danielborunda@ibwc.state.gov.

SUPPLEMENTARY INFORMATION: The PEIS analyzes potential effects of the No Action Alternative and three action alternatives for future improvement of the Rectification, Presidio and Lower Rio Grande Flood Control Projects located along the Texas-Mexico border. Potential improvements were organized in three action alternatives: (1) Enhanced Operation and Maintenance Alternative, focusing on engineering improvements; (2) Integrated Water Resources Management Alternative, integrating additional water conservation and quality measures to the projects' core mission of flood control and water delivery; and (3) Multipurpose Project Management Alternative incorporating, in addition to engineering improvements and integrating water management, additional measures for multiple use of the floodway and environmental measures supporting initiatives by federal agencies, local governments, and other organizations. These additional measures would be conducted largely under cooperative agreements with the proponent agency or organization. The PEIS evaluated alternatives for each flood control project in terms of potential effects relative to those of the No Action Alternative, in the areas of water, biological, cultural and socioeconomic resources, land use, and environmental health issues. The Multipurpose Project Management Alternative was selected as the preferred option for implementation of improvements to the flood control projects as it supports improvements in water quality and water conservation, and is consistent with the core project mission of flood control and water delivery. Public participation in the PEIS development included scoping meetings, a 45-day review period of the Draft PEIS, and Public Hearings held at the Cities of El Paso, Presidio and McAllen, Texas, on August 21, 22, and 28, 2007, respectively.

Copies of the FEIS have been sent to agencies, organizations and individuals who participated in the scoping process and to those who have requested copies of the FEIS. A limited number of Final PEIS copies may be obtained upon request from the contact person identified above. A Record of Decision will be issued after a minimum of 30 days following the filing of the Final PEIS. Any comments on the Final PEIS must be received no later than 30 days after the date of publication of the notice of availability by the Environmental Protection Agency (EPA)

in the **Federal Register**. No action will be taken on the proposed action before 30 days following publication of the notice of availability of the Final PEIS by EPA.

Dated: January 2, 2008.

Susan E. Daniel,

General Counsel.

BILLING CODE 7010-01-P

INTERNATIONAL TRADE COMMISSION

[Investigation Nos. 731-TA-1138 and 1139 (Preliminary)]

Aminotrimethylenephosphonic Acid (ATMP) and 1-Hydroxyethylidene-1,1-Diphosphonic Acid (HEDP) From China and India

AGENCY: United States International Trade Commission.

ACTION: Institution of antidumping duty investigations and scheduling of preliminary phase investigations.

SUMMARY: The Commission hereby gives notice of the institution of investigations and commencement of preliminary phase antidumping duty investigation Nos. 731-TA-1138 and 1139 (Preliminary) under section 733(a) of the Tariff Act of 1930 (19 U.S.C. 1673b(a)) (the Act) to determine whether there is a reasonable indication that an industry in the United States is materially injured or threatened with material injury, or the establishment of an industry in the United States is materially retarded, by reason of imports from aminotrimethylenephosphonic acid (ATMP) and 1-hydroxyethylidene-1,1-diphosphonic acid (HEDP) from China and India, provided for in subheading 2931.00.90 of the Harmonized Tariff Schedule of the United States, that are alleged to be sold in the United States at less than fair value. Unless the Department of Commerce extends the time for initiation pursuant to section 732(c)(1)(B) of the Act (19 U.S.C. 1673a(c)(1)(B)), the Commission must reach a preliminary determination in antidumping investigations in 45 days, or in this case by February 14, 2008. The Commission's views are due at Commerce within five business days thereafter, or by February 22, 2008.

For further information concerning the conduct of these investigations and rules of general application, consult the Commission's Rules of Practice and Procedure, part 201, subparts A through E (19 CFR part 201), and part 207, subparts A and B (19 CFR part 207).

DATES: *Effective Date:* December 31, 2007.

FOR FURTHER INFORMATION CONTACT: Christopher Cassise (202-708-5408), Office of Investigations, U.S. International Trade Commission, 500 E Street, SW., Washington, DC 20436. Hearing-impaired persons can obtain information on this matter by contacting the Commission's TDD terminal on 202-205-1810. Persons with mobility impairments who will need special assistance in gaining access to the Commission should contact the Office of the Secretary at 202-205-2000. General information concerning the Commission may also be obtained by accessing its internet server (<http://www.usitc.gov>). The public record for these investigations may be viewed on the Commission's electronic docket (EDIS) at <http://edis.usitc.gov>.

SUPPLEMENTARY INFORMATION:

Background

These investigations are being instituted in response to a petition filed effective December 31, 2007, by Compass Chemical International LLC, Huntsville, TX.

Participation in the Investigations and Public Service List

Persons (other than petitioners) wishing to participate in the investigations as parties must file an entry of appearance with the Secretary to the Commission, as provided in sections 201.11 and 207.10 of the Commission's rules, not later than seven days after publication of this notice in the **Federal Register**. Industrial users and (if the merchandise under investigation is sold at the retail level) representative consumer organizations have the right to appear as parties in Commission antidumping investigations. The Secretary will prepare a public service list containing the names and addresses of all persons, or their representatives, who are parties to these investigations upon the expiration of the period for filing entries of appearance.

Limited Disclosure of Business Proprietary Information (BPI) Under an Administrative Protective Order (APO) and BPI Service List

Pursuant to section 207.7(a) of the Commission's rules, the Secretary will make BPI gathered in these investigations available to authorized applicants representing interested parties (as defined in 19 U.S.C. 1677(9)) who are parties to the investigations under the APO issued in the investigations, provided that the

application is made not later than seven days after the publication of this notice in the **Federal Register**. A separate service list will be maintained by the Secretary for those parties authorized to receive BPI under the APO.

Conference

The Commission's Director of Operations has scheduled a conference in connection with these investigations for 9:30 a.m. on January 18, 2008, at the U.S. International Trade Commission Building, 500 E Street, SW., Washington, DC. Parties wishing to participate in the conference should contact Christopher Cassise (202-708-5408) not later than January 16, 2008, to arrange for their appearance. Parties in support of the imposition of antidumping duties in these investigations and parties in opposition to the imposition of such duties will each be collectively allocated one hour within which to make an oral presentation at the conference. A nonparty who has testimony that may aid the Commission's deliberations may request permission to present a short statement at the conference.

Written Submissions

As provided in sections 201.8 and 207.15 of the Commission's rules, any person may submit to the Commission on or before January 24, 2008, a written brief containing information and arguments pertinent to the subject matter of the investigations. Parties may file written testimony in connection with their presentation at the conference no later than three days before the conference. If briefs or written testimony contain BPI, they must conform with the requirements of sections 201.6, 207.3, and 207.7 of the Commission's rules. The Commission's rules do not authorize filing of submissions with the Secretary by facsimile or electronic means, except to the extent permitted by section 201.8 of the Commission's rules, as amended, 67 FR 68036 (November 8, 2002). Even where electronic filing of a document is permitted, certain documents must also be filed in paper form, as specified in II(C) of the Commission's Handbook on Electronic Filing Procedures, 67 FR 68168, 68173 (November 8, 2002).

In accordance with sections 201.16(c) and 207.3 of the rules, each document filed by a party to the investigations must be served on all other parties to the investigations (as identified by either the public or BPI service list), and a certificate of service must be timely filed. The Secretary will not accept a document for filing without a certificate of service.

Authority: These investigations are being conducted under authority of title VII of the Tariff Act of 1930; this notice is published pursuant to section 207.12 of the Commission's rules.

Issued: January 3, 2008.

By order of the Commission.

Marilyn R. Abbott,

Secretary to the Commission.

BILLING CODE 7020-02-P

NUCLEAR REGULATORY COMMISSION

[Docket No. 40-8964]

Notice of Availability of Environmental Assessment and Finding of No Significant Impact for the Addition of the SR-2 Satellite Facility To Power Resources, Inc's Smith Ranch-Highlands Uranium Project, Converse County, WY

AGENCY: U.S. Nuclear Regulatory Commission.

ACTION: Notice of availability.

FOR FURTHER INFORMATION CONTACT: Paul Michalak, Decommissioning and Uranium Recovery Licensing Directorate, Division of Waste Management and Environmental Protection, Office of Federal and State Materials and Environmental Management Programs, U.S. Nuclear Regulatory Commission, Washington, DC 20555. Telephone: (301) 415-7612; Fax number: (301) 415-5955; E-mail: pxm2@nrc.gov.

SUPPLEMENTARY INFORMATION:

I. Introduction

Power Resources, Inc. (PRI) currently holds Source Material License SUA-1548 for the Smith Ranch-Highland Uranium Project (SR-HUP) site, located in Converse County, Wyoming. Source Material License SUA-1548 permits PRI to conduct In Situ Leach (ISL) uranium recovery operations at the SR-HUP site. As specified in Source Material License SUA-1548, License Condition 10.5.1 requires the following:

The licensee is prohibited from constructing new Satellite Facilities or waste water evaporation ponds prior to NRC review and approval of designs and specifications.

By letter dated October 11, 2006, PRI submitted a request to construct ISL Satellite SR-2 (SR-2) at the SR-HUP site. In this proposed action, an ISL satellite facility is a structure (i.e., building and associated equipment) where the ion exchange portion of the ISL processing circuit is conducted. ISL

Satellite SR-2 would service Mine Units 9, 10, 11, and 12, located near the southwest corner of Smith Ranch. It is estimated that construction of SR-2 and associated access road would impact approximately 1.5 acres of land.

The NRC staff has prepared an Environmental Assessment (EA) in support of its review of PRI's request in accordance with the requirements of 10 CFR Part 51. Based on the EA, the NRC has concluded that a Finding of No Significant Impact (FONSI) is appropriate.

II. EA Summary

Background

PRI's SR-HUP is a commercial ISL uranium mining facility located in the South Powder River Basin, Converse County, Wyoming. The main office and Central Processing Plant complex is located at Smith Ranch, about 17 air miles (22 road miles) (27 air/35 road kilometers (km)) northeast of Glenrock, Wyoming, and 23 air miles (25 road miles) (37 air/40 road km) northwest of Douglas, Wyoming. NRC issued PRI's current NRC license for the SR-HUP (Source Material License SUA-1548) on August 18, 2003, as part of a license renewal process. Commercial ISL uranium production began at the Highland site in January 1988, and at the Smith Ranch site in June 1997.

PRI current operations at the SR-HUP include an ISL Central Processing Plant (CPP) and an ISL Satellite facility (SR-1) at the Smith Ranch site and two ISL Satellite facilities (Satellite Nos. 2 and 3) at the Highland site.

Under SUA-1548, PRI is authorized, through its ISL process, to produce up to 5.5 million pounds (2.5 million kilograms) per year of tri-uranium octoxide (U₃O₈), also known as "yellowcake." PRI's current annual production is less than half of this limit.

Review Scope

The NRC staff has reviewed PRI's request in accordance with the NRC's environmental protection regulations in 10 CFR Part 51. Those regulations implement section 102(2) of the National Environmental Policy Act of 1969, as amended. The EA provides the results of the NRC staff's environmental review. The NRC staff's radiation safety review of PRI's request will be documented separately in a Safety Evaluation Report.

The NRC staff has prepared the EA in accordance with NRC requirements in 10 CFR 51.21 and 51.30, and with the associated guidance in NRC report NUREG-1748, "Environmental Review Guidance for Licensing Actions
