National Agricultural Statistics Service

Title: Milk and Milk Products.

OMB Control Number: 0535-0020.

Summary of Collection: The National Agricultural Statistics Service's (NASS) primary function is to prepare and issue current official state and national estimates of crop and livestock production. Estimates of milk production and manufactured dairy products are an integral part of this program. Milk and dairy statistics are used by the U.S. Department of Agriculture (USDA) to help administer price support programs and by the dairy industry in planning, pricing, and projecting supplies of milk and milk products. The general authority for these data collection activities is granted under U.S. Code Title 7, Section 2204.

Need and Use of the Information: NASS will collect information on monthly estimates of stocks, shipments, and selling prices for such products as butter, cheese, dry whey, and nonfat dry milk. Cheddar cheese prices are collected weekly and used by USDA to assist in the determination of the fair market value of raw milk. Estimates of total milk production, number of milk cows, and milk production per cow, are used by the dairy industry in planning, pricing, and projecting supplies of milk and milk products. Collecting data less frequently would prevent USDA and the agricultural industry from keeping abreast of changes at the State and national level.

Description of Respondents: Farms; Business or other for-profit.

Number of Respondents: 25,071.

Frequency of Responses: Reporting: Quarterly; Weekly; Monthly; Annually.

Total Burden Hours: 11,061.

Departmental Information Collection Clearance Officer.
