

independent scientific advice on NAAQS matters, including advice on EPA's draft ISAs.

EPA formally initiated its current review of the criteria for oxides of nitrogen and sulfur in December 2005 (70 FR 73236) and May 2006 (71 FR 28023) respectively, requesting the submission of recent scientific information on specified topics. In the initial stages of the criteria reviews, EPA recognized the merit of integrating the science assessment for these two pollutants due to their combined effects on atmospheric chemistry, deposition processes, and environment-related public welfare effects. In July 2007 (72 FR 34004), a workshop was held to discuss, with invited scientific experts, initial draft materials prepared in the development of the ISA and supplementary annexes for oxides of nitrogen and sulfur. EPA's "Draft Plan for Review of the Secondary National Ambient Air Quality Standards for Nitrogen Dioxide and Sulfur Dioxide" was made available in September 2007 for public comment and was discussed by the Clean Air Scientific Advisory Committee (CASAC) via a publicly accessible teleconference consultation on October 30, 2007 (72 FR 57568). The Plan is being finalized and will be made available on EPA's Web site http://www.epa.gov/ttn/naaqs/standards/no2so2sec/cr_pd.html.

The draft, "Integrated Science Assessment for Oxides of Nitrogen and Sulfur—Environmental Criteria; First External Review Draft," will be discussed by CASAC at a future public meeting; public comments that have been received prior to the public meeting will be provided to the CASAC review panel. A future **Federal Register** notice will inform the public of the exact date and time of that CASAC meeting.

Comments are requested concerning (a) whether the proposed collection of information is necessary for the proper performance of the functions of the Commission, including whether the information shall have practical utility; (b) the accuracy of the Commission's burden estimate; (c) ways to enhance the quality, utility, and clarity of the information collected; and (d) ways to minimize the burden of the collection of information on the respondents, including the use of automated collection techniques or other forms of information technology.

DATES: Written Paperwork Reduction Act (PRA) comments should be submitted on or before January 22, 2008. If you anticipate that you will be submitting PRA comments, but find it

Needs and Uses: The Commission will submit this information collection to the OMB as a revision during this comment period to obtain the full three-year clearance from them. There is a decrease in the number of respondents/responses and burden hours.

Section 90.155(b) requires that a period longer than 12 months may be granted to local government entities to place their stations in operation on a case-by-case basis upon a showing of need. This rule provides flexibility to state and local governments. An application for extension of time to commence service may be made on FCC Form 601 (OMB Control No. 3060-0798). Extensions of time must be filed prior to the expiration of the construction period. Extensions will be granted only if the licensee shows that the failure to commence service is due to causes beyond its control.

For the revisions to this submission to the OMB, the Commission is requesting OMB approval for the following:

The Commission adopted and released a *Report and Order* in FCC 95-41, PR Docket No. 93-61 which established construction deadlines for Location and Monitoring Service (LMS) licensees in the MTA-licensed multilateration LMS services. The Commission is adding Section 90.155(d) to this information collection.

On July 8, 2004, the Commission adopted a *Report and Order* in FCC 04-166, WT Docket Nos. 02-381, 01-14, and 03-202 that amended Section 90.155(d) to provide holders of multilateration location service authorizations with five- and ten-year benchmarks to place in operation their base stations that utilize multilateration technology to provide multilateration location service to one-third of the Economic Area's (EAs) population within five years of initial license grant, and two-thirds of the population within ten years. At the five- and ten-year benchmarks, licensees are required to file a map with FCC Form 601 showing compliance with the coverage requirements pursuant to section 1.946 of the Commission's rules.

On January 31, 2007, via an *Order on Reconsideration and Memorandum Opinion and Order*, in DA 07-479, the FCC granted two to three additional years to meet the five-year construction requirements for certain multilateration Location and Monitoring Service Economic Area licenses, and extended the ten-year requirement for such licenses for two years.

Note: The cost and hour burdens for section 90.155(g) and (i) are accounted for under OMB Control No. 3060-0798 and are therefore not part of this information collection.

These requirements will be used by Commission personnel to evaluate whether or not certain licensees are providing substantial service as a means of complying with their construction requirements, or have demonstrated that an extended period of time for construction is warranted.

Federal Communications Commission.

Marlene H. Dortch,

Secretary.
