What Information Is EPA Particularly Interested in?

Pursuant to section 3506(c)(2)(A) of the PRA, EPA specifically solicits comments and information to enable it to:

- (i) Evaluate whether the proposed collection of information is necessary for the proper performance of the functions of the Agency, including whether the information will have practical utility;
- (ii) Evaluate the accuracy of the Agency's estimate of the burden of the proposed collection of information, including the validity of the methodology and assumptions used;
- (iii) Enhance the quality, utility, and clarity of the information to be collected; and
- (iv) Minimize the burden of the collection of information on those who are to respond, including through the use of appropriate automated electronic, mechanical, or other technological collection techniques or other forms of information technology, e.g., permitting electronic submission of responses. In particular, EPA is requesting comments from very small businesses (those that employ less than 25) on examples of specific additional efforts that EPA could make to reduce the paperwork burden for very small businesses affected by this collection.

What Should I Consider When I Prepare My Comments for EPA?

You may find the following suggestions helpful for preparing your comments:

1. Explain your views as clearly as possible and provide specific examples.
 2. Describe any assumptions that you used.
 3. Provide copies of any technical information and/or data you used that support your views.
 4. If you estimate potential burden or costs, explain how you arrived at the estimate that you provide.
 5. Offer alternative ways to improve the collection activity.
6. Make sure to submit your comments by the deadline identified under **DATES**.
 7. To ensure proper receipt by EPA, be sure to identify the docket ID number assigned to this action in the subject line on the first page of your response. You may also provide the name, date, and **Federal Register** citation.

What Information Collection Activity or ICR Does This Apply to?

Affected entities: Entities potentially affected by this action are State environmental and health agencies.

Title: EPA Strategic Plan Information on Source Water Protection.

ICR numbers: EPA ICR No. 1816.04, OMB Control No. 2040-0197.

ICR status: This ICR is currently scheduled to expire on June 30, 2008. An Agency may not conduct or sponsor, and a person is not required to respond to, a collection of information, unless it displays a currently valid OMB control number. The OMB control numbers for EPA's regulations in title 40 of the CFR, after appearing in the **Federal Register** when approved, are listed in 40 CFR part 9, are displayed either by publication in the **Federal Register** or by other appropriate means, such as on the related collection instrument or form, if applicable. The display of OMB control numbers in certain EPA regulations is consolidated in 40 CFR part 9.

Abstract: States were allowed 18 months to submit a Source Water Assessment Program to EPA (Section 1453(a)(3) of the Safe Drinking Water Act) after the national guidance on State Source Water Assessment and Protection Programs was issued on August 5, 1997. Once the State Programs were approved by EPA, source water assessments of public water systems were conducted and completed within the required three and a half years after approval. Previous ICRs have included calculations of the burden and cost estimates related to the remaining assessment work.

The EPA Strategic Plan (2006–2011; <http://www.epa.gov/ocfo/plan/plan.htm>) provides an overview of the voluntary programs and measures taken by States to ensure minimal health risks to the public by protecting source water and preventing contamination. The information collection request supports the EPA Strategic Plan by gathering information on protective actions for sources of water used for public water supplies, and to measure progress towards the Strategic Target SP-4—public health risks minimized in 50% of community water systems and the related 62% of the population served by

those community water systems by 2011.

EPA is collecting data from States, on a voluntary basis, concerning the number of community water systems (CWS) in localities that have substantially implemented source water protection programs according to that State's definition, and the population served by those community water systems. The Safe Drinking Water Act, while authorizing the generation of this data, does not require the implementation of source water protection programs by States. Section 1452 of the Safe Drinking Water Act allows the use of Drinking Water State Revolving Fund monies for support efforts in the information collection.

Burden Statement: The annual public reporting and recordkeeping burden for this collection of information is estimated to average 20 hours per annual response for each respondent, or 3,120 hours over the next three years of the information collection. Burden means the total time, effort, or financial resources expended by persons to generate, maintain, retain, or disclose or provide information to or for a Federal agency. This includes the time needed to review instructions; develop, acquire, install, and utilize technology and systems for the purposes of collecting, validating, and verifying information, processing and maintaining information, and disclosing and providing information; adjust the existing ways to comply with any previously applicable instructions and requirements which have subsequently changed; train personnel to be able to respond to a collection of information; search data sources; complete and review the collection of information; and transmit or otherwise disclose the information.

The ICR provides a detailed explanation of the Agency's estimate, which is only briefly summarized here:

Estimated total number of potential respondents: 52.

Frequency of response: annual.

Estimated total average number of responses for each respondent: 1.

Estimated total annual burden hours: 1,040.

Estimated total annual costs: \$786,676. This includes an estimated burden cost of \$38,419 and an estimated cost of \$748,257 for capital investment or maintenance and operational costs.

Are There Changes in the Estimates From the Last Approval?

There is a decrease of 3,172 hours in the total estimated annual respondent burden compared with that identified in the ICR currently approved by OMB.

This decrease reflects the fact that EPA is collecting less information from States under this collection than in earlier collections. Specifically, the 2004 ICR included the burden associated with reporting on the status of completing source water assessments and on the most prevalent and most threatening sources of contamination. EPA is no longer requesting this information because the assessments were completed in 2003, and contamination threats are not considered to have significantly changed since the previous ICR.

What Is the Next Step in the Process for This ICR?

EPA will consider the comments received and amend the ICR as appropriate. The final ICR package will then be submitted to OMB for review and approval pursuant to 5 CFR 1320.12. At that time, EPA will issue another **Federal Register** notice pursuant to 5 CFR 1320.5(a)(1)(iv) to announce the submission of the ICR to OMB and the opportunity to submit additional comments to OMB. If you have any questions about this ICR or the approval process, please contact the technical person listed under **FOR FURTHER INFORMATION CONTACT**.

Dated: February 21, 2008.

Director, Office of Ground Water & Drinking Water.
