Proposed Project

National Hospital Discharge Survey—Revision—The National Hospital

Discharge Survey (NHDS) (OMB# 0920-0212), National Center for Health Statistics (NCHS), Centers for Disease Control and Prevention (CDC).

Background and Brief Description

Section 306 of the Public Health Service (PHS) Act (42 U.S.C. 242k), as amended, authorizes that the Secretary of Health and Human Services (DHHS), acting through NCHS, shall collect statistics on the extent and nature of illness and disability of the population of the United States. This three-year clearance request includes the data collection in 2008 and 2009 using the current NHDS design; a pretest of a new design; and data collection for 2010 and 2011 of the survey using the new design.

Current NHDS

The National Hospital Discharge Survey (NHDS) has been conducted continuously by the National Center for Health Statistics, CDC, since 1965. It is the principal source of data on inpatient utilization of short-stay, non-Federal hospitals and is the principal annual source of nationally representative estimates on the characteristics of discharges, the lengths of stay, diagnoses, surgical and non-surgical procedures, and the patterns of use of care in hospitals in various regions of the country. It is the benchmark against which special programmatic data sources are measured. The data items collected are the basic core of the variables contained in the Uniform Hospital Discharge Data Set (UHDDS) in addition to several variables (admission source and type, admitting diagnosis and present on admission indicators) which are identical to those needed for billing of inpatient services for Medicare patients. In the current survey, data are obtained in one of three ways: Abstracted by hospital staff; abstracted by Bureau of the Census Staff under an interagency agreement; and provided in electronic format. Due to budgetary constraints, the number of hospitals and the number of discharges for the 2008 and 2009 NHDS data collections will decrease by approximately 50% from previous years.

Redesigned NHDS

Although the current NHDS is still fulfilling its intended functions, it is based on concepts from the health care delivery system, as well as the hospital and patient universes, of previous decades. It has become clear that a redesign of the NHDS that provides greater depth of information is necessary.
