

**ACTION:** Submission for OMB review; comment request.

**SUMMARY:** The National Science Foundation (NSF) has submitted the following information collection requirement to OMB for review and clearance under the Paperwork Reduction Act of 1995, Pub. L. 104–13. This is the second notice for public comment; the first was published in the **Federal Register** at 73 FR 12471, and no substantial comments were received. NSF is forwarding the proposed renewal submission to the Office of Management and Budget (OMB) for clearance simultaneously with the publication of this second notice. Comments regarding (a) Whether the collection of information is necessary for the proper performance of the functions of the agency, including whether the information will have practical utility; (b) the accuracy of the agency's estimate of burden including the validity of the methodology and assumptions used; (c) ways to enhance the quality, utility and clarity of the information to be collected; (d) ways to minimize the burden of the collection of information on those who are to respond, including through the use of appropriate automated, electronic, mechanical, or other technological collection techniques or other forms of information technology should be addressed to: Office of Information and Regulatory Affairs of OMB, Attention: Desk Officer for National Science Foundation, 725 17th Street, NW., Room 10235, Washington, DC 20503, and to Suzanne H. Plimpton, Reports Clearance Officer, National Science Foundation, 4201 Wilson Boulevard, Suite 295, Arlington, Virginia 22230 or send e-mail to [splimpto@nsf.gov](mailto:splimpto@nsf.gov). Comments regarding these information collections are best assured of having their full effect if received within 30 days of this notification. Copies of the submission may be obtained by calling 703–292–7556.

NSF may not conduct or sponsor a collection of information unless the collection of information displays a currently valid OMB control number and the agency informs potential persons who are to respond to the collection of information that such persons are not required to respond to the collection of information unless it displays a currently valid OMB control number.

**SUPPLEMENTARY INFORMATION:**

*Title of Collection:* 2008 National Survey of Recent College Graduates.

*OMB Approval Number:* 3145–0077.

*Type of Request:* Intent to seek approval to extend an information collection for three years.

**1. Abstract**

The National Survey of Recent College Graduates (NSRCG) has been conducted biennially since 1974. The 2008 NSRCG will consist of a sample of individuals who have recently completed bachelor's and master's degrees in science, engineering and health from U.S. institutions. The purpose of this study is to provide national estimates on the new entrants in the science and engineering workforce and to provide estimates on the characteristics of recent bachelor's and master's graduates with science, engineering, and health degrees. The study is one of three components of the Scientists and Engineers Statistical Data System (SESTAT), which produces national estimates of the size and characteristics of the nation's science and engineering workforce.

The National Science Foundation Act of 1950, as subsequently amended, includes a statutory charge to “ \* \* \* provide a central clearinghouse for the collection, interpretation, and analysis of data on scientific and engineering resources, and to provide a source of information for policy formulation by other agencies of the Federal Government.” The NSRCG is designed to comply with these mandates by providing information on the supply and utilization of the nation's recent bachelor's and master's level scientists and engineers. Collected data will be used to produce estimates of the characteristics of these individuals. They will also provide necessary input into the SESTAT labor force data system, which produces national estimates of the size and characteristics of the country's science and engineering personnel. The Foundation uses this information to prepare congressionally mandated reports such as *Women, Minorities and Persons with Disabilities in Science and Engineering and Science and Engineering Indicators*. NSF publishes statistics from the survey in many reports, but primarily in the biennial series, *Characteristics of Recent Science and Engineering Graduates in the United States*. A public release file of collected data, designed to protect respondent confidentiality, will be made available to researchers on CD-ROM and on the World Wide Web.

Mathematica Policy Research will conduct the study under contract for NSF. Data are obtained by mail questionnaire, computer assisted telephone interview and web survey beginning October 2008. The survey

will be collected in conformance with the Confidential Information Protection and Statistical Efficiency Act of 2002 and Privacy Act of 1974. The individual's response to the survey is voluntary. NSF will insure that all information collected will be kept strictly confidential and will be used only for research or statistical purposes.

**2. Expected Respondents**

A statistical sample of approximately 18,000 bachelor's and master's degree recipients in science, engineering, and health from the academic years 2006 and 2007 will be contacted in 2008. The total response rate in 2006 was 67%.

**3. Burden on the Public**

The amount of time to complete the questionnaire may vary depending on an individual's circumstances; however, on average it will take approximately 25 minutes to complete the survey. Assuming a 80% response rate, NSF estimates that the total burden for the 2008 NSRCG will be 6,100 hours.

Dated: May 12, 2008.

NSF may not conduct or sponsor a collection of information unless the collection of information displays a currently valid OMB control number and the agency informs potential persons who are to respond to the collection of information that such persons are not required to respond to the collection of information unless it displays a currently valid OMB control number.

#### SUPPLEMENTARY INFORMATION:

*Title of Collection:* 2008 National Survey of College Graduates.

*OMB Approval Number:* 3145-0141.

*Expiration Date of Approval:* February 28, 2009.

*Type of Request:* Intent to seek approval to extend an information collection for three years.

#### 1. Abstract

The National Survey of College Graduates (NSCG), formerly called the National Survey of Natural and Social Scientists and Engineers, has been conducted biennially since the 1970s. The 2008 NSCG will consist of a sample of individuals under age 76 who had responded to the 2006 NSCG, and the 2006 National Survey of Recent College Graduates who either have at least one bachelor's degree in a science and engineering (S&E) field, or have at least a bachelor's degree in a non-S&E field but work in an S&E occupation. The purpose of this longitudinal study is to provide national estimates on the science and engineering workforce and changes in employment, education and demographic characteristics. The study is one of three components of the Scientists and Engineers Statistical Data System (SESTAT), which produces national estimates of the size and

characteristics of the nation's science and engineering workforce.

The National Science Foundation Act of 1950, as subsequently amended, includes a statutory charge to " \* \* \* provide a central clearinghouse for the collection, interpretation, and analysis of data on scientific and engineering resources, and to provide a source of information for policy formulation by other agencies of the Federal Government." The NSCG is designed to comply with these mandates by providing information on the supply and utilization of the nation's scientists and engineers. Collected data will be used to produce estimates of the characteristics of these individuals. They will also provide necessary input into the SESTAT labor force data system, which produces national estimates of the size and characteristics of the country's science and engineering personnel. The Foundation uses this information to prepare congressionally mandated reports such as *Women, Minorities and Persons with Disabilities in Science and Engineering and Science and Engineering Indicators*. A public release file of the SESTAT collected data, designed to protect respondent confidentiality, will be made available to researchers on CD-ROM and on the World Wide Web.

The Bureau of the Census, as in the past, will conduct the study for NSF. Questionnaires will be mailed in October 2008 and nonrespondents to the mail questionnaire will be followed up by computer-assisted telephone interviewing. The survey will be collected in conformance with the Confidential Information Protection and Statistical Efficiency Act of 2002 and Privacy Act of 1974. The individual's response to the survey is voluntary. NSF will insure that all information collected will be kept strictly confidential and will be used only for research or statistical purposes.

#### 2. Expected Respondents

A statistical sample of approximately 68,000 persons, identified as having at least one bachelor's degree in a science and engineering (S&E) field, or having at least a bachelor's degree in a non-S&E field but working in an S&E occupation, will be contacted. The total response rate in 2006 was 87%.

#### 3. Burden on the Public

The amount of time to complete the questionnaire may vary depending on an individual's circumstances; however, on average it will take approximately 25 minutes to complete the survey. Assuming a 90% response rate, NSF

estimates that the total burden for the 2008 NSCG will be 25,600 hours.

Dated: May 12, 2008.

BILLING CODE 7555-01-P

## NUCLEAR REGULATORY COMMISSION

[Docket Nos. 50-336 and 50-423]

### Dominion Nuclear Connecticut, Inc.; Notice of Consideration of Issuance of Amendment to Renewed Facility Operating License, Proposed No Significant Hazards Consideration Determination, and Opportunity for a Hearing

The U.S. Nuclear Regulatory Commission (the Commission) is considering issuance of an amendment to Renewed Facility Operating License Nos. DPR-65 and NPF-49 issued to Dominion Nuclear Connecticut, Inc. (DNC, the licensee), for operation of the Millstone Power Station, Unit Nos. 2 (MPS2) and 3 (MPS3), located in New London County, Connecticut.

The proposed amendment would modify the Technical Specifications (TSs) and facility operating licenses in response to the application dated July 13, 2007, as supplemented by letters dated December 7, 2007, March 5 and 25, 2008, and April 28, 2008. The proposed amendment would establish more effective and appropriate action, surveillance, and administrative requirements related to ensuring the habitability of the control room envelope (CRE) in accordance with the Commission-approved TS Task Force (TSTF) Standard Technical Specification change traveler TSTF-448, Revision 3, "Control Room Habitability." Additionally, the proposed amendment would change the "irradiated fuel movement" terminology and adopt "movement of recently irradiated fuel assemblies" terminology consistent with TSTF-448, Revision 3.

Before issuance of the proposed license amendment, the Commission will have made findings required by the Atomic Energy Act of 1954, as amended (the Act), and the Commission's regulations.

The Commission has made a proposed determination that the amendment request involves no significant hazards consideration. Under the Commission's regulations in Title 10 of the Code of Federal Regulations (10 CFR), Section 50.92, this means that
