

Marine Mammal Protection Act of 1972, as amended (16 U.S.C. 1361 *et seq.*), the regulations governing the taking and importing of marine mammals (50 CFR part 216), the Endangered Species Act of 1973, as amended (ESA; 16 U.S.C. 1531 *et seq.*), and the regulations governing the taking, importing, and exporting of endangered and threatened species (50 CFR parts 222–226).

This research permit authorizes aerial and vessel surveys to be conducted including close approach, photo-id, and incidental harassment of cetaceans. Level A activities include biopsy sampling and suction-cup tagging, which will be conducted on all age classes with the exception of neonates. Additionally, researchers are authorized to capture, biological sample, incidentally harass, and release four species of pinnipeds. Pinniped research would be conducted on all age classes including pups. The study area for this permit includes waters within or proximal to the U.S. Exclusive Economic Zone from Maine to Florida. Finally, researchers are authorized to import and export cetacean and pinniped specimens (including soft and hard tissue, blood, extracted DNA, whole dead animals, etc.) to/from any country.

In compliance with the National Environmental Policy Act of 1969 (42 U.S.C. 4321 *et seq.*), an environmental assessment was prepared analyzing the effects of the permitted activities. After a Finding of No Significant Impact, the determination was made that it was not necessary to prepare an environmental impact statement.

Issuance of this permit, as required by the ESA, was based on a finding that such permit: (1) was applied for in good faith; (2) will not operate to the disadvantage of such endangered species; and (3) is consistent with the purposes and policies set forth in section 2 of the ESA.
