

comment and review periods. The Proposed Action includes construction, renovation, and operation of proposed facilities to accommodate incoming military missions at APG. To implement the BRAC recommendations, APG will be receiving personnel, equipment, and missions from various closure and realignment actions within the Department of Defense. To implement the BRAC Commission recommendations, the Army will provide the necessary facilities, buildings, and infrastructure to support incoming military missions and a net gain of about 4,400 people as mandated by the 2005 BRAC Commission's recommendations at APG. The No Action Alternative would not meet the Army's purpose and need for the Proposed Action as the BRAC realignment is required by Congress and needed for Army transformation to be effective.

Special consideration was given to the effect of the Preferred Alternative on natural resources, cultural resources, and traffic. All practicable means to avoid or minimize environmental harm from the Preferred Alternative have been adopted. The Army will minimize effects on all environmental and socioeconomic resources by implementing best management practices as described in the EIS. Mitigation measures, as described in the ROD, will be implemented, subject to the availability of funding, to minimize, avoid, or compensate for the adverse effects identified in the EIS at APG for biological resources and cultural resources. The EIS also identifies transportation projects that could eliminate adverse impacts from implementing the Preferred Alternative. The ROD describes the disposition of these projects and the approach the Army will take to mitigate traffic concerns.

The ROD states that implementing the Preferred Alternative reflects a proper balance between initiatives for protection of the environment, appropriate mitigation, and actions to achieve the Army's requirements.

An electronic version of the ROD is available for download at: http://www.hqda.army.mil/acsim/brac/nepa_eis_docs.htm.

Affected Public: Individuals or household; State, Local, or Tribal Gov't, SEAs or LEAs.

Reporting and Recordkeeping Hour Burden:

Abstract: The proposed project is a multi-year data collection effort to evaluate the effectiveness of PAVEd for Success (PAVE), an intervention

designed to improve teachers' vocabulary instructional practices and thereby promote vocabulary development among kindergarteners in the Delta region of Mississippi. The children in this region are well behind national averages in vocabulary skills, and vocabulary knowledge is an essential component of literacy development that has generally been difficult to improve. The PAVE program is one vocabulary program that has shown promise, but more rigorous testing is required to establish evidence of its effectiveness. The study sample will include 120-160 teachers, and 1,200-1,600 kindergarten students in a randomized control trial in 60-80 schools. Student's literacy skills and teacher's literacy instruction practices will be assessed to determine the impact of PAVE on students and teachers.
