

protection of U.S. oceans and coastal resources by developing a national system of marine protected areas. The Departments of Commerce and the Interior plan to work closely with state, territorial, local, and tribal governments, as well as other stakeholders, to identify and inventory the Nation's existing marine protected areas. Toward this end, the National Oceanic and Atmospheric Administration (NOAA) and DOI have created a data form, available on a password-protected Web site, to be used as a survey tool to collect and analyze information on these existing sites. This survey will allow NOAA and DOI to better understand the existing protections for marine resources within marine protected areas in the United States. This information also would support activities on marine protected areas by state and local governments, tribes, and other interested parties. The survey contains directed questions regarding the location, management and enforcement authorities, types of protections and restrictions, and the length of time those protections or restrictions are in place for each marine protected area. Basic information about the resources and activities at the sites will also be collected. It is expected that site managers from each marine protected area will fill out the survey. The collected information will be housed in a searchable database that will be made available to the public via the marine protected area Web site at mpa.gov. The survey has been used for the last six years and this notice proposes to extend the data collection OMB approval.
