This rule section allows commercial and private land mobile radio licensees

to use common point telephone interconnection with telephone service costs distributed on a non-profit cost sharing basis. Records of such arrangements must be placed in the licensee's station file and made available to participants in the sharing arrangement and the Commission upon request. Licensees in the Industrial/Business Pool and those licensees who establish eligibility pursuant to 47 CFR 90.20(a)(2), other than persons or organizations charged with specific fire protection activities, persons or organizations charged with specific forestry-conservative activities, or medical emergency systems in the 450-470 MHz band, and who seek to connect within 120 km (75 miles) of 25 cities specified in 47 CFR 90.477(d)(3), must obtain the consent of all co-channel licenses located both within 120 km of the center of the city, and within 120 km of the interconnected base station transmitter. Consensual agreements must specifically state the terms agreed upon and a statement must be submitted to the Commission indicating that all co-channel licensees have consented to the use of interconnection.

These requirements to keep records when the land stations involved are multiple licensed or shared is mandated by the requirements set forth in 47 U.S.C. 332(c) of the Communications Act of 1934, as amended, regarding inter-service sharing opportunities in the private mobile services. The information is used by the participating licensees to effect the required cost sharing.
