

During round 12, the BLS proposes to modify the financial and in-kind incentives offered to respondents to encourage greater cooperation both in the current round and in future rounds. The changes to the round 12 incentive structure are based on the results of an incentive experiment conducted during rounds 10 and 11. Other changes in round 12 include asking the political participation questions that were asked previously in rounds 8 and 10. The round 12 questionnaire includes an item in the health section and in the interviewer remarks section asking the respondent and interviewer, respectively, to code the respondent's skin color on a scale from 0 to 10. This information is useful for studying workplace discrimination and for

assessing the risk of certain health conditions.
