[Project No. 2237-017]

Georgia Power Company; Notice of Availability of Environmental Assessment

November 9, 2007.

In accordance with the National Environmental Policy Act of 1969 and the Federal Energy Regulatory Commission's (Commission) regulations, 18 CFR Part 380 (Order No. 486, 52 FR 47897), the Office of Energy Projects has reviewed the application for a New Major License for the Morgan Falls Hydroelectric Project.

The Morgan Falls Project is located in the metropolitan city of Atlanta area on the Chattahoochee River, at river mile 312.6, and about 36 miles downstream from the U.S. Army Corps of Engineers' Buford dam (Lake Sidney Lanier) in Cobb and Fulton Counties, Georgia. The project occupies about 14.4 acres of federal lands within the Chattahoochee River National Recreation Area managed by the National Park Service. Staff has prepared an Environmental Assessment (EA) for the project.

In the EA Commission, staff analyzed the potential environmental effects of relicensing the project and concludes

that issuing a new license for the project, with appropriate environmental measures, would not constitute a major federal action that would significantly affect the quality of the human environment.

A copy of the EA is available for review at the Commission in the Public Reference Room or may be viewed on the Commission's Web site at <http://www.ferc.gov> using the "eLibrary" link. Enter the docket number excluding the last three digits in the docket number field to access the document. For assistance, contact FERC Online Support at FERCOnlineSupport@ferc.gov or toll-free at 1-866-208-3676, or for TTY, (202) 502-8659.

Any comments should be filed within 30 days from the date of this notice and should be addressed to: Kimberly D. Bose, Secretary, Federal Energy Regulatory Commission, 888 First Street, NE., Washington, DC 20426. Please affix Project No. 2237-017 to all comments. Comments may be filed electronically via the Internet in lieu of paper. The Commission strongly encourages electronic filings. See 18 CFR 385.2001(a)(1)(iii) and the instructions on the Commission's Web site (<http://www.ferc.gov>) under the "e-Filing" link. Project No. P-2237-017.

For further information, please contact Janet Hutzal at (202) 502-8675 or at janet.hutzal@ferc.gov.

Kimberly D. Bose,

Secretary.

[Docket No. CP07-405-000]

Texas Gas Transmission, LLC; Notice of Availability of the Environmental Assessment for the Proposed Phase 3 Storage Expansion Project

November 13, 2007.

The staff of the Federal Energy Regulatory Commission (FERC or Commission) has prepared an environmental assessment (EA) on the natural gas pipeline facilities proposed by Texas Gas Transmission, LLC (Texas Gas) in the above-referenced docket. Texas Gas proposes to increase the storage capacity of its existing Midland Storage Field by constructing facilities in Hanson and Muhlenberg Counties, Kentucky.

The EA was prepared to satisfy the requirements of the National Environmental Policy Act of 1969. The staff concludes that approval of the proposed project, with appropriate mitigating measures, would not constitute a major federal action significantly affecting the quality of the human environment.

The EA assesses the potential environmental effects of the construction and operation of the proposed Phase 3 Storage Expansion Project, which includes the following wells, pipeline facilities, and expansion/modifications of existing compressor stations:

Midland Gas Storage Field

- Seven new injection/withdrawal wells;
- Six new well pads;
- 80-foot-tall radio tower on an 8-foot by 8-foot concrete pad and 6-foot by 6-foot shelter;

Pipeline Facilities

- 10.5 miles of 30-inch-diameter pipeline from Texas Gas' Hanson Compressor Station to its Midland III Compressor Station;
- Construct 2,900 feet of 16-inch-diameter pipeline extending Texas Gas existing E-9 Lateral pipeline;
- Construct 8 well laterals ranging from 8 to 12 inches in diameter and 450 to 3,000 feet in length;

Midland III Compressor Station

- A new turbine/compressor building;
- A new 5,488 horsepower turbine-driven compressor, including ancillary equipment;
- Control system modifications to allow two existing 1,250-horsepower electric-driven compressors to operate at 1,500-horsepower;
- Retirement of two 2,000-horsepower reciprocating compressor units
- Piping modifications and appurtenant facilities;

Slaughters Compressor Station

- Modification of the existing 12,090-horsepower turbine-driven compressor for a new suction and discharge pressure; The purpose of the proposed Phase 3 Storage Expansion Project is to expand the daily withdrawal and seasonal storage capability of the Midland Gas Storage Field located in Muhlenberg County, Kentucky.

The EA has been placed in the public files of the FERC. A limited number of copies of the EA are available for distribution and public inspection at: Federal Energy Regulatory Commission,
