Any person desiring to intervene or to protest in any of the above proceedings must file in accordance with Rules 211 and 214 of the Commission's Rules of Practice and Procedure (18 CFR 385.211 and 385.214) on or before 5 p.m. Eastern time on the specified comment date. It is not necessary to separately intervene again in a subdocket related to a compliance filing if you have previously intervened in the same docket. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Anyone filing a motion to intervene or protest must serve a copy of that document on the Applicant. In reference to filings initiating a new proceeding, interventions or protests submitted on or before the comment deadline need not be served on persons other than the Applicant.

The Commission encourages electronic submission of protests and interventions in lieu of paper, using the FERC Online links at <http://www.ferc.gov>. To facilitate electronic service, persons with Internet access who will eFile a document and/or be listed as a contact for an intervenor must create and validate an eRegistration account using the eRegistration link. Select the eFiling link to log on and submit the intervention or protests.

Persons unable to file electronically should submit an original and 14 copies of the intervention or protest to the

Federal Energy Regulatory Commission, 888 First St., NE., Washington, DC 20426.

The filings in the above proceedings are accessible in the Commission's eLibrary system by clicking on the appropriate link in the above list. They are also available for review in the Commission's Public Reference Room in Washington, DC. There is an eSubscription link on the Web site that enables subscribers to receive e-mail notification when a document is added to a subscribed docket(s). #### Niagara Mohawk Power Corporation; Notice of Filing

February 21, 2008.

Take notice that on February 13, 2008, Niagara Mohawk Power Corporation d/b/a National Grid pursuant to Rule 207 of the Rules of Practice and Procedure of the Federal Energy Regulatory Commission filed a Petition for Declaratory Order. National Grid requests that the Commission issue a declaratory order directing the NYISO to revise the invoices for energy purchased in the NYISO market between March and August 2005 to eliminate the impact of late-introduced and erroneous consumption data that appeared late in the invoicing cycle.

Any person desiring to intervene or to protest this filing must file in accordance with Rules 211 and 214 of the Commission's Rules of Practice and Procedure (18 CFR 385.211, 385.214). Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Any person wishing to become a party must file a notice of intervention or motion to intervene, as appropriate. Such notices, motions, or protests must be filed on or before the comment date. On or before the comment date, it is not necessary to serve motions to intervene or protests on persons other than the Applicant.

The Commission encourages electronic submission of protests and interventions in lieu of paper using the "eFiling" link at <http://www.ferc.gov>. Persons unable to file electronically should submit an original and 14 copies of the protest or intervention to the Federal Energy Regulatory Commission, 888 First Street, NE., Washington, DC 20426.

This filing is accessible on-line at <http://www.ferc.gov>, using the "eLibrary" link and is available for review in the Commission's Public Reference Room in Washington, DC. [Docket No. PF08-6-000]

#### Columbia Gas Transmission; Notice of Intent To Prepare an Environmental Assessment for the Planned Ohio Storage Expansion Project and Request for Comments on Environmental Issues

February 22, 2008.

The staff of the Federal Energy Regulatory Commission (FERC or Commission) will prepare an environmental assessment (EA) that will discuss the potential environmental impacts of the Ohio Storage Expansion Project, involving construction and operation of natural gas facilities by Columbia Gas Transmission (Columbia) in Ashland, Fairfield, Hocking, and Holmes Counties, Ohio. The EA will be used by the Commission in its decision-making process to determine whether the project is in the public convenience and necessity.

This notice announces the opening of the scoping period that will be used to gather environmental input from the public and interested agencies on the project. Your input will help the

Commission staff determine which issues need to be evaluated in the EA. Please note that the scoping period will close on April 7, 2008. Instructions on how to submit comments are provided in the Public Participation section of this notice.

If you are a landowner receiving this notice, you may be contacted by a Columbia representative about the acquisition of an easement to construct, operate, and maintain the planned project facilities. The pipeline company would seek to negotiate a mutually acceptable agreement. However, if the project is approved by the Commission, that approval conveys with it the right of eminent domain. Therefore, if easement negotiations fail to produce an agreement, Columbia could initiate condemnation proceedings in accordance with Ohio state law.

A fact sheet prepared by the FERC entitled "An Interstate Natural Gas Facility on My Land? What Do I Need to Know?" addresses a number of typically asked questions, including the use of eminent domain and how to participate in the Commission's proceedings. It is available for viewing on the FERC Internet Web site (<http://www.ferc.gov>).

With this notice, we<sup>1</sup> are inviting other Federal, State, local, and tribal agencies with jurisdiction and/or special expertise with respect to environmental issues to cooperate with us in the preparation of the EA. Agencies that would like to request cooperating status should follow the instructions for filing comments provided below.

#### Summary of the Proposed Project

Within the Crawford Storage Field (Fairfield and Hocking Counties, Ohio), Columbia seeks authorization to:

- Construct 16 new storage wells;
- Convert 11 existing counter storage wells to active storage wells;
- Convert 10 existing observation wells to counter or active storage wells;
- Convert 2 high pressure wells to counter storage wells;
- Purchase 6 production wells and convert to storage wells;
- Install 13.6 miles of interconnecting pipeline; and
- Make minor modifications at Columbia's Crawford Compressor Station.

Within the Weaver Storage Field (Ashland and Holmes Counties, Ohio), Columbia seeks authorization to:

- Construct 4.1 miles of field storage pipeline;

- Replace 1.7 miles of field storage pipeline;
- enhance the deliverability work on 26 existing storage wells;
- Install one gate valve setting;
- Install a measurement station; and
- Install a regulation station.

The storage project would provide an additional 103,400 dekatherms per day of storage deliverability for service in the eastern United States. Appendix A presents detailed maps identifying all facilities associated with this project.<sup>2</sup>

#### Land Requirements for Construction

For new well installation, Columbia would disturb a 400-foot-square. For reconditioned wells, a 300-foot-square would be necessary. Columbia plans to use between a 50-foot and 70-foot-wide construction right-of-way for installation of its pipelines (ranging from 4 to 10 inches in diameter). Based on preliminary information, construction of the pipelines and storage facilities would disturb about 359 acres of land. Following construction, about 331 acres would be maintained as permanent right-of-way. The remaining temporary workspace would be restored and allowed to revert to its former use.

#### The EA Process

We are preparing this EA to comply with the National Environmental Policy Act of 1969 (NEPA) which requires the Commission to take into account the environmental impacts that could result from an action whenever it considers the issuance of a Certificate of Public Convenience and Necessity. NEPA also requires us to discover and address concerns the public may have about proposals. This process is referred to as "scoping." The main goal of the scoping process is to focus the analysis in the EA on the important environmental issues. By this notice, we are requesting public comments on the scope of the issues to be addressed in the EA. All comments received will be considered during the preparation of the EA. As part of our Pre-Filing review, Columbia previously sponsored public open houses in the project areas to explain its project, the environmental review process, and take comments about the
