

to, a collection of information, unless it displays a currently valid OMB control number. The OMB control numbers for EPA's regulations in title 40 of the CFR, after appearing in the **Federal Register** when approved, are listed in 40 CFR part 9, are displayed either by publication in the **Federal Register** or by other appropriate means, such as on the related collection instrument or form, if applicable. The display of OMB control numbers in certain EPA regulations is consolidated in 40 CFR part 9.

Abstract: The National Listing of Fish Advisories (NLFA) Database contains information on the number of new advisories issued by each state, territory, or tribe annually. The advisory information collected identifies the waterbody under advisory, the fish or shellfish species and size ranges included in the advisory, the chemical contaminants and residue levels causing the advisory to be issued, the waterbody type (river, lake, estuary, coastal waters), and the target populations to whom the advisory is directed. This information is collected under the authority of section 104 of the Clean Water Act, which provides for the collection of information to be used to protect human health and the environment. The results of the survey are shared with states, territories, tribes, other federal agencies, and the general public through the NLFA database and the distribution of annual fish advisory fact sheets. The responses to the survey are voluntary and the information requested is part of the state public record associated with the advisories. No confidential business information is requested.

Burden Statement: The annual public reporting and recordkeeping burden for this collection of information is estimated to average 38.76 hours per response. Burden means the total time, effort, or financial resources expended by persons to generate, maintain, retain, or disclose or provide information to or for a Federal agency. This includes the time needed to review instructions; develop, acquire, install, and utilize technology and systems for the purposes of collecting, validating, and verifying information, processing and maintaining information, and disclosing and providing information; adjust the existing ways to comply with any previously applicable instructions and requirements which have subsequently changed; train personnel to be able to respond to a collection of information; search data sources; complete and review the collection of information; and transmit or otherwise disclose the information.

Respondents/Affected Entities: State (or other entity) health departments and state (or other entity) EPAs.

Estimated Number of Respondents: 92.

Frequency of Response: Annual.

Estimated Total Annual Hour Burden: 3,565 labor hours.

Estimated Total Annual Cost: \$124,755, including \$538 in operation and maintenance costs. No capital or startup costs are required.

Changes in the Estimates: There is a change in cost burden to remove \$124,214 from that identified in the ICR currently approved by OMB. This is to correct a mistake of including labor hours in the cost burden instead of just the operations and maintenance costs of \$538.

Dated: September 11, 2007.
