

drugs, therapeutics, and diagnostics. The intent is to discourage the use of patents to prevent the use of or block access to any genotype-phenotype data developed with NIH support. The NIH encourages broad use of NIH-supported genotype-phenotype data that is consistent with a responsible approach to management of intellectual property derived from downstream discoveries, as outlined in the NIH's Best Practices for the Licensing of Genomic Inventions (http://www.ott.nih.gov/policy/genomic_invention.html) and its Research Tools Policy (http://ott.od.nih.gov/policy/research_tool.html).

The filing of patent applications and/or the enforcement of resultant patents in a manner that might restrict use of NIH-supported genotype-phenotype data could diminish the potential public benefit they could provide. Approved users and their institutions, through the execution of an NIH Data Use Certification, will acknowledge the goal of ensuring the greatest possible public benefit from NIH-supported GWAS.

Expectations Defined in the Policy for Investigators

The detailed expectations are enumerated in the individual sections of this policy, and summarized as follows:

Investigators Submitting GWAS Data Are Expected To

- Provide descriptive information about their studies;
- Submit coded genotypic and phenotypic data to the NIH GWAS data repository; and
- Submit certification by the Institutional Official(s) of the responsible submitting institution that it has reviewed and approved submission to the NIH, noting any limitations on data use based on the relevant informed consents and providing assurance that all data are submitted to the NIH in accord with applicable laws and regulations and that the identities of research participants will not be disclosed to the NIH GWAS data repository.

Investigators Requesting and Receiving GWAS Data Are Expected To

- Submit a description of the proposed research project;
- Submit a data access request, including a Data Use Certification co-signed by the designated Institutional Official(s) at their sponsoring institution;
- Protect data confidentiality;
- Ensure that data security measures are in place;

- Notify the appropriate Data Access Committee of policy violations; and
- Submit annual progress reports detailing significant research findings.
