These characteristics include the appearance of naturalness, outstanding opportunities for solitude, and outstanding opportunities for primitive and unconfined recreation.

The DRMP/EIS analyzed five alternatives for management of public lands in the Price Field Office, and disclosed the impacts of implementing each alternative. The Price Field Office Supplemental DRMP/EIS will prescribe specific actions to manage for the wilderness characteristics of non-WSA lands with wilderness characteristics in a new alternative to ensure that: (1) Adequate consideration is given to wilderness characteristics; (2) an adequate range of alternatives is considered for these lands; and (3) an adequate analysis is prepared from which to base future land use decisions. Comments, including names and addresses of respondents, will be available for public review at the Price Field Office. Before including your address, phone number, e-mail address, or other personal identifying information in your comment, you should be aware that your entire comment—including your personal identifying information—may be made publicly available at any time. While you can ask us in your comment to withhold your personal identifying information from public review, we cannot guarantee that we will be able to do so.

Copies of the Supplemental DRMP/EIS are available in the Price Field Office and on the Internet at the address provided above.
