Environmental Impact

These final additions to Forest Service Manual (FSM) 2070 would address the use of native plant materials in revegetation, rehabilitation, and restoration projects; and when nonnative, noninvasive species may be used. Section 31.1b of Forest Service Handbook (FSH) 1909.15 (57 FR 43168; September 18, 1992) excludes from documentation in an environmental assessment or impact statement “rules, regulations, or policies to establish Service-wide administrative procedures, program processes, or instruction.” The Agency’s preliminary assessment is that this final action falls within this category of actions, and that no extraordinary circumstances exist as currently defined which would require preparation of an environmental impact statement or environmental assessment. A final determination will be made upon adoption of the final directive.

Federalism

The agency has considered this final directive under the requirements of Executive Order 13132 (August 4, 1999) on federalism. The agency has made an assessment that the final directive conforms with the federalism principles set out in this executive order; would not impose any compliance costs on the States; and would not have substantial direct effects on the States; and would not have substantial direct effects on the relationship between the national government and the States, nor on the distribution of power and responsibilities among the various levels of government. Therefore, the Agency concludes that the final directive does not have federalism implications.

Consultation and Coordination With Indian Tribal Governments

This final directive has been reviewed under Executive Order 13175 (November 6, 2000) on consultation and coordination with Indian tribal governments. This final directive does not have substantial direct effects on one or more Indian tribes, on the relationship between the federal government and Indian tribes, or on the distribution of power and responsibilities between the federal government and Indian tribes. Nor does this final directive impose substantial direct compliance costs on Indian tribal governments or preempt tribal law. Therefore, it has been determined that this final directive does not have tribal implications requiring advance consultation with Indian tribes.

No Takings Implications

This final directive has been analyzed in accordance with the principles and criteria contained in Executive Order 12630 (March 15, 1998) on governmental actions and interference with constitutionally protected property rights. It has been determined that the final directive does not pose the risk of a taking of constitutionally protected private property.

Civil Justice Reform Act

This final action has been reviewed under Executive Order 12988 (February 7, 1996) on civil justice reform. If this final directive were adopted: (1) All State and local laws and regulations that are in conflict with this final directive or which would impede its full implementation would be preempted; (2) no retroactive effect would be given to this final directive; and (3) it would not require administrative proceedings before parties may file suit in court challenging its provisions.

Energy Effects

This final directive has been reviewed under Executive Order 13211 (May 18, 2001) on actions concerning regulations that significantly affect energy supply, distribution, or use. It has been determined that this final directive does not constitute a significant energy action as defined in the Executive Order.

Controlling Paperwork Burdens on the Public

This final directive does not contain any additional recordkeeping or reporting requirements associated with onshore oil and gas exploration and development or other information collection requirements as defined in Title 5 Code of Federal Regulations (CFR), part 1320. Accordingly, the review provisions of the Paperwork Reduction Act of 1995 (44 U.S.C. 3501 et seq.) and its implementing regulations at 5 CFR part 1320 do not apply.

Abigail R. Kimbell,
Chief.

DEPARTMENT OF COMMERCE

Bureau of the Census

[Docket Number 070104002–7796–02]

Census Designated Place (CDP) Program for the 2010 Census—Final Criteria

AGENCY: Bureau of the Census, Commerce.

ACTION: Notice of final criteria and program implementation.

SUMMARY: This Notice announces the Bureau of the Census’ (Census Bureau’s) final criteria for defining census designated places (CDPs) for the 2010 Census. CDPs are statistical geographic entities representing closely settled, unincorporated communities that are locally recognized and identified by name. They are the statistical equivalents of incorporated places, with the primary differences being the lack of both a legally-defined boundary and an active, functioning governmental structure, chartered by the state and administered by elected officials. CDPs defined for the 2010 Census also will be used to tabulate American Community Survey, Puerto Rico Community Survey, Economic Census data after 2010, and potentially data from other Census Bureau censuses and surveys.

In addition to providing final criteria for CDPs, this Notice also contains a summary of comments received in response to proposed criteria published in the April 6, 2007, Federal Register (72 FR 17326), as well as the Census Bureau’s response to those comments.

DATES: This notice’s final criteria will be effective on February 13, 2008.

FOR FURTHER INFORMATION CONTACT: The Geographic Standards and Criteria Branch, Geography Division, U.S. Census Bureau, via e-mail at geo.psap.list@census.gov or telephone at 301–763–3056.

SUPPLEMENTARY INFORMATION:

I. Background

The CDP concept and delineation criteria have evolved over the past five decades in response to data user needs for place-level data. This evolution has taken into account differences in the way in which places were perceived, and the propensity for places to incorporate in various states. The result, over time, has been an increase in the number and types of unincorporated communities identified as CDPs, as well as increasing consistency in the relationship between the CDP concept

1 The term CDP includes comunidades and zonas urbanas in Puerto Rico.
and the kinds of places encompassed by
the incorporated place category, or a
compromise between localized
perceptions of place and a concept that
would be familiar to data users
throughout the United States, Puerto
Rico, and the Island Areas.

Although not as numerous as
incorporated places or municipalities,²
CDPs have been important geographic
entities since their introduction for the
1950 Census. (CDPs were referred to as
“unincorporated places” from 1950
through the 1970 decennial censuses.)

For the 1950 Census, CDPs were defined
only outside urbanized areas and were
required to have at least 1,000 residents.
For the 1960 Census, CDPs could also be
identified inside urbanized areas
outside of New England, but these were
required to have at least 10,000 residents.
The Census Bureau modified the
population threshold within
urbanized areas to 5,000 in 1970,
allowed for CDPs in urbanized areas in
New England in 1980, and lowered the
urbanized area threshold again to 2,500
in 1990. In time, other population
thresholds were adopted for
identification of CDPs in Alaska, as well
as in Puerto Rico, the Island Areas, and
on American Indian reservations.
The Census Bureau eliminated all
population threshold requirements for
Census 2000, achieving consistency
between CDPs and incorporated places,
for which the Census Bureau
historically has published data without
regard to population size.

According to Census 2000, more than
35 million people in the United States,³
Puerto Rico, and the Island Areas ⁴ lived
in CDPs. The relative importance of
CDPs varies from state-to-state,
depending on laws governing municipal
incorporation and annexation, but also
depending on local preferences and
attitudes regarding the identification of
places.

II. Summary of Comments Received in
Response to Proposed Criteria

The April 6, 2007, Federal Register
(72 FR 17326) notice requested
comments on proposed criteria for CDPs.
Specific proposed changes to the Census
2000 included:

• Requiring each CDP to contain, at a
  minimum, some population or housing;
• Eliminating the ability to delineate
  CDPs that were coextensive with
governmental minor civil divisions
(MCDs) in the six New England States,
Michigan, Minnesota, New Jersey, New
York, Pennsylvania, and Wisconsin;
• Eliminating the use of hyphenated
  names for CDPs, except in situations in
which two or more communities have
grown together and share a common
identity.

The Census Bureau received ten
comments related to CDPs. Two
commenters expressed general support
for the proposed criteria. Two
commenters (both from townships in
New Jersey) opposed elimination of
CDPs. It was unclear from their
comments whether they mistook the
Census Bureau’s question regarding
continued identification of census
county divisions as applying to CDPs, or
whether their comments were offered in
response to a separate inquiry from a
township in New Jersey.

The Census Bureau eliminated the
historical practice of treating
townships as places within the Census
Bureau’s geographic area hierarchy.
Treatment of townships as places would
result in the elimination of small CDPs
defined to represent closely settled
communities within townships. Due to
the lack of information, the Census
Bureau did not make any changes to the
criteria.

The Nevada State Demographers’
office commented on the
characterization of CDPs as
unincorporated communities lacking
legally described boundaries, noting that
many CDPs in Nevada are
designated as “special taxation areas”
and as such have legally described
boundaries.⁵ Nevertheless, the Census
Bureau notes that Nevada’s CDPs are not
incorporated as municipalities in the
same sense as cities in that state, and
therefore it is still appropriate to
identify Nevada’s special taxation areas
as CDPs. The Census Bureau will
attempt to provide greater detail in its
documentation and geographic
attributes describing the various kinds
of communities identified as CDPs.

The Census Bureau received two
comments related specifically to the
proposal to reduce the number of
instances in which places were
combined to form a single CDP and
related use of hyphenated names. Both
commenters were from California, and
each noted the negative impact this
proposed criterion might have on the
accurate depiction of unincorporated
communities in California. Both agreed
with the criterion in principle, but
requested that the Census Bureau clarify
when it is acceptable for multiple
communities to be defined as a single
CDP (for instance, when two
communities have grown together to the
extent that it is difficult to discern
where one ends and the other begins)
and when it is not. The example of
Arden-Arcade, California, was cited,
noting that the identities of these once
separate places have become so
intertwined that it is more common to
hear them referred to together, rather
than apart. The Census Bureau agrees
with this comment and will clarify in
both published criteria and program
guidelines when it is acceptable for
multiple communities to be defined as
a single CDP. Multiple communities
may only be combined to form a single
CDP when the identities of these
communities have become so
intertwined that the communities are
commonly perceived and referenced as
a single place, or when there is no
distinguishable or suitable feature in the
landscape that can be used as a
boundary between the communities.

The Census Bureau received three
comments related to the proposal to no
longer allow CDPs in Connecticut,
Maine, Massachusetts, Michigan,
Minnesota, New Hampshire, New
Jersey, New York, Pennsylvania, Rhode
Island, Vermont, and Wisconsin to
be defined as coextensive with
governmentally active MCDs. Each of
the three commenters had extensive
experience working with and analyzing
statistical data for places, MCDs, and
other census geographic areas. One of
the commenters supported the proposal.
Two of the commenters did not support
the proposal, noting that CDPs that are
coeextensive with governmentally active
MCDs represent a relatively small
proportion of all CDPs and MCDs;
therefore, the creation of coextensive,
“whole-town” CDPs does not represent
a substantial problem. Both commenters
noted that since “place” is in general a
rather nuanced concept, with different
meanings to different people, the
Census Bureau should not be overly
restrictive in how it applies its CDP
concept in areas of the United States,
such as the Northeast and Midwest in
which residents commonly perceive
MCDs to be places in the same sense
that residents of other parts of the
country use the term “place.” They
concluded that if the goal of the
proposal was to eliminate redundancy
in place-based data tables for these 12
states, then that goal could be
accomplished within the data tabulation
program without requiring

² Known by various terms throughout the United
States: cities, towns (except in the six New England
States, New York, and Wisconsin); villages, and
boroughs (except in New York and Alaska).
³ For Census Bureau purposes, the United States
includes the fifty states and the District of
Columbia.
⁴ For Census Bureau purposes, the Island Areas
includes the U.S. Virgin Islands, American Samoa,
the Commonwealth of the Northern Mariana
Islands, and Guam. There are no CDPs in American
Samoa because villages cover its entire territory and
population.
⁵ CDPs in Hawaii and zonas urbanas in Puerto
Rico also have legally described boundaries.
modifications to geographic area criteria. The Census Bureau agrees that the elimination of redundant data should be accomplished through changes in the way in which place-level data tables are prepared rather than through changes to the CDP criteria. Therefore, the Census Bureau will review the way in which it presents data for places and MCDs in the states listed above, and seek to eliminate redundancy in place-level data tables through changes in data tabulation policy and procedures.

Changes to the Criteria From the Proposed Rule

The changes made to the final criteria (from the proposed criteria) in “Section II, Census Designated Place Criteria and Characteristics for the 2010 Census,” are as follows:

1. Section II, “Census Designated Place Criteria and Characteristics for the 2010 Census,” added a second paragraph to subsection 1, in response to comments received to clarify the circumstances under which it would be appropriate to combine multiple places to form a single CDP with a hyphenated name. This paragraph provides specific examples of CDPs that encompass multiple communities and are appropriately identified with a hyphenated name. We also have provided several questions for program participants to consider when determining whether to combine multiple communities as a single CDP and how to identify the CDP by name.

2. Section II, “Census Designated Place Criteria and Characteristics for the 2010 Census,” added a section 4. The Census Bureau deleted the criterion in section 4 of the proposed criteria, stating that a CDP may not be coextensive with governmentally functioning MCDs in the 12 “strong-MCD” states: Connecticut, Maine, Massachusetts, Michigan, Minnesota, New Hampshire, New Jersey, New York, Pennsylvania, Rhode Island, Vermont, and Wisconsin. The goal of this proposal was to eliminate redundancy in selected place-level data tables for these states, in which data appear for both the MCD and the coextensive CDP of the same name (for example, Framingham, Massachusetts MCD and Framingham CDP). While this practice occasionally creates confusion on the part of some data users, the number of CDPs that are coextensive with governmentally active MCDs represents a relatively small proportion of all CDPs and MCDs in these states. Further, the concept of “place” is nuanced and varies to some extent from one part of the country to another, and there are instances in which residents of an MCD identify it as a place, in the same sense as places are recognized throughout the country. Rather than adopt a restrictive criterion applicable to only a subset of states, we agreed with the commenters and concluded that the elimination of redundant data could be accomplished through changes in the way in which place-level data tables are prepared rather than through changes to the CDP criteria.

III. Census Designated Place Criteria and Characteristics for the 2010 Census

The criteria contained herein apply to the United States, Puerto Rico, and the Island Areas. In accordance with the final criteria, the Census Bureau may modify and, if necessary, reject any proposals for CDPs that do not meet the established criteria. In addition, the Census Bureau reserves the right to modify the boundaries and attributes of CDPs as needed to maintain geographic relationships before the final tabulation geography is set for the 2010 Census.

The Census Bureau will use the following criteria and characteristics to identify the areas that will qualify for designation as CDPs for use in tabulating data from the 2010 Census, the American Community Survey, the Puerto Rico Community Survey, the Economic Census, and potentially other Census Bureau censuses and surveys.

1. A CDP constitutes a single, closely settled center of population that is named. To the extent possible, individual unincorporated communities should be identified as separate CDPs. Similarly, a single community should be defined as a single CDP rather than multiple CDPs with each part referencing the community name and a directional term (i.e., north, south, east, or west). Since a CDP is defined to provide data for a single named locality, the Census Bureau does not encourage CDPs that comprise a combination of places or identified by hyphenated names. For example, CDPs such as Poplar-Cotton Center and Downieville-Lawson-Dumont are no longer acceptable. Communities were often combined as a single CDP in order to comply with the Census Bureau’s minimum population requirements. The Census Bureau’s elimination of population threshold criteria has made such combinations unnecessary. Other communities were combined because visible features were not available for use as boundaries for separate CDPs. The Census Bureau’s new policy to allow the use of some nonvisible boundaries so that participants can separate individual communities has dispensed with the need to have multiple CDPs.

2. A CDP generally consists of a contiguous cluster of census blocks comprising a single piece of territory and containing a mix of residential and commercial uses similar to that of an incorporated place of similar size. Some CDPs, however, may be predominantly residential; such places should represent recognizably distinct, locally known communities, but not typical suburban subdivisions. Examples of such predominantly residential communities that can be recognized as CDPs are colonias found along the United States-Mexico border, rural communities, and unincorporated resort and retirement communities.
3. A CDP may not be located, either partially or entirely, within an incorporated place or another CDP.
4. A CDP may be located in more than one county but must not cross state boundaries. It is important to note, however, that since county boundaries provide important demarcations for communities, CDPs that cross county lines should be kept to a minimum and identified only when the community clearly sees itself existing on both sides of a county boundary.
5. There are no minimum population or housing unit thresholds for defining CDPs; however, a CDP must contain some population or housing units or both. The Census Bureau recognizes that some communities, such as a resort or other kinds of seasonal communities, may lack population at certain times of the year. Nevertheless, there should be some evidence, generally in the form of houses, barracks, dormitories, commercial buildings and/or other structures, providing the basis for local perception’s existence. For the 2010 Census, the Census Bureau will not accept a CDP delineated with zero population and zero housing units. The Census Bureau will review the number of housing units within the place, as reported in the previous decennial census, and consider whether additional information is needed before recognizing the CDP. Participants submitting boundaries for places with less than ten housing units may be asked to provide additional information attesting to the existence of the CDP. CDP boundaries should follow visible features, except in those circumstances when a CDP’s boundary is coincident with the nonvisible boundary of a state, county, MCD (in the six New England states, Michigan, Minnesota, New Jersey, New York, Pennsylvania, and Wisconsin), or incorporated place. CDP boundaries may follow other nonvisible features in instances where reliance upon visible features will result in overbounding of the CDP in order to include housing units on both sides of a road or street feature. Such boundaries might include parcel boundaries and public land survey system lines; fence lines; national, state, or local park boundaries; ridgelines; or drainage ditches.
6. The CDP name should be one that is recognized and used in daily communication by the residents of the community. Because unincorporated communities generally lack legally defined boundaries, a commonly used community name and the geographic extent of the local residents is often the best identifier of the extent of a place, the assumption being that if residents associate with a particular name and use it to identify the place in which they live, then the CDP’s boundaries can be mapped based on the use of the name. There should be features in the landscape that use the name, such that a non-resident would have a general sense of the location or extent of the community; for example, signs indicating when one is entering the community; highway exit signs that use the name; or businesses, schools, or other buildings that make use of the name. It should not be a name developed solely for planning or other purposes (including simply to obtain data from the Census Bureau) that is not in regular daily use by the local residents and business establishments.
7. A CDP may not have the same name as an adjacent or nearby incorporated place. If the community does not have a name that distinguishes it from other nearby communities, then the community is not a distinct place. The use of directional terms (“north,” “south,” “east,” “west,” and so forth) to differentiate the name of a CDP from a nearby municipality where this name is not in local use is not acceptable. For example, the name “North Laurel” would be permitted if this name were in local use. The name “Laurel North” would not be permitted if it were not in local use. Again, this has much to do with the way in which people typically refer to the places in which they live. It is permissible to change the name of a 2000 CDP for the 2010 Census if the new name provides a better identification of the community.

IV. Definitions of Key Terms

Alaska Native regional corporation (ANRC)—A corporate geographic area established under the Alaska Native Claims Settlement Act (Public Law 92–203) to conduct both the business and nonprofit affairs of Alaska Natives. Twelve ANRCs cover the state of Alaska, except for the Annette Island Reserve.

American Indian reservation (AIR)—A federally recognized American Indian land area with boundaries established by final treaty, statute, executive order, and/or court order, and over which a federally recognized American Indian tribal government has governmental authority. Along with reservations, designations such as colonies, communities, pueblos, rancherias, and reserves apply to AIRs.

Census block—A geographic area bounded by visible and/or invisible features shown on a map prepared by the Census Bureau. A block is the smallest geographic entity for which the Census Bureau tabulates decennial census data.

Coextensive—Descriptive of two or more geographic entities that cover exactly the same area, with all boundaries shared.

Comunidad—A census designated place in Puerto Rico that is not related to a municipio’s seat of government, called an aldea or a ciudad prior to the 1990 Census.

Contiguous—Descriptive of geographic areas that are adjacent to one another, sharing either a common boundary or point of contact.

Housing unit—A house, an apartment, a mobile home or trailer, or a group of rooms or a single room occupied as a separate living quarter or, if vacant, intended for occupancy as a separate living quarter. Separate living quarters are those in which the occupants live and eat separately from any other residents of the building and which have direct access from outside the building or through a common hall.

Incorporated place—A type of governmental unit established to provide governmental services for a concentration of people within legally prescribed boundaries, incorporated under state law as a city, town (except in New England, New York, and Wisconsin), borough (except in Alaska and New York), village, or other description.

Island areas—An entity, other than a state or the District of Columbia, under the jurisdiction of the United States. For the 2010 Census, these will include American Samoa, Guam, the Commonwealth of the Northern Mariana Islands, the U.S. Virgin Islands, and several small islands in the Caribbean Sea and the Pacific Ocean. The Census Bureau treats each Island Territory as the statistical equivalent of a state.

Minor civil division—The primary governmental or administrative division of a county in 28 states, Puerto Rico, and the Island Areas having legal boundaries, names, and descriptions. MCDs represent many different types of legal entities with a wide variety of characteristics, powers, and functions depending on the state and type of MCD. In some states, some or all of the incorporated places also constitute MCDs.

Municipio—A type of governmental unit that is the primary legal subdivision of Puerto Rico. The Census Bureau treats the municipio as the statistical equivalent of a county.

Nonvisible feature—A map feature that is not visible, such as a city or county boundary, a property line running through space, a short...
imaginary extension of a street or road, or a point-to-point line.

Statistical geographic entity—A geographic entity that is specially defined and delineated, such as block group, CDP, or census tract, so that the Census Bureau may tabulate data for it. Designation as a statistical entity neither conveys nor confers legal ownership, entitlement, or jurisdictional authority.

Urbanized area (UA)—An area consisting of a central place(s) and adjacent urban fringe that together have a minimum residential population of at least 50,000 people and generally an overall population density of at least 1,000 people per square mile. The Census Bureau uses published criteria to determine the qualification and boundaries of UAs at the time of each decennial census or from the results of a special census during the intercensal period.

Visible feature—A map feature that can be seen on the ground, such as a road, railroad track, major above-ground transmission line or pipeline, stream, shoreline, fence, sharply defined mountain ridge, or cliff. A nonstandard visible feature is a feature that may not be clearly defined on the ground (such as a ridge), may be seasonal (such as an intermittent stream), or may be relatively impermanent (such as a fence). The Census Bureau generally requests verification that nonstandard features pose no problem in their location during field work.

Zona urbana—In Puerto Rico, the settled area functioning as the seat of government for a municipio. A zona urbana cannot cross a municipio boundary.

Executive Order 12866

This notice has been determined to be not significant under Executive Order 12866.

Paperwork Reduction Act

This program notice does not represent a collection of information subject to the requirements of the Paperwork Reduction Act, 44 U.S.C., Chapter 35.

DEPARTMENT OF COMMERCE

International Trade Administration
[A–570–890]

Wooden Bedroom Furniture From the People’s Republic of China: Preliminary Results of Antidumping Duty Administrative Review, Preliminary Results of New Shipper Review and Partial Rescission of Administrative Review

AGENCY: Import Administration, International Trade Administration, Department of Commerce.

SUMMARY: In response to requests from interested parties, the Department of Commerce (“the Department”) is conducting an administrative review of the antidumping duty order on wooden bedroom furniture from the People’s Republic of China (“PRC”). The period of review (“POR”) for this administrative review is January 1, 2006, through December 31, 2006. This administrative review covers multiple producers/exporters of the subject merchandise, three of which are being individually investigated as mandatory respondents. The Department is also conducting a new shipper review for an exporter/producer. The POR for the new shipper review is also January 1, 2006, through December 31, 2006.

We preliminarily determine that all three mandatory respondents in the administrative review made sales in the United States at prices below normal value (“NV”). With respect to the remaining respondents in the administrative review (hereinafter collectively referred to as the Separate-Rate Applicants), we preliminarily determine that 30 entities have provided sufficient evidence that they are separate from the state-controlled entity, and we have established a weighted-average margin based on the rates we have calculated for the three mandatory respondents, excluding any rates that are zero, de minimis, or based entirely on adverse facts available, to be applied to these separate rate entities. In addition, we have determined to rescind the review with respect to three entities in this administrative review. See “Partial Rescission” section below. Further, we preliminarily determine that the remaining separate-rate applicants have not demonstrated that they are entitled to a separate rate, and will thus be considered part of the PRC entity. Finally, we preliminarily determine that the new shipper made sales in the United States at prices below normal value. If these preliminary results are adopted in our final results of review, we will instruct U.S. Customs and Border Protection (“CBP”) to assess antidumping duties on entries of subject merchandise during the POR for which the importer-specific assessment rates are above de minimis.

We invite interested parties to comment on these preliminary results. Parties who submit comments are requested to submit with each argument a statement of the issue and a brief summary of the argument. We intend to issue the final results of this review no later than 120 days from the date of publication of this notice.

FOR FURTHER INFORMATION CONTACT: Paul Stolz or Hua Lu, AD/CVD Operations, Office 8, Import Administration, International Trade Administration, U.S. Department of Commerce, 14th Street and Constitution Avenue, NW., Washington, DC 20230; telephone: (202) 482–4474 and (202) 482–6478, respectively.

Background

On January 4, 2005, the Department published in the Federal Register the antidumping duty order on wooden bedroom furniture from the PRC. See Notice of Amended Final Determination of Sales at Less Than Fair Value and Antidumping Duty Order: Wooden Bedroom Furniture from the People’s Republic of China, 70 FR 329 (January 4, 2005). On January 3, 2007, the Department published a notice of opportunity to request an administrative review of the antidumping duty order on wooden bedroom furniture from the PRC for the period January 1, 2006, through December 31, 2006. See Antidumping or Countervailing Duty Order, Finding, or Suspended Investigation: Opportunity to Request Administrative Review, 72 FR 99 (January 3, 2007). On March 7, 2007, the Department initiated the second administrative review of the antidumping duty order on wooden bedroom furniture from the PRC. See Notice of Initiation of Administrative Review of the Antidumping Duty Order on Wooden Bedroom Furniture from the People’s Republic of China, 72 FR 10159 (March 7, 2007) (“Initiation Notice”). Additionally, on March 7, 2007, the Department initiated new shipper reviews of the order with respect to the following two companies: Golden Well Furniture International (HK), Ltd. (“Golden Well”) and its supplier Zhangzhou XYM Furniture Product Co., Ltd. and Mei Jia Ju Furniture Industry (Shenzhen) Co., Ltd. (“Mei Jia Ju”). See Notice of Initiation of New Shipper Reviews on Wooden Bedroom Furniture from the
