Approval and Promulgation of Implementation Plans; State of Missouri

AGENCY: Environmental Protection Agency (EPA).

ACTION: Proposed rule.

SUMMARY: EPA is proposing a revision to the Missouri State Implementation Plan (SIP) to include the State's recently revised ozone season NO_x cap and trade rules for electric generating units (EGUs) and non-electric generating units (Non-EGUs) submitted on May 18, 2007. Two existing rules were revised by the State to allow for the transition into the State's recently adopted ozone season trading rule to meet the requirements of the Clean Air Interstate Rule (CAIR). The ozone season rules, an interstate cap and trade rule for EGUs and Non-EGUs in the eastern one-third of the State and a statewide intrastate trading rule for EGUs, were revised to include language that will rescind their requirements in the year 2009, the year

CAIR compliance begins. The CAIR ozone season trading rule is more restrictive than the aforementioned rules, and this action is needed to avoid imposing duplicative requirements for the affected sources in the year 2009 and thereafter.

DATES: Comments on this proposed action must be received in writing by May 2, 2008.

ADDRESSES: Submit your comments, identified by Docket ID No. EPA-R07-OAR-2008-0100, by mail to Michael Jay, Environmental Protection Agency, Air Planning and Development Branch, 901 North 5th Street, Kansas City, Kansas 66101. Comments may also be submitted electronically or through hand delivery/courier by following the detailed instructions in the **ADDRESSES** section of the direct final rule located in the rules section of this **Federal Register**.

FOR FURTHER INFORMATION CONTACT: Michael Jay at (913) 551-7460, or by e-mail at jay.michael@epa.gov.

SUPPLEMENTARY INFORMATION: In the final rules section of this **Federal Register**, EPA is approving the state's SIP revision as a direct final rule without prior proposal because the Agency views this as a noncontroversial revision amendment and anticipates no relevant adverse comments to this action. A detailed rationale for the approval is set forth in the direct final rule. If no relevant adverse comments are received in response to this action, no further activity is contemplated in relation to this action. If EPA receives relevant adverse comments, the direct final rule will be withdrawn and all public comments received will be addressed in a subsequent final rule based on this proposed action. EPA will not institute a second comment period on this action. Any parties interested in commenting on this action should do so at this time. Please note that if EPA receives adverse comment on part of this rule and if that part can be severed from the remainder of the rule, EPA may adopt as final those parts of the rule that are not the subject of an adverse comment. For additional information, see the direct final rule which is located in the rules section of this **Federal Register**.

Approval and Promulgation of Implementation Plans; State of Missouri

AGENCY: Environmental Protection Agency (EPA).

ACTION: Proposed rule.

SUMMARY: EPA proposes to approve a State Implementation Plan (SIP) revision to exempt initial fueling of motor vehicles at automobile assembly plants in the St. Louis metropolitan area from the Missouri Performance Evaluation Test Procedures (MO/PETP) approval test requirements. MO/PETP requirements were initially implemented to maintain the integrity of local air quality by regulating gasoline fueling emissions. The Missouri Department of Natural Resources (MDNR) provided an air quality analysis and it was determined that removal of these test requirements for initial fueling at automobile assembly plants will not adversely affect air quality in the St. Louis area. In addition, certain portions of the rule were renumbered and reformatted. This revision will ensure consistency between the state and the federally-approved rules.

National Emission Standards for Hazardous Air Pollutants for Semiconductor Manufacturing

AGENCY: Environmental Protection Agency (EPA).

ACTION: Proposed rule.

SUMMARY: On October 19, 2006, EPA proposed amendments to the National Emission Standards for Hazardous Air Pollutants for Semiconductor Manufacturing, published on May 22, 2003. The purpose of the proposed amendments was to clarify the emission requirements for process vents by establishing a new maximum achievable control technology floor level of control for existing combined hazardous air pollutants process vent streams containing inorganic and organic hazardous air pollutants and adding requirements for new and reconstructed combined hazardous air pollutants process vents. For existing combined hazardous air pollutants process vents, EPA had proposed that the floor was no control. In light of *Sierra Club v. EPA*, we are re-proposing the requirements for existing and new combined hazardous air pollutants process in this supplemental proposal.

DATES: Comments must be received by EPA on or before May 2, 2008, unless a public hearing is requested by April 14, 2008. If a hearing is requested, EPA will hold a public hearing on April 17, 2008. If a hearing is requested, written comments must be received by May 19, 2008. If you are interested in attending the public hearing, contact Mr. John Schaefer at (919) 541-0296 to verify that a hearing will be held.
