SUPPLEMENTARY INFORMATION: Authority for the proposed study was received under the House Resolution of June 25, 1998. An expedited Reconnaissance Report completed in 2001 by the Corps, concluded based on preliminary findings, there was a federal interest in pursuing harbor improvements.

Alternatives: The project's expansion alternatives include no action, creation of channel flares, wideners, deepening, turning basin, or a combination of the considered alternatives. Alternatives being considered for disposal of dredged material include Peanut Island (with possible off-load to another use or location), ocean disposal in the Palm Harbor Ocean Dredged Material Disposal Site (which may require expansion or modification), beach placement (if there is sufficient beach compatible material), artificial reef (if there is sufficient suitable rock) and any other disposal or beneficial use options that may become available.

Issues: The EIS will consider impacts on coral reefs and other hardbottom communities, sea grasses, protected species, shore impacts, health and safety, water quality, aesthetics and recreation, fish and wildlife resources, cultural resources, energy conservation, socio-economic resources, navigation, and other impacts identified through scoping, public involvement and interagency coordination.

Coordination: The proposed action is being coordinated with the U.S. Fish and Wildlife Service (FWS) and NOAA-National Marine Fisheries Service (under Section 7 of the Endangered Species Act) and the Wildlife Coordination Act (FWS only). The proposed action is also being coordinated with the Florida State

Historic Preservation Officer, the U.S. Coast Guard, and the U.S. Environmental Protection Agency.
