

defined in part 261. Although these eligible wastes are exempted from RCRA manifest, transportation, and disposal requirements, they must still comply with the manifest, transportation, and disposal requirements under the NRC (or NRC-Agreement State) regulations. There are two conditional exemptions. The Storage and Treatment Conditional Exemption applies to any generator of LLMW who is licensed by NRC or an NRC Agreement State to manage radioactive materials. This exemption is available only to LLMW generated under a single NRC or NRC Agreement State license. LLMW generators must notify EPA of the LLMW storage units for which they are claiming an exemption, and must meet the conditions listed in § 266.230. This exemption is valid as long as the Mixed Waste meets the conditions, remains in a conditionally exempt storage unit, and is subject to NRC regulation.

The Transportation and Disposal Conditional Exemption from the definition of hazardous waste applies to generators and treaters who send their treated waste to a commercial low-level radioactive waste disposal facility (LLRWDF) licensed by NRC or NRC Agreement State. The eligible LLMW or NARM waste would be exempted from RCRA Subtitle C once it is placed on the transportation vehicle bound for disposal at the LLRWDF. The waste could then be transported to the LLRWDF as strictly radioactive waste using an NRC Uniform LLW Manifest. Generators and treaters under the exemption must undertake the information collection requirements listed in § 266.345.

In 1992, EPA finalized management standards for used oils destined for recycling (see 40 CFR part 279). To document and ensure proper handling of used oil, these regulations establish notification, testing, tracking and recordkeeping requirements for used oil transporters, processors, re-refiners, marketers, and burners. They also set standards for the prevention and cleanup of releases to the environment during storage and transit, and for the safe closure of storage units and processing and re-refining facilities to mitigate future releases and damages. EPA believes these requirements minimize potential hazards to human health and the environment from the potential mismanagement of used oil by used oil handlers, while providing for the safe recycling of used oil. Information from these information collection requirements is used to ensure compliance with the Used Oil Management Standards in 40 CFR part 279.

Burden Statement: The annual public reporting and recordkeeping burden for this collection of information is estimated to average 2 hours per response. Burden means the total time, effort, or financial resources expended by persons to generate, maintain, retain, or disclose or provide information to or for a Federal agency. This includes the time needed to review instructions; develop, acquire, install, and utilize technology and systems for the purposes of collecting, validating, and verifying information, processing and maintaining information, and disclosing and providing information; adjust the existing ways to comply with any previously applicable instructions and requirements which have subsequently changed; train personnel to be able to respond to a collection of information; search data sources; complete and review the collection of information; and transmit or otherwise disclose the information.

The ICR provides a detailed explanation of the Agency's estimate, which is only briefly summarized here:

Estimated total number of potential respondents: 121,422.

Frequency of response: On occasion.

Estimated total average number of responses for each respondent: 1.02.

Estimated total annual burden hours: 653,520.

Estimated total annual costs: \$34,208,000. This includes an estimated labor burden cost of \$24,193,000 and an estimated cost of \$10,015,000 for capital investment or maintenance and operational costs.

What Is the Next Step in the Process for This ICR?

EPA will consider the comments received and amend the ICR as appropriate. The final ICR package will then be submitted to OMB for review and approval pursuant to 5 CFR 1320.12. At that time, EPA will issue another **Federal Register** notice pursuant to 5 CFR 1320.5(a)(1)(iv) to announce the submission of the ICR to OMB and the opportunity to submit additional comments to OMB. If you have any questions about this ICR or the approval process, please contact the technical person listed under **FOR FURTHER INFORMATION CONTACT**.

Dated: September 11, 2007.

SUPPLEMENTARY INFORMATION: EPA has submitted the following ICR to OMB for review and approval according to the procedures prescribed in 5 CFR 1320.12. On October 5, 2006 (71 FR 38853), EPA sought comments on this ICR pursuant to 5 CFR 1320.8(d). EPA received no comments. Any additional comments on this ICR should be submitted to EPA and OMB within 30 days of this notice.

EPA has established a public docket for this ICR under docket ID number EPA-HQ-OECA-2006-0726, which is available for public viewing online at <http://www.regulations.gov>, or in person viewing at the Enforcement and Compliance Docket in the EPA Docket and Information Center (EPA/DC), EPA West, Room 3334, 1301 Constitution Avenue, NW., Washington, DC. The EPA Docket Center Public Reading Room is open from 8:30 a.m. to 4:30 p.m., Monday through Friday, excluding legal holidays. The telephone number for the Reading Room is (202) 566-1744, and the telephone number for the Enforcement and Compliance Docket is (202) 566-1752.

Use EPA's electronic docket and comment system at <http://www.regulations.gov>, to submit or view public comments, access the index listing of the contents of the docket, and to access those documents in the docket that are available electronically. Once in the system, select "docket search," then key in the docket ID number identified above. Please note that EPA's policy is

that public comments, whether submitted electronically or in paper, will be made available for public viewing at <http://www.regulations.gov>, as EPA receives them and without change, unless the comment contains copyrighted material, CBI, or other information whose public disclosure is restricted by statute. Title: NESHAP for Aerospace Manufacturing and Rework (Renewal).

ICR Numbers: EPA ICR Number 1687.07, OMB Control Number 2060-0314.

ICR Status: This ICR is scheduled to expire on September 30, 2007. Under OMB regulations, the Agency may continue to conduct or sponsor the collection of information while this submission is pending at OMB. An Agency may not conduct or sponsor, and a person is not required to respond to, a collection of information unless it displays a currently valid OMB control number. The OMB control numbers for EPA's regulations in title 40 of the CFR, after appearing in the **Federal Register** when approved, are listed in 40 CFR part 9, and displayed either by publication in the **Federal Register** or by other appropriate means, such as on the related collection instrument or form, if applicable. The display of OMB control numbers in certain EPA regulations is consolidated in 40 CFR part 9.

Abstract: The respondents to the information collection are owners or operators of new, reconstructed, and existing aerospace manufacturing and rework facilities where the total hazardous air pollutants (HAP) emitted are greater than or equal to 10 tons per year of any one HAP; or where the total HAP emitted are greater than or equal to 25 tons per year of any combination of HAP. Operations covered include: Cleaning, primer and top coat application, repainting, chemical milling maskant application, and handling and storage of waste. This information will then be used by enforcement agencies to verify that sources subject to the standard are meeting the emission reductions mandated by the Clean Air Act.

Owners/operators of aerospace manufacturing and rework facilities are required to submit initial notification, performance tests, and periodic reports. Respondents are also required to maintain records of the occurrence and duration of any startup, shutdown, or malfunction in the operation of an affected facility, or any period during which the monitoring system is inoperative. Semiannual reports are also
