Title: Plant-Incorporated Protectants; CBI Substantiation and Adverse Effects Reporting

ICR Numbers: EPA ICR No. 1693.05, OMB Control No. 2070-0142

ICR Status: This ICR is scheduled to expire on October 31, 2007. Under OMB regulations, the Agency may continue to conduct or sponsor the collection of information while this submission is pending at OMB. An Agency may not conduct or sponsor, and a person is not required to respond to, a collection of information, unless it displays a

currently valid OMB control number. The OMB control numbers for EPA's regulations in title 40 of the CFR, after appearing in the **Federal Register** when approved, are listed in 40 CFR part 9, are displayed either by publication in the **Federal Register** or by other appropriate means, such as on the related collection instrument or form, if applicable. The display of OMB control numbers in certain EPA regulations is consolidated in 40 CFR part 9.

Abstract: This ICR addresses the two information collection requirements described in regulations pertaining to pesticidal substances that are produced by plants (plant-incorporated protectants) and which are codified in 40 CFR part 174. A plant-incorporated protectant is defined as "the pesticidal substance that is intended to be produced and used in a living plant and the genetic material necessary for the production of such a substance." Many, but not all, plant-incorporated protectants are exempt from registration requirements under the Federal Insecticide, Fungicide, and Rodenticide Act (FIFRA). Registrants sometimes include in a submission to EPA for registration of a plant-incorporated protectant, information that they claim to be confidential business information (CBI). CBI is protected by FIFRA and generally cannot be released to the public. Under 40 CFR part 174, whenever a registrant claims that information submitted to EPA in support of a registration application for plant-incorporated protectants contains CBI, the registrant must substantiate such claims when they are made, rather than provide it later upon request by EPA. In addition, manufacturers of plant-incorporated protectants that are otherwise exempted from the requirements of registration must report adverse effects of the plant-incorporated protectant to the Agency. Such reporting will allow the Agency to determine whether further action is needed to prevent unreasonable adverse effects to the environment. Submission of this information is mandatory.

Burden Statement: The annual public reporting and recordkeeping burden for this collection of information is estimated to average 7 hours for an adverse effects report and 21.5 hours for substantiation of a CBI claim, per response. Burden means the total time, effort, or financial resources expended by persons to generate, maintain, retain, or disclose or provide information to or for a Federal agency. This includes the time needed to review instructions; develop, acquire, install, and utilize technology and systems for the purposes of collecting, validating, and verifying

information, processing and maintaining information, and disclosing and providing information; adjust the existing ways to comply with any previously applicable instructions and requirements which have subsequently changed; train personnel to be able to respond to a collection of information; search data sources; complete and review the collection of information; and transmit or otherwise disclose the information.

Respondents/Affected Entities: Producers and importers of plant-incorporated protectants.

Estimated Number of Respondents: 14.

Frequency of Response: On occasion.

Estimated Total Annual Hour Burden: 303.

Estimated Total Annual Cost: \$20,879, includes no annualized capital or O&M costs.

Changes in the Estimates: There is no change in the number of hours in the total estimated burden currently identified in the OMB Inventory of Approved ICR Burdens.

Dated: October 10, 2007.

Acting Director, Collection Strategies Division.
