What Information Is EPA Particularly Interested in?

Pursuant to section 3506(c)(2)(A) of the PRA, EPA specifically solicits comments and information to enable it to:

- Evaluate whether the proposed collection of information is necessary for the proper performance of the functions of the Agency, including whether the information will have practical utility;
- Evaluate the accuracy of the Agency's estimate of the burden of the proposed collection of information, including the validity of the methodology and assumptions used;
- Enhance the quality, utility, and clarity of the information to be collected; and
- Minimize the burden of the collection of information on those who are to respond, including through the use of appropriate automated electronic, mechanical, or other technological collection techniques or other forms of information technology, e.g., permitting electronic submission of responses. In particular, EPA is requesting comments from very small businesses (those that employ less than 25) on examples of specific additional efforts that EPA could make to reduce the paperwork burden for very small businesses affected by this collection.

What Should I Consider When I Prepare My Comments for EPA?

You may find the following suggestions helpful for preparing your comments:

- Explain your views as clearly as possible and provide specific examples.
- Describe any assumptions that you used.
- Provide copies of any technical information and/or data you used that support your views.
- If you estimate potential burden or costs, explain how you arrived at the estimate that you provide.
- Offer alternative ways to improve the collection activity.
- Make sure to submit your comments by the deadline identified under **DATES**.
- To ensure proper receipt by EPA, be sure to identify the docket ID number assigned to this action in the subject line on the first page of your response. You may also provide the name, date, and **Federal Register** citation.

What Information Collection Activity or ICR Does This Apply to?

Affected entities: Entities potentially affected by this action are State, District, Local, and Commonwealth governments.

Title: Air Stationary Source Compliance and Enforcement Information.

ICR numbers: EPA ICR No. 0107.09, OMB Control No. 2060-0096.

ICR status: This ICR is currently scheduled to expire on June 30, 2008. An Agency may not conduct or sponsor, and a person is not required to respond to, a collection of information, unless it displays a currently valid OMB control number. The OMB control numbers for EPA's regulations in title 40 of the CFR, after appearing in the **Federal Register** when approved, are listed in 40 CFR part 9, are displayed either by publication in the **Federal Register** or by other appropriate means, such as on the related collection instrument or form, if applicable. The display of OMB control numbers in certain EPA regulations is consolidated in 40 CFR part 9.

Abstract: The collection of air compliance monitoring and enforcement information in the Air Facility System (AFS) provides EPA with the ability to assess progress toward meeting emission requirements developed under the authority of the Clean Air Act (CAA) to protect and maintain the atmospheric environment and public health. Agencies receive authorization of their CAA programs through regulated grant authorities, and

report compliance/enforcement activities undertaken at stationary sources using the Minimum Data Requirements (MDRs) as outlined in the renewal of this ICR. This renewal requires the continuation of reporting of previously established MDRs with no additional new burden. The provision of Section 114(a)(1) of the Clean Air Act, 42 U.S.C. 7414(a)(1) provide the broad authority for the reporting of compliance monitoring and enforcement information, along with Subpart Q—Reports in 40 CFR part 51: §§ 51.324(a) and (b), and 51.327.

Burden Statement: The annual public reporting and recordkeeping burden for this collection of information was estimated to average 509 hours per year for a small State/local agency (150 major sources or less), 1,463 hours per year for a medium state/local agency (151–499 major sources) or 2,572 hours per year for large State/local agencies (greater or equal to 500 major sources per response. Burden means the total time, effort, or financial resources expended by persons to generate, maintain, retain, or disclose or provide information to or for a Federal agency. This includes the time needed to review instructions; develop, acquire, install, and utilize technology and systems for the purposes of collecting, validating, and verifying information, processing and maintaining information, and disclosing and providing information; adjust the existing ways to comply with any previously applicable instructions and requirements which have subsequently changed; train personnel to be able to respond to a collection of information; search data sources; complete and review the collection of information; and transmit or otherwise disclose the information.

The ICR provides a detailed explanation of the Agency's estimate. The estimates from the previous ICR are briefly summarized here:

Estimated total number of potential respondents: 99.

Frequency of response: Six times per year (every 60 days).

Estimated total average number of responses for each respondent: A minimum of six responses from each respondent.

Estimated total annual burden hours: 98,183 hours.

Estimated total annual costs: \$3,277,935 annually.

Are There Changes in the Estimates From the Last Approval?

EPA acknowledges that the estimated operational and maintenance costs will increase due to inflationary pressures that increase hourly resource costs for

management, professional, and related occupational groups. The labor rates used in the ICR estimates will be taken from the Department of Labor Employment Compensation and Costs (ECEC) Web site. These changes will be reflected in the final supporting statement for this ICR. Additionally, the number of respondents will be corrected to reflect 99 respondents, an increase from 93 in the previous ICR resulting in an overall increase in hours and resources for reporting.

What Is the Next Step in the Process for This ICR?

EPA will consider the comments received and amend the ICR as appropriate. The final ICR package will be submitted by EPA to OMB for review and approval pursuant to 5 CFR 1320.12. At that time, EPA will issue another **Federal Register** notice pursuant to 5 CFR 1320.5(a)(1)(iv) to announce the submission of the ICR to OMB, and a second opportunity to submit additional comments to OMB. If you have any questions about this ICR, or the approval process, please contact the technical person listed under **FOR FURTHER INFORMATION CONTACT**.

Dated: October 15, 2007.

Michael M. Stahl,

Director, Office of Compliance, Office of Enforcement and Compliance Assurance.
