

Proposed Project: National Health Service Corps Recruitment and Retention Assistance Application (OMB No. 0915-0230)—Extension

The National Health Service Corps (NHSC) of the Bureau of Clinician Recruitment and Service (BCRS), HRSA, is committed to improving the health of the Nation's underserved by uniting communities in need with caring health

professionals and by supporting communities' efforts to build better systems of care.

The Application for NHSC Recruitment and Retention Assistance, submitted by sites, requests information on the practice site, sponsoring agency, recruitment contact, staffing levels, service users, charges for services, employment policies, and fiscal management capabilities. Assistance in

completing the application may be obtained through the appropriate State Primary Care Offices, State Primary Care Associations and the NHSC. The information on the application is used for determining the eligibility of sites and to verify the need for NHSC providers. Sites must apply once every three years.

The estimated burden is as follows:

Type of report	Number of respondents	Responses per respondent	Hours per response	Total burden hours
NHSC Clinical Retention Information	2900	1	0.5	1450

Send comments to Susan G. Queen, PhD, HRSA Reports Clearance Officer, Room 10-33, Parklawn Building, 5600 Fishers Lane, Rockville, MD 20857. Written comments should be received within 60 days of this notice.

Dated: April 25, 2008.

Alexandra Huttinger,
Director, Division of Policy Review and Coordination.

Agency Information Collection Activities: Proposed Collection: Comment Request

In compliance with the requirement for opportunity for public comment on proposed data collection projects (section 3506(c)(2)(A) of Title 44, United States Code, as amended by the Paperwork Reduction Act of 1995, Pub. L. 104-13), the Health Resources and Services Administration (HRSA)

publishes periodic summaries of proposed projects being developed for submission to the Office of Management and Budget (OMB) under the Paperwork Reduction Act of 1995. To request more information on the proposed project or to obtain a copy of the data collection plans and draft instruments, call the HRSA Reports Clearance Officer on (301) 443-1129.

Comments are invited on: (a) The proposed collection of information for the proper performance of the functions of the agency; (b) the accuracy of the agency's estimate of the burden of the proposed collection of information; (c) ways to enhance the quality, utility, and clarity of the information to be collected; and (d) ways to minimize the burden of the collection of information on respondents, including through the use of automated collection techniques or other forms of information technology.

Proposed Project: Voluntary Partner Surveys in the Health Resources and Services Administration—(OMB No. 0915-0212): Extension

In response to Executive Order 12862, the Health Resources and Services

Administration (HRSA) conducts voluntary customer surveys of its partners to assess strengths and weaknesses in program services. To continue the periodic customer or partner satisfaction survey activities, HRSA is requesting an extension of approval from OMB. HRSA partners are, typically, State or local governments, health care facilities, health care consortia, and health care providers. Partner surveys to be conducted by HRSA might include, for example, brief surveys of grantees to determine satisfaction with a technical assistance contractor, or, in-class evaluation forms completed by providers who receive training from HRSA grantees, to measure satisfaction with the training experience. Results of these surveys will be used to plan and direct program efforts as needed to improve service. Focus groups may also be used as a potential method to obtain input on services and training. Focus groups, in-class evaluation forms, and satisfaction surveys provide valuable input from HRSA partners and customers on agency services and materials. The estimated annual burden is as follows:

Instrument	Number of respondents	Responses per respondent	Total responses	Hours per response	Total burden hours
In-class evaluations	40,000	1	40,000	.05	2,000
Surveys	12,000	1	12,000	.25	3,000
Focus groups	50	1	50	1.5	75
Total	52,050	52,050	5,075

Send comments to Susan G. Queen, PhD, HRSA Reports Clearance Officer, Room 10-33, Parklawn Building, 5600 Fishers Lane, Rockville, MD 20857. Written comments should be received within 60 days of this notice.

Dated: April 23, 2008.

Proposed Collection; Comment Request; the Agricultural Health Study: A Prospective Cohort Study of Cancer and Other Disease Among Men and Women in Agriculture (NCI)

SUMMARY: In compliance with the requirement of section 3506(c)(2)(A) of the Paperwork Reduction Act of 1995,

for opportunity for public comment on proposed data collection projects, the National Cancer Institute (NCI), the National Institutes of Health (NIH) will publish periodic summaries of proposed projects to be submitted to the Office of Management and Budget (OMB) for review and approval.

Proposed Collection: Title: The Agricultural Health Study: A Prospective Cohort Study of Cancer and Other Disease Among Men and Women in Agriculture (NCI) (OMB#: 0925-0406). Type of Information Collection Request: Renewal. Need and Use of Information Collection: The purpose of this information collection is to continue and complete updating the occupational and environmental exposure information as well as medical history information for respondents enrolled in the Agriculture Health Study. This represents a request to continue and complete phase III (2005-2008) of the study. Due to reduced annual budgets for research, a delay in data collection has resulted and there has not been enough time to complete

the data collection on the number of respondents that had been originally requested in 2005 OMB submission. The primary objectives of the study are to determine the health effects resulting from occupational and environmental exposures in the agricultural environment. The data will be collected by using a computer assisted telephone interview (CATI) system. A small percentage of the respondents will also be asked to participate in a buccal cell collection which is a sample of loose cells from the respondent's mouth. The findings will provide valuable information concerning the potential link between agricultural exposures and cancer and other chronic diseases among agricultural Health Study cohort members, and this information may be generalized to the entire agricultural community. *Frequency of Response:* Once. *Affected Public:* Private Sector, Farms. *Type of Respondents:* Licensed pesticide applicators and their spouses. The annual reporting burden is as follows:

ESTIMATES OF HOUR BURDEN

Type of respondent	Instrument	Estimated annual number of respondents	Frequency of response	Average time per response (hours)	Annual burden hours
Private Applicators	CATI only	8,754	1	35/60	5,106.50
	CATI & buccal cell	250	1	1	250.00
Spouses	CATI only	8,041	1	35/60	4,690.58
	CATI & buccal cell	500	1	1	500.00
Commercial Applicators	CATI only	2,787	1	35/60	1,625.75
	CATI & buccal cell	250	1	1	250.00
Totals	20,582.00	12,422.83

The annualized cost to respondents is estimated at: \$109,652 each year for a three year period. There are no capital costs, operating costs, and/or maintenance costs to report.

Request for Comments: Written comments and/or suggestions from the public and affected agencies are invited on one or more of the following points: (1) Whether the proposed collection of information is necessary for the proper performance of the function of the agency, including whether the information will have practical utility; (2) The accuracy of the agency's estimate of the burden of the proposed collection of information, including the validity of the methodology and assumptions used; (3) Ways to enhance the quality, utility, and clarity of the information to be collected; and (4) Ways to minimize the burden of the collection of information on those who are to respond, including the use of

appropriate automated, electronic, mechanical, or other technological collection techniques or other forms of information technology.

FOR FURTHER INFORMATION CONTACT: To request more information on the proposed project or to obtain a copy of the data collection plans and instruments, contact Michael Alavanja, Dr.P.H, Occupational and Environmental Epidemiology Branch, Division of Cancer Epidemiology and Genetics, National Cancer Institute, NIH, Executive Plaza South, Room 8000, 6120 Executive Blvd., Rockville MD 20892 or call 301-496-9093 or e-mail your request, including your address to: alavanjm@mail.nih.gov.

Comments Due Date: Comments regarding this information collection are best assured of having their full effect if received within 60 days of the date of this publication.

Dated: April 22, 2008.

Vivian Horovitch-Kelley,

NCI Project Clearance Liaison Office, National Institutes of Health.
