary tract infections as one of the hospital-acquired conditions that would not be counted as a CC, we would not classify code 996.64 as a CC if the condition occurred after admission. Furthermore, we would also not classify any of the codes listed below as CCs if present on the claim with code 996.64 because these additional codes identify the same condition. The following codes represent specific types of urinary infections. We did not include codes for conditions that could be considered chronic urinary infections, such as code 590.00 (Chronic pyelonephritis, without lesion or renal medullary necrosis). Chronic conditions may indicate that the condition was not acquired during the current stay. We would not count code 996.64 or any of the following codes representing acute urinary

[22] Foxman, B.: ''Epidemiology of urinary tract infections: incidence, morbidity, and economic costs,'' *The American Journal of Medicine,* 113 Suppl 1A, pp. 5s–13s, 2002.

infections if they developed after admission and were coded together on the same claim.

- 112.2 (Candidiasis of other urogenital sites)
- 590.10 (Acute pyelonephritis, without lesion of renal medullary necrosis)
- 590.11 (Acute pyelonephritis, with lesion of renal medullary necrosis)
- 590.2 (Renal and perinephric abscess)
- 590.3 (Pyeloureteritis cystica)
- 590.80 (Pyelonephritis, unspecified)
- 590.81 (Pyelitis or pyelonephritis in diseases classified elsewhere)
- 590.9 (Infection of kidney, unspecified)
- 595.0 (Acute cystitis)
- 595.3 (Trigonitis)
- 595.4 (Cystitis in diseases classified elsewhere)
- 595.81 (Cystitis cystica)
- 595.89 (Other specified type of cystitis, other)
- 595.9 (Cystitis, unspecified)
- 597.0 (Urethral abscess)
- 597.80 (Urethritis, unspecified)
- 599.0 (Urinary tract infection, site not specified)

We believe the condition of catheter-associated urinary tract infection meets all of our criteria for selection as one of the initial hospital-acquired conditions. We can easily identify the cases with ICD–9–CM codes. The condition is a CC under both the CMS DRGs and the MS–DRGs. The condition meets our burden criterion with its high cost and high frequency. There are prevention guidelines on which the medical community agrees to avoid catheter-associated urinary tract infections. We believe this condition best meets the criteria discussed. Therefore, we proposed the selection of catheter-associated urinary tract infections as one of the initial hospital-acquired conditions.

We encouraged comments on both the selection of this condition and the related conditions that we proposed to exclude from being counted as CCs.

Comment: Most commenters suggested that a large number of physicians believe urinary tract infections may not be preventable after several days of catheter placement. A few commenters submitted the following statement from the proposed rule (72 FR 24719): ''once catheters are in place for 3–4 days, most clinicians and infection control experts do not believe UTIs are preventable.'' The commenters also noted the potential difficulty in identifying this condition at admission.

Still other commenters believed this condition is difficult to code because the ICD–9–CM codes do not distinguish between catheter-associated inflammation and infection. The commenters asked CMS to consider a new code for ''inflammatory reaction from indwelling catheter'' distinct from ''catheter associated urinary tract infection.''

In addition, the commenters noted that prevention guidelines are still being debated. The commenters referenced the prevention guideline published in 1981 and posted on the Web site at: *http://www.cdc.gov/ncidod/dhqp/gl_catheter_assoc.html.*

A few commenters also recommended exceptions for this condition, including patients with immunosuppression, patients who have a catheter placed for therapeutic installation of antimicrobial/chemotherapy agent, patients with sustained urinary tract trauma, and patients in need of permanent use of a catheter.

Commenters stated that Medicare reimbursement does not cover the increased cost of antibiotic-coated catheters which have been shown to reduce the incidence of catheter infections. These same commenters asked CMS to change Medicare payment policy to encourage the application of proven existing technology.

Commenters provided two potential examples of unintended consequences if this condition is to be implemented. First, the commenters believed that physicians and hospitals will increase urinalysis testing to identify urinary tract infections prior to admission. Second, the commenters suggested that physicians and hospitals will use more antibiotics to ''clean'' the urine of bacteria upon admission.

Response: CMS seeks to reduce the incidence of preventable catheter associated urinary tract infections by reducing unnecessary and inappropriate use of indwelling urinary catheters in hospitalized Medicare patients. There is widespread evidence that catheters may lead to an increased risk of infection if they are in place for several days. In addition, there are prevention guidelines to assist physicians in determining how long a urinary catheter should be left in place that can prevent catheter-associated urinary tract infections. Therefore, we believe that catheter-associated urinary tract infections are reasonably preventable by following well-established prevention guidelines, and we are selecting this condition.

Concerning the request for the creation of a new code for ''inflammatory reaction from indwelling catheter,'' we recommend the commenter contact the CDC. The CDC is responsible for maintaining the diagnosis part of the ICD–9–CM codes. We encourage commenters to send specific requests for new or revised ICD–9–CM diagnosis codes to Donna Pickett, CDC, at 3311 Toledo Road, Room 2402, Hyattsville, MD 20782, or via e-mail to *dfp4@cdc.gov.* Additional information on requesting a new ICD–9–CM diagnosis code may be obtained from the Web site at: *http://www.cdc.gov/nchs/icd9.htm.*

The commenters are correct that prevention guidelines for avoiding catheter-associated urinary tract infections are scheduled to be updated by CDC's Healthcare Infection Control Practices Committee (HICPAC). The National Quality Forum (NQF) is currently working to update hospital-acquired infection definitions. The effort currently underway will update prevention guidelines that have been in place since 1981. We believe the ongoing effort to update prevention guidelines for avoiding catheter-associated urinary tract infections provides further evidence that this condition is a strong candidate to be selected because of how well it meets the statutory criteria.

We appreciate the many comments urging CMS to consider implementing exceptions for catheter-associated urinary tract infections when it is a hospital-acquired condition but is not preventable. We will carefully consider these suggestions as we plan for the implementation of this new requirement in FY 2009.

With respect to the comment about encouraging the use antibiotic-coated catheters, we continue to work in cooperation with device companies and other associations to ensure that Medicare beneficiaries receive the most current therapeutic modalities. We annually update Medicare inpatient hospital payment rates to reflect hospital resource use for the latest medical technology and other innovations in how care is delivered.

We do not agree there will be significant unintended consequences of selecting catheter-associated urinary tract infections. As stated earlier, we believe this condition is generally avoidable if medical professionals carefully follow longstanding prevention guidelines. We believe hospitals, physicians, and others that treat Medicare patients will focus on taking medically appropriate steps to determine the length of time a catheter is in place. We do not believe it is inappropriate to perform a urinalysis upon admission to the hospital if clinically indicated. We would not

consider doing so an unintended consequence.

We appreciate all the public comments on this condition, and have considered all of these points of view. We believe this condition meets the criteria of the DRA:

- There are unique codes that identify catheter-associated urinary tract infections that are currently considered to be a CC under the MS–DRGs;
- Prevention guidelines currently exist and will be updated prior to the October 1, 2008 implementation date of this provision; and
- As shown above, catheter-associated urinary tract infections are high cost/high volume conditions.

Therefore, in this final rule with comment period, we are selecting the condition of catheter-associated urinary tract infections to be subject to the provision beginning October 1, 2008.

(b) Pressure Ulcers

Coding—Pressure ulcers are also referred to as decubitus ulcers. The following codes clearly identify pressure ulcers.

- 707.00 (Decubitus ulcer, unspecified site)
- 707.01 (Decubitus ulcer, elbow)
- 707.02 (Decubitus ulcer, upper back)
- 707.03 (Decubitus ulcer, lower back)
- 707.04 (Decubitus ulcer, hip)
- 707.05 (Decubitus ulcer, buttock)
- 707.06 (Decubitus ulcer, ankle)
- 707.07 (Decubitus ulcer, heel)
- 707.09 (Decubitus ulcer, other site)

Burden (High Cost/High Volume)—This condition is both high-cost and high volume. For FY 2006, there were 322,946 reported cases of Medicare patients who had a pressure ulcer as a secondary diagnosis. These cases had average charges for the hospital stay of $40,381.

Prevention guidelines—Prevention guidelines can be found at the following Web sites: *http://www.npuap.org/positn1.html* and *http://www.ncbi.nlm.nih.gov/books/bv.fcgi?rid=hstat2.chapter.4409.*

CC—Decubitus ulcer codes are classified as CCs under the CMS DRGs. Codes 707.00, 707.01, and 707.09 are CCs under the MS–DRGs. Codes 707.02 through 707.07 are considered MCCs under the MS–DRGs. As discussed earlier, MCCs result in even larger payments than CCs.

Considerations—Pressure ulcers are an important hospital acquired complication. Prevention guidelines exist (non-CDC) and can be implemented by hospitals. Clinicians may state that some pressure ulcers present on admission cannot be identified (skin is not yet broken (Stage I) but damage to tissue is already done and skin will eventually break down). However, by selecting this condition, we would provide hospitals the incentive to perform careful examination of the skin of patients on admission to identify decubitus ulcers. If the condition is present on admission, the provision will not apply. In the proposed rule, we proposed to include pressure ulcers as one of our initial hospital-acquired conditions. This condition can be clearly identified through ICD–9–CM codes. These codes are classified as a CC under the CMS DRGs and as a CC or MCC under the MS–DRGs. Pressure ulcers meet the burden criteria because they are both high cost and high frequency cases. There are clear prevention guidelines. While there is some question as to whether all cases with developing pressure ulcers can be identified on admission, we believe the selection of this condition will result in a closer examination of the patient's skin on admission and better quality of care. We welcomed comments on the proposed inclusion of this condition.

Comment: A majority of commenters supported the intent of selecting the condition of pressure ulcers, but had concerns about how the provision would be implemented in practice. A large majority of commenters believed hospitals will more carefully examine the skin of patients if this condition is selected. However, many commenters cited difficulty in detecting stage 1 pressure ulcers on admission, particularly in certain patient populations.

The commenters cited the Guidance to Surveyors for Long-Term Care Facilities (CMS Manual System Pub. 100–07, State Operations Provider Certification issued November 2004, page 5), noting CMS'' previous acknowledgment that some pressure ulcers are ''unavoidable.'' The commenters cited evidence of an increased risk of pressure ulcer reoccurrence after a patient has had at least one stage IV ulcer.

The commenters expressed concern about how this condition will be coded upon admission. The commenters also suggested that present-on-admission coding of pressure ulcers will rely solely on physicians' notes and diagnoses, according to Medicare coding rules. The commenters were concerned that the current ICD–9–CM codes for pressure ulcers are not precise enough to delineate differences in wound depth, which is an important factor for determining the severity of an ulcer.

The commenters recommended that CMS supplement ICD–9–CM codes for pressure ulcers with severity adjustments for complications and comorbidities that are present on admission. Because patients with pressure ulcers often have other complicating conditions, the commenters stated that it is unlikely that pressure ulcers would potentially be the only secondary diagnosis that would change the DRG assignment from one without a CC to one with a CC. Lastly, the commenters noted that accurate identification of a pressure ulcer requires the education and expertise of a trained physician.

The commenters suggested that CMS should exclude patients enrolled in the Medicare hospice benefit and patients with certain diagnoses that make them more highly prone to pressure ulcers such as hemiplegia, quadriplegia, wasting syndrome, with advanced AIDS and/or protein malnutrition associated with a variety of serious end stage illnesses.

Response: We appreciate the overwhelming public support for the intent of selecting this condition, provided we can address the concerns raised in the public comments. We acknowledge the commenters' concern that CMS previously stated some pressure ulcers are ''unavoidable.'' However, we believe improved screening to identify pressure ulcers upon admission for inpatient care will increase the quality of care. By screening patients entering the hospital for pressure ulcers, the ulcers will be discovered earlier and improve treatment of this preventable condition. We agree that the POA coding of pressure ulcers will rely on the attending physician, who has primary responsibility for documenting and diagnosing a patient's clinical conditions. Pressure ulcers that are identified through screening upon admission that are documented properly will continue to be assigned to a higher paying DRG.

With respect to the comment about patients with pressure ulcers having other complications and comorbidities, we note that many of the new MS–DRGs are subdivided into two or more severity levels. We will continue to evaluate the need for additional severity levels within base MS–DRGs. On the specific issue of the MS–DRGs that include pressure ulcers, we note that these MS–DRGs are already divided into three severity levels as follows:

- MS–DRG 573 (Skin Graft &/or Debridement for Skin Ulcer or Cellulitis with MCC)

• MS–DRG 574 (Skin Graft &/or Debridement for Skin Ulcer or Cellulitis with CC)

• MS–DRG 575 (Skin Graft &/or Debridement for Skin Ulcer or Cellulitis without CC/MCC)

We are aware that many patients with pressure ulcers may also have other comorbid and complicating conditions that will continue to assign the patient to a higher paying DRG. We do not believe this fact should preclude physicians and hospitals from screening patients for pressure ulcers upon admission. As we indicated in the proposed rule (72 FR 24726), we believe only a minority of cases will have one of the selected conditions as the only CC or MCC present on the claim. However, we believe it will continue to lead to improvements in the quality of care. We believe the selection of this condition will lead the physician and hospital to perform a proper skin exam upon admission, leading to earlier identification and treatment of pressure ulcers.

With respect to the comment that accurate identification of a pressure ulcer requires the education and expertise of a trained physician, we agree. Hospitals should be using properly educated and trained physicians to identify and treat pressure ulcers (as well as all other medical conditions).

We appreciate all the public comment on this condition, and have considered all of these points of view. We believe the condition of pressure ulcers meets the criteria of the DRA:

• There are unique codes that identify pressure ulcers that are currently considered to be a CC or an MCC under the MS–DRGs;

• Prevention guidelines to avoid pressure ulcers currently exist; and

• As shown above, pressure ulcers are high-cost/high-volume conditions.

Therefore, in this final rule with comment period, we are selecting the condition of pressure ulcers to be subject to the payment adjustment for hospital acquired conditions beginning October 1, 2008. We referred the matter concerning the need for additional, detailed ICD–9–CM codes to the CDC. We believe further specificity in the ICD–9–CM codes will aid in distinguishing early from late stage pressure ulcers prior to the implementation date of this provision on October 1, 2008.

Serious Preventable Events

Serious preventable events are events that should not occur in health care. The injury prevention community has developed information on serious preventable events. CMS reviewed the list of serious preventable events and identified those events for which there was an ICD–9–CM code that would assist in identifying them. We identified four types of serious preventable events to include in our evaluation. These include leaving an object in a patient; performing the wrong surgery (surgery on the wrong body part, wrong patient, or the wrong surgery); air embolism following surgery; and providing incompatible blood or blood products. Three of these serious preventable events have unique ICD–9–CM codes to identify them. There is not a clear and unique code for surgery performed on the wrong body part, wrong patient, or the wrong surgery. Each of these events is discussed separately.

(c) Serious Preventable Event—Object Left in during Surgery

Coding Retention of a foreign object in a patient after surgery is identified through ICD–9–CM code 998.4 (Foreign body accidentally left during a procedure).

Burden (High Cost/High Volume)—For FY 2006, there were 764 cases reported of Medicare patients who had an object left in during surgery reported as a secondary diagnosis. The average charges for the hospital stay were $61,962. This is a rare event. Therefore, it is not high volume. However, an individual case will likely have high costs, given that the patient will need additional surgery to remove the foreign body. Potential adverse events stemming from the foreign body could further raise costs for an individual case.

Prevention guidelines—There are widely accepted and clear guidelines for the prevention of this event. This event should not occur. Prevention guidelines for avoiding leaving objects in during surgery are located at the following Web site: *http://www.qualityindicators.ahrq.gov/psi_download.htm.*

CC—This code is a CC under the CMS DRGs as well as under the MS DRGs.

Considerations—There are no significant considerations for this condition. There is a unique ICD–9–CM code and wide agreement on the prevention guidelines. We proposed to include this condition as one of our initial hospital-acquired conditions. The cases can be clearly identified through an ICD–9–CM code. This code is a CC under both the CMS DRGs and the MS–DRGs. There are clear prevention guidelines. While the cases may not meet the high frequency criterion, they do meet the high-cost criterion. Individual cases can be high cost. In the proposed rule, we welcomed comments on including this condition as one of our initial hospital-acquired conditions.

Comment: A large majority of commenters supported CMS' efforts to identify the condition of ''object left in surgery'' as one that should not occur in the hospital setting. The commenters supported selecting this condition in this year's IPPS rule.

The commenters applauded CMS for identifying a hospital acquired condition that has discrete ICD–9–CM codes and known methods of prevention. In addition, a few commenters noted that prevention guidelines for this condition are fully identified and endorsed by the NQF. MedPAC also complimented CMS for its efforts to identify ''object left in surgery'' and stated that CMS should not allow a case to be classified as a CC/MCC if this ''never event'' occurs during a patient's stay.

The commenters urged CMS to make exceptions for objects deliberately left in place in surgery as opposed to accidental retained foreign objects. The commenters noted that a patient may return to the hospital months or years after an object was left in during surgery, and it is necessary to have POA codes to identify patients that return to a different hospital to have the object removed. All of the commenters recognized that this event can cause great harm to patients.

Response: We believe exceptions for this condition are not necessary. The code that identifies this event, 998.4 (Foreign body accidentally left during a procedure) specifically states that the object was accidentally left in during the surgery. This code would not be assigned if a device or implant was deliberately implanted into a patient. In addition, as stated earlier, we recognize the important role of the attending physician in designating whether or not the serious preventable event occurred during the current admission. We agree with the commenters that a patient may return to the hospital months or years after the surgery to have the foreign object removed. In this circumstance, the hospital would code the condition as present on admission and the provision would not apply. By documenting the event early, the correct POA code can be applied. We agree with the commenters that this serious preventable event should be selected as a hospital-acquired condition in this final rule with comment period. Therefore, we are including this condition in the list of those to be implemented in FY 2009.

(d) Serious Preventable Event—Air Embolism

Coding—An air embolism is identified through ICD–9–CM code 999.1 (Complications of medical care, NOS, air embolism).

Burden (High Cost/High Volume)—This event is rare. For FY 2006, there were 45 reported cases of air embolism for Medicare patients. The average charges for the hospital stay were $66,007.

Prevention guidelines—there are clear prevention guidelines for air embolisms. This event should not occur. Serious preventable event guidelines can be found at the following Web site: *http://www.qualityindicators.ahrq.gov/psi_download.htm.*

CC—This code is a CC under the CMS DRGs and is an MCC under the MS–DRGs.

Considerations—There are no significant considerations for this condition. There is a unique ICD–9–CM code and wide agreement on the prevention guidelines. In addition, as stated earlier, the condition is a CC under the CMS DRGs and an MCC under the MS–DRGs. While the condition is rare, it does meet the cost burden criterion because individual cases can be expensive. Therefore, air embolism is a high-cost condition because average charges per case are high. In the proposed rule, we welcomed comments on the proposal to include this condition.

Comment: A large number of commenters supported CMS' efforts to select this condition as one that should not occur in the hospital setting. The commenters considered this an appropriate condition to include for the final rule. The commenters applauded CMS for identifying a hospital acquired condition that has discrete ICD–9–CM codes and known methods of prevention.

In addition, the commenters noted that prevention guidelines for this condition are fully identified and endorsed by the NQF. MedPAC also complimented CMS for its efforts to identify ''air embolism'' and stated that CMS should not allow a case to be classified as a CC/MCC if this ''never event'' occurs during a patient's stay.

The commenters urged CMS to make exceptions for situations when air embolism is technically unavoidable because of a special surgical procedure. All of the commenters recognized that this event can cause great harm to patients.

Response: We appreciate the support for the selection of this condition. We also welcome specific recommendations that would clearly define an appropriate exception to this condition, including any appropriate ICD–9–CM diagnosis and procedure codes which the commenter believes clearly define such an occurrence and the justification for an exception. At this point, we do not believe such an exception is necessary.

We agree with commenters that this serious preventable event should be included in the FY 2008 final rule. Therefore, we are including the condition of air embolism in the list of those to be implemented in FY 2009.

(e) Serious Preventable Event—Blood Incompatibility

Coding—Delivering ABO-incompatible blood or blood products is identified by ICM–9–CM code 999.6 (Complications of medical care, NOS, ABO incompatibility reaction).

Burden (High Cost/High Volume)—This event is rare. Therefore, it is not high volume. For FY 2006, there were 33 reported cases of blood incompatibility among Medicare patients, with average charges of $46,492 for the hospital stay. Therefore, individual cases have high costs.

Prevention guidelines—There are prevention guidelines for avoiding the delivery of incompatible blood or blood products. The event should not occur. Serious preventable event guidelines can be found at the following Web site: *http://www.qualityindicators.ahrq.gov/psi_download.htm*

CC—This code is a CC under the CMS DRGs as well as the MS–DRGs.

Considerations—There are no significant considerations for this condition. There is a unique ICD–9–CM code which is classified as a CC under the CMS DRGs as well as the MS–DRGs. There is wide agreement on the prevention guidelines. While this may not be a high-volume condition, average charges per case are high. Therefore, we believe this condition is a high-cost condition and, therefore, meets our burden criterion. We proposed to include this condition as one of our initial hospital acquired conditions.

Comment: A large number of commenters supported CMS' efforts to identify ''blood incompatibility'' as one condition that should not occur in the hospital setting. The commenters considered this an appropriate condition to include for FY 2009. The commenters applauded CMS for identifying a hospital acquired condition that has discrete ICD–9–CM codes and known methods of prevention. In addition, the commenters noted that prevention guidelines for this condition are fully identified and endorsed by the NQF. MedPAC also complimented CMS for its efforts to identify ''blood incompatibility'' and stated that CMS should not allow a case to be classified as a CC/MCC if this ''never event'' occurs during a patient's stay.

The commenters urged CMS to make exceptions for situations when blood incompatibility is technically unavoidable in emergencies when patients deliberately receive unmatched blood. All of the commenters recognized that this event can cause great harm to patients.

Response: As suggested by commenters, hospitals should not be transfusing incompatible blood. The condition meets the criteria for being selected. It is a potential hospital acquired condition that has discrete ICD–9–CM codes and known methods of prevention. Prevention guidelines for this condition are fully identified and endorsed by the NQF. We acknowledge that there may a rare emergency where a hospital does not have compatible blood available for transfusion. We welcome specific recommendations that would define circumstances where blood incompatibility is unavoidable, including any appropriate ICD–9–CM diagnosis and procedure codes, which the commenters believe clearly define such an occurrence. If providers can provide such a clinical scenario that can be identified by existing or new ICD–9–CM codes, we will consider excluding this situation from the provision. We agree with the commenters that this serious preventable event should be included in the FY 2008 final rule. Therefore, we are including the condition of blood incompatibility in the list of those to be implemented in FY 2009.

(f) Staphylococcus Aureus Bloodstream Infection/Septicemia

Coding—ICD–9–CM Code 038.11 (Staphylococcus aureus septicemia) identifies this condition. However, the codes selected to identify septicemia are somewhat complex. The following ICD–9–CM codes may also be reported to identify septicemia:

- 995.91 (Sepsis) and 995.92 (Severe sepsis). These codes are reported as secondary codes and further define cases with septicemia.
- 998.59 (Other postoperative infections). This code includes septicemia that develops postoperatively.
- 999.3 (Other infection). This code includes but is not limited to sepsis/septicemia resulting from infusion, injection, transfusion, and vaccination (ventilator-associated pneumonia is also included here).

Burden (High Cost/High Volume)—CDC reports that there are 290,000 cases of staphylococcus aureus infection annually in hospitalized patients of which approximately 25 percent are bloodstream infections or sepsis. For FY 2006, there were 29,500 cases of Medicare patients who had staphylococcus aureus infection reported as a secondary diagnosis. The average charges for the hospital stay were $82,678. Inpatient staphylococcus aureus result in an estimated 2.7 million days in excess length of stay, $9.5 billion in excess charges, and approximately 12,000 inpatient deaths per year.

Prevention guidelines—CDC guidelines are located at the following Web site: *http://www.cdc.gov/ncidod/dhqp/gl_intravascular.html.*

CC—Codes 038.11, 995.91, 998.59, and 999.3 are classified as CCs under the CMS DRGs and as MCCs under the MS–DRGs.

Considerations—Preventive health care associated bloodstream infections/septicemia that are preventable are primarily those that are related to a central venous/vascular catheter, a surgical procedure (postoperative sepsis) or those that are secondary to another preventable infection (for example, sepsis due to catheter-associated urinary tract infection). Otherwise, physicians and other public health experts may argue whether septicemia is reasonably preventable. The septicemia may not be simply a hospital acquired infection. It may simply be a progression of an infection that occurred prior to admission. Furthermore, physicians cannot always tell whether the condition was hospital-acquired. We examined whether it might be better to limit the septicemia cases to a specific organism (for example, code 038.11 (Staphylococcus aureus septicemia)). CDC staff recommended that we focus on staphylococcus aureus septicemia because this condition is a significant public health issue. As stated earlier, there is a specific code for staphylococcus aureus septicemia, code 038.11. Therefore, the cases would be easy to identify. However, as stated earlier, while this type of septicemia is identified through code 038.11, coders may also provide sepsis code 995.91 or 995.92 to more fully describe the staphylococcus aureus septicemia. Codes 995.91 and 995.92 are reported as secondary codes and further define cases with septicemia. Codes 995.91 and 995.92 are CCs under the CMS DRGs and MCCs under the MS–DRGs.

- 998.59 (Other postoperative infections). This code includes septicemia that develops postoperatively.
- 999.3 (Other infection). This code includes but is not limited to sepsis/septicemia resulting from infusion, injection, transfusion, and vaccination (ventilator-associated pneumonia is also indexed here).

To implement this condition as one of our initial ones, we would have to exclude the specific code for staphylococcus aureus septicemia, 038.11, and the additional septicemia codes, 995.91, 995.92, 998.59, and 999.3.

We acknowledge that there are additional issues involved with the selection of this condition that may involve developing an exclusion list of conditions present on admission for which we would not apply a CC exclusion to staphylococcus aureus septicemia. For example, a patient may come into the hospital with a staphylococcus aureus infection such as pneumonia. The pneumonia might develop into staphylococcus aureus septicemia during the admission. It may be appropriate to consider excluding cases such as those of patients admitted with staphylococcus aureus pneumonia that subsequently develop staphylococcus aureus septicemia from the provision. In order to exclude cases that did not have a staphylococcus aureus infection prior to admission, we would have to develop a list of specific codes that identified all types of staphylococcus aureus infections such as code 482.41 (Pneumonia due to staphylococcus aureus). We likely would not apply the new provision to cases of staphylococcus aureus septicemia if a patient were admitted with staphylococcus aureus pneumonia. However, if the patient had other types of infections, not classified as being staphylococcus aureus, and then developed staphylococcus aureus septicemia during the admission, we would apply the provision and exclude the staphylococcus aureus septicemia as a CC. We were not able to identify any other specific ICD–9–CM codes that identify specific infections as being due to staphylococcus aureus.

Other types of infections, such as urinary tract infections, would require the reporting of an additional code, 041.11 (Staphylococcus aureus), to identify the staphylococcus aureus infection. This additional coding presents administrative issues because it will not always be clear which condition code 041.11 (Staphylococcus aureus) is describing. We do not believe it would be appropriate to make code 041.11, in combination with other codes, subject to the hospital-acquired conditions provision until we better understand how to address the administrative issues that would be associated with their selection. Therefore, we would exclude staphylococcus aureus septicemia cases with code 482.41 reported as being subject to the hospital-acquired conditions provision. Stated conversely, we would allow staphylococcus aureus septicemia to count as a CC if the patient was admitted with staphylococcus aureus pneumonia.

We recognize that there may be other conditions which we should consider for this type of exclusion. We proposed to include staphylococcus aureus bloodstream infection/septicemia (code 038.11) as one of our initial hospital-acquired conditions. We also proposed to exclude codes 995.91, 998.59, and 999.3 from counting as an MCC/CC when they were reported with code 038.11. The condition can be clearly identified through ICD 9 CM codes that are classified as CC under the CMS DRGs and MCCs under the MS–DRGs. The condition meets our burden criterion by being both high cost and high volume. There are prevention guidelines which we acknowledge are subject to some debate among the medical community. We also acknowledge that we would have to exclude this condition if a patient were admitted with a staphylococcus aureus infection of a more limited location, such as pneumonia. In the proposed rule, we encouraged commenters to make suggestions on this issue and to recommend any other appropriate exclusion for staphylococcus aureus septicemia. We also encouraged comments on the appropriateness of selecting staphylococcus aureus septicemia as one of our proposed initial hospital acquired conditions.

Comment: Many commenters opposed CMS' proposed selection of this condition as part of the FY 2008 final rule. There were a minority of commenters who strongly supported the selection of this condition. These commenters noted the existence of technologies that allow the physician to determine the presence of Staphylococcus Aureus upon admission. Many more commenters stated that accurately identifying staphylococcus aureus septicemia on admission will be difficult, particularly in patients who may have a staphylococcus aureus infection in a limited location. Several commenters referenced the FY 2008 IPPS proposed rule, which stated ''physicians cannot always tell whether the condition was hospital acquired.'' Other commenters also noted that there is still debate

among physicians regarding the prevention guidelines for staphylococcus aureus septicemia. The proliferation of changes in coding guidelines presents coding problems for hospitals to accurately identify present-on-admission status according to some comments. Specifically, the commenters noted that codes to identify sepsis are very complex and have had recent changes. For instance, there is a code that currently includes septicemia that develops postoperatively, but does not clearly distinguish between intravascular and catheter-associated sources of septicemia. The commenters also suggested that additional coding may be necessary to accurately identify this condition in the many forms it often presents upon admission. Some commenters suggested that the addition of codes may create a challenge for coding staff to identify the correct code.

A large majority of commenters urged CMS to narrow the category for staphylococcus aureus septicemia to include only patients for whom it is reasonably clear that the hospital was the source of the infection and that it could have been reasonably prevented.

Response: We appreciate the plethora of comments regarding staphylococcus aureus septicemia. The commenters were very insightful and presented the challenges of selecting this condition in the FY 2008 final rule.

We agree that the recent proliferation of ICD–9–CM codes for this condition will make it difficult to code and could present an administrative burden on hospitals. In addition, we are sensitive to the difficulty of identifying when a disease has progressed to sepsis or septicemia. Given the course of progression to septicemia, it can be very difficult for a clinician to appropriately diagnose staphylococcus aureus septicemia as present on admission.

While we acknowledge the many concerns raised by the commenters, we continue to believe that hospital acquired staphylococcus aureus septicemia remains a significant public health issue. We are aware of the continued need to prevent Staphylococcus Aureus septicemia in the hospital setting. Therefore, we plan to engage in a collaborative discussion with relevant experts to identify the circumstances when staphylococcus aureus septicemia is preventable. If we can identify when staphylococcus aureus septicemia is a reasonably preventable condition and have codes to distinguish those situations, we will consider this condition for future years. We appreciate the many comments and suggestions as we consider staphylococcus aureus septicemia for selection in the future, and look forward to receiving more public input to identify only instances when this condition is preventable.

Therefore, we are not selecting this condition in this final rule with comment period. We plan to collaborate with the public on this important public health issue and continue to consider the condition for selection in the FY 2009 final rule. We encourage and welcome public comment to further evaluate this condition.

(g) Ventilator Associated Pneumonia (VAP) and Other Types of Pneumonia

Coding—Pneumonia is identified through the following codes:

- 073.0 (Ornithosis with pneumonia)
- 112.4 (Candidiasis of lung)
- 136.3 (Pneumocystosis)
- 480.0 (Pneumonia due to adenovirus)
- 480.1 (Pneumonia due to respiratory syncytial virus)
- 480.2 (Pneumonia due to parainfluenza virus)
- 480.3 (Pneumonia due to SARS-associated coronavirus)
- 480.8 (Pneumonia due to other virus not elsewhere classified)
- 480.9 (Viral pneumonia, unspecified)
- 481 (Pneumococcal pneumonia [Streptococcus pneumoniae pneumonia])
- 482.0 (Pneumonia due to Klebsiella pneumoniae)
- 482.1 (Pneumonia due to Pseudomonas)
- 482.2 (Pneumonia due to Hemophilus influenzae [H. influenzae])
- 482.30 (Pneumonia due to Streptococcus, unspecified)
- 482.31 (Pneumonia due to Streptococcus, Group A)
- 482.32 (Pneumonia due to Streptococcus, Group B)
- 482.39 (Pneumonia due to other Streptococcus)
- 482.40 (Pneumonia due to Staphylococcus, unspecified)
- 482.41 (Pneumonia due to Staphylococcus aureus)
- 482.49 (Other Staphylococcus pneumonia)
- 482.81 (Pneumonia due to Anaerobes)
- 482.82 (Pneumonia due to Escherichia coli [E. coli])
- 482.83 (Pneumonia due to other gram-negative bacteria)
- 482.84 (Pneumonia due to Legionnaires' disease)
- 482.89 (Pneumonia due to other specified bacteria)
- 482.9 (Bacterial pneumonia unspecified)
- 483.0 (Pneumonia due to Mycoplasma pneumoniae)

There is not a unique code that identifies ventilator-associated pneumonia. The creation of a code for ventilator-associated pneumonia was discussed at the September 29, 2006 meeting of the ICD–9–CM Coordination and Maintenance Committee meeting. Many issues and concerns were raised at the meeting concerning the creation of this proposed new code. It has been difficult to define ventilator-associated pneumonia. We plan to continue working closely with the CDC to develop a code that can accurately describe this condition for implementation in FY 2009. CDC will address the creation of a unique code for this condition at the September 28–29, 2007 ICD–9–CM Coordination and Maintenance Committee meeting.

While we list 27 pneumonia codes above, our clinical advisors do not believe that all of the codes mentioned could possibly be associated with ventilator-associated pneumonia. Our clinical advisors specifically question whether the following codes would ever represent cases of ventilator-associated pneumonia: 073.0, 480.0, 480.1, 480.2, 480.3, 480.8, 480.9, and 483.0. Therefore, we have a range of pneumonia codes, all of which may not represent cases that could involve ventilator-associated pneumonia. In addition, we do not have a specific code that uniquely identifies cases of ventilator-associated pneumonia.
