Approval and Promulgation of Air Quality Implementation Plans; Indiana; VOC Emissions From Fuel Grade Ethanol Production Operations

AGENCY: Environmental Protection Agency (EPA).

ACTION: Proposed rule.

SUMMARY: EPA is proposing to approve a March 30, 2007, request from the

Indiana Department of Environmental Management (IDEM) to revise the Indiana State Implementation Plan (SIP) by adding a volatile organic compound (VOC) rule for fuel grade ethanol production at dry mills. This rule revision creates an industry-specific Best Available Control Technology (BACT) standard for new fuel grade ethanol production dry mills that replaces the otherwise required case-by-case BACT determination for new facilities with the potential to emit 25 tons or more of VOC per year. The benefit of this rule is that establishing specific standards in place of a case-by-case analysis improves the clarity, predictability, and timeliness of permit decisions.

Approval and Promulgation of Air Quality Implementation Plans; Ohio; Oxides of Nitrogen Budget Trading Program

AGENCY: Environmental Protection Agency (EPA).

ACTION: Proposed rule.

SUMMARY: EPA is proposing to approve Ohio's request to permanently retire 240 oxides of nitrogen (NO_x) allowances from the State's 2005 new source set aside, which would otherwise have been distributed to existing sources that are required participants in the State of Ohio's NO_x budget. Under the Federal NO_x Budget Trading Program, each participating state receives a main pool of 'allowances', which are credits that permit a source to emit one ton of NO_x per allowance. Allowances are apportioned state-wide to electricity generating units and other large NO_x sources which are subject to the budget trading program. Each year, a certain number of allowances are set aside from the main pool by the State, specifically for use by any new sources subject to the trading program which may come
