The prospective exclusive license territory may be worldwide and the field of use may be limited to the use of Anti-TAG72 monoclonal antibodies with (i) Licensee's proprietary fluorescence-based, tumor-specific imaging agent for use in tumor localization and visualization; (ii) Licensee's proprietary tumor-specific imaging agent for use in positron emission tomography ("PET") for tumor localization and visualization; and (iii) Licensee's proprietary tumor-specific agent coupled with a proprietary compound for therapeutic use in targeted drug therapy. For the avoidance of doubt, gamma emitting isotopes are specially excluded from the field of use.

DATES: Only written comments and/or applications for a license which are received by the NIH Office of Technology Transfer on or before January 18, 2008 will be considered.

ADDRESSES: Requests for copies of the patent application, inquiries, comments, and other materials relating to the contemplated exclusive license should be directed to: Michelle A. Booden, PhD, Technology Licensing Specialist, Office of Technology Transfer, National Institutes of Health, 6011 Executive Boulevard, Suite 325, Rockville, MD 20852-3804; Telephone: (301) 451-

SUPPLEMENTARY INFORMATION: The technology describes the humanization of a murine anti-carcinoma antibody CC49 which has been shown to react with Tumor Associated Glycoprotein 72 (TAG-72), an antigen which is expressed on human breast, ovarian, colorectal, and other carcinomas.

The invention includes a new method of humanization of a rodent antibody which is based on grafting all the Complementarity Determining Residues (CDRs) of a rodent antibody onto a human antibody framework. Additionally, the method identifies Specificity Determining Residues (SDRs), the amino acid residues in the hypervariable regions of an antibody that are most critical for antigen binding activity and of rendering any antibody minimally immunogenic in humans by transferring the SDRs of the antibody to a human antibody framework. The resulting humanized antibodies, including CDR variants thereof (including a CH2 deleted version), are also embodied in the invention, as are methods of using the antibodies for therapeutic and diagnostic purposes.

The prospective exclusive license will be royalty bearing and will comply with the terms and conditions of 35 U.S.C. 209 and 37 CFR 404.7. The prospective exclusive license may be granted unless within sixty (60) days from the date of this published notice, the NIH receives written evidence and argument that establishes that the grant of the license would not be consistent with the requirements of 35 U.S.C. 209 and 37 CFR 404.7.

Applications for a license in the field of use filed in response to this notice will be treated as objections to the grant of the contemplated exclusive license. Comments and objections submitted to this notice will not be made available for public inspection and, to the extent permitted by law, will not be released under the Freedom of Information Act, 5 U.S.C. 552.

Background

The Department of Homeland Security (DHS), through the United States Coast Guard and the Transportation Security Administration (TSA), issued a joint final rule (72 FR 3492; January 25, 2007) pursuant to the Maritime Transportation Security Act (MTSA), Pub. L. 107-295, 116 Stat. 2064 (November 25, 2002), and the Security and Accountability for Every Port Act of 2006 (SAFE Port Act), Pub. L. 109-347 (October 13, 2006). This rule requires all credentialing merchant mariners and individuals with unescorted access to secure areas of a regulated facility or vessel to obtain a TWIC. In this final

rule, on page 3510, TSA and Coast Guard stated that a phased enrollment approach based upon risk assessment and cost/benefit would be used to implement the program nationwide, and that TSA would publish a notice in the **Federal Register** indicating when enrollment at a specific location will begin and when it is expected to terminate.

This notice provides the start date for TWIC initial enrollment at the Port of Lake Charles, LA. Enrollment in this port begins on November 21, 2007. The Coast Guard will publish a separate notice in the **Federal Register** indicating when facilities within the Captain of the Port Zone Port Arthur, including those in the Port of Lake Charles, LA must comply with the portions of the final rule requiring TWIC to be used as an access control measure. That notice will be published at least 90 days before compliance is required.

To obtain information on the pre-enrollment and enrollment process, and enrollment locations, visit TSA's TWIC Web site at <http://www.tsa.gov/twic>.

Issued in Arlington, Virginia, on November 14, 2007.

Director, Maritime and Surface Credentialing, Office of Transportation Threat Assessment and Credentialing, Transportation Security Administration.
