The RP/EAS describes a habitat restoration alternative agreed to in the natural resource damages settlement between KUCC and the Trustee, based on evaluation of several restoration alternatives. The preferred alternative consists of the restoration of a total of 249 hectares (616 acres) of land at the Lakepoint Wetland site through acquisition and preservation into perpetuity of land and water rights, habitat and waterway improvement, and other actions described within the RP/EAS. These actions will compensate for injuries to natural resources, including migratory birds, and migratory bird habitat.
