

for a Federal agency. This includes the time needed to review instructions; develop, acquire, install, and utilize technology and systems for the purposes of collecting, validating, and verifying information, processing and maintaining information, and disclosing and providing information; adjust the existing ways to comply with any previously applicable instructions and requirements which have subsequently changed; train personnel to be able to respond to a collection of information; search data sources; complete and review the collection of information; and transmit or otherwise disclose the information.

Respondents/Affected Entities:

Entities potentially affected by these actions are manufacturers of marine spark-ignition engines.

Estimated Number of Respondents: 12.

Frequency of Response: Annual, quarterly, and on occasion.

Estimated Total Annual Hour Burden: 26,546.

Estimated Total Annual Cost:

\$1,608,844, includes \$219,223 annualized capital or O&M costs.

Changes in the Estimates: There is a decrease of 13,747 hours in the total estimated burden currently identified in the OMB Inventory of Approved ICR Burdens. This decrease is due to an adjustment in the total estimated number of responses. Under the previous ICR, manufacturers could request a waiver from most compliance requirements (PLT, In-use, etc.) for engine families with technology that was already in existence as of 1997 if they agreed to completely phase these families out by 2005. Since the phase out date already passed, manufacturers are no longer producing those engine families.

Title: NSPS for Asphalt Processing and Roofing Manufacture (Renewal).

ICR Numbers: EPA ICR Number 0661.09, OMB Control Number 2060-0002.

ICR Status: This ICR is scheduled to expire on January 31, 2008. Under OMB regulations, the Agency may continue to conduct or sponsor the collection of information while this submission is pending at OMB. An Agency may not conduct or sponsor, and a person is not required to respond to, a collection of information unless it displays a currently valid OMB control number. The OMB control numbers for EPA's regulations in title 40 of the CFR, after appearing in the **Federal Register** when approved, are listed in 40 CFR part 9, and displayed either by publication in the **Federal Register** or by other appropriate means, such as on the related collection instrument or form, if applicable. The display of OMB control numbers in certain EPA regulations is consolidated in 40 CFR part 9.

Abstract: The New Source Performance Standards (NSPS) for Asphalt Processing and Roofing Manufacture (40 CFR part 60, subpart UU), were proposed on November 18, 1980 and promulgated on May 26, 1981. These standards apply to each saturator and each asphalt storage facility at asphalt roofing plants; and to each asphalt storage tank and each blowing still at asphalt processing plants, petroleum refineries, and asphalt roofing plants. New facilities include those that commenced construction, modification or reconstruction after the date of proposal. This information will then be used by enforcement agencies to

verify that sources subject to the standard are meeting the emission reductions mandated by the Clean Air Act.

Owners/operators of asphalt processing and roofing manufacture are required to submit one-time only notification of construction/reconstruction, actual startup, initial performance test, physical or operational changes, and demonstration of a continuous monitoring system. Records must be maintained of the occurrence and duration of any startup, shutdown, or malfunction in the operation of an affected facility, or any period during which the monitoring system is inoperative. These notifications reports, and records are essential in determining compliance; and are required, in general, of all sources subject to NSPS.

Any owner or operator subject to the provisions of this part shall maintain a file of these measurements, and retain the file for at least two years following the date of such measurements, maintenance reports, and records. All reports are sent to the delegated state or local authority. In the event that there is no such delegated authority, the reports are sent directly to the EPA regional office. This information is being collected to assure compliance with 40 CFR part 60, subpart UU, as authorized in section 112 and 114(a) of the Clean Air Act. The required information consists of emissions data and other information that have been determined to be private.

An Agency may not conduct or sponsor, and a person is not required to respond to, a collection of information unless it displays a currently valid OMB Control Number. The OMB Control Number for EPA's regulations are listed in 40 CFR part 9 and 48 CFR chapter 15, and are identified on the form and/or instrument, if applicable.

Burden Statement: The annual public reporting and recordkeeping burden for this collection of information is estimated to average 113 hours per response. Burden means the total time, effort, or financial resources expended by persons to generate, maintain, retain, or disclose or provide information to or for a Federal agency. This includes the time needed to review instructions; develop, acquire, install, and utilize technology and systems for the purposes of collecting, validating, and verifying information, processing and maintaining information, and disclosing and providing information; adjust the existing ways to comply with any previously applicable instructions and requirements which have subsequently changed; train personnel to be able to

respond to a collection of information; search data sources; complete and review the collection of information; and transmit or otherwise disclose the information.

Respondents/Affected Entities: Asphalt processing and roofing manufacture.

Estimated Number of Respondents: 144.

Frequency of Response: Initially, and semiannually.

Estimated Total Annual Hour Burden: 33,912.

Estimated Total Annual Cost: \$8,714,925, which includes \$200,000 annualized Capital Startup costs, \$5,040,000 annualized Operating and Maintenance (O&M) costs, and \$3,474,925 annualized Labor costs.

Changes in the Estimates: There is an adjustment increase in the total estimated burden hours as currently identified in the OMB inventory of burdens because the previous tables did not represent all of the reporting requirements. The decrease in the number of sources was caused by buy-outs and/or consolidation which the industry has been experiencing for the last several years. The decrease in the capital startup and O&M costs estimates as compared with the previous ICR is attributed solely to the decrease in the number of sources. This ICR corrects the deficiencies.
