

the products and distribution of the products of the same; the Consumer Price Index (CPI) is one of these statistics. The collection of data from a wide spectrum of retail establishments and government agencies is essential for the timely and accurate calculation of the Commodities and Services (C&S) component of the CPI.

The CPI is the only index compiled by the U.S. Government that is designed to measure changes in the purchasing power of the urban consumer's dollar. The CPI is a measure of the average change in prices over time paid by urban consumers for a market basket of goods and services. The CPI is used most widely as a measure of inflation, and serves as an indicator of the effectiveness of government economic policy. It is also used as a deflator of other economic series, that is, to adjust other series for price changes and to translate these series into inflation-free dollars. Examples include retail sales, hourly and weekly earnings, and components of the Gross Domestic Product. A third major use of the CPI is to adjust income payments. Almost 2 million workers are covered by collective bargaining contracts, which provide for increases in wage rates based on increases in the CPI. Similarly, nine states have laws that link the adjustment in state minimum wage to the changes in the CPI. In addition to private sector workers whose wages or pensions are adjusted according to changes in the CPI, the index also affects the income of nearly 80 million

persons, largely as a result of statutory action: About 53 million social security beneficiaries; about 4.5 million retired military and Federal Civil Service employees and survivors, and about 25.7 million food stamp recipients. Changes in the CPI also affect the 29.6 million children who eat lunch at school. Under the National School Lunch Act and Child Nutrition Act, national average payments for those lunches and breakfasts are adjusted annually by the Secretary of Agriculture on the basis of the change in the CPI series, "Food away from Home." Since 1985, the CPI has been used to adjust the Federal income tax structure to prevent inflation-induced tax rate increases.

II. Current Action

Office of Management and Budget clearance is being sought for the Consumer Price Index Commodities and Services Survey. The continuation of the collection of prices for the CPI is essential since the CPI is the nation's chief source of information on retail price changes. If the information on C&S prices were not collected, Federal fiscal and monetary policies would be hampered due to the lack of information on price changes in a major sector of the U.S. economy, and estimates of the real value of the Gross National Product could not be made. The consequences to both the Federal and private sectors would be far reaching and would have serious repercussions on Federal government policy and institutions.

III. Desired Focus of Comments

The Bureau of Labor Statistics is particularly interested in comments that:

- Evaluate whether the proposed collection of information is necessary for the proper performance of the functions of the agency, including whether the information will have practical utility.
- Evaluate the accuracy of the agency's estimate of the burden of the proposed collection of information, including the validity of the methodology and assumptions used.
- Enhance the quality, utility, and clarity of the information to be collected.
- Minimize the burden of the collection of information on those who are to respond, including through the use of appropriate automated, electronic, mechanical, or other technological collection techniques or other forms of information technology, e.g., permitting electronic submissions of responses.

Type of Review: Extension without change of a currently approved collection.

Agency: Bureau of Labor Statistics.

Title: Consumer Price Index Commodities and Services Survey.

OMB Number: 1220-0039.

Affected Public: Business or other for-profit; not for profit institutions; and State, Local or Tribal Government.

	Total respondents	Frequency	Total responses	Average time per response	Estimated total burden
PRICING	37,000	8.7838	325,000	0.33	107,250
OUTLET ROTATION: Ongoing and Geographical	15,000	1	15,000	1.0	15,000
ITEM ROTATION	1,600	1	1,600	1.0	1,600
Total	53,600	n/a	341,600	n/a	123,850

Total Burden Cost (capital/startup): \$0.0.

Total Burden Cost (operating/maintenance): \$0.0.

Comments submitted in response to this notice will be summarized and/or included in the request for Office of Management and Budget approval of the information collection request; they also will become a matter of public record.

Signed at Washington, DC, this 15th day of January 2008.

Cathy Kazanowski,

Chief, Division of Management Systems, Bureau of Labor Statistics.

NATIONAL SCIENCE FOUNDATION

Notice of Intent To Seek Approval To Renew an Information Collection

AGENCY: National Science Foundation.

ACTION: Notice and Request for Comments.

SUMMARY: The National Science Foundation (NSF) is announcing plans to request clearance of this collection. In accordance with the requirement of Section 3506(c)(2)(A) of the Paperwork Reduction Act of 1995 (Pub. L. 104-13), we are providing opportunity for public comment on this action. After obtaining and considering public comment, NSF will prepare the submission requesting

that OMB approve clearance of this collection for no longer than three years.

DATES: Written comments on this notice must be received by March 24, 2008 to be assured of consideration. Comments received after that date will be considered to the extent practicable.

FOR ADDITIONAL INFORMATION OR

COMMENTS: Contact Suzanne H. Plimpton, Reports Clearance Officer, National Science Foundation, 4201 Wilson Boulevard, Suite 295, Arlington, Virginia 22230; telephone (703) 292-7556; or send e-mail to splimpto@nsf.gov. Individuals who use a telecommunications device for the deaf (TDD) may call the Federal Information Relay Service (FIRS) at 1-

800-877-8339 between 8 a.m. and 8 p.m., Eastern time, Monday through Friday. You also may obtain a copy of the data collection instrument and instructions from Ms. Plimpton.

SUPPLEMENTARY INFORMATION:

Title of Collection: NSF Surveys to Measure Customer Service Satisfaction.

OMB Number: 3145-0157.

Expiration Date of Approval: June 30, 2008.

Type of Request: Intent to seek approval to renew an information collection.

Abstract:

Proposed Project: On September 11, 1993, President Clinton issued Executive Order 12862, "Setting Customer Service Standards," which calls for Federal agencies to provide service that matches or exceeds the best service available in the private sector. Section 1(b) of that order requires agencies to "survey customers to determine the kind and quality of services they want and their level of satisfaction with existing services." The National Science Foundation (NSF) has an ongoing need to collect information from its customer community (primarily individuals and organizations engaged in science and engineering research and education) about the quality and kind of services it provides and use that information to help improve agency operations and services.

Estimate of Burden: The burden on the public will change according to the needs of each individual customer satisfaction survey; however, each survey is estimated to take approximately 30 minutes per response.

Respondents: Will vary among individuals or households; business or other for-profit; not-for-profit institutions; farms; federal government; state, local or tribal governments.

Estimated Number of Responses per Survey: This will vary by survey.

Comments: Comments are invited on (a) whether the proposed collection of information is necessary for the proper performance of the functions of the Agency, including whether the information shall have practical utility; (b) the accuracy of the Agency's estimate of the burden of the proposed collection of information; (c) ways to enhance the quality, utility, and clarity of the information on respondents, including through the use of automated collection techniques or other forms of information technology; and (d) ways to minimize the burden of the collection of information on those who are to respond, including through the use of appropriate automated, electronic, mechanical, or other technological

collection techniques or other forms of information technology.

Dated: January 15, 2008.

Suzanne H. Plimpton,

Reports Clearance Officer, National Science Foundation.

BILLING CODE 7555-01-M

NUCLEAR REGULATORY COMMISSION

[Docket No. 50-133]

Environmental Assessment and Finding of No Significant Impact Related to Issuance of Exemption for the Humboldt Bay Power Plant Unit 3 License DPR-007, Humboldt, CA

AGENCY: U.S. Nuclear Regulatory Commission.

ACTION: Environmental Assessment and Finding of No Significant Impact.

FOR FURTHER INFORMATION CONTACT: John Hickman, Division of Waste Management and Environmental Protection, Office of Federal and State Materials and Environmental Management Programs, U.S. Nuclear Regulatory Commission, *Mail Stop:* T8F5, Washington, DC 20555-0001. *Telephone:* (301) 415-3017; *e-mail:* jbh@nrc.gov.

SUPPLEMENTARY INFORMATION:

I. Introduction

The U.S. Nuclear Regulatory Commission (NRC) staff is considering a request dated October 30, 2007, by the Pacific Gas and Electric Company (PG&E or the Licensee), to approve a request for exemption from the values of the Inhalation Annual Limits on Intake (ALIs) and Derived Air Concentrations (DACs) that appear in 10 CFR Part 20, Appendix B, Table 1, for use at Humboldt Bay Power Plant, Unit 3 (HBPP). PG&E proposes replacing the 10 CFR Part 20, Appendix B, Table 1 ALI and DAC values, derived using previous (1977) recommendations of the International Commission on Radiological Protection (ICRP), with ALI and DAC values derived using more recent (1995) ICRP recommendations.

This Environmental Assessment (EA) has been developed in accordance with the requirements of 10 CFR 51.21.

II. Environmental Assessment

Background

HBPP was permanently shut down in July 1976, and until recently was in safe storage condition (SAFSTOR). SAFSTOR is defined as a method of

decommissioning in which the nuclear facility is placed and maintained in safe condition for an extended period of time to permit radioactive material to decay to levels that facilitate subsequent decontamination and decommissioning of the facility. A Decommissioning Plan was approved in July 1988. Subsequent to the 1997 decommissioning rule, the licensee converted its decommissioning plan into its Defueled Safety Analysis Report which is updated every two years. A Post Shutdown Decommissioning Activities Report was issued by the licensee in February 1998. In December 2003, PG&E formally submitted a license application to the NRC for approval of a dry-cask Independent Spent Fuel Storage Installation (ISFSI) at the Humboldt Bay site. A preliminary license and safety evaluation report for the Humboldt Bay ISFSI was issued on August 24, 2005. The ISFSI is currently under construction and the licensee is now engaged in some incremental decommissioning activities.

Fuel failures occurred at HBPP in the past when the reactor was operating, resulting in contamination from alpha emitters which pose an inhalation hazard to workers. The inhalation of airborne radioactive materials in restricted areas poses a potential internal radiation hazard and the NRC regulations in 10 CFR Part 20 require licensees to assess these radiation hazards and to implement protective measures to minimize that hazard to workers, the public and the environment. These actions and measures include air sampling, posting airborne radioactivity area warning signs, the use of respiratory protection, and bioassay monitoring of workers. These actions and measures are triggered when air concentrations in the workplace reach specified fractions of the DAC values in 10 CFR Part 20, Appendix B.

Proposed Action

HBPP has requested that NRC allow an exemption under 10 CFR 20.2301 to allow the use of DAC and ALI values calculated using ICRP-68, "Dose Coefficients for Intake of Radionuclides by Workers," (Ref. 3) dose coefficients and parameters instead of the DAC and ALI values in 10 CFR Part 20, Appendix B, Table 1, Occupational Values. HBPP believes that this change will result in greater worker efficiency in decommissioning work activities and should result in an overall reduction in worker dose. The ICRP 68 parameters used in calculating DAC and ALI values are generally accepted as more representative models of the actual
