BILLING CODE 4210-67-P

DEPARTMENT OF HOUSING AND URBAN DEVELOPMENT

[Docket No. FR-5130-C-14]

Privacy Act of 1974; Amendment to Existing System of Records, Debt Collection Asset Management System; Correction

AGENCY: Office of the Chief Information Officer, HUD.

ACTION: Notice of an amendment to existing System of Records; correction.

SUMMARY: On November 13, 2007, HUD published notice of its intent to amend an existing Privacy Act System of Records (System of Records), the Debt Collection Asset Management System (DCAMS). HUD inadvertently stated in the "action line" that it would be amending two Systems of Records. This statement was made in error and this notice corrects that error.

FOR FURTHER INFORMATION CONTACT: The Departmental Privacy Act Officer, 451 Seventh St., SW., Room 4156, Washington, DC 20410, telephone number (202) 619-9057. (This is not a toll-free number.) A telecommunication device for hearing- and speech-impaired individuals (TTY) is available at (800) 877-8339 (Federal Information Relay Service).

SUPPLEMENTARY INFORMATION: On November 13, 2007, HUD issued public notice of its intent to amend an existing Privacy Act Systems of Records, the Debt Collection Asset Management System. Subsequent to publication of this notice HUD discovered that the "subject line" of this notice inadvertently stated incorrect information. This notice corrects that information.

In the **Federal Register** on November 13, 2007, in FR Doc. E7-22077, on page 63919, the third column, this notice corrects the "Action" caption to read: Amendment to an Existing Privacy Act System of Records, Debt Collection Management System (DCAMS).

Dated: November 29, 2007.

Walter Harris,

Acting Chief Information Officer.

BILLING CODE 4210-67-P

DEPARTMENT OF THE INTERIOR

Fish and Wildlife Service

Final Comprehensive Conservation Plan for Souris River Basin National Wildlife Refuges, North Dakota

AGENCY: Fish and Wildlife Service, Interior.

ACTION: Notice of availability.

SUMMARY: The U.S. Fish and Wildlife Service (Service) announces that the final Comprehensive Conservation Plan (CCP) and Environmental Assessment (EA) for the Souris River basin national wildlife refuges (Refuges) is available. This final CCP/EA describes how the Service intends to manage the refuges for the next 15 years.

ADDRESSES: Please provide written comments to Toni Griffin, Planning Team Leader, Division of Refuge Planning, P.O. Box 25486, Denver Federal Center, Denver, Colorado 80225, or electronically to toni_griffin@fws.gov. A copy of the CCP may be obtained by writing to U.S. Fish and Wildlife Service, Division of Refuge Planning, 134 Union Boulevard, Suite 300, Lakewood, Colorado 80228; or by download from <http://mountain-prairie.fws.gov/planning>.

FOR FURTHER INFORMATION CONTACT: Toni Griffin, 303-236-4378 (phone); 303-236-4792 (fax); or toni_griffin@fws.gov (e-mail).

SUPPLEMENTARY INFORMATION: The Souris River Basin is home to three national wildlife refuges, known collectively as the "Souris River basin refuges:"

- Des Lacs National Wildlife Refuge, along 28 miles of the Des Lacs River.
- J. Clark Salyer National Wildlife Refuge, along 50 miles of the Souris River.
- Upper Souris National Wildlife Refuge, along 35 miles of the upper Souris River.

The Souris River basin refuges were established by executive order in 1935; the purpose of each refuge is for a "refuge and breeding ground for migratory birds and other wildlife."

The Souris River basin refuges are located in a critical area of the Central Flyway, providing nesting and breeding habitat for migrating and nesting waterfowl. The J. Clark Salyer National Wildlife Refuge, in particular, has developed into one of the most important duck production areas in the United States.

The American Bird Conservancy recognizes all three refuges as "Globally Important Bird Areas." In addition, J. Clark Salyer National Wildlife Refuge is

designated as a regional shorebird site in the "Western Hemisphere Shorebird Reserve Network." Lake Darling at Upper Souris National Wildlife Refuge is designated critical habitat for the federally threatened piping plover.

Representing a comprehensive collection of all North Dakota plant communities, these refuges could contain the only remaining representatives of drift plain prairie, considered a threatened resource.

The draft CCP/EA was made available to the public for a 30-day review and comment period following the announcement in the **Federal Register** on February 2, 2007 (72 FR 5080-5081). The draft CCP/EA identified and evaluated four alternatives for managing the refuges for the next 15 years.

Alternative A, the No Action alternative, reflects the current management of the Souris River basin refuges. It provides the baseline against which to compare the other alternatives. Refuge habitats would continue to be managed on an opportunistic schedule that may maintain—or most likely would result in further decline in—the diversity of vegetation and wildlife species. Des Lacs National Wildlife Refuge and J. Clark Salyer National Wildlife Refuge would continue to perform only limited research and would monitor only long-term vegetation change. Upper Souris National Wildlife Refuge would continue to perform no scientific research or monitoring. Outreach, partnerships, and priority public uses (fishing, hunting, wildlife observation, wildlife photography, environmental education, and interpretation) would continue at present levels.

Alternative B is the Service's proposed action and basis for the CCP. This alternative will prioritize habitats with high probability of restoration for management. Other habitats may only be partially restored or minimally managed. Research and monitoring will increase and scientific knowledge required to restore upland and wetland plant and animal communities will be shared (with the public and other resource managers). Some visitor services are expected to decrease as some staff and funding shifts to habitat restoration. Environmental education will increase.

In Alternative C, waterfowl habitat management and waterfowl production would be emphasized over other refuge programs. Research and monitoring would focus on actions that enhance waterfowl habitat, increase waterfowl nest densities, and increase nest and brood survival. Visitor service programs that use or enhance waterfowl-related

activities such as hunting, wildlife viewing, or environmental education would be emphasized over other activities.

Management under Alternative D would restore, to the fullest extent, ecological processes, vegetation communities, and wildlife characteristic of the presettlement period. Research and monitoring efforts would focus on strategies that enhance native plant and animal communities. Public uses that are compatible with or that support restoration efforts would be emphasized. Interpretation and environmental education would be expanded, with an emphasis on natural plant and animal communities, ecological processes, and restoration.

The Service is furnishing this notice to advise other agencies and the public of the availability of the final CCP, to provide information on the desired conditions for the refuges, and to detail how the Service will implement management strategies. Based on the review and evaluation of the information contained in the EA, the Regional Director has determined that implementation of the final CCP does not constitute a major Federal action that would significantly affect the quality of the human environment within the meaning of section 102(2)(c) of the National Environmental Policy Act. Therefore, an Environmental Impact Statement will not be prepared. Future site-specific proposals discussed in the final CCP will be addressed in separate planning efforts with full public involvement.

Dated: September 12, 2007.

Gary G. Mowad,

Acting Deputy Regional Director, Denver, Colorado.

BILLING CODE 4310-55-P

DEPARTMENT OF THE INTERIOR

Fish and Wildlife Service

Receipt of an Application for an Incidental Take Permit for Residential Construction in Charlotte County, FL

AGENCY: Fish and Wildlife Service, Interior.

ACTION: Notice.

SUMMARY: We, the Fish and Wildlife Service (Service), announce the availability of an incidental take permit (ITP) and Habitat Conservation Plan (HCP). Bertha Pauwels and Anna Angellotti (applicants) request an ITP pursuant to section 10(a)(1)(B) of the Endangered Species Act of 1973, as

amended (Act). The applicants anticipate taking about 0.46 acre of Florida scrub-jay (*Aphelocoma coerulescens*) (scrub-jay) foraging and sheltering habitat incidental to lot preparation for the construction of a multiple-family residence and supporting infrastructure in Charlotte County, Florida (project). The applicants' HCP describes the mitigation and minimization measures proposed to address the effects of the project on the scrub-jay.

DATES: We must receive your written comments on the ITP application and HCP on or before January 9, 2008.

ADDRESSES: See the **SUPPLEMENTARY INFORMATION** section below for information on how to submit your comments on the ITP application and HCP. You may obtain a copy of the ITP application and HCP by writing the South Florida Ecological Services Office, Attn: Permit number TE169281-0, U.S. Fish and Wildlife Service, 1339 20th Street, Vero Beach, FL 32960-3559. In addition, we will make the ITP application and HCP available for public inspection by appointment during normal business hours at the above address.

FOR FURTHER INFORMATION CONTACT: Ms. Trish Adams, Fish and Wildlife Biologist, South Florida Ecological Services Office (see **ADDRESSES**); telephone: (772) 562-3909, ext. 232.

SUPPLEMENTARY INFORMATION: If you wish to comment on the ITP application and HCP, you may submit comments by any one of the following methods. Please reference permit number TE169281-0 in such comments.

1. Mail or hand-deliver comments to our South Florida Ecological Services Office address (see **ADDRESSES**).

2. E-mail comments to trish_adams@fws.gov. If you do not receive a confirmation that we have received your e-mail message, contact us directly at the telephone number listed under **FOR FURTHER INFORMATION CONTACT**.

Before including your address, phone number, e-mail address, or other personal identifying information in your comments, you should be aware that your entire comment-including your personal identifying information-may be made publicly available at any time. While you can ask us in your comment to withhold your personal identifying information from public review, we cannot guarantee that we will be able to do so.

Multiple-family residential construction for the applicants' HCP will take place within Section 09, Township 40, Range 23, Punta Gorda,

Charlotte County, Florida, at 26471 Explorer Road. This lot is within scrub-jay-occupied habitat.

The lot encompasses about 0.46 acre, and the footprint of the multiple-family residence, infrastructure, and landscaping preclude retention of scrub-jay habitat on this lot. In order to minimize take on site, the applicants propose to mitigate for the loss of 0.46 acre of scrub-jay habitat by contributing a total of \$25,599 to the Florida Scrub-jay Conservation Fund administered by The Nature Conservancy. Funds in this account are earmarked for use in the conservation and recovery of scrub-jays and may include habitat acquisition, restoration, and/or management.

We have determined that the applicants' proposal, including the proposed mitigation and minimization measures, will have a minor or negligible effect on the species covered in the HCP. Therefore, the ITP is a "low-effect" project and qualifies as a categorical exclusion under the National Environmental Policy Act (NEPA), as provided by the Department of the Interior Manual (516 DM 2 Appendix 1 and 516 DM 6 Appendix 1). Low-effect HCPs are those involving (1) minor or negligible effects on federally listed or candidate species and their habitats and (2) minor or negligible effects on other environmental values or resources. Based on our review of public comments that we receive in response to this notice, we may revise this preliminary determination.

We will evaluate the HCP and comments submitted thereon to determine whether the application meets the requirements of section 10(a) of the Act (16 U.S.C. 1531 *et seq.*). If we determine that the application meets the requirements, we will issue the ITP for incidental take of the scrub-jay. We will also evaluate whether issuance of the section 10(a)(1)(B) ITP complies with section 7 of the Act by conducting an intra-Service section 7 consultation. We will use the results of this consultation, in combination with the above findings, in the final analysis to determine whether or not to issue the ITP.

Authority: We provide this notice pursuant to Section 10 of the Endangered Species Act (16 U.S.C. 1531 *et seq.*) and NEPA regulations (40 CFR 1506.6).

Dated: November 6, 2007.

Paul Souza,

Field Supervisor, South Florida Ecological Services Office.
