

wildlife and habitat management but maintained the existing visitor programs and public uses. After considering the comments we received, we have chosen Alternative C. This alternative will direct the refuge toward a realistic and achievable level of both habitat management and public use, and will provide a management program to address the needs of the resources and, where appropriate and compatible with the refuge purposes, the needs of the community. This alternative will provide for increases in management efforts to restore the refuge habitats without diminishing the wildlife values associated with the current conditions. There will also be a focus on management activities to benefit threatened and endangered species. This alternative will best achieve the purposes and goals of the refuge, as well as the mission of the National Wildlife Refuge System. Included in the Final CCP/EIS are the goals, objectives, and strategies under each alternative, mitigation measures incorporated in each alternative, and a listing of the approved compatibility determinations.

Alternative C incorporates several components addressing a variety of needs, including providing emergency access to the area of Puerto Ferro during hurricane watches and warnings; continuing to work with the Navy, Environmental Protection Agency, Puerto Rico Environmental Quality Board, and the community to ensure that cleanup of contaminants and unexploded ordnance from former military activities is completed; developing fire suppression capabilities and agreements to ensure that refuge resources and the adjacent communities are protected; managing the former "Live Impact Area" as a wilderness in accordance with the legislation that established the refuge; seeking agreements with Commonwealth agencies and non-governmental organizations to ensure conservation of historic and archaeological sites; and removing unused former Navy structures to provide a refuge atmosphere.
