

FSIS is considering proposing to require that young chicken slaughter establishments that participate in this inspection system meet public health-based performance standards for microorganisms, such as *Salmonella* and *Campylobacter*. FSIS is also considering to propose that participating young chicken slaughter establishments meet a performance standard for generic *E. coli*. FSIS is considering this standard as a measure of sanitary conditions.

FSIS' traditional method of inspection for young chicken slaughter establishments was designed before microbial contamination was recognized as a leading cause of foodborne human illness. FSIS would like to update the inspection system for young chicken slaughter establishments so that it will function effectively with the significant advances that have been made in the processing methods employed by many of these establishments. FSIS believes that the inspection system that it is considering will be better able to protect public health because it will be better adapted to the methods being used in slaughter plants. FSIS activities will likely focus on establishments and points within the poultry slaughter process at which microbial contamination of young chicken carcasses is likely to occur. Similarly, FSIS believes that the performance standards it is considering will decrease the amount of microbial contamination occurring at the end of the poultry slaughter process.

An approach to inspection that focuses on points within an establishment that present the greatest likelihood of causing microbial and other contamination, and on those establishments with evidence of a loss of process control, could also be applied to processing establishments and to other slaughter establishments in addition to those that slaughter young chickens. The Committee will also review a draft report outlining how a public-health based inspection system could be applied to those establishments and the scientific basis for such a system.

All interested parties are welcome to attend the meetings and to submit written comments and suggestions concerning issues the Committee will review and discuss. The comments and the official transcript of the meeting, when they become available, will be kept in the FSIS Docket Room, U.S. Department of Agriculture, Food Safety and Inspection Service, 1400 Independence Avenue, SW., Room 2534, South Building, Washington, DC 20250, and posted on the Agency's

NACMPI Web site, http://www.fsis.usda.gov/about_fsis/nacmpi/index.asp.

Members of the public will be required to register before entering the meeting.

Additional Public Notification

Public awareness of all segments of rulemaking and policy development is important. Consequently, in an effort to ensure that the public and in particular minorities, women, and persons with disabilities, are aware of this notice, FSIS will announce it on-line through the FSIS Web page located at http://www.fsis.usda.gov/regulations/2007_Notices_Index/index.asp. FSIS also will make copies of this **Federal Register** publication available through the FSIS Constituent Update, which is used to provide information regarding FSIS policies, procedures, regulations, **Federal Register** notices, FSIS public meetings, and other types of information that could affect or would be of interest to our constituents and stakeholders. The Update is communicated via Listserv, a free e-mail subscription service consisting of industry, trade, and farm groups, consumer interest groups, allied health professionals, scientific professionals, and other individuals who have requested to be included. The Update also is available on the FSIS Web page. Through Listserv and the Web page, FSIS is able to provide information to a much broader, more diverse audience.

In addition, FSIS offers an e-mail subscription service which provides automatic and customized access to selected food safety news and information. This service is available at http://www.fsis.usda.gov/news_and_events/email_subscription/. Options range from recalls to export information to regulations, directives and notices. Customers can add or delete subscriptions themselves, and have the option to password protect their accounts.
