**SUPPLEMENTARY INFORMATION:** The information collected under the requirements of FERC-516A "Small Generator Interconnection Agreements" (OMB No. 1902-2003) is used by the Commission to enforce the statutory provisions of sections 205 and 206 of the Federal Power Act (FPA), as amended by Title II, section 211 of the Public Utility Regulatory Policies Act of 1978 (PURPA) (16 U.S.C. 825d). FPA sections 205 and 206 require the Commission to remedy undue discriminatory practices within interstate electric utility operations.

The Commission amended its regulations in 2005 with Order No. 2006 to require public utilities that own, control, or operate facilities used for the transmission of electric energy in interstate commerce to amend their Open Access Transmission Tariffs (OATTs) to include a Commission-approved *pro forma* interconnection procedures document and a standard interconnection agreement for the interconnection of generating facilities having a capacity of no more than 20 MW (Small Generators).<sup>1</sup>

Prior to Order No. 2006, the Commission's policy had been to address interconnection issues on a case-by-case basis. Although a number of transmission providers had filed interconnection procedures as part of their OATTs, many industry participants remained dissatisfied with existing interconnection policies and procedures. With an increasing number of interconnection-related disputes, it became apparent that the case-by-case approach was an inadequate and inefficient means to address interconnection issues. This prompted the Commission to adopt, in Order No. 2006, a single set of procedures for jurisdictional transmission providers and a single uniformly applicable
