#### SUPPLEMENTARY INFORMATION:

##### Proposed Project

"Assessment of the Emergency Severity Index (ESI)"

AHRQ is proposing to examine uptake and use of an emergency room triage tool, the Emergency Severity Index (ESI). The hospital emergency department (ED) represents a critical point in care delivery for patients across the United States. Over the past decade, however, the dramatic influx of patients into EDs has seriously challenged the ability of these departments to deliver timely, quality, and safe emergency health care services. Moreover, with most emergency departments operating at or over capacity it may prove difficult for them to respond to the surge in emergency room demand created by natural and man-made disasters. Development of increasingly refined and validated triage methods is one potential key to addressing overcrowding by speeding up the care delivery to the most acute ED patients while helping hospitals assess, carefully allocate and plan the amount of human and other resources needed to care for all patients.

In response to a need to standardize the triage process and improve the flow of patients, Richard C. Wuerz, M.D., (Department of Emergency Medicine at the Brigham and Women's Hospital and the Harvard Medical School) and David R. Eitel, M.D., (Department of Emergency Medicine, The York Hospital WellSpan Health System) initiated development of the Emergency Severity Index (ESI) in 1995. The ESI is unique in its focus on appropriate resource allocation and its consideration of necessary resource utilization in assigning acuity. To encourage adoption of the ESI, AHRQ developed an implementation handbook (Emergency Severity Index, Version 4) and companion DVDs. These materials are intended to provide hospitals and triage nurses with background on why they might want to implement the ESI as a triage tool, and offers recommendations on the implementation process and staff training.

This project will assess the product's acceptance by emergency departments and others involved in addressing medical surges to better understand the usefulness of the ESI compared to other
