NARA published a notice of proposed collection for these information collections on August 9, 2007 (72 FR 44874 and 44875). No comments were received. In response to this notice, comments and suggestions should address one or more of the following points: (a) Whether the proposed information collections are necessary for the proper performance of the functions of NARA; (b) the accuracy of NARA's estimate of the burden of the proposed information collections; (c) ways to enhance the quality, utility, and clarity of the information to be collected; and (d) ways to minimize the burden of the collection of information on respondents, including the use of information technology; and (e) whether small businesses are affected by these collections. In this notice, NARA is soliciting comments concerning the following information collections:

Title: Presidential Libraries Museum Visitor Survey.

OMB number: 3095-NEW.

Agency form number: N/A.

Type of review: Regular.

Affected public: Individuals who visit the museums at the Presidential libraries.

Estimated number of respondents: 75,000.

Estimated time per response: 15 minutes.

Frequency of response: On occasion (when an individual visits a Presidential Library).

Estimated total annual burden hours: 18,750 hours.

Abstract: The survey will be comprised of a set of questions designed to allow for a statistical analysis that

will ultimately provide actionable information to NARA. The survey includes questions that measure the visitor's satisfaction in general and with specific aspects of their visit. These questions serve as dependent variables for analytical purposes. Other questions provide attitudinal, behavioral, and demographic data that are used to help understand variation in the satisfaction variables. Using statistical analyses, Harris Interactive will determine the factors that drive the visitor's perceptions of quality and satisfaction with the Library they visited. Additionally, natural groupings of visitors defined by similarity based on these attitudinal, behavioral, and demographic variables can be developed and targeted for outreach purposes.

The information collected through this effort will inform program activity, operation, and oversight, and will benefit Library and NARA staff and management in making critical decisions about resources allocation, museum operation and program direction.

Dated: October 11, 2007.

Martha Morphy,

Assistant Archivist for Information Services.
