

Project ROW, also along Rush Creek. All remaining portions of the Project ROW are located in Zone X, areas determined to be outside the 500-year floodplain. Construction of the Project would not substantially alter the normal drainage patterns or affect runoff rates because drainage patterns would not be altered, use of existing roads would be maximized, and the line would span the floodplains. Even if poles were to be located in a floodplain area, they would not contribute to the impedance of flood flows in this heavily forested area. No wetlands would be affected by the construction or operation of the Project.

Mitigation Action Plan

A MAP will be developed in accordance with 10 CFR 1021.331 that addresses mitigation commitments described above. The MAP will explain how the mitigation will be planned and implemented and will be available upon request.

Decision

Western's decision is to construct the Trinity PUD Direct Interconnection Project as described above and in the EIS. Western will construct, own, operate, and maintain the transmission line and associated facilities.

This decision is based on the information contained in the "Environmental Impact Statement; Trinity Public Utilities District Direct Interconnection Project" (DOE/EIS-0389); (Draft EIS issued February 2007, and Final issued November 2007). This ROD has been prepared in accordance with Council on Environmental Quality regulations for implementing NEPA (40 Code of Federal Regulations [CFR] parts 1500-1508) and DOE Procedures for Implementing NEPA (10 CFR part 1021), and DOE's Floodplain/Wetland Review Requirements (10 CFR 1022). Full implementation of this decision is contingent upon the Project obtaining all applicable permits and approvals.

Dated: January 15, 2008.
