that resource agency. A copy of any motion to intervene must also be served upon each representative of the Applicant specified in the particular application.

k. *Description of Request:* Progress Energy Carolinas is requesting a temporary variance of the requirements for lake level, dissolved oxygen and minimum flow. Due to persistent drought conditions in the project area and the need to maintain a minimum reservoir elevation to prevent erosion of dioxin laden lake sediments, Progress Energy requests that it be allowed to reduce flow releases below the minimum flow requirement of 100 cubic feet per second if the Walters Lake reaches an elevation of 2234 feet, and to stop all releases from the powerhouse if Walters Lake reaches elevation 2232 feet. Only flows from Big Creek, the 12 mile bypassed reach of the Pigeon River, and other small tributaries will provide flow. Progress Energy proposes to resume minimum flow releases when Walters Lake is at and above an elevation of 2236 feet. The licensee proposes to limit complete shutdown of flow releases to periods not to exceed 7 days at elevation above 2232 feet. Progress Energy has consulted with Tennessee Wildlife Resources Agency and the North Carolina Department of Environment and Natural Resources. These agencies concur with the request. On August 31, 2007, the Commission granted the licensee's requests, but reserved authority to require changes in project operation based upon comments received from this notice.

l. *Location of the Application:* The filing is available for inspection and reproduction at the Commission's Public Reference Room, located at 888 First Street, NE., Room 2A, Washington, DC 20426 or by calling (202) 502-8371, or by calling (202) 502-8371. In determining the appropriate action to take, the Commission will consider all protests or other comments filed, but only those who file a motion to intervene in accordance with the Commission's Rules may become a party to the proceeding.
