The Committee will continue to work on alternatives for consideration in the Council's draft Comprehensive Allocation Amendment. The amendment addresses allocations between recreational and commercial fishing sectors. The amendment currently includes alternatives to determine allocations based on (1) Landings data from the National Marine Fisheries Service or Atlantic Coast Cooperative Statistics Program, (2) Catch data from stock assessments (including discard mortality), (3) the Council's Judgement on Fairness and Equity, and (4) detailed economic and social analysis. The Committee will receive a report on social projects/data collection completed or planned for the South Atlantic region, an overview of previous management actions and how reductions in harvest were applied to each sector, and a presentation on the applicability of certain economic models that may prove useful for helping to determine allocations for species managed by the Council.
