SUPPLEMENTARY INFORMATION: The Federal Emergency Management Agency (FEMA) publishes new Flood Insurance Rate Maps (FIRMs) in the form of paper maps, digital map images (the full-size FIRM Scans and letter-size FIRMettes) and digital geospatial flood hazard data (the Digital Flood Insurance Rate Map (DFIRM) Database product). The previously published maps are available only as paper maps or FIRM Scans/FIRMettes.

As required by 42 U.S.C. 4101 note, FIRM Scans/FIRMettes, published paper FIRMs, DFIRM Database products and printed versions produced from the official digital products are all equivalent to each other and represent official FEMA designations of the areas of special flood hazard, base flood elevations, insurance risk zones and other regulatory information, provided that all other geospatial data shown on the printed product meets or exceeds any accuracy standard promulgated by FEMA.

Beginning in 2001, most new FIRMs began showing a coordinate grid on the printed effective FIRM and are available as a DFIRM Database product. When a coordinate grid is shown on the printed FIRM or when the DFIRM Database version is available, the horizontal location of the flood hazard information is defined with respect to the primary coordinate system shown on the printed FIRM or stored in the DFIRM Database product. The horizontal location of the flood hazard information is not defined by its relationship to the base map features such as streets. If there are conflicting interpretations of the precise horizontal location of the areas of special flood hazard, the conflict shall be resolved using the grid coordinates shown on the printed FIRM or stored in the DFIRM Database product rather than the base map features.

Base map is defined as the set of physical and cultural features shown on a flood map to provide a geographic and visual context to the flood hazard information. Features depicted by the base map include roads, railroads,

buildings, lakes, streams, shorelines, jurisdiction boundaries, public land survey system information, land parcel, and orthoimagery.
