Title: Annual Student Activities

Report for the Jacob K. Javits Fellowship Program.

Frequency: Annually.

Affected Public:

Not-for-profit institutions.

Reporting and Recordkeeping Hour Burden:

Responses: 190.

Burden Hours: 570.

Abstract: This information collection provides the U.S. Department of Education with information needed to determine if fellows have made substantial progress toward meeting the program's objectives and allows program staff to monitor and evaluate time-to-degree completion and the graduation rate. The Congress has mandated (through the Government Performance and Results Act of 1993) that the U.S. Department of Education provide documentation about the progress being made by the program. Program staff have made minor adjustments to the report to improve the clarity of the document, and to ensure more effective data collection and evaluation of program performance. However, the current burden estimate of three hours per response remains the same, pending feedback from respondents after the approved Annual Student Activities Report is extended and implemented.

Requests for copies of the information collection submission for OMB review may be accessed from <http://edicsweb.ed.gov>, by selecting the "Browse Pending Collections" link and by clicking on link number 3571. When you access the information collection, click on "Download Attachments" to view. Written requests for information should be addressed to U.S. Department of Education, 400 Maryland Avenue, SW., LBJ, Washington, DC 20202-4537. Requests may also be electronically mailed to ICDocketMgr@ed.gov or faxed to 202-401-0920. Please specify the complete title of the information collection when making your request.

Comments regarding burden and/or the collection activity requirements should be electronically mailed to ICDocketMgr@ed.gov. Individuals who use a telecommunications device for the deaf (TDD) may call the Federal Information Relay Service (FIRS) at 1-800-877-8339.

SUPPLEMENTARY INFORMATION:

Background: Under Subtitle J, Section 999, the Secretary of Energy is required to carry out a program of research, development, demonstration, and commercial application of technologies for ultra-deepwater and unconventional natural gas and other petroleum resource exploration and production, including addressing the technology challenges for small producers, safe operations, and environmental mitigation (including reduction of greenhouse gas emissions and sequestration of carbon). The activities should maximize the value of natural gas and other petroleum resources of the United States by increasing the supply of such resources through reducing the cost and increasing the efficiency of exploration for and production of such resources while improving safety and minimizing environmental impacts.
