[EPA-HQ-OEI-2008-0133; FRL-8533-4]

Office of Environmental Information; Announcement of Availability and Comment Period for Revised Enforcement and Compliance and Tribal Identifier Data Standards**AGENCY:** Environmental Protection Agency.**ACTION:** Notice of data availability & request for comment.

SUMMARY: Notice of availability for a 30 day review and comment period is hereby given for two revised data standards—(1) *Enforcement and Compliance Data Standard* and (2) *Tribal Identifier Data Standard*. The Enforcement and Compliance Data Standard identifies and defines the major areas of enforcement and compliance information that could be used for the exchange of data among environmental agencies and other entities. The purpose of the standard is to provide a common lexicon, so that information about functionally similar activities and/or instruments can be stored.

The Tribal Identifier Data Standard specifies the set of tribal names and codes necessary to constitute consistent and unambiguous identification of federally-recognized American Indian and Alaska Native entities. The Tribal Identifier Standard adopted the Bureau of Indian Affairs criteria of tribal entity identification (federally recognized tribes) and is not intended for the identification of geographic, demographic or economic tribal areas. The Bureau of Indian Affairs (BIA), is responsible for maintaining the official list of tribal names and codes according to their established criteria. This standard assists and supports the development of computerized applications that use tribal identifier information.

SUPPLEMENTARY INFORMATION: Standards are intended for use in environmental data exchanges among States, Tribal entities and U.S. EPA. They are not meant to dictate or limit data an agency chooses to collect for its own internal purposes. Adoption of a data standard should not be interpreted to mean that revisions to databases or information systems are required. What the adoption does mean is that formats for sharing data with Exchange Network (EN) partners will change because the Exchange Network has adopted Shared Schema Components (SSCs) based on the data standards. The SSCs are available on the Exchange Network web site at: <http://www.exchange-network.net>.

The revised data standards are available through the Docket system as indicated above and at <http://www.exchangenetwork.net/standards>.
