DEPARTMENT OF THE INTERIOR

Bureau of Reclamation

Quarterly Status Report of Water Service, Repayment, and Other Water-Related Contract Negotiations

AGENCY: Bureau of Reclamation, Interior.

ACTION: Notice.

SUMMARY: Notice is hereby given of contractual actions that have been proposed to the Bureau of Reclamation (Reclamation) and were pending through December 31, 2007, and contract actions that have been completed or discontinued since the last publication of this notice on November 30, 2007. From the date of this publication, future quarterly notices during this calendar year will be limited to new, modified, discontinued, or completed contract actions. This annual notice should be used as a point of

reference to identify changes in future notices. This notice is one of a variety of means used to inform the public about proposed contractual actions for capital recovery and management of project resources and facilities consistent with section 9(f) of the Reclamation Project Act of 1939. Additional announcements of individual contract actions may be published in the **Federal Register** and in newspapers of general circulation in the areas determined by Reclamation to be affected by the proposed action.

ADDRESSES: The identity of the approving officer and other information pertaining to a specific contract proposal may be obtained by calling or writing the appropriate regional office at the address and telephone number given for each region in the **SUPPLEMENTARY INFORMATION** section.

FOR FURTHER INFORMATION CONTACT: Michelle Kelly, Contract Services Office, Bureau of Reclamation, PO Box 25007, Denver, Colorado 80225-0007; telephone 303-445-2888.

SUPPLEMENTARY INFORMATION: Consistent with section 9(f) of the Reclamation Project Act of 1939 and the rules and regulations published in 52 FR 11954, April 13, 1987 (43 CFR 426.22), Reclamation will publish notice of proposed or amendatory contract actions for any contract for the delivery of project water for authorized uses in newspapers of general circulation in the affected area at least 60 days prior to contract execution. Announcements may be in the form of news releases,

legal notices, official letters, memorandums, or other forms of written material. Meetings, workshops, and/or hearings may also be used, as appropriate, to provide local publicity. The public participation procedures do not apply to proposed contracts for the sale of surplus or interim irrigation water for a term of 1 year or less. Either of the contracting parties may invite the public to observe contract proceedings. All public participation procedures will be coordinated with those involved in complying with the National Environmental Policy Act. Pursuant to the "Final Revised Public Participation Procedures" for water resource-related contract negotiations, published in 47 FR 7763, February 22, 1982, a tabulation is provided of all proposed contractual actions in each of the five Reclamation regions. When contract negotiations are completed, and prior to execution, each proposed contract form must be approved by the Secretary of the Interior, or pursuant to delegated or redelegated authority, the Commissioner of Reclamation or one of the regional directors. In some instances, congressional review and approval of a report, water rate, or other terms and conditions of the contract may be involved.

Public participation in and receipt of comments on contract proposals will be facilitated by adherence to the following procedures:

1. Only persons authorized to act on behalf of the contracting entities may negotiate the terms and conditions of a specific contract proposal.

2. Advance notice of meetings or hearings will be furnished to those parties that have made a timely written request for such notice to the appropriate regional or project office of Reclamation.

3. Written correspondence regarding proposed contracts may be made available to the general public pursuant to the terms and procedures of the Freedom of Information Act, as amended.

4. Written comments on a proposed contract or contract action must be submitted to the appropriate regional officials at the locations and within the time limits set forth in the advance public notices.

5. All written comments received and testimony presented at any public hearings will be reviewed and summarized by the appropriate regional office for use by the contract approving authority.

6. Copies of specific proposed contracts may be obtained from the appropriate regional director or his designated public contact as they become available for review and comment.

7. In the event modifications are made in the form of a proposed contract, the appropriate regional director shall determine whether republication of the notice and/or extension of the comment period is necessary.

Factors considered in making such a determination shall include, but are not limited to (i) the significance of the modification, and (ii) the degree of public interest which has been expressed over the course of the negotiations. At a minimum, the regional director shall furnish revised contracts to all parties who requested the contract in response to the initial public notice.

BILLING CODE 4310-MN-P

INTERNATIONAL BOUNDARY AND WATER COMMISSION; UNITED STATES AND MEXICO

United States Section; Final Programmatic Environmental Impact Statement for Long-Term Improvements to the USIBWC Rio Grande Flood Control Projects Along the Texas-Mexico Border

AGENCY: United States Section, International Boundary and Water Commission (USIBWC).

ACTION: Notice of availability for the record of decision (ROD).

SUMMARY: This notice is provided in accordance with 40 Code of Federal Regulations (CFR) parts 1500-1508 of the National Environmental Policy Act (NEPA), and USIBWC procedures for implementing NEPA. The USIBWC anticipates the need to improve functionality of three flood control projects located in the Rio Grande along the Texas-Mexico border. Potential improvement measures are mainly associated with the project core mission of flood protection, boundary stabilization, and water delivery. Additional measures under consideration are intended to improve water use, quality, and conservation, as well as measures supporting local or regional initiatives for multipurpose use of the projects for wildlife habitat development, and improved environmental conditions.

A Programmatic Environmental Impact Statement (PEIS) was prepared to evaluate potential consequences of three action alternatives under consideration for long-term improvement of the flood control projects. The USIBWC will apply the programmatic evaluation as an overall guidance for future evaluations of individual projects, including both

those currently envisioned at a conceptual level and those whose implementation is not currently anticipated but would be possible within a 20-year timeframe.

The Multipurpose Project Management Alternative was adopted among the three action alternatives as the preferred option for long-term improvements to the Rio Grande flood control projects. In implementing the preferred alternative, the USIBWC will continue to improve functionality of the flood control projects to meet its mandate for flood control, water delivery, and boundary stabilization, while supporting initiatives for improvement of environmental conditions and water resources utilization.

FOR FURTHER INFORMATION CONTACT: Mr. Daniel Borunda, Environmental Protection Specialist, Environmental Management Division, USIBWC, 4171 North Mesa Street, C-100, El Paso, Texas 79902 or e-mail: danielborunda@ibwc.state.gov.

SUPPLEMENTARY INFORMATION: The USIBWC anticipates the need to improve capabilities or functionality of three flood control projects (FCP) located in the Rio Grande along the Texas-Mexico border: The Rectification FCP, extending 84.4 miles along the Rio Grande, downstream from American Diversion Dam in El Paso to Fort Quitman, Texas; the Presidio-Ojinaga FCP extending over 13.1 river miles of the Rio Grande near Presidio, Texas; and the Lower Rio Grande FCP that extends 186 river miles on the Rio Grande, from Peñitas, Texas to the Gulf of Mexico, and includes 120 miles of interior floodways. These projects were constructed to provide flood protection in urban, suburban, and agricultural areas in the United States and Mexico, facilitate water delivery, and stabilize the international river boundary.

Measures identified for potential implementation were organized into three action alternatives focusing on improvements in operation and maintenance (O&M) practices and project functionality; improvements in water quality and water utilization; and additional measures for multipurpose use of the projects beyond their core mission of flood control, water delivery and boundary preservation.

Multipurpose use would include regional initiatives for improvement of habitat and environmental conditions proposed by federal agencies, local governments, and other organizations.

The USIBWC prepared a Programmatic Environmental Impact Statement, in cooperation with the

United States Bureau of Reclamation, United States Fish and Wildlife Service, and United States Army Corps of Engineers, to analyze potential effects of three action alternatives for improvement of the three Rio Grande FCPs. The programmatic evaluation will be used as an overall guidance for evaluation of future improvement projects, both those already identified at a conceptual level or those whose implementation is possible within a 20-year timeframe. Once an improvement project is developed for implementation, site-specific environmental documentation will be prepared on the basis of PEIS findings and project specifications.

A Draft PEIS was released for a 45-day public review period on August 10, 2007. Nineteen responses were received during the review period, ten from regulatory agencies, six from various organizations, and three from individual reviewers. Oral comments were also received from 12 presenters during public hearings held in the Cities of El Paso, Presidio, and McAllen, Texas on August 21, 22 and 28, 2007, respectively. The Notice of Availability of the Final PEIS was published in the **Federal Register** by the Environmental Protection Agency on January 4, 2008.

Finding: Because of its potential to improve flood control and water resources management, as well as a greater potential for improvement of biological resources and environmental conditions, the MPM Alternative was identified as the preferred option for long-term improvements to the Rectification FCP, Presidio FCP, and Lower Rio Grande FCP. In implementing this alternative, the USIBWC will continue to improve functionality and maintenance of the three Rio Grande flood control projects while supporting initiatives for improvements in environmental conditions and utilization of water resources.

Availability: Single hard copies of the Record of Decision may be obtained by request at the above address. Electronic copies may also be obtained from the USIBWC Home Page at <http://www.ibwc.state.gov>.

Dated: February 25, 2008.
