To ensure there are no issues with applicants being able to successfully submit their application, HUD is withdrawing the Adobe application package (COMP ID NN-01) from the *Grants.gov* Web site but leaving the PureEdge package in place. Applicants who have signed up for the *Grants.gov* notification service will be automatically notified when the Adobe package has been removed. Applicants that have not signed up for the notification service should check the *Grants.gov* Web site at [https://apply07.grants.gov/apply/forms\\_apps\\_idx.html](https://apply07.grants.gov/apply/forms_apps_idx.html) for the modification to the announcement posting following publication of this Notice. Applicants must use the PureEdge package; Adobe packages will be rejected. Applicants can download the PureEdge version from the *Grants.gov* Web site at: [https://apply07.grants.gov/apply/forms\\_apps\\_idx.html](https://apply07.grants.gov/apply/forms_apps_idx.html). Applicants who were working with the PureEdge application (Comp ID: NN-PUREEDGE-FORMAT) do not have to download again. Only those working with the Adobe application (Comp ID: NN-0) must download the PureEdge version.

## II. Extension of Deadline Date and Important Resubmission Instructions

HUD is extending the Neighborhood Networks deadline date to March 14, 2008, to provide applicants the opportunity and time to download the PureEdge application, complete the application including all attachments and faxes, and submit the application to *Grants.gov* in time to meet the new deadline date. Applicants that previously submitted a PureEdge application do not have to resubmit a new application, unless they want to add information revising the original submission. Applicants that attempted to submit using Adobe 8.1.1 must download the PureEdge application format and resubmit the application plus all attachments and faxes.

Applicants filing a revised application electronically must also submit a new set of any documents faxed to HUD but should do so only after they submit an entire, complete application to *Grants.gov* and after the applicant receives validation of the application from *Grants.gov*. Applicants should allow 48 hours for validation of their revised application to occur and then resend the faxed material. This process will ensure that the resubmitted faxes are associated with the resubmitted application. Failure to follow these instructions will result in faxes not being associated to the most recent application and therefore not available

to HUD reviewers. HUD will not search previously submitted applications for faxed materials.

#### SUPPLEMENTARY INFORMATION:

Executive Order 13112 on Invasive Species (EO 13112) was issued in 1999 and established the National Invasive Species Council (NISC) which is co-chaired by the Secretaries of the Interior, Agriculture and Commerce. EO 13112 directed the Secretary of the Interior to establish an Invasive Species Advisory Committee (ISAC) composed of diverse nonfederal stakeholders to advise NISC. The broad mission of NISC is to provide planning, coordination and national leadership to prevent and control the harmful impacts of invasive species to the economy, the environment as well as animal and human health.

Section 5 of EO 13112 directed NISC to issue the National Invasive Species Management Plan, as well as to revise and update the Plan on a regular basis. The first version of the National Invasive Species Management Plan, “*Meeting the Challenge*”, was issued in January of 2001 (2001 Plan). The purpose of the Plan was to provide a general blueprint for federal action in coordination with State, local, Tribal, and private programs and international cooperation to prevent the introduction of invasive species, provide for their control and minimize the economic, environmental and human health impacts.

This document is the first revision of the 2001 Plan, as mandated by EO 13112. The *2008–2012 National Invasive Species Management Plan (2008 Plan)* will provide direction for federal efforts (including overall strategy and objectives) to prevent, control and minimize invasive species and their impacts within the next five (5) fiscal years (2008 through 2012). If necessary, it may be updated more frequently to reflect changes in circumstances, agency plans and priorities. NISC member agencies, ISAC members, NISC staff, stakeholders and other experts have provided input in drafting this revision, which is intended to replace the 2001 Plan.

Federal, State, local and Tribal governments, as well as the private sector, have taken significant steps to meet the challenges posed by invasive species. These steps set the stage for the 2008 Plan and provide direction and focus. An estimated 67% of the 2001 Plan’s 57 action items have been completed or are in progress. However significant challenges remain and much remains to be done to prevent and control invasive species in a

coordinated and cost efficient manner. Long-range strategic planning, consistent with other government agencies' strategic plans is necessary to address complex invasive species issues. The 2008 Plan establishes five, long-term Strategic Goals that focus Federal efforts in the areas of invasive species work related to:

- (1) Prevention;
- (2) Early Detection and Rapid Response;
- (3) Control and Management;
- (4) Restoration; and
- (5) Organizational Collaboration.

The Strategic Goals are ongoing and serve as guideposts for managing invasive species. Each Strategic Goal has an associated Strategic Action Plan with long-term Objectives and shorter-term Implementation Tasks and Performance Elements. Where practicable, Implementation Tasks define specific Performance Elements that can be used to gauge progress. Work in Research, Information and Data Management and International Cooperation (which were addressed in separate sections in the 2001 Plan) are elements critical to achieving each of the five Strategic Goals and are included in the pertinent sections of the 2008 Plan.

The 2008 Plan is not a comprehensive list of all Federal invasive species actions. It is a targeted set of priority Strategic Action Plans and Objectives that are intended to be completed in the next five years. The accomplishment of specific Implementation Tasks and Performance Elements will be dependent upon agency budgets, and in some cases, legal or regulatory changes.

Invasive species issues cannot be addressed by Federal programs and actions alone. As reflected in EO 13112, State, local, Tribal and private programs and policies are critical to success. Therefore, receiving public comment on this proposed 2008 Plan is an important component of any strategy to address and reduce the harmful impacts of invasive species.
