SUPPLEMENTARY INFORMATION:**Background**

At this early stage of the planning process, project goals are to restore the maximum feasible extent of tidal marsh and channel habitats. Where full tidal extent cannot be restored, we would seek to maximize diked wetland functions through management, enhancement, and restoration actions while maintaining viable agricultural uses to the extent compatible. In addition, we would provide public access and recreational and educational opportunities that are compatible with ecological and cultural resources protection.

The project site is located at Sears Point near the intersection of Lakeville-Reclamation Road and State Route 37 (SR 37) in southern Sonoma County, California. The site is also traversed from east to west by an inactive rail line owned by the Sonoma-Marin Area Rail Transit (SMART) District.

The project site is a total of 2,327 acres (ac) owned by the Sonoma Land Trust and is comprised of two large properties, the North Point Joint Venture (NPJV) parcel and the Dickson Ranch parcel, which are situated on the edge of San Pablo Bay between the mouth of the Petaluma River and Tolay Creek. The 1,679-ac NPJV parcel extends both north and south of SR 37. It is bounded on the north by the Infineon Raceway property, on the east by Cougar Mountain (north of SR 37) and Paradise Vineyards (south of SR 37), on the south by the SMART rail line, and on the west by Lakeville-Reclamation Road. The 648-ac Dickson Ranch parcel is located entirely south of Highway 37, and is bounded on the north by the SMART rail line, on the west by Tolay Creek, on the south by San Pablo Bay, and on the west by the outboard levee as it veers bayward from the SMART rail line. The entire Dickson Ranch parcel and 858 acres of the North Point Joint Venture parcel are located within the approved acquisition boundary of the San Pablo Bay NWR.

Site topography ranges from below mean sea level (msl) in portions of the subsided diked baylands along the southern project boundary to approximately 400 feet above msl in the rolling uplands north of SR 37. With the exception of a small number of barns, houses, and outbuildings scattered throughout the project site, the area is

predominantly undeveloped, comprising a mixture of tidal, seasonal, and riparian wetlands, streams, and upland habitats.

The project site contains existing or potential suitable habitat for a number of special status species, including the federally listed endangered salt marsh harvest mouse (*Reithrodontomys raviventris*), California clapper rail (*Rallus longirostris obsoletus*), and the federally listed threatened California red-legged frog (*Rana aurora draytonii*). Two federally listed threatened fish species—the Central Valley and Central California Coast steelhead (*Oncorhynchus mykiss*) and green sturgeon (*Acipenser medirostris*)—may also benefit from the project goals. Other species may be addressed as necessary in the EIR/EIS based on further analysis, new information, agency consultation, and public comment.

NEPA Compliance

Information gathered through this scoping process will assist us in preparing a reasonable range of alternatives to address the restoration of the project site at Sears Point. These alternatives are likely to include some activity within the San Pablo Bay National Wildlife Refuge. We will use the EIR/EIS to determine whether to authorize activities within the San Pablo Bay National Wildlife Refuge in order to accomplish project goals. A detailed description of the proposed action and alternatives will be included in the EIR/EIS.

The EIR/EIS will identify the direct, indirect, and cumulative impacts of the alternatives on biological resources, cultural resources, land use, air quality, water quality, water resources, and other environmental resources. It will also identify appropriate mitigation measures for adverse environmental effects.

We will conduct environmental review of the EIR/EIS in accordance with the requirements of NEPA, as amended (42 U.S.C. 4321 *et seq.*), its implementing regulations (40 CFR parts 1500–1508), other applicable regulations, and our procedures for compliance with those regulations. The environmental document will be prepared to meet both the requirements of NEPA and the California Environmental Quality Act (CEQA). The California Department of Fish and Game is the CEQA lead agency. We anticipate that the draft EIR/EIS will be available for public review in Spring 2008.

We are furnishing this notice in accordance with section 1501.7 of the NEPA implementing regulations to obtain suggestions and information from

other agencies and the public on the scope of issues to be addressed in the EIR/EIS. We invite written comments from interested parties to ensure identification of the full range of issues.

Before including your address, phone number, e-mail address, or other personal identifying information in your comment, you should be aware that your entire comment—including your personal identifying information—may be made publicly available at any time. While you can ask us in your comment to withhold your personal identifying information from public review, we cannot guarantee that we will be able to do so.

Dated: January 16, 2008.

Ken McDemand,

Acting Regional Director, California Nevada Region.

Notice of Public Meeting, Carrizo Plain National Monument Advisory Committee

SUMMARY: In accordance with Federal Land Policy and Management Act of 1976 (FLPMA), the Federal Advisory Committee Act of 1972 (FACA), the National Environmental Policy Act of 1969 (NEPA), and the Code of Federal Regulations (40 CFR 1501.7, 43 CFR 1610.2), the United States Department of the Interior, Bureau of Land Management (BLM), Carrizo Plain National Monument Advisory Committee will meet as indicated below:

DATES: The meeting will be held on Saturday, February 23, 2008, at the Carrizo Plain Elementary School, located approximately 2 miles northwest of Soda Lake Road on Highway 58. The meeting will begin at 10 a.m. and finish at 5 p.m. The meeting will focus on a preliminary preferred alternative for the Resource Management Plan/Environmental Impact Statement being developed for the Carrizo Plain National Monument. There will be a public comment period from 3 p.m. to 4 p.m. Lunch will be available for \$8.

SUPPLEMENTARY INFORMATION: The nine-member Carrizo Plain National Monument Advisory Committee advises the Secretary of the Interior, through the Bureau of Land Management, on a variety of public land issues associated

with the public land management in the Carrizo Plain National Monument in Central California. At this meeting, Monument staff will present updated information on the progress on the draft Carrizo Plain National Monument Resource Management Plan and the Environmental Impact Statement (RMP/EIS). A preliminary preferred alternative being developed by the Carrizo Managing Partners—BLM, the California Department of Fish and Game and the Nature Conservancy—will be the focus of this meeting. This meeting is open to the public. Depending on the number of persons wishing to comment, and the time available, the time allotted for individual oral comments may be limited. Individuals who plan to attend and need special assistance such as sign language interpretation or other reasonable accommodations should contact BLM as indicated below.

FOR FURTHER INFORMATION CONTACT: Bureau of Land Management, Attention: Johna Hurl, Monument Manager, 3801 Pegasus Drive, Bakersfield, CA, 93308. Phone at (661) 391-6093 or e-mail: jhurl@blm.gov.

Dated: January 16, 2007.

Johna Hurl,

Monument Manager, Carrizo Plain National Monument.

BILLING CODE 4310-40-P

DEPARTMENT OF THE INTERIOR

National Park Service

Notice of Inventory Completion: Florida Museum of Natural History, University of Florida, Gainesville, FL and Southwest Florida Water Management District, Brooksville, FL

AGENCY: National Park Service, Interior.

ACTION: Notice.

Notice is here given in accordance with the Native American Graves Protection and Repatriation Act (NAGPRA), 25 U.S.C. 3003, of the completion of an inventory of human remains in the control of the Florida Museum of Natural History, University of Florida, Gainesville, FL, and in the physical custody of the Southwest Florida Water Management District, Brooksville, FL. The human remains were removed from Tatham Mound, Citrus County, FL.

This notice is published as part of the National Park Service's administrative responsibilities under NAGPRA, 25 U.S.C. 3003 (d)(3). The determinations in this notice are the sole responsibility of the museum, institution, or Federal

agency that has control of the Native American human remains. The National Park Service is not responsible for the determinations in this notice.

A detailed assessment of the human remains was made by the Florida Museum of Natural History professional staff in consultation with representatives of the Miccosukee Tribe of Indians of Florida, Seminole Nation of Oklahoma, and Seminole Tribe of Florida (Dania, Big Cypress, Brighton, Hollywood & Tampa Reservations).

In 1986-1987, human remains representing a minimum of 366 individuals were removed from Tatham Mound (8CI203) in Citrus County, FL, as part of a Florida Museum of Natural History research project. No known individuals are identified. No associated funerary objects are included in this notice.

Tatham Mound (8CI203) is a Safety Harbor culture mound. Tatham Mound consists of an earlier, pre-Columbian lower mound that contained human remains that are radiocarbon-dated to circa A.D. 1050. An upper mound contained the human remains of some of the individuals, most of whom were bundle burials in an extremely poor state of preservation. At the time of the Hernando de Soto expedition into the region in 1539, people associated with variants of the Safety Harbor culture lived from north Sarasota County to the Cove of the Withlachooshee, extending inland in Citrus County as far as Tatham Mound itself. Narratives associated with the de Soto expedition record the names of two Native American towns called Vicela and Tocaste in the vicinity of the Cove (but not in the locality of Tatham Mound). The Native American town of Vicela is thought to have been near the modern town of Istachatta in northeast Hernando County, approximately 15 miles southwest of Tatham Mound. No archeological site corresponding to Vicela has been found. North of Vicela, the de Soto expedition accounts mention the Native American town of Tocaste, describing it as being on a large lake. After 1539, Vicela and Tocaste disappear from the historical records. The linguistic affiliation of the Tatham Mound people and their Safety Harbor relatives are unknown. No information on their language, other than a few proper names noted in colonial Spanish documents, exists. Archeological and historical research in Citrus County, which is in the Florida Central Gulf Coast region (including Greater Tampa Bay) has shown that the Safety Harbor culture dates to the period circa A.D. 1000-1650. There is no known relationship between the Safety Harbor people and any modern Native

American group. Consequently, the human remains are culturally unidentifiable.

At the time of excavation, the Tatham Mound site (formerly known as the McGregor-Smith tract) was owned by the South Florida Council of the Boy Scouts of America. Acting on the advice of the Council's Native American Advisory Committee, the Council mandated that the human remains be reinterred in the mound at the conclusion of reasonable scientific analysis, and that such reinterment would be in accordance with State of Florida regulations. The analysis of the human remains was carried out at first at East Carolina University and then at the University of North Carolina where analysis was completed. Subsequently, the human remains were transferred to the Southwest Florida Water Management District for storage.

In late 2004, the South Florida Council of the Boy Scouts of America sold the land on which Tatham Mound is located to the Southwest Florida Water Management District, a State of Florida agency. The site is now joined with the Flying Eagle tract. Ownership of the land by Southwest Florida Water Management District affords legal protection for Tatham Mound and places the stewardship of the site under the Florida Division of Historical Resources.

Officials of the Florida Museum of Natural History have determined that, pursuant to 25 U.S.C. 3001 (9-10), the human remains described above represent the physical remains of 366 individuals of Native American ancestry. Officials of the Florida Museum of Natural History also have determined that, pursuant to 25 U.S.C. 3001 (2), a relationship of shared group relationship cannot reasonably be traced between the Native American human remains and any present-day Indian tribe.

The Native American Graves Protection and Repatriation Review Committee (Review Committee) is responsible for recommending specific actions for disposition of culturally unidentifiable human remains. In February 2007, the Florida Museum of Natural History requested that the Review Committee recommend reburial of the human remains of 366 culturally unidentifiable individuals at the Tatham Mound site. The Review Committee considered the request at its April 2007 meeting and recommended the reburial of the culturally unidentifiable human remains. In May 2007, a letter from the Designated Federal Official, writing on behalf of the Secretary of the Interior, recommended reburial of the physical
