

consultative, and integrated models of care;

- Increase the number of persons with co-occurring disorders served. These measures will enable SAMHSA to benchmark and track progress toward these goals within COSIG states.

Information will be collected annually about the number and percentage of programs that offer screening, assessment, and treatment services for co-occurring disorders; and the number of clients actually screened, assessed,

and treated through these programs. Information will also be collected annually about providers' policies regarding screening, assessment, and treatment services for persons with co-occurring disorders.

A questionnaire, to be completed by providers, contains 47 items, answered either by checking a box or entering a number in a blank. The questionnaire is available both in printed form and electronically. Obtaining the information to enter on the

questionnaire will require respondent providers to track screening, assessment, and treatment services for clients.

COSIG States will be required to report information to SAMHSA for all providers directly participating in their COSIG projects. SAMHSA will consider sampling strategies for states with large numbers of participating providers and for providers serving large numbers of clients. Annual burden for the activities is shown below:

Data collection	Number of respondents	Responses per respondent	Hours per response	Total burden hours
Capacity to Screen, Assess, and Treat	242	1	4.5	1,089
Policy on Screening, Assessment, Referral, and Treatment	242	1	3 minutes	12
Total	242			1,101
