

The Census Bureau uses the Survey of Building and Zoning Permit Systems to obtain information from state and local building permit officials needed for updating the universe of permit-issuing places. The questions pertain to the legal requirements for issuing building or zoning permits in the local jurisdictions. Information is obtained on such items as geographic coverage and types of construction for which permits are issued.

The universe of permit-issuing places is the sampling frame for the Building Permits Survey (BPS) and the Survey of Construction (SOC). These two sample surveys provide widely used measures of construction activity, including the economic indicators Housing Units Authorized by Building Permits and Housing Starts.

II. Method of Collection

The form is sent to a jurisdiction when the Census Bureau has reason to believe that a new permit system has been established or an existing one has changed, based on information from a variety of sources including survey respondents, regional councils and the Census Bureau's Geography Division which keeps abreast of changes in corporate status.

SUPPLEMENTARY INFORMATION

I. Abstract

The Census Bureau plans to request a revision of the currently approved Office of Management and Budget (OMB) clearance of the Current Industrial Reports (CIR) Program. The Census Bureau conducts a series of monthly, quarterly, and annual surveys as part of the Current Industrial Reports (CIR) program. The CIR surveys deal mainly with the quantity and value of shipments of particular products and occasionally with data on production and inventories; unfilled orders, receipts, stocks and consumption; and comparative data on domestic production, exports, and imports of the products they cover. These surveys provide continuing and timely national statistical data on manufacturing. Individual firms, trade associations, and market analysts use the results of these surveys extensively in planning or recommending marketing and legislative strategies.

The CIR program includes both mandatory and voluntary surveys. Typically, the monthly and quarterly surveys are conducted on a voluntary basis and annual collections are mandatory. The collection frequency of individual CIR surveys is determined by the cyclical nature of production, the need for frequent trade monitoring, or the use of data in Government economic indicator series. Some monthly and quarterly CIR surveys have an annual "counterpart" collection. The annual counterpart collects annual data on a mandatory basis from those firms not participating in the more frequent collection.

Previously, the CIR surveys were divided among three separate waves and submitted separately for OMB review. Due to the reduced number of surveys in the CIR program, the CIR surveys are being combined into one wave. The surveys included are:

Mandatory surveys	Voluntary surveys

II. Method of Collection

The Census Bureau will use mail out/mail back survey forms to collect data. It is requested that respondents return monthly report forms within 10 days, quarterly report forms within 15 days, and annual report forms within 30 days of the initial mailing. Telephone calls and/or letters encouraging participation will be mailed to respondents who have not responded by the designated time.
