

Environmental Impacts of the Alternatives to the Proposed Action

As an alternative to the proposed action, the staff considered denial of the proposed action (i.e., the “no-action” alternative). Denial of the application would result in no change in current environmental impacts. The environmental impacts of the proposed action and the alternative action are similar.

Alternative Use of Resources

The action does not involve the use of any different resources than those previously considered in the Final Environmental Statement for Fermi 2, NUREG-0769, dated August 1981 and NUREG-0769, Addendum No. 1 dated March 1982.

Agencies and Persons Consulted

In accordance with its stated policy, on December 4, 2007, the staff consulted with the Michigan State official, Thor Strong of the Michigan Department of Environmental Quality, Radiological Protection Section, regarding the environmental impact of the proposed action. The State official had no comments.

Finding of No Significant Impact

On the basis of the environmental assessment, the NRC concludes that the proposed action will not have a significant effect on the quality of the human environment. Accordingly, the NRC has determined not to prepare an environmental impact statement for the proposed action.

For further details with respect to the proposed action, see the licensee’s letter dated April 27, 2007, as supplemented by letter dated November 9, 2007.
