

temporary modification in behavior by marine mammals. While behavioral modifications may be made by these species as a result of these surf zone detonation and amphibious vehicle training activities, any behavioral change is expected to have a negligible impact on the affected species. Also, given the infrequency of these testing/training missions (maximum of once per year for surf zone detonation and maximum of twice per year for amphibious assault training involving live fire), there is no potential for long-term displacement or long-lasting behavioral impacts of marine mammals within the proposed action area. In addition, the potential for temporary hearing impairment is very low and would be mitigated to the lowest level practicable through the incorporation of the mitigation and monitoring measures proposed in this document.

Proposed Authorization

NMFS proposes to issue an IHA to Eglin AFB for conducting surf zone and amphibious vehicle and weapon testing/training off the coast of SRI in the northern GOM provided the previously mentioned mitigation, monitoring, and reporting requirements are incorporated.

Information Solicited

NMFS requests interested persons to submit comments and information concerning this proposed IHA and Eglin's application for incidental take regulations (see ADDRESSES). NMFS requests interested persons to submit comments, information, and suggestions concerning both the request and the structure and content of future regulations to allow this taking. NMFS will consider this information in developing proposed regulations to govern the taking.
