Title: National Oil and Hazardous Substance Pollution Contingency Plan (NCP) (Renewal).

ICR Numbers: EPA ICR Number 1463.07, OMB Control No. 2050-0096.

ICR Status: This ICR is scheduled to expire on January 31, 2008. Under OMB regulations, the Agency may continue to conduct or sponsor the collection of information while this submission is pending at OMB. An Agency may not conduct or sponsor, and a person is not required to respond to, a collection of information, unless it displays a currently valid OMB control number. The OMB control numbers for EPA's regulations in title 40 of the CFR, after appearing in the **Federal Register** when approved, are listed in 40 CFR part 9, are displayed either by publication in the **Federal Register** or by other appropriate means, such as on the related collection instrument or form, if applicable. The display of OMB control numbers in certain EPA regulations is consolidated in 40 CFR part 9.

Abstract: This Information Collection Request is a renewal ICR that covers the remedial portion of the Superfund Program, as specified in the Comprehensive Environmental Response, Compensation, and Liability Act of 1980 as amended (CERCLA) and the National Oil and Hazardous Substance Pollution Contingency Plan (NCP). All remedial actions covered by this ICR (e.g., Remedial Investigations/Feasibility Studies) are stipulated in the statute (CERCLA) and are instrumental in the process of cleaning up National Priority List (NPL) sites to be protective of human health and the environment. Some community involvement activities covered by this ICR are not required at every site (e.g., Technical Assistance Grants) and depend very much on the community and the nature of the site and cleanup. All community activities seek to involve the public in the cleanup of the sites, gain the input of community members, and include the community's perspective on the potential future reuse of Superfund NPL sites. Community involvement activities

can enhance the remedial process and increase community acceptance and the potential for productive and useful reuse of the sites.

The respondents on whom a burden is placed include State (and Tribal) governments and communities. Potential Responsible Parties (PRPs) are not addressed in this ICR because the Paperwork Reduction Act [5 CFR part 1320 (Controlling Paperwork Burdens on the Public, FRN 8/29/1995) Sect. 1320.4 (a)] does not require the inclusion of those entities that are the subject of administrative or civil action by the Agency. The ICR reports the estimated reporting and recordkeeping burden hours and costs expected to be incurred by these entities and by the Federal government in its oversight capacities of State action and administration of community activities at Fund-lead NPL sites. Remedial activities undertaken by States at NPL sites are those required and recommended by CERCLA and the NCP and the cost of many of these activities may be reimbursed by the Federal government. All community involvement in the remedial process of Superfund is voluntary. Therefore, all cost estimates for community members is theoretical and does not represent expenditure of actual dollars.

States have responsibilities at new and on-going State-lead sites and at all State-lead, Federal-lead, and Federal Facility sites entering the remedial phase of Superfund. All other remedial activities taken by the State are done so at sites at which the State voluntarily assumes the lead agency role. Over each year of this ICR the State will be completing remedial activities at sites that entered the remedial phase of Superfund at different times.

Community members' participation in remedial activities at Superfund sites is purely voluntary and the level of involvement varies greatly depending on the complexity of the site, its location (urban vs. rural, industrial vs. residential, etc.), and the level of interest.

An agency may not conduct or sponsor, and a person is not required to respond to, a collection of information unless it displays a currently valid OMB control number. The OMB control numbers for EPA's regulations in 40 CFR are listed in 40 CFR part 9 and are identified on the form and/or instrument, if applicable.

Burden Statement: The annual public reporting and recordkeeping burden for this collection of information is estimated to average 8.4 hours per response.

Burden means the total time, effort, or financial resources expended by persons to generate, maintain, retain, or disclose or provide information to or for a Federal agency. This includes the time needed to review instructions; develop, acquire, install, and utilize technology and systems for the purposes of collecting, validating, and verifying information, processing and maintaining information, and disclosing and providing information; adjust the existing ways to comply with any previously applicable instructions and requirements; train personnel to be able to respond to a collection of information; search data sources; complete and review the collection of information; and transmit or otherwise disclose the information.

Respondents/Affected Entities: State, Tribal, or local governments, and individuals or households.

Estimated Number of Respondents: 7,970.

Frequency of Response: On occasion.

Estimated Total Annual Hour Burden: 71,165 hours, which includes an estimated 40,185 hours for States and 30,980 hours for communities.

Estimated Total Annual Cost: \$572,415, which includes an estimated \$61,245 for States and \$511,170 for communities. There are no capital/O&M costs.

Changes in the Estimates: There is no change in the burden for this ICR. Cost models were updated to reflect wage inflation. While currently approved O&M costs are listed as \$850,000 and are updated in the current ICR, they have been removed from the cost estimate listed above because they are reimbursed in full by the Federal government, and thus effectively impose no burden on state governments.

Dated: December 18, 2007.

Director, Collection Strategies Division.
