SUPPLEMENTARY INFORMATION:

Title: Recreation Visitor Use Surveys.

Abstract: The Bureau of Reclamation is responsible for recreation development at all of its reservoirs. Presently there are 300 designated recreation areas on our lands within the 17 Western States hosting almost 90 million visitors annually. Visitation to our reservoirs is increasing at an average rate of 1.2 million visitors per year, and more than 100 million people are projected to visit our reservoirs by the early twenty-first century. We must be able to respond to emerging trends, changes in the demographic profile of users, changing values, needs, wants, and desires, and conflicts between user groups. Statistically valid and up-to-date data derived from the user is essential to developing and providing recreation programs relevant to today's visitor.

The required 60-day comment period was initiated by a notice published in the **Federal Register** on March 5, 2007 (72 FR 9775). No comments were received in response to the 60-day comment period.

Frequency: One time survey.

Respondents: Respondents to the surveys will be members of the public engaged in recreational activities on our lands. The surveys target people engaged in specific activities such as boating on a specific lake/river, or people camping at a developed campground. Visitors will primarily consist of local residents, people from large metropolitan areas in the vicinity of the lake/river, and visitors from out of state.

Estimated Total Number of Respondents: 7,350.

Estimated Number of Responses per Respondent: 1.0.

Estimated Total Number of Annual Responses: 7,350.

Estimate Total Annual Burden on Respondents: 2,059.

In addition to calculating the annual hour burden for respondents, we have calculated that the annual hour burden for the estimated 1,850 non-respondents (i.e., those individuals who receive a survey, but do not wish to fill it out for one reason or another) is 15 hours. Therefore, the total annual hour burden to the public is 2074.
